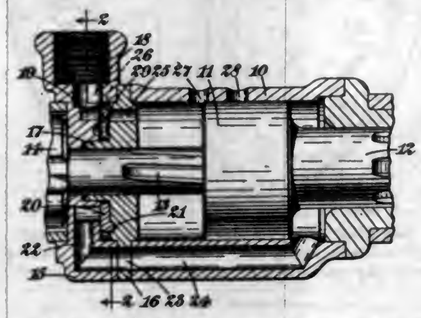
1. In a waste-collecting device of the type described, the combination with a principal waste collector, of a pipe leading therefrom, a stop abutment in the interior of said pipe, an auxiliary waste-collecting bag with a stiffened mouth located in said pipe in such a way that the mouth is directed towards the principal waste collector and the back of the mouth lies against the stop abutment, and means for applying suction to the pipe to draw the stream of fluff-laden air from the principal collector through the bag and thereby draw the back of the mouth of the bag against the stop abutment.

1,666,380. APPARATUS FOR MAKING CHAINS. ALBERT G. HEINLE, Crafton, Pa., assignor of three-eighths to Thomas A. McQuaide, Pittsburgh, Pa. Filed July 23, 1924. Serial No. 727,651. 18 Claims. (Cl. 59—27.)

1. Apparatus for forming chain links, comprising a fixed forming die having a peripheral groove, and unitary means for bending the bar into link form in said groove in a single operation.

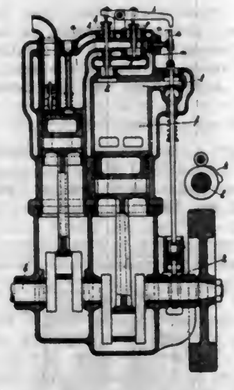
1,666,381. ROTARY FILTER. HENRY SELBY HELE-SHAW, REGINALD COLLES BEAUFOY STILLMAN, and JOSEPH ALLEN PICKARD, London, England. Filed Nov. 30, 1925, Serial No. 72,109, and in Great Britain Dec. 19, 1924. 12 Claims. (Cl. 210—196.)

1. In combination, a container for a body of fluid to be filtered, a rotatable filter operable therein, said filter comprising filter units disposed radially to and longitudinally of the axis of rotation of the filter and movable into and out of the body of fluid, and means operable over the surfaces of said filter units for removing accumulated material therefrom.



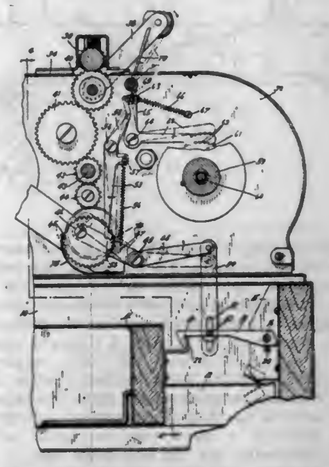
1,666,382. MUSIC CHART. HALESIA D. HOFFMEISTER, Los Angeles, Calif. Filed Mar. 9, 1927. Serial No. 173,997. 3 Claims. (Cl. 84—471.)

2. A music chart comprising a backing, strips extending longitudinally thereon in vertically spaced relation to each other and indicating staff lines, said strips having



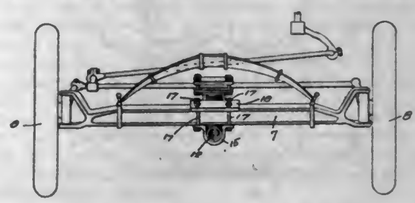
lower marginal portions secured to said backing and upper portions free, and elements provided with note indicating characters, said elements being provided with tongues extending in overlying relation to their rear faces and adapted to engage between the backing and free portions of said strips to suspend the elements from the strips in overlying relation thereto.

1,666,383. ROCK DRILL AND LIKE TOOL. ARTHUR TREVE HOLMAN and PERCY MYNORS HOLMAN, Camborne, England, assignors to Holman Brothers Limited, Camborne, Cornwall, England, a British Company. Filed July 13, 1926, Serial No. 122,180, and in Great Britain June 3, 1926. 3 Claims. (Cl. 121—22.)



1. In a fluid-operated rock-drill, the combination with a cylinder structure of a plate valve terminating near one end of a diameter thereof in a straight edge affording a rib extending from one face of the valve, a recess in an end wall of the cylinder structure for receiving said valve in a plane transverse to the cylinder axis, a groove in one face of said recess to receive said rib about which the vale is adapted to oscillate, and at least one passage through said valve to permit fluid to pass to opposite faces of the valve.

1,666,384. METHOD OF OPERATING EXPLOSIVE ENGINES. OSCAR WALFRID HULT, Stockholm, Sweden. Filed Feb. 28, 1923, Serial No. 621,919, and in Sweden Mar. 7, 1922. 7 Claims. (Cl. 123—75.)

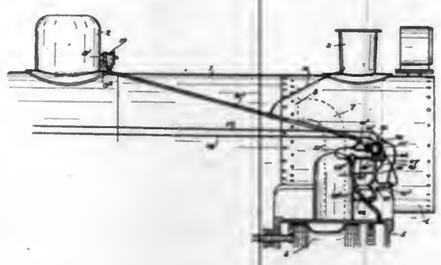


1. The method of operating an internal combustion engine, in which the working stroke is followed by an exhaust stroke and a charge stroke, which comprises compressing a combustible fluid, cooling said compressed combustible fluid, expanding a given volume of said compressed and cooled fluid while performing work and thereby cooling the fluid further, compressing the cooled and expanded fluid and using the fluid thus obtained for developing power under explosion in the working cylinder of said engine.

1,666,385. AUTOGRAPHIC-REGISTER CASH DRAWER. LOUIS JENSEN, Chicago, Ill., assignor to United Autographic Register Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 25, 1926. Serial No. 97,297. 16 Claims. (Cl. 235—22.)

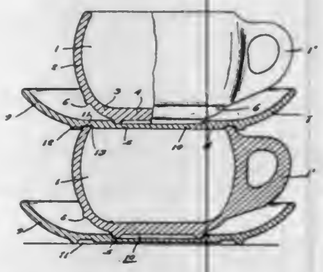
1. A device of the kind described comprising a hollow base, a drawer movable therein, a latch for maintaining the drawer normally closed, a rocking device for operating the latch, a gear train and actuating means therefor, and an eccentrically mounted element operated by the gear train whereby to actuate said rocking device and release the latch, said element adapted to gravitate out of co-operative relation with the gear train to cease operating the rocking device.

1,666,386. AUTOMOBILE STEERING MASTER. CHARLES A. JOHNSON, Sacramento, Calif. Filed Dec. 1, 1926. Serial No. 151,987. 1 Claim. (Cl. 280—94.)



In combination with the axle of an automobile, a steering mechanism comprising an operating link moving parallel to the axle, a spring fixed relative to the axle and supported thereby so as to extend toward the operating link, a ring encircling said ring and a swiveled connection between the ring and the link.

1,666,387. TORCH TIP. GEORGE I. JONES, Buffalo, N. Y., assignor to Oxweld Acetylene Company, a Corporation of West Virginia. Filed Mar. 31, 1927. Serial No. 179,911. 6 Claims. (Cl. 158—27.4.)

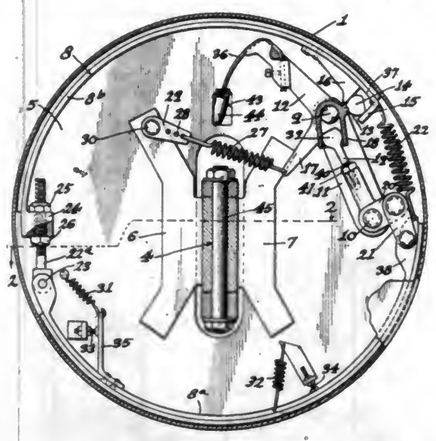


4. A chromium-plated torch tip.

1,666,388. ATTACHMENT TO LOCOMOTIVE. PETER BENJAMIN KAMEDISH, Winnipeg, Manitoba, Canada, assignor of one-third to Samuel Thomas Starr and one-third to Charles Henry Forrester, sr., Winnipeg, Manitoba, Canada. Filed Dec. 10, 1921. Serial No. 521,418. 6 Claims. (Cl. 121—137.)

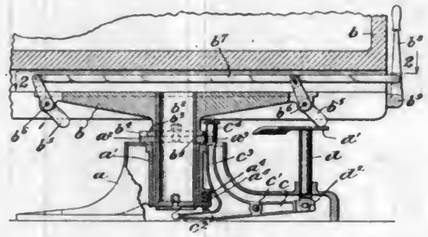
1. In a drifting attachment to locomotives, the combination with the locomotive cylinders, the throttle and the live steam pipe leading to the cylinders from the throttle, of a steam supply valve in direct communication with the boiler, means for unseating the valve coincident with the closing of the throttle, a normally closed steam cut-off valve connected with the steam supply valve, a double check valve, a pipe connection between the double check valve and the steam cut-off valve, a steam pipe connection between the double check valve and the cylinder exhaust passages, a steam pipe connection between the double check valve and the live steam pipe, a pipe connection between the steam cut-off valve and the live steam pipe, and means whereby a reduction of pressure in the live steam pipe effects the opening of the steam cut-off valve.

1,666,389. CUP AND SAUCER. JAMES L. MANDER, Winnipeg, Manitoba, Canada. Filed Nov. 11, 1926. Serial No. 147,805. 6 Claims. (Cl. 65—15.)



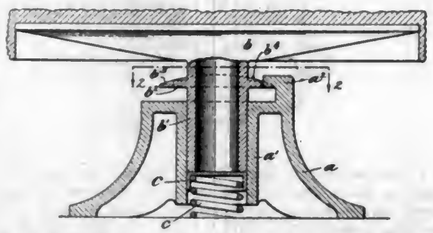
1. A saucer having a pocket in the upper face thereof of a size to receive the base of a cup and a continuous channel in the underface thereof of a size to fit the mouth of the aforesaid cup.

5. A cup having outwardly bulging side walls and terminating at the bottom in a base flange and provided above the flange and on the outer face thereof with a circumscribing horizontally disposed shoulder, the shoulder appearing beneath the line of greatest diameter of the cup.



1,666,390. VEHICLE BRAKE SYSTEM. DONALD MARLEY, Los Angeles, Calif., assignor of one-half to Francis J. Moore, Minneapolis, Minn. Filed Nov. 16, 1923. Serial No. 675,104. 17 Claims. (Cl. 188—194.)

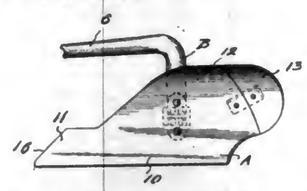
4. In a brake comprising a drum secured to a ground wheel and a plate secured to a spindle casting, a pair of levers pivotally mounted relatively to said plate and mechanically interconnected, the first of said levers being provided with an operating arm to which a flexible cord



is connected, and provided also with a comparatively short interconnecting arm adapted to engage a comparatively long operating arm upon the second of said levers.

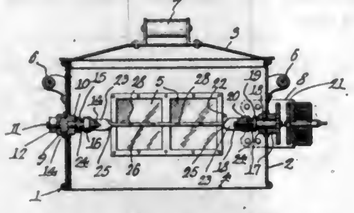
1,666,391. SEAT. ALFRED F. MASURY, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 27, 1926. Serial No. 137,919. 4 Claims. (Cl. 155—96.)

1. In a seat wherein the seat frame is mounted to rotate in a base, latch means carried by the base to engage the seat frame to prevent its rotation and means upon the seat frame to engage the latch in predetermined angular positions of the seat frame to release the latch.



1,666,392. SEAT. ALFRED F. MASURY, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 27, 1926. Serial No. 137,920. 1 Claim. (Cl. 155—96.)

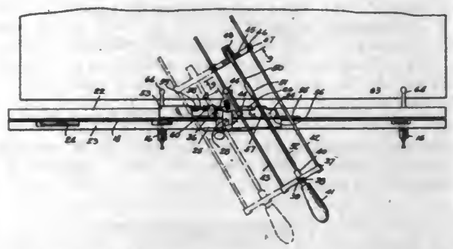
In a seat wherein the seat frame is supported in the base with capability for relative movements, a base seat frame mounted therein, a flange on the seat frame, a



plurality of double cam faces carried by the flange, notches between the cam faces, a dog carried by the base and a spring resisting downward movement of the frame to engage the dog with the notches and cam faces.

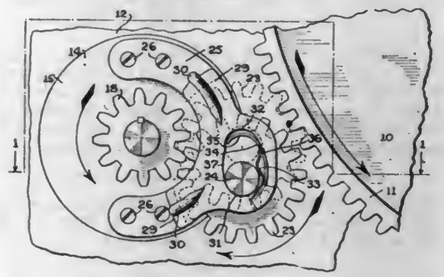
1,666,393. CULTIVATOR SHOVEL. JOHN C. MECKLENBURG, Hancock, Minn. Original application filed Oct. 20, 1923, Serial No. 669,833. Divided and this application filed Dec. 19, 1924. Serial No. 756,966. 1 Claim. (Cl. 97—203.)

A cultivator shovel constructed from a single blank of sheet metal including a body portion, a weed cutting nose formed on the body portion and extending an appreciable distance forwardly thereof, a downwardly inclined cutting edge on said nose, the body portion and nose being disposed at an angle to the vertical and to the longitudinal axis of the cultivator beam, and an outwardly and rearwardly curved mold board carried by the upper edge of the body, the rear edge of the body portion being curved upwardly and rearwardly to merge with the downwardly and forwardly curves of the rear edge of the mold board.



1,666,394. ROASTER. BEN E. MIOLIN, Archbald, Pa. Filed May 9, 1927. Serial No. 190,113. 1 Claim. (Cl. 53—5.)

In a device of the class described, a casing, a shaft supported for rotation in the casing, a spit comprising side members, and overlapped end members having slots, the shaft passing through the slots, a connecting element slidable in the slots on one side of the shaft, and a clamping device binding the overlapped end members on the shaft.



1,666,395. APPARATUS FOR SHARPENING HAND-SAWS. LOUIS S. MILLER, Los Angeles, Calif. Filed Oct. 21, 1925. Serial No. 64,008. 4 Claims. (Cl. 76—31.)

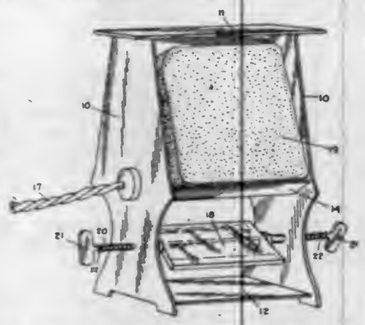
4. A saw sharpening apparatus comprising a saw holder including a plurality of spaced clamps and jaws in the form of angle bars between which a saw blade is adapted to be rigidly clamped throughout its length, the bars being arranged to provide vertical portions extending in opposite directions vertically and so as to dispose horizontal portions of the bars in different horizontal planes, a carriage comprising members having their confronting sides grooved to receive the edges of the horizontal portions of the angle bars so as to slidably support the carriage on the bars, one of said members having a lateral extension slidably associated with the other member, a clamping head on the other member, a socket member on the other member, means for securing the carriage member, clamping head and socket member together against relative movement, a file holder comprising adjustably connected frames slidably associated with the socket member and between which a file is adapted to be supported for engagement with the teeth of a saw in said jaws so that sharpening of the teeth of the saw will be effected upon reciproca-

tion of the file holder, and a gage comprising a body slidably mounted on one of the angle bars and having a fixed stop engageable by the said first member of the carriage for limiting the advancing movement of the carriage and an adjustable stop engaging the member for limiting the advancing movement of the gage.

1,666,396. ENGINE-STARTING APPARATUS. HAROLD PENDER, Philadelphia, Pa. Filed Jan. 22, 1920. Serial No. 353,328. 20 Claims. (Cl. 74—7.)

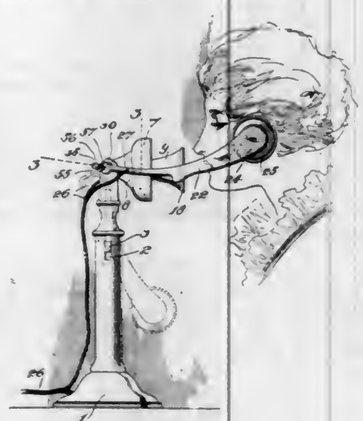
1. In engine starting apparatus, in combination, an engine driven gear, an auxiliary starting motor, a gear driven from said starting motor, a third gear, and means mounting said third gear in a position normally in engagement with said second gear and out of engagement with said first gear and laterally offset therefrom and shaped to permit bodily movement of said third gear and guide it laterally into mesh with said first gear in a path non-concentric with respect to the axis of said second gear upon said motor being driven in a predetermined direction.

1,666,397. TIRE CHAIN CLIP. JAMES L. PIATT, Wilkes-Barre, Pa., assignor to Paul S. Warriner, Wilkes-Barre, Pa. Filed June 25, 1927. Serial No. 201,396. 5 Claims. (Cl. 152—14.)



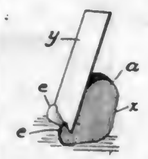
1. A tire chain clamp constructed to fit over the tread of the tire and clamp a portion of the chain contiguous opposite inclined sides inwardly of the widest part, said clamp being shaped to be out of contact with

said tire at its widest part to securely hold said chain against the tire under increase of the tire width with partial deflation.



2. A tire clamp constructed to fit over the tire tread and cooperate with the opposite inclined sides of the tire inwardly of its widest part, said clamp being shaped to be out of contact with said tire at its widest part, the sides of said clamp being shaped to engage and retain a tire chain adjacent the tire and said clamp, and the clamping portions being shaped to facilitate sliding in and out on contact with the ground under lateral bulging of the tire and while clamping the sides of the tire.

1,666,398. VISIBLE TOASTER. GEORGE W. PIERCE, Lincoln, Nebr. Filed Sept. 27, 1927. Serial No. 222,307. 2 Claims. (Cl. 35—5.)



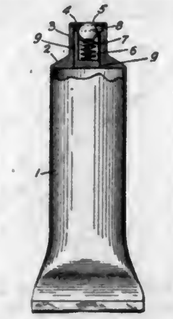
1. In combination with a toaster comprising a stand having a rack for supporting a slice of bread and a heating member spaced from said rack, a mirror adjustably secured to said stand and being adapted to reflect the bread surface which is being toasted, and means for yieldably holding said mirror in adjusted position.

1,666,399. TELEPHONE INSTRUMENT. JOHN J. RADEL, Newark, N. J. Filed Aug. 20, 1925. Serial No. 51,385. 6 Claims. (Cl. 179—153.)

1. A telephone-instrument comprising a standard having perforated ears, said standard being further provided with a make and break control, laterally extending rods mounted in said perforated ears, means upon said rods for preventing displacement of the same from said ears, a transmitter pivotally mounted upon portions of said rods, collars upon said rods, an arm pivotally mounted upon each rod against the collar thereon, a spring and adjusting nut upon each rod for maintaining the relative positions of the arms against said collars, each arm being provided with a rearwardly extending member, a receiver carried by each arm, and means associated with the members of said arms, whereby movement of one arm and its member will produce a movement of the other arm and its member, one of said arms cooperating with said make and break control.

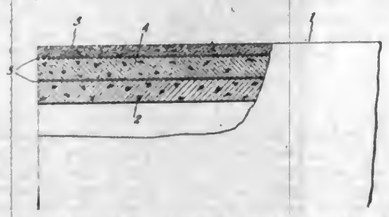
1,666,400. PLACE-CARD SUPPORT. HARRY M. ROSE, Philadelphia, Pa. Filed Jan. 29, 1927. Serial No. 164,630. 1 Claim. (Cl. 40—149.)

An easel for place cards which comprises a sheet of cardboard whose lower edge is notched midway of its length and which otherwise extends substantially straight and is adapted to rest on a flat surface and whose upper edge is notched midway of its length, said notches being in vertical alignment and being adapted to facilitate the bending of a card on a vertical center line to form two hinged-together wings adapted to extend in planes diverging from such vertical center line, the free ends of the wings being provided with ears adjacent the lower edge, the upper edge of each wing being convexly curved in opposite directions from the upper central notch so as to extend sucessively upwardly from the upper central notch and thence downwardly to the end ears of the wings and merging therewith to form crotches adapted to support a place card along its lower edge, the width of each wing, measured vertically, being of maximum width along a vertical line relatively distant from its hinged and free ends.



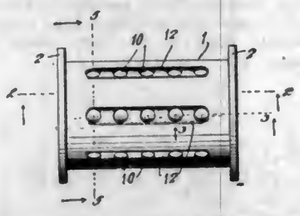
1,666,401. METAL TUBE. JULIUS L. SUSSMAN, Kew Gardens, N. Y., assignor to Steel & Tubes, Inc., Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 10, 1925. Serial No. 68,154. 2 Claims. (Cl. 41—10.)

1. An ornamented tube, including a main tubular body portion made up of a strip of comparatively thick sheet metal with its side edges butt-welded together to form a longitudinal seam, and a strip of thinner metal extending substantially the full length of the tube and of such width and so bent as to cover more than one-half of the surface of the tube, said strip having a portion intermediate of its edges embossed to present an ornamental design and having its opposite parallel side edges extending inwardly and resiliently engaging the opposite sides of the tube, said second mentioned strip serving to cover the seam of the plane tube and having such resiliency that it is held in place solely by the frictional engagement with the plane tube and snugly adheres to the latter.



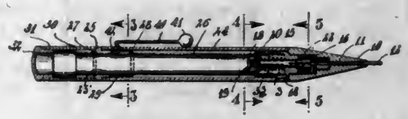
1,666,402. COLLAPSIBLE TUBE. ALEXANDER PAUL WOOD, Schenectady, N. Y., assignor of two-sevenths to Venie Wood Appel, New York, N. Y. Filed Nov. 6, 1925. Serial No. 67,220. 1 Claim. (Cl. 221—60.)

A tube provided with an outlet opening, said tube being also provided with a chamber therein and with a passageway forming communication between the interior of said tube and said outlet opening, a spring in said chamber and a ball engaged by said spring and movable into or out of said chamber, said ball normally closing said outlet opening under the influence of said spring,



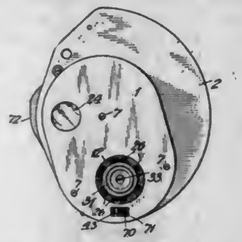
said ball being positioned in said chamber and extending into said passageway and being thereby subject to the influence of pressure of the contents of said tube therein for moving said ball away from said outlet opening and into said chamber.

1,666,403. PLATEN ROLLER FOR TYPEWRITERS. MIHRAN H. ALEXANIAN, Coytesville, N. J. Filed July 22, 1926. Serial No. 124,301. 2 Claims. (Cl. 91—67.8.)



1. A platen roller having a velvety surface of finely divided cork, said surface formed on a more coarsely ground layer of cork, and means for cementing the two layers together.

1,666,404. SPOOL. HENRY BAUCKER, Newark, N. J., assignor to American Aluminum Ware Company, a Corporation of New Jersey. Filed Feb. 24, 1927. Serial No. 170,577. 2 Claims. (Cl. 242—118.)

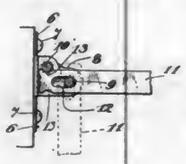


1. A spool comprising a substantially cylindrical tubular body, a pair of end plates of a diameter greater than that of said body and each having a central threaded opening and a countersink around one end of said opening, said plates each having a groove on its face opposite said countersink to receive one end of said body, and a tie member extending co-axially through said body and having its end portions threaded and each fitted into said opening in one of said end plates and its extremity upset into the corresponding countersink so as to overlie said end plate with the upset portion below the plane of the corresponding side of said end plate.

1,666,405. MAGAZINE PENCIL. MYRON H. CALDWELL and IDA GREEN, New York, N. Y.; said Green assignor to Arthur C. E. Hamilton, Mount Vernon, N. Y. Filed July 26, 1926. Serial No. 124,813. 2 Claims. (Cl. 120—17.)

1. In a magazine lead pencil, the combination with a pencil casing having arranged therein a slidable tube provided with a tapered portion urged against a locking sleeve by a spring to clamp a lead in position, passing therethrough, of a bushing attached to the casing, slidably supporting the tube, and formed with slots, a limiting element secured to the inner end of the tube, and provided with projecting elements slidably engaging in the said slots, and a cylinder formed with projecting curved cam elements engageable against the projecting elements of the limiting element, the said cylinder being rotatably mounted within the pencil, and adapted for manual turning, to move the tube against the action of its associated spring to unclamp the lead passing through the tube.

1,666,406. OPTICAL INSTRUMENT. HANS CLEMENT, New York, and BERNARD M. BARRON, Mount Vernon, N. Y., assignors to General Optical Company, Inc., a Corporation of New York. Filed Nov. 7, 1922. Serial No. 599,601. 17 Claims. (Cl. 88—22.)



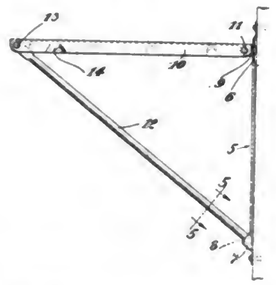
15. In an optical instrument, a supporting frame, a plurality of lens carrying elements supported by said frame for movement into eye examination positions singly and in various optical combination, transfer means between said elements for actuating one of them to bring a new lens into examination position for each movement of a given extent of the other element, and an indicating device separate from and connected to so as to be operated concomitantly with said other element and including means for indicating by successive direct individual readings the characteristics of the lenses and lens combinations which are in examination positions at any time.

1,666,407. GOGGLE NOSE BRIDGE. WILLIAM NEVINS COOK, New York, N. Y., assignor to E. B. Meyrowitz, Inc., a Corporation of New York. Filed Nov. 22, 1926. Serial No. 149,854. 10 Claims. (Cl. 88—43.)

6. A goggle comprising lens frames, a pair of nose-bridge members hinged thereto and having horizontal portions in telescopic engagement, one of said engaging portions being contractile, and means for contracting said engaging portion.

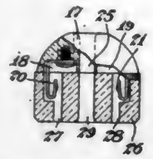
1,666,408. CURTAIN HOLDER. HUBERT DALTON, Stamford, Conn. Filed Oct. 21, 1926. Serial No. 143,035. 2 Claims. (Cl. 156—33.)

1. A curtain holder comprising a bracket member adapted to be attached to a window casing and having spaced parallel ears, a pair of pins extending between and fixed in said ears out of horizontal alignment with each other and spaced apart longitudinally of said ears, and a curtain holding arm formed of flat bar stock and slidably engaged at one of its ends between said ears and having a longitudinal slot through which one of said extends, and said arm being also provided in one of its longitudinal edges with a notch to receive the other of said pins when the arm is moved inwardly between the ears to thereby retain the arm in a horizontally disposed operative position and said arm adapted to be moved outwardly on the first named pin and disengaged from the second named pin to swing downwardly to a vertically pendant position.



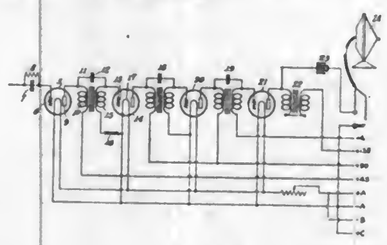
1,666,409. CURTAIN HOLDER. HUBERT DALTON, Stamford, Conn. Filed Oct. 21, 1926. Serial No. 143,036. 2 Claims. (Cl. 156—33.)

1. A curtain holder comprising a pair of separate bracket members adapted to be attached to a window frame in vertically spaced relation to each other, a pair of rods pivotally connected at one of their ends in such a manner as to be capable of suspension in longitudinal alignment or in angular relation, the other end of one rod being pivoted to the upper bracket member, and the other end of the second rod adapted to be detachably supported upon the lower bracket member to sustain said first named rod in a horizontally projecting position with respect to the upper bracket member, and transversely extending means adjacent the connected ends of said rods to prevent displacement of a supported curtain.



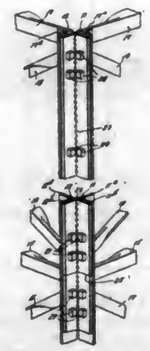
1,666,410. CURTAIN HOLDER. HUBERT DALTON, Stamford, Conn. Filed Oct. 21, 1926. Serial No. 143,037. 2 Claims. (Cl. 156—33.)

1. A curtain holder comprising an elongated bracket member adapted to be vertically positioned upon one side of a window frame and fixed thereto, said bracket member being formed of sheet metal with a longitudinally extending rib and at its lower end being provided with an apertured boss constituting a socket, a curtain holding arm pivotally connected at one of its ends with the upper end of said bracket plate, and a rod pivotally connected at one end to the other end of said arm and



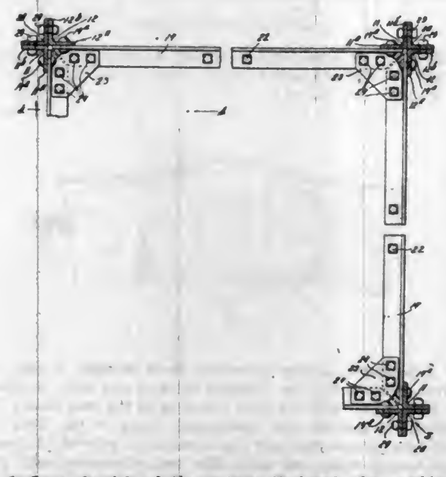
adapted to be engaged at its free end in said socket, to support said curtain holding arm in a substantially horizontal position with respect to the bracket plate.

1,666,411. ELECTRIC CONNECTER SOCKET. HENRY D'OLIER, Jr., Bridgeport, Conn. Filed Dec. 14, 1925. Serial No. 75,165. 4 Claims. (Cl. 173—343.)



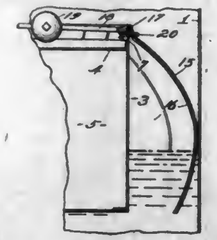
1. An electrical socket device for use with suspension means, and an electrical connecter provided with contacts and with a passage, associated therewith, said socket device including a body having plugging electrical contacts at one end for engagement with the contacts of the connecter, a hanger secured to and projecting from said body at said end thereof and adapted to project through the said passage and formed to be readily connectible to and disconnectible from the suspension means, and means at the opposite end of the body to support an electric light bulb.

1,666,412. AUDIOFREQUENCY AMPLIFIER. HAROLD P. DONLE, Meriden, Conn., assignor to Donle Electrical Products Corporation, Meriden, Conn., a Corporation of Connecticut. Filed Oct. 16, 1926. Serial No. 141,998. 5 Claims. (Cl. 179—171.)



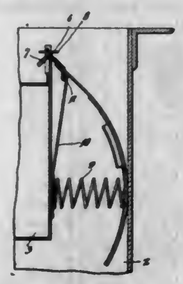
4. In an audio frequency amplifier having an inductive grid circuit, a resistance inserted in said circuit, said resistance having an impedance which is only a small fraction of the impedance of said circuit, but a resistance several times that of the total resistance of said circuit.

1,666,413. FABRICATED-DERRICK CONSTRUCTION. CLARENCE B. FOSTER, Glendale, Calif., assignor of one-sixth to Frederick L. Feisthamel, one-sixth to Arthur J. Carr, and one-sixth to Thomas A. Collins, Los Angeles, Calif. Filed July 17, 1926. Serial No. 123,136. 9 Claims. (Cl. 189—13.)



1. In a derrick of the nature disclosed, the combination of: adjacent sides each formed of a plurality of vertically aligned complete pre-assembled panel sections, with the panel sections of each side laterally spaced from those of the adjacent sides; intermediate corner legs disposed at the respective corners of the derrick and positioned between the horizontally adjacent panel sections; and means for securing said legs to said panel sections to connect the sides of the derrick together.

1,666,414. FABRICATED DERRICK. CLARENCE B. FOSTER, Glendale, Calif., assignor of one-sixth to Frederick L. Feisthamel, one-sixth to Arthur J. Carr, and one-sixth to Thomas A. Collins, Los Angeles, Calif. Filed July 17, 1926. Serial No. 123,137. 11 Claims. (Cl. 189—13.)

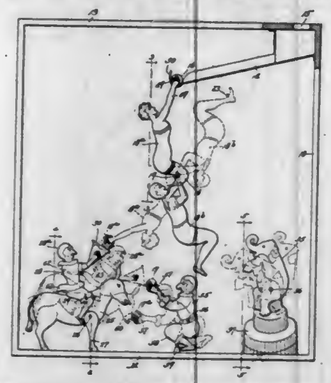


1. In a derrick of the nature disclosed, the combination of: adjacent sides each formed of a plurality of vertically aligned complete pre-assembled panel sections, with the panel sections of each side laterally spaced from those of the adjacent sides; intermediate corner legs disposed at the respective corners of the derrick and positioned between the horizontally adjacent panel sections; means for securing said legs to said panel sections to connect the sides of the derrick together; and means for connecting the panel sections of the adjacent sides independently of the intermediate corner legs.

1,666,415. FLOATING DECK OR COVER FOR OIL TANKS. CHARLES R. GALLAGHER, Fullerton, Calif., assignor to Universal Holding Company, Los Angeles, Calif., a Corporation of Delaware. Filed Sept. 22, 1924. Serial No. 739,122. 7 Claims. (Cl. 220—26.)

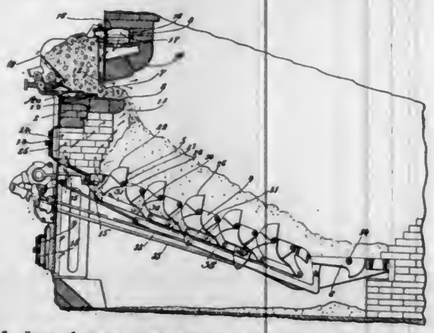
3. A buoyant deck for oil tanks having a circular series of sealing plates surrounding and pivotally mounted on the deck and adapted to move in vertical planes, the upper ends of said sealing plates being pivoted to the deck and the sealing plates being curved outwardly into engagement with the oil tank and hence curved inwardly and terminating in the liquid supporting the deck.

1,666,416. FLOATING DECK. ALVAH M. GRIFFIN, Los Angeles, Calif., assignor to Universal Holding Company, Los Angeles, Calif., a Corporation of Delaware. Filed Sept. 27, 1926. Serial No. 137,940. 5 Claims. (Cl. 220—26.)



1. A floating deck for oil tanks having a circular series of sealing plates surrounding and pivotally mounted on the deck, the sealing plates being adapted to swing outwardly into engagement with the tank wall, springs normally urging said sealing plates into an outer position, and spring supporting bars engaging the inner ends of said springs, said spring supporting bars being secured to said sealing plates at one end and depending therefrom the other end of the spring supporting bars engaging and supporting said springs.

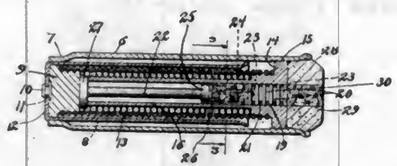
1,666,417. GRAVITY-OPERATED FIGURE TOY. WILLIAM W. HARRIS, New York, N. Y. Filed July 7, 1923. Serial No. 650,181. 2 Claims. (Cl. 46—40.)



1. In a gravity operated figure toy, the combination of an upright support, a base for the supports, a runway for marbles on said background, a figure pivotally mounted on said support and having a receiving and holding device positioned to receive a marble when delivered from said runway, said figure being pivoted slightly above its center of gravity, said marble receiving and holding device serving to transfer the marble while said figure is rotated from its upright position to a position horizontally below

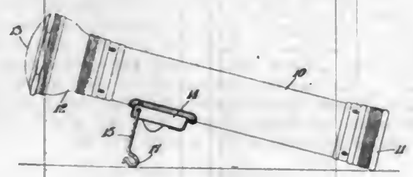
its pivot, a second figure pivotally mounted on said support and including a device for receiving a marble, said second-named figure being pivoted at a point substantially below its center of gravity, said marble receiving device being positioned to receive a marble after transfer thereto by said marble receiving and holding device of said first-named figure and a third figure pivotally mount-

ed on said support and disposed to normally hold said second figure in a predetermined position, whereby upon placing a marble in said runway, said marble successively rotates said first-named figure, and is transferred by said first-named figure to said second-named figure, and said second-named figure is rotated directly by said marble and indirectly rotates said third-named figure.



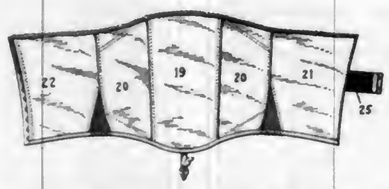
1,666,418. FURNACE. CHARLES J. HUSER, Baltimore, Md. Filed Dec. 16, 1925. Serial No. 75,675. 3 Claims. (Cl. 110—32.)

1. In a furnace having a feed opening, a grate, a coking shelf extending backward into the furnace at the lower side of the feed opening, above the grate and above the normal position of the fuel on the grate, a top wall exposed to radiation from the fire and extending backward above the shelf, the coking shelf and top wall being of heavy resistive material and serving as heat reservoirs to store heat and transmit it to the fuel, the furnace structure comprising a free and unobstructed passage for admitting outside air beneath and forward of the shelf, and a passage admitting air to the feed opening at the top surface of the fuel on the shelf.



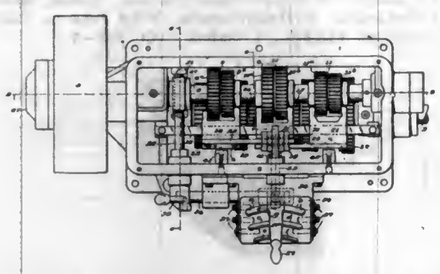
1,666,419. PISTON-PRESSURE GAUGE. JAMES F. KEY, Sierra Madre, Calif., assignor to First Trust & Savings Bank of Pasadena, trustee, Pasadena, Calif. Filed Apr. 1, 1925. Serial No. 19,815. 10 Claims. (Cl. 73—111.)

1. An air gauge comprising a barrel, a hollow plunger slidably mounted in the barrel and having a head, a coil spring means connecting one end of the spring to the barrel, means connecting the other end of the spring to the plunger, a cylinder inside of the plunger rigid with the barrel, a piston in the cylinder, a piston rod between the



piston and plunger head, a swab on the piston rod, and a sealing member in the end of the barrel adjacent the piston, and having an opening communicating with the bore of the cylinder.

1,666,420. FLASH LIGHT. HARRY M. KORETZKY, Hoboken, N. J., assignor to Bright Star Battery Company Inc., Hoboken, N. J., a Corporation of New York. Filed July 21, 1927. Serial No. 207,358. 3 Claims. (Cl. 240—10.5.)

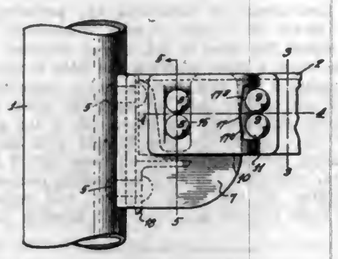


1. In a flashlight, a casing, a contact box on said casing, a bail pivotally connected to said contact box and being arranged to extend around said contact box when not in use, and means for maintaining said bail in angular relation to said casing.

1,666,421. BRASSIÈRE. JOSEPH W. KRAUSE, Brooklyn, N. Y. Filed Apr. 11, 1927. Serial No. 182,589. 1 Claim. (Cl. 2—42.)

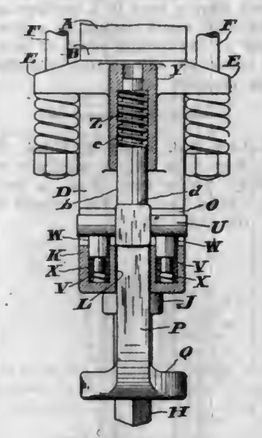
A brassière having a central front section, a pair of front side sections on opposite sides of the front section, a pair of rear sections each attached to the rear edge of a respective side section, reinforcing tapes at the lines of junction of the rear and side sections, a pair of diagonal reinforcing tapes on each side section respectively extending downwardly from the upper corner and upwardly from the lower corner of the adjacent side of the center section and terminating at the first mentioned tapes, tabs secured to the body of the garment on the inner side thereof at the junctions of the diagonal and first mentioned tapes, waist belt members extending from said tabs, means to connect the free edges of the back members, and means to connect said waist belt members.

1,666,422. MASTER RADIAL-DRILL SPEED BOX. DAVID C. KLAUSMEYER, Cincinnati, Ohio, assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Feb. 10, 1925. Serial No. 8,184. 4 Claims. (Cl. 74—57.)



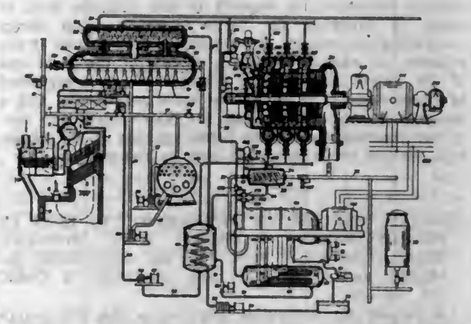
3. A speed box for machine-tools combining a casing; driving and driven shafts journaled in said casing; a plurality of gears splined upon the other of said shafts; means including a single lever for selectively shifting the splined gears into mesh with said fixed gears; a lever-controlling plate having a plurality of connected substantially parallel slots each affording an operative position for said lever; and adjustable stops for limiting the movement of said lever in said slots.

1,666,423. PROCESS OF STAINING AND HARDENING CONCRETE AND THE LIKE. ROBERT B. LAMMENS, Los Angeles, Calif. Filed Apr. 2, 1923. Serial No. 629,533. 3 Claims. (Cl. 41—41.)



1. In a process for treating concrete or the like, introducing a solution of one coloring reagent, and then introducing a solution of another coloring reagent to react with the first mentioned reagent to produce the desired color; each solution also containing in addition to its coloring re-agent a substance capable of producing a relatively high osmotic pressure.

1,666,424. BED LOCK. LOUIS N. LUMB, Astoria, N. Y. Filed July 30, 1925. Serial No. 46,944. 4 Claims. (Cl. 5—294.)

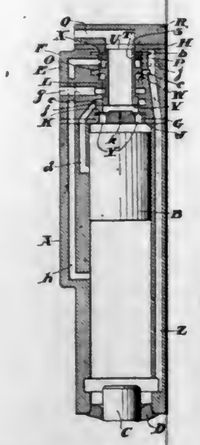


1. In a bed lock, the combination with a corner post and a side rail, of a wedge member permanently secured to the corner post and embodying an upstanding wedge, and an attaching plate permanently secured to the side rail and embossed to provide spaced apart abutments forming between them a constriction tapering both upwardly and downwardly to permit tight engagement of the wedge with said abutments when engaged thereby in either direction, and rivets passing through the embossed portions of the plate and through the side rail to secure said plate to the rail.

1,666,425. STEEL RETAINER. JOHN F. MOCK, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Apr. 7, 1927. Serial No. 181,732. 2 Claims. (Cl. 121—32.)

2. A steel retainer for a rock drill, comprising in combination with a front head and a collared working implement, a lug on the side of the front head having a longitudinal slot and a transverse slot, a retainer encircling the implement forwardly of its collar to retain said implement in the front head, one arm integral with the retainer guided by the longitudinal slot, a pin in the arm rotatable in the transverse slot to form a pivot for the retainer, said pin also being slidable in said transverse slot longitudinally of the front head, plungers in the lug acting on the pin to support the retainer, springs acting against the plungers to absorb the impact of the implement against the retainer, and a spring pressed plunger in the front head pressing against the free end of the arm to hold the retainer in retaining and releasing positions.

1,666,426. STEAM PLANT. JOHANNES RUTHS, Djursholm, Sweden. Filed Dec. 27, 1924, Serial No. 758,438, and in Germany and Sweden Jan. 14, 1924. 19 Claims. (Cl. 122—35.)

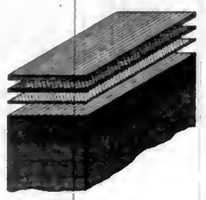


1. In a steam plant, in combination, a boiler containing a medium of high boiling point, said boiler generating vapor therefrom at a rate corresponding to the rate of supply of heat thereto, an accumulator, means to conduct vapor from said boiler to said accumulator, said accumulator operating independently of the supply

of vapor thereto and under variations of pressure corresponding to variations in state of charge; a steam generating element situated in said accumulator and means to conduct water to said steam generating element.

15. The method of generating high pressure steam which comprises storing heat in a medium of high boiling point, producing vapor thereof in proportion to demand for steam by the cooling effect of water and condensing said vapor by said water, thereby producing steam of high pressure.

1,666,427. VALVE FOR ROCK DRILLS. WILLIAM A. SMITH, Jr., New York, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Dec. 1, 1926. Serial No. 151,954. 2 Claims. (Cl. 121—26.)



1. In a fluid actuated rock drill, the combination of a cylinder, a hammer piston in the cylinder, a valve chest having a valve chamber closed at its front end, inlet passages leading from the valve chamber to the cylinder, a valve in the valve chamber having a bore therethrough, said bore being in constant communication with a source of pressure fluid supply, an actuating surface on the rearward end of the valve constantly exposed to live pressure fluid for throwing the valve forwardly, a flange on the valve having an actuating surface intermittently exposed to live pressure fluid to assist in throwing the valve forwardly, said flange controlling the exhaust of fluid from the front end of the cylinder, an annular actuating surface at the front end of the valve intermittently exposed to air compressed by the piston for throwing the valve rearwardly, and a passage in the cylinder and the valve chest for conveying pressure fluid to the actuating face on the flange, said passage being controlled only by the piston.

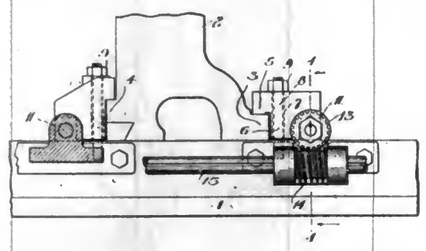
1,666,428. PROCESS OF PREPARING PIG IRON IN HIGHLY-HEATED MIXERS. KARL STORRAWA, Gleiwitz, Germany. Filed Jan. 22, 1927, Serial No. 162,932, and in Germany Feb. 16, 1926. 1 Claim. (Cl. 75—27.)

A process for preheating pig-iron in the flat hearth mixer (highly heated mixer) consisting in supplying to the pig-iron, which latter is rich in carbon, low carbon scrap iron preheated at a temperature as close as possible to the melting point by means of a source of heat independent from the mixer, whereby an immediate carburation of said low carbon scrap iron and a lower melting point of same occurs in order to maintain substantially constant the percentage of manganese contained in the pig-iron to be treated and to diminish accordingly the percentage of silicon, carbon and phosphorus.

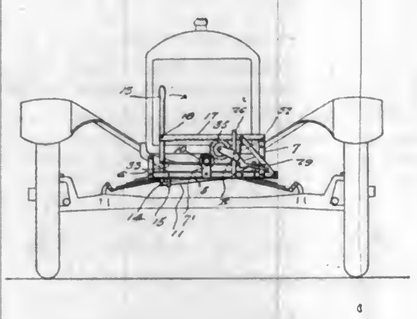
1,666,429. ROOFING. CHARLES STOLP, Jr., Chicago, Ill., assignor to The Flintkote Company, Boston, Mass., a Corporation of Massachusetts. Filed June 14, 1923. Serial No. 645,440. 7 Claims. (Cl. 108—7.)

1. A shingle package comprising shingles of different colors arranged in a predetermined irregular color sequence, whereby such shingles may be laid with facility in such sequence on a roof without forming a distinctive pattern.

1,666,430. INSTRUMENT FOR MEASURING THE PERIMETER OF TEETH. FELIX TIZZANI, Lyon, France. Filed Aug. 5, 1927, Serial No. 210,969, and in France May 9, 1927. 3 Claims. (Cl. 33—179.)



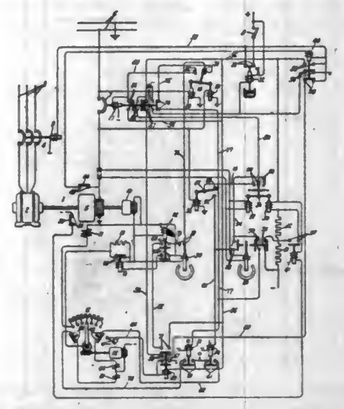
1. An instrument for measuring the perimeter of a tooth by means of a loop of wire, comprising a tube through which the wire is led, a cup attached to one end of the tube, a spool whereon the wire is wound rotatably mounted in said cup, a cover removably attached to the cup to hold the spool in place therein, and a device attached to the other end of the tube for clamping the ends of the loop formed with the wire; said clamping device embodying an inner ogival member fixed to the tube end, and an outer conical member movably mounted on the inner member and cooperating with the same to grip said loop ends between them.



1,666,431. CROSS-RAIL CLAMPING MECHANISM FOR MACHINE TOOLS. ALFRED TROSCH, Rochester, N. Y., assignor to Consolidated Machine Tool Corporation of America, Rochester, N. Y., a Corporation of Delaware. Filed May 4, 1925. Serial No. 27,790. 9 Claims. (Cl. 90—37.)

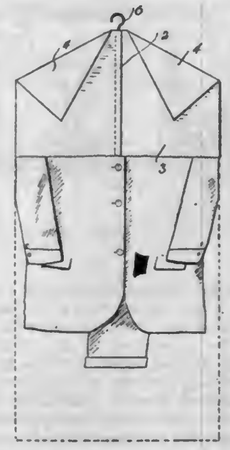
5. The combination with the uprights and cross-rail of a machine tool such as a planer, of means for clamping the cross-rail to the uprights including a tiltable clamping member for each of the inner and outer edges of the uprights, a vertically movable wedge actuator for each clamping member, a vertically arranged screw

for elevating or lowering each wedge actuator, and means carried by the cross-rail for simultaneously operating said screws, said operating means extending along the cross-rail beyond both uprights and operable from one end of the cross-rail.



1,666,432. AUTOMOBILE ENGINE-CRANKING APPARATUS. WILLIAM D. VINEY, Saltfork, Okla. Filed Apr. 22, 1927. Serial No. 185,719. 3 Claims. (Cl. 74—54.)

1. In a cranking apparatus of the class described, a bar adapted to be mounted transversely and horizontally at the front of an engine, a shaft, means for journaling the shaft on the bar, a gear on the shaft, a rocker, means for pivotally mounting the rocker intermediate its ends on the bar, a combined gear and ratchet wheel journaled on one end of the rocker, a lever, means for rockably mounting the lever on the bar, a ratchet bar on the lever engageable with the ratchet wheel of the combined ratchet wheel and gear, and spring means for normally swinging the rocker to mesh the gear of its combined ratchet wheel and gear structure with the first mentioned gear.

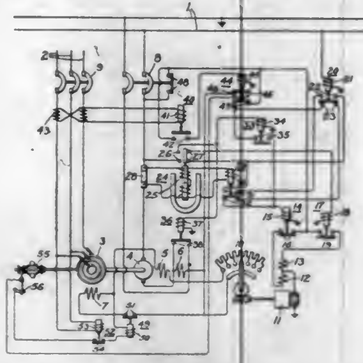


1,666,433. SYSTEM OF ELECTRIC DISTRIBUTION. BENJAMIN S. WEINFIELD, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 28, 1926. Serial No. 118,894. 10 Claims. (Cl. 171—312.)

1. In a system of electric distribution, a source of current, and current responsive means for controlling the current output of said source comprising a differential relay having two opposing windings, one of which is energized

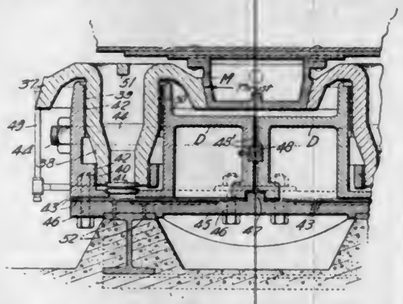
in accordance with the current output of said source, and means responsive to the temperature of said source for varying the excitation of the other winding of said relay.

1,666,434. GARMENT CONTAINER. GEORGE WORDINGHAM, Milwaukee, Wis. Filed July 6, 1927. Serial No. 203,815. 3 Claims. (Cl. 206—7.)



1. A garment shield comprising an elongated body adapted to be disposed about a garment suspended upon a hanger and having a closed upper end provided with an opening for a suspending element of the hanger, said body being provided with a weakened portion extending transversely across it in spaced relation to its upper end whereby its lower portion may be readily detached without removing its upper portion from about the garment and its hanger.

1,666,435. SYSTEM OF ELECTRIC DISTRIBUTION. HERMAN BANY, Scotia, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 8, 1926, Serial No. 80,050. Renewed Feb. 4, 1928. 18 Claims. (Cl. 171—312.)

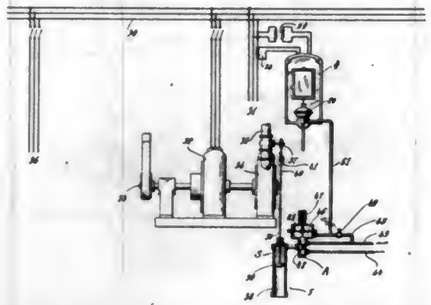


1. In a system of distribution, an electric circuit, a source of current connected to said circuit, a relay re-

sponsive to the direction of current flow between said source and circuit, and means controlled by the relay

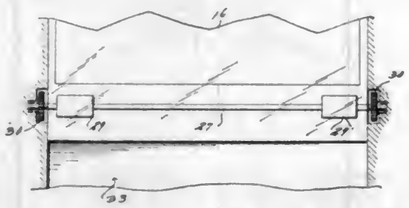
for adjusting the voltage of said source to terminate a flow of energy from said circuit to said source irrespectively of the voltage of said circuit.

1,666,436. THRUST ROLLER. RICHARD BERNHARD, Allentown, Pa., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa., a Corporation of Delaware. Filed Mar. 14, 1927. Serial No. 175,369. 1 Claim. (Cl. 308—204.)



In a roller bearing device for receiving the end thrust of a rotary kiln, a bearing box open at its top and having upper and lower bearings therein, a roller having a shank portion adapted to be received in said bearing box and provided with upper and lower bearings to engage the corresponding bearings in the bearing box, said roller having an overhanging portion constituting an extension of the shank portion, said overhanging portion having a conical thrust receiving surface adapted to contact with a corresponding surface on the tire of the rotary kiln to receive the thrust, said thrust receiving surface and said upper bearing of the roller being substantially in alignment with each other, and with the line of thrust so that they may both be intersected by a common horizontal plane including the line of thrust, the bearings in said bearing box being adapted to be entirely and continually submerged in oil.

1,666,437. PROCESS OF MANUFACTURING FORMIC ACID. GUY H. BUCHANAN, Westfield, and JOHN L. OSBORNE, Elizabeth, N. J., assignors to American Cyanamid Company, New York, N. Y., a Corporation of Maine. Filed Dec. 10, 1923. Serial No. 679,822. 10 Claims. (Cl. 260—118.)

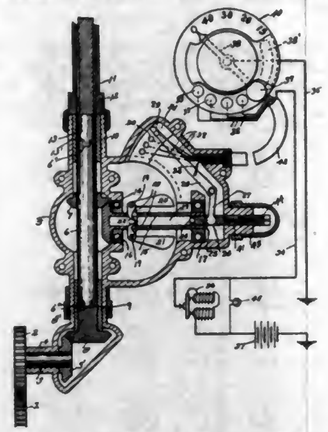


1. A method of producing formic acid which comprises adding formic acid to an alkali earth metal formate, treating the same with a non-volatile acid capable of decomposing the same, and boiling off the formic acid formed.

1,666,438. ELECTRIC POWER REGULATION. RAGNAR CARLSTEDT, Stockholm, Sweden, assignor to Arca Regulators, Incorporated, New York, N. Y., a Corporation of Virginia. Filed June 11, 1924, Serial No. 719,348, and in Sweden June 27, 1923. 6 Claims. (Cl. 137—158.)

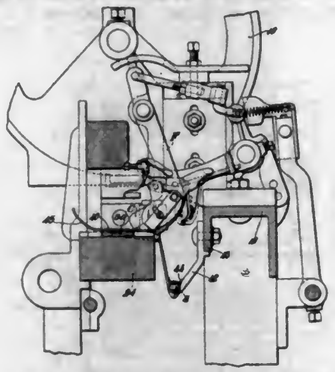
1. Electric power regulating apparatus comprising a movable watt responsive member, a main control member, liquid pressure operated means to control said main control member, a housing, means forming a passage-way having an outlet for discharging a continuously flowing stream of liquid into said housing, a restriction in said passageway, a lever mounted to control the outflow of liquid from said passage-way, means to move said lever in accordance with variations in the watt responsive member, and means whereby changes in liquid pressure in said passage-way between the outlet and the restriction caused by movements of said lever affect the liquid pressure operated means.

1,666,439. PERAMBULATOR. ELIGIO CHECCONI, Pueblo, Colo. Filed Apr. 23, 1927. Serial No. 186,067. 2 Claims. (Cl. 268—122.)



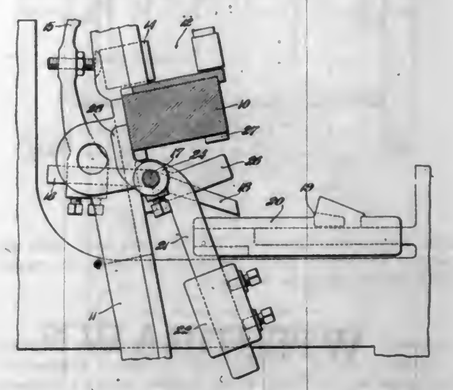
1. In a structure of the character described having a window opening, a window pane slidingly mounted in said opening, the body being provided with recesses into which said pane is disposed when the pane is lowered, and means operable from the exterior of the body whereby the pane may be raised and lowered, said means including a pair of oppositely disposed shafts on the inner and outer faces of the pane, such shafts having yielding rollers engaged with the pane, means gearing the two shafts to each other for coincident movement, and means on the exterior of the body whereby one of said shafts may be manually rotated.

1,666,440. SEPARATION OF HAFNIUM AND ZIRCONIUM. DIRK COSTER, Haarlem, Netherlands, and GEORG VON HEVESY, Copenhagen, Denmark, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven. Filed July 15, 1924, Serial No. 726,173, and in Denmark July 18, 1923. 4 Claims. (Cl. 23—23.)



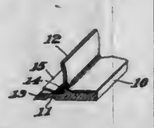
1. The process of separating hafnium and zirconium, characterized by submitting halogen compounds of hafnium and zirconium to fractional separation.

1,666,441. AUTOMOBILE SPEED-WARNING SIGNALING DEVICE. WILLIAM JAMES CRAFT, Los Angeles, and OTTO M. CLINTON, Glendale, Calif. Filed Apr. 11, 1925. Serial No. 22,400. 3 Claims. (Cl. 200—80.)



1. In a device of the character described, comprising an electrically energized mechanical structure adaptable for attachment to the speedometer actuating means of motor vehicles, a shaft operatively connected therewith, a tubular hub, a gear on said hub and engaging with a gear mounted on said drive shaft, a plunger disposed in said hub, a pair of weight and finger members pivoted to said tubular hub, said finger members engaging said plunger, a seating block, a ball positioned within said hub and engaging said seating block, said plunger engaging with said ball, a lever, said plunger, ball and seating block forming an actuating means for moving said lever, and a spring member for tensioning the movement of same.

1,666,442. SHUTTLE-FEELER THREAD CUTTER. CLARE H. DRAPER, Hopedale, Mass., assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Dec. 18, 1925. Serial No. 76,203. 6 Claims. (Cl. 139—260.)

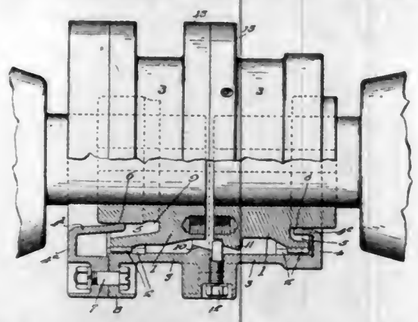


1. In a weft replenishing loom, the combination of the lay, a shuttle feeler provided with a thread severing device, and a thread depressor pivotally mounted independently of the shuttle feeler on a stationary part of the loom in front of the lay and extending rearwardly to normally engage and depress the thread on each alternate beat-up movement of the lay that the normal action of the thread depressor may serve to position the thread for the shuttle feeler severing device on the occurrence of replenishment of weft.

1,666,443. SHUTTLE-TENSION-CONTROLLING MECHANISM FOR LOOMS. CLARE H. DRAPER, Hopedale, Mass., assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Dec. 18, 1925. Serial No. 76,204. 7 Claims. (Cl. 139—187.)

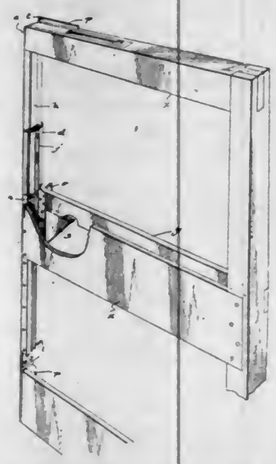
1. Shuttle box tension controlling mechanism for weft replenishing looms of the bobbin changing type having, in combination, a lay, a shuttle, a binder, a spring actuated dagger rod on the lay, binder fingers on the dagger rod, an inertia arm on the dagger rod provided with a weight below the dagger rod, and means for preventing the inertia arm and weight from acting on the binders during shuttle boxing.

1,666,444. WELTING AND METHOD OF MAKING SAME. WILLIAM J. FALLON, Jr., Boston, Mass. Filed May 16, 1927. Serial No. 191,642. 5 Claims. (Cl. 36—78.)



1. The method of forming a bead upon a strip of welting, which consists in incising the body of the strip of welting longitudinally to form a flap, cutting a triangular strip from the edge of the incised portion of the welting so that the width of the incised face of the welting is decreased while the original width of the welting is preserved and the welting is given a beveled edge, inserting said triangular strip as a filler under the flap to cause the latter to form a bead, and securing the flap to the incised portion of the welting over said filler.

1,666,445. FLEXIBLE SHAFT COUPLING. GUSTAVE FAST, Annapolis, Md., assignor to The Bartlett Hayward Company, Baltimore, Md., a Corporation of Maryland. Filed Mar. 17, 1925, Serial No. 16,191. Renewed Apr. 16, 1927. 14 Claims. (Cl. 64—91.)

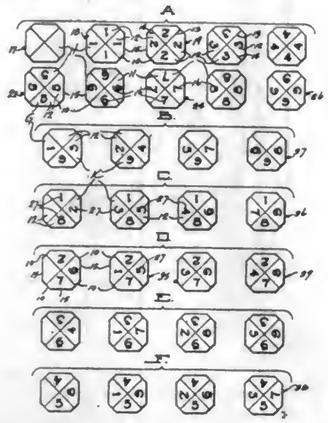


1. A flexible shaft coupling comprising shaft hubs each having an annular row of teeth, a sleeve having an annular row of teeth at each end to mesh with the teeth of the shaft hubs, said coupling having a bearing at each end between it and the shaft hubs, in a plane transverse to and intermediate the length of the inter-

meshing teeth, each of said bearings comprising members relatively rockable and slidable, the sleeve being shiftable to a position to disengage the teeth at one end thereof

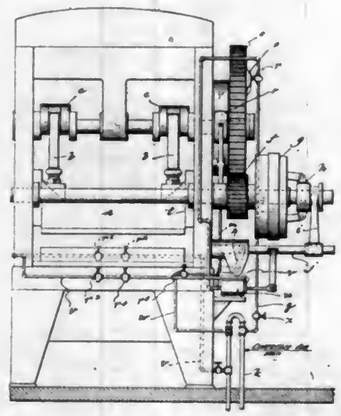
from their companion teeth on the shaft hub, while the teeth at the other end of the coupling remain in engagement, substantially as described.

1,666,446. DOOR STILE FOR AUTOMOBILE BODIES. ALFRED JOSEPH FISHER, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 14, 1926. Serial No. 115,802. 6 Claims. (Cl. 296—44.)



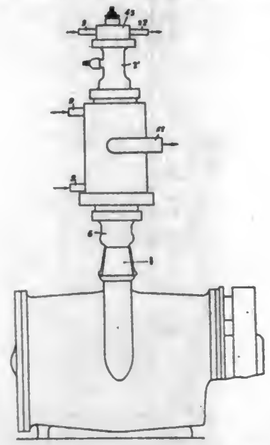
1. A door stile, comprising a heavy metal gage strip, an angle strip of lighter gage welded thereto and having an outwardly projecting flange, filler strips welded to the inside face of the base strip, a sheet metal panel folded around the outwardly projecting flange of the thin metal strip, and inside garnish molding supported on the inside face of the base strip, and a window guide supported on the face of the filler strips and held in place by the panel and the garnish molding.

1,666,447. PROCESS FOR THE OXIDATION OF ALCOHOL. STEFAN GOLDSCHMIDT, Karlsruhe, Germany. Filed Dec. 16, 1927, Serial No. 240,611, and in Germany Nov. 12, 1926. 18 Claims. (Cl. 260—138.)



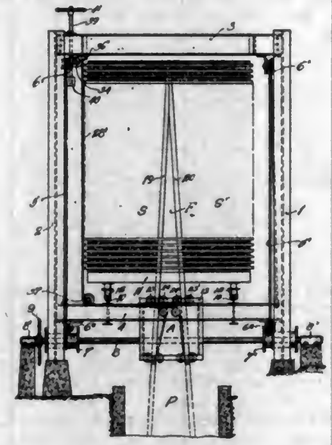
1. A process for oxidizing ethylalcohol to acetaldehyde and acetic acid with the use of silver as a catalyst and of a mixture of ethylalcohol and air, wherein the oxidation occurs at a temperature of the catalyst of 380–440° C.

1,666,448. GAME. HELION D. HARDENSTEIN, Oklahoma City, Okla. Refile for abandoned application Serial No. 529,259, filed Jan. 14, 1922. This application filed Jan. 30, 1928. Serial No. 250,658. 4 Claims. (Cl. 273—137.)



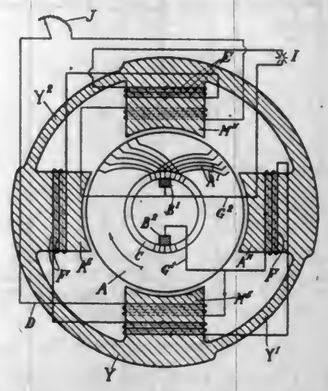
1. A game comprising in combination a plurality of polygonal shaped blocks having a face of each quadrangularly spaced, a numerical delineation of varying suit in each space of said faces, the delineations of predetermined spaces of each block having a resultant common to similarly positioned delineations of each of the several blocks, and a block for each suit as determined by the delineations of said first mentioned blocks, said block of each suit having similar delineations of its respective suit thereon, all of said blocks adapted for progressive arrangement by matching delineations of different blocks to offset numerical calculations.

1,666,449. FLUID-PRESSURE CONTROL FOR PRESSES. JOHN A. HINGER, DAVID B. MAYER, and JAMES WILSON, Cleveland, Ohio, assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Feb. 6, 1925. Serial No. 7,234. 6 Claims. (Cl. 192—81.)



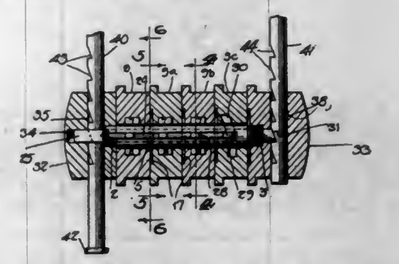
1. A control for presses, having in combination with a press and a shifting member which starts and stops the press, of a fluid pressure system for controlling the shifting member, including a plurality of valves on opposite sides of said press and that require simultaneous actuation to start the press and including one or more emergency valves independent of said first mentioned valves and which may be actuated to stop the press at any time.

1,666,450. THERMIONIC APPARATUS. FERNAND HOLWECK, Paris, France. Filed Oct. 22, 1923, Serial No. 670,188, and in France Oct. 27, 1922. Renewed Mar. 9, 1928. 1 Claim. (Cl. 250—27.5.)



Thermionic apparatus, comprising a three-electrode valve, a pump for creating a vacuum at will in the valve, and a tube of large diameter but short length connecting the valve and pump together to form a single unit and having gas-tight, frusto-conical joints with said valve and pump; said valve embodying a metallic head whereon the electrodes are mounted, an insulating sleeve separating said head from the plate electrode, a frusto-conical joint surmounting the sleeve, and means for supplying cool water to cool the valve joints.

1,666,451. STACK SHAPER. FREDERICK W. HORSTKOTTE, Portland, Oreg. Filed Aug. 2, 1926. Serial No. 126,013. 8 Claims. (Cl. 214—6.)

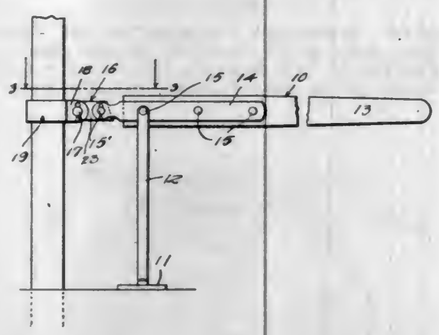


1. In a stack shaper the combination with a main frame, a vertically movable platform, and supporting means whereby the platform may successively be suspended at lower levels, of a pair of upright guide bars carried by the platform, and means on the main frame for retaining the guide bars in elevated position as the platform descends.

1,666,452. GENERATOR FOR ELECTRIC-ARC WELDING. MALCOLM MILLER IRVINE, Glasgow, Scotland. Filed Feb. 15, 1927, Serial No. 168,880, and in Great Britain Feb. 19, 1926. 7 Claims. (Cl. 171—223.)

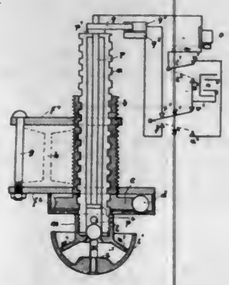
1. A generator for electric arc welding, comprising, in combination, a field magnet wherein each complete pole is split into two parts, a main part and an auxiliary part; an armature having a winding with a coil span of approximately half the normal pole pitch; means for collecting current generated in the armature winding by the main pole parts only and a shunt winding on the main pole parts connected across said collecting means.

1,666,453. PERMUTATION PADLOCK. GYURO E. B. JAKOPETS, Chicago, Ill., assignor to Jack Salley, Chicago, Ill. Filed Feb. 28, 1927. Serial No. 171,654. 9 Claims. (Cl. 70—113.)



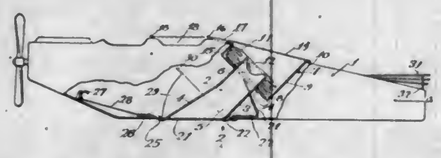
1. In a permutation padlock of the character described, a barrel, a latch bolt slidable therein, end blocks supporting the barrel and latch bolt, rotatable tumblers on the barrel between the end blocks, a shackle having legs slidably passing through the end blocks and engaged with the opposite ends of the latch bolt and one of said tumblers cooperating with the latch bolt for axially shifting the same to disengage the latch bolt from the shackle legs.

1,666,454. FENCE-POST PULLER. HJALMAR F. JOHNSON, Bismarck, N. Dak. Filed Apr. 2, 1927. Serial No. 180,489. 2 Claims. (Cl. 254—132.)



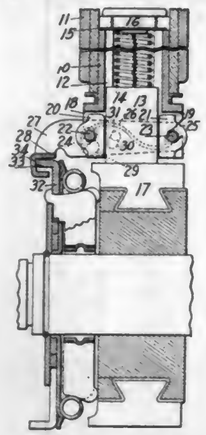
1. In combination, a lever, a ground engaging fulcrum therefor and permanently pivotally connected therewith, a U-shaped dog, a pivot extending through the

arms of the dog adjacent one end thereof and through one end of the lever, a pivot carried by the dog at the approximate center thereof, a clevis having arms en-



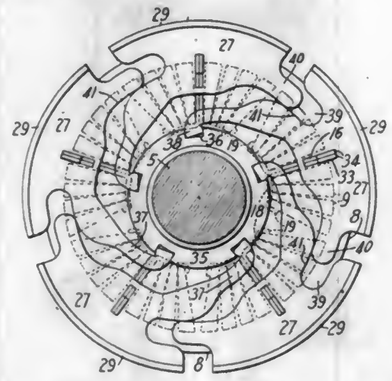
gaging said pivot and a cross bar confronting the free end of the dog, the free end of the dog and cross bar of the clevis being constructed for clamping engagement with opposite faces of a fence post.

1,666,455. LIFTING JACK FOR VEHICLES. JOSEPH KLEE and ALFONS SCHNEIDER, Munich, Germany. Filed Sept. 2, 1925, Serial No. 54,083, and in Germany July 7, 1925. 2 Claims. (Cl. 254—86.)



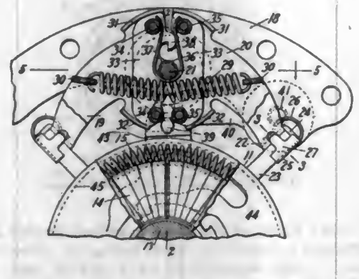
1. A vehicle jack comprising a tubular casing, a threaded spindle adapted to engage the thread on the inside of said casing, means for rotating said spindle, a thread on the outside of said casing, and brackets defining threaded holes seated on said casing and adapted to engage between them a part of the vehicle.

1,666,456. PARACHUTE CONTAINER AND EJECTOR FOR AEROPLANES. JOSEPH LA PORTE, Lomita, Calif. Filed Oct. 20, 1926. Serial No. 142,914. 6 Claims. (Cl. 244—21.)



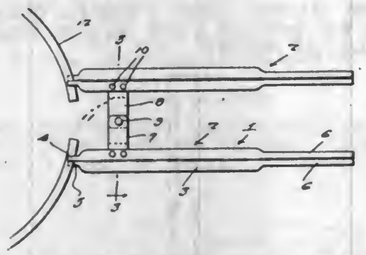
1. In the art described, the combination of an aeroplane having a container, a parachute housed therein, an air passage through the aeroplane to the container to eject the parachute, means to open and close said passage, and a cage at the rear end of the aeroplane to guide the parachute clear of control rudders or the like.

1,666,457. BRUSH LIFTER FOR ELECTRIC MOTORS OR THE LIKE. GEORGE H. LELAND, Dayton, Ohio. Filed Mar. 22, 1926. Serial No. 96,509. 9 Claims. (Cl. 172—279.)



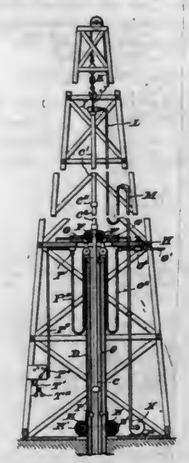
1. In a device of the character described, a brush holder having a guideway and openings in opposite walls thereof, brush engaging members mounted in the respective openings, yieldable means acting on said members to move them into engagement with a brush in said guideway, an actuating device connected with said brush engaging members and having means to hold the same in inoperative position when said actuating device is in one position and to release the same for movement by said yieldable means when said actuating device is in another position.

1,666,458. CENTRIFUGAL DEVICE. GEORGE H. LELAND, Dayton, Ohio. Original application filed Mar. 18, 1926, Serial No. 95,579. Divided and this application filed Jan. 5, 1927. Serial No. 159,141. 8 Claims. (Cl. 264—16.)



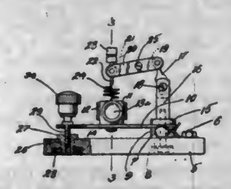
1. In a mechanism for controlling an operable device and in combination with a rotatable member, an annular series of weights arranged about the axis of said rotatable member, movable radially by centrifugal force and having means to connect the same with said operable device, said weights having at their adjacent ends overlapping parts arranged to contact one with the other in all positions of said weights and to have sliding movement one on the other when said weights move radially, and yieldable means to resist the outward movement of said weights.

1,666,459. BRUSH-LIFTING MECHANISM FOR ELECTRIC MOTORS OR THE LIKE. GEORGE H. LELAND, Dayton, Ohio. Filed July 13, 1927. Serial No. 205,286. 14 Claims. (Cl. 172—279.)



1. A brush lifting mechanism for an electric motor or the like, comprising a movable device having means to support a brush either in or out of engagement with the commutator of said motor and having a friction surface, an actuating device comprising a plate having its edge arranged to cooperate with the friction surface of said supporting device, said friction surface and said plate being normally so positioned that said supporting device will be free to move with relation to said actuating device, and means for imparting movement to said actuating device to cause the edge of said plate to operatively engage said friction surface and to actuate said supporting device.

1,666,460. PISTON-RING TOOL. STEPHEN G. LING, Spokane, Wash. Filed Oct. 19, 1926. Serial No. 142,656. 2 Claims. (Cl. 29—86.4.)

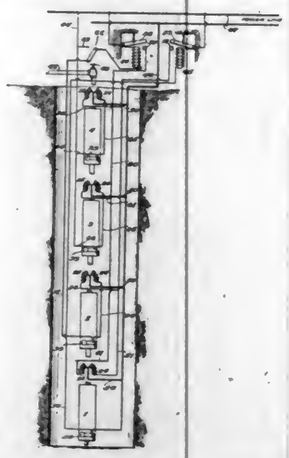


1. A ring expanding and contracting tool comprising separate and independent ring-gripping devices, each device being formed of a pair of pliers and these pliers being made up of pivotally connected levers, the inner ends of the levers being fashioned to provide jaws for gripping the top and bottom edges of the ring and the opposite ends of the levers being fashioned to provide hand-grips, means extending at right angles from said devices for connecting the latter together, and a single pivotal connection between the parts of said means, said last named pivotal connection being at right angles to the pivotal connections between the levers of the respective devices.

1,666,461. APPARATUS FOR SINKING OIL WELLS. CHARLES A. LORD, Los Angeles, Calif. Filed June 17, 1924. Serial No. 720,652. 9 Claims. (Cl. 255—4.)

1. A well making apparatus including in combination, a superstructure, separate platforms at different elevations in said superstructure, a casing, a débris removing tubing, a drilling unit carried by the débris removing tubing, means on said separate platforms for independently sustaining the weight of the débris removing tubing and casing, said means being adapted to progressively lower the tubing and also the casing to follow the drilling unit.

1,666,462. CRYSTAL DETECTOR. FREDERICK E. MANN, Cherrydale, Va. Filed Nov. 19, 1923. Serial No. 675,676. 3 Claims. (Cl. 250—31.)

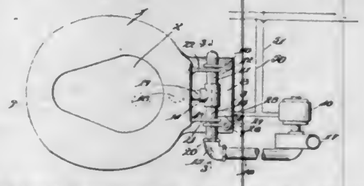


3. A crystal detector including a base, a spring strip mounted at one end on the base, a crystal holder mounted on the strip, a contact spring mounted on the base, and adjustable relative thereto for engagement with desired points on the surface of a crystal in said holder, and manually operable means for holding said spring strip under tension, and adjusting the tension thereof, to effect a micrometric adjustment of contact pressure between the contact spring and the crystal.

1,666,463. PUMP. DONALD H. MCGOON, McMinnville, Oreg. Filed May 7, 1926. Serial No. 107,508. 7 Claims. (Cl. 103—241.)

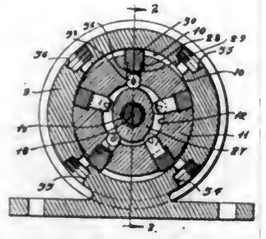
1. A pumping apparatus comprising a vertical series of cylinders, each cylinder having a liquid inlet in its bottom and a liquid outlet in its top, the outlet of each cylinder communicating directly with the inlet of the superposed cylinder, means for admitting fluid under pressure to the upper ends of the cylinders, a switch in the lower end of each cylinder arranged to be raised to inoperative position by the inflowing liquid and to move downwardly to operative position when the liquid is discharged, a valve at the upper end of each cylinder controlling the in-flow and exhaust of fluid under pressure

thereto, and electric means controlled by the respective switches for actuating the said valves when said switches are lowered whereby the pressure fluid will be admitted to



a lower cylinder and simultaneously exhausted from an upper cylinder to cause the liquid to flow from the lower cylinder into the upper cylinder.

1,666,464. IMPLEMENT FOR TEACHING FINGERING. PATRICK F. MOFFETT, Worcester, Mass. Filed May 16, 1927. Serial No. 191,638. 4 Claims. (Cl. 84—467.)

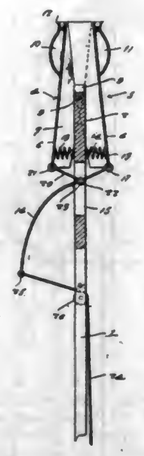


1. As an article of manufacture, an implement for the purpose described having a surface provided with parallel lines spaced the same distance apart as the keys of a piano, each line representing the center of a piano key, and lines on said surface representing the location of the center of the black keys, one edge having vertical lines thereon spaced the same as the lines on the top surface.

1,666,465. VENTILATING SEAT FOR TOILET BOWLS. CHARLES C. NORRIS, Riverside, Calif. Filed Dec. 29, 1926. Serial No. 157,684. 2 Claims. (Cl. 4—213.)

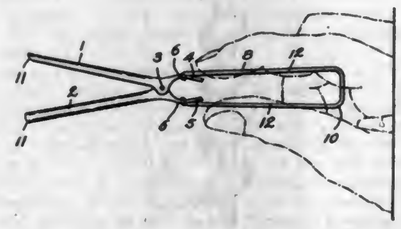
1. A toilet bowl of the class described having a seat thereon, there being a passageway through said seat adjacent the rear of the same communicating with the interior of said bowl, said passage-way comprising the sole means whereby the interior of said bowl may be ventilated, brackets on said seat, a hollow pintle extending through said brackets and being rigidly secured thereto, said pintle being mounted for rotation on said bowl, thereby establishing a hinged connection between said seat and bowl, said hollow pintle communicating with said passageway in said seat, a lug on said pintle, a bus bar plunger casing on said bowl, a bus bar plunger slidably mounted in said casing and projecting therefrom, said lug being adapted to engage said bus bar to depress the same, a pair of electrical contacts adjcent said plunger whereby when said plunger is depressed, an electrical circuit is formed through said contacts, said circuit serving to operate a blower, said blower communicating with said hollow pintle, whereby gases may be removed from said closet bowl, a socket in the forward end of said seat, a spring-pressed plunger in said socket, said plunger serving to resiliently elevate said seat and release said bus bar plunger from engagement with said contacts.

1,666,466. ROTARY PUMP. EDWARD C. PETERS, Detroit, Mich. Filed Feb. 3, 1927. Serial No. 165,530. 1 Claim. (Cl. 103—136.)



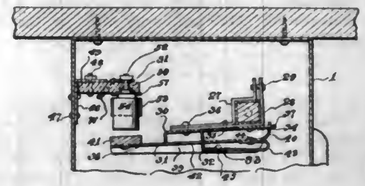
A rotary pump of the class described having a stator, comprising: a cylindrical shell having an eccentric inner surface; a cap mounted on each end of said shell; a cylindrical rotor rotatably mounted in said shell; a shaft on said rotor projecting through one of said caps and one end of, and rotatable with, said rotor, said rotor having a socket formed in its opposite end; a reduced portion on said shaft projecting into said socket; a shaft fixedly mounted on the other cap and projecting into said socket, said shaft having a socket formed on its inner end for the reception of said reduced portion; a cam mounted on the inner end of said shaft, extending radially outwardly from said reduced portion, said stator having a plurality of axially extending peripheral grooves; a blade radially movable in each of said grooves; an arm on each of said blades projecting inwardly into the socket formed in said rotor; a roller on the inner end of each of said arms engaging the periphery of said cam, said cam retaining said blades in engagement with the inner surface of said shell, at all positions of rotation of said rotor, said stator having co-operating inlet and outlet ports formed therein.

1,666,467. PLIERS. JOSEPH A. PETERSON, College Station, Tex. Filed Sept. 3, 1926. Serial No. 133,322. 5 Claims. (Cl. 294—45.)



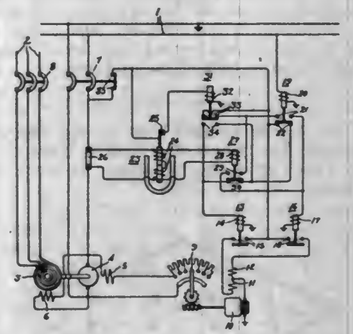
1. In a plier construction, a handle member, a jaw member rigid therewith, a second jaw member pivotally connected to said first mentioned jaw member and handle, and a second handle member pivotally connected to both of said jaws, forwardly of the pivotal connection between said jaws.

1,666,468. GLOBE MANIPULATOR. OTTO E. PHELIX, Tully, N. Y. Filed May 5, 1927. Serial No. 188,992. 4 Claims. (Cl. 294—20.)



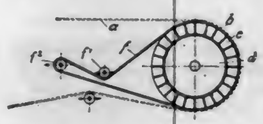
1. In a globe manipulator, a pole, a pair of coacting jaw members pivoted on the upper end of the pole, said pole being provided with a longitudinal slot below the jaw members, globe engaging jaws formed on the upper ends of the jaw members, expansible coil springs disposed between the lower ends of the jaw members and the respective sides of the pole for normally holding the jaws in a closed position, means carried by the pole and connected to the lower ends of the jaw members for moving the lower ends of the jaw members inwardly to simultaneously open the jaws, said means comprising a curved rod extending through the slot, the upper end of the rod being connected to the lower end of one of the jaw members, a link connected at one end to the lower end of the other jaw member, the other end of the link being pivotally connected to the intermediate portion of the curved rod, and an actuating cable connected to the lower end of the rod.

1,666,469. CURLING IRON. JAMES A. QUINN, Montreal, Quebec, Canada. Filed Jan. 10, 1927. Serial No. 160,278. 1 Claim. (Cl. 132—37.)



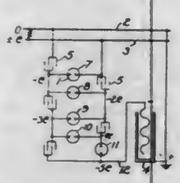
A curling iron of the character described, comprising a pair of hinged jaw members each having an outwardly projecting portion in which is provided a hole and a longitudinal recess, a handle consisting of a U-shapel member, the free ends of which respectively engage in said holes and in said recesses in said extensions, whereby said handle will be held rigid in its opened position, and means to secure said handle in its closed position.

1,666,470. ELECTRIC SWITCH. DON A. SANFORD, deceased, Washington, D. C., by Greta L. Sanford, administratrix, Washington, D. C. Filed Mar. 27, 1924. Serial No. 702,266. 9 Claims. (Cl. 200—153.)



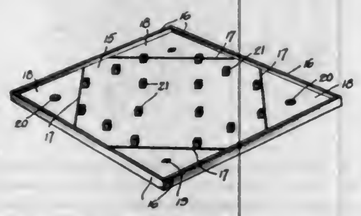
1. A box having pivoted therein a rock shaft; a lever with arms secured intermediate its ends to the rock shaft; a reciprocating shank engaging one arm of the lever; two contact carriers secured to the rock shaft, each carrier having a contact piece or disk insulated from the rock shaft; two insulated contacts, supported adjacent to the contacts carried by the said carriers; insulated binding posts; electric conducting wires secured to the said posts; and a conducting wire or cable for the passage of current between the contacts supported by the carriers.

1,666,471. SYSTEM OF ELECTRIC DISTRIBUTION. HAROLD T. SEELEY, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 17, 1926, Serial No. 88,904. Renewed Aug. 31, 1927. 7 Claims. (Cl. 171—312.)



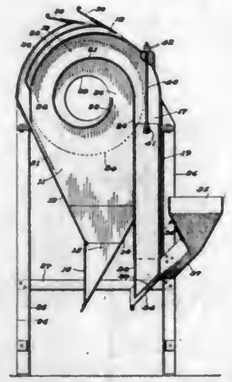
1. In a system of distribution, an electric circuit, a source of current connected to said circuit, means normally arranged to maintain constant an electrical condition of said circuit, and means controlled by a reversal of energy flow through said source cooperating with said first mentioned means for effecting a change in an electrical condition of said source when the electrical condition of said circuit is below a predetermined value and for preventing a change in the electrical condition of said source when the electrical condition of said circuit is above a predetermined value.

1,666,472. PAPER-MAKING MACHINE. CHRISTIAN SEYBOLD, Duren, and JOSEF BOLTERSDORF, Kreuzau, near Duren, Germany. Filed Jan. 10, 1925, Serial No. 1,607, and in Germany Jan. 30, 1924. 4 Claims. (Cl. 92—47.)



1. Paper making machine comprising a suction roll defining suction cells which are open at the perimeter of said roll, and a travelling sieve adapted to adhere to said roll and to close said cells only on the arc of said roll along which suction is exerted.

1,666,473. HIGH-VOLTAGE DIRECT-CURRENT SYSTEM. JOSEPH SLEPIAN, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 26, 1921. Serial No. 448,148. 2 Claims. (Cl. 175—363.)

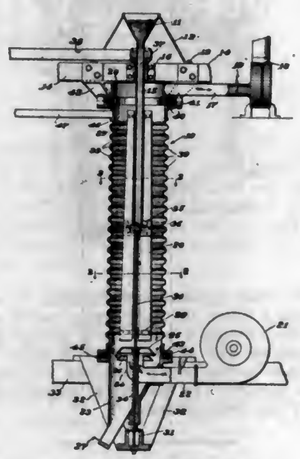


1. The combination, with an alternating-current source including two line-conductors, of an assembly of rectifiers and condensers including two sets of condensers, each set comprising a plurality of serially connected condensers, means for conductively connecting one terminal of each of said sets to one of the line conductors, whereby one set is connected to each line conductor, a plurality of rectifying devices, alternately conducting positive and negative currents, connected to a plurality of points distributed along the said sets, whereby a common point in one set is connected, through two oppositely conducting rectifying circuits, to the two opposite terminals of one of the condensers of the other set, and means for connecting a unidirectional-current load device between the source and the free ends of the said sets.

1,666,474. GAME BOARD FOR GAME PIECES AND SURFACE PROJECTILES. OTTO D. SORELL, Los Angeles, Calif. Filed May 12, 1926. Serial No. 108,604. 3 Claims. (Cl. 273—108.)

1. A game comprising a board of square outline, upstanding flanges on the edges of the board, lines extending substantially parallel to and spaced from the diagonals of the board to provide spaces between the lines and the edges of the board and a field between the lines, characters within the spaces and other characters within the field, game pieces positioned on the characters within the field, and projectiles positioned on the characters within the spaces and adapted to be projected over the surface of the board for displacing the game pieces from the respective characters.

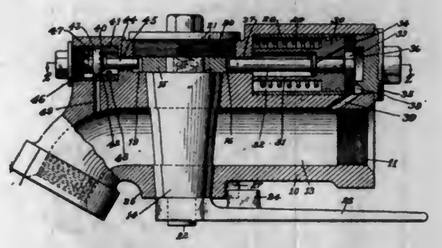
1,666,475. DUST EXTRACTOR. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Oct. 3, 1925. Serial No. 60,207. 6 Claims. (Cl. 209—139.)



1. A dust extractor comprising in combination, a receptacle having a large upper end portion and a dust collecting portion at its lower end and having spaced side walls, an air exhaust conduit extending transversely of the receptacle between said side walls and having an opening extending lengthwise of the conduit, an inlet conduit in the upper part of the receptacle and curved about said exhaust conduit, means for exhausting air from the discharge conduit to draw dust laden air into the receptacle thru the curved inlet conduit so that the heavier particles are thrown outwardly away from the discharge conduit to settle in the receptacle, and means for admitting a jet of air into the curved inlet conduit thru a side wall thereof.

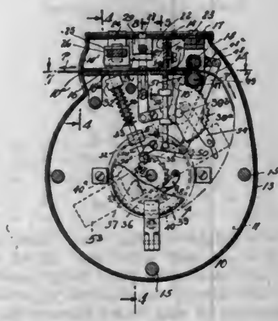
1,666,476. AIR CLASSIFIER. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Oct. 14, 1926. Serial No. 141,547. 7 Claims. (Cl. 209—138.)

1. A spiral classifier, comprising in combination, a vertically disposed pipe having air inlet openings in its walls, a closed casing wound spirally around the pipe to communicate with said openings and constructed to form a spiral classifying chamber, an apertured floor-plate for the casing extending spirally around the central pipe and constructed so that the materials to be treated will slide down the floor-plate, means for delivering the materials to be treated to the upper end of the spiral casing, and means for exhausting air from said pipe to draw air into the spiral chamber through the apertures in the floor plate and from the chamber into the central pipe to cause the air to pick up and carry into the central pipe the lighter particles traveling along the floor-plate.



1,666,477. AIR CLASSIFIER. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Mar. 16, 1927. Serial No. 175,691. 10 Claims. (Cl. 209—138.)

1. An air classifier, comprising in combination, a long annular receptacle supported in an upright position and having a length that far exceeds its diameter, a fan rotatably mounted in the receptacle and having fan blades that extend throughout approximately the entire length of the long receptacle, means for producing rising air currents within the receptacle, means for delivering the materials to be treated into the receptacle so that the lighter particles will be picked up by the air, and means for rotating the fan to impart a rotative movement to the volume of air within the receptacle which will serve to throw the heavier particles outwardly by centrifugal force throughout the length of the receptacle and keep them close to the walls of the receptacle as they move downwardly therein.

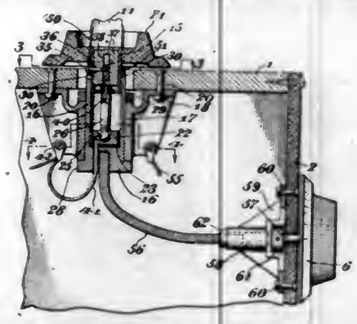


1,666,478. AUTOMATIC SAFETY ANGLE COCK. RUSSELL RICHARD SUPPLEE, Bridgeport, Pa. Filed Oct. 23, 1926. Serial No. 143,733. 4 Claims. (Cl. 303—86.)

2. In an angle cock, a body, a rotatable valve therein having a handle, the valve at its upper end being provided with a disk formed with a notch at one point and at a diametrically opposite point with a recess bounded by a radial shoulder and a face extending out toward the periphery of the disk, the body at one end being provided with a longitudinally extending chamber communicating at its outer end with the interior of the body, a piston movable in the chamber, a spring urging the piston outward, a pin carried by the piston and extending through the inner end wall of the chamber and adapted to engage in the notch in the disk when the rotary valve is turned to open position, the opposite end of the body being provided with a valve chamber, the interior of the valve chamber being connected by a duct with the interior of the body, and the valve chamber having a vent at the inner end of the chamber, a

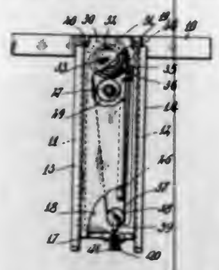
valve within the chamber, a spring urging the valve to a position to close said vent, the valve having a pin extending through the end of the chamber and into said recess in the disk when the rotary valve is turned to an open position.

1,666,479. MARKING OR CUTTING DEVICE. FRANZ WOLF, New York, N. Y. Filed May 6, 1927. Serial No. 189,380. 4 Claims. (Cl. 164—111.)



1. In a device for marking a longitudinally fed strip, a marker operable at a right angle and adjustable transversely to said strip and means for operating said marker including an adjustable cam for controlling the operation of said marker.

1,666,480. MEANS FOR ADJUSTING THE ANTENNA OF RADIO APPARATUS. ARNO ZILLGER, Narberth, Pa., assignor to Music Master Corporation, Philadelphia, Pa., a Corporation of Delaware. Filed Dec. 9, 1924. Serial No. 754,768. 1 Claim. (Cl. 250—33.)

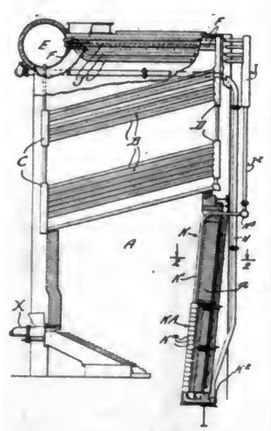


In combination, the cabinet of a radio receiving apparatus, a bracket comprising a bearing sleeve supported upon the inner side of the top of said cabinet which sleeve is provided with a laterally extending projection adjacent its lower end upon which is supported an oscillatable stop device and pins for limiting the extent of oscillation of said device, a socket member rotatably mounted in said bearing sleeve and having a laterally extending projecting pin adjacent its lower end, an antenna, the lower end of the frame structure of which is mounted within and supported by the said socket member, a rotatable antenna adjusting device supported upon the front panel of the said cabinet, and a flexible shaft connecting the said rotatable device with the said rotatable socket member whereby upon rotation

of the said rotatable device in either direction corresponding rotation of the said socket member and of the antenna supported thereon is effected, the extent of

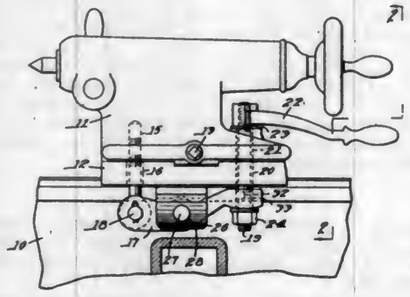
such rotation being limited by the contact of the laterally extending pin in the said socket member with the said oscillatable stop device, substantially as described.

1,666,481. WINDOW REGULATOR FOR VEHICLES. PETER BACSO, Astoria, N. Y. Filed Mar. 4, 1927. Serial No. 172,584. 1 Claim. (Cl. 268—128.)



A window regulator of the class described comprising a frame, inner and outer side plates mounted on said frame, said inner side plate being provided with a longitudinal slot having an enlarged upper end, a drum rotatively mounted in said frame between the side plates thereof, a pulley attached to the bottom of said frame, a flexible member attached to said drum adapted to be wound thereon and disposed around said pulley, an engaging member slidably mounted in said frame, attached at one end to said flexible member and disposed at its other end through said slot, and a plate having a transverse slot therein slidably mounted on said attaching member and comprising a window supporting rack, said engaging member and said plate being adapted to be raised and lowered by rotation of said drum for raising and lowering a window mounted on said rack and said engaging member being adapted to be moved relative to said plate for positioning the former in the enlarged portion of said slot when the window is in its uppermost position to prevent accidental lowering thereof.

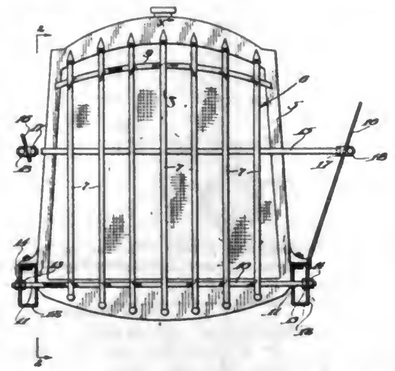
1,666,482. PRODUCTION OF VINYLACETATE. ERICH BAUM, HANS DEUTSCH, WILLY O. HERRMANN, and MARTIN MUGDAN, Munich, Germany, assignors to Consortium für Elektrochemische Industrie G. m. b. H., Munich, Bavaria. Filed June 15, 1922, Serial No. 568,626, and in Germany June 23, 1921. 10 Claims. (Cl. 260—106.)



1. Process of producing vinylacetate which consists in acting with acetylene and the vapor of acetic acid upon a metal salt at a temperature above the boiling point of said acid.

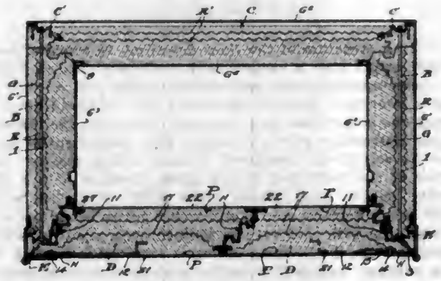
1,666,483. SECTIONAL WATER BACK. JOHN E. BELL, deceased, Brooklyn, N. Y., by Lola R. Bell, executrix, Jackson Heights, N. Y., assignor to Foster Wheeler Corporation, New York, N. Y., a Corporation of New York. Original application filed July 26, 1924, Serial No. 728,306. Divided and this application filed Jan. 26, 1926. Serial No. 83,789. 3 Claims. (Cl. 122—235.)

1. In a steam generator comprising a combustion chamber and a boiler, the improvement which consists of a water back forming a lining for a portion of the combustion chamber wall and composed of upper and lower sections, each section being composed of vertically disposed tube portions and cast metal casings for the tube portions in the lower section.



1,666,484. CLAMPING MECHANISM FOR MACHINE TOOLS. CONSTANT BOUILLON, Torrington, Conn., assignor to The Hendry Machine Company, Torrington, Conn., a Corporation of Connecticut. Filed June 8, 1926. Serial No. 113,574. 15 Claims. (Cl. 82—31.)

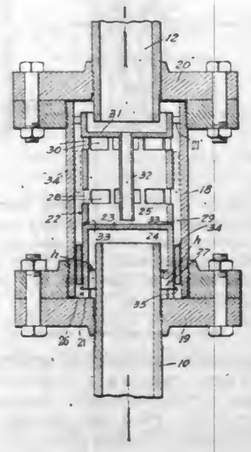
1. In a machine tool, a frame, a machine tool unit movably mounted thereon, a lever pivoted to said unit, a clamping member supported by said lever and engaging said frame, and means on said movable unit to apply clamping pressure to said lever.



8. In a machine tool, a frame, a machine tool unit movably mounted thereon, a clamping lever, means to support one end of said lever on said movable unit, means to apply clamping pressure at the opposite end of said lever, and a frame-engaging element connected with and actuated by said lever between said end portions.

1,666,485. OIL RADIATOR. CHARLES W. BRADFORD, Southgate, Calif. Filed Apr. 24, 1924. Serial No. 708,673. 2 Claims. (Cl. 184—104.)

1. An oil radiator having a lower tube forming a lower manifold, an upper tube forming an upper manifold, a plurality of vertical tubes connected to the upper and lower tubes, said vertical tubes being closed at the bottom and having removable stoppers at the top, said stoppers on removal allowing cleaning or swabbing of the individual vertical tubes.

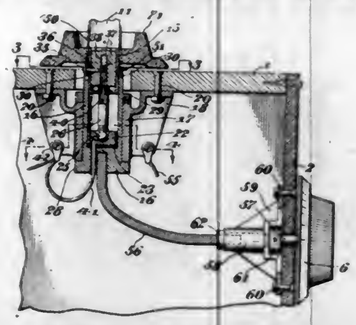


1,666,486. FIREPROOF SAFE CONSTRUCTION. GEORGE C. BRAINARD, JASON A. FITCH, and ERIC E. WOLTERS, Youngstown, Ohio, assignors to The General Fireproofing Company, Youngstown, Ohio, a Corporation of Ohio. Filed Jan. 21, 1924. Serial No. 687,630. 9 Claims. (Cl. 109—2.)

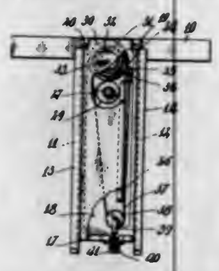
1. A fire-proof safe construction including an insulating monolithic body open at the front and rear, a door frame fitting the body at its front side, a separate back panel of insulating material and including a fastening anchoring element embedded therein, said back panel being fitted to the rear side of the body, and rods engaging the door frame and fastening anchoring element of the back panel to draw the same together.

1,666,487. MEANS FOR CONTROLLING AND MEASURING GAS SUPPLY. THOMAS H. CLEMENTS, Los Angeles, Calif., assignor of one-half to F. C. Millard Engineering Company, Los Angeles, Calif., a Corporation of California. Filed Jan. 11, 1926. Serial No. 80,469. 4 Claims. (Cl. 137—53.)

1. A differential relief valve for gas comprising a casing, gas inlet means extending into the lower end of the casing and projecting upwardly within the casing and spaced therefrom to form a liquid seal receptacle between said upwardly projecting portion of the gas inlet means and the wall of the casing, a tubular member mounted in fixed position within the casing and having a portion extending downwardly around said upwardly projecting portion of the gas inlet means so as to extend into the liquid in the liquid seal receptacle and said tubular member being formed with an auxiliary liquid receptacle above the liquid seal receptacle, said auxiliary liquid receptacle being open at its upper portion to communicate with the space between the said tubular member and the wall of the casing to permit liquid which is forced from the liquid seal by the pressure of the gas from the gas inlet to pass into said auxiliary liquid receptacle, said auxiliary liquid receptacle being provided with opening means of restricted area for draining liquid therefrom back into said space between said tubular member and the wall of the casing, and gas outlet means communicating with the upper portion of the chamber within said casing.



1,666,488. APPARATUS FOR EXTRACTING OIL FROM SHALE. RICHARD CRAWSHAW, Drumright, Okla. Filed Feb. 5, 1927. Serial No. 166,223. 5 Claims. (Cl. 262—3.)

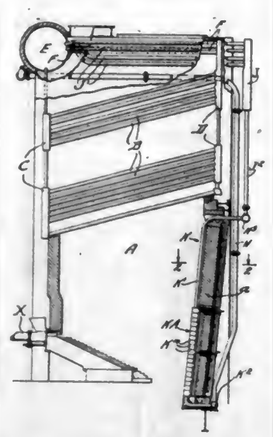


1. An apparatus for extracting oil from shale comprising a heating unit adapted to be projected into the shale, a series of conducting pipes connected with the unit, one of the pipes forming a conduit for the oil accumulating about the unit, a compressed air line connected with one of the pipes and adapted to force the oil from the shale outwardly into a suitable container, and means for periodically cleaning the pipes and outlets.

of the said rotatable device in either direction corresponding rotation of the said socket member and of the antenna supported thereon is effected, the extent of

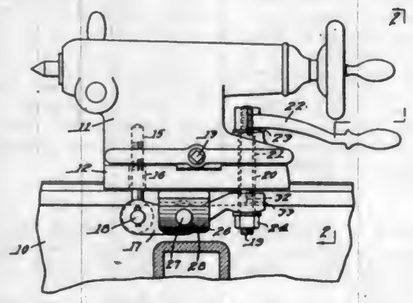
such rotation being limited by the contact of the laterally extending pin in the said socket member with the said oscillatable stop device, substantially as described.

1,666,481. WINDOW REGULATOR FOR VEHICLES. PETER BACSO, Astoria, N. Y. Filed Mar. 4, 1927. Serial No. 172,584. 1 Claim. (Cl. 268—128.)



A window regulator of the class described comprising a frame, inner and outer side plates mounted on said frame, said inner side plate being provided with a longitudinal slot having an enlarged upper end, a drum rotatively mounted in said frame between the side plates thereof, a pulley attached to the bottom of said frame, a flexible member attached to said drum adapted to be wound thereon and disposed around said pulley, an engaging member slidably mounted in said frame, attached at one end to said flexible member and disposed at its other end through said slot, and a plate having a transverse slot therein slidably mounted on said attaching member and comprising a window supporting rack, said engaging member and said plate being adapted to be raised and lowered by rotation of said drum for raising and lowering a window mounted on said rack and said engaging member being adapted to be moved relative to said plate for positioning the former in the enlarged portion of said slot when the window is in its uppermost position to prevent accidental lowering thereof.

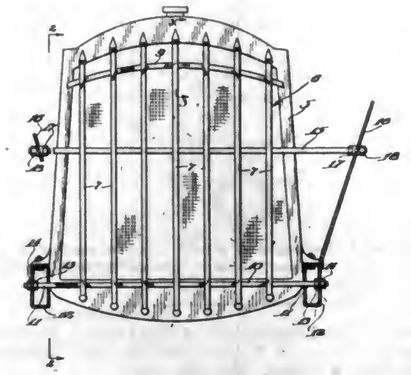
1,666,482. PRODUCTION OF VINYLACETATE. ERICH BAUM, HANS DEUTSCH, WILLY O. HERRMANN, and MARTIN MUGDAN, Munich, Germany, assignors to Consortium für Elektrochemische Industrie G. m. b. H., Munich, Bavaria. Filed June 15, 1922, Serial No. 568,626, and in Germany June 23, 1921. 10 Claims. (Cl. 260—106.)



1. Process of producing vinylacetate which consists in acting with acetylene and the vapor of acetic acid upon a metal salt at a temperature above the boiling point of said acid.

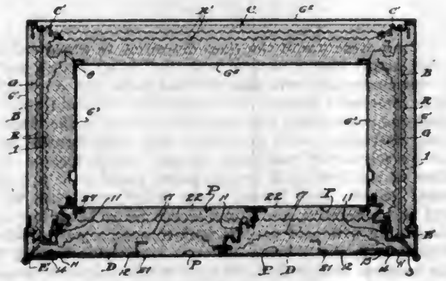
1,666,483. SECTIONAL WATER BACK. JOHN E. BELL, deceased, Brooklyn, N. Y., by Lola R. Bell, executrix, Jackson Heights, N. Y., assignor to Foster Wheeler Corporation, New York, N. Y., a Corporation of New York. Original application filed July 26, 1924, Serial No. 728,306. Divided and this application filed Jan. 26, 1926. Serial No. 83,789. 3 Claims. (Cl. 122—235.)

1. In a steam generator comprising a combustion chamber and a boiler, the improvement which consists of a water back forming a lining for a portion of the combustion chamber wall and composed of upper and lower sections, each section being composed of vertically disposed tube portions and cast metal casings for the tube portions in the lower section.



1,666,484. CLAMPING MECHANISM FOR MACHINE TOOLS. CONSTANT BOUILLON, Torrington, Conn., assignor to The Hendry Machine Company, Torrington, Conn., a Corporation of Connecticut. Filed June 3, 1926. Serial No. 113,574. 15 Claims. (Cl. 82—31.)

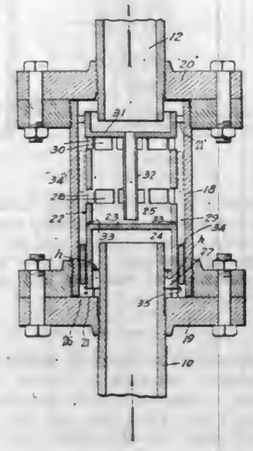
1. In a machine tool, a frame, a machine tool unit movably mounted thereon, a lever pivoted to said unit, a clamping member supported by said lever and engaging said frame, and means on said movable unit to apply clamping pressure to said lever.



8. In a machine tool, a frame, a machine tool unit movably mounted thereon, a clamping lever, means to support one end of said lever on said movable unit, means to apply clamping pressure at the opposite end of said lever, and a frame-engaging element connected with and actuated by said lever between said end portions.

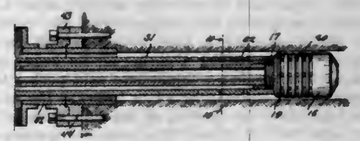
1,666,485. OIL RADIATOR. CHARLES W. BRADFORD, Southgate, Calif. Filed Apr. 24, 1924. Serial No. 708,673. 2 Claims. (Cl. 184—104.)

1. An oil radiator having a lower tube forming a lower manifold, an upper tube forming an upper manifold, a plurality of vertical tubes connected to the upper and lower tubes, said vertical tubes being closed at the bottom and having removable stoppers at the top, said stoppers on removal allowing cleaning or swabbing of the individual vertical tubes.



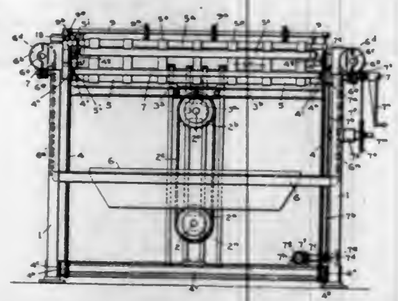
1,666,486. FIREPROOF SAFE CONSTRUCTION. GEORGE C. BRAINARD, JASON A. FITCH, and ERIC E. WOLTERS, Youngstown, Ohio, assignors to The General Fireproofing Company, Youngstown, Ohio, a Corporation of Ohio. Filed Jan. 21, 1924. Serial No. 687,630. 9 Claims. (Cl. 109—2.)

1. A fire-proof safe construction including an insulating monolithic body open at the front and rear, a door frame fitting the body at its front side, a separate back panel of insulating material and including a fastening anchoring element embedded therein, said back panel being fitted to the rear side of the body, and rods engaging the door frame and fastening anchoring element of the back panel to draw the same together.



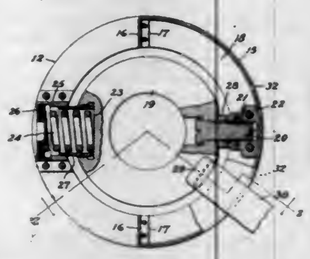
1,666,487. MEANS FOR CONTROLLING AND MEASURING GAS SUPPLY. THOMAS H. CLEMENTS, Los Angeles, Calif., assignor of one-half to F. C. Millard Engineering Company, Los Angeles, Calif., a Corporation of California. Filed Jan. 11, 1926. Serial No. 80,469. 4 Claims. (Cl. 137—53.)

1. A differential relief valve for gas comprising a casing, gas inlet means extending into the lower end of the casing and projecting upwardly within the casing and spaced therefrom to form a liquid seal receptacle between said upwardly projecting portion of the gas inlet means and the wall of the casing, a tubular member mounted in fixed position within the casing and having a portion extending downwardly around said upwardly projecting portion of the gas inlet means so as to extend into the liquid in the liquid seal receptacle and said tubular member being formed with an auxiliary liquid receptacle above the liquid seal receptacle, said auxiliary liquid



receptacle being open at its upper portion to communicate with the space between the said tubular member and the wall of the casing to permit liquid which is forced from the liquid seal by the pressure of the gas from the gas inlet to pass into said auxiliary liquid receptacle, said auxiliary liquid receptacle being provided with opening means of restricted area for draining liquid therefrom back into said space between said tubular member and the wall of the casing, and gas outlet means communicating with the upper portion of the chamber within said casing.

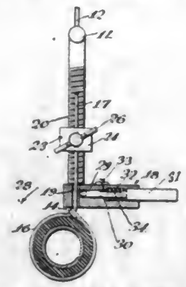
1,666,488. APPARATUS FOR EXTRACTING OIL FROM SHALE. RICHARD CRAWSHAW, Drumright, Okla. Filed Feb. 5, 1927. Serial No. 166,223. 5 Claims. (Cl. 262—3.)



1. An apparatus for extracting oil from shale comprising a heating unit adapted to be projected into the shale, a series of conducting pipes connected with the unit, one of the pipes forming a conduit for the oil accumulating about the unit, a compressed air line connected with one of the pipes and adapted to force the oil from the shale outwardly into a suitable container, and means for periodically cleaning the pipes and outlets.

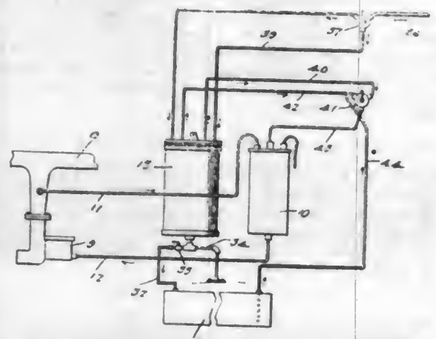
1,666,489. SHEET-DELIVERY APPARATUS. MICHAEL A. DROITCOUR, Edgewood, R. I. Filed Jan. 5, 1922, Serial No. 527,125. Renewed Sept. 14, 1927. 24 Claims. (Cl. 271—78.)

1. In combination a pair of endless carriers, a yoke connected with the carriers, a pin slidably connected with said yoke, an endless chain carrying said pin, and means for driving the endless chain and thereby imparting reciprocatory movement to the yoke and carriers, substantially as described.



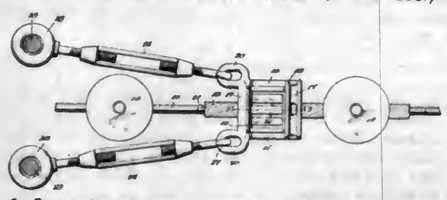
1,666,490. EMERGENCY-GOVERNOR MECHANISM FOR PRIME MOVERS. WILLIAM P. DYER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 18, 1921. Serial No. 453,345. 17 Claims. (Cl. 264—17.)

7. In combination, a prime mover, a trip valve controlling the flow of operating fluid thereto, an emergency governor comprising an eccentric member adapted to trip said valve and effect its closing when the speed of he prime mover reaches a predetermined high value, said eccentric member having a pocket on its heavy side, and means for discharging a liquid into said pocket while the prime mover is running so as to increase the centrifugal action and effect the closing of the trip valve at a speed lower than that for which the emergency governor is set, a wall of said pocket being provided with an opening for the escape of such liquid.



1,666,491. HOSE-COUPLING TOOL. ISRAEL EVANS, San Bernardino, Calif. Filed June 29, 1927. Serial No. 202,335. 3 Claims. (Cl. 81—93.)

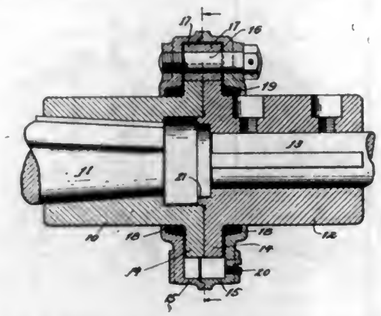
1. A hose coupling tool having a block forming a base with an opening vertically therethrough, a jack mounted on the base, a clamp on the jack to engage a wire extending through the opening in the base, means to operate the jack to separate the base and the clamp and exert a tension on the wire, the base having a bore at right angles



to the said opening, and a cold chisel operating in said bore adapted to sever the wire fastened through the opening in the base.

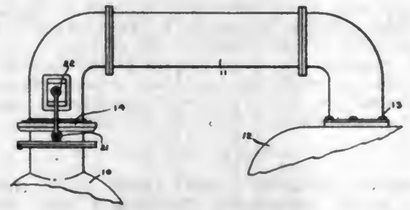
1,666,492. AUTOMOTIVE APPLIANCE. DOMENICO GENTILE, Rome, N. Y. Filed Apr. 19, 1927. Serial No. 185,036. 4 Claims. (Cl. 158—46.5.)

1. In a structure of the class described, in combination, a fuel supply pipe, a vacuum tank, individual branch pipes in communication with said vacuum tank, and a control valve interposed between the supply pipe and said branch pipes and constructed and arranged to connect the branch pipes alternately with the supply pipe, whereby the fuel can be selectively conducted through either one or the other of the individual branch pipes, together with a filtering device, said branch pipes being connected with said filtering device, and said filtering device being in communication with said vacuum tank through a pair of pipes leading from the filtering device, a single pipe leading to the vacuum tank, and a valve constructed and arranged for connecting the pipes of the pair alternately with the single pipe.



1,666,493. WIRE ANCHOR. ALBERT J. GURNEY, Canton, Ohio, assignor to The American Mine Door Co., Canton, Ohio, a Corporation of Ohio. Filed July 17, 1925. Serial No. 44,348. 4 Claims. (Cl. 24—136.)

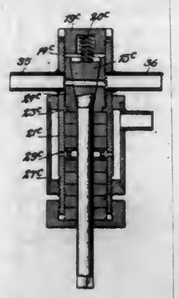
1. In a wire anchor, a clamp including a body member having a fixed jaw, and a substantially U-shaped movable



jaw having side portions to straddle a wire confined between said side portions to lie between the jaws, the movable jaw being shiftable upon the body member in a plane at an angle to the plane of the fixed jaw for gripping a wire between the jaws.

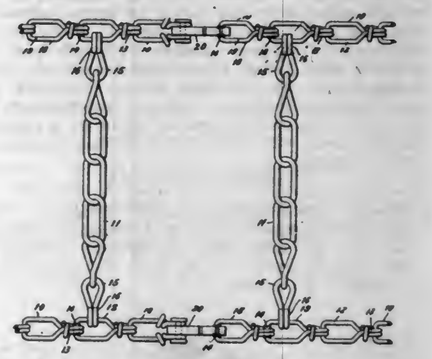
1,666,494. FLEXIBLE COUPLING. ELBERT J. HALL, Piedmont, Calif. Filed Feb. 23, 1926. Serial No. 89,965. 2 Claims. (Cl. 64—96.)

1. In combination with a pair of substantially coaxial shafts, a toothed wheel fixed to each shaft, said toothed wheels abutting each other and having their teeth in alignment, a two-part casing surrounding the wheels, bolts for securing the parts of the casing together, and rollers or sleeves on the bolts engaging the teeth on the wheels.



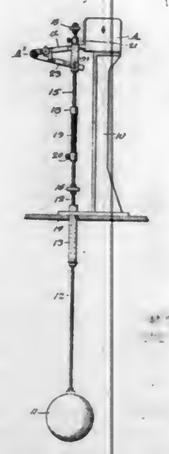
1,666,495. EXPANSIBLE-PIPE JOINT. FRANCIS HODGKINSON, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 27, 1924. Serial No. 758,405. 14 Claims. (Cl. 285—134.)

1. A coupling for adjacent conduit sections adapted to move laterally with respect to each other, comprising a pair of flanges secured to respective sections and arranged in closely spaced relation, two concentrically arranged packing members interposed between the flanges, and means for conveying sealing liquid to the chamber defined by the packing members and the flanges.



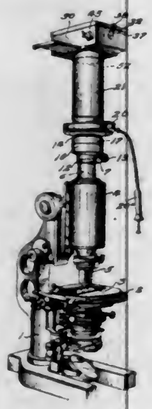
1,666,496. TURNING PLUG. JACK CARL JANKUS, Scranton, Pa., assignor, by mesne assignments, to Iceless Automatic Refrigerator Company, a Corporation of Delaware. Filed Dec. 22, 1922. Serial No. 608,395. 1 Claim. (Cl. 251—103.)

In combination, a turning plug presenting a conical portion, a stem for operating said plug, a casing including a sleeve encircling the stem and integral with the body of the casing, said sleeve having a shoulder at its inner end, an annular member rigidly and detachably secured within said casing and abutting against said shoulder and presenting a conical seat for said plug, a packing within said sleeve, means operating axially of the stem toward said annular member for compressing the packing, a spring acting axially on the plug in the opposite direction to hold it against said seat, and a water jacket en-



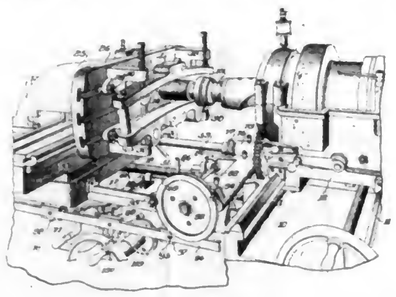
circling said sleeve and communicating with the packing space within the sleeve said jacket having an inlet and an outlet for the circulation of water therethrough.

1,666,497. ANTISKID CHAIN. ANDREW LANGSTAFF JOHNSTON, Jr., Newark, N. J., assignor to Off'N'On Chain Corporation, Newark, N. J., a Corporation of Delaware. Original application filed Mar. 3, 1921, Serial No. 449,490. Divided and this application filed Apr. 25 1925. Serial No. 25,737. 4 Claims. (Cl. 152—14.)



1. In an anti-skid chain, in combination, a side chain, means for joining the ends of said side chain including a hook link carried by an end of said side chain, said hook link having a connecting eye and a communicating restricted inclined entry-slot and the opposing link of the opposing end of the side chain having at its end a flattened part of a size and proportions to permit passage through said entrance slot when said opening link lies substantially in the plane of said slot but obstructing such passage when said opposing link assumes substantial alignment with said hook link, a cross chain for said anti-skid chain, and means for connecting said cross chain to said side chain including an end hook at one end of said cross chain having a connecting eye and a restricted entry-slot leading thereto permitting passage of said flattened end part of the side chain link but obstructing passage of other parts thereof, registry of said entry-slot of the cross chain end hook with said flattened end part of said opposing link being obstructed by the engagement between adjacent links when the side chain is extended with the connected links thereof in substantial alignment.

1,666,498. FLOAT-OPERATED ELECTRIC-SWITCH-ACTUATING MECHANISM. CLARENCE W. LINDEMANN, Chicago, Ill., assignor to Chicago Pump Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 9, 1926. Serial No. 100,795. 17 Claims. (Cl. 200—84.)

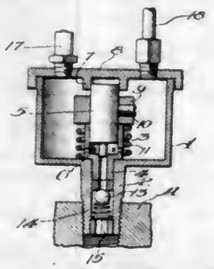


1. In float operated electric switch actuating mechanism, the combination of an electric switch and its switch lever, a float and its float rod, and connecting mechanism between said float rod and switch lever including an operating strut interposed between the float rod and switch lever and having an active position for transmitting motion from the float rod to the switch lever when the float reaches a predetermined high level, said operating strut having a secondary position for transmitting motion from the float rod to the switch lever when the float reaches a different predetermined high level, and automatically operating means for setting said operating strut into active and secondary positions in regular sequence.

1,666,499. PHOTOMICROGRAPHIC CAMERA. FRANCIS F. LUCAS, East Orange, N. J. Original application filed Nov. 22, 1921, Serial No. 517,017. Divided and this application filed Dec. 29, 1923. Serial No. 683,289. 5 Claims. (Cl. 95—49.)

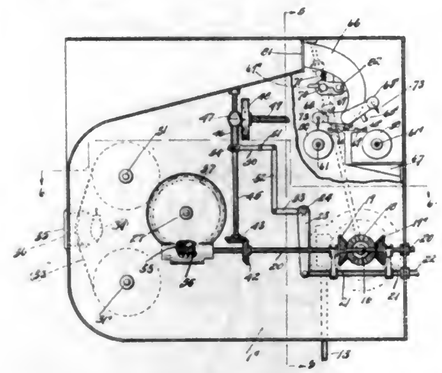
1. In a photographic device, a uniplanar element of ground glass, means for arranging said ground glass element in light-tight relation with a suitable optical image-forming device and means for excluding light foreign to the rays forming the image, said excluding means including a tube extending from said ground glass element toward the observer permanently secured to said ground glass element.

1,666,500. METAL-WORKING TOOL. NILS IVAR LUNDBERG, Madison, Wis., assignor to Gisholt Machine Company, Madison, Wis., a Corporation of Wisconsin. Filed Dec. 6, 1924. Serial No. 754,299. 10 Claims. (Cl. 51—96.)



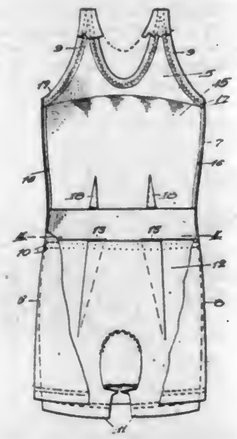
1. In a machine for cutting curved surfaces on metal castings and the like, the combination with a stationary tool holder carrying a horizontal rotary cutting tool, of a vertically adjustable cross-slide support, a cross-slide on said support, means for reciprocating said cross-slide transversely of the axis of said tool, a work holder pivoted on said cross-slide on an axis parallel with the axis of said tool, and means for effecting an oscillating movement of said work holder in a vertical plane simultaneously with the reciprocating travel of said cross-slide.

1,666,501. METHOD OF TREATING SILK. JAMES C. MACKEY, Paterson, N. J., and JOSEPH S. KAUFMAN, New York, N. Y., assignors of one-third to Van Rensselaer Lansingh, Pelham, N. Y. Filed Aug. 19, 1925. Serial No. 51,088. 5 Claims. (Cl. 8—13.)



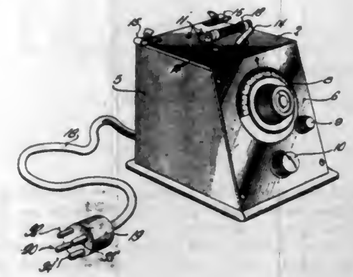
1. Weighted silk which has tin phosphotungstate in the fibers to weight the same, said weighted silk being a neutral base having the same properties as regards dyeing and printing as exist in unweighted silk.

1,666,502. PUMPING LUBRICATING CUP. GEORGE L. MOORE, Chicago, Ill. Filed Aug. 3, 1925. Serial No. 47,658. 3 Claims. (Cl. 184—46.)



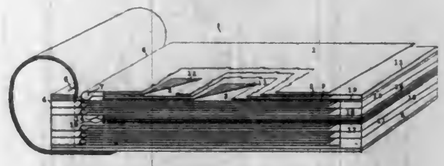
1. In combination, a lubricant receptacle having a small discharge outlet in the bottom, a heavy vertically movable member having a reduced end adapted to fit said outlet with a sufficient degree of tightness to act as a plunger positively to expel lubricating material that has entered the outlet, means for counterbalancing the weight of the plunger, and means for restricting the movements of the plunger between a lower limit in which the reduced end extends a short distance into said outlet and an upper limit in which said end stands above said outlet.

1,666,503. STREET INDICATING AND ANNUNCIATING DEVICE. EDWARD NIETHAMER, Bay City, Mich. Filed Jan. 24, 1922. Serial No. 531,493. 5 Claims. (Cl. 274—18.)



1. In a device of the class described, a built up record consisting of a series of sections, a traveling tone arm movable over the sections of the record, and a transversely disposed horizontal support extending across the device and located beneath the front portion of the tone arm and provided with means for directly engaging and successively raising and lowering the said tone arm as it travels across the record, and means for actuating the tone arm in its movement across the record.

1,666,504. BATHING SUIT. LOUIS PELTON, Chicago, Ill. Filed Aug. 20, 1927. Serial No. 214,289. 1 Claim. (Cl. 2—67.)

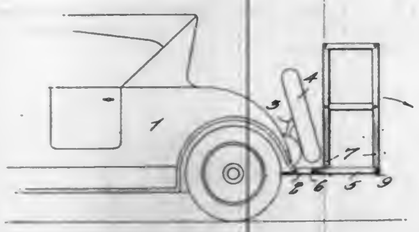


A bathing suit comprising a garment, consisting of waist, skirt and trunks formed of ribbed material capable of stretching in a direction transverse of the garment, and a transverse piece formed of ribbed, knitted material and extending across the bust part of the garment from side to side and being secured to the sides of said waist portion, said transverse piece being of greater length than the distance between the sides of the garment, and being substantially inelastic along its length across the garment.

1,666,505. RADIO APPLIANCE. JOHN M. PETERSON, Milwaukee, Wis. Filed Feb. 28, 1927. Serial No. 171,612. 1 Claim. (Cl. 250—14.)

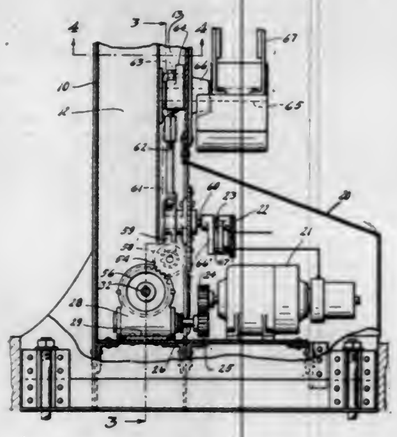
A device of the class described comprising a receiving circuit including a grid leak, and adapted to be connected with a radio broadcast receiver to change its normal wave length range, a casing for the circuit having a top and front, means mounted on the front of the casing for tuning the circuit, means mounting the grid leak from the top of the casing, means carried by the top for readily releasably connecting an antenna, and a ground wire with the circuit, and a flexible cable extended from the casing whereby the circuit is connected with the circuit of the broadcast receiver.

1,666,506. MANIFOLDING SALES BOOK. ARTHUR H. PHILLIPS, Hempstead, N. Y., assignor to American Sales Book Company, Limited, Toronto, Canada, a Corporation of Canada. Filed Apr. 17, 1924. Serial No. 707,027. 4 Claims. (Cl. 282—9.)



1. A salesbook comprising, in combination, plurality of sheets attached together and to a back to form a stub, each of said sheets having a detachable extension on a side other than that toward the stub, said detachable extensions being bound together to form a dummy stub, and carbon sheets interleaved between said first mentioned sheets projecting into and bound within said dummy, but free from said first mentioned stub.

1,666,507. AUTO CARRIER RACK. HENRY D. PUFFE, Seattle, Wash. Filed May 4, 1927. Serial No. 188,775. 1 Claim. (Cl. 224—29.)



A luggage carrier including extension bars rigid with the frame of the vehicle, a box-like receptacle of

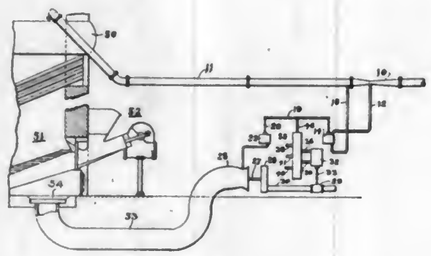
more or less skeleton form including supporting bars, pivotal connections between one end of the supporting bars and the free ends of the extension bars, the opposite ends of the supporting bars being extended beyond the receptacle, and means whereby the extended

portions of the supporting bars may be interlocked with the extension bars when the receptacle is in an upright position, the pivotal movement of the receptacle on the extension bars moving said receptacle bodily from the vehicle to permit free access to the rear end of the vehicle.

1,666,508. YIELDABLE BARRIER. EMERSON D. SAWYER, Chicago, Ill. Filed May 16, 1923. Serial No. 639,366. 9 Claims. (Cl. 39—1.)

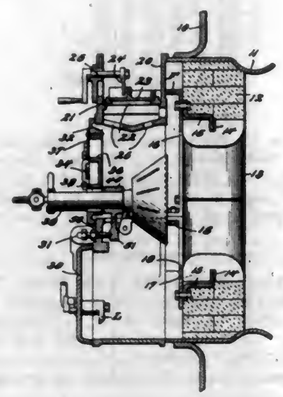
1. A device of the class described comprising columns at opposite sides of the roadway, an impact receiving member extending across the roadway and mounted to move vertically on said columns, a transverse shaft extending between said columns, a motor at the base of one of said columns, an operative connection between said motor, the corresponding end of said impact member and said transverse shaft, and an operative connection between said transverse shaft and the other end of said impact member.

7. A barrier column consisting of a plate bent into substantially tubular form with a gap at one side providing a longitudinal opening, and a transverse member adapted to divide said column into two compartments.



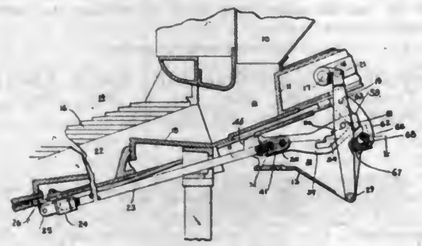
9. A device of the class described comprising a two compartment column adapted in cooperation with another column to supoprt a yielding barrier; a shaft mounted in the wall of said column and extending from the interior to the exterior thereof, means contained in said column for operating said shaft; and a sidewalk arm detachably mounted on the outer end of said shaft.

1,666,509. FLYTRAP. HUGO G. A. SCHLOSSARECK, Yonkers, N. Y. Filed June 28, 1926. Serial No. 118,916. 1 Claim. (Cl. 43—122.)



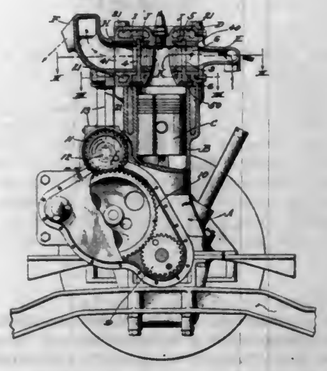
A flytrap comprising a base having a central liquid holding compartment, a hollow conical support carried in spaced relation above said base, a transparent globe having a bottom opening spaced from the entering end of said support, means on said support to removably engage the globe thereon, said globe having a liquid containing compartment, an annular receptacle carried at the upper end of said globe, a cap thereover, means for detachably engaging said cap, and a lighting means suspended from said cap within said globe.

1,666,510. STOKER-BLOWER CONTROL MECHANISM. HENRY F. SCHMIDT, Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 18, 1921. Serial No. 446,143. 10 Claims. (Cl. 236—14.)



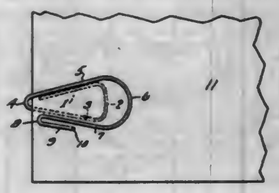
1. In a relay heat regulating mechanism, for boiler furnaces, a conduit communicating with the boiler, an air supply device and means cooperatively associated with the conduit and air supply device for controlling the speed of said air supply device by a regulating effect derivable both from the velocity of fluid flowing through the conduit and from the velocity of air supply.

1,666,511. OIL-BURNING ATTACHMENT FOR FURNACE FRONTS. GEORGE NORMAN SCOTT, West New Brighton, N. Y., assignor to Bethlehem Shipbuilding Corporation, Ltd., a Corporation of Delaware. Filed June 7, 1923. Serial No. 644,021. 6 Claims. (Cl. 158—1.5.)



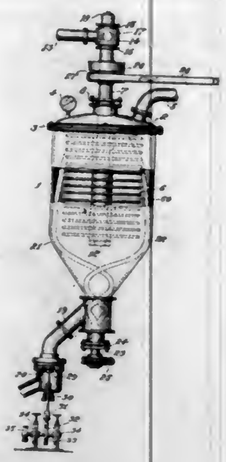
1. A furnace attachment of the class described comprising a furnace ring formed of segmental sections of refractory material, a plate member having an aperture co-axial with that of the ring, and means carried by the plate member for engaging the sections peripherally in order to hold the latter in place as a unit with respect to the plate member.

1,666,512. UNDERFEED STOKER. ANTHONY F. SCHWENDNER, Essington, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 3, 1924. Serial No. 753,555. 5 Claims. (Cl. 110—109.)



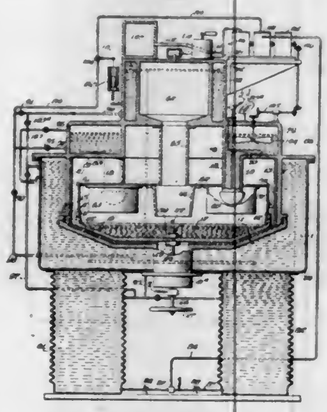
1. A mechanical movement comprising an operating arm, a connecting link, means on the operating arm for engaging the connecting link, said connecting link having a plurality of notches for receiving the engaging means, means biasing the connecting link so that its notches tend to be out of engagement with the engaging means and means for positively holding said link during at least a portion of the stroke so that the operating arm engages one of the notches.

1,666,513. ROTARY VALVE MECHANISM. JOHN W. SHANNON, San Rafael, and JOHN F. PAGENDARM, Oakland, Calif., assignors to Shannon Rotary Valve Motor Company, San Francisco, Calif., a Corporation of California. Filed June 15, 1925. Serial No. 37,148. 14 Claims. (Cl. 123—190.)



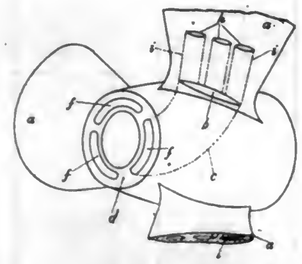
1. In an engine of the character described, a cylinder, a piston, and a cylinder head, a sleeve valve journalled in the head, said sleeve valve and head having ports formed therein in communication with the cylinder, and a pair of sealing plugs mounted in the head and engaging the inner faces of the sleeve valve.

1,666,514. PAPER CLIP. CARLTON C. SIGLER, Cleveland, Ohio. Filed Oct. 13, 1926. Serial No. 141,294. 2 Claims. (Cl. 24—261.)



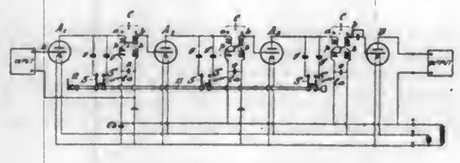
1. A paper clip consisting of a continuous wire bent to form an outer loop and an inner loop continuous therewith, the said loops extending in the same direction and being connected by a loop extending in the opposite direction, the wire forming one side of the outer loop being bent upon itself to form a loop outside of said loops and the extreme end of such wire being bent at substantially a right angle to the plane of the clip and providing a projection of sufficient length to be inserted through several sheets of paper.

1,666,515. FILTER. ERNEST J. SWEETLAND, Montclair, N. J. Filed Dec. 1, 1920. Serial No. 427,652. 15 Claims. (Cl. 210—178.)



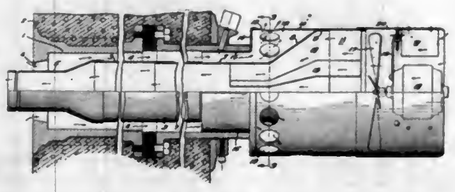
1. In combination, a filter tank, a filtering device rotatably supported in said tank, means for feeding sludge to said tank under pressure, and constructed and arranged automatically to stop the supply of sludge to said tank and to rotate said filtering device to cleanse it, at mechanically determined intervals.

1,666,516. VAPOR RECTIFIER. WILLIAM TSCHUDY, Yonkers, N. Y. Filed Nov. 17, 1919. Serial No. 338,683. 20 Claims. (Cl. 250—27.5.)



1. A large-capacity vapor rectifier having a stationary vapor chamber and a pair of main electrodes arranged therein and between which is formed the main rectifying arc, and means independent of the flow of current across the arc for adjusting one of said electrodes to and from the other to completely control the electrical characteristics of said arc.

1,666,517. PROPELLING DEVICE FOR SHIPS. EDWARD ERNEST TULLY, Birkenhead, and WILLIAM LOVIS, London, England. Filed Jan. 25, 1927. Serial No. 163,341. 2 Claims. (Cl. 170—172.)

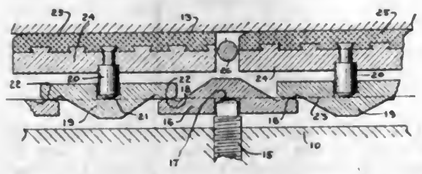


1. A propeller for ships comprising in combination with a plurality of blades formed on a boss, said blades formed with openings at the roots, passages within the boss one extending from each of said openings to the rear end of the boss forwardly of the blade root from which it extends.

1,666,518. RADIOFREQUENCY AMPLIFIER. FREDERICK K. VREELAND, Montclair, N. J., assignor to Vreeland Corporation, Hoboken, N. J., a Corporation of New Jersey. Original application filed Aug. 6, 1923, Serial No. 655,794. Divided and this application filed Apr. 14, 1925. Serial No. 22,928. 9 Claims. (Cl. 179—171.)

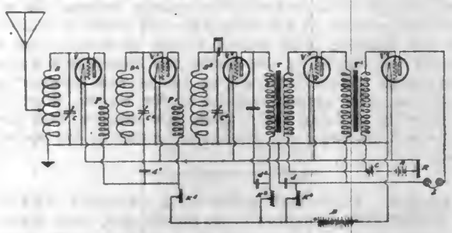
1. In an amplifier for high-frequency currents, a plurality of amplifier tubes, coupling means connecting these tubes in cascade, the several coupling means having frequency characteristics which are different for the several component amplifiers and so related to each other that the combined amplifying effect of the system is substantially uniform over a given band of frequencies, and means for simultaneously adding reactances to the coupling means, thereby shifting the frequency relation of the amplification band while preserving its uniform band character.

1,666,519. VAULT VENTILATOR. ROSS R. WEST, San Francisco, Calif. Filed Nov. 2, 1925. Serial No. 66,296. 10 Claims. (Cl. 98—33.)



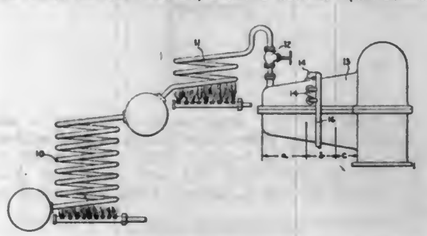
1. In combination with a bank vault having a comparatively small opening in one wall thereof, a ventilating device adapted to be quickly and removably mounted in the opening in said wall and constructed to cause simultaneous circulation of air therethrough into the vault and out thru said opening.

1,666,520. CIGARETTE CASE. GEORGE W. WHITNEY, New York, N. Y. Filed July 10, 1926. Serial No. 121,505. 1 Claim. (Cl. 206—41.)



A container of the class described comprising a box portion open at the top for the reception of an article, a cover for the box, a movable plate within the box on which the article is adapted to be placed, a spring beneath the plate, rods secured to the plate, and projecting members on the interior walls of the box portion through which said rods pass, said projecting members serving to guide the rods and to limit the extent of the plate's movement.

1,666,521. THRUST BEARING. ROBERT C. ALLEN, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 17, 1925. Serial No. 37,711. 1 Claim. (Cl. 308—160.)



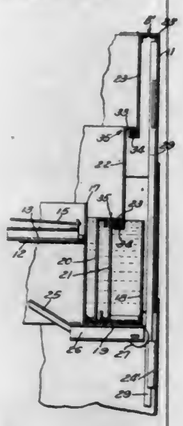
In a thrust bearing the combination of a thrust collar; a supporting member spaced from and in opposed relation with respect to the collar; an annular series of segmental shoes engaging said collar; a pivot projection carried by each shoe and extending toward said supporting member; a plurality of pivot projections carried by the supporting member and arranged alternately with respect to the pivot projections of the shoes and extending toward said collar; all of said pivot projections having their pivot ends tangent to a common normal plane; a first series of rocker members, each of which has an intermediate depressed seat engaging a pivot projection on the supporting member and a pair of rocker bearing portions facing said collar, the rocker bearing portions of the members of the first series being arranged laterally of the seats thereof and tangent to said common normal plane; and a second series of rocker members, each of which has an intermediate depressed seat engaging a pivot projection of a shoe and a pair of rocker bearing portions facing said supporting member, the rocker bearing portions of the members of the second series being arranged laterally of the seats thereof and tangent to said common normal plane; the rocker bearing portions of the members of the second series being in overlapping relation with respect to the rocker bearing portions of the members of the first series and the overlapping rocker bearing portions being in rocking engagement.

1,666,522. VOLUME-CONTROL SYSTEM FOR RADIO-RECEIVERS. EDWARD F. ANDREWS, Chicago, Ill. Filed Nov. 11, 1925. Serial No. 68,254. 5 Claims. (Cl. 250—20.)

1. In an electric amplifying or rectifying system, a thermionic tube, a filament and a plate therefor conductively connected together to form a plate circuit, an impedance and a source of B power in said circuit, a variable resistance of relatively high value in said circuit between said impedance and said filament, and a capacity, one terminal of which is connected to the said plate circuit at a point between said impedance and said variable resistance and the other terminal of which is connected to said plate circuit at a point between the other terminal of said variable resistance and said filament.

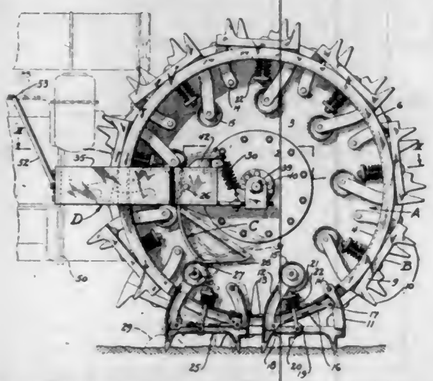
1,666,523. TREATMENT OF STEAM TO REDUCE OR PREVENT CORROSION. RICHARD WILLIAM BAILEY, Altrincham, England, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 17, 1921, Serial No. 523,054, and in Great Britain Dec. 20, 1920. 3 Claims. (Cl. 87—27.)

1. The process of minimizing corrosion in machines for abstracting the available energy of steam in the production of mechanical power, and in which steam changes from a superheated to a saturated condition, which consists in injecting an inert liquid diluent into the steam on the high pressure side of the zone of change from superheated to saturated conditions.



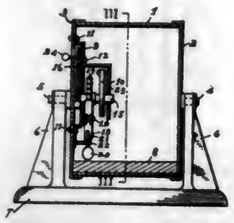
1,666,524. COIN BANK OR RECEPTACLE. ORLAND F. BAUGHMAN and JOSEPH HABART, Lakewood, Ohio, assignors to The Bankers Savings & Credit System Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 11, 1925. Serial No. 29,393. 4 Claims. (Cl. 232—4.)

1. A coin bank comprising a receptacle having a circular opening and a plurality of tongues extending inwardly from the edge portion of said opening and equally spaced apart about the same, a cover having a de-



pression fitting within said opening and provided with a plurality of arcuate slots in the peripheral wall of the depression the corresponding ends of said slots being enlarged to provide openings through which said tongues are adapted to be projected, the tongues entering the restricted portions of the slots when the cover is rotated in one direction with respect to the receptacle, and a spring bolt carried by the closure and housed within the depression thereof for engaging one of said tongues to hold the cover against rotation in the reverse direction sufficiently to bring the tongues into register with the aforesaid openings, and means for retracting the spring bolt.

1,666,525. FLOATING ROOF AND SEALING MEANS THEREFOR. CHARLES F. H. BOHNHARDT, Long Beach, Calif., assignor of one-half to Joseph R. Baril, Long Beach, Calif. Filed Aug. 20, 1925. Serial No. 51,371. 7 Claims. (Cl. 220—26.)

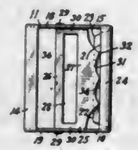


1. A tank and roof construction comprising a main outer shell provided with guides therein; a roof vertically movable between said interior guides; and liquid seal means between said shell and said roof, said guides being engaged by rollers disposed below said liquid seal means.

1,666,526. TRACTION WHEEL. JOHN J. CAMPODONICO, Stockton, Calif. Filed June 26, 1926. Serial No. 118,810. 6 Claims. (Cl. 305—11.)

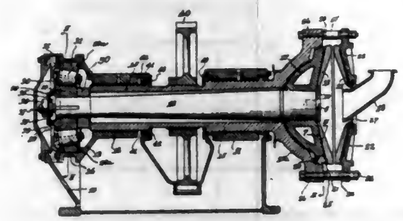
5. A device of the character described, comprising a traction wheel having a rim portion, a plurality of shoes pivotally attached to the exterior face of the rim and forming a flexible track therefor, an arm on each shoe extending inwardly through the rim, a roller on each arm, a pivotally mounted cam member directly engaging the rollers during a portion of the revolution of the wheel and adapted to swing the shoes about their pivots so that they will assume a substantially horizontal position as they approach the ground surface over which the wheel travels, and a spring connected with the cam to resiliently support the cam while in engagement with the shoes.

1,666,527. MECHANICAL TOY. JOHN W. CULP, Johnstown, Pa. Filed Feb. 25, 1927. Serial No. 171,032. 10 Claims. (Cl. 273—138.)



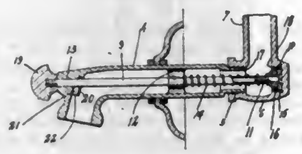
1. A mechanical toy of the character described comprising a revoluble body portion, an indicator member carried by said body portion, and means for automatically shifting said indicator an equal predetermined distance upon each revolution of said body portion.

1,666,528. BUCKLE. CHARLES J. DAHLGREN, East Orange, N. J. Filed Oct. 30, 1925. Serial No. 65,730. 7 Claims. (Cl. 24—191.)



1. A buckle comprising a buckle frame, a tongue frame, and arms on said tongue frame pivoted to said buckle frame and slightly spread apart to provide a varying distance therebetween for engaging the sides of and snapping past said buckle frame on the rotation of said tongue frame into operative position, said distance at one point being greater than the inside width of said frame and at another point being less than the inside width of said frame.

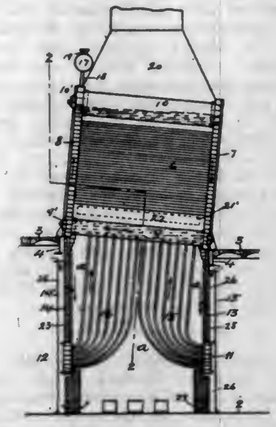
1,666,529. BUCKLE. CHARLES J. DAHLGREN, East Orange, N. J. Filed Aug. 13, 1926. Serial No. 128,932. 11 Claims. (Cl. 24—191.)



3. A buckle comprising a frame, depending sides on said frame, and a swingable member formed of a single piece of sheet material having an opening therein and including a hinge bar integral with and forming one end of said member on one side of said opening, lugs on said hinge bar inserted for swinging movement in the sides of the frame, and a belt engaging member on the other side of said opening.

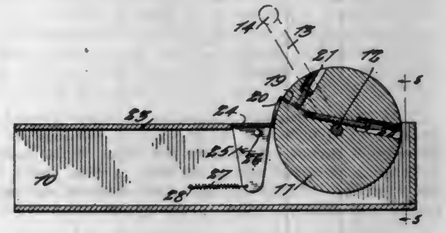
1,666,530. CRUSHING MACHINE. JOHN A. DORMER and JAMES GUNNELL MALONE, Detroit, Mich. Filed Sept. 29, 1926. Serial No. 138,375. 7 Claims. (Cl. 83—10.)

1. In a crushing machine, the combination with a driven hollow shaft having a socket extension, a conical crushing plate carried thereby, a shaft within said hollow shaft having a crushing head and a conical crushing plate oppositely disposed to first named plate, means to connect said plate with said socket whereby both shafts are driven in unison, a cam secured to the opposite end of said shaft, rollers engaging with said cam and arranged between said cam and a stationary bearing surface, and means to adjust the cam longitudinally.



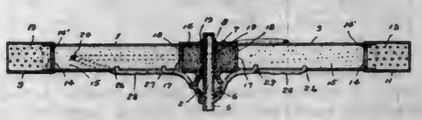
1,666,531. DIVERTER VALVE. MYRON J. GLAUBER, Los Angeles, Calif. Filed Sept. 26, 1927. Serial No. 221,957. 9 Claims. (Cl. 251—137.)

1. In a diverter valve, the combination of a spout, a valve rod extending longitudinally of the spout, a plunger secured to the valve rod, and means for yieldably holding the plunger in non-diverting position.



1,666,532. STEEPLED RADIANT-HEAT STEAM BOILER. CHARLES GILBERT HAWLEY, Chicago, Ill. Filed Mar. 15, 1924. Serial No. 699,594. 11 Claims. (Cl. 122—235.)

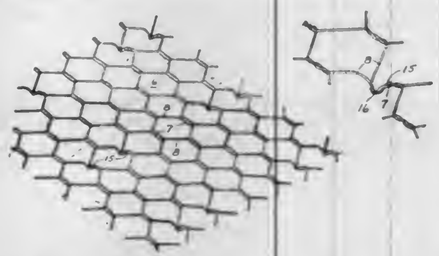
1. A casing or setting containing a tall combustion chamber admitting of the substantially natural maturity therein of the flame of a body of long flaming fire, in combination with a steam boiler comprising a radiant heat absorbing portion in said chamber and a convected heat absorbing portion positioned above said chamber to receive the hot gases therefrom, said radiant heat absorbing portion including opposed parallel header members near the bottom of said chamber, parallel horizontally extending intermediate drums in the upper portion of said chamber and a minor extent of heat absorbing circulating tubes rising from said header members to said drums and widely spaced in and across said chamber, and said convected heat absorbing portion including upright wall forming header member connected to the ends of said intermediate drums, a major extent of substantially horizontally extending heat absorbing circulating tubes connecting said upright header



members, and a superheater member located above said intermediate drums and below said horizontally extending circulating tubes.

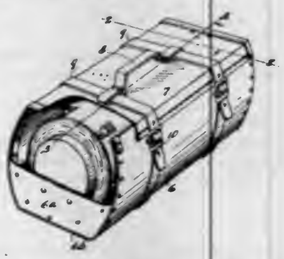
1,666,533. ENVELOPE OPENER. CLARENCE P. HECK and JOHN R. SATER, Hope, Ind. Filed May 12, 1927. Serial No. 190,937. 4 Claims. (Cl. 164—66.)

1. In an envelope opener, a casing, a drum rotatably mounted therein, a blade diagonally mounted in the drum and projecting from the periphery thereof, means for holding the blade at different positions of adjustment, a blade oscillatably mounted in the casing and having its edge engaging the edge of the first mentioned blade, and means for holding the second mentioned blade in engagement with the first mentioned blade.



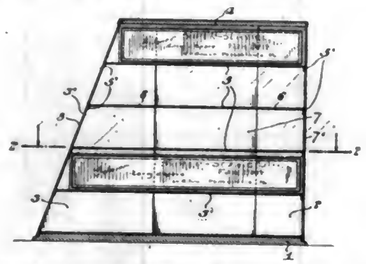
1,666,534. REVOLVING ROCKET. THOMAS G. HITT, Seattle, Wash. Filed July 16, 1927. Serial No. 206,250. 3 Claims. (Cl. 102—23.)

1. A revolving rocket, comprising a plurality of chambers arranged horizontally with the inner ends thereof converging toward a central point, a guide tube affixed to the inner ends of the chambers perpendicularly at right angles therewith, the tube open at the bottom for



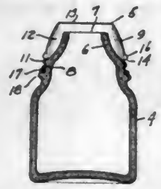
operating over a pivot point, caps at the outer ends of the chambers filled with explosive and display material, and a short section of each chamber adjacent the tube, filled with destructive explosive for shattering the parts of the apparatus at a predetermined time, abutments across the chambers for separating the destructive explosive and the display explosives from the remainder of the chamber, excepting however and with a small opening through the abutments for contact therethrough of fire from the chambers into the said display explosive in the cap and the destructive explosive at predetermined times, the remainder part of the chambers filled with slow burning explosive, with holes in the sides of the chambers for the escape of gases caused by the burning of the slow burning explosive for revolving the rocket, and holes in the bottoms of the chambers for the escape of gases from the same slow burning explosive for causing the rocket to ascend, with a quick match contacting with each of the holes in the sides first and thereafter with the holes in the bottoms of the chambers for igniting the slow burning explosive.

1,666,535. SELF-FURRING PLASTER NETTING. OTTO W. JOHNSON, Oakland, Calif., assignor, by mesne assignments, to Krimpwire Company, Oakland, Calif., a Corporation of California. Filed Dec. 29, 1924. Serial No. 758,589. 11 Claims. (Cl. 72—120.)



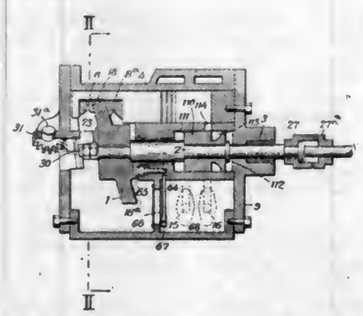
11. A plaster netting comprising a fabric formed of intersecting strands and having strand portions at an intersection thereof offset from the plane of the netting to define a pyramid having its base in said plane, the offset portions of said strands lying between the intersection and defining edges of the pyramid.

1,666,536. CLOTHES CARRIER. OLEA KVARE, McIntosh, Minn. Filed Oct. 26, 1925. Serial No. 64,847. 9 Claims. (Cl. 190—41.)



1. A clothes-carrying device having in combination, a casing, a readily removable carrier therein having a substantially continuous smooth exterior peripheral surface adapted to have a garment wrapped thereabout and supported thereon, means for holding said garment on the exterior of said carrier, and means for supporting said carrier in said casing in a stationary position so that said carrier and garment thereon are spaced from the walls of said casing.

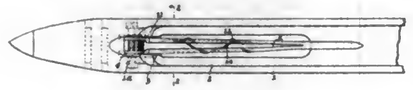
1,666,537. PORTABLE MERCHANDISING CASE. C. WELLINGTON LEWIS, Glenside, Pa., assignor to L. H. Gilmer Co., Philadelphia, Pa., a Corporation of New Jersey. Filed June 18, 1923. Serial No. 646,253. 2 Claims. (Cl. 312—141.)



1. A portable merchandising case comprising a frame having a top, bottom and side members, horizontal partitions connected with said side members, and a sheathing of sheet material for said frame and comprising side walls having flanges engaging edges of said partitions to prevent removal thereof from said side members.

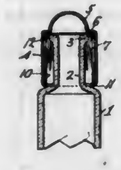
1,666,538. INSECT-POISON FEEDER. LEO A. MATTES, Berkeley, Calif. Filed Aug. 16, 1927. Serial No. 213,261. 4 Claims. (Cl. 43—131.)

1. An insect poison feeder comprising a container having an externally threaded portion below the upper edge thereof, a cover provided with a threaded portion engaging said first portion and having its top and side walls respectively entirely spaced from the top and sides of the container above the threaded portion thereof, and entrance means in said cover above the threads.



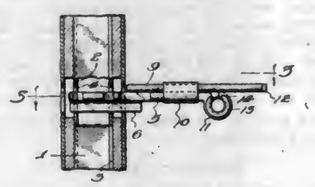
1,666,539. SWASH-PLATE OR SLANT TYPE RECIPROCO-ROTARY MECHANISM. ANTHONY GEORGE MALDON MICHELL, Melbourne, Victoria, Australia, assignor to Crankless Engines Limited, Melbourne, Victoria, Australia. Filed May 23, 1924, Serial No. 715,491, and in Australia July 4, 1923. 18 Claims. (Cl. 74—14.)

1. In mechanism for the inter-conversion of reciprocating and rotary motions, a slant, less than three reciprocable elements coacting therewith, and means



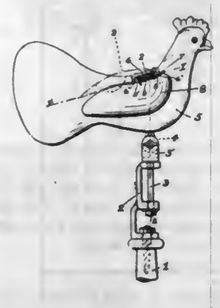
to simultaneously permit and control longitudinal movement of the slant along its axis of rotation synchronously with the rotation.

1,666,540. SHUTTLE. LUIGI PAVIA, Allentown, Pa. Filed Aug. 6, 1927. Serial No. 211,207. 3 Claims. (Cl. 139—210.)



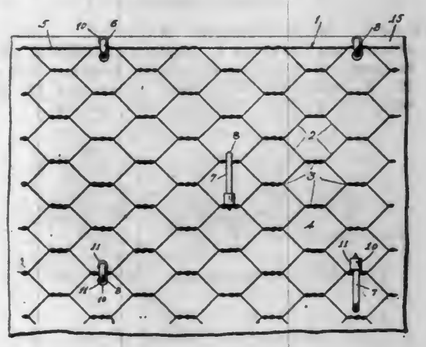
1. The combination of a shuttle body having a weft-package cavity and a spindle pivoted in said body on an axis traversing the cavity, said spindle being split from near its free end to its other end and thus having legs, means near the spindle pivot to spread apart said legs when the spindle is depressed, said body having means to press said legs together when the spindle is raised, and a spring interposed between the legs at a point between said means and the free end of the spindle and also active to spread apart said legs when the spindle is depressed.

1,666,541. PERFUME BOTTLE AND CAP. PHILIP A. REUTTER, Waterbury, Conn., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Jan. 30, 1925. Serial No. 5,683. 6 Claims. (Cl. 215—38.)



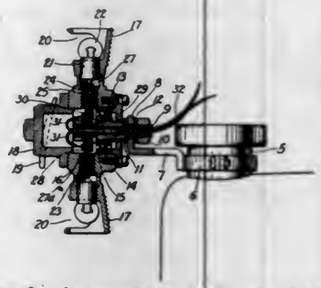
1. A bottle or vial having a mouth and a removable and replaceable closing cap therefor, a shell inside the cap, complementary engaging lip and groove devices on the bottle and shell for permitting bodily removal and replacement of the cap and shell on the bottle, and means for securing the shell in the cap.

1,666,542. SAFETY DEVICE FOR LOCKS. GEORGE SCALLY, Chicago, Ill. Filed Nov. 18, 1926. Serial No. 149,012. 5 Claims. (Cl. 70—8.)



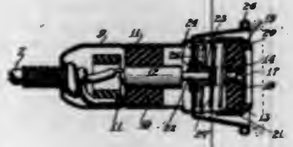
1. A device of the character described comprising a stem having a long narrow radial wing at one end, said stem being grooved at two points distributed along said wing a distance equal to the thickness of a lock casing, to permit the stem to drop down into the narrow portions of the key hole slots in the casing after being inserted in the large ends of the slots, and a guard member adapted to overlie the stem within the large ends of the key holes, and means for detachably locking said guard member and stem together.

1,666,543. WIND-ACTUATED NOVELTY. WALTER P. VINCENT, Portland, Me. Filed Dec. 18, 1926. Serial No. 154,579. 2 Claims. (Cl. 46—40.)



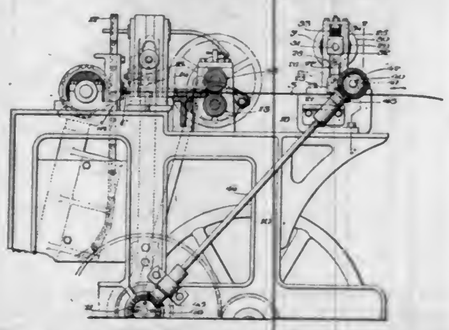
1. In a device of the character described, comprising in combination, a central member, representing the major, body portion of an animate object, a side member, representing a minor portion of said animate object, oscillatively connected to and located on each side of said central member and having a portion of its inner side, at its forward end, cut away, for the purpose of providing a space between said central and each of said side members at the before mentioned location when said members are at all other adjacent points mutually abutting.

1,665,544. PLASTERER'S GRILLE. GEORGE F. VOIGHT, Oakland, Calif., assignor to Economy Products Corporation, a Corporation of California. Filed Feb. 19, 1923. Serial No. 620,084. 5 Claims. (Cl. 72—118.)



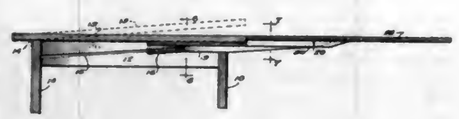
3. The combination with a grille of the character described, of a fastening bracket permanently carried by the grille and comprising, a two pronged staple straddling a portion of said grille, and a spacing element mounted upon the free end of one of the prongs of said staple.

1,666,545. SIGN FOR AUTOMOBILES. MURRAY WITT, Brooklyn, N. Y., assignor, by mesne assignments, to Atlas Manufacturing Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 11, 1927. Serial No. 225,565. 6 Claims. (Cl. 240—8.11.)



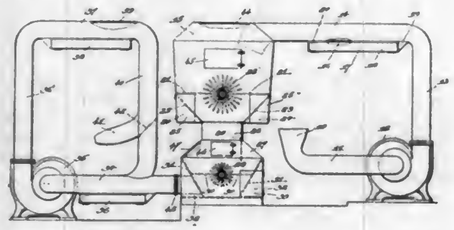
2. A sign for the purpose set forth, comprising a series of radial cylinders having electric lamps on the cylinders, and their current supply, a revoluble air propeller, electric switches controlling the lamps and means whereby the revoluble air propeller operates the switches and thus controls the lighting of the lamps.

1,666,546. ELECTRIC LIGHTER FOR CIGARS, CIGARETTES, ETC. SIDNEY L. WOLFSON, Meriden, Conn., assignor to The Cuno Engineering Corporation, Meriden, Conn., a Corporation of Connecticut. Filed Feb. 18, 1928. Serial No. 255,341. 8 Claims. (Cl. 219—32.)



1. An electric lighter of the character described comprising a casing having an igniter unit in its outer end, a stationary contact within the casing, a sliding switch member mounted on said stationary contact adapted to electrically connect with one end of the igniter unit when drawn out.

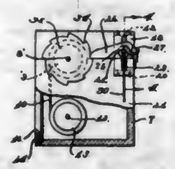
1,666,547. MATCH-MAKING MACHINE. JOSEPH E. ZOMNIR and CLARENCE L. PFERSCH, Springfield, Mass., assignors to The Diamond Match Company, Chicago, Ill., a Corporation of Illinois. Filed May 27, 1927. Serial No. 194,617. 7 Claims. (Cl. 144—51.)



1. In a match making machine having a carrier for the match splints, splint cutting mechanism, and means for feeding a web of match stock to said mechanism and the carrier, a paraffin containing tank located in advance of the said mechanism, directly below the path of the web of match stock, a paraffin transfer element in said tank, and means for effecting relative vertical movement between the web of match stock and the transfer element, whereby said element successively acts upon spaced-apart portions of one surface of the web.

1,666,548. COMBINED IRONING BOARD AND TABLE. EDWARD PETER ANDERSON and ARTHUR NILS ANDERSON, Tumwater, Wash. Filed Apr. 12, 1926. Serial No. 101,545. 6 Claims. (Cl. 68—10.)

1. A device of the character described comprising a table having a hinged top and a pair of substantially parallel side members provided in their inner faces with substantially parallel upwardly inclined grooves, a slide mounted in said grooves, a track carried by said slide and provided with a lower inclined face which is adapted to slide on a portion of said table, the upper ends of said grooves being in substantially the same horizontal plane as the portion of said table on which said lower inclined face is adapted to slide, an ironing board, and a pair of guides carried by said board and engaging said track.

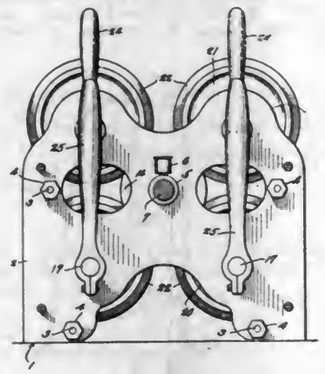


1,666,549. MATTRESS-FILLING MACHINE. PHILLIP BAKER, Mattapan, Mass., assignor to Paramount Bedding Machine Co., of Boston, a Corporation. Filed Feb. 17, 1926. Serial No. 88,794. 4 Claims. (Cl. 9—93.)

1. A machine for treating mattress filling having, in combination, two superposed tanks, a beater in each tank, means for delivering material to the upper tank, a connection between the tanks to permit material to fall by gravity from the upper to the lower tank for a secondary beating operation in the latter while a fresh charge is being simultaneously beaten in the former, a closure in the connection, a blower, a pipe leading from the second tank to the blower, and a discharge pipe connected with the blower.

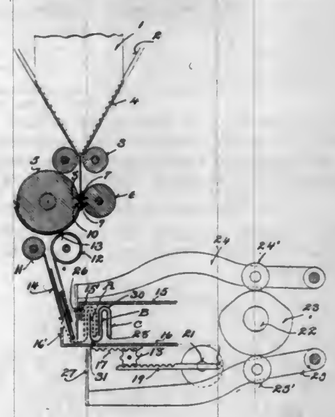
1,666,550. STREET INDICATOR. EMANUEL L. BUTLER, Detroit, Mich. Filed Mar. 30, 1927. Serial No. 179,689. 3 Claims. (Cl. 40—87.)

1. A street indicator of the class described, comprising a housing; rollers mounted in said housing; a flexible display member rolled on said rollers; a ratchet wheel rotatable with one of said rollers; a U-shaped bracket positioned exterior of said housing having an elongated slot formed in its bight; a stud projected through said slot; a dog mounted on said stud, said dog engaging



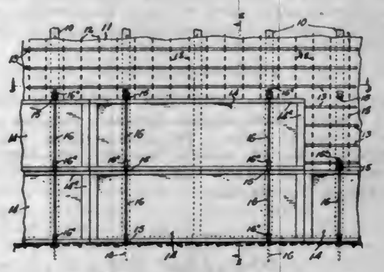
the teeth on said ratchet wheel; means for moving said dog in one direction for effecting rotation of said roller; and means for moving said dog in the opposite direction.

1,666,551. PROCESS OF TREATING VEGETABLE PRODUCE. JAMES BAYLEY BUTLER and JAMES JOSEPH DRUMM, Dublin, Irish Free State. Filed Oct. 7, 1926, Serial No. 140,209, and in Great Britain Nov. 30, 1925. 3 Claims. (Cl. 99—11.)



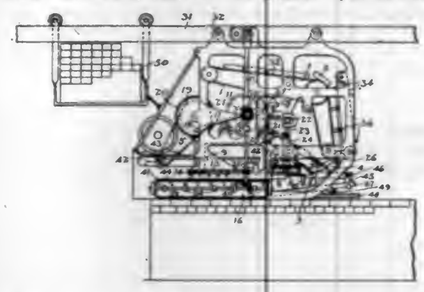
1. The process of preserving vegetable produce which includes the step of impregnating the produce with a solution of disodium hydrogen phosphate of P_H concentration between 7.0 and 8.3.

1,666,552. GURDY. IVAR CHILMAN, Hoquiam, Wash. Filed June 21, 1926. Serial No. 117,492. 1 Claim. (Cl. 242—85.)



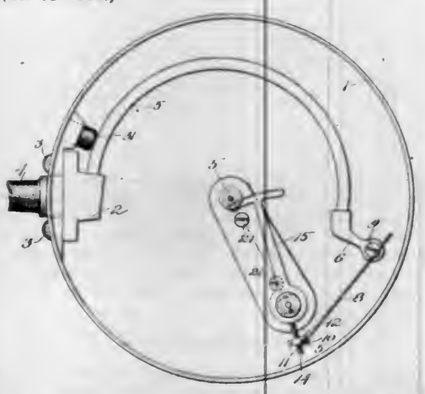
A gurdy constructed to permit compactness and ready handling in a small boat, and comprising a frame embodying side plates and connections joining the side plates, a main shaft journaled in the side plates and located near to the geometrical centers in the side plates, means for rotating the main shaft from a point outside of the frame, a driving member secured to the main shaft and located between the side plates, a pair of upper auxiliary shafts and a pair of lower auxiliary shafts, the upper and lower auxiliary shafts being arranged in a rectangle around the main shaft and having eccentric ends mounted to lock in the side plates, drums journaled on the auxiliary shafts and located between the side plates, inwardly extended flanges on the side plates and located near to the upper and lower corners of the side plates, brakes, means for holding the brakes detachably in abutment with the flanges, the drums being disposed between the driving member and the brakes and being spaced from the brakes and from the driving member and a handle on each auxiliary shaft, the handle constituting means for locking each auxiliary shaft independently of the others, in opposite directions, to carry the drums into engagement with the driving member, or into the handles of the upper pair of auxiliary shafts being located nearer to one of the side plates than the handles of the lower pair of auxiliary shafts being longer than the handles of the upper pair of auxiliary shafts.

1,666,553. INTERFOLDING MACHINE. PETER J. CHRISTMAN, Green Bay, Wis. Filed Oct. 22, 1927. Serial No. 228,004. 7 Claims. (Cl. 270—39.)



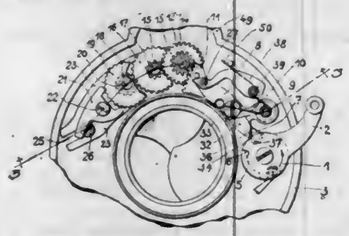
1. In a machine for producing a multifolded package of paper, the combination of means for initially folding the web longitudinally, means for severing the web into strips, mechanism for folding the severed strips transversely, and means for interfolding the previously folded strips to form a continuous package, consisting of engaged units, the last fold of each unit being overlapped by a portion of the succeeding unit.

1,666,554. WALL CONSTRUCTION AND METHOD OF AND APPARATUS FOR BUILDING SAME. EDWIN D. CODDINGTON, North Milwaukee, Wis. Filed Mar. 28, 1925. Serial No. 19,012. 8 Claims. (Cl. 25—131.



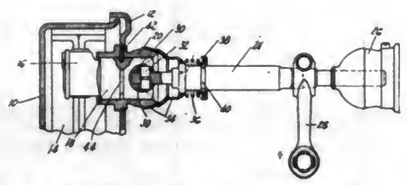
1. The method of forming a wall composed wholly or partly of plastic material adjacent the wall studs of a frame building, which method consists in permanently securing a metal reinforced building fabric to the studs in such wise that the same may be utilized both as a form during construction of the wall and as insulation for the building, and then constructing said wall immediately against said fabric so that a permanent bond is formed between the plastic material of said wall and the reinforcing elements of said fabric.

1,666,555. MACHINE FOR LAYING BRICKS. ROBERT G. COTTIER, Bradford, Ontario, Canada. Filed Nov. 20, 1924. Serial No. 751,093. 17 Claims. (Cl. 72—129.)



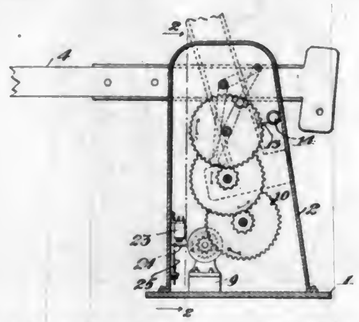
1. The combination in a brick laying machine, a chute for delivery of bricks lengthwise as stretchers and a turning device disposed at the bottom of the chute adapted to turn the bricks crosswise when required as headers.

1,666,556. GAUGE. AUSTIN O. CRAVIN, Chicago, Ill. Filed Dec. 29, 1925. Serial No. 78,083. 16 Claims. (Cl. 73—109.)



1. A gauge comprising a sector; a member rotatably and adjustably mounted on said sector, the axis of rotation of said member extending substantially radially with reference to the pivot of the sector; resilient means operatively connected with said Bourdon spring and operatively connected with said adjustable member.

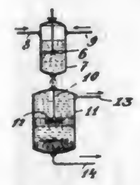
1,666,557. CAMERA SHUTTER. FRIEDRICH DECKEL and MARTIN GEIGER, Munich, Germany, assignors to the firm: Friedrich Deckel, Präzisionsmechanik und Maschinenbau, Munich, Bavaria, Germany. Filed Mar. 16, 1925, Serial No. 15,722, and in Germany Apr. 9, 1924. 15 Claims. (Cl. 95—63.)



1. In a photographic shutter the combination with a blade mechanism, and a motor member for operating the same, of a support, and a retarding device mounted to move bodily and also rotatably on said support and also driven by the motor member.

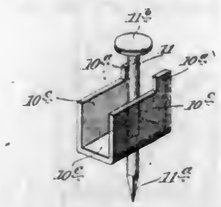
1,666,558. BRAKE-OPERATING MEANS. ADIEL Y. DODGE, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Oct. 27, 1927. Serial No. 228,997. 6 Claims. (Cl. 188—194.)

2. In combination with a supporting part provided with an opening, a bracket provided with a part received in and guided by the walls of said opening and provided with an abutment for governing the axial position thereof in respect to said support, an opening in said bracket extending within the walls of said support, a slot in said bracket extending radially to the last mentioned opening and communicating therewith and being outwardly closed by the walls of the first mentioned opening, a shaft received in said last mentioned opening, a circumferential groove in said shaft in line with said slot, and a key received in both said slot and said groove and prevented from displacement by the walls of said first mentioned opening.



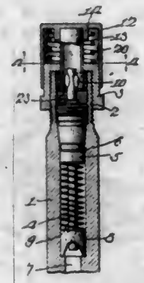
1,666,559. AUTOMATIC ELECTRIC RAILROAD-CROSSING GATE. RALPH O. DORGAN, Mobile, Ala. Filed Apr. 29, 1927. Serial No. 187,530. 2 Claims. (Cl. 39—7.)

1. In an apparatus of the class described, the combination with a gate casing, of an oscillating driven shaft journalled upon said casing, a crank shaft journalled upon said casing, an arm secured to said driven shaft, means pivotally connecting said arm to said crank shaft, a gate fixedly secured to said driven shaft, a ratchet switch provided with an operating finger on said gate casing, said crank shaft provided with means engaging said operating finger for actuating said switch, and means for rotating said crank shaft.



1,666,560. METHOD OF REFINING HEAVY MINERAL OILS BY MEANS OF SULPHUR DIOXIDE IN A CONTINUOUS OPERATION. LAZAR EDELEANU, KARL PFEIFFER, KARL GRESS, and PAUL JODECK, Berlin, Germany. Filed June 25, 1927, Serial No. 201,474, and in Germany June 12, 1924. 3 Claims. (Cl. 196—37.)

1. In a process for refining heavy mineral oils by means of sulphur dioxide in continuous operation; preparing an intimate mixture of the oil and the sulphur dioxide in a vessel by means of a churning device, continuously supplying the mixture to a settling receptacle

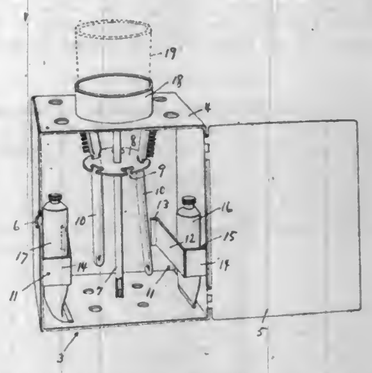


with a successively decreasing speed and at a zone located about in the midst of the mixture already contained in said receptacle.

1,666,561. LATH-SPACING NAIL. WILLIAM W. GALBREATH, Warren, Ohio, assignor to The Youngstown Pressed Steel Company, Warren, Ohio, a Corporation of Ohio. Filed Apr. 28, 1927. Serial No. 187,288. 6 Claims. (Cl. 72—118.)

6. A spacer and support adapted for applying expanded metal lath, comprising a base web and spaced flanges projecting therefrom and equipped with ears, said web having a perforation therethrough adapted to receive a nail with space between the nail and ears for an intervening member of the metal lath.

1,666,562. PNEUMATIC-TIRE VALVE. JULES P. GITS, Chicago, Ill. Filed Nov. 14, 1927. Serial No. 232,991. 10 Claims. (Cl. 152—12.)

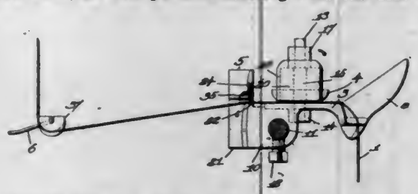


1. A tire valve comprising a casing, valve mechanism positioned therein, a cap for said casing, and means associated with said cap for holding said valve locked on its seat.

1,666,563. INSTRUMENT FOR SETTING UP PROFILES. SIGURD HAGEN, Drammen, Norway. Filed Sept. 16, 1926, Serial No. 135,945, and in Norway July 30, 1925. 4 Claims. (Cl. 234—8.)

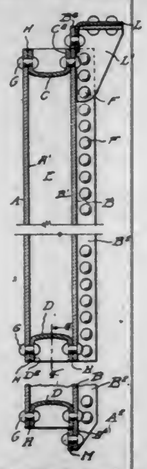
4. In a profile recording instrument, a rotatable driving disk, mounting means for said disk permitting free swinging thereof in accordance with inclination of said instrument, and means comprising the inertia of said disk for compensating for shocks and irregular movements of said instrument.

1,666,564. TOILET-ARTICLE HOLDER. ELMER L. HAHN, McAllen, Tex. Filed June 15, 1927. Serial No. 198,964. 2 Claims. (Cl. 132—84.)



1. As a new product of manufacture, a toilet article holder of the class described comprising an open front housing, a closure for said front, article racks in said housing, means in said housing for supporting tooth brushes, said tooth brush supporting means embodying a standard located centrally in the housing and fastened to the top and bottom walls and carrying a notched disk, and a ring-like band fastened to the exterior of the top of the housing and forming a receptacle for reception of a drinking glass.

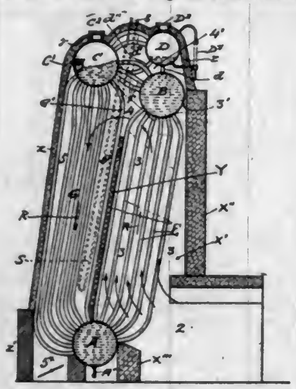
1,666,565. SLUB CATCHER AND TENSION FOR DOUBLING MACHINES. FRANK E. HARDING, Lawrence, Mass., assignor to Arlington Mills, Lawrence, Mass., a Corporation of Massachusetts. Filed June 4, 1925. Serial No. 34,846. 1 Claim. (Cl. 28—71.)



A tension and slub catcher for doubling machines comprising a tension plate provided with an integral perforated ear to receive a supporting rod and with a vertical stud hole, a stud having a reduced diameter lower end supported in the stud hole in the plate with its shoulder engaging the upper surface of the plate and also having an upper end of reduced diameter, a dish-shaped tension disk having a hole in its center somewhat larger than that of the unreduced portion of the stud and supported thereon, a threading guide having a hub supported on and fitting the reduced upper end of the stud and having a shield portion extending

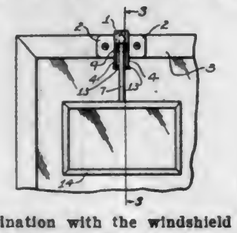
outwardly from the hub beyond the periphery of the tension disk and then downwardly toward the surface of the tension plate, the space between the lower edge of the shield and the plate being fixed by the shoulder on the stud, the tension plate being provided with two forwardly extended horns, one extending forwardly and upwardly from the plate and the other extending forwardly and at a sharp angle to the first horn to form a thread guiding groove and then outwardly and laterally at an obtuse angle to its first direction, thus forming an angular horn, its two portions forming with the first horn

a narrow groove and a wide mouth leading to the groove, and a slub catcher consisting of two jaws of which the lower is formed integrally with the ear of the tension plate and the upper consists of a separate member carrying two dowel pins projecting into two holes in the lower jaw to maintain it in correct position with relation thereto, the jaws being provided with opposed spring recesses, a spring in the recesses normally tending to hold the jaws apart, and a screw to adjust the position of the upper jaw with relation to the lower one.



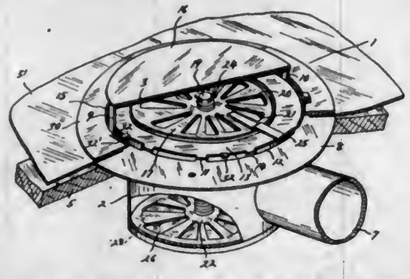
1,666,566. STEAM-BOILER HEADER. CHARLES GILBERT HAWLEY, Chicago, Ill. Filed Mar. 10, 1924. Serial No. 698,213. 2 Claims. (Cl. 122—360.)

1. The herein described header comprising, in combination, deep and shallow channels having their flanges nested and riveted together, leaving a steam-and-water space between them, suitably fastened plugs closing the ends of said space, and the shallow channel being extended endwise beyond one or both said plugs to provide anchorage supports for the header.



1,666,567. RADIANT-HEAT STEAM BOILER AND SETTING. CHARLES GILBERT HAWLEY, Chicago, Ill. Filed Mar. 15, 1924. Serial No. 699,595. 5 Claims. (Cl. 122—302.)

1. A steam boiler of the water tube type comprising a submerged head drum, in combination with a steam-and-water drum thereabove and in free water and steam communication therewith but remote in the direction of gas flow, a rate gaging drum above and in copious water connection with the top of said submerged drum



and having its lower part in more restricted water communication with the lower part of said steam-and-water drum.

1,666,568. GLARE OR LIGHT SHIELD. AVIS JACKSON, East St. Louis, Ill. Filed June 16, 1927. Serial No. 199,186. 3 Claims. (Cl. 296—97.)

2. In combination with the windshield of an automobile, a light shield, comprising a bracket secured to the windshield, the said bracket having a pair of spaced, vertically disposed disc-like ears, the said ears having transversely aligned pairs of peripheral lock notches; a shutter arm slidably mounted between the said ears, the said arm having a longitudinal slot through its inner end; a pivot pin passed transversely through the center of the ears and through the said slot of the shutter arm; a latch pin in the shutter arm adapted to engage the peripheral lock notches of the said ears; and means for normally drawing the shutter arm inwardly between the said ears of the bracket.

1,666,569. REGISTER. JAMES W. KELCH and JAMES J. SUNDAY, Detroit, Mich.; said Sunday assignor to said Kelch. Filed Mar. 15, 1926. Serial No. 94,974. 15 Claims. (Cl. 98—2.)

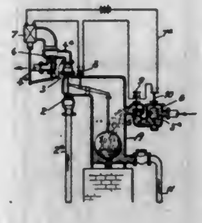
1. An air register having a hollow body provided with a lateral flange at the open end thereof, a bearing

plate secured to said flange, and a cover for said body having depending spacer lugs resting on said plate and having other lugs secured to said flange.

1,666,570. SOUND-AMPLIFYING CONSTRUCTION. JACOB KERSTEN, Allegan, Mich. Filed Dec. 14, 1925. Serial No. 75,191. 10 Claims. (Cl. 181—27.)

1. A device of the class described comprising two conical shell members having their base edges abutting, one of said members having openings therethrough and each of said members at its lower side being formed with a downwardly projecting portion which when brought together form a downwardly extending neck, a clamping ring located around the abutting edges of the members for securing them together, and an amplifying horn located within the shell made by said members having a sleeve at its lower portion extending downwardly through the neck of the shell and adapted to have a loud speaker unit connected therewith.

1,666,571. SOUND-AMPLYING HORN. JACOB KERSTEN, Kalamazoo, Mich. Filed Mar. 28, 1927. Serial No. 178,851. 4 Claims. (Cl. 181—27.)

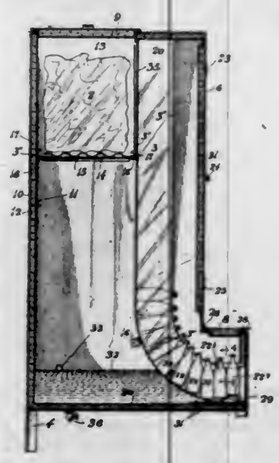


1. An amplifying horn, comprising an inner rigid body of cementitious material, stretched elastic fabric on the inner side of the horn inside of said body, inelastic coarse fabric on the outer side of said body, and tough paper outside of and covering the second fabric.

1,666,572. PISTON-CLEANING TOOL. JUAN KLEIN, St. Louis, Mo. Filed Apr. 13, 1927. Serial No. 183,537. 17 Claims. (Cl. 15—104.01.)

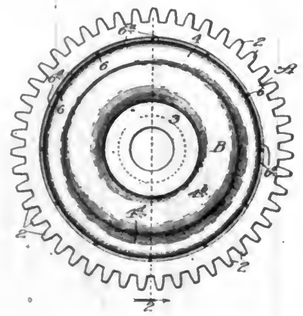
1. A piston cleaning tool comprising an encircling member having an operating handle; a holder slidably mounted in said handle; and a pair of blades mounted on said holder one blade adjustable with relation to the other, and which are adapted to clean and scrape the piston ring grooves.

1,666,573. DEVICE FOR RETURNING WATER OF CONDENSATION TO BOILERS. HUBERT KRANTZ, Aachen, Germany. Filed Nov. 29, 1926, Serial No. 151,557, and in Germany Jan. 18, 1926. 8 Claims. (Cl. 137—101.)



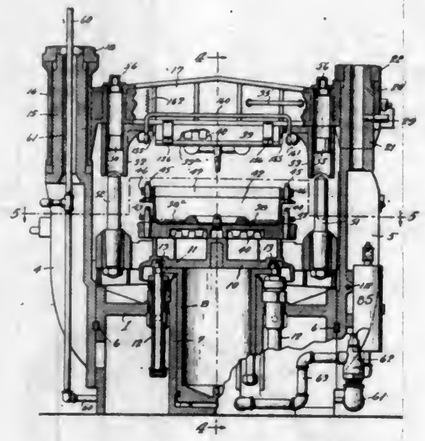
1. A device for returning water of condensation to boiler, comprising a receiver, a conduit for supplying water of condensation to the receiver, a steam inlet valve, a steam exhaust conduit, a primary steam outlet valve in this exhaust conduit, a float in the receiver for controlling both the steam inlet valve and the primary steam outlet valve, a secondary steam outlet valve in the steam exhaust conduit behind the primary steam outlet valve, and means for closing this secondary steam outlet valve as soon as the flow of the water of condensation from the supply pipe into the receiver has begun.

1,666,574. HAIR-CURLING APPARATUS. PAUL KUNIN, Minneapolis, Minn. Filed Oct. 5, 1925. Serial No. 60,448. 3 Claims. (Cl. 132—36.1.)



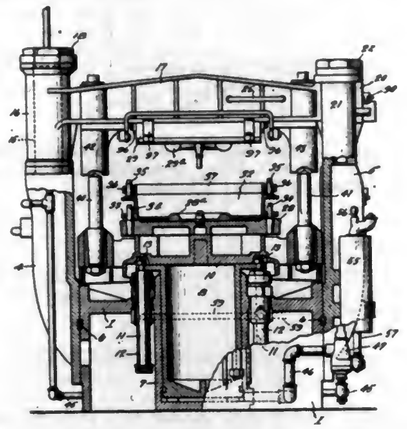
1. In apparatus for curling hair, a heating device comprising a tubular heating chamber, a curling rod adapted to be disposed longitudinally within said heating chamber, a shield of dielectric material permanently carried by the outer end of said curling rod and having a substantially cylindrical portion adapted to be forced into the outer end of said heating chamber to substantially close the same and center the outer end of said rod.

1,666,575. GRAVITY-FEED BOTTLE COOLING AND DISPENSING CABINET. ROBERT E. LEE, Cincinnati, Ohio. Filed Mar. 30, 1926. Serial No. 98,467. 4 Claims. (Cl. 312—36.)



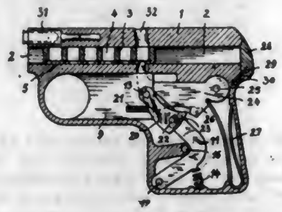
4. In a bottle cooler and feeder, a partition having a vertical front flange recessed near its top and curved downwardly and outwardly near the bottom and bent vertically near its lower end with a lateral holding flange at the end.

1,666,576. SILENT GEAR AND METHOD OF MANUFACTURE. ROBERT W. LYTLE, Cincinnati, Ohio, assignor to The Formica Insulation Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Feb. 5, 1925. Serial No. 7,176. 6 Claims. (Cl. 74—28.)



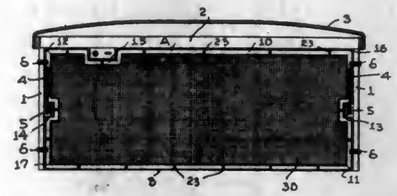
1. A gear comprising an annulus of compacted and hardened fibre and a binder, a central bushing, and a corrugated sheet-metal disk held under radial compression between said bushing and said annulus and equipped with a slitted flange, said flange having interlocking connection with said annulus.

1,666,577. MOLDING MACHINE. FRANK E. MCCABE, Chagrin Falls, Ohio, assignor to The Rathbone Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 21, 1924. Serial No. 733,364. 39 Claims. (Cl. 22—30.)



1. In a molding machine, the combination of a frame structure, a ramming head movably supported thereby, a pressure head carried by the frame structure and adapted to be moved to and from a position in operative relation to the ramming head, means for moving the ramming head toward and from the pressure head, and means carried by said heads and cooperating to properly align the heads as the ramming head approaches the pressure head.

1,666,578. AUTOMATIC CONTROL FOR THE RAMMING HEADS OF MOLDING MACHINES. FRANK E. MCCABE, Chagrin Falls, Ohio, assignor to The Rathbone Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 5, 1926. Serial No. 86,147. 15 Claims. (Cl. 22—30.)

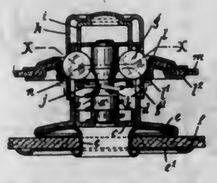


1. In a molding machine, the combination of opposed heads that are relatively movable toward and from each other, means for effecting relative movement of the heads, a fluid container, a fluid displacing element operating in said container, said container and said displacing element being connected to the respective heads in such manner that the container and displacing element are restricted to substantially the same relative movement as the heads, a valve for controlling the escape of fluid from the container, said valve incorporating an orifice and a closure that is movable toward and from the orifice, and means dependent for its actuation upon the relative movement between the heads for automatically adjusting the closure toward and from said orifice thereby to effect a movement of variable speed between the heads.

1,666,579. SCARING PISTOL. FRANZ MÖLLER, Zella-Mehlis, MARTIN MORITZ, and ALBIN GERSTENBERGER, Chemnitz, Germany. Filed June 4, 1927, Serial No. 196,556, and in Germany June 8, 1926. 4 Claims. (Cl. 42—54.)

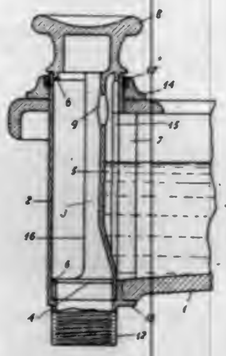
1. In a scaring pistol in combination, a casing, a cartridge carrying loading strip within the casing and movable lengthwise thereof, smoke-educting means in the casing and cooperating with the strip, spring actuated feeding means engageable with the strip, a spring actuated cock, adapted for engagement with the strip and with the cartridges thereon, a trigger within the casing, a feeding lever, linked to the feeding means, a tensioning lever, engageable with the cock, link connection of the tensioning lever with the trigger, and cam actuating means on the trigger engageable with the feeding lever, and adapted to operate the feeding means and the cock upon the movement of the trigger.

1,666,580. SCREEN. JOHN HENRY PARK, Harrisburg, Pa. Filed Apr. 12, 1926. Serial No. 101,383. 2 Claims. (Cl. 156—14.)



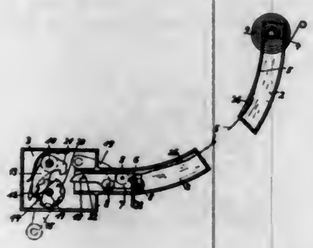
1. A screen for automobile windshields composed of two separable L-shaped frame members of U-shaped cross section, a filler composed of L-shaped members lying within the U-shaped channel of the frame members and holding a reticulated sheet within said frame, the corners of the L-shaped filler members lying at the points of joinder of the L-shaped frame members, and means for securing the parts together.

1,666,581. PROCESS AND APPARATUS FOR SPINNING METAL TUBES. HENRY E. RAINAUD, Meriden, Conn. Filed May 25, 1927. Serial No. 194,115. 15 Claims. (Cl. 113—52.)



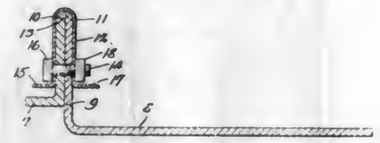
10. In an apparatus for spinning ornamental metal tubes, a rotary mandrel adapted to be connected to the head stock of a lathe, said mandrel being of relatively small diameter and provided at either end with enlarged shoulders for supporting the ends of a tubular metal blank, one of said shoulders being detachable from the mandrel, and means cooperating with the detachable shoulder for locking the blank in operable position.

1,666,582. FASTENING BUTTON. ACHILLE FRANÇOIS RAYMOND, Grenoble, France. Filed Aug. 26, 1926, Serial No. 131,776, and in France July 15, 1926. 2 Claims. (Cl. 24—211.)



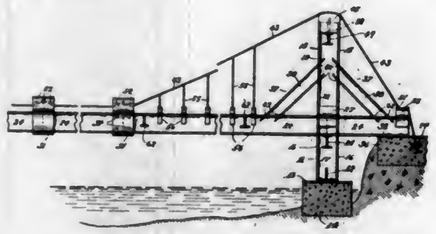
2. A button device comprising a male part consisting of a slotted casing, a stationary axle secured in the interior of the said casing, said axle having a restricted portion, fastening elements extending through the slots in the said casing and slidable along the axle, means for displacing said fastening elements in the slots of the casing and along the axle whereby the said elements disappear when they coincide with the restricted part of the axle, elastic means for returning to normal position the means serving to displace the fastening elements, and an eyelet coacting with the male part.

1,666,583. VALVE. FRIEDRICH ROST, Kusnacht, near Zurich, Switzerland. Filed Nov. 19, 1924, Serial No. 750,939, and in Germany Mar. 25, 1924. 2 Claims. (Cl. 4—198.)



1. In combination with a container formed with an elongated outlet, of a casing of cylindrical form slidably cooperating with the container beyond the outlet, means on the casing to limit the upward movement of said casing relative to the container, removable means at the upper end of the casing for cooperation with the container to secure said container in fixed relation with the casing, said container having an elongated opening to align with the outlet of the container when the casing is in position, and a valve body rotatably mounted in the container and comprising upper and lower cylindrical sections to snugly fit within the casing above and below the outlet opening from the container, the wall of the valve body between said sections being cut away for approximately one-half its circumferential length, the remaining portion of the valve body between said sections including a part parallel to the diameter of the valve body and of a width corresponding to that of the container outlet to close said outlet in an appropriate position of the valve body.

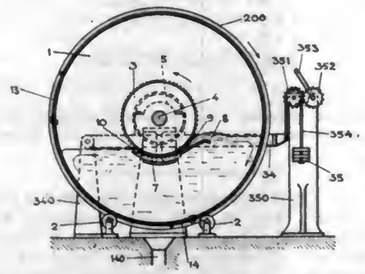
1,666,584. SAFETY DEVICE FOR PRINTING MACHINES. LINUS PAUL SCHINDLER, Hamburg, Germany. Filed Sept. 2, 1924, Serial No. 735,504, and in Germany Aug. 23, 1923. 1 Claim. (Cl. 192—130.)



A safety device for printing machines comprising in combination with the starting lever of the machine, a guard or roller blind on a revolvable axle to which one end of said guard is attached, a cross rod in the free end of said guard, two carriages one at either end of said cross rod, two curved channel-shaped guides on the machine frame in which said carriages are guided, a casing at the lower end of said two curved guides, an axle journaled in each of said casings, ratchet wheels one in each casing keyed on said axle, a spring controlled locking pawl pivotally mounted in each casing so that it is adapted to engage with and lock the coresponding ratchet wheel, a nose on each carriage adapted to penetrate into the corresponding casing when the guard has been pulled down so that said nose disengages said pawl from the corresponding ratchet wheel, a crank arm on one end of said axle, a rod connecting said crank with said starting lever of the machine so that the operation of said starting lever is possible only when the pawl has been operated by the pulled down guard, and means for locking the corresponding carriage of said guard during the working of the printing machine.

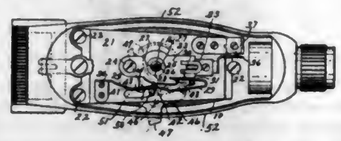
1,666,585. SAFETY BRAKE-BEAM SUPPORT. GEORGE M. WADDY, Buffalo, N. Y. Filed Feb. 25, 1927. Serial No. 170,902. 1 Claim. (Cl. 188—210.)

A safety bracket to be attached to a transverse bar of a truck frame, including a length of sheet metal having an upstanding end portion, a laterally disposed flange formed along the upper edge of the upstanding end portion and adapted to rest on the upper edge of the transverse bar, said transverse bar and upstanding end portion having registering openings, a securing member of a width equal to the width of the length of sheet metal, said securing member being U-shaped in formation to fit over the transverse bar and upstanding end portion, said securing member having openings registering with the first mentioned openings, and a bolt extending through the registering openings for securing the safety bracket to the transverse bar.



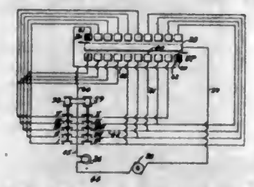
1,666,586. BRIDGE. WESLEY WAIT, Newburgh, N. Y. Filed Oct. 11, 1927. Serial No. 225,546. 7 Claims. (Cl. 14—18.)

1. In bridge construction, the combination of a stringer and a column in interlocking relation with the column extending above the stringer, with an anchored cable extending from the stringer over the crown of the column, and a shoe mounted on the stringer and having frictional engagement with the cable to permit restricted relative movement between the stringer and the cable.



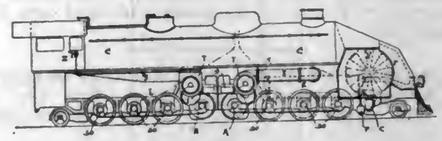
1,666,587. BEATING ENGINE. REINHOLD M. WENDEL, Stockholm, Sweden. Filed May 23, 1927, Serial No. 193,683, and in Sweden May 25, 1926. 4 Claims. (Cl. 92—22.)

1. In a beating engine, a rotary roll with a substantially horizontal axis, a bed plate cooperating with said roll, a drum with a substantially horizontal axis enclosing said roll and bed plate, said drum rotatory about said axis which is substantially parallel to the axis of said



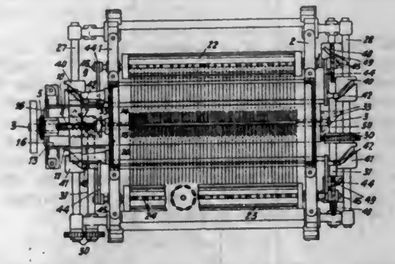
roll, means to supply the mass to be treated into said drum, means to discharge the ready treated mass therefrom and means to rotate said roll and said drum.

1,666,588. ELECTRIC MOTOR. MATHEW ANDIS, Racine, Wis. Filed June 26, 1926. Serial No. 118,676. 10 Claims. (Cl. 172—36.)



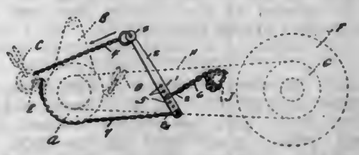
10. The electric motor herein shown and described, comprising the combination of a field frame of magnetizable material having inwardly projecting pole pieces wound in series, an armature revoluble in the plane of the field frame on a shaft perpendicular to such plane, a set of non-magnetizable plates secured to the opposing faces of the field frame and provided with antifriction bearings for the motor shaft, and means for starting and controlling the motor.

1,666,589. ELEVATOR SIGNAL SYSTEM. CYRUS W. BASSETT, Montclair, N. J., assignor to Elevator Supplies Company, Inc., Hoboken, N. J., a Corporation of New Jersey. Filed Apr. 17, 1926. Serial No. 102,784. 3 Claims. (Cl. 177—336.)



1. In a signal system for an elevator serving a plurality of floors, a stop signal on the elevator, a plurality of circuits to said stop signal, one for each floor, means for partially closing any number of said circuits comprising a plurality of switches in the respective circuits and means for operating said switches from within the elevator, means for holding the switches in closed position pending complete closure of the respective circuits, means for thereafter completing the closure of said circuits in succession as the elevator progresses in the direction of said floors, said means comprising a circuit closer having a group of relatively stationary members and a co-operating member traveling in synchronism with the elevator, and means for reopening said first named switches as the said circuit closer advances toward its limit of travel, said means comprising electromagnetic means and a circuit thereto closable by said traveling circuit closing member.

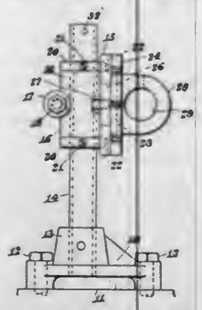
1,666,590. STEAM TURBINE LOCOMOTIVE. GIUSEPPE BELLUZZO, Milan, Italy, assignor to Società Italiana Ernesto Breda, Milan, Italy, a Corporation of Italy. Filed Feb. 28, 1923, Serial No. 621,933, and in Italy Mar. 8, 1922. 1 Claim. (Cl. 105—38.)



A steam-turbine locomotive of the Mallet type, including driving and carrying axles divided into two groups, a jack shaft for driving each group, one of the jack shafts being operated by low pressure turbines and the other jack shaft by the high pressure and low speed turbines.

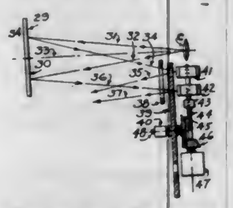
1,666,591. MACHINE FOR THE PRODUCTION OF TEXTILE FABRICS. CHARLES BILHARTZ, Strasburg, France. Filed May 8, 1926, Serial No. 107,659, and in Switzerland May 21, 1925. 2 Claims. (Cl. 96—20.)

1. Machine for the production of textile fabrics, comprising in combination, a fabric beam, an automatic take-up motion, two bars relatively adjustable, yarn carriers, guides on said bars for said carriers, means to adjust the two bars relatively, said means comprising for each bar a disc, advanced in steps, having adjustable driving members, which can move the bar to a predetermined extent, and active to resist such movement, means for moving the yarn carriers from one bar to the other for the purpose of looping the threads leading from the yarn carriers to the fabric beam selectively together and if desired with warp and warp threads.



1,666,592. AXLE-GENERATOR BELT REMOVER. MICHAEL J. BRENNAN, St. Paul, Minn. Filed Mar. 18, 1926. Serial No. 95,650. 1 Claim. (Cl. 254—75.)

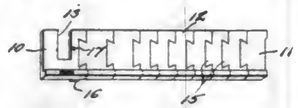
An axle generator belt remover comprising a swingable lever, a chain one end of which is connected to said lever at any one of several points intermediate the



length of the lever and spaced from its ends, said chain being connected at its other end to a fixed base to provide a fulcrum for the lever, two other chains each having one of their ends connected to the respective ends of the lever, one of said chains adapted to extend under and about an axle generator to move the same on swinging the lever, and the other chain adapted to extend over and about the axle generator to cooperate in supporting the load exerted by said generator after it has been moved, and the remaining ends of said last named chains adapted to be attached at points adjacent each other to an element of the generator assembly on the side of the generator removed from the fixed base.

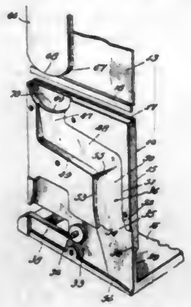
1,666,593. ADJUSTABLE SELF-ALIGNING BEARING. FRANK BURGESS, Wollaston, Mass. Filed Dec. 9, 1926. Serial No. 153,566. 1 Claim. (Cl. 308—59.)

The combination of a standard having an unbroken cylindrical surface; a support adjustable lengthwise thereof and adapted to freely move about the axis thereof, said support having a cylindrical disk provided with a plurality of concentric slots; a bearing member provided with a cylindrical flange in contact with said disk, said flange having a plurality of sets of threaded holes therein; and headed members extending through said slots into either set of holes in said bearing member and freely movable lengthwise of said slots.



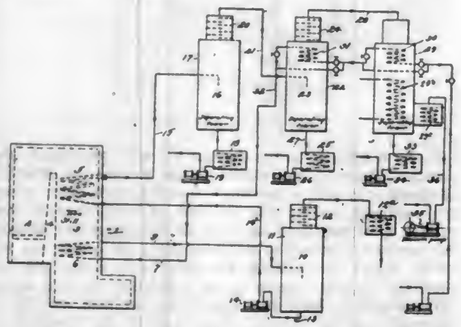
1,666,594. APPARATUS FOR THE ELECTRICAL TRANSMISSION OF VISUAL IMAGES. PAUL L. CLARK, Brooklyn, N. Y. Filed Mar. 26, 1923. Serial No. 627,815. 8 Claims. (Cl. 178—6.)

2. In apparatus of the class described, means rotatable on a fixed axis, said means including a plurality of substantially juxtaposed light-deflecting elements disposed to embrace an arc of more than 360 degrees relative to the aforesaid axis.



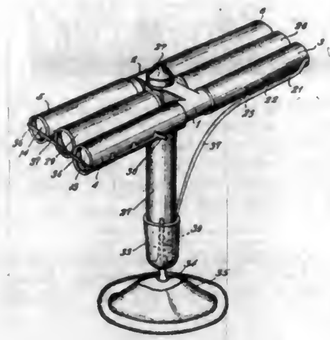
1,666,595. SECTIONAL MOLD LINER FOR TYPE-SETTING MACHINES. FRANK C. ESSEX and JOE E. MAXSON, Picher, Okla., assignors of one-third to D. S. McNeil, Picher, Okla. Filed Feb. 16, 1926. Serial No. 88,618. 1 Claim. (Cl. 199—57.)

A liner for a type setting machine mold, comprising base and end sections and a plurality of intermediate sections of different lengths, disposed between and detachably connected with the base and end sections and with one another, the connecting means consisting of dovetailed projections carried by the end section and the



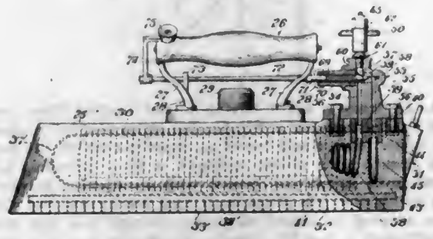
intermediate sections, and dovetailed recesses extending part way through the base section and the intermediate sections.

1,666,596. COIN-CONTROLLED VENDING MACHINE. BENJAMIN L. FRY, St. Louis, Mo., assignor to National Sales Machine Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 3, 1926, Serial No. 92,062. Renewed Nov. 2, 1927. 5 Claims. (Cl. 194—102.)



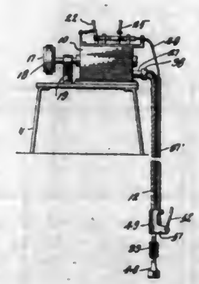
1. In a vending machine, a member having a coin channel formed in a side thereof and comprising disalined upper and lower portions and an intermediate inclined connecting portion having its side wall tilted laterally, and a plate closing the open side of the coin channel and having the part opposite the inclined portion thereof deflected to present a wall substantially parallel with the laterally tilted wall of the channel, and having a portion of the deflected part cut away to provide an opening for the automatic discharge of an article of a diameter less than the diameter of the coin designed to traverse the coinway.

1,666,597. PROCESS FOR DISTILLING OILS. AUDLEY E. HARNSBERGER, Columbus, Ohio, assignor to The Pure Oil Company, Chicago, Ill., a Corporation of Ohio. Filed Nov. 12, 1926. Serial No. 148,060. 4 Claims. (Cl. 196—77.)



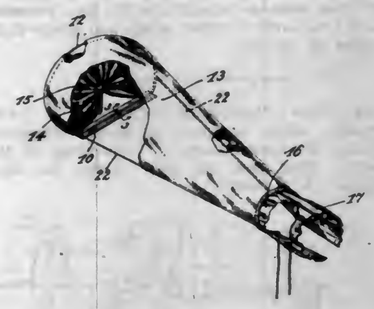
1. The method of vacuum distillation of mineral oil, which consists in drawing a quantity of oil without reduction in its total weight through a heated pipe still of progressively increasing cross-sectional pipe area from the inlet to the outlet ends thereof, said increasing pipe area permitting such reduction in back pressure due to pipe friction of the oil and vapors drawn through the still to allow a vacuum carried on the outlet end of the still to penetrate back to the inlet end thereof.

1,666,598. ROCKET. THOMAS G. HITT, Seattle, Wash. Filed May 14, 1927. Serial No. 191,358. 2 Claims. (Cl. 102—23.)



1. A rocket having a plurality of chambers, a container attached to the plurality of chambers, explosive means within the container for destroying the chambers at a predetermined point in the rise of the rocket, a suitable gas forming material within the chambers, and openings therein through which the gases may escape, thereby causing the chambers to rotate and the rocket to rise, the chambers and container being so arranged in relationship to each other than they will be balanced in the rise, a quick match suitably connected to the chambers and the container for igniting the material within the container and chambers, means for holding the container in rotatable position just previous to the rise of the rocket consisting of a rotatable cradle element, the container being located within the cradle with sufficient frictional resistance to allow for the revolving of the chambers just previous to the rise of the rocket.

1,666,599. PRESSING IMPLEMENT. LOUIS HOFFMAN, Duluth, Minn., assignor, by mesne assignments, to Steam Pressing Iron Company, a Corporation of Delaware. Filed Nov. 13, 1920. Serial No. 423,866. 8 Claims. (Cl. 68—26.)

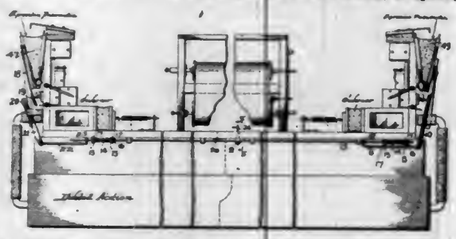


1. A pressing implement comprising a metal body formed with a chamber adapted to receive a heating element, and a pipe coil surrounding said chamber and constituting a fluid circulating conduit.

1,666,600. POWER-OPERATED WRENCH. JOHN JORDEN, Oakley, Kans. Filed Mar. 13, 1926. Serial No. 94,613. 4 Claims. (Cl. 81—57.)

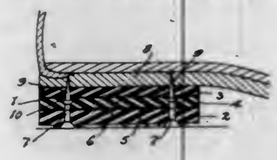
1. In a power wrench of the character described, a power transmission mechanism, a clutch structure associated with said mechanism for starting and stopping the same, a flexible power cable operated by said mechanism, a pivotally mounted lever controlling said clutch structure, a reciprocable bar mounted adjacent said clutch lever having one end pivotally connected thereto, a flexible control cable connected to the other end of said bar and extending along said flexible power cable to a point adjacent the free end of the same, and means at the free end of said flexible power cable for pulling the control cable to throw the clutch lever into clutch engaging position.

1,666,601. PROTECTIVE COVERING DEVICE. LENA KANOWITZ, New York, N. Y. Filed June 2, 1926. Serial No. 118,121. 1 Claim. (Cl. 135—5.)



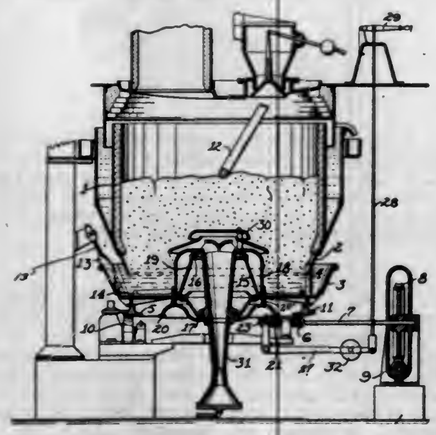
In a protective covering device, in combination, a resilient head piece slidable within a recessed base, a recessed base, a netting attached to the head piece and extended rearwardly over the head piece, a rod carried by each lower side of the netting, and a drawing string carried by the forward portion of the netting.

1,666,602. EXPRESSION-CONTROLLING MECHANISM FOR PNEUMATICALLY-OPERATED MUSICAL INSTRUMENTS. HUBERT J. LA JOIE, East Orange, N. J., and UBERT URQUHART and FRANK POKORNY, New York, N. Y., assignors to Auto Pneumatic Action Company, New York, N. Y., a Corporation of New York. Filed Sept. 22, 1922. Serial No. 589,871. 5 Claims. (Cl. 84—42.)



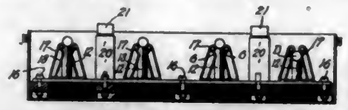
1. In a musical instrument, a divided action, a mechanism having an expression pneumatic for controlling the tension in one part of the action, a spring, the ten-

sion of which can be applied to said pneumatic, another mechanism having an expression pneumatic for controlling the tension in the other part of the action, a spring,



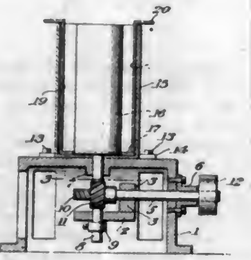
the tension of which can be applied to this pneumatic, and means for simultaneously adjusting the action of the springs so that the tensions thereof will be applied with the same differing degrees to the pneumatics.

1,666,603. HEEL FOR BOOTS OR SHOES. PERCY H. LETCHFORD, Winnipeg, Manitoba, Canada. Filed Nov. 18, 1926. Serial No. 149,203. 1 Claim. (Cl. 36—35.)



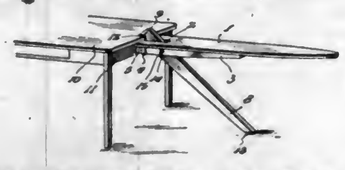
A unitary rubber heel adapted to be attached as a unit to a shoe comprising inner and outer layers of comparatively hard rubber and an interposed layer of comparatively soft, cushioning rubber cemented thereto, there being suitably disposed nail holes passing through the outer and intermediate rubber layers and anchoring nail receiving washers imbedded in the heel between the inner and intermediate rubber layers and situated at the upper ends of the holes.

1,666,604. GAS PRODUCER. CHARLES W. LUMMIS, Worcester, Mass., assignor to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 19, 1921. Serial No. 523,383. 6 Claims. (Cl. 48—85.1.)



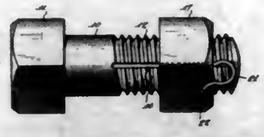
5. In a gas producer, a shell and a water-seal pan connected together and for rotation in unison, means for supporting said shell from said pan, an independently revoluble ash plow supported on the bottom of said pan, a rotatable member to which said plow is secured, said member making a seal with water in said pan, and means for imparting a rotation to said member independently of and at a speed different from the rotation imparted to pan and shell.

1,666,605. MONEY TILL. JOSEPH R. MCLELLAN, Wichita, Kans. Filed Nov. 16, 1925. Serial No. 69,412. 3 Claims. (Cl. 177—316.)



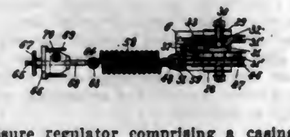
3. In a hold-up alarm, the combination of a money drawer, an alarm positioned at a distance from said drawer, connecting means between said drawer and said alarm including manually operable means in said drawer operable coincidentally with removal of money from the drawer for operating said alarm.

1,666,606. CONCRETE-TILE MANUFACTURING MACHINE. DAVID NEUVERT, Herington, Kans. Filed Aug. 24, 1927. Serial No. 215,165. 4 Claims. (Cl. 25—36.)



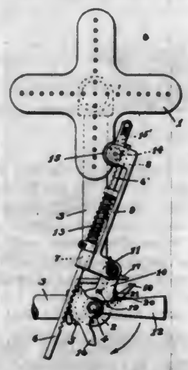
1. A machine of the character described comprising a base, a concrete form secured to and rising from said base, a compacting former mounted for rotation in said form, means for rotating said compacting former, and a stripper detachably arranged in said form about said compacting former.

1,666,607. IRONING BOARD. WARDNEIGH T. ROGERS, Bird City, Kans. Filed Mar. 16, 1927. Serial No. 175,784. 4 Claims. (Cl. 68—10.)



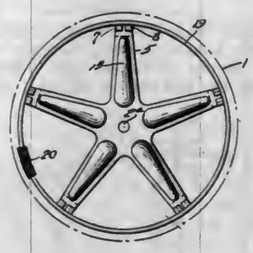
1. An ironing board having a slot leading from one end intermediate its width, bearing strips secured against the under face of said board at opposite sides of the slot and formed with alined openings, a prop extending between said strips and formed with an opening between the openings of the strips, said prop having one end portion adapted to extend upwardly through said slot and constituting a jaw for engaging the upper face of a support with the adjacent end of said board extending beneath the support, and a tapered pin extending through the openings of the strips and prop to pivotally mount said prop, said pin being movable longitudinally through the openings to effect vertical adjustment of the board by engagement with the walls of the opening.

1,666,608. COMBINED BOLT AND NUT LOCK. FRANK L. SARAZIN, Wabasha, Minn. Filed Mar. 12, 1926. Serial No. 94,263. 2 Claims. (Cl. 151—8.)



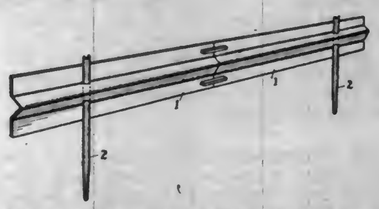
1. The combination of a bolt having a longitudinal groove in its side, a nut having a series of longitudinal grooves in its bore, and a curved transverse groove in its front face, said curved groove being curved in the direction of its length and substantially parallel with the bore groove, and extending through a side face of the nut, the longitudinal grooves of the bolt and nut adapted to be brought into registry, and a locking member having a body portion adapted to seat within said registered grooves, the outer free end of the locking member bent to form a resilient loop, the free end of which is adapted to be inserted into the transverse groove in the front face of the nut and be held therein by friction, whereby to hold the locking member in active position.

1,666,609. PRESSURE REGULATOR. HERMANN SÖFFGE, Bochum, Germany. Filed Feb. 11, 1927, Serial No. 167,499, and in Germany Feb. 16, 1926. 6 Claims. (Cl. 50—16.)



6. A pressure regulator comprising a casing, a valve for admitting a medium at primary pressure into said casing, a membrane adapted to move said valve in one direction, a spring adapted to move said valve in the other direction until equilibrium is established, an oscillating lever, means connected with said spring and adjustably mounted on said lever for varying the leverage of the spring, a cam-shaped body connected by a pliant element with said lever for transmitting the resistance of the spring invariably to said valve, and means for shifting said spring for obtaining any desired ratio between the primary pressure and the obtained lever pressure of the medium.

1,666,610. LIGHTING APPARATUS FOR GAS BURNERS. FRANK D. VARTANIAN, Portland, Me. Filed Mar. 12, 1927. Serial No. 174,982. 4 Claims. (Cl. 67—20.1.)



1. A lighting apparatus for gas burners, comprising a gas valve, an oscillatory frame, spark producing elements supported on said frame, a reciprocable rod in said frame adapted to engage said spark producing elements, means to reciprocate said rod simultaneously with the actuation of said valve, means to actuate said valve, means to disengage said rod from its means of reciprocation during the opening movement of said valve, and means to locate and to hold said spark producing elements in non-operating position, whereby said valve may be actuated alone and independently of said spark producing elements.

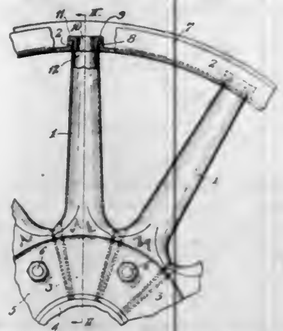
1,666,611. WHEEL FOR TOYS. CLIFFORD M. WATROUS, East Hampton, Conn., assignor to Gong Bell Manufacturing Company, East Hampton, Conn., a Corporation of Connecticut. Filed May 8, 1924. Serial No. 711,824. 8 Claims. (Cl. 301—64.)

3. A stamped out wheel for toys having its spokes and tire separate from each other and each formed from a disk of material, the spokes and tire having respectively, elements for interengagement one with the other for locking the tire and spokes together to form the finished wheel.

1,666,612. ROAD STRIP. LEONARD G. WOODS, Pittsburgh, Pa. Filed July 19, 1927. Serial No. 206,882. 2 Claims. (Cl. 94—18.)

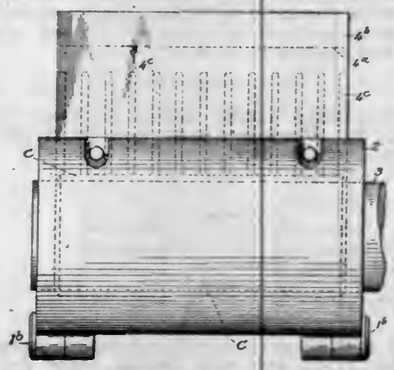
1. A structural union of two bars brought to juxtaposition end to end, such union including aligned slots in the enes of the bars and a slotted key extending within the slots in the bars with the substance of the bars extending within the slots in the key.

1,666,613. ROAD STRIP. LEONARD G. WOODS, Pittsburgh, Pa. Filed Sept. 7, 1927. Serial No. 217,975. 2 Claims. (Cl. 94—18.)



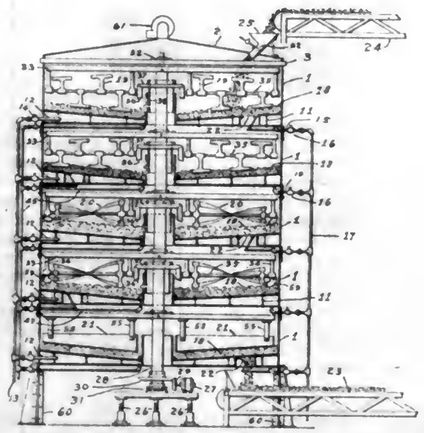
1. A structural union of two bars brought to juxtaposition end to end, such union including aligned slots in the ends of the bars and a channeled key extending within the slots in the bars and having cooperating wings confining between them portions of the bodies of the bars.

1,666,614. JUNCTION FOR METAL BARS. LEONARD G. WOODS, Pittsburgh, Pa. Filed Sept. 20, 1927. Serial No. 220,727. 3 Claims. (Cl. 189—36.)



1. A structural union of two bars brought to juxtaposition end to end, such union including aligned offsets in the ends of the bars with aligned slots in said offsets, and a coupling member extending within said slots and having a bent edge portion seated in said offsets.

1,666,615. HOLLOW-SPOKE END CONNECTION. HERALD P. ABNT, Lakewood, Ohio, assignor of one-fourth to Curt B. Muller, Cleveland, Ohio. Filed Sept. 26, 1921. Serial No. 503,244. 3 Claims. (Cl. 301—67.)

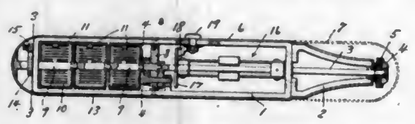


1. In a wheel, the combination of a felloe fashioned with openings and outwardly projecting major flanges at said openings, each flange being additionally fashioned with a minor flange projecting in turn at an angle relative to said major flange, hollow spokes having their outer ends fitted within said major flanges and their outer edges abutting said minor flanges, and plugs fitted in the outer ends of said spokes to wedge the latter against said major flanges.

1,666,616. STEREOTYPE-PLATE-MOLDING APPARATUS. HENRY F. BECHMAN, Battle Creek, Mich., assignor to Duplex Printing Press Company, Battle Creek, Mich., a Corporation of Michigan. Filed Apr. 6, 1925. Serial No. 21,054. 11 Claims. (Cl. 22—25.)

1. A mold provided with a pouring gate having a plurality of ducts whereby the metal is divided into a plurality of oppositely flowing jets as it enters the mold-chamber.

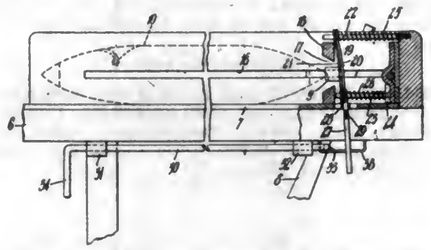
1,666,617. VEGETABLE-MATTER DRIER. LOUIS P. CALDWELL, Kansas City, Mo. Filed Dec. 17, 1926. Serial No. 155,516. 3 Claims. (Cl. 34—23.)



1. Apparatus for extracting moisture from matter consisting of a plurality of individually heated and communicating compartments superimposed upon each other, each compartment having an inclined floor with a central opening, a pipe in said opening, a bustle around said pipe, holes in said bustle communicating with a drain pipe to receive, by gravity, liquids that accumulate on said floor, substantially as described.

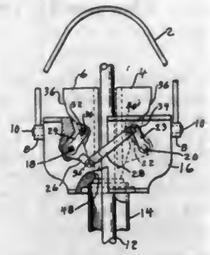
1,666,618. METHOD OF BRIQUETTING. ALBIN CARLSON, Degerhamn, Sweden. Filed Apr. 8, 1925, Serial No. 21,739, and in Sweden May 10, 1924. 4 Claims. (Cl. 75—72.)

1. A method of producing briquettes, which comprises treating finely divided iron ores and products containing iron compounds capable of being reduced, with the purpose in view to produce hydraulic properties therein, adding a small amount of separately burnt lime thereto, pressing the mixture thus obtained into briquettes, and hardening said briquettes by high pressure steam.



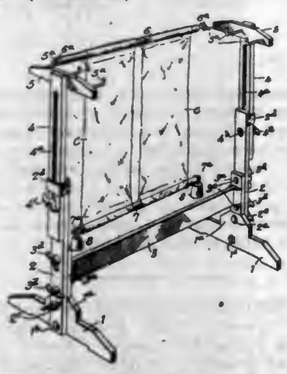
1,666,619. MANICURING IMPLEMENT. EDWARD LEONARD EBERHARDT, Edwardsville, Ill. Filed Jan. 15, 1927. Serial No. 161,344. 4 Claims. (Cl. 132—74.)

1. A finger nail manicuring device of the class described, comprising a frame, a shaft mounted for rotation upon said frame, manicuring means carried by said shaft, a spring motor mounted upon said frame, and having operating connection with said shaft, pawl and ratchet mechanism cooperating with said motor, a manually manipulated brake device for said shaft and a housing for said parts.



1,666,620. SHUTTLE-CHECKING MECHANISM FOR LOOMS. GEORGE E. GROGHEGAN, Lawrence, Mass. Filed May 15, 1926. Serial No. 109,389. 4 Claims. (Cl. 139—167.)

1. A shuttle checking mechanism for looms comprising, in combination, a lay, a shuttle box for said lay, a plurality of guide rods mounted upon said shuttle box, a bumper yieldingly mounted upon said rods, a picker

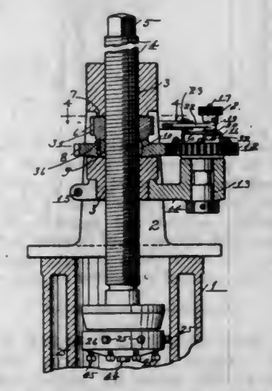


adapted to engage said bumper, and means actuated by said lay to positively return said picker to a predetermined position of rest.

1,666,621. COMBINATION SUCKER-ROD ELEVATOR AND SPIDER. DOLPHICE H. GREENWOOD, Los Angeles, Calif. Filed Mar. 1, 1926. Serial No. 91,503. 2 Claims. (Cl. 24—249.)

1. A device of the class described comprising in combination, a body provided with a recessed portion, a pair of wedge-shaped elongated clamping slips, each equipped with a ledge positioned at a substantial distance below the top of said slips, and operating means, positioned within the recessed portion of said body for alternatively causing said slips to clamp a member inserted in said body or be positioned by means of said ledges on the top of said body.

1,666,622. CURTAIN STRETCHER. FRANK W. HESS, Freeport, Ill. Filed Aug. 9, 1926. Serial No. 128,142. 2 Claims. (Cl. 45—24.)

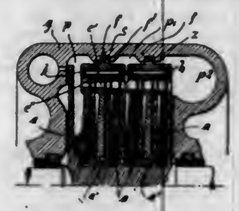


1. A curtain stretcher comprising a pair of bases, uprights pivotally attached to the lower portions of said bases; removable bolts transfixing the uprights and bases above the pivots for maintaining the uprights in vertical positions; a cross brace having T-heads on its ends connecting the uprights above the bases the said T-heads resting upon said bases; removable bolts transfixing the T-heads and uprights; vertically adjustable extension members having longitudinal slots at the upper ends of said uprights; guide straps at the upper ends of said uprights slidably engaging the extension members; adjustable bolts extending through the uprights and slots below the straps for maintaining the extension members in adjusted positions; and removable rods extending between the upper ends of the extension members for supporting the curtains thereon.

1,666,623. TYING DEVICE. EDGAR B. HOOVER, Spokane, Wash. Filed Sept. 27, 1926. Serial No. 137,836. 1 Claim. (Cl. 24—18.)

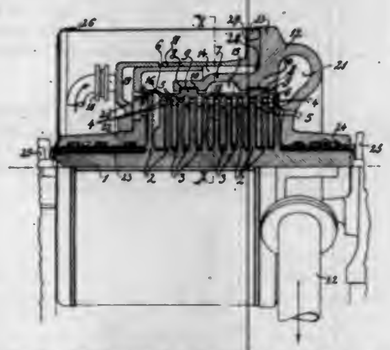
An extended, elongated plate having looped ends, a yielding member secured adjacent to one of said loops and extended toward the other of said loops, and in yielding contact with said plate, said yielding member having a single loop formed intermediate its ends, and having its free end upturned.

1,666,624. ROTATABLE TOOL AND FEEDING MECHANISM THEREFOR. JAMES H. LANE, Benton Harbor, Mich., assignor of one-half to Henry C. Campbell, Benton Harbor, Mich. Filed Oct. 14, 1925. Serial No. 62,371. 6 Claims. (Cl. 77—4.)



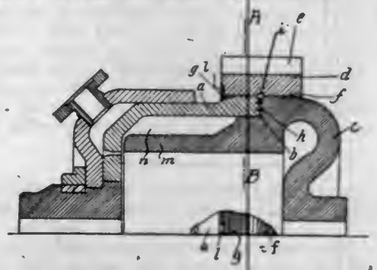
1. In mechanism of the character described: a frame; a tool-carrying threaded shaft rotatable on the frame; a feeding nut rotatable on the threaded shaft in axially non-movable relation to the frame; a member rotatable with, and axially movable relatively to, the shaft; an element rotatable by said member; a pawl mounted on said element eccentrically thereof and adapted to engage the nut and rotate the same in tool-feeding direction.

1,666,625. ELASTIC-FLUID MULTISTAGE DISK-WHEEL TURBINE. FRANZ LÖSEL, Brunn, Czechoslovakia. Original application filed Aug. 14, 1923, Serial No. 657,375, and in Austria Feb. 23, 1923. Divided and this application filed Mar. 9, 1925. Serial No. 14,022. 25 Claims. (Cl. 253—69.)



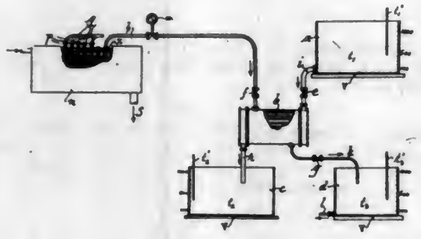
1. In an elastic-fluid turbine of the multi-stage disk-wheel type, an outer casing having an annular groove

in an inwardly projecting annular part, diaphragms including nozzles and spaced inwardly from the outer casing, at least one inner cylindrical casing or carrier connected with said diaphragms and having an annular



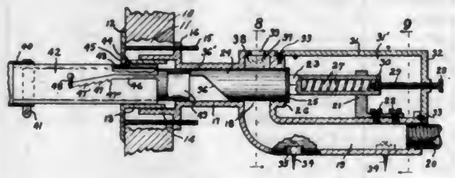
projection to fit into said groove in the outer casing and form a fluid tight connection and providing at each side of the connection clearance spaces between the inner casing and the outer casing.

1,666,626. ELASTIC-FLUID TURBINE. FRANZ LÖSEL, Brunn, Czechoslovakia. Filed Mar. 25, 1926. Serial No. 97,179. 26 Claims. (Cl. 253—69.)



1. In a high pressure elastic fluid turbine, the combination of an outer casing portion, an inner casing portion spaced from said outer casing portion so as to form a steam chamber therebetween, a separate carrier body therewithin carried and enclosed by said inner casing portion said carrier body forming with the inner casing a steam chamber and stationary diaphragms with nozzle canals carried and supported by said carrier body.

1,666,627. HIGH-PRESSURE-TURBINE CASING OR HOUSING. FRANZ LÖSEL, Brunn, Czechoslovakia. Filed Mar. 9, 1925, Serial No. 14,026, and in Austria May 6, 1924. 5 Claims. (Cl. 253—69.)

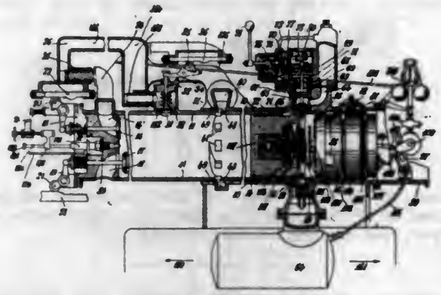


1. In a turbine, the combination of a casing at the higher pressure end, a casing at the low pressure end having an annular joint with the higher pressure casing and having an annular member projecting into the higher pressure casing and forming therewith an annular chamber, and means for coupling said casings together and including a member to cover the joint between the casings and to draw the casings together at said joint.

1,666,628. METHOD AND DEVICE FOR DETERMINING THE EXPANSION LINE OF STEAM TURBINES. FRANZ LÖSEL, Brunn, Czechoslovakia. Filed Mar. 9, 1925, Serial No. 14,028, and in Austria May 6, 1924. 12 Claims. (Cl. 73—51.)

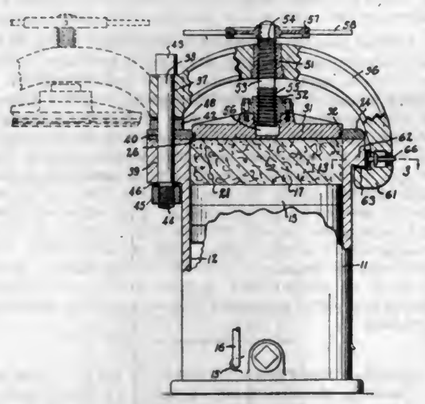
1. Method for determining the expansion line of steam turbines comprising measuring the heat-contents of the steam of individual stages of the turbines by extracting steam from said individual stages and measuring its pressure, condensing said steam with cooling water, measuring the temperature and weight (quantity) of the condensate of said steam and measuring the temperature and weight or quantity of said cooling water before and after condensing said steam.

1,666,629. VALVE. FRANK E. LUMLEY, Omaha, Nebr. Filed Aug. 31, 1925. Serial No. 53,560. 8 Claims. (Cl. 284—18.)



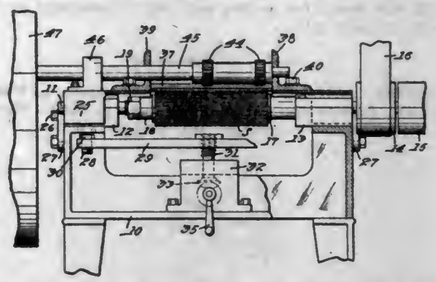
1. A vacuum installation for walls comprising a flush plate having a sleeve extending into the wall, a valve casing behind said plate and adjustably connected therewith, said valve casing being in connection with a source of suction, a valve in the casing, adjustable means to yieldably hold the valve closed, a hose attachment to the plate and sleeve, and a slidable barrel carried with the attachment and operable from outside the plate and engaging the valve to open the same.

1,666,630. MOTOR-COMPRESSOR APPARATUS. RAUL PATERAS PESCARA, Paris, France, assignor to The Pescara & Raymond Corporation, Dover, Del., a Corporation of Delaware. Original application filed June 5, 1925, Serial No. 35,249, and in France June 11, 1924. Divided and this application filed Jan. 8, 1927. Serial No. 159,853. 4 Claims. (Cl. 230—56.)



1. In an apparatus comprising a frame, a cylinder, and a free piston reciprocating in said cylinder, said

cylinder being mechanically free to reciprocate with respect to said frame, means for injecting into said cylinder a combustible oil under pressure, said means

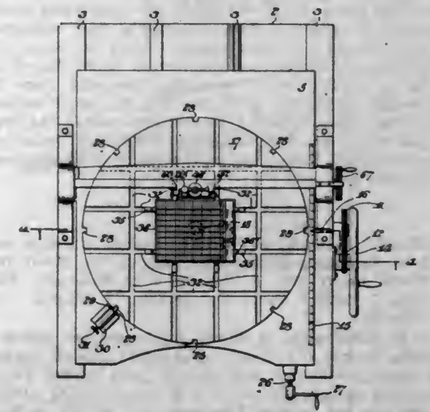


consisting in an injection needle valve mounted on the cylinder head, a stop on said needle and a fixed abutment cooperating with said stop.

1,666,631. STUFFING MACHINE. OSCAR C. SCHMIDT, Cincinnati, Ohio, assignor to The Cincinnati Butchers' Supply Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 16, 1927. Serial No. 219,942. 3 Claims. (Cl. 17—39.)

1. In a stuffing machine of the character described, the combination of a casing, a press-head operable therein, a cover for said casing, a yoke about the end of said casing across said cover, means for moving said cover on said yoke toward and from said end of said casing for closing and opening said end, means for pivoting one end of said yoke to said casing permitting axial movement of said yoke at the pivot thereof, a stop for said axial movement, a stop between the swinging end of said yoke and said casing for limiting axial movement of said yoke at said swinging end, and an automatic spring latch including a spring-pressed plunger and complemental laterally inclined faces between said swinging end of said yoke and said casing, means to permit automatic resilient movement of said spring-pressed plunger in directions radial with relation to said casing, said inclined faces converging laterally, and constructed and arranged for automatically laterally centering said cover in both directions with relation to said casing, and said converging inclined faces forming a slot parallel with said axial movement permitting such axial movement of said swinging end whilst maintaining said cover in such centered relation.

1,666,632. SAWING MACHINE. WALTER BARNARD STONE, Webster, Mass., assignor to The Electric Storage Battery Company, Philadelphia, Pa., a Corporation of New Jersey. Filed May 19, 1926. Serial No. 110,111. 2 Claims. (Cl. 144—136.)



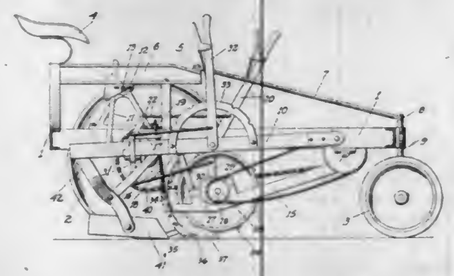
1. A sawing machine comprising a fixed frame, a gang of saws and means for rotating them and a notched stripper and a brush carried by the frame, a table pivoted at one end to the top of the frame free for upward turning movement, an adjustable stop for the free end of the table, a carrier plate having transverse slots on its under face confronting the saws and slidably mounted in longitudinal ways provided in the saw table, and rack-and-pinion feed mechanism and roller guides carried by the table and co-operating with the upper face of the carrier plate.

1,666,633. MALTED-MILK PRODUCT. LIVINGSTON A. THOMPSON, Waukesha, Wis. Filed Feb. 15, 1926. Serial No. 88,268. 2 Claims. (Cl. 99—11.)

1. A malted milk product consisting of a dried mixture of malted milk stock and a soluble binder forming nuggets, said nuggets having a multitude of small apertures therethrough, and a flavoring layer coating the outside of the nuggets and the inside of the pores thereof.

1,666,634. RULING MACHINE. CHARLES J. THOMSON, Philadelphia, Pa., assignor to Westcott & Thomson, Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 18,672. 11 Claims. (Cl. 33—32.)

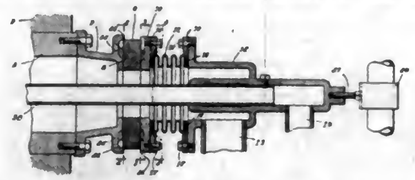
1. In apparatus of the character described, the combination of a reciprocable carriage, a table journalled



relatively to said carriage, a conical rack fixed to said table, a beveled pinion engaging said rack, a shaft to which said pinion is fixed, a shaft extending transversely to said shaft last named, means for connecting said shafts, means for securing work on said table, a tool, and means for moving said tool transversely to the work on said table.

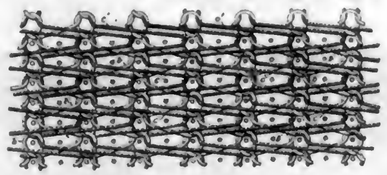
1,666,635. WALL CONSTRUCTION. ALPHONS L. WESTERICH, Hawthorne, Calif. Filed June 8, 1927. Serial No. 197,466. 4 Claims. (Cl. 72—39.)

1. A building block substantially L-shaped in cross section, one arm of the L having a cut-out section adjacent the inner angle of the L with lugs at each end of such arm, the thickness of such arm at the lugs being substantially half that of the width of the other arm, and the said block having corrugated upper and lower edges.



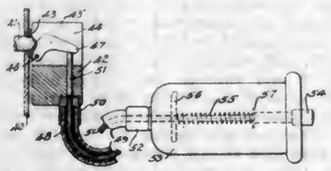
1,666,636. BEET TOPPER. CHARLES N. WOOD and WILLIAM E. WOOD, Sacramento, Calif. Filed Oct. 30, 1926. Serial No. 145,223. 3 Claims. (Cl. 55—107.)

1. A beet topper including a structure to move along the ground, a revoluble drum mounted in connection with the structure to climb onto and ride over the top of a beet, said drum comprising a pair of transversely spaced members, a transverse cutter mounted in fixed connection with the drum a certain distance below the same and extending rearwardly from the vertical center line of the drum, a vertical cutter extending upwardly from the transverse cutter and projecting into the space between the drum members, and a vertical arm behind the drum disposed in transverse alinement with said space and supporting the cutter, the vertical blade extending rearwardly to said arm.



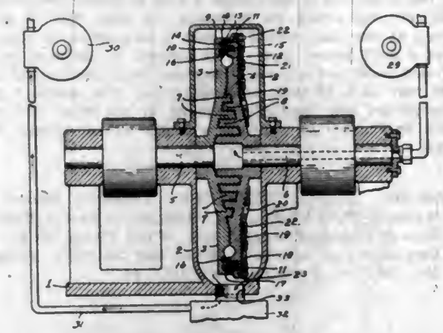
1,666,637. STEAM FITTING. ALONZO ALDRICH and EARL E. BERRY, Beloit, Wis., assignors to Beloit Iron Works, Beloit, Wis., a Corporation of Wisconsin. Filed Aug. 7, 1925. Serial No. 48,751. 3 Claims. (Cl. 285—22.)

1. In combination, a hollow rotary element having a bearing surface at one end, a non-rotary conduit adapted to deliver steam into said element, said conduit having a bearing surface opposed to said rotary bearing surface, a bearing ring interposed between said bearing surfaces, the bearing end of said conduit providing a transverse surface acted on by the steam to maintain said bearing surfaces in fluid tight contact with the bearing ring, and depressed areas in said bearing surfaces leaving each with an inner annular bearing surface of less area



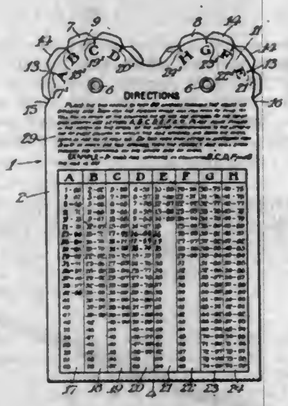
than the effective area of said transverse surface acted on by the steam to maintain fluid tight joints between said ring and bearing surfaces.

1,666,638. WARP-KNITTED FABRIC AND METHOD OF MAKING SAME. EARL J. BENNETT, Stittville, N. Y., assignor to H. R. Tobey. Filed Sept. 25, 1926. Serial No. 137,728. 6 Claims. (Cl. 66—86.)



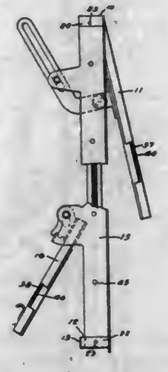
6. That process of making a warp knit fabric that is non-running, non-raveling, of uniform thickness throughout and of great lateral elasticity, which includes providing a pair of warp supplying bars, providing a number of threads equal to the number of needles, lapping one of said bars throughout the production of the fabric so as to miss the minimum number of needles by each thread of one of the sets of threads, and lapping the other of said bars throughout the fabric so as to miss a larger number of needles by each thread of that series of threads, but causing the lapping threads of both series of threads constantly to extend across and to cover what would otherwise be gaps or openings in the fabric, whereby a fabric of substantially uniform texture and thickness throughout or of a marked degree of lateral elasticity is provided.

1,666,639. HOSPITAL SIGNAL SWITCH. JOSEPH O. CADIEUX, Meriden, Conn., assignor to The Connecticut Telephone & Electric Company, Incorporated, Meriden, Conn., a Corporation of Connecticut. Filed May 6, 1925. Serial No. 28,351. 2 Claims. (Cl. 200—159.)



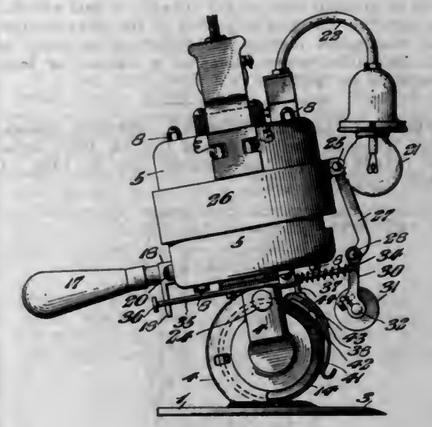
1. In a hospital signal switch, a wall plate, electric switch mechanism at the inner side of said wall plate and means for operating said switch mechanism from a distance including a member having a hollow-swivel connection with said wall plate, a second member adapted to extend through said hollow-swivel connection and movable for operating said switch, and means for pressing said second member inwardly through said hollow-swivel connection including a flexible two-part operating cable extending into said first mentioned member from the side and a push button at the free end of said cable.

1,666,640. DISINTEGRATOR. BERNARD CUNNIFF, New York, N. Y., assignor to Colloidal Equipment Corporation, New York, N. Y., a Corporation of New Jersey. Filed Apr. 28, 1926. Serial No. 105,058. 9 Claims. (Cl. 83—8.)



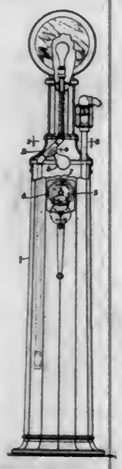
1. A disintegrator comprising opposed material confining and treating members, means for effecting relative rotation between them to produce centrifugal movement of the material treated, said members being positioned and adjusted to provide a channel between their respective inner opposed surfaces and one of the said members having an annular flange adapted to form with said other member a material discharge channel and port at one side of said other member and in free communication with said first mentioned channel.

1,666,641. TOY COMPUTING DEVICE AND NUMBER-REVEALING GAME. ERNEST C. DES ENFANTS, Chicago, Ill., assignor to J. B. Carroll Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 9, 1926. Serial No. 128,166. 6 Claims. (Cl. 273—161.)



1. In a device of the class described, the combination of a tablet provided with a series of correlated groups of numbers, each of said groups being provided with a group-distinguishing mark, a rotative computing member mounted on said tablet and provided with a series of numbers on and movable with said rotative member, peripheral notches on the rotative member adjacent to said movable numbers and equally spaced apart, and graduation marks on the tablet and corresponding with said group-distinguishing marks, said graduation marks being equally spaced apart and each being normally adjacent to a predetermined notch and corresponding number on said rotative member.

1,666,642. WINDSHIELD. FREDERICK A. DILLINGHAM, Troy, Ohio, assignor to The Troy Sunshade Company, Troy, Ohio, a Corporation of Ohio. Filed Apr. 10, 1924. Serial No. 705,512. 8 Claims. (Cl. 296—84.)

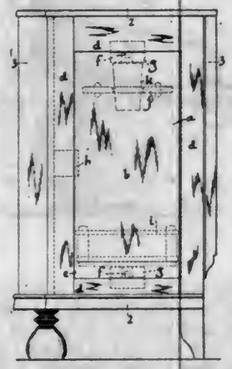


1. A windshield of the character described comprising a top frame member, a bottom frame member, and side-posts connecting said top and bottom frame members, each side-post comprising a fabricated bar consisting of two channel members, and a back support secured thereto to hold the channel members in spaced relation and providing a groove between said channel members, and means positioned within said groove for connecting the side-post to said top and bottom frame members.

1,666,643. CUTTING MACHINE. MAX EDELMAN, Sellersville, Pa., assignor to Esther M. Shapiro, Sellersville, Pa. Filed Sept. 25, 1926. Serial No. 137,749. 7 Claims. (Cl. 164—76.)

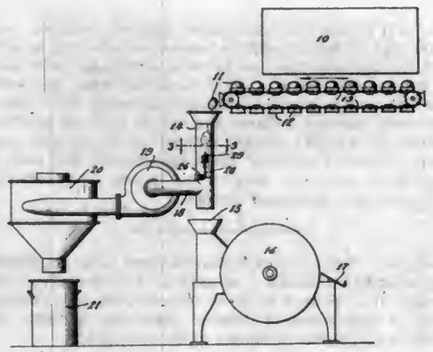
7. In a cutting machine of the character stated, an annulus rotatably mounted thereon, a pendant link pivotally secured to said annulus, a pendant member pivotally suspended from said link, a plurality of sharpening wheels carried by said pendant member, a rotary cutter, and means for manually actuating said sharpening wheels towards and away from said cutter.

1,666,644. GASOLINE PUMP. EARL E. EICKMEYER, Dayton, Ohio, assignor to The Dayton Pump & Mfg. Company, Dayton, Ohio, a Corporation of Ohio. Filed Apr. 13, 1927. Serial No. 183,424. 7 Claims. (Cl. 240—2.)



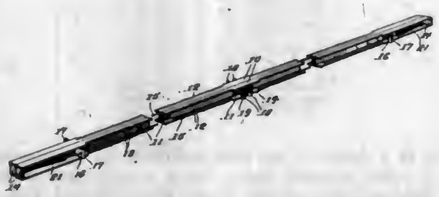
2. In a gasoline dispensing pump, the combination with a housing, of a dome integral with the housing, spaced outwardly facing dials beneath the dome, a source of illumination within the dome arranged above, behind and between the dials, the said source of illumination being arranged to illuminate the face of each dial between it and the housing.

1,666,645. RECOVERY OF CAMPHOR. ALEXANDER FRIEDEN, Mount Vernon, N. Y., assignor of one-third to Raymond F. Bacon, and one-third to Alcan Hirsch, New York, N. Y. Filed Mar. 7, 1927. Serial No. 173,603. 6 Claims. (Cl. 260—133.)



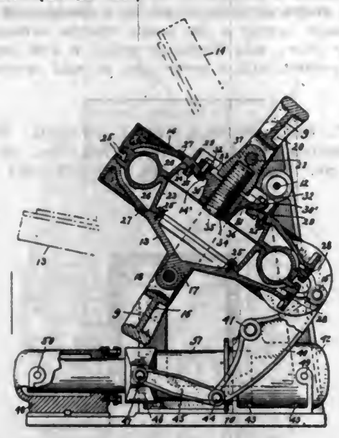
1. The method of recovering camphor from celluloid and the like which consists in placing the celluloid or the like in an alkaline solution, the strength of said solution being such that the greater portion of the nitro-cellulose is not decomposed thereby, and subjecting the batch to steam distillation whereby camphor is distilled off from the celluloid or the like.

1,666,646. FURNITURE FITMENT. EBENEZER GOMME, High Wycombe, England. Filed Oct. 12, 1926, Serial No. 141,049, and in Great Britain July 21, 1926. 1 Claim. (Cl. 312—173.)



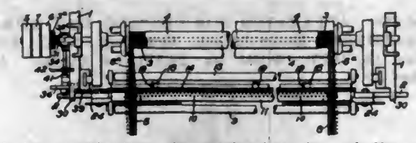
A cabinet having a concealed compartment defined on one side by a vertical panel enclosing rectangular frame, a panel supported in and substantially fitting said frame, and mounted in vertical position by vertically disposed co-axial pivots at the top and bottom of said panel having their common axes located substantially centrally between the side portions of said frame and inside of the plane of the inner face of said panel, a stop projecting from one side of said frame for engaging the rear face of the panel at one side thereof to hold it in position to represent a solid panel, glass racks secured to the rear face of said panel and a guarded decanter rack also secured to the rear face of said panel, said stop also adapted to engage the rear face of the panel at the other side to hold said panel in position with the racks exposed to view.

1,666,647. DOUGH TREATING. LAURENCE SEYMOUR HARBER, White Plains, N. Y., assignor to Joseph Baker Sons & Perkins Company, Inc., White Plains, N. Y., a Corporation of New York. Filed May 26, 1922. Serial No. 563,784. 7 Claims. (Cl. 107—44.)



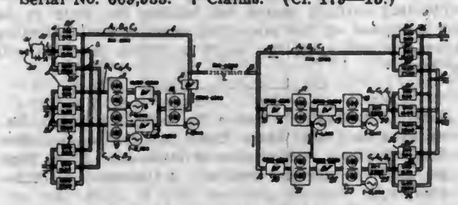
3. In apparatus for removing excess flour from dough balls, a passage through which said dough balls pass by gravity, a perforated member mounted to normally obstruct said passage and adapted to yield under the impact of said dough balls so as to open said passage for said dough balls, and means for exerting suction in said passage.

1,666,648. TOBACCO STICK. ELMORE HAY HARRINGTON, New Smyrna, Fla. Filed July 31, 1925. Serial No. 47,313. 5 Claims. (Cl. 131—21.)



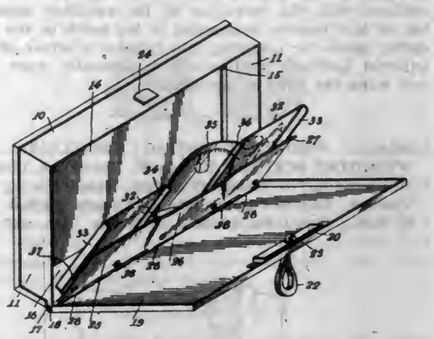
5. A tobacco stick comprising a pair of channel-shaped members secured together to provide spaced gripping edges upon opposite sides of the stick, a retaining wire extending longitudinally upon each side of the stick between the gripping edges, springs connecting the ends of the wires and springs connecting the wires intermediate the ends of said wires to yieldingly hold the latter in retaining position.

1,666,649. VULCANIZER. ARCHER H. HARRIS, Akron, Ohio. Filed Apr. 25, 1927. Serial No. 186,245. 17 Claims. (Cl. 18—17.)



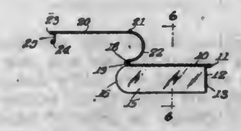
1. In a vulcanizer of the class described, a pair of mold halves hinged together, pivotal supports for said halves, a lever pivoted to the vulcanizer at the hinge, means for operating the mold halves comprising a power cylinder and piston, and link connections between said piston and lever.

1,666,650. MECHANISM FOR AND METHOD OF HANDLING YARNS OR THE LIKE. EDGAR F. HATHAWAY, Wellesley, and WALTER BIXBY, Dorchester, Mass., assignors to Shawmut Engineering Company, Dorchester, Mass., a Corporation of Massachusetts. Filed May 31, 1924. Serial No. 716,881. 20 Claims. (Cl. 28—55.5.)



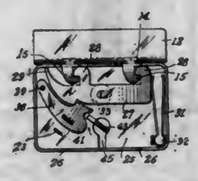
1. In combination, in mechanism for winding tuft yarn spools in carpet manufacture, a spool support, a reed through which the yarns are adapted to pass to said spool, a portable yarn separating member, means to support the latter in upright position adjacent the reed, and means to move said separating member and said feed in unison and relatively to the yarns to apply said separating member thereto, said reed, during said movement, acting to guide the yarns accurately for reception in said separating member.

1,666,651. PLURAL CHANNEL SECRECY SYSTEM. RAYMOND A. HEISING, Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 30, 1922. Serial No. 609,933. 7 Claims. (Cl. 179—15.)



7. The method of confusing signals which comprises placing a relatively wide sub-band of frequencies of one signaling band adjacent a relatively narrow sub-band of frequencies of another signaling band.

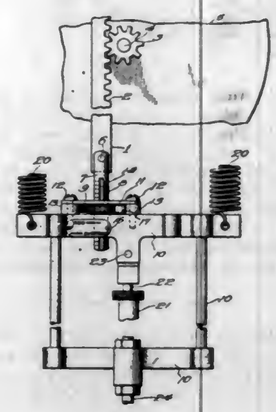
1,666,652. TOILET-ACCESSORY CABINET. WILLIAM C. HEERING, Newark, N. J., assignor to J. E. Mergott Co., Newark, N. J., a Corporation of Delaware. Filed Apr. 27, 1925. Serial No. 26,174. 4 Claims. (Cl. 220—32.)



2. A toilet article cabinet comprising a hollow rectangular body, a hinged cover at the front of said body adapted to extend in register with the lower wall thereof, a plurality of unlike integrally connected receptacles hingedly engaged in said body to the cover to be moved into a position of accessibility by said cover, the walls of said receptacles being diversified in height and contour and adapted to frictionally engage and retain articles entered therebetween, and a pendant knob and means actuated thereby for locking said cover when in a closed position.

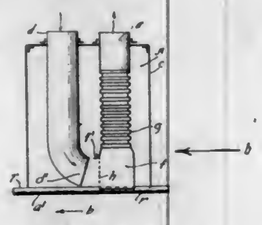
1,666,653. METAL BOX AND COVER. WILLIAM C. HEERING, Newark, N. J., assignor to J. E. Mergott Co., Newark, N. J., a Corporation of Delaware. Filed May 29, 1926. Serial No. 112,526. 2 Claims. (Cl. 220—32.)

1. A two part metal box comprising a plate member having closely folded flanged end and front edges and walls extending perpendicularly therefrom to enclose three sides of a rectangle, a second plate member having a wall to form the fourth side of the rectangle, an exterior hinge connecting the outer edge of the last named wall with the first named plate member, and a snap fastener on the second named plate to engage a mating element on one of the perpendicular walls of the first named plate member.



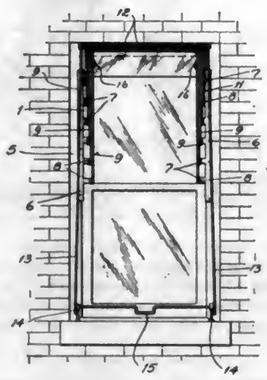
1,666,654. BAG AND LIKE LOCK. WILLIAM C. HEERING, Newark, N. J., assignor to J. E. Mergott Co., Newark, N. J., a Corporation of Delaware. Filed July 28, 1926. Serial No. 125,377. 2 Claims. (Cl. 70—2.)

1. A bag lock comprising a casing, a keeper having elements enterable through said casing, a spring actuated slide bolt having members engageable with said keeper



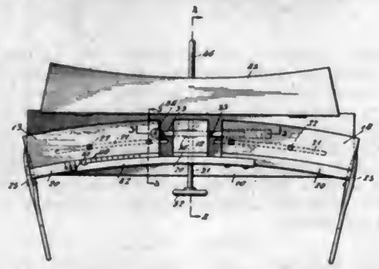
elements, said members acting as guides for the bolt, a curved auxiliary guide at the front of said bolt, an angular notch in the rear edge of said bolt, a key actuated tumbler engageable in said notch, said tumbler being pivoted to the outer wall of said casing and curved to conform with the curvature of the auxiliary guide, a lug on said tumbler engageable in the notch in the bolt, spring means for retaining said tumbler in either of two adjusted positions, and means to manually move said bolt when the pawl is disengaged.

1,666,655. WEIGHT-ADJUSTING MECHANISM FOR WEIGHING SCALES. GUSTAV F. HOCHRIEM, Chicago, Ill., assignor to Rhodes-Hochriem Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Jan. 5, 1926. Serial No. 79,325. 3 Claims. (Cl. 265—8.)



1. In combination, a rack bar and pinion gear, a weight recording element movable with said pinion gear, a pin connected with said rack bar, a manually operated means registering with said pin for raising or lowering said rack bar to change its point of registration with said gear, and in turn regulating the weight recorded by said recording element, a spring tensioned element contacting said manually operated means for maintaining the latter in fixed position subsequent to manipulation.

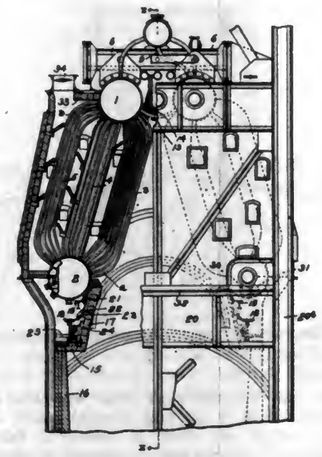
1,666,656. RING OVEN WITH REVOLVING HEARTH. LUDWIG HONIGMANN, Bad Tolz, and FRIEDRICH BARTLING, Munich, Germany. Filed June 2, 1926, Serial No. 113,286, and in Germany June 3, 1925. 7 Claims. (Cl. 263—35.)



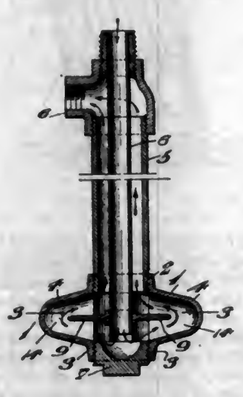
1. In a ring oven for the treatment by heat of pulverulent, granular or like material in which the material at the charging point is charged in the form of a thin uniform layer and at the discharge point sucked away with the oven gases, a revolving hearth, a conduit through which a portion of the oven gases are diverted past the discharge point to act as a discharging means, said conduit having a jet nozzle therein arranged immediately above said discharge point, a dust separator in said conduit, and a pump also in said conduit.

1,666,657. COLLAPSIBLE METAL AWNING. WILLIAM R. HOPKINS, St. Louis, Mo. Filed Nov. 22, 1926. Serial No. 149,899. 5 Claims. (Cl. 156—43.)

1. In a collapsible metal awning comprising U shaped vertically telescoping members, a bracket having outwardly extending vertically spaced ears, said ears being offset vertically from each other.



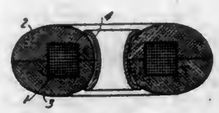
1,666,658. APPARATUS FOR CUTTING HAT SWEAT LEATHERS. ELIAS ISRAEL, New York, N. Y. Filed May 13, 1925. Serial No. 29,871. 8 Claims. (Cl. 164—79.)



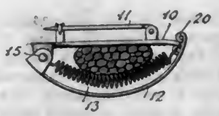
1. A strip cutting machine, comprising in combination means providing a supporting surface which is adjustable in length, a cutting device at each end of the supporting surface, means for holding the strip to be cut positioned on the supporting surface, and indicating means for indicating the length to which the strip will be cut.

1,666,659. BOILER. GEORGE T. LADD, Pittsburgh, Pa., assignor to Ladd Water Tube Boiler Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 29, 1921. Serial No. 504,086. 3 Claims. (Cl. 122—325.)

3. A boiler installation comprising in combination a generating unit including upper and lower drums and connecting tubes, a framework, means for suspending said generating unit from said framework, a refractory enclosure for said unit, a refractory lined combustion chamber below said unit, a bridge wall between said combustion chamber and said unit cooperating with the refractory lining of the combustion chamber to provide a throat through which the products of combustion pass to the generating unit, and means for supporting said bridge wall from said framework.



1,666,660. AUXILIARY WATER HEATER. JOHN S. MAKIN, Philadelphia, Pa. Filed Mar. 14, 1927. Serial No. 175,342. 2 Claims. (Cl. 257—254.)

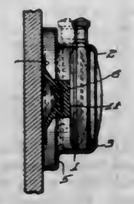


1. A device of the character stated, comprising a water heating chamber having a plurality of radially extending hollow branches, a baffle plate arranged within said chamber, said plate having extensions equal in number to and coincident with said hollow branches, said extensions extending into and terminating short of the outer ends of said branches and closely engaging the side walls of said branches, an inlet pipe for conveying cooled water to the bottom of said chamber and an outlet pipe surrounding said first mentioned pipe for the exit of heated water.

1,666,661. INDUCTANCE COIL. EDMUND R. MORTON, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 4, 1924. Serial No. 747,711. 3 Claims. (Cl. 175—356.)

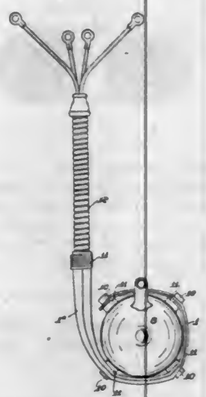
1. In combination, a core made up of a plurality of parts which cooperate to form a chamber, a coil in said chamber, and a tubular member axially arranged with respect to said core and having its ends formed to approximate the contour of said core parts, and thereby clamp the core parts together.

1,666,662. HOLDING DEVICE. HARRY NADEL, New York, N. Y. Filed Sept. 19, 1927. Serial No. 220,602. 5 Claims. (Cl. 24—6.)



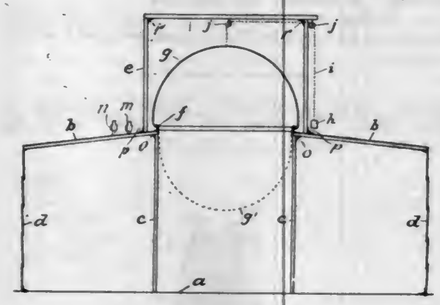
1. A holding device, comprising a pin bar, an outwardly bowed bar pivotally connected at one end to the pin bar, means for releasably connecting the other end of the bowed bar to the pin bar, and a tension spring stretched between the ends of the bowed bar.

1,666,663. FUEL MATERIAL. THEODORE NAGEL, Brooklyn, N. Y. Filed Oct. 31, 1924. Serial No. 747,048. 18 Claims. (Cl. 44—16.)



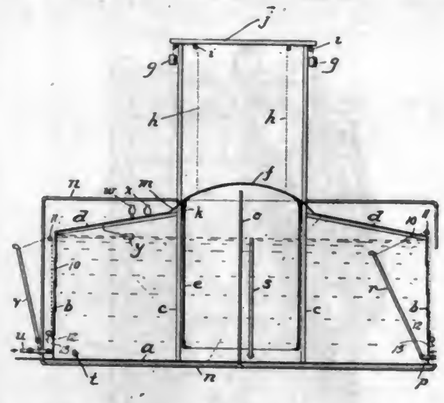
1. A binding fuel material for briquets comprising a mixture of an acid phosphatic compound and a starchy substance.

1,666,664. WATCH HOLDER. JAMES C. NEWLIN, Jr., Bryn Mawr, Pa. Filed Oct. 15, 1926. Serial No. 141,763. 3 Claims. (Cl. 248—39.)



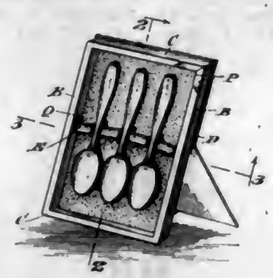
1. A watch holder comprising a casing open at its back for the insertion of a watch and formed in its front with a sight opening therefor, a spring member extending across and having an interlocking engagement with said casing to retain a watch therein, said member being adapted to exert forward pressure on the watch to yieldingly support the same adjacent said sight opening, and a suction cup for supporting said casing, carried by said spring member.

1,666,665. CONNECTION FOR TIMING DEVICES FOR AUTOMOBILES. JESSE C. OSBORN, Chicago, Ill., assignor to Grigsby-Grunow-Hinds Co., Chicago, Ill., a Corporation of Illinois. Filed Jan. 31, 1922. Serial No. 532,941. 7 Claims. (Cl. 173—324.)



1. A timer connection for automobiles comprising a flexible water-proofed ribbon-like casing constructed to be wrapped around the timer, and in which the conductors to be connected with the timer are encased, said casing being made up of a suitable fabric to encase the conductors and having a series of metal fasteners secured to and supported directly by the material of the casing, each fastener being connected with one of said conductors and fitting over a terminal of the timer when the casing is wrapped around the timer.

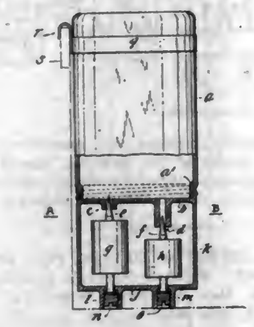
1,666,666. OIL TANK. JOSEPH N. PEW, Jr., Ardmore, Pa., assignor to Sun Oil Company, Philadelphia, Pa., a Corporation of New Jersey. Filed June 8, 1926. Serial No. 114,417. 2 Claims. (Cl. 220—85.)



1. Means adapted to store oil and allow "breathing" due to formation and condensation of gas which comprises a tank of relatively large volume adapted to contain the oil, a flexible diaphragm having a substantially semi-spherical shape when distended and when distended having a volume that is small relative to that of the tank, means supporting the periphery of the diaphragm and so positioning the diaphragm as to subject it to oil vapor pressure on one side and atmospheric pressure on the other side, said diaphragm being therefore distensible in one direction away from a plane intersecting its peripheral support upon accumulation of vapor and increase of vapor pressure and being distensible in the other direction upon condensation of vapor and decrease of vapor pressure.

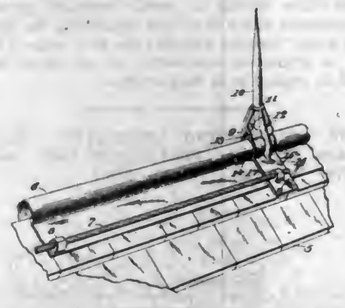
1,666,667. OIL TANK. JOSEPH N. PEW, Jr., Ardmore, Pa., assignor to Sun Oil Company, Philadelphia, Pa., a Corporation of New Jersey. Filed June 8, 1926. Serial No. 114,418. 6 Claims. (Cl. 220—26.)

5. An oil tank comprising an outer wall and a roof, one section of which is movable vertically and another surrounding section of which is relatively fixed, the movable roof section carrying a depending cylindrical wall, and means allowing circulation of gas between the gas spaces under the two roof sections.



1,666,668. TRAY OR THE LIKE. FREDERICK AUGUSTUS PURCHAS, McGraw, N. Y., assignor to Oneida Community, Limited, Oneida, N. Y., a Corporation of New York. Filed May 5, 1925. Serial No. 28,065. 2 Claims. (Cl. 206—75.)

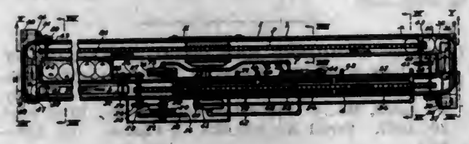
1. The combinational with a receptacle, of a resilient article-retaining strip therein and bendable to and from the bottom thereof, said strip being provided with recess on its under side for retaining the articles in packaged condition for shipment and with recesses on its upper side for retaining and displaying the same articles in unpackaged condition, said strip being normally bowed in one direction relatively to the bottom of the receptacle and having the walls of its upper recesses so spaced that in one position of the strip they will grip and in the other position thereof release the articles therein.



1,666,669. DISINFECTING DEVICE FOR WATER-CLOSETS AND THE LIKE. LEWIS ERNEST SAUNDERS, Eastwood, South Australia, and MENDEL FINKELSTEIN, Sydney, New South Wales, Australia. Filed Apr. 8, 1927, Serial No. 181,951, and in Australia Apr. 15, 1926. 3 Claims. (Cl. 4—227.)

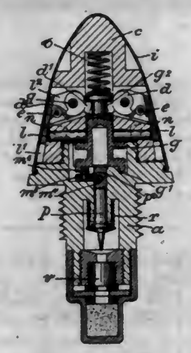
1. In a device for disinfecting water closets and the like, a sealed vessel adapted to stand in the cistern, said vessel having an air inlet opening and a discharge disinfecting opening at its lower end, the inner ends of which are approximately on the same level inside the vessel, the outer ends of the openings or tubes being at different levels, a valve for each opening, and floats for controlling

the valves, said floats being located below the valves in the flushing cistern and operated by the fall and rise of the water in the cistern, each time the water is discharged and the cistern is refilled.



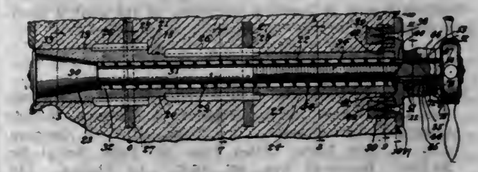
1,666,670. LIGHTNING-ROD AIR TERMINAL BRACKET. CLEMENT A. SCHNOEBELEN, Cedar Rapids, Iowa. Filed May 6, 1927. Serial No. 189,337. 2 Claims. (Cl. 173—31.)

1. Combined with a lightning-rod, its terminal and a roof ridge-roll, a bracket formed in halves, each socketed to receive the shank of the terminal, and arched to receive the ridge-roll, clamping bolts to bind the bracket halves closely on the terminal shank and ridge-roll, diverging feet conforming to the surface to which they are applied, and lugs formed on one of the feet, and adapted to connect electrically with the rod when bent over thereon,



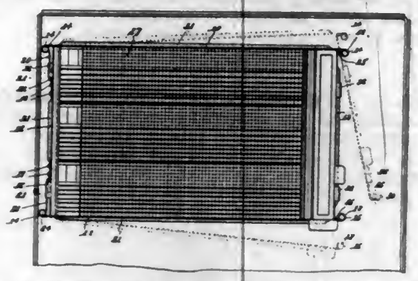
---

1,666,671. APPARATUS FOR WASHING GLASSES AND THE LIKE. REID C. SPEER, Pittsburgh, Pa. Filed May 17, 1927. Serial No. 191,971. 9 Claims. (Cl. 141—3.)



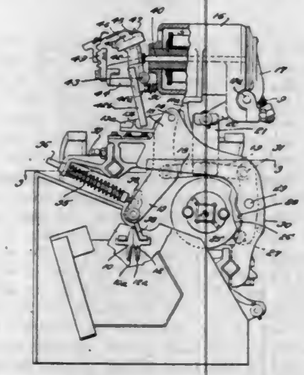
1. In combination in an apparatus for washing containers, a plurality of driven, endless conveyors having horizontal flights adapted to directly receive and support the containers upon the upper faces of said conveyors arranged in substantially the same plane and end to end, so that such flights together form a circuit, guide means fixed with respect to said conveyors along the sides thereof for holding the containers in upright position and washing means arranged in proximity to one of said flights, so as to wash the containers carried thereby.

1,666,672. PERCUSSION FUSE FOR PROJECTILES SUBJECTED TO A ROTARY MOVEMENT AROUND THEIR AXES DURING THEIR TRAJECTORY. ANDRÉ VARAUD, Geneva, Switzerland. Filed June 8, 1926, Serial No. 114,428, and in Switzerland June 9, 1925. 4 Claims. (Cl. 102—39.)



1. Percussion fuse for artillery projectiles submitted to a rotary movement around their axes during their trajectory comprising a control member submitted to the action of the centrifugal power in such a manner as to be adapted to become laterally standing out from the body of the fuse and to remain in this standing out position during the whole trajectory, regardless of the action of the resistance of the air, an oscillating member for locking the striker constituting a lever adapted to swing in a plane perpendicular to the axis of the fuse and which is provided with a pin operating in the bore of a locking sleeve mounted to be axially movable in the direction of the advance of the projectile and concentric with regard to the striker, said sleeve being held in its active position against the action of a percussion spring during the whole trajectory of the projectile by a device controlled by the displacement of said control member standing out from the body of the fuse during the trajectory of the projectile.

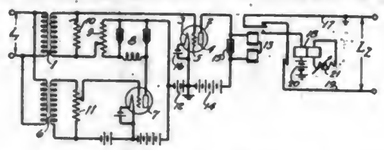
1,666,673. AIR-VENT MEANS FOR VAULTS. JOHN P. WILLIAMS, Bayside, N. Y., assignor to Duplex Electric Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 4, 1927. Serial No. 172,914. 18 Claims. (Cl. 109—1.)



1. An air-vent means of the class described, comprising a tubular body adapted to be secured in a wall and extend therethrough, a plug forming a closure for said tube, means operative at the inner side of the wall for locking said plug in closure position, and means for automatically ejecting the plug from said tube outwardly at the outer side of the wall when said locking means is released.

1,666,674. TYPE-COMPOSITION-BINDING FRAME. ALBERT WILSON, Chicago, Ill. Filed Mar. 4, 1926. Serial No. 92,278. 10 Claims. (Cl. 101—404.)

1. A binding frame for type-composition including hinge connected walls for walling in the type-composition; the hinges for said walls lying wholly outwardly beyond the binding line formed by said walls; one of said hinges being formed to afford a floating resilient connection coacting with one of said walls to produce a type embracing enclosure, substantially as described.

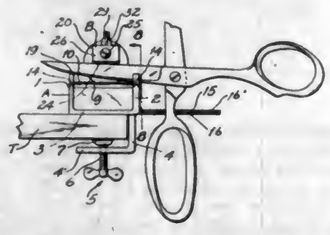


1,666,675. CIRCUIT MAKING AND BREAKING DEVICE. THORSTEN ZWEIGBERGK, London, England. Filed Dec. 20, 1923, Serial No. 681,719, and in Great Britain Dec. 27, 1922. 15 Claims. (Cl. 200—89.)

14. In a circuit making and breaking device, the combination with a pair of relatively movable contacts of an electro-magnetically operated means for effecting a partial closing movement of the contacts, a mechanically operated means for completing said closing movement, an auxiliary switch mechanism operated by one of said means, said auxiliary switch mechanism including an interlocking device adapted to engage the mechanically operated means to prevent operation of the switch mechanism upon failure of the contacts to separate.

1,666,676. REPEATER CIRCUITS. BJÖRN G. BJÖRNSON, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 27, 1925, Serial No. 39,884. Renewed Apr. 25, 1927. 12 Claims. (Cl. 179—171.)

1. The method of discriminating between momentary impulses of current and relatively steady disturbing currents received over a circuit in their effect on a receiver circuit, comprising utilizing part of the received energy to operate the receiver circuit, separately utilizing part of the received energy to bias said receiver circuit against operation, continuously neutralizing the operating energy due to said steady disturbing currents with the biasing energy due to said disturbing currents, and delaying the effect on said receiver circuit of the biasing energy due

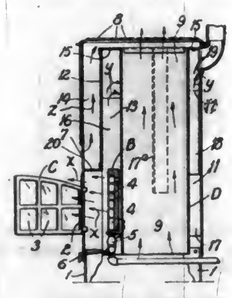


to said momentary impulses with respect to the effect on said receiver circuit of the operating energy due to said momentary impulses, thereby insuring operation of said receiver circuit by said momentary impulses.

1,666,677. FASTENING DEVICE FOR EMERGENCY-EXIT DOORS. WILLIAM BERTRAM BOLLES, Milwaukee, Wis. Filed May 5, 1926. Serial No. 106,855. 4 Claims. (Cl. 292—92.)

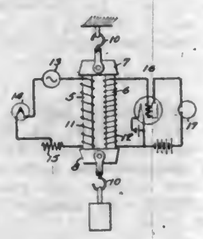
1. In a device of the character described, the combination with a hinged door and its frame, of a keeper attached to the frame member opposite that to which the door is hinged and projecting into the door opening, rigid arms pivoted to the inner side of the door adjacent opposite edges thereof to swing vertically between the frame members and a cross bar connecting the outer ends of said arms, the arm adjacent the free edge of the door having a projection outwardly of its pivot which is adapted to engage with said keeper.

1,666,678. SHARPENING APPARATUS. WILLIAM T. BRADLEY, Linn, Mo. Filed Oct. 23, 1926. Serial No. 143,574. 7 Claims. (Cl. 51—218.)



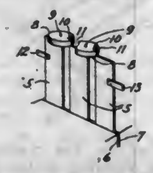
1. A device for holding cutting elements to be sharpened comprising a member having spaced end walls, and an elongated pocket interposed between said spaced end walls, said end walls being provided with openings in alignment with said pocket, said openings being of approximately the same shape as the cross-sectional shape of said pocket and said pocket and said openings being adapted to receive the blade of the cutting element to be sharpened.

1,666,679. COMBINED RADIATING AND CIRCULATING GAS HEATER. GEORGE L. BRIDGE, Clayton, Mo., assignor to Bridge & Beach Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed Sept. 30, 1927. Serial No. 223,033. 3 Claims. (Cl. 126—92.)



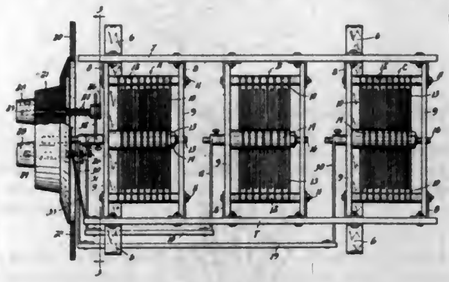
1. A combined radiating and air circulating gas heater, comprising a casing provided in its top with air discharge openings, a gas operated heating unit arranged inside of said casing, an opening in the front wall of said

casing through which radiant heat can escape, an open-ended air flue member of relatively great cross-sectional area arranged vertically in said casing in spaced relation to the side and rear walls of the casing so as to form



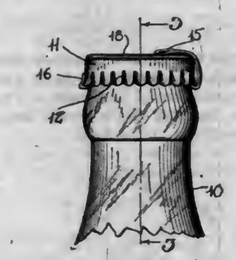
a rear gas flue and side gas flues, a partition interposed between said air flue member and the front wall of the casing so as to form an auxiliary air flue and a front gas flue, and air inlets in the front wall of the casing for supplying air to said auxiliary air flue.

1,666,680. DYNAMOMETER. OLIVER E. BUCKLEY, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 30, 1922. Serial No. 610,015. 5 Claims. (Cl. 177—351.)



1. A dynamometer for measuring mechanical stress comprising a member composed of a magnetic material that undergoes a change in permeability of at least 200 c. g. s. units, continuously in one direction, when subjected to a mechanical stress of 4000 lbs. per square inch or less, means for applying stress to said member, and means for quantitatively indicating a change in permeability of said member.

1,666,681. MECHANICAL WAVE FILTER. HARRY A. BURGESS, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 22, 1924. Serial No. 708,127. 7 Claims. (Cl. 180—0.5.)

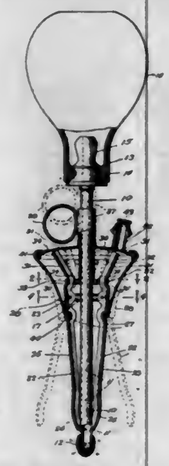


5. A mechanical wave filter comprising a member having freedom of rotation in one plane and freedom of translatory movement in a second plane so that the moment of inertia of said member as regards rotation in said first plane acts as one element of the filter and a characteristic of said member as regards its movement in said second plane acts as a second element of said filter.

1,666,682. CONDENSER ASSEMBLY CONTROL. HARRY H. BUSSE, Cleveland, Minn. Filed Apr. 6, 1927. Serial No. 181,390. 10 Claims. (Cl. 175—41.5.)

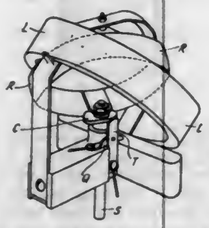
1. The combination with a plurality of independently movable elements of a radio condenser assembly, of a single rotatable main control dial, a plurality of means respectively connected to respective movable elements of said radio condenser assembly, and a plurality of individual control means mounted in said dial and connected to respective first mentioned means, whereby all of said movable elements may be rotated together as said dial is turned, each of said individual control means being so constructed that as the same is individually operated it will operate the respective means connected thereto to rotate one movable element independently of the other movable elements.

1,666,683. CLOSURE MEANS FOR BOTTLES. ELIZABETH M. CARHART, Jewell, Va. Filed Apr. 6, 1926. Serial No. 100,147. 4 Claims. (Cl. 215—46.)



1. A closure device for bottles and the like, comprising a body portion having a top, a flange, a sealing member, a flexible elongated member in the form of a loop extending across and free of the body portion between the top and the sealing member, the ends being secured at one side of the top adjacent the flange, the bight of the loop extending beyond and from the flange, the flange being of sufficient rigidity to permit of the loop to raise the cap from the top of the container, the loop sliding on the contacting edge of the cover member flange and coacting by pressure on the top of the container to raise the cap when the loop is lifted.

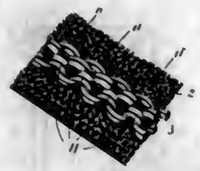
1,666,684. VAGINAL DOUCHE. HERBERT H. CARSTENS, Oak Park, Ill., assignor to H. Carstens Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Jan. 15, 1926. Serial No. 81,867. 6 Claims. (Cl. 128—244.)



1. In an instrument of the character described, the combination with a spray tube, of a finger supporting

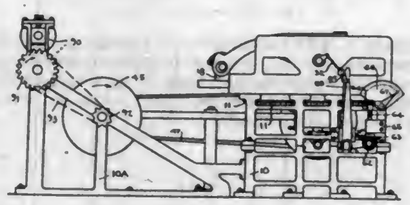
spider stationarily secured thereon, dilating fingers grouped around said tube and fulcrumed on said spider to swing in planes parallel with the axis of said tube, each finger having a rearwardly and outwardly inclined, terminal end portion, a finger actuating member slidably mounted on said tube and having openings formed therein for the reception of said terminal end portion of the fingers, said member being movable lengthwise of the tube,

and the outer edges of the openings therein being adapted, when said member is moved in one direction lengthwise of the tube, to engage the inclined outer sides of said terminal end portions of the fingers and thereby spread apart the other ends of said fingers, a disc like base plate mounted on said spray tube beyond the terminal end portions of said dilating fingers, and a finger hold secured to said finger actuating member at a place beyond said disc-like base plate.



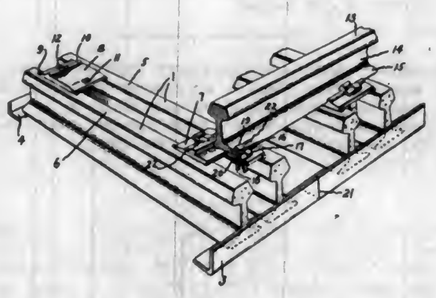
1,666,685. TUNING SYSTEM. NEWSOME HENRY CLOUGH, Chelmsford, England, assignor to Radio Corporation of America, a Corporation of Delaware. Filed Apr. 15, 1926, Serial No. 102,126, and in Great Britain Apr. 24, 1925. 6 Claims. (Cl. 171—242.)

1. In a resonant circuit a variometer, a fixed inductance and a switch cooperating with said variometer and actuated thereby, adapted to include or exclude said fixed inductance from said resonant circuit.



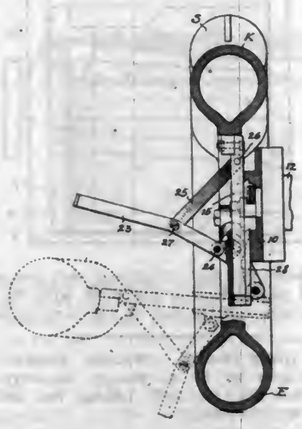
1,666,686. FABRIC. LESTER B. CHISHOLM, Melrose, Mass., assignor to Everlastik, Inc., Chelsea, Mass., a Corporation of Massachusetts. Filed Nov. 3, 1926, Serial No. 145,988, and in Canada Feb. 8, 1926. 5 Claims. (Cl. 139—420.)

1. A slip-resisting fabric, comprising in combination a textile backing and a raised slip-releasing structure thereon having a rough surface texture, including contacting rubber bights produced by binding juxtaposed rubber strands to the backing at intervals, said binding



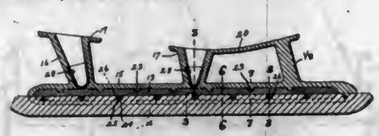
points being so spaced that the bights are crowded together reinforcing one another and certain of the bights are laterally deflected.

1,666,687. PAPERBOARD-CUTTING MACHINE. CHARLES EVERETT COLGROVE, Toronto, Ontario, Canada. Filed Jan. 10, 1927. Serial No. 160,176. 11 Claims. (Cl. 164—43.)



1. In a paper stock cutting machine, a reciprocating table carrying a knife therewith, an oscillating member carried by said table and having a knife positioned to co-act with said first-mentioned knife, means for feeding the paper stock between said knives, and means adapted for oscillating said member from said table in its movement.

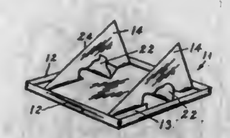
1,666,688. RAILROAD-TRACK STRUCTURE. WILLIAM DALTON, Glenville, N. Y. Original application filed Feb. 1, 1927, Serial No. 165,136, Patent No. 1,657,242, dated Jan. 24, 1928. Divided and this application filed Sept. 20, 1927. Serial No. 220,811. 3 Claims. (Cl. 238—49.)



1. In a track structure, the combination of a plurality of ties having abutting projections at their ends whereby the ties mutually support each other, a rail on the ties, and abutting projections on the rail and at least one of the ties to prevent creeping of the rail.

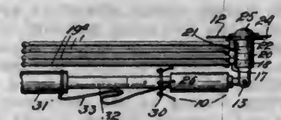
1,666,689. COLLAPSIBLE CORE. PETER DE MATTIA, Passaic, N. J., assignor to De Mattia Brothers, Inc., Garfield, N. J., a Corporation of New Jersey. Filed Oct. 16, 1924. Serial No. 744,045. 3 Claims. (Cl. 154—9.)

1. A collapsible core comprising a plurality of core sections, a chuck or support therefor, one of said sections having a radial sliding movement on said chuck in the plane of the core, and also a swinging movement into and out of said plane, a swinging lever pivotally mounted at its lower end and a link pivotally connecting said lever and said movable section, the said lever being movable from a position within the plane of the core to a position outside of said plane and transversely thereto, to impart to said movable section in succession radial movements into and out of a position of operative continuity and swinging movements into and out of the plane of operative continuity.



1,666,690. SKATE. CARL B. DREVITSON, Somerville, Mass. Filed June 30, 1927. Serial No. 202,606. 6 Claims. (Cl. 208—167.)

1. A skate comprising a runner, a non-metallic elongated core formed to bear on the major portion of the upper edge of the runner, and having a longitudinal groove receiving said upper edge to locate the core on the runner, the sides of the groove overlapping portions of the sides of the runner, and a one-piece metal casting including an elongated base portion cast on the core and on portions of the sides of the runner below the core, the casting including upstanding supporting standards.



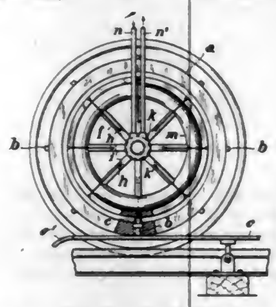
1,666,691. DISPLAY CARTON. DEAN A. EMERSON, Derby, Conn., assignor to The Star Pin Company, Derby, Conn. Filed Apr. 8, 1926. Serial No. 100,629. 3 Claims. (Cl. 206—44.)

1. A display carton, comprising a container and a cover therefor, and supporting members secured to the inner surface of the cover, each of said supporting members comprising a section secured flatwise to the inner surface of the container cover, and a section hingedly connected to the first named section and adapted to lie flatwise against the inner surface of the cover when the latter is on the container, and to be swung to an upstanding position in a plane at right angles to said surface of the container to support the latter to display the contents thereof, said hinged section having

an inclined free edge on which the container is adapted to be supported in an inclined position, and means for releasably securing said hinged sections in upstanding position, said securing means maintaining said sections in such upstanding position when the container is lifted therefrom.

1,666,692. FOLDING UMBRELLA. HARRIS EPSTEIN, Rockaway Beach, N. Y. Filed Jan. 29, 1927. Serial No. 164,469. 7 Claims. (Cl. 135—25.)

1. In a folding umbrella, the combination of a stick and ribs swiveled on the stick for folding together or for extending radially to spread the cover, the stick comprising a pivoted portion provided with a handle, the ribs when folded occupying a given position with respect to the upper part of the stick, and the pivoted portion of the stick mounted to swing toward such position of the folded ribs.



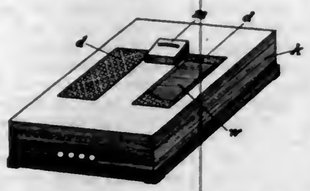
1,666,693. COMPOSITION TO BE USED IN CONNECTION WITH ANTIKNOCK COMPOUNDS. WILHELM GAUS, Ludwigshafen-on-the-Rhine, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed Apr. 17, 1925. Serial No. 23,960. 5 Claims. (Cl. 44—9.)

1. A composition comprising a liquid fuel, that has a metal carbonyl compound mixed therewith, and a compound soluble in the said fuel and containing a halogen.

1,666,694. PRODUCING MIXTURES OF NITROGEN AND HYDROGEN. WILHELM GAUS and WILHELM WILD, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Original application filed Nov. 3, 1923, Serial No. 672,643, and in Germany Nov. 14, 1922. Divided and this application filed Feb. 5, 1925. Serial No. 7,165. 2 Claims. (Cl. 23—7.)

1. In the catalytic synthesis of ammonia from nitrogen and hydrogen the preliminary steps of operating a producer, containing incandescent fuel with steam and with two kinds of oxygenated air differing in percentage of oxygen one containing less oxygen and the other containing more oxygen than atmospheric air and both derived from rectification of liquid air while controlling their proportions so as to give rise to a gas mixture containing one volume of nitrogen for each three volumes of the sum of hydrogen and carbon monoxid and to enable the producer to be continuously operated without intercalating heating periods, then subjecting the gas mixture to a suitable treatment to substitute hydrogen for the carbon monoxid in the gas mixture and removing the carbon dioxid.

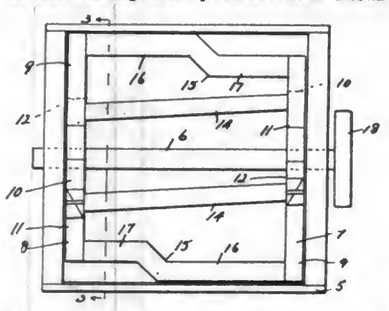
1,666,695. SAFETY DEVICE FOR PREVENTING RAILWAY ACCIDENTS. HUGO GREBEHEM, Herbsleben, Germany. Filed Mar. 24, 1927, Serial No. 178,081, and in Germany June 30, 1926. 1 Claim. (Cl. 246—200.)



A safety-device for preventing trains overrunning the signal; "line blocked," comprising, in combination, a fixed rim on the outer side of one of the locomotive wheels of a train having radial borings therein, spring-pressed bolts in said borings adapted to normally project somewhat from the outer periphery of said rim, spring-pressed linked levers at one end in contact with the inner ends of said bolts, valves in connection with the other slot-guided ends of said levers, a steam supply pipe system leading to the compressed-air brakes of the train and normally shut-off by said valves, and an adjustable bar with declined ends on the permanent railway line placed with pulled signal: "line blocked" within the path of and in level with the outer periphery of said rim and then adapted to operate said bolts and thereby to open said valves and to free the steam supply therethrough.

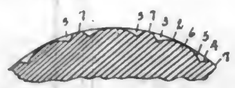
1,666,696. PROCESS FOR UTILIZATION OF LIGNIN. ROBERT GRIESSBACH and JULIUS EISELE, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Oct. 18, 1927, Serial No. 227,049, and in Germany Oct. 22, 1926. 4 Claims. (Cl. 260—137.)

1. A process for recovering useful products from material rich in lignin which consists in extracting the said material with an organic halogen-containing solvent.



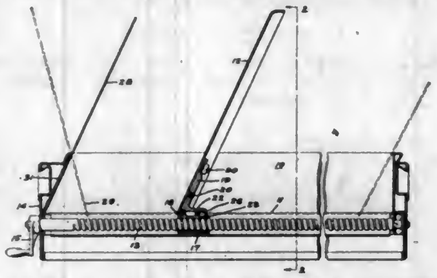
1,666,697. DIATHERMIC APPARATUS. GUSTAV GROSSMANN, Berlin, Germany. Filed Oct. 7, 1927, Serial No. 224,569, and in Germany Nov. 23, 1926. 3 Claims. (Cl. 174—89.)

1. In a diathermic apparatus, a casing, and ballast resistances in said casing for the protection of the oscillatory circuit of the apparatus arranged in the vicinity of one wall of said casing in such manner that the electrodes of the apparatus which are placed in said vicinity are heated by said resistances.



1,666,698. DOUGH MIXER. WILLIAM GUETHLER, Philadelphia, Pa. Filed June 19, 1926. Serial No. 117,009. 5 Claims. (Cl. 259—109.)

1. A dough mixer including a bowl and an agitator rotatably mounted in said bowl, said agitator comprising a shaft, spiders fixed thereon; a pair of bars disposed between the spiders, on opposite sides of and parallel with the shaft having offset portions and a second pair

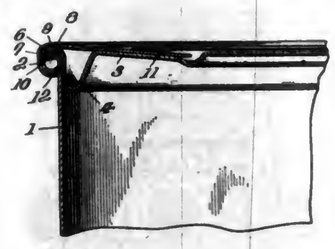


of bars between the first mentioned ones and on opposite sides of and oblique to the shaft with the axes of said oblique bars and the saft in the same plane.

1,666,699. GOLF BALL. WALTER HAGEN, Detroit, Mich., assignor to L. A. Young Company, Detroit, Mich. Filed Dec. 16, 1927. Serial No. 240,461. 8 Claims. (Cl. 273—62.)

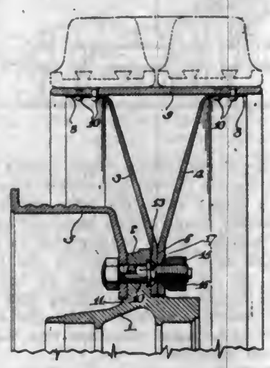
7. A golf ball, the spherical surface of which is provided with annular recesses having convexly curved inner walls.

1,666,700. RECORD TRAY. CECIL B. HARRISON, San Francisco, Calif., assignor to Ross West and Kirby P. West, San Francisco, Calif. Filed Nov. 22, 1926. Serial No. 149,816. 15 Claims. (Cl. 129—16.)



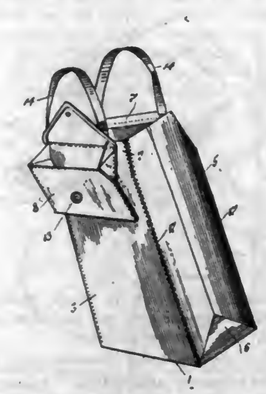
1. A device of the character described comprising a tray, a follower for supporting records, and means for moving said follower backwards and forwards lengthwise of said tray, said means comprising a threaded rod, a tube encircling said threaded rod, and a locking member pivoted to said tube and secured to said follower.

1,666,701. LENS POLISHER. HARRY W. HILL, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Apr. 10, 1922. Serial No. 551,137. 1 Claim. (Cl. 51—280.)



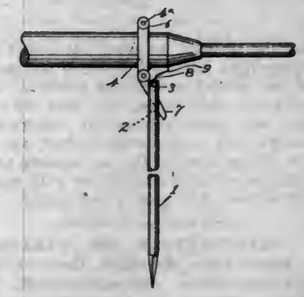
As a new article of manufacture, a backing provided with a coating of a mixture of beeswax, methyl salicylate and a phenol substance, and an abrasive embedded in the mixture.

1,666,702. METAL CONTAINER. WILLIAM W. HODGSON, Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 15, 1927. Serial No. 175,494. 1 Claim. (Cl. 220—61.)



A sealed metal container comprising a body portion having an outwardly rolled flange, an end having a depending portion adapted to frictionally engage the inner wall of the body portion and an outwardly extending flange overlying the flange on said body portion, the outer portion of said flange on the end being folded underneath and against the under face of the flange, said underneath portion extending across and being shaped to conform to and engage the rolled flange on the body portion, said underneath portion terminating at said depending portion on the end, a sealing material located between the underneath portion and the rolled flange on the container body, and a sealing ring having a portion adapted to overlie the flange on the end, a portion extending downwardly across the edges of the flanges on the end and body portion of the container, and adapted to be turned under and against the lower portion of the flange on the container body so as to grip and hold said flanges in tight sealed contact, and means whereby said sealing ring may be torn across to release the same from the container.

1,666,703. HEAVY-DUTY DISK-WHEEL STRUCTURE. J. HAROLD HUNT, Philadelphia, Pa., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 4, 1926. Serial No. 92,149. 2 Claims. (Cl. 301—63.)

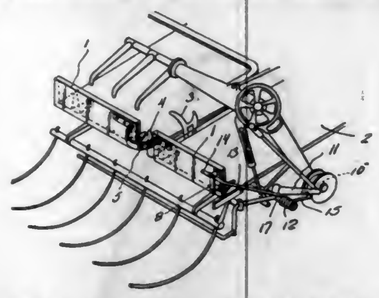


1. A wheel of the character set forth comprising a hub member, a pair of disks secured to said hub member, said disks being disposed in diverging relation and free of each other from said hub to the outer peripheral portions thereof, and a cylindrical rim band rigidly connected commonly to the outer peripheral portions of each of said disks.

1,666,704. COMBINED HAND BAG AND GRIP. WILLIAM N. HUNTER, Blanchester, Ohio. Filed Mar. 1, 1922. Serial No. 540,320. 1 Claim. (Cl. 150—1.7.)

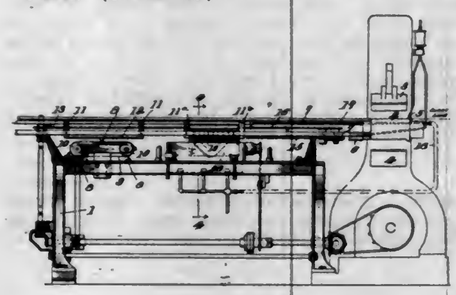
A hand bag of the character specified, comprising a body portion of flexible material, a flat, stiff, rectangular bottom therefor, said bottom foldable against the outer surface of the body portion, bringing a fold of the opposite side of the body outermost, and said bottom having substantially half the width of the length of the bag, whereby the stiff bottom acts as a guide in folding to reduce the length of the bag when folded to substantially half the length of the bag when extended, and means for securing the bottom in folded position.

1,666,705. FISHING-ROD HOLDER. HENRY KEMPF and ALBERT KIEFER, Cincinnati, Ohio. Filed Apr. 22, 1925. Serial No. 24,923. 1 Claim. (Cl. 248—37.)



A fishing rod holder comprising a member adapted to be secured to an anchorage, and having a slot therein, with an element crossing said slot above the base thereof, and means secured to the rod having a member to extend through said slot and engage the base thereof, and a member to rest against said element, said members comprising a pair of diverging tongues, one of which enters the slot and the other of which lies on said element, said tongues having notches formed in the crotch dividing them from each other, for the purpose described.

1,666,706. GRAIN-HARVESTER ATTACHMENT. ABRAHAM KRAFT, Farmington, Minn. Filed Oct. 21, 1926. Serial No. 143,235. 2 Claims. (Cl. 56—449.)

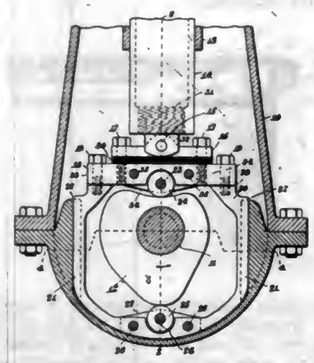


1. In combination, a binder deck, a needle arm, a compressor shaft, a bundle backing member hingedly mounted

upon said deck at the discharge end of the latter and adapted to assume a vertical operative position, and timing and operating means for said member pivotally

supported at its center upon the shaft, having one end bearing against said needle arm and the other end slidably connected with said backing member.

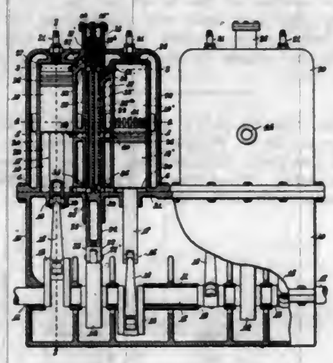
1,666,707. SOLDERING MACHINE. ALFRED L. KRONQUEST, Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y., a Corporation of New York. Filed Feb. 18, 1927. Serial No. 169,250. 8 Claims. (Cl. 113—62.)



1. A soldering machine for metal can bodies comprising an inside supporting horse along which the can bodies to be soldered are moved, a series of soldering irons yieldingly mounted on said horse, and over which the can bodies pass, said irons successively engaging the side seam of the can body at the inside thereof, and means engaging the soldering irons at the face making contact with the side seam for supplying said irons with solder during the interval between the passing can bodies.

1,666,708. MANUFACTURE OF PARAFORMALDEHYDE. ERNST KUSS, Mannheim, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed June 18, 1926, Serial No. 116,947, and in Germany June 24, 1925. 2 Claims. (Cl. 260—140.)

1. The process of manufacturing paraformaldehyde which consists in catalytically oxidizing methanol substantially free from water practically completely to formaldehyde by means of an oxygen-containing gas, cooling the reaction gases so as to condense a mixture of formaldehyde and water vapor and concentrating the resulting liquid by means of the uncondensed gases and allowing the resulting concentrated solution to solidify.



1,666,709. CAM MECHANISM FOR ACTUATING VALVES. GEORGE A. LOUD, Fitchburg, Mass., assignor to Loud Slide Valve Engine Co., Fitchburg, Mass., a Corporation of Massachusetts. Filed Aug. 12, 1926. Serial No. 128,896. 3 Claims. (Cl. 74—14.)

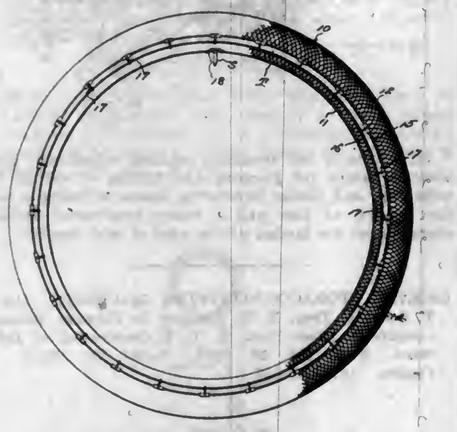
1. The combination of a reciprocating member; a block pivoted to one end thereof; a yoke; a bifurcated block secured to said yoke; bolts connecting said blocks; shims between said bifurcated block and said yoke; a roller disposed in said bifurcated block; a second roller on said

yoke alined with the first mentioned roller; a cam between and coacting with both rollers; and a revoluble shaft to which said cam is secured.

1,666,710. INTERNAL-COMBUSTION ENGINE. GEORGE A. LOUD, Brookline, Mass., assignor to Loud Slide Valve Engine Co., Fitchburg, Mass., a Corporation of Massachusetts. Filed Aug. 12, 1926. Serial No. 128,897. 26 Claims. (Cl. 123—59.)

7. In an internal combustion engine having two closed cylinders with pistons therein operatively connected to a power shaft, a single valve for both cylinders having therein two parallel compartments separated by a central partition and adapted in its reciprocation to permit the passage through said compartment of the combustible mixture from the mixing chambers to the explosion chambers; and means for reciprocating said valve and causing it to remain stationary while the combustible mixture is being discharged therefrom into the explosion chambers of said cylinders.

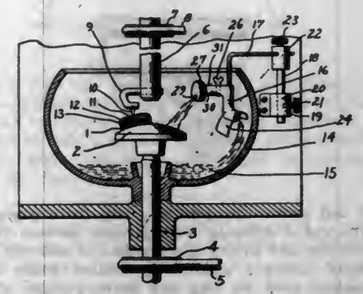
1,666,711. ROLLING MILLING TOOL. ARCHIE A. MACDONALD, Los Angeles, Calif., assignor to Hughes Tool Company, Houston, Tex., a Corporation of Texas. Filed Mar. 14, 1927. Serial No. 175,143. 3 Claims. (Cl. 29—103.)



1. A milling tool for deep well operation, comprising a cylindrical head having its entire periphery formed into

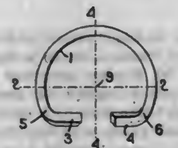
cutting teeth, said teeth having their forward faces radial and their outer faces inclined from the cutting edge inwardly, scraping teeth on the forward end of

said head, said forward end having pockets therein, and rolling cutters mounted on radial axes within said pockets.



1,666,712. INNER-TUBE TESTER. GEORGE E. MANCOS, Richmond, Va. Filed Nov. 28, 1926. Serial No. 150,287. 2 Claims. (Cl. 73—51.)

2. A tube tester embodying an annular tubular casing formed with a side opening therethrough extending completely therearound, and fastening and spacing members swingably mounted at spaced intervals on and around the casing adjacent one side opening edge thereof for extending across the opening and releasably engaging the casing adjacent the opposite edge, said members in engaged position securing the casing edges in spaced opening forming relation to confine a tube in the casing while substantially completely exposing the surface of the tube disposed at and around the open side of the casing.

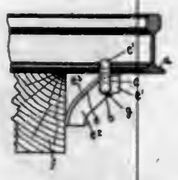


1,666,713. FLUID ABRADANT SUPPLYING MEANS. ALBERT E. MAYNARD, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Dec. 13, 1926. Serial No. 154,584. 2 Claims. (Cl. 51—263.)

2. In combination with a rotatable bowl containing a fluid abrasive, an abrasive scoop member comprising a pipe portion having an internal channel, a scoop apron at one end and in internal annular shoulder at the other end, a nozzle member having an annular barrel portion fitting the internal shoulder of the pipe member and having an external projecting portion and a transverse recessed groove on the barrel portion, screw means projecting through the pipe portion into the recessed groove on the barrel portion whereby the barrel portion may be turned within the annular shoulder portion without separation of the parts, said nozzle mem-

ber having a central channel portion aligning with the channel portion of the pipe member and an offset channel portion intersecting the first channel portion and opening through the extending portion of the nozzle member, means to support the abrasive scoop member within the bowl in operative related position with the walls of the bowl, and means intermediate the ends of the scoop member for regulating the amount of abrasive passing through the internal channel thereof.

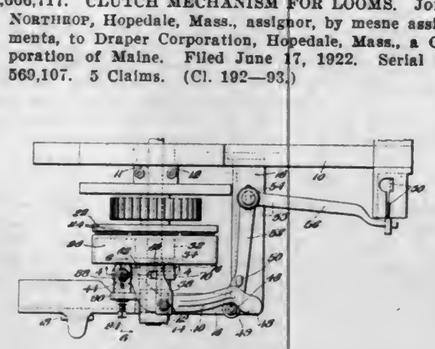
1,666,714. SPINNING-RING TRAVELER. CHARLES F. MERRILL, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Original application filed Mar. 25, 1926, Serial No. 97,242. Divided and this application filed July 12, 1927. Serial No. 205,213. 7 Claims. (Cl. 118—61.)



1. A spinning ring traveler of uniform cross section having a flat inner bearing surface having its central bow section cylindrical and the bearng surfaces of the horns and bow sections adjacent the horns obliquely helicoidal at an angle to the central bow section corresponding to the normal angle of inclination of the traveler when running.

1,666,715. DYEING PREPARATION FOR CELLULOSE ESTERS. RICHARD METZGER, Heidelberg, Germany, assignor, by mesne assignments, to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 4, 1926, Serial No. 92,346, and in Germany May 7, 1925. 4 Claims. (Cl. 8—6.)

1. As a new composition of matter, a mixture comprising an organic substance which is capable of directly pro-



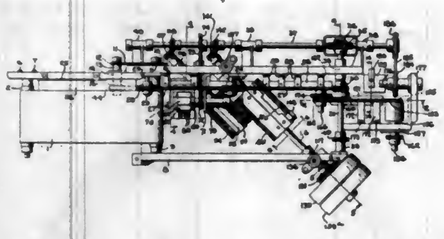
ducing dyeings in full and deep shades on cellulose esters, but not sufficiently soluble in water to permit the use of its aqueous solution for producing such dyeings, and molasses.

1,666,716. RAIL ANCHOR OR ANTICREEP DEVICE FOR RAILWAY RAILS. PERCY BARRINGTON MEYER, London, England. Filed June 23, 1927, Serial No. 200,945, and in Great Britain Aug. 6, 1926. 5 Claims. (Cl. 238—317.)

1. A rail anchor, comprising a clip for engaging with the rail, and a gripping lever pivoted between its ends upon the clip and having end portions of different length, said lever having a reinforcing member which extends continuously from its long end which engages with the tie to its short end which engages with the rail.

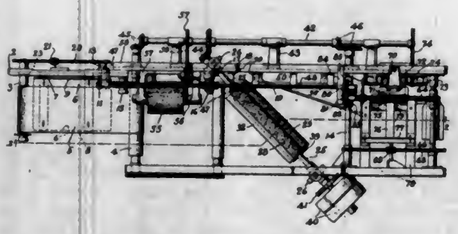
1,666,717. CLUTCH MECHANISM FOR LOOMS. JONAS NORTHROP, Hopedale, Mass., assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed June 17, 1922. Serial No. 569,107. 5 Claims. (Cl. 192—93.)

1. A loom having, in combination, a frame, a knock-off lever mounted on the frame, a shaft, a disk secured thereto having a series of friction members on one surface thereof, a driving pulley capable of movement into engagement with the friction members upon said disk, connections between said pulley and the knock-off lever including a bell crank lever arranged to be moved by the knock-off lever, a pivoted lever connected to the pulley and having a cam surface cooperating with one arm of the bell crank to cause axial movement of the pulley into engagement with the friction members on the disk when the knock-off lever is moved into a position to start the loom, said bell crank lever being provided with an arm that extends approximately at right angles to the portion of said pivoted lever with which it cooperates through said cam surface and having a part to engage and positively actuate the pivoted lever to release the friction driving members.



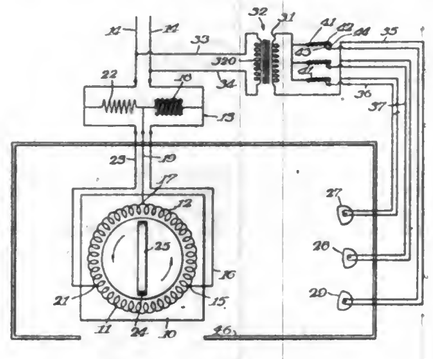
1,666,718. GAME. EDWARD J. PLAYFOOT, Galeton, Pa. Filed Mar. 8, 1927. Serial No. 173,739. 3 Claims. (Cl. 265—20.)

1. In a device of the kind described, a pair of spaced posts, guide members extending between said posts, a spring retracted impeller mounted slidably on each post, in alignment with the repective guide members and adapted to receive blows from a mallet, balls movable along said members and movable to engage the respective



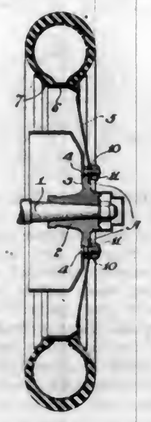
impellers, and other balls movable along said members and positioned to be struck by the first balls upon the latter being actuated by the impellers.

1,666,719. TOBACCO-STEMMING MACHINE. JAMES P. SCOVILL, Troy, N. Y., assignor, by mesne assignments, to Peerless Machine Corporation, New York, N. Y., a Corporation of Delaware. Filed July 18, 1921. Serial No. 485,596. 20 Claims. (Cl. 131—57.)



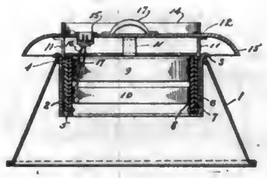
12. A tobacco leaf stemming machine including in combination means for grasping and holding a leaf by its stem butt, and lamina puncturing means including a support having an edge and a rotary puncturing member operating on the lamina at the edge of said support.

1,666,720. TOBACCO-STRIPPING MACHINE. JAMES P. SCOVILL, Troy, N. Y., assignor to Peerless Machine Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 24, 1925. Serial No. 25,517. 2 Claims. (Cl. 131—57.)



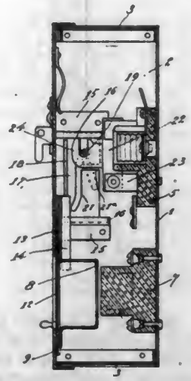
2. In a tobacco stemming machine, means to grasp the butts of a succession of leaves and transport them in one direction, means to break the lamina of the leaves transversely of the stems close to the transporting means, means to strip the lamina from the break toward the tip of the leaf, a second transporting means receiving from the first, and arranged to grasp the butts near the break, and a second stripping means for stripping the lamina towards the butts, while the leaves are held by the second transporting means, the breaking means having parts moving at right angles to the direction of travel of the leaves.

1,666,721. ADVERTISING DEVICE. RICHARD M. SHERRILL, Evanston, Ill., assignor to Central Scientific Company, a Corporation of Illinois. Filed Sept. 21, 1926. Serial No. 136,889. 10 Claims. (Cl. 46—49.)



1. In an advertising device, a support of poorly conducting material, stationary means for producing a rotatory magnetic field over the support, and a light annular object containing conducting material on said support and adapted to be rotated by said field about a diameter normal to the support.

1,666,722. DEMOUNTABLE DISK WHEEL. JOHN P. TARBOX, Philadelphia, Pa., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Sept. 8, 1926. Serial No. 134,148. 8 Claims. (Cl. 301—9.)

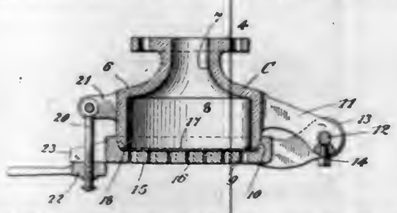


8. A fastening arrangement for wheels of automotive vehicles comprising a hub having a radial flange, a plurality of stud bolts projecting from said flange, a wheel provided with a plurality of outwardly embossed portions each having an aperture therethrough and a plurality of radial slots intersecting said apertures, said studs being adapted to project freely through said apertures, and nuts threaded on said studs and having recesses adapted to receive and engage said outwardly embossed portions to press said wheel against the hub flange.

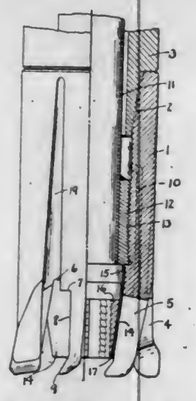
1,666,723. ELECTRICAL ROACH TRAP. STACY D. TRUMBO, Columbus, Ohio. Filed July 6, 1926. Serial No. 120,613. 2 Claims. (Cl. 43—112.)

1. In a trap, the combination with a receptacle, of a collar suspended therein, a band removably engaged in the collar and having spaced electrodes thereon, a cover supported by the band and capable of being inverted to close the upper end of the receptacle, as and for the purpose set forth.

1,666,724. INCLOSED ELECTRIC SWITCH. DAVID T. WADSWORTH, Cold Springs, Ky., assignor to The Wadsworth Electric Manufacturing Company, Covington, Ky., a Corporation of Kentucky. Filed Aug. 15, 1924. Serial No. 732,272. 5 Claims. (Cl. 200—50.)



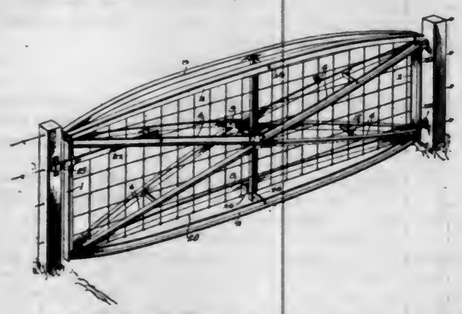
1. An electric switch and fuse box comprising a switch, a member for operating the switch, comprising a rocking part controlled from the outside of the box, said box having an opening and a shutter therefor, a slide in the box, means for slidably mounting the slide, said slide being formed and located so as to prevent open positions of the shutter, when the slide is in a selected position, and means on the slide detachably engaging the rocking part, whereby it is moved to the said selected position when the switch is closed.



1,666,725. TERMINAL STRAINER FOR DOPE SYSTEMS. EMIL WEINHEIM, New York, N. Y. Filed Apr. 3, 1924. Serial No. 704,080. 4 Claims. (Cl. 210—149.)

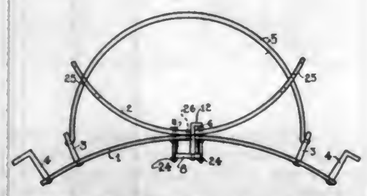
1. A terminal strainer for ducts adapted to deliver dope of the type employed in the manufacture of substitute leather comprising a walled structure having at its top provisions for connction with a dope duct and providing a downwardly enlarged expansion chamber, and having a downwardly directed open mouth the interior of which structure is smooth throughout and freely accessible through said mouth for manual cleaning; a perforated screen supporting lid adapted to make a fluid tight fit about said mouth the perforations of which open

directly to the exterior of said strainer; means for readily clamping and unclamping said lid to and from said structure including a laterally offset hinge for maintaining said lid permanently fastened to said walled structure and causing it to swing clear of said open mouth when unclamped; and a screen for overlying said lid.



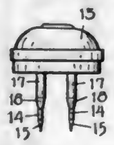
1,666,726. SOFT-FORMATION CORE DRILL. LOUIS H WELLENSIEK, Houston, Tex., assignor to Hughes Tool Company, Houston, Tex., a Corporation of Texas. Filed Aug. 2, 1926. Serial No. 126,471. 2 Claims. Cl. 255—72.)

2. A core drill including a tubular head, teeth cut deeply into the lower wall thereof, each alternate tooth being inclined inwardly, a core catcher sleeve tapered to fit the supports provided by said inwardly inclined teeth, said sleeve closing the space between said teeth from a line above said teeth to a level closely adjacent the lower ends thereof, said sleeve being also adapted to receive core engaging elements.



1,666,727. GATE. WALTER F. WEBBE, Martinsville, Ind. Filed Apr. 4, 1927. Serial No. 180,881. 5 Claims. (Cl. 256—73.)

1. A gate of the character described including end members, top and bottom double truss members, angle-iron braces connecting said end members together, a central brace connecting and bracing the top and bottom truss members, a center casting formed of side plates having grooves formed therein and connected together by a central web provided with a groove for receiving the central brace, and diagonal angle-iron braces fitted in the grooves in the side plates of the center casting and connected with the end members.

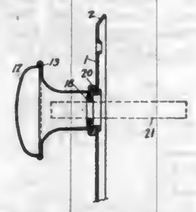


5. A gate including a frame having bracing members, and a connecting casting formed of side plates connected together by a central web secured to at least one of the bracing members, other of said bracing members being connected to the side plates.

1,666,728. PROJECTING SPRING STRAP FOR TRAPPING FUR-BEARING ANIMALS. WILLIAM BIEDERMAN, Sesekinika, Ontario, Canada. Filed June 27, 1927, Serial No. 201,821, and in Canada May 17, 1926. 3 Claims. (Cl. 43—88.)

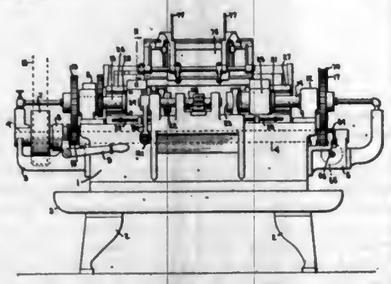
1. An animal trap comprising a pair of spring-operated jaws, a spring member mounting said jaws, a cross member secured to said spring member, catches carried by said cross-member and positioned to operatively engage said jaws when open, rods pivotally connected to said catches and having co-acting teeth adapted to lock said rods against relative displacement in one direction only, and a bait-operated trigger for unlocking said rods.

1,666,729. ELECTRIC FIXTURE. WILLIAM G. BIEK and GEORGE D. RICE, Dowagiac, Mich. Filed July 20, 1927. Serial No. 207,097. 6 Claims. (Cl. 173—338.)



1. An electric fixture comprising a socket member of insulating material having a pair of bore-like recesses therein, the edges of said recesses being beveled, contacts supported in said recesses and having curved spring fingers, and a plug member provided with a pair of prong-like contacts having sharp points adapted to pierce a rug or the like, said plug contact members being insulated for a substantial distance from the bases thereof, the outer ends of the insulation being chamfered to a thin edge, the end portions of said plug contact members projecting from the insulation to engage with the contacts of said socket.

1,666,730. METHOD OF PACKING ASPHALT. FRED BREEZE, Jr., Wyoming, Ohio, assignor, by mesne assignments, to The Flintkote Company, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 5, 1923. Serial No. 630,170. 1 Claim. (Cl. 23—239.)

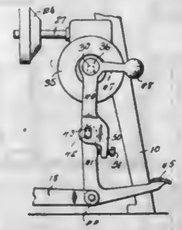


A method of preparing asphalt for shipment which consists in coating the walls of a mold with a lubricating surface, pouring into the mold melted asphalt, allowing the block to solidify, removing the molded asphalt block from the mold, and inserting the molded block in a fiber container of such size as will snugly retain the block wherein the lubricant which the side walls of the molded block have picked up from the walls of the mold will prevent the walls of the block from adhering to the walls of the container.

1,666,731. KNOB MOUNTING. HARLEY BROOMHALL, Shelby, Ohio, assignor to The Shelby Metal Products Company, Shelby, Ohio, a Corporation of Ohio. Filed Apr. 16, 1926. Serial No. 102,456. 1 Claim. (Cl. 292—356.)

An escutcheon plate and knob assembly, comprising a plate formed with an opening, a ring member having an enlarged circular flange to overlie the plate and a reduced circular flange to fit within said opening, the reduced circular flange being of such dimension as to permit it to be beaded over the inner side of the escutcheon plate, a knob, a washer formed with a non-circular opening and having integral prongs for connecting the washer to the knob, the diameter of said washer corresponding to the enlarged circular flange of the ring to permit the washer to be inserted within said flange, with the flange of a length to be beaded over to hold the washer against other than rotative movement with respect to the rim.

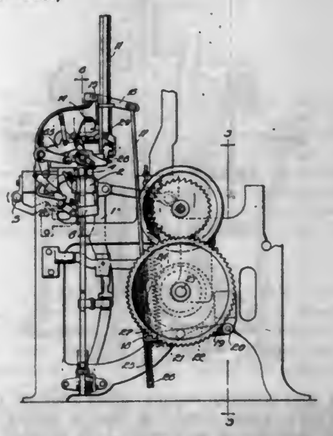
1,666,732. AUTOMATIC STAYBOLT THREADING MACHINE. JOHN P. BROPHY, Cleveland Heights, Ohio, assignor to The Cleveland Automatic Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 8, 1923. Serial No. 617,721. 21 Claims. (Cl. 10—92.)



6. In a machine of the character described, the combination of a bed plate, a drive shaft journaled therein, opposed thread cutting dies reciprocably mounted on said bed plate, a lead screw actuated from said shaft, means for intermittently connecting the lead screw with the dies to cause them to approach one another, means operated from said shaft for retracting said dies, means for intermittently feeding blanks between said dies, and means for gripping the blanks intermediate their ends during the approach of said dies.

13. In a machine of the character described, the combination of a reciprocably mounted slide, a pair of jaws carried thereby, means for advancing said slide while maintaining the jaws in open condition, and means cooperating with said first named means for closing said jaws when the slide has been advanced, said slide advancing means being provided with loose play at the end of its forward stroke.

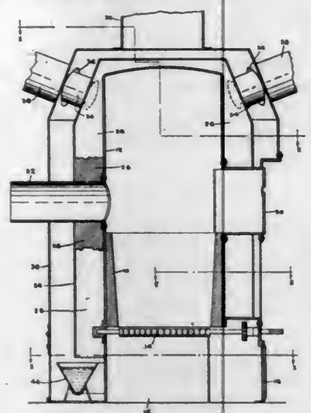
1,666,733. PROCESS OF WASHING SALTS. GEORGE B. BURNHAM, Reno, Nev., assignor to Burnham Chemical Company, Reno, Nev., a Corporation of Nevada. Filed Dec. 19, 1925. Serial No. 76,408. 8 Claims. (Cl. 23—41.)



1. The process of separating borax from a mixture of salts containing the same and salts of greater solubility which comprises flowing the mixture in one direction and washing the mixture with a liquid flowing in the opposite direction.

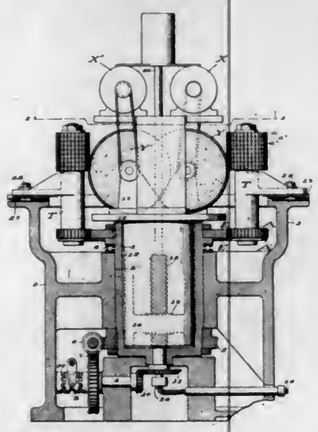
1,666,734. PRESS. ALBERT B. CLISSON, Syracuse, N. Y., assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Mar. 25, 1924. Serial No. 701,652. 14 Claims. (Cl. 68—9.)

1. A power pressing machine comprising in combination, a frame, cooperating pressing jaws carried thereon, means to bring the jaw into contact, a toggle linkage connected with one pressing jaw and pivoted on the frame, a lever arm integral with the toggle linkage and projecting forwardly from that toggle link which is pivoted on the frame, another toggle linkage carried on the forward end of the lever arm and extending substantially vertical therefrom and adapted to straighten and move into braced position when the jaws are brought into contact, and motor operated means connected with the upper end of the last named toggle linkage to exert a thrust thereon to move the lever arm to compress the said contacting jaws.



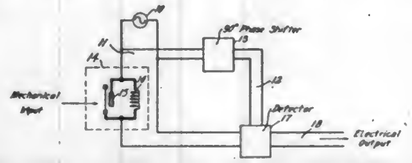
1,666,735. TEXTILE APPARATUS. HOWARD D. COLMAN, Rockford, Ill., assignor, by mesne assignments, to Barber-Colman Company, Rockford, Ill., a Corporation of Illinois (1922). Filed June 7, 1920, Serial No. 386,948. Renewed Sept. 19, 1927. 28 Claims. (Cl. 139—243.)

1. The combination with means for supporting a bobbin having a longitudinal groove in its tip, the end of the thread on the bobbin being coiled on the tip, of



a hook arranged to be reciprocated longitudinally of the tip to enter said groove and withdraw said coil from the tip.

1,666,736. HOT-AIR FURNACE. FRANK A. CONRAD, St. Paul, Minn. Filed May 29, 1924. Serial No. 716,820. 3 Claims. (Cl. 126—99.)



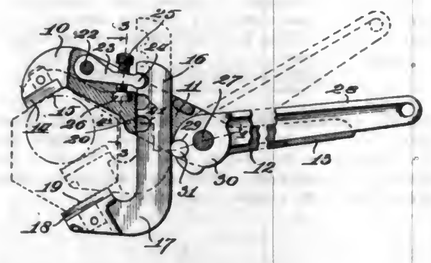
1. In a hot air furnace, the combination of a plurality of hot air pipes leading therefrom, means for supplying cold air to the furnace to be heated thereby, and a plurality of short pipe sections smaller than said hot air pipes and corresponding in number thereto for conducting hot air supplied by the furnace into said pipes respectively, said pipe sections being so arranged that some of the cold air entering the furnace may pass outside of said sections directly into said pipes to equally distribute the amount of hot air delivered by all of said pipes for varying directions of the wind.

1,666,737. GEAR GRINDER. ADOLPH L. DE LEEUW, Plainfield, N. J., assignor of one-half to Albert F. Nathan, New York, N. Y. Filed Mar. 23, 1926. Serial No. 96,706. 13 Claims. (Cl. 51—52.)

1. A gear-grinding method which consists in rotating an abrasive wheel formed so that a section of its periphery corresponds accurately to a selected tooth-contour; and effecting a relative roll between said peripheral section and a gear-blank progressively along a helical path of closely adjacent convolutions coincident in plan with the pitch-circle of said peripheral section; the radii of the pitch-circles of said section and of said gear-blank respectively having rational values but being in a relatively prime ratio whereby during each complete cycle of said relative roll the periphery of said wheel will enter and develop the contour of a different tooth-space of said gear-blank.

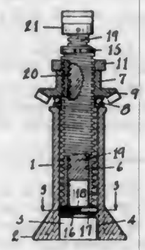
1,666,738. TRANSMISSION CIRCUIT. RALPH V. L. HARTLEY, South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 29, 1924. Serial No. 734,861. 22 Claims. (Cl. 179—171.)

1. The method of converting a mechanical wave into an electrical wave which comprises modulating the phase of a carrier wave in accordance with said mechanical wave, and producing the desired wave by beating together the resulting modulated wave and a carrier wave substantially in phase quadrature with said first-mentioned carrier wave.



1,666,739. MCLEOD-TYPE PRESSURE GAUGE. CARL S. HORNBERGER, Chicago, Ill., assignor to Central Scientific Company, Chicago, Ill., a Corporation of Illinois. Filed May 4, 1927. Serial No. 188,722. 2 Claims. (Cl. 73—31.)

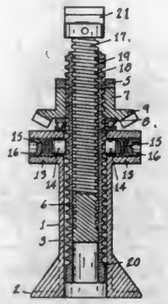
1. In a device of the class described, the combination of a barometric tube, a cistern connected with the tube and including an elongated barrel for liquid, an elongated plunger mounted to reciprocate in the barrel to alternately displace and be displaced by the liquid, said plunger having a bore so presented to the liquid as to trap air therein and form an air cushion, and a threaded connection between the plunger and cistern to permit adjustment.



1,666,740. WRENCH. HANS K. HYRUP, Los Angeles, Calif. Filed Sept. 16, 1925. Serial No. 56,711. 3 Claims. (Cl. 81—151.)

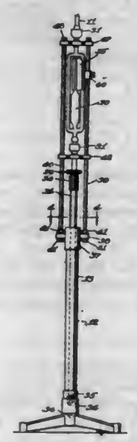
1. In a wrench, a handle, a jaw pivotally connected thereto, which jaw is provided with an opening, a substantially L-shaped jaw having one of its legs extending through the opening in the other jaw, the leg of said L-shaped jaw that projects through said opening being provided in its front face with a series of notches, a member pivotally and adjustably mounted upon the jaw that is pivoted to the handle for engagement in

the notches in the leg of said L-shaped jaw and a member carried by the pivoted end of the handle for engaging the L-shaped jaw and locking the same to the jaw that is carried by the jaw to which said handle is pivoted.



1,666,741. LIFTING JACK. ALFRED H. JOHNSON, Niles, Mich., assignor to National Standard Company, Niles, Mich. Filed Mar. 22, 1926. Serial No. 96,555. 2 Claims. (Cl. 254—102.)

1. In a lifting jack, the combination of a standard having a shallow longitudinal bore with a longitudinal groove having beveled edges opening thereto, a nut mounted on said standard, means for driving said nut, a tubular lifting member disposed in said standard and externally threaded to coact with said nut, means for limiting the longitudinal travel of said lifting member within said standard, a spring pressed pin disposed radially of said lifting member to coact with said groove whereby the lifting member is normally held against rotation during the longitudinal travel thereof and is permitted to rotate at the ends of its travel, and a second lifting member arranged in said tubular lifting member and having threaded engagement therewith and having a work engaging head at its upper end.

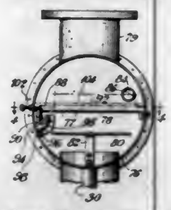


1,666,742. LIFTING JACK. ALFRED H. JOHNSON, Niles, Mich., assignor to National Standard Company, Niles, Mich. Filed Mar. 22, 1926. Serial No. 96,556. 3 Claims. (Cl. 254—102.)

1. In a lifting jack, a standard having a longitudinal bore, said standard being provided with a friction shoe holder opening to said bore, a nut rotatably mounted on the top of said standard, means for driving said nut, a tubular cylindrical lifting member disposed in said standard and having an external unbroken thread coacting with said nut, said lifting member being provided with means limiting its travel, a spring pressed friction shoe in said holder coacting with the cylindrical threaded surface of said lifting member and radially disposed

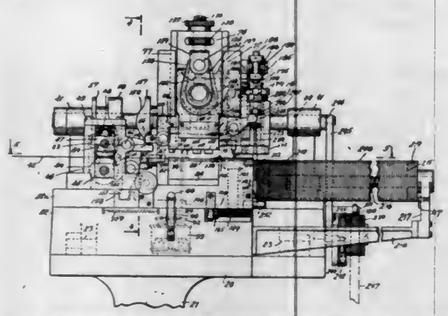
relative thereto, and a second lifting member threaded into said tubular lifting member and provided with a work engaging head.

1,666,743. McLEOD-TYPE PRESSURE GAUGE. PAUL E. KLOPSTEG, Chicago, Ill., assignor to Central Scientific Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 30, 1925. Serial No. 78,334. 5 Claims. (Cl. 73—31.)



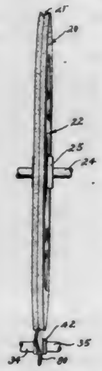
1. In a McLeod gauge, a measuring head including a main tube and a by-path tube forming a loop, a bulb connected with the loop at the bottom and extending upwardly therein, a capillary tube connected at its lower end with the bulb and closed at its upper end, the by-path tube having a capillary section beginning at the level of the bottom of the capillary tube and extending parallel thereto, the main tube being extended beyond the loop.

1,666,744. GAS-ABSORPTION APPARATUS. WILBUR G. LAIRD, New York, N. Y., assignor to Henry L. Doherty, New York, N. Y. Original application filed June 24, 1919, Serial No. 306,391. Divided and this application filed Nov. 3, 1920. Serial No. 421,442. 6 Claims. (Cl. 261—113.)



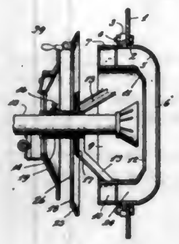
1. An apparatus for absorbing gas under pressure in liquids which comprises a horizontal cylindrical container, a perforated substantially horizontal partition in said cylindrical container, means for uniformly feeding liquid at one edge of said partition, means for uniformly re-

moving the liquid from the other edge of the partition, means for introducing gas under the partition and re-



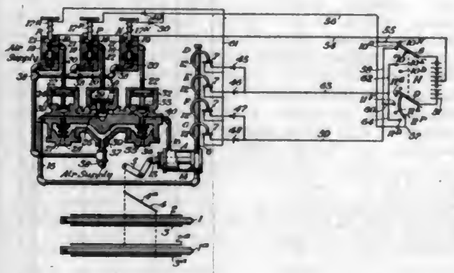
moving gas from above the partition and dams at right angles to the axis of the container dividing the surface of the partition into sections.

1,666,745. MESH MACHINE. FRED HARRIS LYNDS, North Attleboro, Mass., assignor to Whiting & Davis Company, a Corporation of Massachusetts. Filed Aug. 27, 1926. Serial No. 131,874. 47 Claims. (Cl. 140—3.)



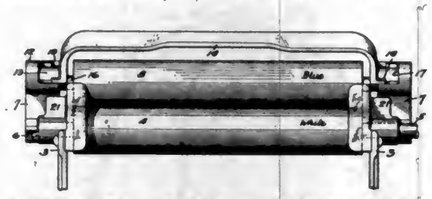
1. A machine for the manufacture of link-mesh fabric, which comprises the combination of a support for a piece of mesh, tools for incorporating links in the piece of mesh, means for forming links from blank material and delivering these links to the tools, and power-driven mechanism for giving the tools and the piece of mesh a relative movement to present successive portions of the mesh to the tools and for operating the tools and the link-forming means.

1,666,746. BEVEL-EDGING MACHINE. ALBERT E. MAYNARD, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed May 28, 1924. Serial No. 716,423. 5 Claims. (Cl. 51—101.)



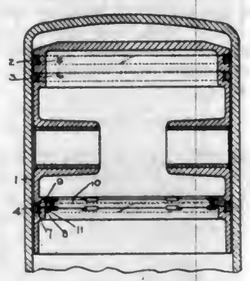
1. In a lens edging machine, a grindstone shaft, an annular grindstone ring having a groove in its grinding face, lens clamps holding a lens with its edge extending into the groove in the grindstone, means for rotating the shaft, means for rotating the lens clamps, and a flexible member connecting the shaft and the grindstone annular ring whereby the engagement of the edge of the lens in the groove in the grindstone as it rotates therein will bend the flexible member to permit the grindstone to adjust itself to the change of position caused by the change of plane of the point of contact of the edge of the lens as it rotates.

1,666,747. LIQUID-FUEL-BURNING FURNACE. JAMES MCDONALD, New York, N. Y., assignor to White Fuel Oil Engineering Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 27, 1923. Serial No. 665,047. 22 Claims. (Cl. 158—1.5.)



1. A burner apparatus for liquid fuel furnaces having a pair of air supply tubes, one of said tubes being housed within the other to provide an air passage between the two, and an annular plate movable axially of said tubes to approach and recede from the outer end of the space between the tubes whereby to regulate the flow of air therethrough said annular plate having a central clearance to expose the opening through the inner tube.

1,666,748. MOTOR-CONTROLLING APPARATUS. JOSEPH K. MICKLEY, Western Springs, Ill., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Mar. 26, 1927. Serial No. 178,682. 12 Claims. (Cl. 303—20.)

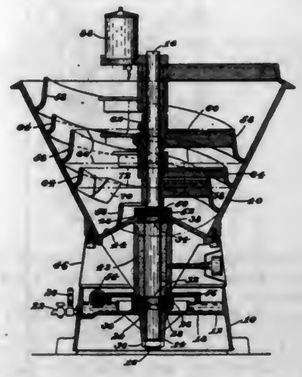


2. In combination, a fluid pressure motor, a source of current, a magnet for controlling the fluid pressure supplied to said motor and having one terminal connected with an intermediate point of the source, two contacts responsive to the fluid pressure in said motor, and manually operable means for at times connecting one terminal of the source with the free terminal of the magnet through a first asymmetric unit and one said contact and for at other times connecting the other terminal of the source with such free terminal of the magnet through a second asymmetric unit and the other said contact.

1,666,749. WRINGER. FRANK B. MOREHOUSE and WILLIAM H. KLEINHAMMER, San Francisco, Calif., assignors, by direct and mesne assignments, to Tramway Mfg. Co., a Corporation of California. Filed Oct. 30, 1923. Serial No. 671,731. 5 Claims. (Cl. 68—32.)

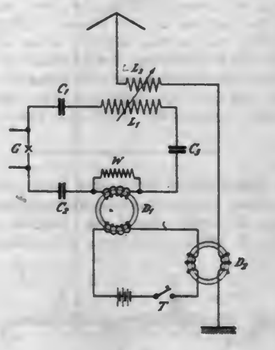
1. In a wringer, a pair of movable bearings each having a lateral aperture therein, a release member, trunnions on said release member journalled in said bearings, each of said trunnions having a bearing therein opening laterally on the face of the trunnions and adapted to register with said aperture, a roll, and trunnions on the roll seated in the bearings in the trunnions of the release member.

1,666,750. PISTON RING. ELDREDGE H. PACKER, San Francisco, Calif. Filed Nov. 3, 1926. Serial No. 145,923. 6 Claims. (Cl. 74—109.)



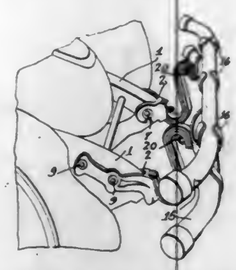
1. The combination with a cylinder and a piston operating in the cylinder, the piston being provided with a piston ring groove, of a piston ring mounted in the groove, a resilient member mounted interiorly of the piston, projections extending loosely through said openings and engaging the upper side and back of the piston ring, which projections are forced outward by said resilient member and means providing for the downward as well as outward movement of said projections and the piston ring.

1,666,751. BOLT GUIDE. STUART W. PARSONS, New Britain, Conn., assignor to The Stanley Works, New Britain, Conn., a Corporation of Connecticut. Filed Feb. 2, 1926. Serial No. 85,552. 3 Claims. (Cl. 292—337.)



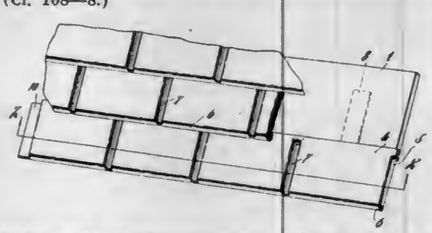
1. A staple for sliding bolts formed of sheet metal and having a base with a slit, a single ear extending from each end of said base, and an arch arising from and formed integrally with the side edges of said base; one of said ears being integral with the metal of the base to one side of said slit, and the other ear being integral with the metal of the base to the other side of said slit each of said ears being of substantially the same width as the staple and extending longitudinally of the base.

1,666,752. FORMING MACHINE. GUNTHER H. PETRI, Boston, Mass. Filed Oct. 12, 1922. Serial No. 594,065. 5 Claims. (Cl. 107—9.)



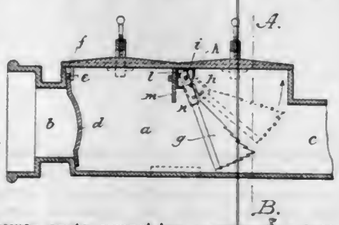
1. A forming machine for plastic material comprising a rotatable conical molding table; a vertical standard extending upward therein; dough races of different sizes supported on said standard, extending spirally over said table, adapted to engage different sized masses of plastic material, whereby the table works on different sizes simultaneously; and means for rotating said table about said standard in a direction crossing the races.

1,666,753. HIGH-FREQUENCY TELEGRAPHING APPARATUS. LEO PUNGS and ROBERT HERZOG, Berlin, Germany, assignors to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. Filed Dec. 28, 1925, Serial No. 78,035, and in Germany Feb. 13, 1925. 2 Claims. (Cl. 250—19.)



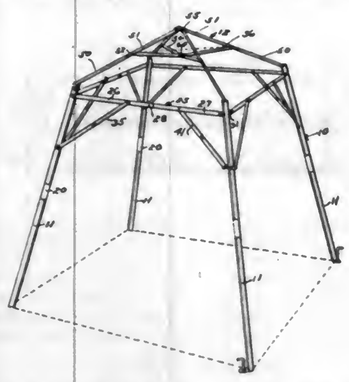
1. In a high frequency signaling system, the combination of a high frequency generator, a radiating antenna system, one or more intermediate circuits arranged between said generator and said radiating system, iron chokes placed in said radiating circuit and in a preceding intermediate circuit and controlled simultaneously by one and the same controlling current, and a resistance connected in parallel with the choke located in said intermediate preceding circuit.

1,666,754. AUTOMOBILE BUMPER. WILLIAM RAHE, Cincinnati, Ohio. Filed July 21, 1926. Serial No. 123,995. 9 Claims. (Cl. 293—55.)



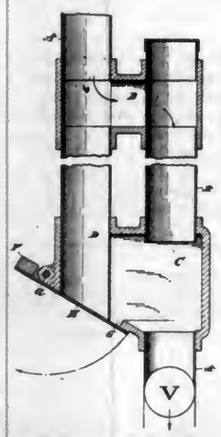
1. In combination in a double bar bumper, double bars and clamps for engaging the double bars, a resilient member extending in alignment with the bars between the bars engaging said clamps, brackets adjustably secured to an automobile frame, S-shaped springs composed of pluralities of S-shaped leaves secured to said brackets, one spring to one bracket, and adjustable connections between the S-shaped springs and the resilient member.

1,666,755. ROOFING. CHESTER E. BAHA, Brookline, Mass., and FREDERICK C. OVERBURY, Hillsdale, N. J. Filed Oct. 20, 1923. Serial No. 669,698. 3 Claims. (Cl. 108—8.)



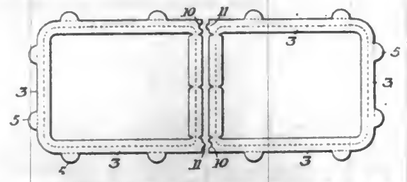
1. A roofing element comprising a fibrous sheet saturated and coated with asphaltic material and provided with cut-outs at intervals along its lower edge extending up beyond the portion of the element which is exposed to the weather, and a thin metallic sheet secured to the fibrous sheet and overlying the portion of the element exposed to the weather but not extending up to the upper ends of the cut-outs, the said metallic sheet being unbroken at the cut-outs but depressed into and bridging them.

1,666,756. CLEANSING BOX FOR USE IN SEWERAGE PIPES. CARL SASS, Hamburg-Harvestehude, Germany. Filed Aug. 28, 1926, Serial No. 132,253, and in Germany May 7, 1925. 2 Claims. (Cl. 182—30.)



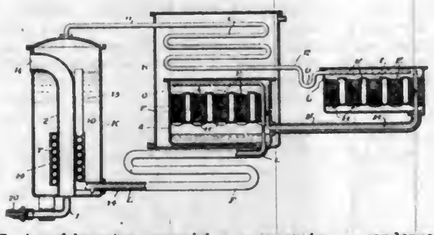
1. A sewer grate comprising a supporting bolt, a plurality of juxtaposed, parallel sector-shaped rods having toothed lower ends, a means for suspending the upper ends of said rods rotatably independently and exchangeably from said common support.

1,666,757. COLLAPSIBLE TENT. HARRY F. SNYDER, Los Angeles, Calif., assignor of one-half to Mary E. Rice. Filed May 6, 1925. Serial No. 28,325. 7 Claims. (Cl. 135—4.)



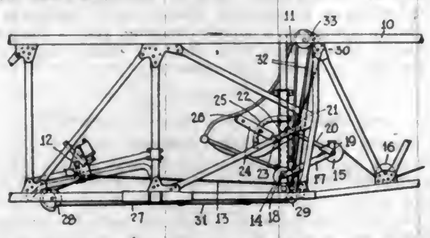
1. In a folding frame for collapsible tents, the combination with corner posts, cross members and folding rafters, each of said rafters being pivotally connected at its lower end with the upper end of one of the posts and adapted to fold parallel therewith, and attached at the other end to a center block, said rafters each composed of two sections pivotally connected together, said rafters being adapted to collapse upon moving their pivotal connection downwardly.

1,666,758. SELF-REGULATING GRAVITY DISCHARGE TERMINAL. JOSEPH J. STOETZEL, New York, N. Y., assignor to G. & G. Atlas Systems, Inc., a Corporation of New York. Filed May 23, 1924. Serial No. 715,300. 2 Claims. (Cl. 243—23.)



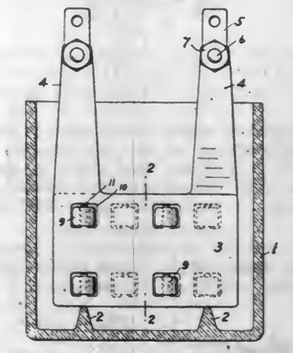
1. In a carrier delivery device for pneumatic dispatch systems, a transit tube, an exhaust tube having its receiving end portion mounted in adjacent and parallel relation to the delivery end portion of the transit tube, a cross-tube connection between the end of the exhaust tube and a point in the transit tube spaced from the end thereof, a gate hinged to the delivery end of the transit tube, a hinged connection of the gate with the tube being located at the edge of the transit tube remote from the exhaust tube, the hinged end of the gate being extended and provided with a weight normally tending to close the gate, said exhaust tube being provided with an air inlet port adjacent the delivery end of the transit tube, said gate member being extended at its free end to close the inlet port in the exhaust tube when in closing relation to the end of the transit tube.

1,666,759. HOT TOP. ERNEST J. TURNER, Pittsburgh, Pa. Filed Mar. 2, 1926. Serial No. 91,782. 5 Claims. (Cl. 22—147.)



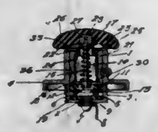
1. As an article of manufacture, a hollow hot top having continuous sides with supporting means on some of its sides terminating above its lower edge, one of its sides being free of supporting means to permit two such hot tops to be placed in a mold with their adjacent sides in contact with each other.

1,666,760. REFRIGERATOR. BALTZAR CARL VON PLATEN and CARL GEORG MUNTERS, Stockholm, Sweden, assignors to Electrolux Servel Corporation, New York, N. Y., a Corporation of Delaware. Original application filed Aug. 4, 1923, Serial No. 655,768. Divided and this application filed Apr. 1, 1926. Serial No. 98,951. 9 Claims. (Cl. 62—119.)



7. A refrigerator comprising a generator, a condenser, an evaporator, an absorber, a gas burner, a liquid containing member, means to connect the upper part of said member with the upper part of the generator, means to connect said member with the absorber, a conduit connecting the generator and the absorber independently of said member, said member being so arranged with respect to the generator and the burner that there is direct transmission of heat through metal from the burner gases to liquid within said member.

1,666,761. COMBINATION SEAT AND CONTROL MECHANISM FOR AIRCRAFT. WILLIAM WAIT, Jr., Garden City, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc., a Corporation of New York. Filed Apr. 7, 1927. Serial No. 181,745. 12 Claims. (Cl. 244—29.)

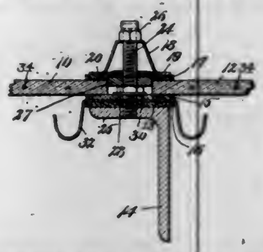


10. The combination, in an aeroplane, of a vertically adjustable seat, a control surface operating device adjustable toward and away from said seat, a connection extending between said seat and said device whereby the adjustment of the one is made responsive to the adjustment of the other, and means associated with said connection for adjusting said device relatively to said seat without a corresponding adjustment of the latter.

1,666,762. SEPARATOR FOR THE ELECTRODES OF ELECTROLYTIC CELLS. JOSEPH LESTER WOODBRIDGE, Philadelphia, Pa. Filed July 12, 1927. Serial No. 205,103. 5 Claims. (Cl. 136—151.)

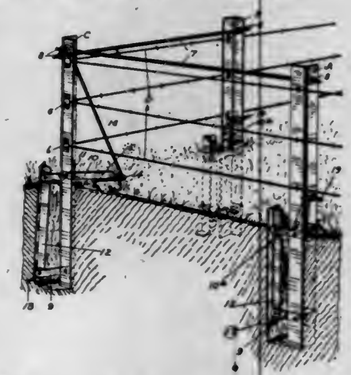
1. In combination, an electrode in the form of a metallic sheet, a separator of annular form located in an opening provided in the sheet with its axis substantially in the plane of the sheet, and a tongue attached to the sheet and threading the opening in the separator.

1,666,763. SWITCH. GEORGE A. YANOCHOWSKI, La Grange, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed May 31, 1924. Serial No. 716,903. 13 Claims. (Cl. 200—159.)



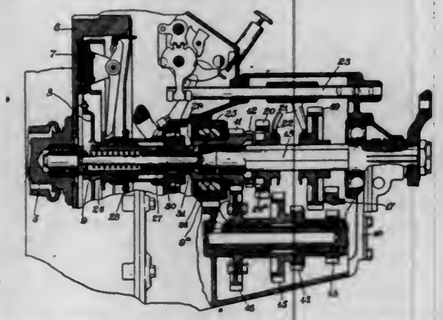
1. A device of the class described including a casing, a fixed contact element secured in said casing but insulated therefrom, an inverted cup-shaped member secured in said casing, a movable contact element supported in said cup-shaped member in operative association with said fixed contact element, a control member adapted to move said movable contact when pressure is applied thereto, means provided with a flange for fulcruming said means in said cup-shaped member for effecting rectilinear movement always in the same path of said movable contact element should said control member be either tilted or moved perpendicularly when pressure is applied thereto to cause the same to contact with said fixed contact element to close a circuit through said device, and means comprising a coiled spring adapted to maintain said movable contact in association with said flanged means.

1,666,764. GLAZING CONSTRUCTION. JAMES HOWARD YOUNG, Pittsburgh, and WESLEY H. MILLER, Wilkinsburg, Pa., assignors to H. H. Robertson Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Sept. 24, 1924. Serial No. 739,643. 5 Claims. (Cl. 108—16.)



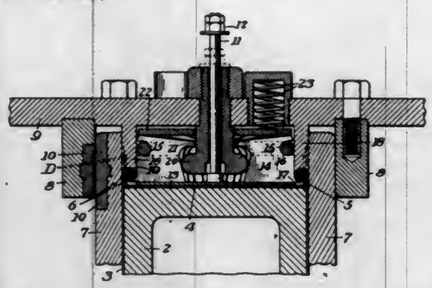
1. In a glazing construction, in combination, a supporting member, a stud erected thereon, a gutter member fitted upon said stud, an insulating member interposed between said gutter member and said supporting member, a waterproof cushioning member upon said gutter member,

glass members resting on said cushioning member and spaced apart, a cap member mounted on said stud, a cushion member between said cap member and said glass members and covering the space between the latter, means on said stud for pressing said cap member toward



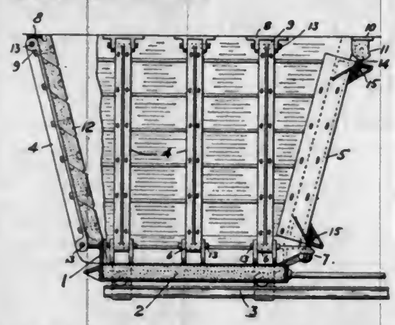
said glass members, means on said stud cooperating with the cushioning member for the glass members to form a fluid tight joint with said stud, and a member on said stud in the space between said glass members to be engaged thereby for spacing said glass members.

1,666,765. FENCE CONSTRUCTION. FREDERICK A. ZIEBARTH, Delano, Minn. Filed Mar. 5, 1927. Serial No. 173,169. 6 Claims. (Cl. 189—31.)



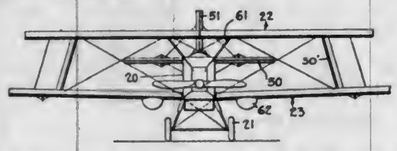
1. In combination with a fence post, an anchor plate arranged substantially parallel with the lower end of the post and connected therewith by links, and lever acting means for forcibly spreading the anchor plate away from the post.

1,666,766. SPEED EQUALIZING MEANS FOR MOTOR-VEHICLE TRANSMISSION SHAFTS. JAMES S. ALSPAUGH, Columbus, Ohio. Filed Dec. 5, 1925. Serial No. 73,486. 7 Claims. (Cl. 74—58.)



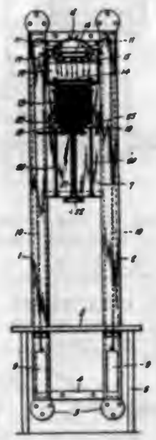
1. In means of the kind described, the combination of a power shaft, a clutch shaft, a speed changing gear shift mechanism of the sliding type including a sliding gear shaft and a clutching means between the sliding gear shaft and the clutch shaft in slipping relation to both shafts.

1,666,767. METHOD AND APPARATUS FOR MAKING FIBROUS CONTAINERS. JAMES E. ANNEN, Milwaukee, Wis., assignor to The National Paper Can Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed July 17, 1926. Serial No. 123,049. 9 Claims. (Cl. 93—55.)



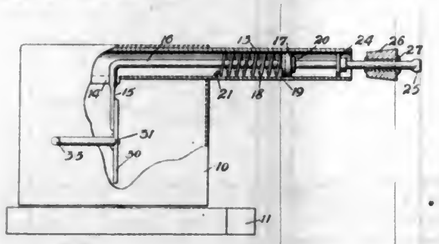
1. Apparatus for making fibrous containers including means for curling together the edge portions of adjacent container parts, a collapsible guide adapted to lie between the roll of the joint and container proper and direct the edges into the roll, and means for collapsing the guide.

1,666,768. ASH HOPPER FOR BOILERS. ROBERT H. BEAUMONT, Radnor, Pa., assignor to Beaumont Manufacturing Company, Philadelphia, Pa., a Corporation of New Jersey. Filed Jan. 2, 1924. Serial No. 683,859. 5 Claims. (Cl. 110—165.)



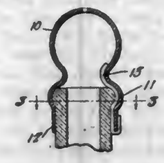
2. An ash hopper and gate structure comprising in combination a gate frame, cast iron hangers having hinged articulation with the gate frame, suspension supports having hinged articulation with the hangers, and a lining carried by the hangers.

1,666,769. AIRPLANE. REX B. BEISEL, Garden City, and WILLIAM L. GILMORE, Mineola, N. Y., assignors to Curtiss Aeroplane & Motor Company, Inc., a Corporation of New York. Filed Mar. 24, 1924. Serial No. 701,338. 9 Claims. (Cl. 244—12.)



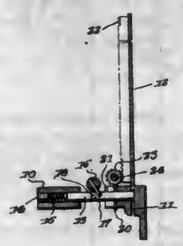
1. In an airplane, superposed supporting surfaces, each said supporting surface comprising a like number of panel sections, and each corresponding panel section being the same in surface shape and in dimensions whereby an interchange thereof will in no way alter the design of the airplane considered as a whole.

1,666,770. CAMERA-HOLDING STAND. WILLIAM BUBEN, St. Louis, Mo. Filed Jan. 21, 1927. Serial No. 162,519. 1 Claim. (Cl. 88—24.)



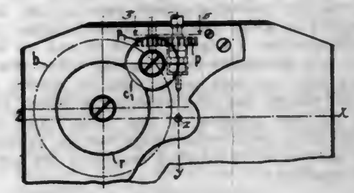
A device of the class described comprising an upright supporting frame including a pair of channel-shaped uprights, each having a guideway formed in its inner face, a supporting member vertically movable in the guideways, a pair of counter-balancing weights movable in the channels of said uprights, cables connecting the same with the supporting member, a casing carried by the supporting member, an enlarging and reducing camera associated with the casing, lamps in the casing, guiding rods carried by the supporting member, arms connected with the front of the camera and having parts engaging the guiding rods, a screw shaft carried by the supporting member, a handle on the shaft, a nut member engaging the shaft and connected with the front of the camera and a handle on the supporting member.

1,666,771. TOY GUN. JOSEPH H. BUHRIS, Ruffs Dale, Pa. Filed May 12, 1926. Serial No. 108,617. 3 Claims. (Cl. 46—46.)



1. In a device of the class described, a barrel, a plunger therein, a stem for the plunger alined with the axis of the barrel, a barrel closing element slidable on the stem, a spring for compression by the plunger when retracted and when the closing element engages the barrel, and a device on the stem of the plunger for striking and releasing the barrel closing element when the spring held plunger is released.

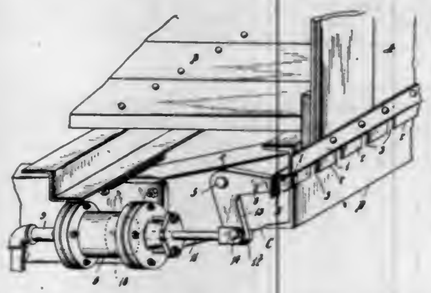
1,666,772. NIPPLE. THOMAS CAMPOBASSO and GERARD CAMPOBASSO, Barre, Vt. Filed Apr. 18, 1927. Serial No. 184,742. 1 Claim. (Cl. 128—252.)



An attachment for use upon nipples comprising a strip, said strip being adapted to conform to the configuration of the attaching portion of the nipple when applied and to slightly space the adjacent portion of the nipple from a bottle neck to relieve suction, and the outer end of the strip being bent upon itself to receive the peripheral edges of the nipple and adapted to lie flush with the outer side thereof to provide a convenient gripping portion when applied and removing the nipple.

1,666,773. WINDOW SHIELD. WALTER B. CLARK, Lincoln Park, Mich., assignor of one-half to I. D. Lawrence, Detroit, Mich. Filed June 30, 1927. Serial No. 202,588. 10 Claims. (Cl. 20—1.01.)

1. In a device of the character described, a vertically movable shield adapted to be normally positioned above a window opening, releasable means for retaining said shield in normal position, means for releasing said retaining means whereby said shield will move by gravity to close the window opening, a driven shaft and means operable by said shaft for elevating said shield from closed to normal position.



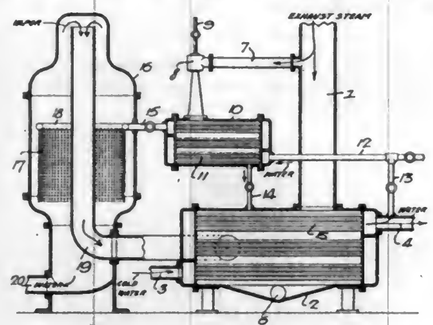
1,666,774. STEM WINDING MECHANISM FOR WATCHES. HENRI COLOMB, Tavannes, Switzerland. Filed Aug. 11, 1924, Serial No. 731,537, and in Switzerland Aug. 24, 1923. 2 Claims. (Cl. 58—59.)

1. In an oblong watch movement adapted to have the mechanism for supporting the hands located at the center thereof, a stem-winding and setting apparatus comprising a bottom plate coextensive with the movement, a bridge covering one end of the plate and extending past its shorter middle axis, a winding and setting stem the

axis of which coincides with the minor axis of said movement, a mainspring journalled between said bridge and plate, and a ratchet wheel on the outside of the bridge concentric with said spring for winding up said mainspring, the combination, with said above described apparatus, of a train of gearing from said stem-winding apparatus to said ratchet wheel comprising two gear wheels of relatively small diameter, at least one of which is outside the bridge and overlaps said barrel and both supported from said bridge; whereby said mainspring may be located in one end of said oblong movement and given a large diameter without touching the bearing stone or axis of said hand-supporting mechanism.

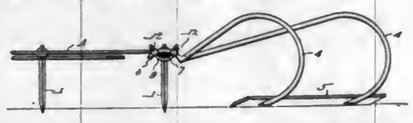
1,666,775. FLUID-PRESSURE LOCKING MEANS FOR CAR DOORS. MILTON A. CRAIG, RAPHA P. STEEN, and SANFORD A. LOGSDON, Lima, Ohio. Filed Mar. 10, 1927. Serial No. 174,372. 1 Claim. (Cl. 105—395.)

A device of the nature stated, comprising a plate adapted to be secured to a car door and having a depending notched flange, a latch member suitably pivoted and having angularly related arms, one of said arms adapted to engage in a notch in said flange, a fluid pressure cylinder, a piston in said cylinder, and a piston rod connected with said piston and operatively engaging the other arm of said latch member.



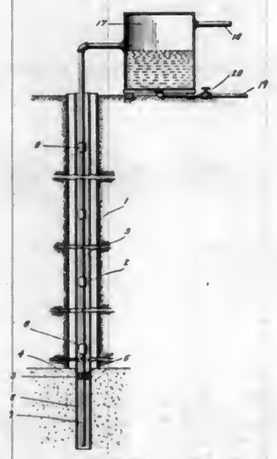
1,666,776. KEY HOLDER. BENJAMIN F. COPP, Albuquerque, N. Mex. Filed Feb. 28, 1927. Serial No. 171,617. 1 Claim. (Cl. 59—97.)

A key holder formed in a single piece of resilient material bent to provide side members and a connecting web constituting the back of a holder and constituting key retaining means, there being slots beyond the ends of the web, key engaging means upon one of the side members and normally yieldingly pressed against the opposed side member, a clip connected to one of the side members and detachably engaging the other side member, said clip and web cooperating to confine a key within the holder, the clip constituting means for preventing the side members of the holder from moving apart, the slots constituting means for the reception of the eye portion of an engaged key when the key is in confined position.



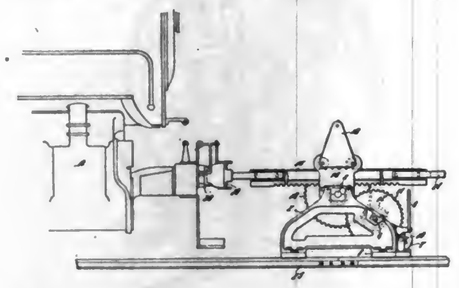
1,666,777. METHOD OF AND APPARATUS FOR EVAPORATING AND DISTILLING. JOHN S. FORBES, Philadelphia, Pa. Filed July 26, 1921. Serial No. 487,604. 8 Claims. (Cl. 203—5.)

2. The method which consists in continuously separating a current of exhaust steam into two portions of which one is condensed by cooling water; heating the second portion of such steam and utilizing the heated steam to increase the temperature of a portion of the



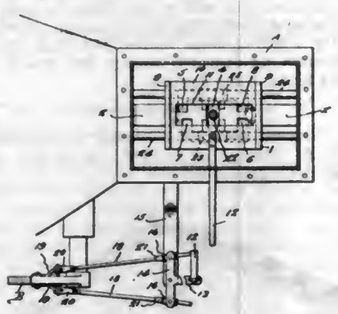
water used to condense the first portion of such steam; vaporizing the water so heated; and condensing the vaporized water.

1,666,778. HARROW ATTACHMENT. JAMES M. HARLAN, Dayton, Wash. Filed Jan. 25, 1927. Serial No. 163,473. 2 Claims. (Cl. 55—3.)



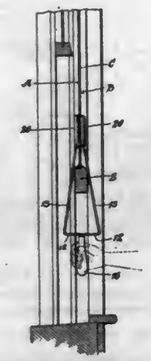
2. An attachment for harrows, including a pair of goosenecks, a bar connecting the goosenecks at their rear ends, the forward ends of said goosenecks curved in the arc of a circle and adapted to be located over a bar of the harrow, and coupling devices extending under the bar of the harrow and engaging the curved portions of the goosenecks at the front and rear of the bar.

1,666,779. METHOD OF FLOWING GAS WELLS. GEORGE C. HENCEROTH, Independence, Kans. Filed Oct. 28, 1922. Serial No. 597,559. 2 Claims. (Cl. 166—2.)



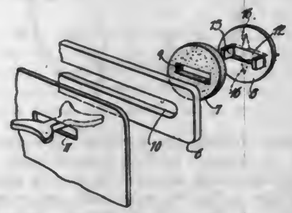
1. The method of flowing gas wells consisting of admitting gas and liquid to a tube at the bottom of a well whereby the liquid is elevated in the tube by pressure of the gas, trapping the gas and liquid at stepped elevations in the tube to form a broken column of the fluid with each trapped section of the column back-checked from the next lower section, and recurrently admitting charges of gas and water to the bottom of the tube under surge pressure of the gas, the incoming gas and the trapped gas combining at the successive elevations to step the column of fluid to delivery at the top of the tube.

1,666,780. LOCOMOTIVE MOVER. JAMES B. IRWIN, Denver, Colo. Filed Aug. 26, 1927. Serial No. 215,734. 8 Claims. (Cl. 104—162.)



1. A device of the class described comprising a supporting frame, means for clamping the same in position, a rack bar slidably supported by the frame, a shaft rotatably mounted in the frame, a rack engaging wheel thereon and engaging the bar, a motor on the frame, means for rotating the shaft from the motor and means for connecting the rack bar to an object to be moved.

1,666,781. TRANSMISSION. WALTER I. KASER, Baltic, Ohio, assignor of one-third to Thomas G. MacPherson and one-third to Warner E. Farver, Baltic, Ohio. Filed May 23, 1927. Serial No. 193,582. 2 Claims. (Cl. 74—83.)

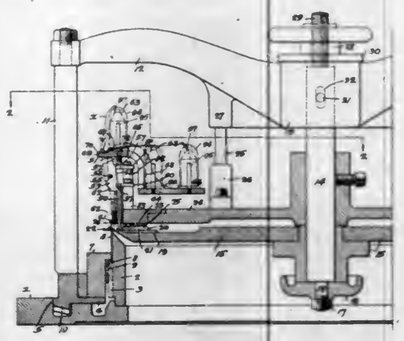


1. In combination with the transmission and clutch means of a motor vehicle, a member arranged in the transmission housing and having an opening therein through which the lower end of the shift lever passes, means for dividing the opening into neutral, low speed, second speed, high speed and reverse speed spaces, a plate slidably connected with the first plate and having an elongated opening therein through which the lower part of the shift lever passes so that the second plate will be moved by the shift lever when the same is shifted to its various positions and means for connecting the second plate with the clutch pedal to actuate the pedal by the movement of the plate.

1,666,782. WINDOW CLEANER. JOHN J. KILBRIDE, Scotch Plains, N. J. Filed Oct. 22, 1927. Serial No. 227,926. 3 Claims. (Cl. 15—220.)

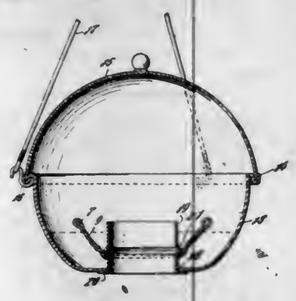
1. In a window cleaning device, a member for supporting and holding a pair of strips of cleaning material in juxtaposition to the inner and outer surfaces of a window pane for simultaneous wiping movement over said surfaces, comprising a single length of material bent and formed to provide an integral stem and a pair of offset arms having integral rectangular parallel frames at the terminals thereof over which the strips of material are arranged, one lead of each terminal arm being in engagement with the offset arm for clamping the material in place.

1,666,783. LOCKING DEVICE. JOHN KRIES, Brooklyn, N. Y. Filed Apr. 28, 1927. Serial No. 187,383. 2 Claims. (Cl. 40—125.)



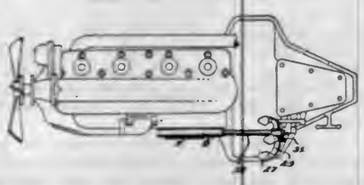
1. The combination with a plurality of members having openings therein and arranged to be secured together, of a locking device comprising a locking member, a locking washer, tongues on the washer arranged to enter the opening in one of the members to be secured and a resilient pad interposed between said member and said washer whereby the locking member will be resiliently maintained in its locking position.

1,666,784. VERTICAL STRIPER FOR WIDE-CIRCULAR-RIB-KNITTING MACHINES. WALTER LARKIN, Norristown, Pa., assignor to Fidelity Machine Company, Wilmington, Del., a Corporation of Delaware. Filed May 28, 1927. Serial No. 194,956. 13 Claims. (Cl. 66—135.)



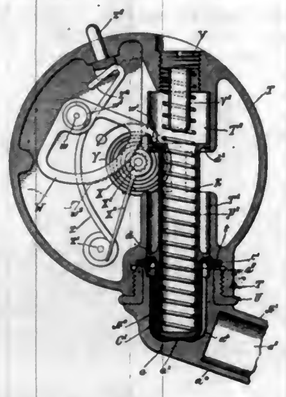
1. In combination with a wide circular rib knitting machine having a needle cylinder and needles operatively mounted therein, a needle dial and needles operatively mounted therein, a cylinder cam ring for operating the cylinder needles, and a dial cap having cams for operating the dial needles; a cylindrical plaiting finger carrier coaxially aligned with said needle cylinder;

means for rigidly securing said carrier to said needle dial; plaiting fingers pivotally mounted in said carrier and aligned with certain of said cylinder needles, and



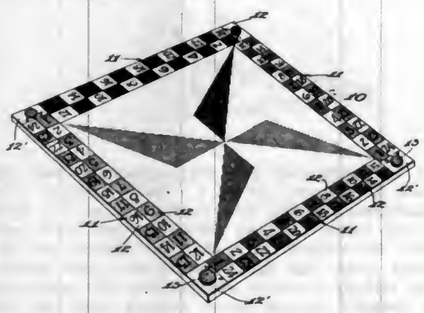
means for moving one end of each finger around the needle with which it is aligned, for carrying a plaiting thread around said needle.

1,666,785. FLYCATCHER. CARL MARCH, Chicago, Ill. Filed Apr. 9, 1927. Serial No. 182,457. 2 Claims. (Cl. 43—122.)



1. An insect trap of the character described comprising a body, a channel portion formed with the upper edge thereof and being disposed in spaced relation from the body proper, a top for said body and being received in the channel of the channel portion, hooked members reecived in the space between the channel portion and body insect entrance means arranged in the bottom of said body and flexible elements secured to the hook members for supporting the trap in depending position.

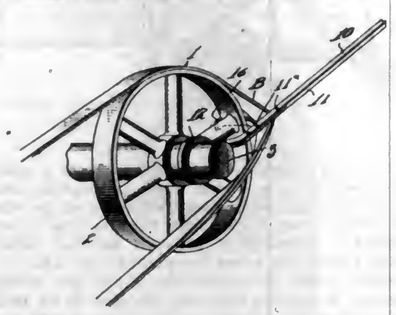
1,666,786. LOCK. OTTO ADOLPH MAY, Albuquerque, N. Mex. Filed Sept. 12, 1927. Serial No. 219,140. 5 Claims. (Cl. 70—126.)



2. In an automobile lever lock, a bracket for attachment to part of an automobile engine casing, a casing attached to the bracket and adjustable about a horizontal axis, a locking rod carried by the casing and longitudinally adjustable therefrom, and a U-shaped shackle carried by the locking rod for engagement with the control levers of the automobile to lock the former in set position.

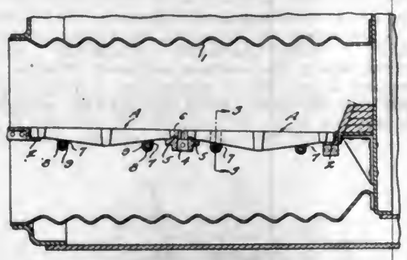
1,666,787. PNEUMATIC-PRESSURE GAUGE. ANDRÉ JULES MICHELIN, Paris, France, assignor to Michelin et Cie., Clermont-Ferrand, France, a Corporation of France. Filed Mar. 3, 1927, Serial No. 172,365, and in Belgium Mar. 5, 1926. 2 Claims. (Cl. 73—111.)

1. A pressure gauge comprising a pressure chamber provided with an air duct opening into said chamber, a piston slidable freely in said chamber, a soft rubber sack loosely fitting said piston, and having its outer edges secured to said chamber, the said sack forming a flexible air tight closure for the open end of said chamber, a balance spring opposing the outward movement of said piston against the pressure of said chamber, said spring having one end bearing on said piston, and the other end bearing on said casing, means for adjusting the compression of said spring, a shaft journalled in said casing with its axis at right angles to the axis of said piston, an indicator needle mounted on said shaft, a coil spring engaging said shaft and normally returning said needle to the zero position, and means controlled by said piston for rotating said shaft against the action of said coil spring, with a spring brake normally holding said shaft against rotation by said coil spring, and means for releasing said brake, when desired.



1,666,788. GAME DEVICE. JOSEPH J. PALUMBO, Astoria, N. Y. Filed June 4, 1927. Serial No. 196,501. 3 Claims. (Cl. 273—134.)

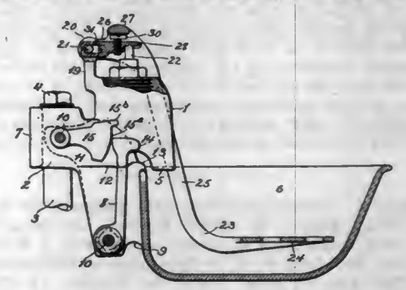
1. A game device comprising a game board having angular straight side edges, a course provided on the top of said game board along each side edge, a game piece movable over said course from a starting point to a finish



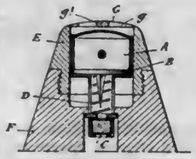
point, a pair of dice adapted to be rolled by the respective players, the lowest amount face up on one die being subtracted from the highest amount face up on the other to determine the distance which the game piece must be advanced, and a third die of a distinguishing color from said pair of dice and adapted to be rolled therewith, the amount face up being indicative of the distance which the game piece of the preceding player must retreat.

1,666,789. BELT-APPLYING TOOL. GEORGE W. POSANZ, Geneseo, Ill. Filed Feb. 21, 1927. Serial No. 170,026. 4 Claims. (Cl. 64—51.)

1. A tool of the class described comprising a lever having pulley shaft engaging means and a finger to engage a lug on said shaft, and an arm pivoted to said lever and having a rim engaging finger.



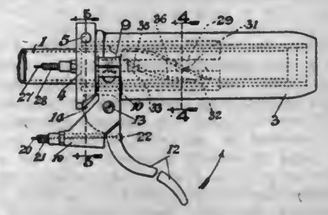
1,666,790. GRATE. JOHN H. PRIVOTT and BILL C. WILLIAMS, Norfolk, Va. Filed Oct. 7, 1927. Serial No. 224,654. 1 Claim. (Cl. 126—152.)



A grate of the class described comprising front and rear supporting members, grate bars having their ends resting upon said members, the bars at the sides of the grate having depending perforated ears, rods passing under the grate bars intermediate their ends with the ends of the rods passing through the perforations in the ears and means on the ends of the rods for holding the rods in place, the intermediate grate bars resting freely on the rods to permit expansion and contraction of the parts.

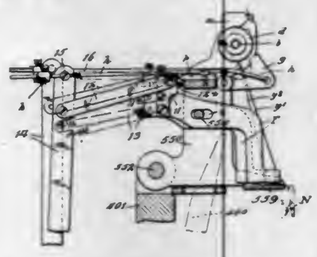
1,666,791. WATER-BOWL CONSTRUCTION FOR CATTLE. HUGO C. RASSMANN, Beaver Dam, Wis., assignor to F. Rassmann Manufacturing Company, Beaver Dam, Wis. Filed Feb. 14, 1927. Serial No. 168,218. 4 Claims. (Cl. 119—75.)

4. The combination with a valved fount and a bowl to be supported thereby, of a bifurcated bracket projecting upwardly from the fount, an animal operated lever having a part to be disposed in the bowl, arms on the upper portion of said lever, a cross bar intermediate of the arms on the lever, a pivot bolt passing through the bifurcated arm on the fount, and a member mounted on said pivot bolt and disposed between the stem of the valve of the valved fount and the cross bar of the animal operated lever, said member having an enlarged opening for the passage of the pivot bolt, whereby said member may be shifted out of operative relation to the valve stem.



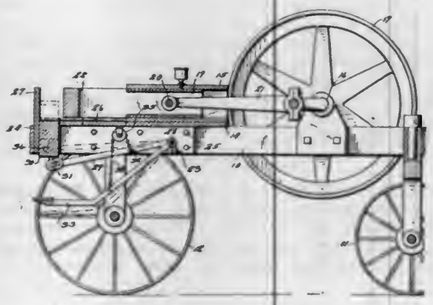
1,666,792. PERCUSSION FUSE. LÉON EMILE RÉMONDY, Paris, France. Filed July 5, 1927, Serial No. 203,612, and in France Oct. 8, 1926. 1 Claim. (Cl. 102—36.)

A protecting device preventing the accidental operation of sensitive percussion fuses operating by driving it or by driving in and inertia upon impact with obstacles accidentally encountered near the muzzle of the gun or along the path of the projectile, such as branches or other screens serving to conceal the gun, the stems of cereal crops, the branches of shrubs, etc. consisting in a perforated cap or closing disc (G) integral with the fuse body or mounted upon the latter, the orifices (g) formed in this cap permitting the free peneration of soft or fluid materials (ooze, soft earth, sand, water, etc.) while preventing the engagement of light or flexible branches and twigs which are struck transversely, the strength of the solid parts (g^1) between the orifices (g) of the cap being on the other hand sufficiently weak for the deformation or rupture of the end of the cap or of the closing disc to be effected upon impact with an obstacle offering some resistance.



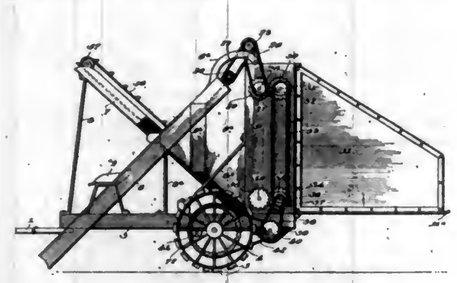
1,666,793. CONTROLLING MEANS OF VARIABLE-SPEED GEARING FOR MOTOR VEHICLES HAVING HANDLEBARS. ADOLPHUS SANGUINETI, Stockport, England. Filed Dec. 29, 1927, Serial No. 243,411, and in Great Britain Sept. 10, 1926. 5 Claims. (Cl. 74—82.)

1. A controlling means for non-continuous variable speed gearing of motor vehicles having handle bars and a drive transmission clutch, comprising a turnable handle



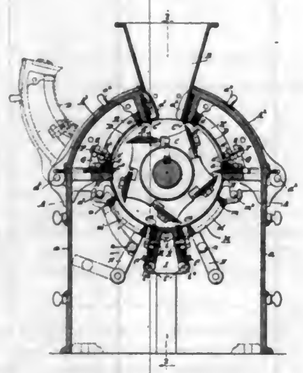
provided on the handle bar, an oscillatable transmission clutch lever mounted on the said handle, relatively stationary stop means mounted on the handle bar and adapted to co-operate with the transmission clutch lever to lock the handle against rotation when the transmission clutch lever is in its normal position, a pair of tractive members connected to the selector rod or its equivalent of the gear box to operate the selector rod or its equivalent in both directions, and means for simultaneously moving the said members in opposite directions by a turning movement of the said handle.

1,666,794. APPARATUS FOR AND METHOD OF KNITTING. ROBERT W. SCOTT, Babylon, and ALBERT E. PAGE, Brooklyn, N. Y., assignors to Scott & Williams Inc., New York, N. Y., a Corporation of Massachusetts. Filed Aug. 29, 1924. Serial No. 734,888. 11 Claims. (Cl. 66—137.)



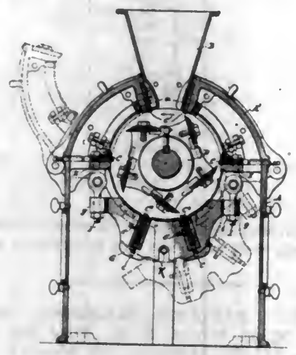
1. In a knitting machine, plating reversing mechanism comprising a plurality of yarn fingers adapted to separate their yarns in a horizontal plane by reciprocation toward and from the needles, in combination with a throatplate over which the horizontally separate yarns pass to the needles, said throatplate being adapted to give the yarns different elevations as they approach the needles.

1,666,795. FIREWOOD-SPLITTING MACHINE. WILLIAM R. SCHMIDT, Beemer, Nebr. Filed May 17, 1927. Serial No. 192,094. 5 Claims. (Cl. 144—193.)



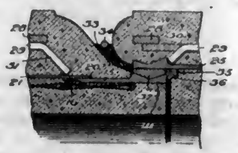
1. A machine for splitting wood comprising a supporting frame, a longitudinally extending tubular guide housing mounted upon the frame, a slide fitting said guide housing and reciprocating therein and carrying an axe, a crank shaft mounted upon the supporting frame and operatively connected to said slide, a pair of heavy and relatively large fly wheels mounted upon the shaft, a pulley mounted upon the shaft, a belt engaging the pulley whereby power may be transmitted to the shaft, a frame adjustable upon the main frame longitudinally thereof and carrying a back stop, and a supporting platform mounted upon said last named frame in front of the back stop.

1,666,796. CORN-HUSKING MACHINE. HARRY V. SHULER, Spencer, Nebr. Filed Apr. 25, 1927. Serial No. 186,436. 10 Claims. (Cl. 56—104.)



1. In a corn stripping and husking machine, a wheeled vehicle adapted to be drawn along by traction means, power transmitting means connected to one of the wheels of the vehicle, means for stripping the ears from the stalk comprising a plurality of pairs of inclined inwardly revolving rollers and means for guiding the stalks to the said rollers, means for guiding the ears to the trough of a conveyor, means for conveying the ears up an incline, means attached to said conveyor trough comprising jagged sets of teeth and means for holding them, for stripping the husks from the ears during their passage up the incline of the conveyor, means for separating the ears and loose husks comprising a plurality of pairs of rollers and means for moving the ears across the longer dimension of said rollers and means comprising a baffle plate and a conveyor for sorting respectively the loose husks and the ears into separate storage receptacles, each of the said means requiring power, being actuated from the power-transmitting means connected to the wheel of the vehicle.

1,666,797. GRAIN-CRACKING MACHINE. SIMON SNYDER, Muncy, Pa., assignor to Sprout, Waldron and Company, Muncy, Pa., a Corporation of Pennsylvania. Filed Aug. 10, 1927. Serial No. 212,126. 9 Claims. (Cl. 83—6.)

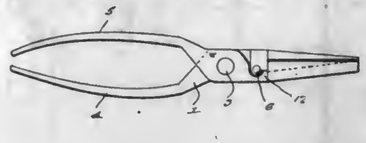


1. A grain cracking or reducing machine comprising a casing containing rotary knives and stationary knives spaced apart around the rotary knives and a superposed feed hopper; said casing comprising a lower member having mounted thereon upper members of segmental form each having its lower end hinged to the lower member and having secured on the inner side thereof a perforated plate or screen spaced from its inner wall so as to provide an arcuate space for receiving granulated material; such material being caused to descend by gravity into the lower part of the casing.

1,666,798. GRAIN-CRACKING MACHINE. DANIEL B. TAGGART, Muncy, Pa., assignor to Sprout, Waldron and Company, Muncy, Pa., a Corporation of Pennsylvania. Filed Aug. 10, 1927. Serial No. 212,127. 6 Claims. (Cl. 83—6.)

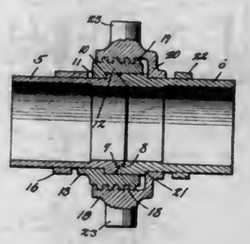
1. The combination, in a machine of the character described, of a casing having a shaft revolubly mounted therein carrying rotary knives, stationary knives projecting inwardly from the casing into operative relation to the rotary knives, a stationary knife or knives supported below said rotary knives, and a screen encircling the rotary knives and spaced from the casing above and below said shaft so as to provide a suitable space around the knives into which material may be thrown and caused to pass by gravity into the lower part of the casing.

1,666,799. REENFORCED CONCRETE PIPE. JEFFERSON D. TRAMMELL, Fort Worth, Tex. Filed Apr. 25, 1927. Serial No. 186,319. 7 Claims. (Cl. 72—53.)



1. A rolled steel ring for pipe joints having one cylindrical smooth face and on an opposite face two annular projecting ribs forming a marginal re-entrant groove, and a marginal thinner section.

1,666,800. PROCESS OF SEPARATING HAFNIUM AND ZIRCONIUM. ANTON EDUARD VAN ARKEL and JAN HENDRIK DE BOER, Eindhoven, Netherlands, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Filed Nov. 11, 1924, Serial No. 749,332, and in the Netherlands Dec. 12, 1923. 6 Claims. (Cl. 23—23.)

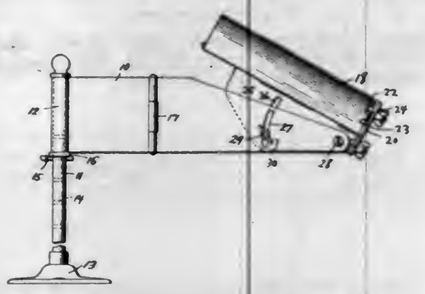


1. The process of separating compounds of hafnium and zirconium, characterized by starting from the solution of the complex compounds that can be prepared by adding in an acid medium fluorine ions and cations corresponding to the cations of the desired complex compounds to a mixture of hafnium and zirconium salts, which can be derived from the at least trivalent oxides of the elements the atomic number of which is 18n—3 if n is a whole number and at most 8, and that the solution of said complex compounds is submitted to fractional separation.

1,666,801. WIRE-BENDING PLIERS. ERNEST BERTON VARNEY, Pueblo, Colo. Filed Jan. 25, 1927. Serial No. 163,896. 1 Claim. (Cl. 140—106.)

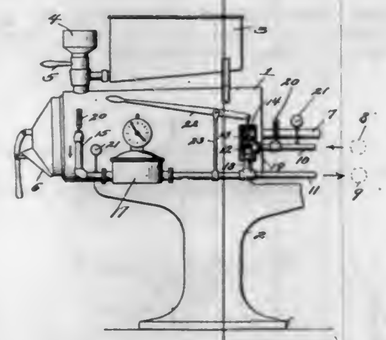
A pair of wire bending pliers comprising side by side portions pivotally connected together and having handles at their rear ends, jaws carried at the forward ends of the said side-by-side portions and extending longitudinally therefrom, one of the jaws having a longitudinal depression increased in depth from the forward end of the jaw to the heel end of the jaw, and the other jaw having a longitudinal projection adapted to enter said depression, and one of the side by side portions being also provided with a lateral projection of channel cross section, and the other side-by-side portion equipped with a lateral mandrel arranged to cooperate with the said channeled projection.

1,666,802. DETACHABLE UNION. EMIL VON ALLMEN, Louisville, Ky. Filed June 11, 1924. Serial No. 719,374. 1 Claim. (Cl. 285—122.)



A union including a male section and a female section having external shoulders formed adjacent to the ends thereof, a collar secured to the male section and spaced from the shoulder formed on the male section, said collar having an extension, a threaded collar having a shoulder adapted to engage the shoulder of the male section and having a cut out portion to receive the extension to permit of sliding movement of the second mentioned collar longitudinally of the male section, a ring nut having threads cooperating with the threads of the second mentioned collar and having a shoulder to engage the shoulder of the female section to draw the sections together, and a ring member secured to the female section in spaced relation with the ring nut to permit of rotary movement of the ring nut.

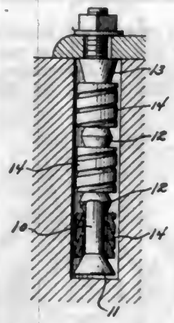
1,666,803. BOOK HOLDER. JOSEPH D. WALKER, Whitesburg, Tenn. Filed Aug. 29, 1925, Serial No. 53,391. Renewed Mar. 5, 1928. 2 Claims. (Cl. 45—60.)



2. A book stand comprising a horizontally disposed arm, means to support the arm, a book holder at the outer end of said arm, said holder comprising a pair of

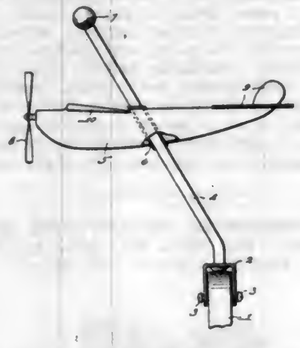
hingedly connected book supporting plates, an end plate, an adjustable connection between the end plate and each of the supporting plates to permit of pivotal adjustment of the latter, an adjusting plate having one edge con-

nected to the hinge of the book supporting plates and one of its ends connected to the end plate and means adjustably connecting said adjusting plate and horizontal arm to permit the book holder to be adjusted as a unit.



1,666,804. PROCESS FOR FREEZING ICE CREAM. JOSEPH WILLMANN, Derby, Conn. Filed Nov. 22, 1922. Serial No. 602,623. 1 Claim. (Cl. 62—174.)

The method of making ice cream which comprises passing a refrigerant in heat interchanging relationship with a batch of ice cream mixture and concurrently integrating the flow of the refrigerant, interrupting the flow of the refrigerant after a quantity thereof, predetermined according to the composition of the mixture and the temperature of the refrigerant and measured by such integration, has passed in heat interchanging relationship with the mixture, and then whipping the mixture.

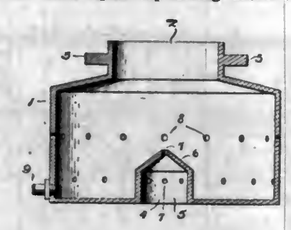


1,666,805. ANCHOR. LEONARD P. WILLIAMS, Newark, N. J. Filed May 3, 1926. Serial No. 106,525. 1 Claim. (Cl. 85—2.4.)

In combination with a bolt having a tapered head upon one end and a nut upon the other, of a frusto-conical shaped member slidably mounted thereon, spiral springs carried by the bolt member between the head and member, said springs having the companion convolutions thereof tapered for overlapping relation, and double frusto-conical shaped members disposed between the adjacent ends of the springs and in conjunction with the tapered head and frusto-conical shaped members being adapted to compress and expand the springs into engagement with the work for the purpose of anchoring the bolt within the work when the same is retracted and to release the

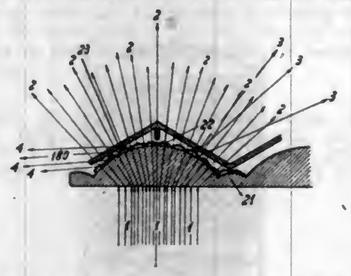
spring compression and allow it to retract from engagement with the work when the bolt is retreated within the nut.

1,666,806. RADIATOR ORNAMENT. NORMAN L. WRIGHT, Mount Vernon, N. Y. Filed Dec. 29, 1926 Serial No. 157,737. 1 Claim. (Cl. 46—14.)



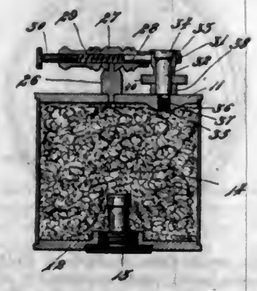
A radiator ornament, including means for attaching same to the radiator cap of an automobile, a forwardly inclined upwardly projecting post angular in cross section secured to said means and held against movement thereby, a movable part simulating in appearance an airplane, the fuselage of which is slidably mounted on the post, said fuselage having an opening therethrough receiving the post and conforming in shape to the angular shape of the post whereby the ornament is held against turning movement thereon and forward movement of the automobile through the medium of the draft created will cause the part to move upwardly and forwardly on the post.

1,666,807. BURNER. HATSUZUCHI YONEHIRO, Honolulu, Territory of Hawaii. Filed Aug. 4, 1926. Serial No. 127,151. 1 Claim. (Cl. 158—91.)



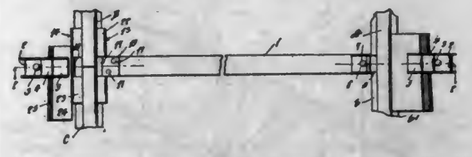
A burner of the character described comprising a cylindrical body of uniform diameter throughout, and including a conical-shaped top having a relatively wide mouth, an annular flange rising from said mouth, pins projecting from diametrically opposite points on said flange, a flat bottom for said body portion having a centrally located opening, a cylindrical wall forming an integral part of

said bottom and rising therefrom within the body portion, said cylindrical wall and body portion being perforated, a conical-shaped top rising from the cylindrical



wall and provided with an opening in the apex thereof, and a fuel supply pipe entering said body at a point adjacent the bottom.

1,666,808. DAYLIGHT PROJECTING SCREEN. OSWALD BÜCHNER, Honge, near Zurich, Switzerland. Filed June 16, 1922, Serial No. 568,778, and in Switzerland June 22, 1921. 7 Claims. (Cl. 88—24.)

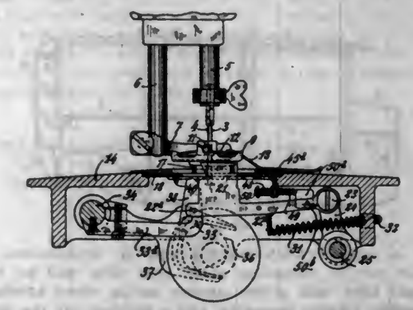


1, A daylight screen comprising a plurality of superposed transparent elements, the outer element being arranged to divert the light rays, and the inner or rear element being arranged to absorb the light, the said outer element having a surface presenting angular local portions which diverge in opposite directions, and said absorbing element having a surface which is presented to said outer element and which surface is made up of localized portions forming collections which are arranged at an angle to the associated angular surfaces of the first named element, each of said members being colored to make the same translucent.

1,666,809. CIGAR LIGHTER. WILLIAM J. BUTLER, Cranston, R. I., assignor to Henry Lederer & Bro., Inc., Providence, R. I., a Corporation of Rhode Island. Filed July 2, 1927. Serial No. 203,227. 6 Claims. (Cl. 67—7.1.)

1. In a pocket lighter, a fuel reservoir, a wick extending therefrom, a pyrophoric tube supported on said reservoir, a friction wheel adjacent the end of said tube, a guard for said wheel supported by said tube, a trunnion on which said wheel is supported extending into said guard, and a separate washer on said trunnion between said wheel and reservoir to space the same therefrom, said trunnion having threaded engagement with said reservoir and removable therefrom to permit removal of said washer and removal of said wheel from beneath said guard.

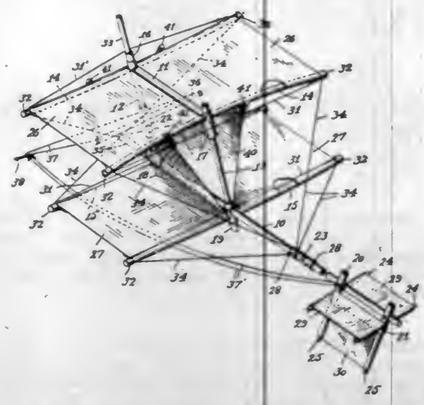
1,666,810. CROSSTIE. JOSEPH E. CHRISTY and JOHN F. SLOAN, Barton, Ohio. Filed June 30, 1927. Serial No. 202,576. 4 Claims. (Cl. 238—46.)



4. Securing means for the meeting ends of railroad rails comprising a clamping member having a base portion, and returned portions on said base spaced from one another to separately engage the adjacent ends of meeting rails.

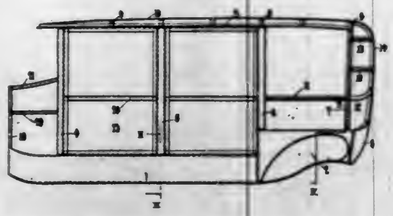
1,666,811. SEPARATION OF HAFNIUM AND ZIRCONIUM. JAN HENDRIK DE BOER, Eindhoven, Netherlands, assignor to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Filed Aug. 10, 1926, Serial No. 128,517, and in the Netherlands Sept. 12, 1925. 6 Claims. (Cl. 23—23.)

1. A process of separating hafnium and zirconium by starting from a solution that can be obtained by bringing a mixture of phosphates of hafnium and zirconium in a medium containing concentrated sulphuric acid, characterized by adding to the said solution at least one other salt of hafnium and zirconium.



1,666,812. MACHINE FOR DRAWING OUT THE YARN FROM TEXTILE FABRICS FOR THE PRODUCTION OF OPENWORK. JEAN BAPTISTE DURUPT, Jeuxey, near Epinal, France, assignor to Societe Pellaumail-Moutel & Cie., Cholet, France. Filed Mar. 26, 1925, Serial No. 18,459, and in France Oct. 13, 1924. 2 Claims. (Cl. 112—78.)

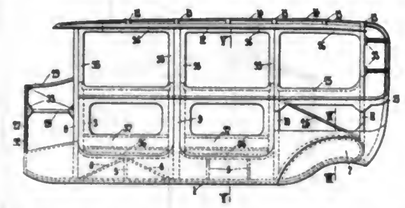
1. In a machine for drawing out yarn from textile fabric for the production of open work, a stationary frame to receive the fabric, claws having serrated faces to seize the fabric, means for separating the claws and for moving them forward simultaneously to stretch the fabric, means for lowering the stretched fabric onto the frame, a cutting blade for severing threads of the fabric, a toothed blade for engaging the severed threads, means to reciprocate the blades through the fabric, a fixed plate and a movable plate mounted below the fabric frame and



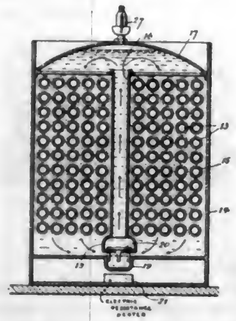
having cooperating flanges formed thereon, and resilient means for actuating the movable plate to bring said flanges into contact with the toothed blade to arrest the threads attached to the latter.

1,666,813. KITE. LAWRENCE R. EDDY, Manasquan, N. J. Filed Sept. 30, 1925. Serial No. 59,533. 8 Claims. (Cl. 244—23.)

1. A kite of the character described, comprising biplanes having transverse supports at their edges, a tail member a main frame embodying a single main stick extending longitudinally and centrally the full length of the kite and having a pair of alined struts extending upwardly therefrom adjacent its front end, and a longitudinally extending brace connecting the upper ends of said struts, a transverse control stick secured to the foremost strut intermediate its length, and metallic coupling members located at the junctions of said transverse supports, struts and longitudinal supporting members.



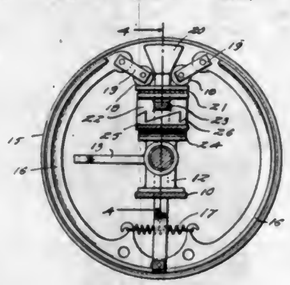
1,666,814. MOTOR VEHICLE. ERIC CECIL GORDON ENGLAND, London, England. Filed Feb. 6, 1926, Serial No. 86,544, and in Great Britain May 14, 1925. 4 Claims. (Cl. 296—28.)



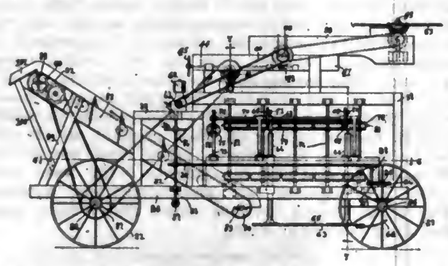
1. A motor vehicle body having in combination, a girder member extending along both sides and an end of said body, said girder member having wheel housings integrally formed therewith, and a skeleton for the body covering incorporated with said girder member.

1,666,815. MOTOR VEHICLE. ERIC CECIL GORDON ENGLAND, London, England. Filed Feb. 6, 1926, Serial No. 86,545, and in Great Britain Feb. 21, 1925. 1 Claim. (Cl. 296—28.)

A motor vehicle having in combination, a built-up hollow timber girder member having a section formed of portions angularly disposed to one another, said girder member having timber flange members and plywood web members extending along both sides and an end of said body, a roof frame, spaced upright members interconnecting said roof frame and said girder member together with a rear skeleton frame interconnecting said roof frame, said upright members and said girder member.

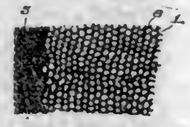


1,666,816. AIR CIRCULATING AND HEATING APPARATUS. PIERRE R. FALK, New York, N. Y. Filed Nov. 22, 1920. Serial No. 150,109. 5 Claims. (Cl. 219—42.)



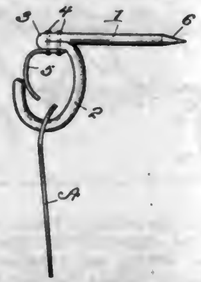
1. An apparatus for circulating and heating air, including a casing having air inlet and outlet ports, means within the casing for drawing in air through the inlet and expelling the same through the outlet ports, and an electrically heated closed water radiator through which the heated water is circulated, having air passages therethrough, mounted in the outlet for radiating the heat to heat the air during its expulsion.

1,666,817. VEHICLE BRAKE. HORACE FEREDAY, Spanish Fork, Utah. Filed July 10, 1924. Serial No. 725,179. 4 Claims. (Cl. 188—194.)



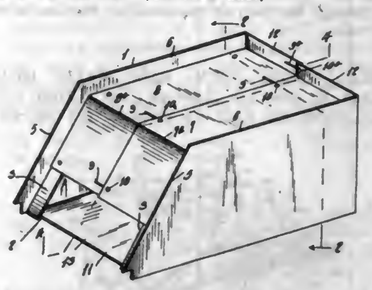
1. In brake mechanism, a post, a collar slidable on said post, means having cam engagement with said collar turnable relatively thereto to thereby effect the sliding movement of the collar, a wedge adjacent said collar, and braking mechanism movable against said wedge by said collar to expand the mechanism.

1,666,818. CANE HARVESTER. JAMES FISHER, New Orleans, La. Filed Sept. 30, 1926. Serial No. 138,735. 7 Claims. (Cl. 56—17.)



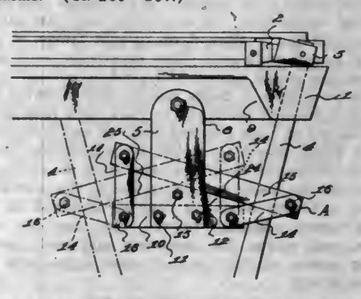
3. A cane harvester comprising a frame having a throat in its forward end, a cane topper adjustably mounted on the frame above the throat, a pair of carriers mounted on the frame at the opposite sides of the throat and converging rearwardly thereof, a pair of cutters suspended in the frame at opposite sides of the throat below said carriers with one cutter extending rearwardly beyond the other and substantially overlapping the rear end of the throat, and a conveyor extending from the rear end of said cutters and carriers for removing the cut stalks.

1,666,819. KNIT SCARF. ALBIN F. GOETZE, Newark, N. J., assignor to Morgan Knitting Mills, Inc., Newark, N. J., a Corporation of New Jersey. Filed Jan. 18, 1927. Serial No. 161,872. 1 Claim. (Cl. 66—171.)



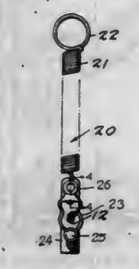
A machine knit scarf, comprising a flat knitted body having a loosely knit center, the loops of which fall over giving to the loops of the center a festooned formation, and having tightly knit edges and ends, said edges and ends normally maintaining said loops of the center in festooned formation, whereby the scarf presents the appearance of being hand knit.

1,666,820. CHECK HOLDER. JAMES W. HENDERSON and GEORGE H. WILSON, Dunmore, Pa. Filed Mar. 28, 1927. Serial No. 179,038. 1 Claim. (Cl. 24—236.)



A holding device of the character described comprising a shank adapted to be arranged horizontally on a support, one end of said shank being bent rearwardly in contacting engagement with one side of the shank to provide the shank with a relatively thickened end portion, said bent portion being extended to provide a hook lying directly beneath and in the same plane with the shank, and a curved spring closing the mouth of the hook and having one end riveted to said thickened portion of the shank.

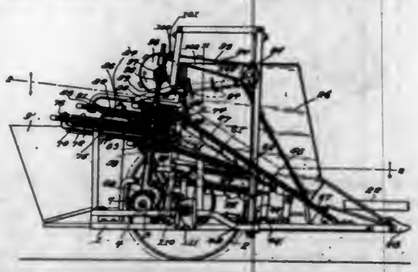
1,666,821. MERCHANDISE-DISPLAY UNIT. FAY HIESTER, Bremen, Ind. Filed Mar. 25, 1926. Serial No. 97,813. 4 Claims. (Cl. 312—118.)



1. A merchandise display unit, comprising a receptacle adapted for installation in a show case to contain merchandise to be dispensed, a tray arranged on the top of the receptacle, a tray arranged on the front of the receptacle and communicating with the top tray, the front tray having an opening communicating with the interior of the receptacle, said trays forming feeders for the receptacle through the opening aforesaid to permit the display of fresh merchandise in said trays and dispensing of the merchandise after display.

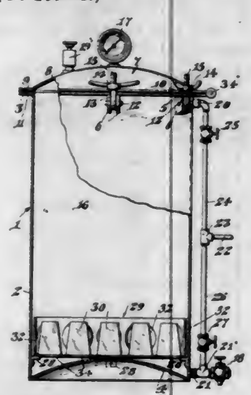
1,666,822. PICKER-STICK CHECK. ANDY HINKLE, Atlanta, Ga. Filed Aug. 30, 1926. Serial No. 132,608. 12 Claims. (Cl. 139—167.)

1. A picker stick check for looms including a retaining frame provided with stops between which a picker stick is adapted to oscillate, a plurality of swinging arms carrying said frame, and spring means connected to the frame and adapted to retard the movement of the frame for a portion of its travel and to assist in its movement during the remainder of its travel.



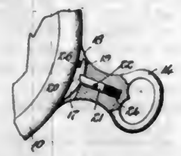
1,666,823. GARTER. DANIEL B. JACOBS, Salt Lake City, Utah. Filed Apr. 19, 1926. Serial No. 103,107. 2 Claims. (Cl. 241—6.)

1. In a garter, a detachable tab therefor comprising a coil spring body having an eye at the lower end thereof, a stocking fastener including a rigid loop, a flexible tab



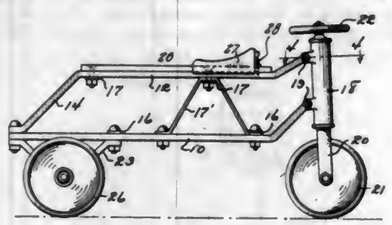
and a stud carried by the lower end of the flexible tab for engagement with the loop, and an eyelet extending through the eye formed on one end of the coil spring body, through the loop of the stocking fastener and said flexible tab.

1,666,824. SHORT-STEM MILO-MAIZE HEADER. WARREN B. JOHNSON, Lubbock, Tex. Filed Feb. 11, 1925. Serial No. 8,527. 5 Claims. (Cl. 56—59.)



5. A header comprising a frame, an inclined trough with a passage in its bottom and secured to said frame, means for moving stalks rearwardly in the passage, means for severing stalks from the ground, means including cooperating rollers arranged side by side over the trough passage for moving stalks downwardly through said passage incident to rearward movement of the stalks, means for severing heads from the severed stalks, means for engaging stalks after severing of the heads and discharging such stalks from the apparatus, said last mentioned means including a plate fixed to said frame, a pendent portion formed with said plate, superposed rods designed to press the stalks against the pendent portion and having free rear ends, a finger bearing belt mounted to have its fingers movable between the rods, said rods and plate being shaped at their forward portions and cooperating to form a flared mouth, a trough for supporting the heads after the disconnection of the same from the stalks, means for moving the heads on said trough to the discharge end thereof, a blower having a conduit arranged in its discharge orifice adjacent to the discharge end of said trough, and means for operating said stalk and head moving means at the same relative speed and from a common shaft.

1,666,825. STERILIZER. EDWIN D. KING, Jr., Valdosta, Ga. Filed Dec. 4, 1926. Serial No. 152,660. 1 Claim. (Cl. 167—3.)

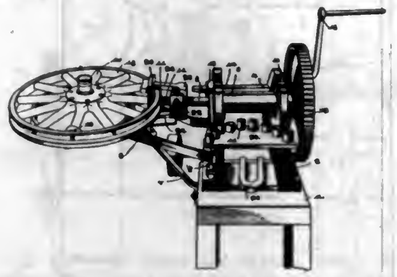


A sterilizing apparatus comprising an open top body portion having a closed convex bottom, supports within said body portion in close proximity to said bottom, a concave lid for said body portion and forming in connection with the latter a sterilizing chamber, means for hinging the lid to the body portion, means coacting with the body portion and lid to form a steam tight joint therebetween, removable means mounted on said supports and adapted to contain the articles to be sterilized, a nipple extended laterally from the body portion below said supporting means and in close proximity to the lower end of said bottom, a vertically disposed steam supply pipe opening into said chamber near its upper end and further opening into said nipple, a cut-off carried by said pipe in proximity to its upper end, a cut-off carried by said pipe in proximity to its lower end, a feed pipe opening into said supply pipe between said cut-offs, and a normally closed outlet valve communicating with said nipple.

1,666,826. EYEGLASSES. ARTHUR LEMAY, Brooklyn, N. Y. Filed May 4, 1925. Serial No. 27,897. 1 Claim. (Cl. 88—44.)

In a pair of eyeglasses, a pair of lens frames, a spring bridge connecting said frames, a handle carried by one of said frames, a lip carried by said handle overlying and spaced from the frame carrying said handle, thereby providing a recess into which a portion of the other frame is receivable, a plate on said last mentioned frame undercut at one end to provide a bill and also having a notch formed therein, a pin extending across said recess and connecting said lip with a portion of the frame carrying said handle serving to prevent said lip from spreading outwardly with respect to the frame carrying same, said bill being engageable with said pin to prevent sliding movement of the frames across one another, and a plunger slidably mounted in said handle engageable with said notch to retain said bill in engagement with said pin.

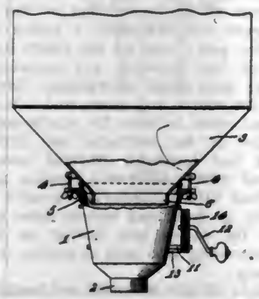
1,666,827. SCOOTER. KENNETH S. MCFARLAN, Pewee Valley, Ky. Filed Jan. 5, 1927. Serial No. 159,206. 4 Claims. (Cl. 208—165.)



1. A toy vehicle comprising a frame, wheels including a steering wheel for supporting the frame, a horizontally movable knee rest slidably and adjustably supported by the frame and means to hold the knee rest in adjusted position.

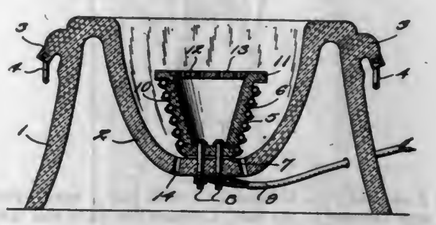
1,666,828. MANUFACTURE OF POTTERY OR THE LIKE. JOSEPH WILLIAM MELLOR, Stoke-on-Trent, England. Filed Jan. 14, 1926, Serial No. 81,310, and in Great Britain Mar. 9, 1925. 8 Claims. (Cl. 25—157.)

1. A process for the manufacture of glazed porous bodied tiles of glazed porous bodied electric fittings which consists in forming the body of the usual composition,



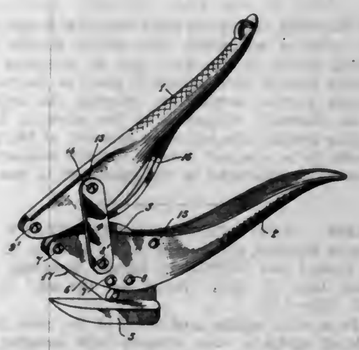
adding thereto a flux which acts at a temperature below that represented by Seger cone 01A (1080° C.) and in quantity not exceeding the equivalent of 3% of the weight of the unfired body, applying to the unfired body a glaze normal for making glazed porous bodied ties or glazed porous bodied electric fittings, and firing the product in a glost kiln.

1,666,829. WHEEL TIGHTENER. JENS OLSON, Lewiston, Idaho. Filed Nov. 23, 1926. Serial No. 150,319. 6 Claims. (Cl. 153—10.)



6. A device of the character described comprising a supporting structure including a pair of horizontally spaced vertically edgewise supporting plates, a pair of inclined arms extending from one of said plates, a supporting ring carried by the outer ends of said supporting arms, an inclined brace staying said ring to said supporting structure, said ring being adapted to movably support a spoked wheel when said wheel is disposed flatwise on the ring, tie means loosely connecting a spoke of said wheel with said ring, a shaft journaled in said supporting plates and having an extending end portion terminating close to the outer periphery of the felly of said wheel, an abutment member on said extending end portion of the shaft for contact with the outer periphery of the felly of said wheel, and means supported on said shaft for exerting pressure against the inner periphery of the felly of said wheel at opposite sides of a spoke of the wheel when said shaft is rotated in a certain direction and the abutment member of said shaft is in contact with the outer periphery of the felly of the wheel at the outer end of said spoke.

1,666,830. SIFTER. CLARENCE M. OSTLER, Fort Wayne, Ind., assignor to McCormick Bros. Company, Albany, Ind. Filed Jan. 22, 1923, Serial No. 614,254. Renewed Dec. 2, 1927. 1 Claim. (Cl. 209—275.)



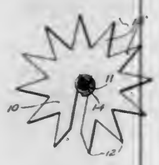
A sifter comprising a casing, semi-circular pieces arranged in opposed relation within the casing and each having one end bent at right angles to the body portion and passed through an opening in the casing to form a pivot point, a vertically disposed arc shaped member having its ends connected midway between the ends of the semi-circular pieces, a fork member formed in the arc member intermediate its ends, a crank shaft extending through the casing and having its crank portion disposed between the tangs of the forked portion, a cup shaped screen member supported by the semi-circular pieces and arc shaped member and manually operated means having connection with the crank shaft for imparting movement to the same whereby in turn to impart a rocking movement to the screen.

1,666,831. ELECTRIC HEATER. CARMELO PANDOLFO, Montevideo, Uruguay. Filed Nov. 3, 1926. Serial No. 146,008. 3 Claims. (Cl. 219—37.)

1. An electric heater of the class described comprising a body having a substantially cylindrical outer part and a bowl-shaped inner part, the two parts being formed integral and of non-conducting material, an inverted truncated cone in the bowl-shaped part and fastened to the bottom of the same, said cone being of hollow construction and formed of non-conducting material, a heating coil connected with the exterior of the cone and a flange at the upper end of the cone for protecting the coil from material dropping into the bowl-shaped part of the body.

1,666,832. HAND-OPERATED SHEARING DEVICE. ALBERT HENRY FRANKS PERL and RICHARD HEMMINGS CARTER, Ladbroke Grove, London, England. Filed Dec. 10, 1923. Serial No. 679,819. 1 Claim. (Cl. 30—3.)

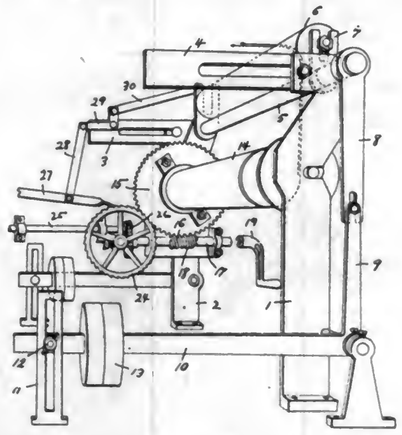
A hand-operated cutting device comprising two operating levers, crossed links pivotally interconnecting said levers to cause the operative ends thereof to diverge during cutting, one of said links extending below one of the levers with its projection having a cutter with its cutting edge projected toward and in spaced relation to the adjacent lever, and a second cutter carried removably by said adjacent lever and having its cutting edge in-



clined downwardly and rearwardly with respect to the lever and of a length to cross the cutting edge of the first mentioned cutter in all relative positions of the levers.

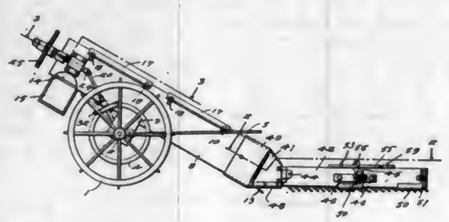
1,666,833. VACUUM TUBE. WILLIAM A. RHODES and DAVID BELLAR, Brooklyn, N. Y. Filed Sept. 3, 1925, Serial No. 54,292. Renewed Feb. 25, 1928. 1 Claim. (Cl. 250—27.5.)

A vacuum tube comprising a bulb and a base, having a high vacuum in the bulb, a filament, a plate and intermediate grid, and an inner grid disposed within the bulb, the inner grid being connected to one end of the filament, said filament fastened in an insulating tube, said insulating tube having an opening adjacent the inner grid.



1,666,834. RADIANT-ENERGY COLLECTOR FOR AERIALS. WILLIAM A. RHODES and ABRAHAM BANKOFF, Brooklyn, N. Y. Filed Dec. 23, 1925. Serial No. 77,328. 1 Claim. (Cl. 250—33.)

An electrical energy collector cut and formed from a single piece of conducting material to provide a body, radiating points on the body, and an attaching portion extending radially from a central point of the body, said attaching portion serving for effecting the attachment and the electrical connection of the collector, and said attaching portion adapted to be bent out of the plane of the body to be wrapped about a suitable conductor with the conductor extending in the space left in the body.

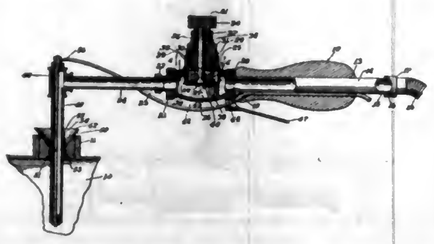


1,666,835. WARP TENSION AND LET-OFF. JOHN JULIUS RUHREN, Guttenberg, N. J., assignor to Herbert S. Vipond and William B. Leitch, Montreal, Canada. Filed July 13, 1926. Serial No. 122,163. 3 Claims. (Cl. 139—110.)

1. In a warp tension and let-off of the class described, a pair of uprights, arms whereby said uprights may be connected with the frame of a loom, a warp beam mounted for rotation between said uprights, a whip roll mounted for simultaneous rotation and swinging motion between said uprights above said warp beam, a rocker arm for said whip roll, a bell crank mounted for pivotal movement and connection with said rocker arm, an adjusting weight carried by said bell crank, a stand, a connection between the bell crank and the stand whereby the bell crank may be held against movement, a second bell crank mounted on one of the aforesaid arms, a link connection between the whip roll and one arm of the bell crank, an actuating pawl cooperable with said ratchet

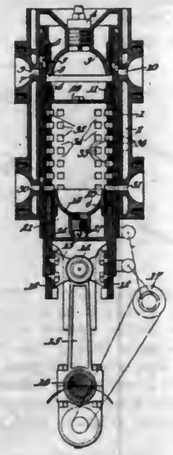
wheel, a link connection between said second bell crank and pawl, and an operating connection between the ratchet wheel and warp beam.

1,666,836. STONE GATHERER. ELMER V. SANTEE, Williamson, N. Y. Filed July 8, 1926. Serial No. 121,163. 13 Claims. (Cl. 55—17.



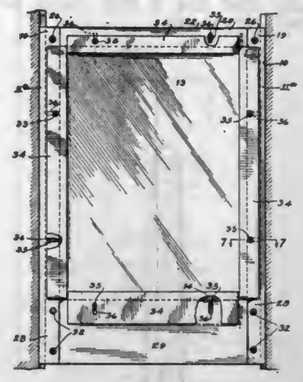
1. A machine of the character set forth,, comprising a downwardly and forwardly inclined casing provided at its rear end with a discharge opening, wheels supporting the casing, a spiral conveyor within the casing, means connected to the front end of the casing for directing material into the same, a pinion fixed to the conveyor, shafts, gears loose on the shafts located at opposite sides of the conveyor and meshing with the pinion, ratchet mechanism establishing driving connection between the shafts and gears, and means establishing driving connection between the shafts and wheels.

5. A machine of the character set forth, including a downwardly and forwardly inclined casing provided at its rear end with a discharge opening and provided at its front end with a forwardly directed tapered extension open at its front and bottom sides, a spiral conveyor within the casing and having its forward end tapered and extending into said extension, and conveyor operating means.



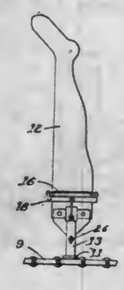
10. A machine of the character set forth, including a downwardly and forwardly inclined conveyor, forwardly divergent bars provided with rake teeth and located at the front end of the conveyor, means mounting the bars for relative adjustment about vertical axes and for movement about horizontal axes, each bar consisting of sections, means connecting the bar sections for relative adjustment about vertical axes and for movement about horizontal axes, and means holding the bars and bar sections in adjusted relation.

1,666,837. STORAGE-BATTERY FLUSHING AND REFILLING DEVICE. JOACHIM B. SCHARF, Chicago, Ill. Filed Jan. 31. 1927. Serial No. 164,906. 2 Claims. (Cl. 226—39.)



1. In a battery filling and flushing device, a valve structure, including a movable valve disk, a valve stem carrying the valve disk and a spring control button, conduits having communication between each other controlled by said valve structure, a handle supported by one of said conduits, and means for moving said valve disk, said means including arms pivotally supported by the button, bell cranks pivotally supported by the valve structure and having corresponding limb portions pivotally connected to the arms and opposite corresponding limb portion integrally formed together, a finger lip extending laterally from the integrally formed bell cranks and disposed beneath and in longitudinal direction with respect to the handle.

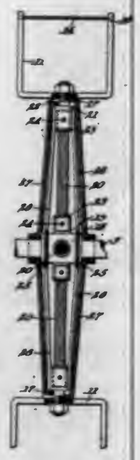
1,666,838. INTERNAL-COMBUSTION ENGINE. PAUL O. STRIBLING, Jr., Atlanta, Ga. Filed Jan. 18, 1927. Serial No. 160,935. 8 Claims. (Cl. 123—62.)



4. An internal combustion engine of the type including a hollow piston movable within a cylinder and between the cylinder head and a second head which is located within the skirt of the piston, characterized by the fact that the inner head is provided with a threaded recess for receiving a spark plug, the cylinder head and piston head having threaded apertures therethrough permitting the introduction of a spark plug, the piston head aperture being closed by a removable cap and the cylinder head aperture being adapted to receive a second spark.

1,666,839. METALLIC WINDOW SASH. JOHN THOMAS WINTON, Odessa, Tex. Filed Sept. 21, 1925. Serial No. 57,761. 3 Claims. (Cl. 189—76.)

1. In a metal sash construction, the combination of a stile and a rail, the stile formed of sheet metal with spaced apart inturned flanges at its outer edge and ears extending from and flush with its inner and outer faces, said flanges coextensive with said ears, and the rail formed of sheet metal with meeting inturned flanges at its outer edge and ears extending from but offset inwardly with respect to its inner and outer faces, said flanges of the rail coextensive with said ears of the rail, and means securing said stile and rail together with the ears of the rail between the ears of the stile and with the ears and flanges of the rail abutting the flanges of the stile.

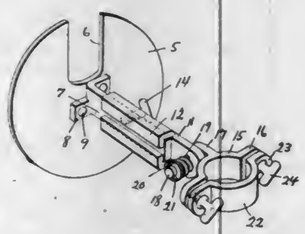


1,666,840. DEVICE FOR HOLDING STOCKINGS ON FORMS. EDWARD J. ZIOCK, Rockford, Ill. Original application filed May 7, 1924, Serial No. 711,565, Patent No. 1,623,080, dated Apr. 5, 1927. Divided and this application filed Sept. 20, 1924. Serial No. 738,756. 5 Claims. (Cl. 223—17.)

1. A stocking holding and clamping device comprising a stocking form, a flexible wire clamping element for each side of the form arranged to be moved into and out of clamping engagement with the form for holding a stocking thereon, each wire element being arranged readily to conform itself to the shape of the surface engaged thereby the entire width of the stocking and being arranged to extend crosswise of the form beyond

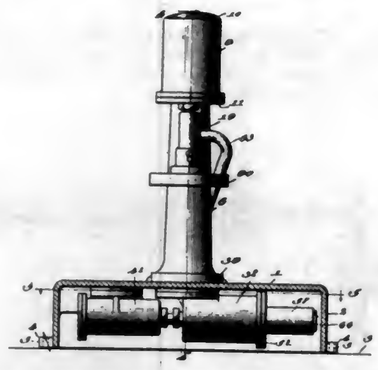
the opposite edges thereof whereby the two elements completely encompass the form, and spring means for operating said wire clamping elements normally toward engagement with the form with sufficient pressure to cause the elements to conform themselves in uniform contact with said form.

1,666,841. AGRICULTURAL IMPLEMENT. ALFRED JOHANN AUSPITZER, Hamburg, Germany, assignor to Research Corporation, New York, N. Y., a Corporation of New York. Filed May 3, 1926. Serial No. 106,570. 12 Claims. (Cl. 97—40.)



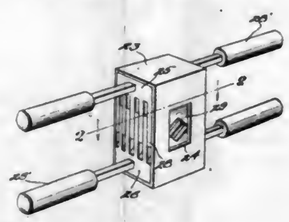
1. In an agricultural implement, a power shaft, an annular tool-carrying rim, and tensioned flexible spokes between said shaft and said rim.

11. A rotary plow comprising a power shaft, an annular rim, a plurality of U-shaped tools mounted on said rim, and driving means between said power shaft and said rim comprising a plurality of flexible spokes.



12. The structure as in claim 11 wherein the U shaped tools carry a thin member between their ends.

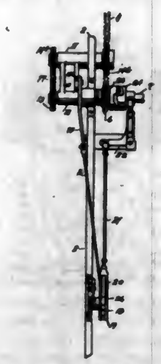
1,666,842. CROWBAR ATTACHMENT. EINAR C. CARLSON, Two Harbors, Minn. Filed Dec. 4, 1926. Serial No. 152,645. 1 Claim. (Cl. 254—131.)



An attachment of the class described including a plate provided with a radial notch, a shank fixed to the plate and extending perpendicularly therefrom, a second shank slidable on the first shank, means for holding the shanks at different adjustable positions in relation to each other, a clamp, means for pivoting the clamp on the second shank, and spring means holding the clamp and the second shank in frictional engagement.

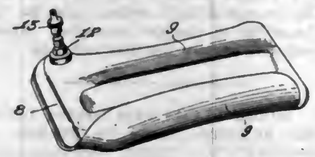
1,666,843. CASTING MACHINE. FRANCIS NATHANIEL BROWN, Jr., El Paso, Tex., assignor of one-half to Frank N. Brown, sr., El Paso, Tex. Filed Apr. 15, 1925. Serial No. 23,319. 2 Claims. (Cl. 22—69.)

1. In a casting machine of the character described, a cover for one end of an investment holding ring, said cover having an opening through which pressure fluid may enter said investment holding ring when the cover is in position to close said one end of the investment holding ring, a pneumatic operated plunger for moving said cover to and from position to close said investment holding ring at its said one end, pneumatic means associated with the investment holding ring at its other end for causing a suction within said investment ring at its second named end, and means for controlling the flow of pressure fluid through said suction causing device means and through said cover operating piston so that the suction causing device means will be operated in advance of and continue during the movement of said piston to position to move said cover against the the first named end of the investment holding ring.



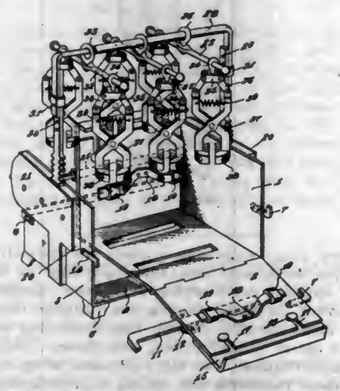
1,666,844. NAIL STRAIGHTENER. MELCHOR CENTENO V., Caracas, Venezuela. Filed June 13, 1925. Serial No. 36,895. 2 Claims. (Cl. 81—15.)

1. A nail straightening device comprising a box-like frame, a pair of V-shaped jaws movable within said frame, said frame having aligned rectangular slots provided in opposite walls thereof for the insertion of a nail between said jaws when said jaws are in an extended position to provide a continuous passage therethrough in alignment with said slots, and manipulating handles extending from opposite sides of said jaws for actuating the same.



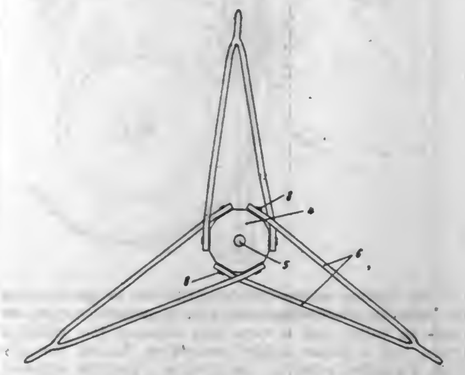
1,666,845. CHAIN-REVERSING MECHANISM. HARRY A. CLARK, Wichita Falls, Tex. Filed June 29, 1925. Serial No. 40,442. 3 Claims. (Cl. 74—21.)

3. In a reversing mechanism, a driven shaft, an endless chain operated by the shaft, a clutch on the shaft, a swinging frame, a rotatable member on the frame, means to actuate the member from the shaft, means to swing the frame to move its member into and out of engagement with the chain and to operate the clutch, and



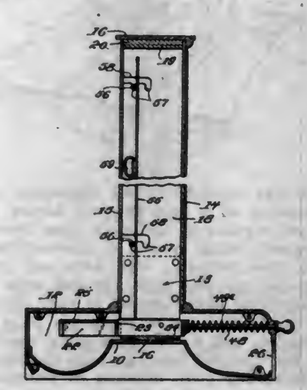
means engaging the chain on the side face thereof opposite to the side face engaged by the rotatable member to hold the chain engaged with the latter.

1,666,846. KNEE PAD. DENNIS S. COOPER, Abilene, Tex. Filed Oct. 23, 1926. Serial No. 143,741. 1 Claim. (Cl. 2—24.)



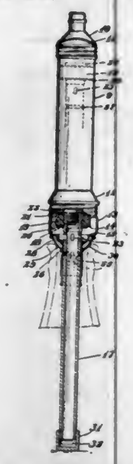
A pneumatic cushion for knee pads formed from a piece of tubular rubber that has its confronting ends contacting and secured together, said tube having its central portion, from points adjacent its ends also contacting and secured together, whereby to provide the member with a central longitudinally flat web, side tubes extending from the ends of the web and restricted transverse end tubes which communicate with the side tubes, and a normally closed valve for inflating the tubes.

1,666,847. BATTERY-ELEMENT EXTRACTOR. ALBERT B. COTE, Philadelphia, Pa. Filed May 20, 1927. Serial No. 192,998. 6 Claims. (Cl. 29—84.)



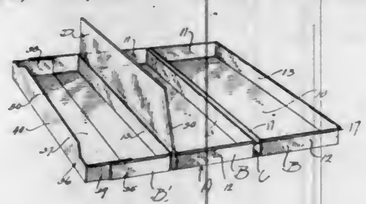
1. A device of the class described comprising a casing, means for holding a battery box therein, a member movably supported by the casing and extending above the same, gripping means carried by said member for gripping the posts of the battery elements and means for raising the member to cause said gripping means to pull the elements from the box.

1,666,848. STAND FOR CINEMATOGRAPHIC AND PHOTOGRAPHIC VIEW TAKING APPARATUS. ANDRÉ LÉON VICTOR CLÉMENT DEBRIE, Paris, France. Filed Sept. 20, 1926, Serial No. 136,668, and in France Dec. 4, 1925. 2 Claims. (Cl. 248—43.)



1. Stand for cinematographic and photographic apparatus and the like comprising a platform, a number of legs and a fork ending each leg, the two ends of each fork being secured to the platform at two points the line connecting which passes through the center of the platform.

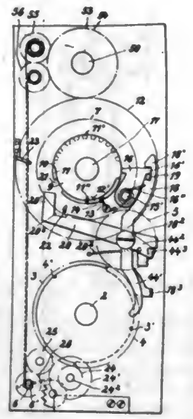
1,666,849. VENDING MACHINE. BENJAMIN L. FRY, St. Louis, Mo., assignor to National Sales Machine Company, St. Louis, Mo., a Corporation of Missouri. Filed Aug. 7, 1925. Serial No. 48,870. 4 Claims. (Cl. 312—63.)



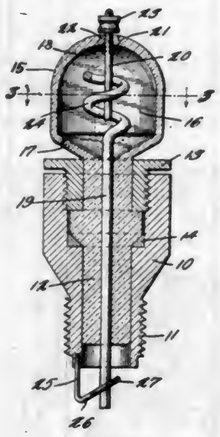
1. A vending machine comprising a casing, a package compartment therein, said compartment comprising a substantially U-shaped base portion, side walls secured to the opposed vertical faces of the base portion with the lower edges of said walls spaced from the bottom to define guides, an ejector mounted and movable in said guides, and means to return the ejector to normal position.

1,666,850. SIPHON PUMP. GEORGE V. GAVAZA, Quincy, Mass. Filed Mar. 2, 1927. Serial No. 171,984. 10 Claims. (Cl. 226—26.)

1. In a pump adapted to be connected to the long leg of a siphon, the combination with a cylinder having an inlet, an outlet, and a valve seat adjacent the outlet, a piston rod, a piston rigidly secured to the rod movable from a position adjacent the inlet to a position adjacent the outlet to fill the cylinder with liquid from the source of supply, and a valve engaged with the seat to prevent the flow of the liquid through the outlet, of means engaged by the mouth of the bottle for unseating the valve from the valve seat to permit liquid to flow through the outlet.



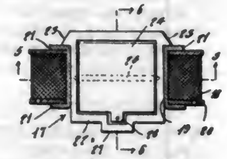
1,666,851. DISPLAY-TRAY CONSTRUCTION FOR SHOW CASES. JOHN F. GOOD, Knoxville, Tenn. Filed Sept. 27, 1926. Serial No. 137,984. 3 Claims. (Cl. 206—72.)



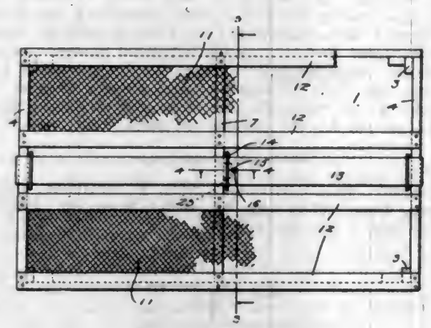
1. In a tray construction for displaying merchandise the combination of a pair of trays having side walls with flanged portions at the outer sides thereof providing downwardly facing grooves, a substantially U-shaped connecting piece including side walls and providing a pocket between the side walls, the side walls of the U-shaped connecting piece received at their upper ends in the grooves of the trays to retain the trays in a connected relation, and a separating plate inserted in the pocket of the U-shaped connector piece and the lower end of said separating plate disposed in frictional engagement with the outer sides of the flanges of said trays.

1,666,852. SLOT-SHUTTER MECHANISM FOR PHOTOGRAPHIC CAMERAS. FRIEDRICH GROSSE, Jena, Germany. Filed Mar. 4, 1927, Serial No. 172,827, and in Germany Sept. 18, 1924. 12 Claims. (Cl. 95—57.)

1. In slot shutters for photographic cameras two blinds, springs therefor, means for varying the tension of said springs, and means for varying the width of the slot between the blinds, and a time regulator for measuring the time between release of the two blinds in combination with a setting disc adapted when turned in one direction from a normal position to operate the means for varying the tension of said springs and the means for varying the width of the slot and when turned in the other direction to operate the time regulator.



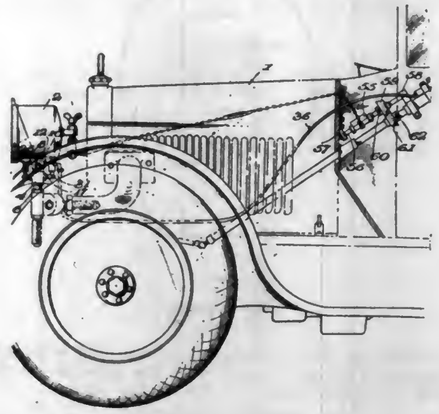
1,666,853. SPARK PLUG. ISAAC HARRIS, Detroit, Mich. Filed Mar. 14, 1924. Serial No. 699,268. 1 Claim. (Cl. 123—169.)



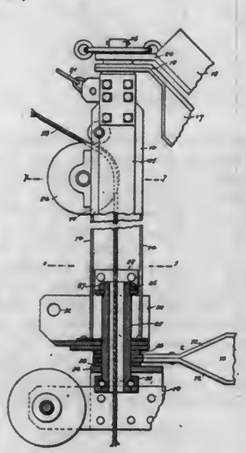
A spark plug comprising a shell, an insulating core within the shell, said core being provided at one end with an enlarged head having a chamber therein, a sectional power electrode having one member thereof extending longitudinally through said insulating core and having a spiral formed at one end thereof, and located within said chamber, the other member being supported in alignment therewith and having a portion thereof extending concentrically with the spiral portion, a ground electrode secured to said shell and having a loop portion surrounding said power electrode.

1,666,854. LOUD SPEAKER. LELAND D. HARRIS, Salt Lake City, Utah. Filed June 12, 1926. Serial No. 115,523. 8 Claims. (Cl. 179—119.)

1. A sound reproducing device comprising a diaphragm, arcuate permanent magnets, pole pieces arranged diametrically of the magnets and having their outer ends secured to the opposite sides of the magnets, the inner ends of the pole pieces being of substantially U-form and arranged in opposed relation within the magnets, a coil located within the inner ends of the pole pieces, a frame extending through and beyond the coil and engaged by the inner ends of the pole pieces to secure it and the coil in place, an armature arranged within and rockably supported by the frame, and an element connecting the armature to the diaphragm.



1,666,855. SELF-LOCKING CHICKEN COOP. MARION S. HOLLEY, Enterprise, Kans. Filed July 18, 1925. Serial No. 44,574. 1 Claim. (Cl. 217—62.)

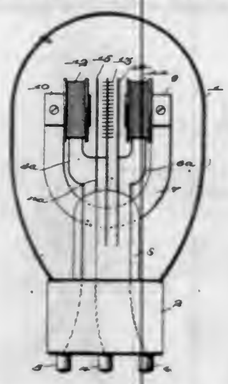


In a chicken coop, a container having an opening in its top extending from end to end thereof, a door slidable in said opening and having an opening therethrough, a partition intermediate of the ends of the container, a housing secured to said partition, and a spring actuated bolt in said housing adapted to engage in said opening when the door is in closed position to prevent casual displacement thereof, retraction of said bolt being effected through the opening from the outer side of the door and permitting the door to slide on the container without lifting.

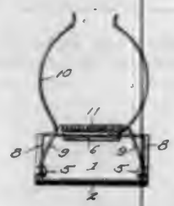
1,666,856. TILTABLE AND DIRIGIBLE HEADLIGHT. THOMAS C. HOLLIDAY, Canton, Miss., assignor to Holliday Life Saving Headlight Co., Jackson, Miss., a Corporation of Mississippi. Filed June 16, 1925. Serial No. 37,567. 4 Claims. (Cl. 240—61.)

1. In combination with a headlight, means for mounting the headlight for tilting movement downwardly and forwardly, a stud secured on said means, a rod pivoted to the stud and having sliding engagement with the headlight, a spring on the rod for urging the headlight to normal position, a second stud also carried by said means, a cylinder fixed to the headlight casing, a piston fitted in the cylinder, a link between the piston and the second stud, a manually operable pump mounted on the steering post of an automobile and connected with the cylinder.

1,666,857. DERRICK. FAY HUNT, New York, N. Y. Filed July 15, 1926. Serial No. 122,664. 2 Claims. (Cl. 212—70.)



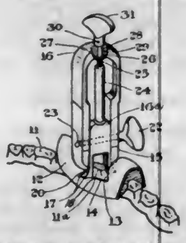
1. In a derrick, a mast, means supporting the lower end of the mast, a sill, a tubular gudgeon pin connected with the mast at the lower end, and means for swiveling the lower end of said tubular gudgeon to the said sill so that the sill can swing laterally on said tubular gudgeon.



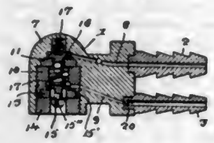
1,666,858. VACUUM TUBE. AUGUSTUS HENRY JAHN, Pittsburgh, Pa. Filed May 27, 1926. Serial No. 112,084. 2 Claims. (Cl. 250—27.5.)

2. A device of the character described comprising means for producing a permanent magnetic field, a filament situated in said field for producing a thermionic stream, a plate constituting a target by which said stream is intercepted, a grid interposed between the filament and

plate, and electrode-magnetic means connected with the grid being operable by varying electrical impulses to superimpose an electro-magnetic field upon said permanent magnetic field and thereby vary the potential of the grid to variably control the flow of said stream.



1,666,859. PRICE-TAG HOLDER AND ATTACHING DEVICE. ROBERT A. LEAGUE, Greenville, S. C. Filed May 7, 1927. Serial No. 189,661. 1 Claim. (Cl. 40—16.)

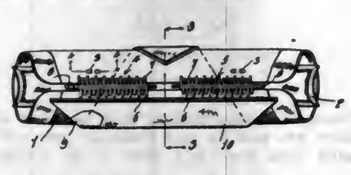


A price card holder comprising a plate having one of its edges adjacent to its ends slit, and the portions of the plate, outward of the slits bent over the faces of the plate to provide guide flanges, said plate having a lower guide flange, the portion of the plate between the mentioned slits being bent over the back of the plate to provide an eye, ears on the inner face of the plate adjacent to the lower corners thereof, a spring wire member received through the eye and having angle arms which are bent upon themselves to provide outer arms and which are received between the ears, said last mentioned arms being inclined toward each other and merging into right angularly arranged rearwardly extending round jaws which exert a pressure toward each other and a spring connected to the jaws for urging the same toward each other.

1,666,860. TOOTH EXTRACTOR. VINCENT MARANDA, Montreal, Quebec, Canada. Filed May 17, 1926. Serial No. 109,777. 3 Claims. (Cl. 32—10.)

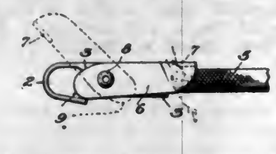
1. In a device of the character described the combination of a bridge member adapted to rest upon the teeth and provided with an aperture for exposing a tooth to be extracted, and a separate tooth gripping and extracting device having a part adapted to straddle the tooth to be extracted and to engage opposite edges of the aperture formed in the bridge member, said part being connected to the tooth gripping means in such manner as to receive the reactive thrust incident to extraction of the tooth and serving in cooperation with the bridge member to distribute said thrust over a considerable area of the jaw bone in the vicinity of the tooth to be extracted.

1,666,861. AIR TESTING AND INFLATING MEANS. ERNEST HOLT MCFARLAND, Louisburg, N. C., assignor of one-half to James A. Hodges, Louisburg, N. C. Filed July 15, 1926. Serial No. 122,695. 1 Claim. (Cl. 284—17.)



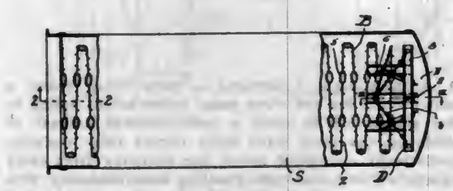
A chuck for an air supply comprising a body having a socket, and being formed with upper and lower passages which communicate with said socket, a hose nipple for each passage and the nipple for the upper passage being in communication with an air supply and the lower nipple with a gauge, a plug threaded in part of the socket and being formed with a recess in its bottom, a washer in the recess, a nut threaded in said socket for retaining said washer in said recess, a washer on the upper end of the plug, a valve controlling the upper passage, a spring influencing the valve to hold the same on the upper washer, a spring influenced plunger having a flange which normally engages the lower washer for closing the lower passage and said plunger adapted to unseat a tire valve and the valve for the upper passage, as and for the purpose set forth.

1,666,862. ROAD SIGNAL. NELL E. MCHENRY, Denison, Iowa. Filed July 18, 1925. Serial No. 44,541. 1 Claim. (Cl. 40—135.)



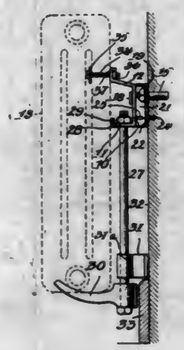
A sign plate comprising a cast metal body having a flat rear surface formed with longitudinal ribs defining a substantially rectangular area, said ribs having overhanging flanges, said metal body being provided with a plurality of openings of a shape to define indicia, and a reflecting member disposed against the flat rear side of the body and retained within said flanges, the front face of the sign being concaved and the front face being further formed with an overhanging flange located above the area provided with openings.

1,666,863. TIRE BOOT OR PATCH. MARION C. MYERS, Tenino, Wash. Filed Mar. 10, 1927. Serial No. 174,357. 5 Claims. (Cl. 152—24.)



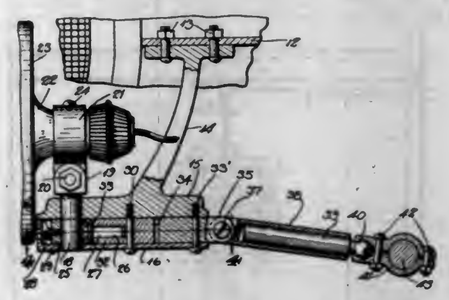
1. A boot or patch comprising a split sleeve, and a two part lacing connecting the inner or longitudinal edges of the sleeve, the respective parts of the lacing being arranged at opposite sides of the transverse center of the sleeve.

1,666,864. WATCH-BRACELET END HOOK. FREDERICK W. NITTEL, Attleboro Falls, Mass., assignor to M S Co., Attleboro, Mass. Filed Aug. 18, 1927. Serial No. 213,823. 4 Claims. (Cl. 24—242.)



4. In a watch bracelet fastener, a member having a watch bracelet end hook, stop means carried by the member, and a keeper pivoted to the member and having a part to engage the stop means in operative position thereof, said keeper having means formed to move into and out of engagement with the hook, and said hook being resilient whereby to exert tension on said last named means to hold same in operative position and to yield and enable the keeper to be moved to inoperative position out of engagement with the hook.

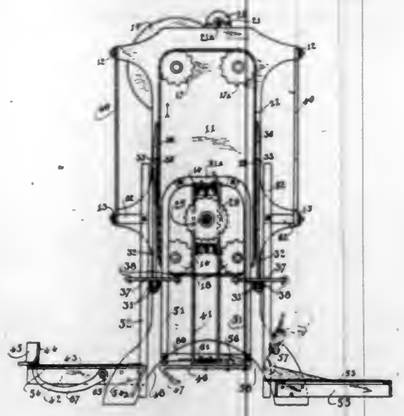
1,666,865. APPARATUS FOR REMOVING COKE FROM STILLS. LEROY V. ROBBINS, Baton Rouge, La., assignor to Standard Oil Development Company, a Corporation of Delaware. Filed Oct. 18, 1923. Serial No. 669,318. 2 Claims. (Cl. 196—91.)



1. Apparatus of the character described, which comprises a still provided with a manhole across the lower segment of one end, a closure therefor, a series of flexibly connected break-out strips each having lateral teeth, a drag having support-runners and a back made up of top and bottom I-beam pieces and connecting angle-irons, and a flexible connection between the drag and the end of the series of break-out strips, said man-hole being large enough to permit passage of the drag therethru.

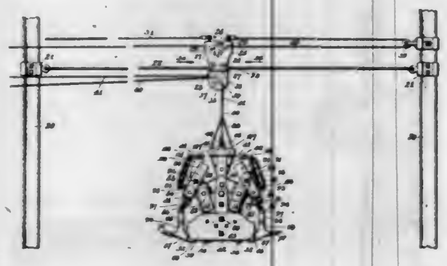
1,666,866. RADIATOR HANGER. DE WITT C. RUFF, 2d, St. Paul, and JAMES H. HEALY, Mahtomedi, Minn., assignors to John A. Healy, James H. Healy, and Daniel W. Hickey, St. Paul, Minn. Filed Feb. 21, 1924, Serial No. 694,249. Renewed Nov. 16, 1925. 11 Claims. (Cl. 248—17.)

6. A radiator hanger comprising a head formed with the back adapted to be hung upon a wall, means for suspending a radiator from said head and an offset adapted to be removably attached to the back of said head and arranged when so attached to support said head upon a wall at a predetermined distance therefrom.



1,666,867. DIRIGIBLE HEADLIGHT. WILLIS M. SWEET, Niles, Mich. Filed Jan. 29, 1927. Serial No. 164,603. 3 Claims. (Cl. 240—62.)

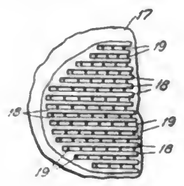
1. In an operating mechanism for dirigible head lights, a vertical shaft for supporting a head light, a securing device for connecting the mechanism to the steering mechanism for a car, a second shaft parallel to the first, a pin and slot device operatively connecting the shafts and arranged to initially move the first shaft at a greater angular velocity than the second shaft and thereafter move the first shaft at a gradually decreasing angular ratio to the angular movement of the second shaft, said mechanism including a segmental gear on the second shaft, a third shaft, a segmental gear on the third shaft meshing with the first segmental gear, a pivot lug



carried by the second gear, and a telescopic connecting device having one end connected to the pivot lug for vertical swinging movement and the other end provided with a ball and socket connection to said securing device.

1,666,868. ICE-SCORING MACHINE. FRANCIS CAMERON WESTMAN, Toronto, Ontario, Canada. Filed Aug. 6, 1927. Serial No. 211,128. 11 Claims. (Cl. 125—13.)

1. In an ice scoring machine, scoring elements, an ice carrier travelling in a substantially rectangular path around said scoring elements and scoring the ice on opposite faces thereof, means for supporting the unscored ice prior to being raised by said carrier, and means for delivering the scored ice.

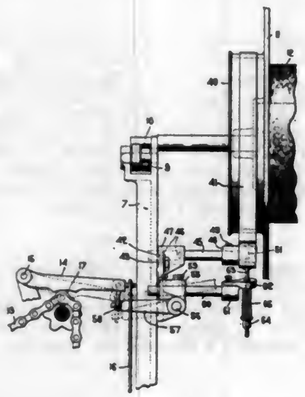


1,666,869. DIGGING, LIFTING, AND CONVEYING APPARATUS. JOHN ZICA, Lackawanna, N. Y., assignor of one-half to Joseph Budaloff, Niagara Falls, N. Y. Filed Jan. 15, 1925. Serial No. 2,568. 20 Claims. (Cl. 37—183.)

1. A suspended digging implement comprising a bucket provided with a bottom having spaced digging elements movable away from each other during digging operation, combined with means for so moving said digging elements.

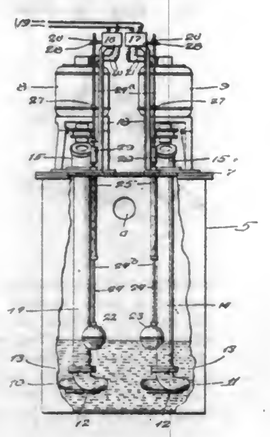
1,666,870. IRONING OR PRESSING MACHINE PAD. STEPHEN E. BECK, St. Louis, Mo. Filed Jan. 25, 1926. Serial No. 83,526. 2 Claims. (Cl. 68—9.)

1. In a device of the class described a sheet of asbestos provided on its under surface with a plurality of closely spaced parallel ribs and having perforations therethrough between said ribs, a loosely woven fibrous pad superimposed on said asbestos sheet, a closely woven fabric covering for said pad, and means for tautly securing said covering over the face of the steaming head



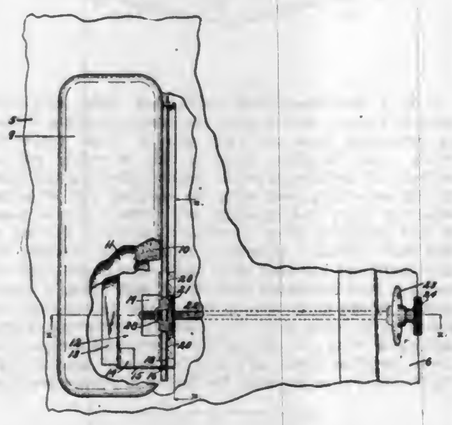
of a pressing machine whereby said pad and said asbestos sheet are held on said steaming head and steam can readily pass from said head to an article being pressed.

1,666,871. HYDRAULIC-BRAKE SOLUTION. WILLIAM G. CALKINS, Detroit, Mich., assignor to Chrysler Corporation, Highland Park, Mich., a Corporation of Delaware. Filed Oct. 9, 1926. Serial No. 140,686. 5 Claims. (Cl. 252—5.)



1. A hydraulic solution composed of castor oil and butyl alcohol.

1,666,872. LET-OFF FOR TERRY LOOMS. HARRY A. DAVIS, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Feb. 23, 1924. Serial No. 694,557. 11 Claims. (Cl. 139—25.)



1. A terry loom comprising a terry warp beam, a friction let-off for the terry warp beam, means acting to cause said let-off to exert a predetermined amount of friction on the terry warp beam during terry weaving, automatically controlled means for changing from terry to plain weaving, and means acting simultaneously with such a change and prior to the first beat-up of plain weaving to effect a predetermined intensification of the amount of friction exerted on the terry warp beam, thereby to maintain the terry loops of uniform and full length to the end of the one of terry weaving and to begin the zone of plain weaving perfectly.

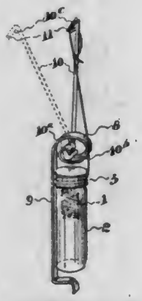
1,666,873. DUPLEX PUMPING APPARATUS. AUGUSTUS C. DURDIN, Jr., Chicago, Ill., assignor to Chicago Pump Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 27, 1927. Serial No. 187,008. 20 Claims. (Cl. 103—11.)

1. A duplex pumping apparatus the combination of a receptacle and a pair of automatically controlled, alternately operating, motor driven pumps for ejecting liquids from said receptacle, the control means for said pumps being governed by the rise and fall of liquid in said receptacle.

1,666,874. COWL VENTILATOR. GEORGE E. GRIMM, Toledo, Ohio, assignor to The Willys-Overland Company, Toledo, Ohio, a Corporation of Ohio. Filed July 27, 1922. Serial No. 577,867. 13 Claims. (Cl. 98—2.)

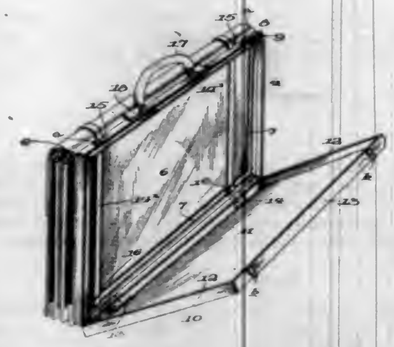
1. In an automobile, a cowl having a ventilating opening therein, a cover therefor, a member secured to said cover and extending into said cowl, a shaft pivotally connecting said member to said cowl, a nut pivotally carried by said member, operating means engaging said nut and a spring engaging said cover, said shaft and said nut.

1,666,875. FLEXIBLE STRAW HAT. MAX KRAUT, New York, N. Y., assignor to New England Panama Hat Company Inc., New York, N. Y. Filed May 7, 1927. Serial No. 189,666. 4 Claims. (Cl. 2—193.)



1. A straw hat comprising a crown and an outer brim portion having the braids sewed in a circular manner, a connecting flexible portion having the braids sewed substantially perpendicular to the circular braids and each braid overlapping the other throughout its length.

1,666,876. LAMP FOR USE ON MOTOR VEHICLES AND FOR OTHER PURPOSES. SIDNEY LEOPOLD PRICE, London, England. Filed Jan. 17, 1923, Serial No. 613,214, and in Great Britain Jan. 17, 1922. 3 Claims. (Cl. 176—26.)

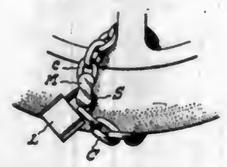


1. An electric lamp, comprising the combination with a bulb and a filament therein, of a second filament forward of the first mentioned filament relative to the socket of the bulb, and a light coloring enclosure around the second filament and carried by the bulb by a portion of its wall opposite the socket.

1,666,877. DENTAL FLOSS HOLDER. ROBERT L. CUMMER, Toronto, Ontario, Canada. Filed Apr. 8, 1927. Serial No. 182,152. 3 Claims. (Cl. 132—92.)

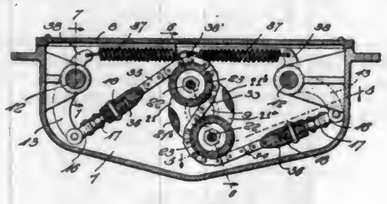
8. In a dental floss holder, the combination of a carrier for the floss; floss gripping means on said carrier; an arm movable relative to the carrier and adapted to have the end of the floss engaged therewith; and a spring normally tending to move said arm to tension the length of the floss between the gripping means on the carrier and the arm.

1,666,878. BRIEF BAG. TITIAN W. JOHNSON, Potomac Beach, Va. Filed Mar. 12, 1927. Serial No. 174,855. 17 Claims. (Cl. 150—1.6.)



10. The combination with a brief case having a back cover, a strip substantially L-shaped in cross section extending around the periphery of the back cover, said strip being substantially L-shaped in cross section, one leg of the strip being secured to the back cover and the other leg projecting at right angles to the cover to form an apparel section, a closure for said apparel section hinged to the projecting leg of the strip adjacent one edge of the back cover, said strip being offset from the back cover at spaced points to provide strap keepers, and straps extending through said keepers and around the brief case.

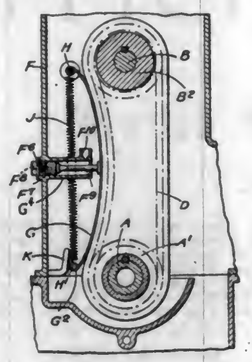
1,666,879. WRENCH. VINCENT BARTON, Cadillac, Mich. Filed Sept. 17, 1925. Serial No. 56,838. 2 Claims. (Cl. 81—134.)



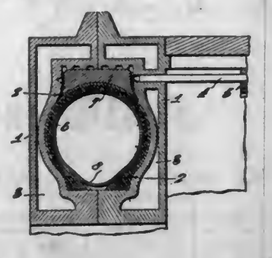
1. In a wrench, the combination of a shank having serrations along one edge and a fixed jaw at one end, a movable jaw provided with cheek plates movably mounted on the movable jaw and having oblique slots, said movable jaw also carrying a pin projecting laterally therefrom and adapted to play in said slots in the cheek plates but frictionally held in said slots against casual play, a serrated clutch block carried between the free ends of cheek plates on a bolt, and means mounted on the bolt for exerting pressure on the cheek plates and clamping the cheek plates against the clutch block to lock the block in interlocked engagement with the serrated shank, whereby the movable jaw is immovably held.

1,666,880. LOCK. HARRY E. SOREF, Milwaukee, Wis. Filed May 10, 1926. Serial No. 108,039. 6 Claims. (Cl. 70—90.)

1. In a securing means the combination of, an intermediate link connecting a chain member to a locking means, parallel and separated plates offering a slot in said link, pivotal spacing studs separating the said plates and longitudinally limiting the slot aforesaid, a lock body provided with a U-shaped lock shackle permanently pivoted about one of said studs and an initial link of said chain member similarly pivoted about the other stud.



1,666,881. EQUALIZING MECHANISM FOR FOUR-WHEEL BRAKES. CELESTIN LAMPER, Cleveland, Ohio. Filed Aug. 26, 1925. Serial No. 52,672. 4 Claims. (Cl. 188—209.)



1. In a four-wheel brake mechanism, front and rear pairs of separate and independent brake actuating levers, an equalizing lever for each pair of brake actuating levers, each equalizing lever having arcuately curved toothed end surfaces, sprocket chains connecting the ends of each equalizing lever with the coacting pair of brake actuating levers and engaging said toothed end surfaces of said equalizing lever, a primary operating element, a rock shaft actuated thereby, a rocker lever actuated by said shaft and provided with arms on opposite sides of its axis, friction rollers carried by said arms, a chain passing in oposite directions around said rollers and connected at its ends with the respective operating levers, said chain being shiftable on the rollers, and springs connected with the brake actuating levers and normally operative thereon to maintain the brakes in release position.

1,666,882. TENSIONING DEVICE FOR TRANSMISSION CHAINS AND THE LIKE. JOHN WELLER, Great Bookham, England. Filed Mar. 28, 1927, Serial No. 179,079, and in Great Britain Apr. 12, 1926. 13 Claims. (Cl. 64—5.)

1. In a tensioning device for flexible transmission members, the combination of a flexible transmission member, two wheels over which this member passes, a flexible metal strip adapted to bear against a portion of the flexible transmission member between the wheels, and means exterior to the strip for applying thereto a force tending to move its ends towards one another and thereby cause the intermediate portion of the strip to bulge and press against the flexible transmission member as set forth.

1,666,883. METHOD OF MAKING PNEUMATIC TIRES. HENRY M. LAMBERT, Portland, Oreg.; Helen H. Lambert executrix of said Henry M. Lambert, deceased. Filed May 25, 1927. Serial No. 194,000. 3 Claims. (Cl. 18—55.)

1. The method of manufacturing pneumatic tires having ventilated treads which includes the steps of building up the carcass proper, applying a thick body of tread stock over the carcass periphery, placing an air bag within the carcass, placing the mass in a confining mold, closing the mold and inflating the air bag to a pressure above the atmosphere to tend to cause the plastic mass to fill the molding cavity of the mold, forcing core pins into the tread stock, and vulcanizing the mass while maintaining pressure within the air bag.

Patents Nos. 1,666,884 to 1,667,710.

THE

OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 369—No. 4. TUESDAY, APRIL 24, 1928. Price—$10 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; including annual indexes, $11.50; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Interference Notices.

U. S. Patent Office, *Washington, Mar. 28, 1928.*

Spinks & McIlwain, their assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Edward P. Read, 1721 Lombard Street, Philadelphia, Pa., for registration of a trade-mark and trade-mark registered September 11, 1923, No. 172,502 to Spinks & McIlwain, 102 Washington Street, Selma, Ala., and a notice of such declaration sent by registered mail to said Spinks & McIlwain at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Spinks & McIlwain, their assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

U. S. Patent Office, *Washington, Mar. 30, 1928.*

Porter-Seitz Shoe Stores Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Edward J. Ramsey, 347 Rider Avenue, New York, N. Y., for registration of a trade-mark and trade-mark registered February 5, 1924, No. 179,326, to Porter-Seitz Shoe Stores Company, 203 Pittsburgh Life Building, Pittsburgh, Pa., and a notice of such declaration sent by registered mail to said Porter-Seitz Shoe Stores Company at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Porter-Seitz Shoe Stores Company, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

Notice of Cancellation.

U. S. Patent Office, *Washington, Mar. 29, 1928.*

The Chillicothe Packing Company, its assigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of John Morrell & Co., of Ottumwa, Iowa, to effect the cancellation of the trade-mark registration of The Chillicothe Packing Company, of Chillicothe, Ohio, No. 40,832, dated July 28, 1903, and the notice of such proceeding sent by registered mail to The Chillicothe Packing Company at the said address having been returned by the post office as undeliverable, notice is hereby given that unless The Chillicothe Packing Company, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

Adverse Decisions in Interference.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,552,364, Vierling and Bartholomew, Pencil, decided March 1, 1928, claim 5.

Pat. 1,583,541, E. T. Ferngren, Forming continuous sheet glass, decided March 13, 1928, claims 6 and 17.

Pat. 1,588,304, A. L. Brownrigg, Composition shingle, decided March 16, 1928, claim 1.

Pat. 1,622,070, Austin and Phelps, Power-transmitting apparatus, decided March 15, 1928, claims 1, 2, and 3.

Pat. 1,623,918, A. H. Grebe, Radio receiving apparatus, decided April 4, 1928, claim 2.

Final decisions in interferences have been rendered against the following trade-marks:

T. M. 193,384, Salve for cuts, wounds, boils, ingrown hairs, and nails, carbuncles, pimples, and the like, William F. Baier, doing business as William F. Baier Manufacturing Company, St. Paul, Minn. Registered December 30, 1924. Decided March 12, 1928.

T. M. 231,689, Pressure-operated electric switches for temperature regulation and safety control of heating plants, Minneapolis Heat Regulator Co., Minneapolis, Minn. Registered August 30, 1927. Decided April 5, 1928.

Condition of Applications Under Examination at Close of Business April 13, 1928.

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 100,831; Trade-Mark Division, 2,455. Oldest new case, July 8, 1927; oldest amended, July 13, 1927. The dates given are 1927 except where † indicates 1928.) DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTIONS.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended. DECISIONS IN PATENT AND TRADE-MARK CASES.

Court of Appeals of the District of Columbia.

IN RE STIMPSON.

No. 2,005. Decided March 5, 1928.

1. DESIGNS—PATENTABILITY—RIVET-SETTING MACHINE.

A design for a rivet-setting machine *Held* unpatentable, since the several parts of the mechanism are "assembled into an entirety which is lacking in symmetry, wanting in grace, and destitute of any appeal to the senses or emotions."

2. SAME—SAME—REQUISITES.

"It is not necessary that the design contemplated by section 4929 should be a work of the fine arts, but it is necessary that the design should be new and original and either embellished or adorned, or distinguished by its grace or symmetry of form."

Mr. Wm. F. Hall and *Mr. Frank J. Kent* for Stimpson.

Mr. T. A. Hostetler for the Commissioner of Patents.

Before MARTIN, Chief Justice, VAN ORSDEL, Justice, and SMITH, Judge U. S. Court of Customs Appeals.

SMITH, *J.:*

This is an appeal from the decision of the Commissioner of Patents refusing to issue a patent to the appellant for an ornamental design of a rivet-setting machine, thereby affirming the action of the Examiner and the Examiners in Chief.

The appellant in November, 1921, filed his application for a patent in which he alleged that he had invented "a certain new, original, and ornamental design for a rivet setting machine" and in that application made claim to "a rivet setting machine having ornamental features of design as illustrated in the drawings."

The drawings submitted with the application disclose a rivet-setting machine every part of which is purely utilitarian and without ornamentation of any kind. There is nothing about the assembled mechanical device which serves to beautify, embellish, or adorn it. The several parts of the mechanism, whether circular, curved, rounded, or spiral, are assembled into an entirety which is lacking in symmetry, wanting in grace, and destitute of any appeal to the senses or emotions. The design has no human interest other than that aroused by the utilitarian nature of the machine.

A thing may be useful and ornamental and may please both because of the purpose for which it was made and because of its beauty. That which is utilitarian, however, pleases because it meets the approval of reason, while that which is ornamental gratifies the senses without reasoning out the why or the wherefore. To bring a design within the meaning of section 4929 of the Revised Statutes as amended by the act of May 9, 1902, it must be new, original, *and ornamental.* The design in issue may be new and original as to form, but it is not ornamental, inasmuch as it does not please the senses or excite the emotions by its color effects or by its proportion of form.

It is not necessary that the design contemplated by section 4929 should be a work of the fine arts, but it is necessary that the design should be new and original, and either embellished or adorned or distinguished by its grace or symmetry of form.

The decision of the Commissioner of Patents is affirmed.

Affirmed.

Court of Appeals of the District of Columbia.

HONDA *v.* BRACE.

No. 2,024. February 6, 1928.

1. INTERFERENCE—PRIORITY—REDUCTION TO PRACTICE.

The making of a number of magnets embodying the invention in issue and testing them, *Held* to constitute a reduction to practice of that invention, even though they were not of a size and shape to be used as permanent magnets in instruments, since, magnets being old, it must be assumed that the magnets in question would be capable of use.

2. SAME—SAME—SAME.

Where B., who had made certain magnets embodying the invention in issue and tested them, disclosed his invention to the assignee company but, the war coming on, the filing of the application was delayed until after the issuance of H.'s foreign patents, *Held* that, there being no evidence tending to show that B., or his assignee, was aware of these patents until B.'s application was filed, or that there was any intention to conceal or suppress the invention, the making of the magnets can not be considered as a mere abandoned experiment.

APPEAL from Patent Office. Affirmed.

Messrs. Mitford C. Massie, Roy F. Steward, and *C. O. McKay* for Honda.

Mr. Wesley G. Carr for Brace.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

ROBB, *J.:*

Appeal from a decision of the Commissioner of Patents in an interference proceeding awarding priority to the party Brace.

The invention relates to a magnetized body of an alloy steel, and is expressed in counts 3, 4, 6, 7, and 8. Counts 3 and 6 are illustrative, and read as follows:

3. As a new article of manufacture, a magnetized body of an alloy steel containing cobalt and a metal of the chromium group.

6. As a new article of manufacture, a permanent magnet comprising a magnetized body of an alloy steel containing a substantial percentage of cobalt substantially uniformly distributed therethrough.

Each of the tribunals of the Patent Office held that Brace was the first to conceive and the first to reduce to practice. The Examiner of Interferences awarded priority to him. The Board awarded priority to Honda, on the ground that the Brace invention had been forfeited by a concealment and delay in filing the application.

An examination of the record convinces us that the tribunals were fully justified in holding that Brace was the first to conceive and the first to re-

duce to practice. He is a skilled metallurgist and, when he made this invention, was employed by the Westinghouse Electric & Manufacturing Company. In the year 1916 he made and tested a number of magnets formed from high cobalt alloy steels, both with and without the addition of other metals. Those magnets were preserved, and were introduced as exhibits, together with the records of the laboratory tests made. Counsel for appellant contend that these tests ought not to be accepted as establishing reduction to practice, because the pieces tested were not of such shape and dimensions as to be suitable for use as permanent magnets in instruments. The Patent Office tribunals rejected this contention, because the counts are not limited to magnets having any particular shape or configuration but are drawn broadly to a magnetized body of alloy steel containing the elements recited therein. We think this position correct. Magnets were old, and it must be assumed that magnets made according to the requirements of these counts would be capable of use.

On March 13, 1917, Brace addressed a letter to the legal department of the company, explaining his invention and stating that he had—

found that the use of chromium and cobalt together in steel gives characteristics which make it well suited for use in permanent magnets.

and that what he desired to patent was—

broadly, the use of chromium and cobalt together in magnetic materials. More particularly, as regards applications, the use of chromium and cobalt together in permanent magnet steels.

The war coming on, there were changes in the company's patent department force, and the application for this invention was not prepared until November 26, 1918. In the meanwhile, on May 6, 1918, and on August 9, 1918, respectively, copies of Honda's Japanese patents, printed in Japanese characters, were filed in the library of the United States Patent Office, but there is no evidence tending to show that these patents came to the attention of Brace, or his assignee, until after the filing of his application; nor is there any evidence from which it fairly may be inferred that there was any intention to suppress or conceal the Brace invention. In fact, the evidence is to the contrary.

The question of diligence is not involved, because Brace was the first to conceive and the first to reduce to practice. *Hubbard* v. *Berg*, 195 O. G. 818, 40 App. D. C. 577. Where an alleged reduction to practice has been followed by a period of inactivity, and the filing of an application has been induced by knowledge of the entry into the field by an adversary, we have held that what was done amounted to nothing more than an abandoned experiment; but where, as here, prior reduction to practice by the first to conceive has been clearly established and there has been no suppression of the invention by him, he is entitled to an award of priority. *Rolfe* v. *Kaisling*, 143 O. G. 562, 32 App. D. C. 582; *Lederer* v. *Walker*, 182 O. G. 511; 39 App. D. C. 122. The decision appealed from is correct and is affirmed.

Affirmed.

Court of Appeals of the District of Columbia.

IN RE CORA W. BURT AND THE DOLLAR SAVINGS AND TRUST COMPANY, OF YOUNGSTOWN, OHIO, EXECUTORS OF HARRY B. BURT, DECEASED.

No. 2,028. Decided February 6, 1928.

PATENTABILITY—FROZEN CONFECTION.

A frozen confection including a frozen body portion and a stick member partially embedded therein and attached thereto by congelation, *Held* patentable over prior art disclosing a confection consisting of a core of ice cream wrapped in tinfoil or other appropriate material, and a lollipop produced by inserting a stick into warm candy, since it is one thing to insert the stick into a warm, soft substance that by cooling will adhere thereto and quite another to effect a strong union between a stick and a frozen substance.

APPEAL from Patent Office. Reversed.

Mr. H. S. Hill, *Mr. H. C. Robb*, and *Mr. J. F. Robb* for Burt.

Mr. T. A. Hostetler for Commissioner of Patents.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

ROBB, *J.*:

Appeal from a decision of the Patent Office refusing the claims of the application.

The invention relates to a frozen confection on a stick. Claims 1, 3, and 6 are sufficiently illustrative, and are here reproduced:

1. A frozen confectionery product including a frozen body portion formed of an edible substance which is fluid at normal temperatures and congeals by refrigeration, and a stick member partially embedded in the body portion and attached thereto by congelation, the projecting end of the stick member forming a handle.

3. A frozen confectionery product, including a frozen ice-cream body portion, and a stick having one end thereof embedded in the ice-cream body portion, the other end of the stick projecting from the body portion and forming a handle by means of which the ice-cream body portion can be held while being eaten.

6. A frozen confectionery product, including an ice-cream portion, a handle member attached to the body portion, and an outer covering surrounding the body portion and formed of granulated particles of an edible substance which is comparatively hard and nonsticky at normal temperatures.

In 1922 there was granted Patent No. 1,404,539 to Nelson on so-called "Eskimo Pie," consisting of a core of ice cream, wrapped in tinfoil or other appropriate material. The object of the invention, as stated by Nelson, was—

to provide a frozen dainty comprising a form retaining block or brick of ice cream or the like, also to provide an encasement therefor which facilitates its ready handling.

This product achieved wide popularity. There was also on the market, and had been for years, the ordinary candy lollipop or sucker. These lollipops are produced by inserting a stick into the warm, sticky candy, which hardens and holds the stick. Mr. Burt was in the ice cream business, and the idea occurred to him to insert a similar stick in a small block of ice cream. Ice cream is not a sticky substance, but, on the contrary, is oleaginous. To insert a stick in a small cake of frozen ice cream would break the cake apart, and if the cream was less hard the stick would not adhere sufficiently to permit handling. Of course, to be a success the union between the stick and the frozen cream must be such as to permit the eating of the cream without breaking the union, and to make this result attractive to the public it must be accomplished without human hands touching the article in the process of manufacture. Finally, Mr. Burt hit upon the idea of freezing the stick in the ice cream; that is, by inserting the stick in the cream before freezing and then subjecting the mass to refrigeration. His experiments demonstrated that such a process created the desired union between the cream and the stick. The product was placed upon the market and has been a great success. In addition to the present application for a patent on the product, an application for a process patent was filed. The process patent was allowed, but its allowance is no bar to the allowance of this application. See *In re Zenk*, 277 O. G. 183, 50 App. D. C. 25; 267 Fed. 327.

The Examiner, in passing upon the present application, said:

Merely because applicant's article appears to be new is no basis for the grant of a patent. A patent may not be granted on a new article unless it is clear that it required the exercise of the inventive faculties to produce the article.

The Examiner was of the view that it required no invention to combine the lollipop stick and the Eskimo Pie. The Examiners in Chief were of the same view, and the Commissioner, in affirming their decision, said:

Heretofore the candy while in a warm, plastic state has been roughly shaped and pressed around an end of the stick by hand, or an end of the stick has been forcibly pushed into the mass, *the cooling and hardening* of which affixed it to the stick more or less securely.

The Commissioner, therefore, concluded that it was old "to secure the confection to the stick by a freezing or congealing operation."

[1] We are unable to agree with this conclusion. It is one thing to insert a stick in a warm, soft, sticky substance that by cooling will adhere thereto and quite another thing to effect a strong union between a stick and a frozen substance. Nor is the Patent Office quite consistent in its position, for it granted a patent to Nelson on his Eskimo Pie, and has since granted him a patent on the process of manufacturing it. In our view, applicant's process and product involve quite as much novelty as is involved in Nelson's process and product. As admitted by the Patent Office, applicant has produced a new article which has found public favor, and his useful and "happy thought" should be recognized. The quoted claims protect his product and his alone. It is quite easy, now that he has solved the problem, to reach the conclusion that it was very simple of solution, but the patent law contemplates rewarding the one who really solves it and not the one who, after its solution, thinks he could have solved it.

The decision is reversed.

Reversed.

Patent Suits.

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922.]

1,008,719, O. Kampfe, Safety razor, D. C., S. D. N. Y., Doc. E 37/248, *American Safety Razor Corp.* v. *Curvfit Products Co., Inc.* Complaint dismissed Mar. 13, 1928.

1,018,502, Just & Hanaman, Manufacture of incandescent electric lamps, D. C., W. D. N. Y., Doc. 1243–G. *General Electric Co.* v. *Meserrey's Industries, Inc., et al.* Consent decree Feb. 27, 1928. Same, D. C., S. D. N. Y., Doc. E 37/224, *General Electric Co.* v. *M. Kaplan.* Decree sustaining patent Mar. 9, 1928.

1,046,736, B. A. Clayton, Operating table or chair, D. C., S. D. Iowa (Davenport), Doc. E 4087, *B. J. Palmer* v. *Williams Mfg. Co. et al.* Dismissed by stipulation Feb. 25, 1928.

1,088,476, W. E. Stiles, Operating table, D. C., S. D. Iowa (Davenport), Doc. E 4088, *M. H. Palmer* v. *Williams Mfg. Co. et al.* Dismissed by stipulation Feb. 25, 1928.

1,128,144. (See Re. 12,725.)

1,128,145. (See Re. 12,725.)

1,128,252. (See Re. 12,725.)

233,123. Certain named polishing and cleaning solutions. John Quincy Adams, Philadelphia, Pa. Registered September 20, 1927. Canceled April 7, 1928.

233,427. Certain named canned fruits and vegetables. Middle States Packing Company, Chicago, Ill. Registered September 27, 1927. Canceled March 19, 1928.

234,578. Men's hats and caps. Levitt Hat Co., Inc., New York, N. Y. Registered November 1, 1927. Canceled March 27, 1928.

Adjudicated Patents.

(C. C. A. N. Y.) The Sulzberger patent, No. 1,038,227, for chewing gum containing phenolpthalein, *Held* invalid and if valid, not infringed. *Health Products Corporation* v. *Ex-Lax. Mfg. Co.*, 24 F. (2d) 245.

(D. C. Ill.) The Boyce patent, No. 1,090,776, for indicating system and apparatus for internal-combustion engines, claims 1–5 *Held* valid and infringed. *Boyce* v. *Semaphoric Indicator Co.*, 24 F. (2d) 248.

(C. C. A. Cal.) The Hicks patent, No. 1,518,067, for electric wall heater, claims 9 to 17 *Held* not infringed. *Majestic Electric Appliance Co.* v. *Hicks*, 24 F. (2d) 165.

TRADE-MARKS

OFFICIAL GAZETTE, APRIL 24, 1928.

[VOL. 369. No. 4.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

CLASS 1.

Raw or Partly-Prepared Materials.

Ser. No. 227,736. FRIED-LANG LEATHER CO., INC., New York, N. Y. Filed Feb. 24, 1926.

No claim is made to the right to the exclusive use of any of the wording with the exception of the letters F.—L. except in the setting and relation in which they appear in the drawing.

Particular description of goods.—Leather.

Claims use since April, 1921.

Ser. No. 254,146. N. V. NEDERLANDSCHE KUNSTZIJDEFABRIEK, Arnhem, Netherlands. Filed Aug. 30, 1927.

SUMMUM

Particular description of goods.—Raw Wool, Artificial Straw, Artificial Horsehair, Staple Fibers and Mixed Fibers in the Raw State of Silk, Wool, Cotton, Mercerized Cotton, and Linen; and Staple Fibers and Mixed Fibers in the Raw State of Artificial Silk, Artificial Wool, Artificial Cotton, Artificial Mercerized Cotton, and Artificial Linen.

Claims use since Mar. 20, 1926.

Ser. No. 260,806. CONSOLIDATED RENDERING COMPANY, doing business as Atlantic Packing Company, Boston, Mass. Filed Jan. 28, 1928.

ATLANTIC PACKING COMPANY

Particular description of goods.—Wool Shorn from Sheep, Furs, and Bone for Manufacturing Purposes.

Claims use since about February, 1906.

Ser. No. 261,062. IVES ICE AND COAL COMPANY, North Tonawanda, N. Y. Filed Feb. 2, 1928.

No claim is made to the word "Coal" apart from the mark shown.

Particular description of goods.—Coal.

Claims use since Nov. 25, 1927.

Ser. No. 261,213. SCHROETER COAL COMPANY, St. Louis, Mo. Filed Feb. 4, 1928.

HOME COMFORT

Particular description of goods.—Coal.

Claims use since Sept. 1, 1922.

Ser. No. 261,406. VELDOWN COMPANY, INC., New York, N. Y. Filed Feb. 8, 1928.

SWANFLEECE

Particular description of goods.—Cellulose Wadding.

Claims use since January, 1927.

Ser. No. 261,799. THE DELAWARE, LACKAWANNA & WESTERN COAL COMPANY, New York, N. Y. Filed Feb. 17, 1928.

BLUE MARK

Particular description of goods.—Coal.
Claims use since Jan. 19, 1928.

CLASS 2.

Receptacles.

Ser. No. 226,352. THE GLASCOTE COMPANY, Euclid, Ohio. Filed Jan. 25, 1926.

GLASCOTE

Particular description of goods.—Enameled Tanks for Use in the Manufacture of, Transportation, and Storage of Liquid Products.
Claims use since December, 1919.

Ser. No. 245,039. WESTERN ENVELOPE CORPORATION, Brooklyn, N. Y. Filed Feb. 28, 1927.

"WESTENCO"

Particular description of goods.—Paper Boxes, Cartons, and Merchandise Envelopes.
Claims use since Feb. 9, 1927.

Ser. No. 258,841. ST. LOUIS LABEL WORKS, St. Louis, Mo. Filed Dec. 12, 1927.

Jim Dandy

Particular description of goods.—Paper Boxes.
Claims use since Feb. 24, 1927.

Ser. No. 261,905. FRANK A. PIKE, Rochester, N. Y. Filed Feb. 18, 1928.

PI-K Products

No claim is made for the word "Products" apart from the mark as shown.
Particular description of goods.—Underground Garbage Containers.
Claims use since Mar. 1, 1927.

CLASS 3.

Baggage, Animal Equipments, Portfolios, and Pocketbooks.

Ser. No. 261,050. DUTCHESS MFG. CO., Poughkeepsie, N. Y. Filed Feb. 2, 1928.

Hull Workshop

Particular description of goods.—Hand Bags and Other Fancy Bags, Work Bags, and Novelty Bags of Textile Material All in the Nature of Hand Bags.
Claims use since Nov. 1, 1927.

CLASS 4.

Abrasive, Detergent, and Polishing Materials.

Ser. No. 260,280. H. KOHNSTAMM & CO., INC., New York, N. Y. Filed Jan. 18, 1928. Under 10-year proviso.

FRANKLIN

Particular description of goods.—Soap Flakes.
Claims use since 1885.

Ser. No. 261,507. RICHARD C. HARRISON, doing business as Harrison & Company, Haverhill, Mass. Filed Feb. 10, 1928.

4A

Particular description of goods.—Valve-Grinding Compounds.
Claims use since Feb. 4, 1928.

Ser. No. 261,508. RICHARD C. HARRISON, doing business as Harrison & Company, Haverhill, Mass. Filed Feb. 10, 1928.

DOUBLE SIDED 4A RAZOR HONE

Exclusive rights to the use of the words "Double Sided Razor Hone" is disclaimed except in connection with the mark as shown.
Particular description of goods.—Razor Hone.
Claims use since Feb. 4, 1928.

Ser. No. 261,971. MARIE EARLE, INC., New York, N. Y. Filed Feb. 20, 1928.

Marie Earle

The trade-mark consists of the words "Marie Earle" written in the handwriting of Juanita Ebbsmith, a member of the original firm of Marie Earle.
Particular description of goods.—Soap.
Claims use since 1923.

Ser. No. 262,508. CHROME LIQUID, INC., Chicago, Ill. Filed Mar. 2, 1928.

-KRO-MO-NIZE-

Particular description of goods.—Liquid Metal Polish.
Claims use since Feb. 23, 1928.

Ser. No. 262,526. J. C. PENNEY COMPANY, Wilmington, Del., and New York, N. Y. Filed Mar. 2, 1928.

MAJESTIC

Particular description of goods.—Leather Dressing.
Claims use since Dec. 10, 1927.

Ser. No. 262,959. THE GREAT AMERICAN TEA CO., New York, N. Y. Filed Mar. 10, 1928.

Golden Key

Particular description of goods.—Stove and Metal Polish.
Claims use since January, 1925.

Ser. No. 263,066. THE BAKER-FINLEY CHEMICAL COMPANY, Cleveland, Ohio. Filed Mar. 13, 1928.

DINA

The color lining on the drawing indicates red.
Particular description of goods.—Washing Compound.
Claims use since Jan. 12, 1928.

CLASS 5.

Adhesives.

Ser. No. 243,196. WENDELL J. CALEY, doing business as Titite Company, Bala, Pa. Filed Jan. 22, 1927.

The words "Trade-Mark" and "Super Paste" are disclaimed apart from the mark shown.
Particular description of goods.—Adhesive Mending Fluid.
Claims use since Jan. 1, 1925.

Ser. No. 261,690. THE AMERICAN CRAYON COMPANY, Sandusky, Ohio. Filed Feb. 15, 1928.

POLAR BEAR

Particular description of goods.—Adhesive Paste.
Claims use since Feb. 6, 1928.

Ser. No. 262,359. HENNING-OBLA BRUHN, Copenhagen, Denmark. Filed Feb. 28, 1928.

Particular description of goods.—Glues and Mucilages.
Claims use since Sept. 21, 1927.

CLASS 6.

Chemicals, Medicines, and Pharmaceutical Preparations.

Ser. No. 229,148. CHEMISCHE FABRIK "PROMONTA" GESELLSCHAFT MIT BESCHRÄNKTER HAFTUNG, Hamburg, Germany. Filed Mar. 25, 1926.

„Promonta"

Particular description of goods.—Chemical and Organotherapeutical Preparations Indicated for Treating Malnutrition, Neurasthenia, Chlorosis, Anæmia, Hypotrophy, Avitaminoses, Tuberculosis, and the Convalescent; Kidney, Corn, Bunion, and Rheumatism Plasters; Chemical Preparations Used as Rodent and Plant Exterminators, Disinfectants, Chemical Food Preservatives, Perfumery, Hair Tonics, Toilet Powders, Toilet Creams and Rouges, Essential Oils, Toilet Lotions, Dyes, Chemical Bleaches and Bleaching Powders; Laundry Starch, Laundry Bluing, and Scouring and Fulling Preparations for Textiles.
Claims use since October, 1919.

Ser. No. 250,233. CHRISTY DOUNSTIDES, Burlington, Vt. Filed June 9, 1927.

The words "Dressing," "Hair," and "Brilliant" are disclaimed.
Particular description of goods.—Hair Tonic.
Claims use since May 1, 1927.

Ser. No. 251,413. DR. F. RASCHIG, Ludwigshafen-on-the-Rhine, Germany. Filed July 1, 1927.

Neso

Particular description of goods.—Preparation for the Treatment of Colds.
Claims use since Feb. 15, 1926.

Ser. No. 252,537. ROBERT L. TUGGLE, Louisville, Ky. Filed July 25, 1927.

RUST-I-CATE

Particular description of goods.—Rust Remover and Corrosion Preventer Consisting of a Chemical Composition to be Applied to Metal Surfaces to Remove Rust and Prevent Corrosion.
Claims use since Sept. 29, 1926.

Ser. No. 253,883. IDA MAY FOLSOM, doing business as Mrs. George W. Folsom, McAllen, Tex. Filed Aug. 24, 1927.

VAL-RIE

Particular description of goods.—Preparation for the Complexion.
Claims use since June 14, 1924.

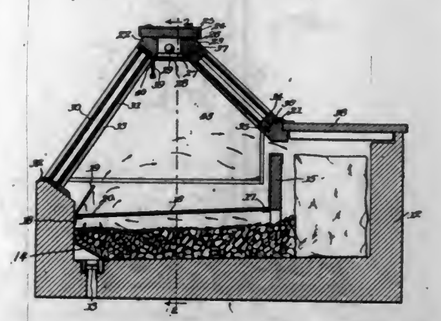
REISSUES

APRIL 24, 1928.

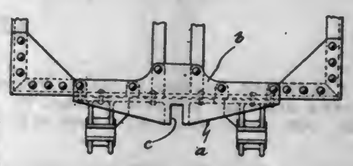
16,939. VAT DYESTUFF AND PROCESS OF MAKING SAME. JOSEPH G. DINWIDDIE, Penns Grove, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Dec. 2, 1926. Serial No. 152,241. Original No. 1,558,252, dated Oct. 20, 1925, Serial No. 1,153, filed Jan. 8, 1925. 10 Claims. (Cl. 260—49.)

1. The process of producing a vat dyestuff which comprises condensing a halogenated isatin-chloride with one molecularly-equivalent amount of an hydroxy-methyl-halothionaphthene.



16,940. THERMOSTAT. ROBERT F. MASSA, New York, N. Y., assignor, by mesne assignments, to Ralph Penn and Albert Penn, Des Moines, Iowa. Filed Jan. 9, 1928. Serial No. 245,614. Original No. 1,146,637, dated July 13, 1915, Serial No. 800,398, filed Nov. 11, 1913. 11 Claims. (Cl. 200—87.)

1. In an automatic temperature controlling device the combination of a flexible, elastic thermostatic member, rigidly fastened at one point, an armature carried on said thermostatic member at another point, a magnetic field of varied intensity located within the line of travel of the armature when moved by the effect of varying temperature on the thermostatic member, a contact member located near the point of greatest intensity of the field and a cooperating contact member carried by the thermostatic member.

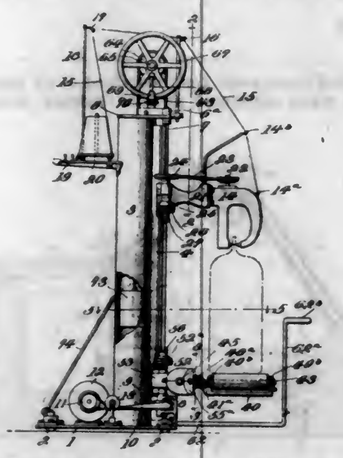


16,941. REFRIGERATING CASE. REUBEN E. OTTENHEIMER, Baltimore, Md., assignor to Ottenheimer Bros., Inc., Baltimore, Md., a Corporation of Maryland. Filed Feb. 8, 1928. Serial No. 252,920. Original No. 1,572,855, dated Feb. 9, 1926, Serial No. 6,151, filed Jan. 31, 1925. 14 Claims. (Cl. 62—37.)

1. The combination of a display case having a wide bottom, a top defined by a narrow frame structure, and an inclined transparent front sustained at its upper edge by said frame structure; artificial lighting means con-

cealed within the top of said frame structure; and refrigerating means arranged to exert a localized refrigerating effect in the lower portion of said case.

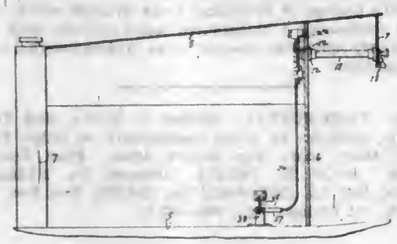
16,942. TRAILER LOCK. FREDERICK MALCOLM REID, Detroit, Mich., assignor to Fruehauf Trailer Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 29, 1927. Serial No. 164,593. Original No. 1,566,617, dated Dec. 22, 1925, Serial No. 10,747, filed Feb. 21, 1925. 10 Claims. (Cl. 280—33.1.)



1. A center lock for vehicles, having in combination an upper member, a lower member, with two members arranged to have relative movement with respect to each other, a bolt guide housing on the one member, a table provided with a center keeper socket on the other member, a sliding bolt guided in the bolt guide and tending to project into the keeper socket when lined up therewith, and means connected with the outer end of the sliding bolt and operating in direct connection with the bolt guide housing to either release the bolt for automatic projection into the keeper socket or else to set the bolt against projection into the keeper socket.

16,943. LUBRICATING COMPOUND. RALPH PAGE JUDD, Cleveland, Ohio. Filed Sept. 9, 1926. Serial No. 134,568. Original No. 1,449,608, dated Mar. 27, 1923, Serial No. 380,598, filed May 11, 1920. 4 Claims. (Cl. 87—9.)

1. A lubricating compound consisting of lubricating oil thickened to the consistency of heavy grease by finely divided zinc white, in substantially the proportion of about five gallons of the oil and one hundred pounds of the zinc white.

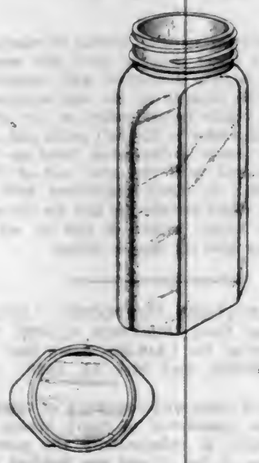


16,944. BAG-SEWING MACHINE. FRANK J. THULL, Minneapolis, Minn., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 28, 1926. Serial No. 132,291. Original No. 1,570,100, dated Jan. 19, 1926, Serial No. 726,501, filed July 17, 1924. 28 Claims. (Cl. 112—11.)

18. A machine for operating on bags comprising a column, a sewing head on said column, a conveyor normally disposed substantially horizontally for supporting bags and vertically movable on said column, said conveyor being pivoted about a substantially horizontal axis adjacent said column and swingable about said axis into substantially vertical depending position.

26. A bag sewing machine comprising a supporting frame structure including spaced vertical guides, a support for a filled bag mounted for vertical adjustment on said guides, means for adjusting said support, a sewing head mounted for vertical adjustment on said guides and overhanging the bag support, means for adjusting said sewing head, said sewing head and said support being movable substantially throughout the length of said supporting frame so that the range of adjustments of said head and said support overlap each other.

16,945. AUTOMOBILE THEFT LOCK. EDWARD R. KNIGHT, Carson City, Nev., assignor, by direct and mesne assignments, to Chas. E. Townsend, San Francisco, Calif. Filed Mar. 10, 1928. Serial No. 260,693. Original No. 1,598,529, dated Aug. 31, 1926, Serial No. 73,759, filed Dec. 7, 1925. 6 Claims. (Cl. 180—82.)

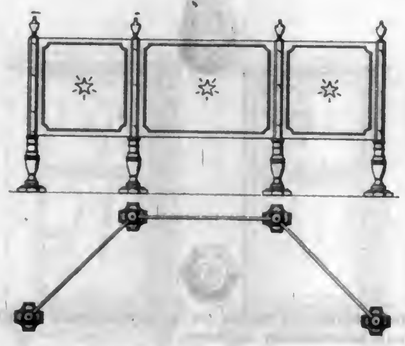


4. In combination with an automobile having an ignition system, a locking mechanism therefor, said locking mechanism comprising a key-actuated lock, a cam secured thereto, a wire actuated in opposite directions by said cam, extending to a remote point for the purpose of locking and unlocking an essential part of the automobile when said locking mechanism is selectively rotated.

DESIGNS

APRIL 24, 1928.

74,956. CANDY JAR. ALFRED S. ADAMS, WILLIS BURTON ADAMS, and PAUL S. MOYER, Chicago, Ill. Filed Nov. 29, 1926. Serial No. 19,877. Term of patent 14 years.



The ornamental design for a candy jar as shown.

74,957. LADY'S HAND BAG. MAX ARNOLD, New York, N. Y., assignor to Herman Scheuer's Sons & Co., New York, N. Y., a Copartnership composed of Jacob H. Scheuer and Henry Lichtenstein. Filed Sept. 7, 1927. Serial No. 23,318. Term of patent 3½ years.

The ornamental design for a lady's hand bag, substantially as shown.

74,958. SCREEN. ABRAHAM ASHKENAS, Brooklyn, N. Y. Filed Feb. 1, 1928. Serial No. 25,125. Term of patent 14 years.

The ornamental design for a screen, as shown.

74,959. SPINDLE FOR FURNITURE PIECES. OSCAR B. BACH, New York, N. Y. Filed Nov. 10, 1927. Serial No. 24,067. Term of patent 3½ years.

The ornamental design for a spindle for furniture pieces, as shown.

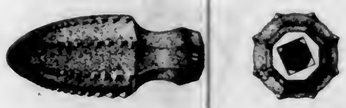
74,960. METAL BOWL OR SIMILAR ARTICLE. ERNEST T. BECK, Meriden, Conn., assignor to International Silver Co., Meriden, Conn., a Corporation of New Jersey. Filed Nov. 9, 1927. Serial No. 24,051. Term of patent 7 years.

The ornamental design for a metal bowl or similar article as shown.

74,961. ICE-CREAM CONE. CHARLES F. BETZ, St. Louis, Mo., assignor to American Cone & Pretzel Company, Philadelphia, Pa., a Corporation of West Virginia. Filed Nov. 14, 1927. Serial No. 24,122. Term of patent 7 years.

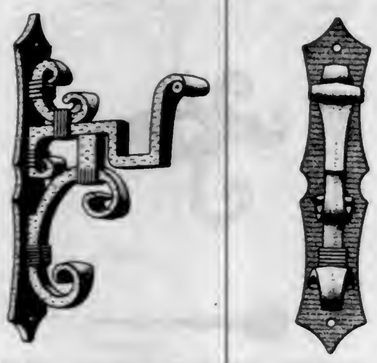
The ornamental design for an ice cream cone as shown.

74,962. CURTAIN-POLE END OR SIMILAR ARTICLE. JAMES O. CRAWFORD, Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y., a Corporation of New York. Filed Nov. 26, 1927. Serial No. 24,292. Term of patent 3½ years.



The ornamental design for a curtain pole end or similar article substantially as shown.

74,963. CURTAIN-POLE END OR SIMILAR ARTICLE. JAMES O. CRAWFORD, Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y., a Corporation of New York. Filed Nov. 26, 1927. Serial No. 24,293. Term of patent 3½ years.



The ornamental design for a curtain pole end or similar article, substantially as shown.

74,964. CURTAIN-POLE END OR SIMILAR ARTICLE. JAMES O. CRAWFORD, Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y., a Corporation of New York. Filed Nov 26, 1927. Serial No. 24,294. Term of patent 3½ years.

The ornamental design for a curtain pole end or similar article substantially as shown.

74,965. CURTAIN-POLE BRACKET OR SIMILAR ARTICLE. JAMES O. CRAWFORD, Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y., a Corporation of New York. Filed Nov. 26, 1927. Serial No. 24,296. Term of patent 3½ years.

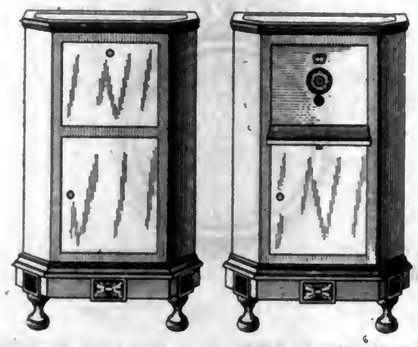
The ornamental design for a curtain pole bracket or similar article substantially as shown.

74,966. CURTAIN TASSEL OR SIMILAR ARTICLE. JAMES O. CRAWFORD, Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y., a Corporation of New York. Filed Nov. 26, 1927. Serial No. 24,298. Term of patent 3½ years.

The ornamental design for a curtain tassel or similar article, substantially as shown.

74,967. CURTAIN-POLE END OR SIMILAR ARTICLE. JAMES O. CRAWFORD, Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y., a Corporation of New York. Filed Dec. 1, 1927. Serial No. 24,354. Term of patent 3½ years.

The ornamental design for a curtain pole end or similar article substantially as shown.



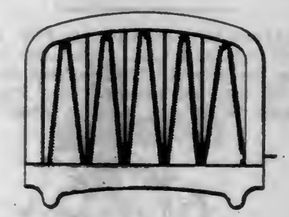
74,968. POWDER PUFF. EDNA DANIELSON, Berkeley, Calif. Filed Oct. 20, 1926. Serial No. 19,434. Term of patent 7 years.

The ornamental design for a powder puff substantially as shown.

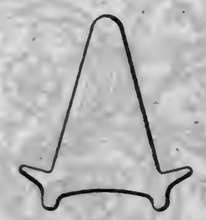
74,969. RADIOCABINET. NOEL S. DUNBAR, New York, N. Y., assignor, by mesne assignments, to Splitdorf Radio Corporation, Newark, N. J. Filed Jan. 20, 1928. Serial No. 24,949. Term of patent 3½ years.

The ornamental design for a radiocabinet, as shown.

74,970. RADIOCABINET. NOEL S. DUNBAR, New York, N. Y., assignor, by mesne assignments, to Splitdorf Radio Corporation, Newark, N. J. Filed Jan. 20, 1928. Serial No. 24,950. Term of patent 3½ years.



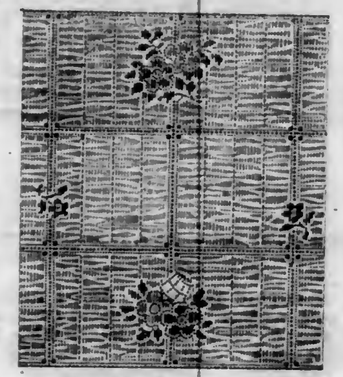
The ornamental design for a radiocabinet, as shown.



74,971. RADIOCABINET. NOEL S. DUNBAR, New York, N. Y., assignor, by mene assignments, to Splitdorf Radio Corporation, Newark, N. J. Filed Jan. 20, 1928. Serial No. 24,951. Term of patent 3½ years.

The ornamental design for a radiocabinet, as shown.

74,972. ELECTRIC TOASTER. GEORGE EATON, Cleveland, Ohio, assignor to May C. Eaton, Cleveland, Ohio. Filed Dec. 5, 1927. Serial No. 24,896. Term of patent 14 years.

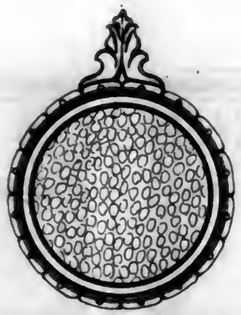


The ornamental design for an electric toaster, as shown.

74,973. HOLDER FOR GLASSES. SIMON W. FARBER, Brooklyn, N. Y. Filed Sept. 21, 1927. Serial No. 23,495. Term of patent 14 years.

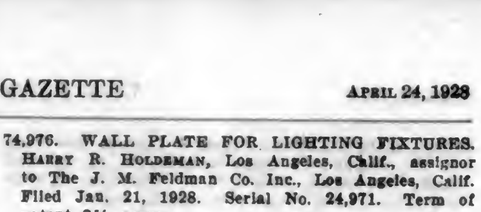
The ornamental design for a holder for glasses substantially as shown.

74,974. LINOLEUM OR SIMILAR HARD-SURFACED FLOOR COVERING. OSCAR W. FAUSER, Bellerose, N. Y. Filed Oct. 29, 1927. Serial No. 23,929. Term of patent 7 years.



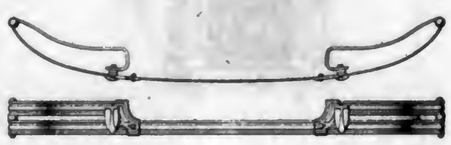
The ornamental design for linoleum or similar hard surfaced floor covering, substantially as shown and described.

74,975. ITALIAN-EFFECT GRILLE FOR LIGHTING FIXTURES OR SIMILAR ARTICLES. HARRY R. HOLDEMAN, Los Angeles, Calif., assignor to The J. M. Feldman Co. Inc., Los Angeles, Calif. Filed Jan. 21, 1928. Serial No. 24,970. Term of patent 3½ years.



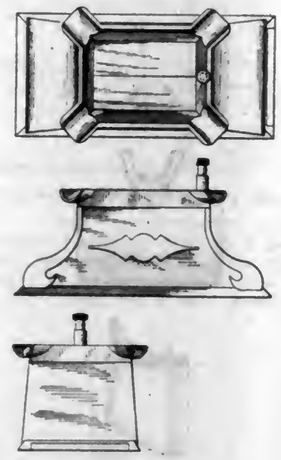
The ornamental design for an Italian effect grille for lighting fixtures or similar articles as shown.

74,976. WALL PLATE FOR LIGHTING FIXTURES. HARRY R. HOLDEMAN, Los Angeles, Calif., assignor to The J. M. Feldman Co. Inc., Los Angeles, Calif. Filed Jan. 21, 1928. Serial No. 24,971. Term of patent 3½ years.



The ornamental design for a wall plate for lighting fixtures as shown.

74,977. VEHICLE BUMPER. HERBERT S. JANDUS and NORMAN VAN HUSEN, Detroit, Mich., assignors to The C. G. Spring & Bumper Company, Detroit, Mich., a Corporation of Delaware. Filed Dec. 23, 1927. Serial No. 24,621. Term of patent 14 years.

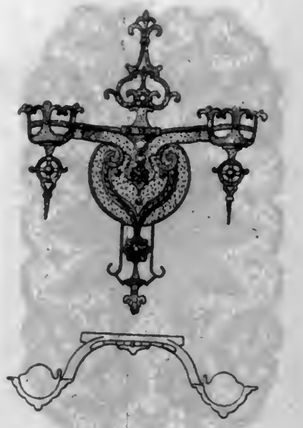


The ornamental design for a vehicle bumper substantially as shown.

74,978. VEHICLE BUMPER. HERBERT S. JANDUS and NORMAN VAN HUSEN, Detroit, Mich., assignors to The C. G. Spring & Bumper Company, Detroit, Mich., a Corporation of Delaware. Filed Dec. 23, 1927. Serial No. 24,627. Term of patent 14 years.

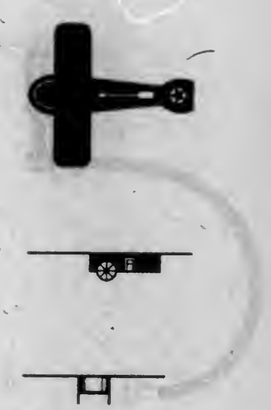
The ornamental design for a vehicle bumper, substantially as shown.

74,979. ASH TRAY. SAMUEL KIRSNER, Malden, Mass. Filed Nov. 11, 1927. Serial No. 24,082. Term of patent 14 years.



The ornamental design for an ash tray as shown.

74,980. COMBINED DESK SET AND PICTURE FRAME. HENRY AUGUST KRETSCHMER, La Grange Park, Ill. Filed Jan. 3, 1928. Serial No. 24,727. Term of patent 14 years.

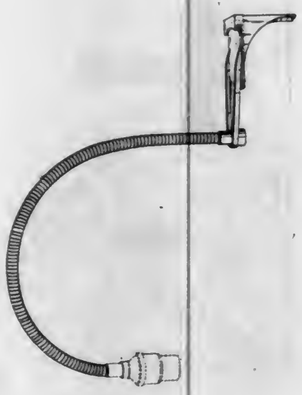


The ornamental design for a combined desk set and picture frame, as shown.

74,981. LIGHTING-FIXTURE WALL BRACKET OR ANALOGOUS ARTICLE. NORMAN LIPSKY, New York, N. Y., assignor to Halcolite Company, Inc., a Corporation of New York. Filed Feb. 21, 1928. Serial No. 25,530. Term of patent 7 years.

The ornamental design for a lighting fixture wall bracket or analogous article substantially as shown.

74,982. STICK-CANDY WRAPPER. CHARLES R. LUCE, New York, N. Y. Filed Jan. 20, 1928. Serial No. 24,943. Term of patent 14 years.

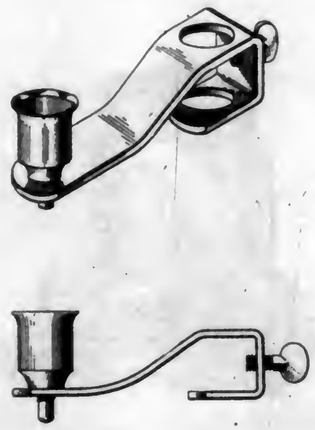


The ornamental design for a stick candy wrapper substantially as shown.

74,983. LACE MEDALLION. WALTER MEADS, Hightstown, N. J., assignor to Acme Lace Works, Inc., Hightstown, N. J., a Corporation of New Jersey. Filed Feb. 14, 1928. Serial No. 25,440. Term of patent 3½ years.

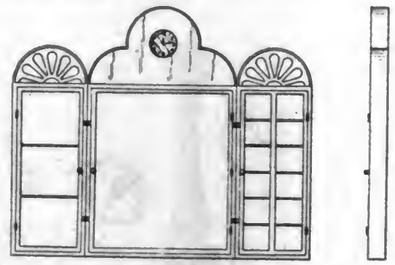
The ornamental design for a lace medallion, as shown.

74,984. BRACKET FOR LIGHTING FIXTURES. AUGUST G. MYERS, Cleveland, Ohio. Filed Jan. 23, 1926. Serial No. 16,231. Term of patent 7 years.



The ornamental design for a bracket for lighting fixtures as shown.

74,985. COMBINED SWITCH BOX AND SUPPORT FOR A HAND TELEPHONE. HERBERT F. OBERGFELL, River Forest, Ill., assignor to Automatic Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 10, 1925. Serial No. 15,079. Term of patent 14 years.



The ornamental design for a combined switch box and support for a hand telephone, as shown.

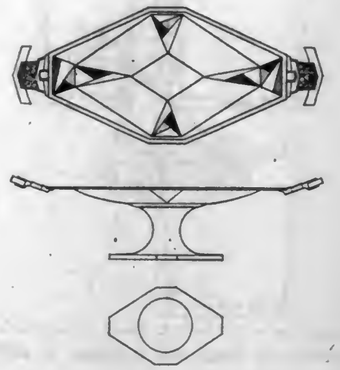
74,986. CANDLE-HOLDING BRACKET. ANDREW PAUL, Philadelphia, Pa. Filed Aug. 8, 1927. Serial No. 22,990. Term of patent 3½ years.

The ornamental design for a candle holding bracket as shown.

74,987. DISPLAY STAND. ROY LEWIS POULTON, Columbus, Ohio. Filed Sept. 12, 1927. Serial No. 23,890. Term of patent 14 years.

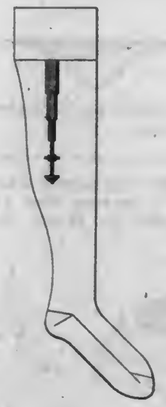
The ornamental design for a display stand as shown.

74,988. POCKET LIGHTER. WILLIAM RAEBURN, Waterbury, Conn., assignor to M. E. Bernhardt Company, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 2, 1927. Serial No. 23,282. Term of patent 14 years.



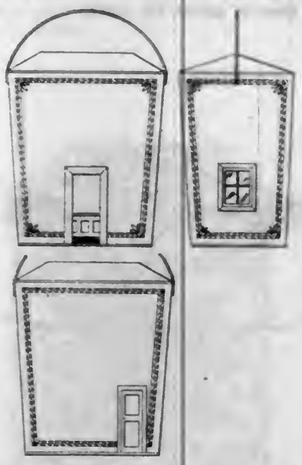
The ornamental design for a pocket lighter substantially as shown.

74,989. COMBINED CIGARETTE LIGHTER AND CIGARETTE CONTAINER. ALFRED F. REILLY, Attleboro, Mass. Filed Jan. 19, 1928. Serial No. 24,933. Term of patent 3½ years.



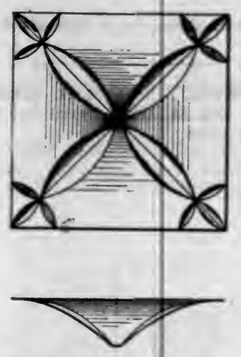
The ornamental design for a combined cigarette lighter and cigarette container, as shown.

74,990. CAKE STAND. ALBERT F. SAUNDERS, Syracuse, N. Y., assignor to T. N. Benedict Mfg. Co., East Syracuse, N. Y. Filed Jan. 31, 1928. Serial No. 25,088. Term of patent 3½ years.



The ornamental design for a cake stand substantially as shown.

74,991. STOCKING. CLARENCE H. TAUBEL, Riverside, N. J. Filed May 31, 1927. Serial No. 22,241. Term of patent 14 years.



The ornamental design for a stocking, as shown and described.

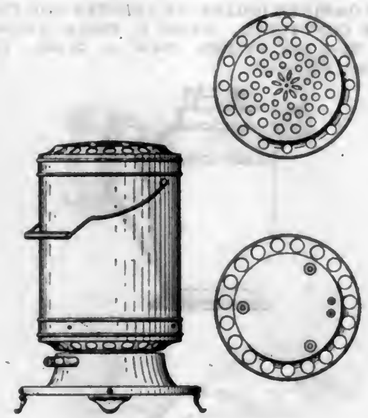
74,992. CARTON. FRED W. TESTEAL, Los Angeles, Calif. Filed Dec. 27, 1927. Serial No. 24,661. Term of patent 3½ years.

The ornamental design for a carton, as shown.

74,993. DIAPHRAGM FOR A RADIO LOUD SPEAKER. BENSON F. WADDELL, New York, N. Y. Filed Aug. 2. 1927. Serial No. 22,980. Term of patent 14 years.

The ornamental design for a diaphragm for a radio loud speaker, as shown.

74,994. COMBINED RADIATOR CAP AND FILLING TUBE. GEORGE B. WARNER, New York, N. Y. Filed Oct. 24, 1927. Serial No. 23,866. Term of patent 3½ years.



The ornamental design for a combined "radiator cap" and filling tube as shown.

74,995. SMOKER'S STAND. CHRISTOPHER WILMANNS, Indianapolis, Ind. Filed Aug. 4, 1927. Serial No. 22,995. Term of patent 7 years.

The ornamental design for a smoker's stand, as shown.

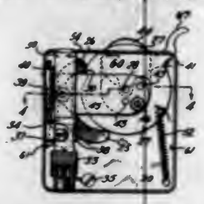
74,996. ELECTRICAL HEATER. FRANK E. WOLCOTT, West Hartford, Conn., assignor to The Frank E. Wolcott Manufacturing Co., a Corporation of Connecticut. Filed Sept. 22, 1926. Serial No. 19,144. Term of patent 7 years.

The ornamental design for an electrical heater substantially as shown.

74,997. BASE FOR DISPLAY STANDS. WILLIAM E. KEHOE, San Francisco, Calif. Filed Jan. 3, 1928. Serial No. 24,741. Term of patent 14 years.

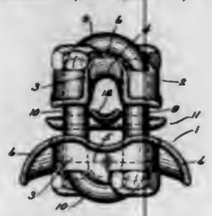
The ornamental design for a base for display stands, as shown.

74,998. ASH TRAY. JOSEPH L. PINARD, Sherbrooke, Quebec, Canada. Filed Feb. 15, 1928. Serial No. 25,446. Term of patent 3½ years.



The ornamental design for an ash tray substantially as shown.

PATENTS

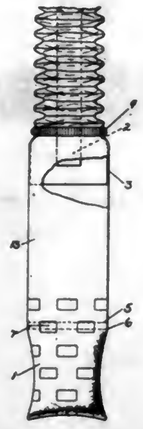


GRANTED APRIL 24, 1928.

1,666,884. VENDING MACHINE. RICHARD S. ARTHUR, New York, N. Y., assignor to Kalyptol Products Inc., a Corporation of New Jersey. Filed Jan. 15, 1925. Serial No. 2,551. 6 Claims. (Cl. 194—65.)

1. A vending machine comprising a receptacle having a closure member, a locking mechanism for said closure member embodying a latch member, and a rotary disc having a pocket for a coin and having a notch on its periphery into which a portion of the latch member moves to permit the coin to release said latch when the disc has rotated a predetermined amount.

1,666,885. CABLE CLAMP. ARTHUR O. AUSTIN, Barberton, Ohio, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed Oct. 14, 1927. Serial No. 226,108. 7 Claims. (Cl. 24—135.)



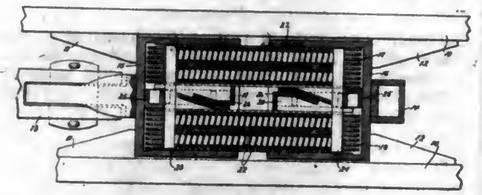
1. A clamp for crossed cables comprising a clamping member with a seat therein to receive and rest upon the upper cable, a clamping member with a seat to receive the lower cable and support the same, an intermediate member positioned between the cables and having a seat to receive each cable and means engaging the first two clamping members to draw them, the cables and the intermediate member into clamped and fixed relation.

1,666,886. PROCESS OF MAKING AND FILLING BAGS. ADELMER M. BATES, Chicago, Ill., assignor, by mesne assignments, to Bates Valve Bag Corporation, Chicago, Ill., a Corporation of Delaware. Filed Apr. 23, 1923. Serial No. 633,904. 7 Claims. (Cl. 226—47.)

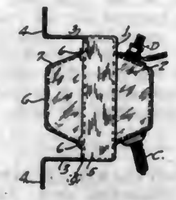
1. The method of making filled bags, which consists in marking bag fabric with a series of marks so placed and of such size that the smallest contemplated bag will show at least one complete mark, however the material is cut to form such bag, forming a tube from the marked fabric, filling successive properly weighed charges into the tube, closing the tube adjacent each successive charge, the charge being the guide, and severing the tube adjacent each closure.

6. The method of making filled bags, which consists in marking bag fabric with a series of marks which do not need to be varied for bags containing different weights of material, the marks being so placed and of such size that the smallest contemplated bag will show at least one complete mark, however the material is cut to form such bag, forming a tube from the marked fabric, filling successive properly weighed charges into

the tube, closing the tube adjacent each successive charge, the charge being the guide, severing the tube adjacent each closure, and marking the weight on each bag as a part of the bag forming and filling operation, the weight mark being made of a different color from the previously formed marks.



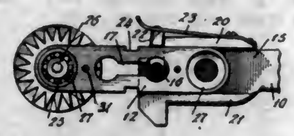
1,666,887. BARREL-COOLING DEVICE FOR FIREARMS. JOHN M. BROWNING, Ogden, Utah; John Browning administrator of said John M. Browning. Filed Oct. 15, 1925. Serial No. 62,672. 18 Claims. (Cl. 89—1.)



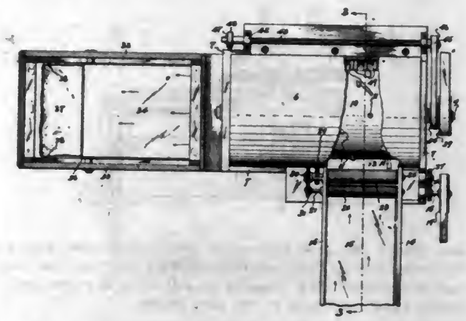
3. In an automatic gun having a recoiling barrel, a frame supporting the barrel, a cooling jacket surrounding said barrel and slidable off the barrel in forward direction, and a readily detachable connection between said jacket and said frame, the said connection being located entirely at one side of the said jacket and frame.

1,666,888. DRAFT GEAR. WALTER H. COTTON, Chicago, Ill., assignor to Union Draft Gear Company, Chicago, Ill., a Corporation of Delaware. Filed Dec. 3, 1923. Serial No. 678,094. 8 Claims. (Cl. 213—33.)

1. In a draft gear, in combination a pair of opposed followers, frictional elements relatively movable responsive to the relative movement of the followers, two independent sets of compressing means relatively disposed longitudinally of the gear for forcing the friction elements together with substantially uniform pressure throughout the approaching movements of the followers, means against which the compressing means react laterally, means for limiting the outward movement of the friction elements, and means for restoring the parts to normal positions upon release of the gear.

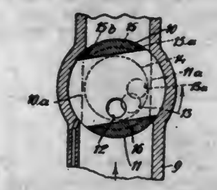


1,666,889. TRANSFORMER. JOSEPH DESLOGE, St. Louis, Mo., assignor to Killark Electric Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 30, 1925. Serial No. 19,478. 4 Claims. (Cl. 175—361.)



1. In a transformer, a core comprising a plurality of laminations, in combination with an enclosing shell including a main section comprising a top wall, a pair of opposite side walls, and a pair of opposite end walls, a closure section adapted for disposition intermediate the side walls and to rest at its margin upon an outer end lamination of the core, said end walls being of reduced length relatively to the side walls, and bendable tongues integral with the end walls adapted for clinching engagement over and upon the margin of the closure-section for securing said sections together in housing formation about the core and said laminations in compact, rigid and compressed relation.

1,666,890. DRESSING TOOL. JOHN SHEARMAN DONALDSON, New York, N. Y. Filed Nov. 21, 1924. Serial No. 751,233. 9 Claims. (Cl. 125—37.)

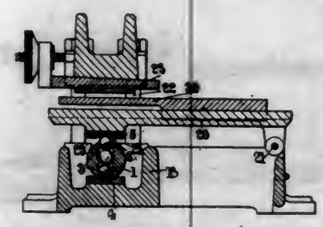


1. A dressing tool, comprising a shank, two removable side plates held against opposite sides of the shank with their ends extending beyond the end of the shank by a headed stud extending from the shank through a longitudinal slot in each side plate, a dressing wheel mounted between the extending ends of the side plates, and holding means for normally holding the side plates against longitudinal movement from their normal position on the shank, the side plates being movable longitudinally for removal from the shank when released by said means.

1,666,891. MACHINE FOR CLEANING HAIR AND OTHER FILAMENTARY MATERIAL. CARL H. DONNER, Summit, N. J. Filed May 19, 1926. Serial No. 110,184. 2 Claims. (Cl. 19—86.)

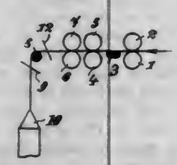
1. A machine of the kind described, comprising a housing, a rotatable drum longitudinally mounted in said housing, said housing being substantially concentric to said drum, said drum having a plurality of radially projecting agitating and propelling blades arranged in a helical line around its surface from end to end thereof, a perforate bottom connected with said housing to extend longitudinally beneath said drum and spaced to just clear the ends of said blades, said housing having on one side a lateral material intake opening above said perforate bottom and adjacent to one end of said drum, said housing having at its opposite side a row of inwardly projecting comb elements coincident in length to the length of said drum and adapted to cooperate with the blades of the latter, and said housing having a material discharge opening at an end thereof adjacent the opposite end of said drum and bordering said perforate bottom.

1,666,892. APPARATUS FOR REGULATING MIXTURE FORMATION IN CARBURETOR SYSTEMS. WILHELM EBERHARD ERNST, Berlin-Schoeneberg, Germany. Filed Oct. 6, 1925, Serial No. 60,795, and in Germany July 19, 1924. 5 Claims. (Cl. 48—180.)



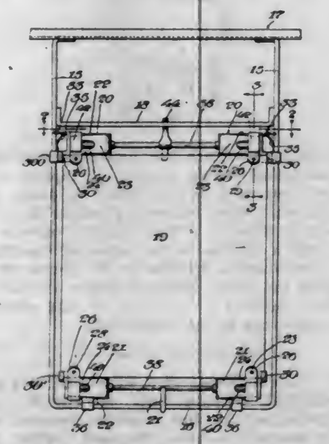
1. In combination with the intake conduit of an internal combustion engine, a pair of throttle valves in said conduit spaced from each other to define a mixing space, and unyielding connecting means between said valves holding them at a fixed angular relation to each other so that a change in the degree of opening of one causes a corresponding change in the degree of opening of the other, the valve positioned nearer the motor being at all times inclined to the axis of said conduit to a greater extent than is the other valve.

1,666,893. MECHANISM FOR PRODUCING CAM-LIKE OR SIMILAR IRREGULAR MOTIONS. CHARLES GEORGE GARRARD, London, England, assignor to George Stanley Walpole, London, England. Filed Dec. 23, 1924, Serial No. 757,598, and in Great Britain June 5, 1924. 5 Claims. (Cl. 74—14.)



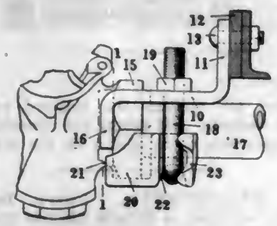
1. A cam-like mechanism for producing relative movement between two bodies from the rotational movement

of a shaft, comprising two bodies, a cage on said shaft, said cage having a diametrical slot; an odd number of rollers, not less than three, loosely housed in said slot



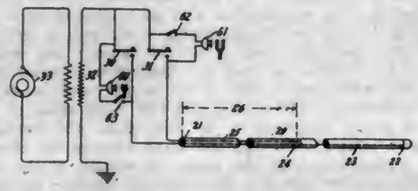
and tracks for said rollers on said bodies, the sum of the diameters of the rollers exceeding that of the cage and the rollers being adapted to roll upon the two roller tracks fixed relatively to the said bodies.

1,666,894. SPINNING. EMIL GMINDER, Reutlingen, Germany. Filed Sept. 17, 1925, Serial No. 57,038, and in Germany Sept. 22, 1924. 8 Claims. (Cl. 19—130.)



1. In a spinning process, deflecting the thread in process of formation through approximately a right angle, thereby diminishing the yarn tension originating from the spindle, imparting a spinning twist to the thread at the spindle and applying to the thread, at a place where said deflection occurs, a twist in the direction of twist of the thread imparted by the spindle, said last mentioned twist extending right back to the nipping point.

1,666,895. PHOTOGRAPHIC-FILM HANGER. HERMAN GOLLOMB, Brooklyn, N. Y. Filed Mar. 24, 1927. Serial No. 177,865. 12 Claims. (Cl. 95—100.)



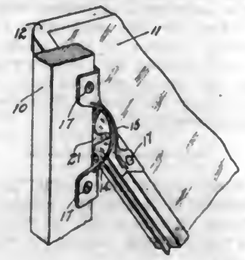
1. A film hanger comprising a frame having a plurality of spaced-apart spring clips arranged and adapted to receive and clamp an edge of a film to be treated, the jaws of the respective clips being held by spring action in a normal position, and means for simultaneously actuating said clips in opposition to the spring action and locking them in abnormal position.

1,666,896. ANGLE-COCK HOLDER. FREDERICK K. HABENICHT, St. Louis, Mo., assignor to Railway Devices Company, St. Louis, Mo., a Corporation of Missouri. Filed June 22, 1923. Serial No. 647,133. 1 Claim. (Cl. 248—81.)

In a device of the class described, the combination with a unitary supporting plate adapted to be secured to a car and to bear on the train pipe, the front end of said plate being bifurcated for the passage of the angle cock and having a turned-down portion for engaging the front face of the head, of a U-bolt passing around the pipe and through the plate for holding said pipe and plate in contact, and a member carried by the bolt and providing a pocket engaging the angle cock head to prevent its rotation.

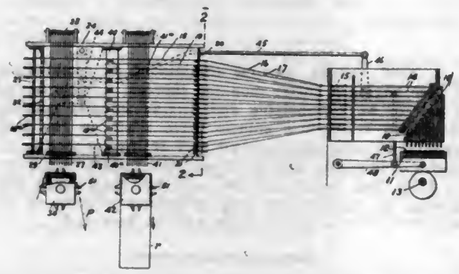
1,666,897. SHIP-GUIDANCE SYSTEM. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed Apr. 27, 1922. Serial No. 556,846. 14 Claims. (Cl. 177—385.)

11. In a system for signalling from a movable body, means for emitting radiant energy therefrom comprising a pair of spaced members towed at different distances from said body, and means for modifying said energy to produce a signal.



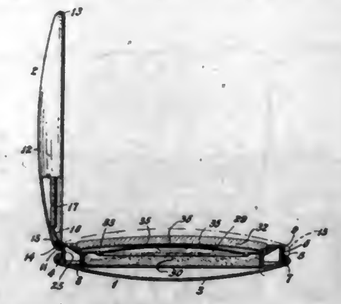
1,666,898. DRILL BIT. CARL H. HANSON, Hudson Heights, N. J. Filed Mar. 29, 1927. Serial No. 179,291. 1 Claim. (Cl. 255—63.)

In a drill bit a circular shank having a plurality of channels formed in part of its length, and a central bore ending before the inner ends of said channels open



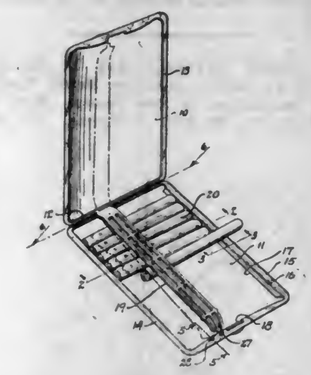
at the opposite end, a plurality of cutting members formed between said channels having sharp pointed outer ends situated in one level plane to form a support for the bit on the work piece during the operation thereof for preventing inaccurate drilling to produce a smooth drill hole, each of said members having two elongated sharp outer edges to limit the channels, the inner ends of said channels getting shallower towards the shank to run smoothly and gradually into the material thereof, the opposite ends of the channels getting gradually deeper to form with the members extending beyond the ends of the channels substantially V-shaped recesses, the central bore in said shank ending at the end point of said channels between the foot of the member points, each of said members having below their points two adjoining angularly disposed cutting faces, a ridge separating the two faces of each member, the outer faces of said members beveled towards the point, and a square butt on said shank for allowing an attachment of the same to the chuck of a brace.

1,666,899. WINDSHIELD PIVOT. EDWIN A. HENRICSON, Detroit, Mich., assignor to Motor Products Corporation, Detroit, Mich., a Corporation of New York. Filed Mar. 9, 1925. Serial No. 14,263. 8 Claims. (Cl. 296—92.)



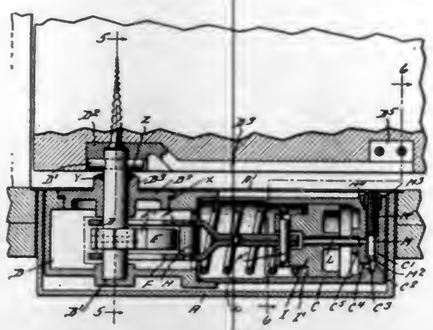
1. In a pivotal connection, a pair of pivot members adapted for attachment respectively to the parts to be connected and a spider having a spring arm projecting through one of said members into abuting engagement with the other affording a releasable interlocking connection between said pivot members for holding the same in their adjusted position.

1,666,900. SELECTING MACHINE FOR DICTATING THE PUNCHING OF HOLES IN JACQUARD CARDS. WALTER W. HODGSON, Philadelphia, Pa., assignor to Walter W. Hodgson, Inc., Philadelphia, Pa., a Corporation of Pennsylvania Filed Feb. 24, 1927. Serial No. 170,461. 10 Claims. (Cl. 164—111.)



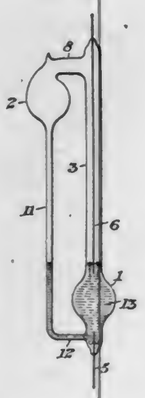
1. In apparatus of the character stated, the combination with a jacquard card punching machine of a selecting mechanism operatively connected with respect to said jacquard card punching machine, said selecting mechanism being provided with two selecting cylinders.

1,666,901. VANITY CASE. HERBERT D. HOUGH, Cranston, R. I., assignor to Wightman and Hough Company, Providence, R. I., a Corporation of Rhode Island. Filed July 29, 1925. Serial No. 46,696. 18 Claims. (Cl. 132—83.)



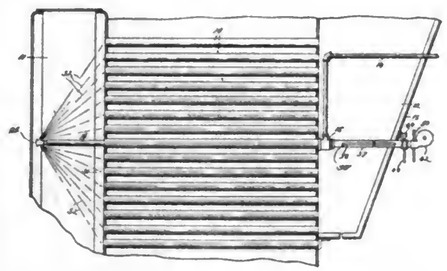
1. A vanity case comprising cover and base sections, a container in one of said sections, a dispensing plate located in a wall of said container, said plate having a finger engaging portion and an opening, a valve secured to the edge of said opening normally closing said opening, whereby, when said portion is engaged, it moves away from said valve and substance in said chamber is forced out thru said opening.

1,666,902. CIGARETTE CASE. EDWARD B. HOUGH, Providence, R. I. Filed July 21, 1926. Serial No. 123,851. 3 Claims. (Cl. 206—41.)



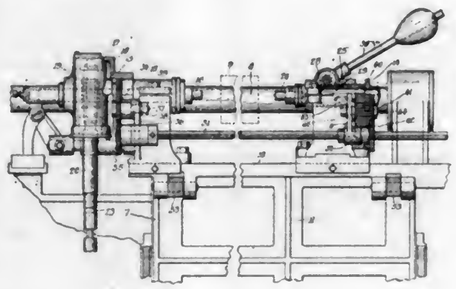
3. A cigarette holder comprising a pair of case members, each of said members being substantially thinner than a cigarette whereby when closed said members are adapted to form a chamber of substantially the thickness of a cigarette, an edge of one of said members being provided with a bezel extending downwardly and inwardly therefrom and forming an incline for guiding said cigarette thereover, the inner portion of said bezel being of such shape and so positioned with respect to said case members that the cigarette is normally allowed to lie closely adjacent and substantially parallel to said case member, and a retaining arm overlying said cigarettes and displaced from the centre thereof away from said bezel, the thickness of said case member and the position of said retaining arm being so related as to permit withdrawal of said cigarette without substantial bending thereof, the cigarette containing compartment being of a width substantially equal to the length of the cigarette.

1,666,903. DOUBLE-ACTING HINGE AND CHECK. HENRY E. HUBBS and LEVI D. MALONE, Shelby, Ohio, assignors to The Shelby Spring Hinge Company, Shelby, Ohio, a Corporation of Ohio. Filed June 30, 1926. Serial No. 119,554. 3 Claims. (Cl. 16—55.)



1. In a combined hinge and check, the combination with a hollow casting and cylinder connected thereto, of a pintle journaled in the casting and having a cam connected thereto, a yoke provided with rollers arranged for engagement with the cam and whereby the yoke is moved as the pintle turns, a piston movable in the cylinder and pivotally connected to the forward end of the yoke, a coil spring arranged in the cylinder and engaging the piston, a check valve arranged in a passage in the piston, a chamber at the forward end of the cylinder, an adjustable valve arranged in said chamber, said chamber having two outlets, and a tube communicating with one of said outlets and arranged centrally of the piston.

1,666,904. TIME SWITCH. ROY D. MAILEY, East Orange, N. J., assignor to Cooper Hewitt Electric Company, a Corporation of New Jersey. Filed Oct. 30, 1923. Serial No. 671,637. 2 Claims. (Cl. 200—33.)

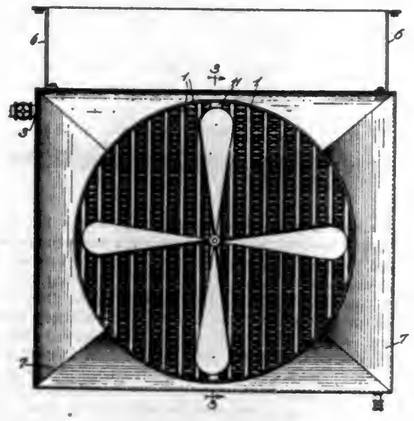


1. In an electric switch comprising a sealed glass envelope, in combination, two reservoirs one placed above and to one side of the other, a tube substantially L shaped connecting the top of one reservoir to the top of the other, another L shaped tube of considerably smaller cross section connecting the bottoms of the two reservoirs, and a pair of electrical conductors sealed into said envelope and terminating within said lower reservoir, and a liquid conductor in sufficient quantity to make connection between the two said conductors.

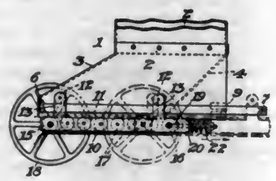
1,666,905. BOILER CLEANER. ALFRED G. MATTSSON, Detroit, Mich., assignor to Diamond Power Specialty Corporation, Detroit, Mich., a Corporation of Michigan. Filed Apr. 16, 1923. Serial No. 632,388. 7 Claims. (Cl. 122—392.)

1. A boiler cleaner comprising a fluid conductor, a nozzle normally lying in a tube of a boiler and communicating with said fluid conductor, said nozzle being adapted to project into the combustion chamber of the boiler; a housing exterior of said boiler and a spring mounted in said housing for withdrawing said nozzle into said tube, and means effective upon rotation of the housing, for rocking the nozzle when the nozzle is in its said projected position.

1,666,906. WOOD-TURNING MACHINE. CARL LAWRENCE MATTISON, Rockford, Ill., assignor to Mattison Machine Works, Rockford, Ill., a Corporation of Illinois. Filed May 11, 1925. Serial No. 29,814. 1 Claim. (Cl. 142—55.)



A wood turning machine comprising, in combination, a base having a cutter mounted thereon, a table having a pair of work-supporting and driving spindles mounted in spaced relation, a spindle drive shaft on the table parallel to said spindles, and gear trains connecting opposite ends of the said shaft with the respective spindles to drive them in synchronism, said gear trains each comprising an intermediate gear adjustable relative to the adjacent gears of the train to prevent back lash.

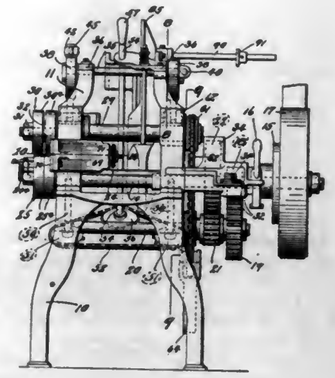


1,666,907. HEATING UNIT. ARTHUR B. MODINE, Racine, Wis. Filed Apr. 7, 1923. Serial No. 630,617. 5 Claims. (Cl. 257—137.)

3. In a device of the kind described and in combination, a heating unit formed of a series of adjoined heating elements, a casing around said unit and extending

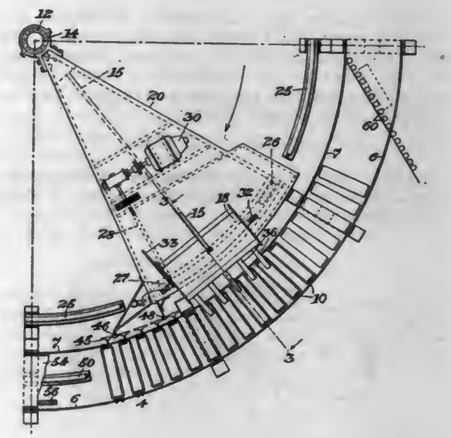
therefrom, a fan in said casing, a motor on the opposite side of said unit and a shaft connecting said motor and fan, one of said heating elements having a bracket integrally formed thereon and extending on opposite sides thereof to support said motor and provided with apertures to form bearings for the fan shaft.

1,666,908. BIN GATE. RALPH SWITZER MOORE, El Paso, Tex., assignor to American Smelting and Refining Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 18, 1926. Serial No. 142,254. 11 Claims. (Cl. 221—145.)



1. In a device of the class described, a chamber having an opening, a gate including an endless belt-like member for said opening, and means for operating said gate by rolling said member across said opening.

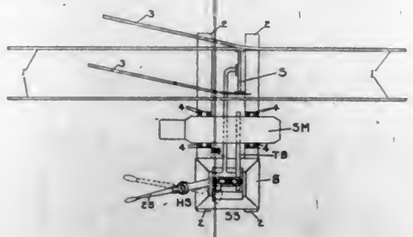
7. In combination, a container having an opening, a gate including a belt-like member for said opening, means for supporting said member including a roll, and means for operating said gate by applying a rotating force to said roll.



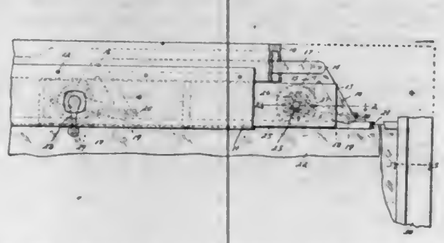
10. In storage apparatus, a chamber having an opening, a gate for said opening, said gate including a frame, an endless belt-like member, supports for said member, and a spring mounting between said frame and one of said supports to hold said member taut.

1,666,909. BENDING MACHINE. THEODORE F. PHILIPPI, East St. Louis, Ill. Filed Sept. 10, 1923. Serial No. 661,916. 11 Claims. (Cl. 153—57.)

1. A bending machine comprising a plurality of cooperating rollers adapted to receive and curve bars of metal, flexible driving means for positively actuating all of said rollers, mechanism for adjusting one of said rollers relative to the others to regulate the curvature of the bar, said mechanism including a longitudinally movable member and means cooperating with said longitudinally movable member for indicating the extent of said curvature.

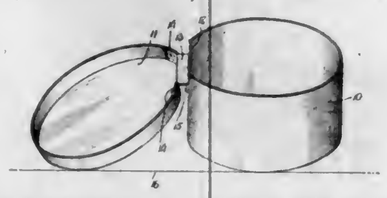


1,666,910. METAL-CASTING MACHINE. HARRY CHRISTIAN POSKE, El Paso, Tex., assignor to American Smelting and Refining Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 29, 1925. Serial No. 65,529. 13 Claims. (Cl. 22—63.



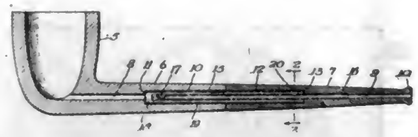
1. In a casting machine, in combination, a series of molds mounted for tilting to a position in which castings will fall out of them, a movable pouring spout adapted to be moved along the series of molds for pouring metal to be cast thereinto and means movable with said pouring spout adapted to tilt said molds successively into a normal position.

1,666,911. SWITCH-OPERATOR SELECTOR. CHARLES W. PRESCOTT, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed May 20, 1926. Serial No. 110,394. 16 Claims. (Cl. 246—240.)



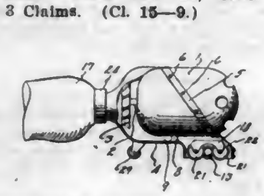
11. In combination, a track switch and switch operating rod, a power operated switch machine and an operated rod, and a hand operated switch stand and an operated rod, and means for operatively connecting the switch rod to the switch machine rod or to the switch stand rod.

1,666,912. WINDSHIELD-OPERATING MECHANISM. WILLIAM S. PRITCHARD, Detroit, Mich., assignor to Motor Products Corp., Detroit, Mich., a Corporation of New York. Filed June 14, 1926. Serial No. 115,989. 4 Claims. (Cl. 268—126.)



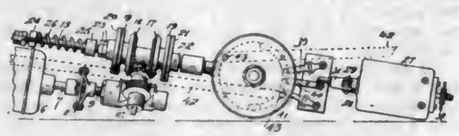
1. The combination of a slidable windshield, of an operating mechanism therefor including, a pair of spaced levers connected for parallel movement, means connecting said levers to the windshield, a counter-balancing spring associated with one lever and an operating handle connected to one of said levers.

1,666,913. BOX. SAMUEL RAPPAPORT, Brooklyn, N. Y. Filed June 27, 1927. Serial No. 201,581. 3 Claims. (Cl. 229—44.)



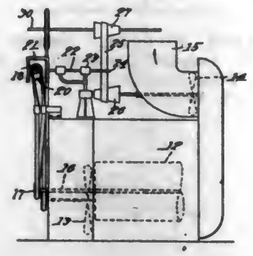
1. A box having a body provided with a flat wall, a cover for said box having a contour corresponding to the contour of said body, said cover having a wall adapted to fit over said body, and an intermediate rigid connecting strip having an intermediate portion connected to two end flanges which are bendable with respect to said intermediate portion, one of said flanges being connected to the wall of said cover and constituting a flat wall portion thereof directly adjacent the flat wall of the body, said flat portion being continuous with and in alignment with the remainder of the wall of the cover, the other of said flanges being connected to the flat wall of the body below the top thereof.

1,666,914. SMOKING PIPE. HEATH C. REESE, Chicago, Ill. Filed Mar. 21, 1927. Serial No. 176,937. 3 Claims. (Cl. 131—12.)



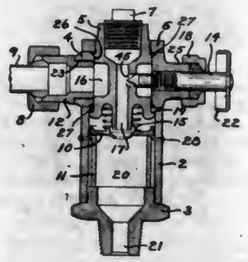
3. A smoking pipe comprising a stem and a bit having an enlarged bore therein, and forming a continuous smoke chamber, a hollow metal insert in said chamber frictionally-engaging one of said parts for holding the stem and bit together, a second hollow metal tube fixed to the bit and extending near the end of the enlarged bore in the stem, and a removable cap for said second tube and forming a saliva chamber, said second tube having a hole in the top thereof near the end of the bore in the bit.

1,666,915. VACUUM CLEANER. DAVID U. REMALEY, Detroit, Mich. Filed Dec. 26, 1924. Serial No. 758,030. 3 Claims. (Cl. 15—9.)



1. A vacuum cleaner comprising a substantially cylindrical casing having an opening at its forward end and a discharge opening at the rear end, a nozzle at the forward end below the said forward opening, an electric motor having a shell mounted in the said forward opening of the casing closing the same and positioned in spaced relation with the bottom wall and rear end of the casing providing in conjunction therewith a channel extending from the nozzle to the said discharge opening, and a fan in the said channel at the rear end of the motor shell forward of the discharge opening and operatively connected with the motor.

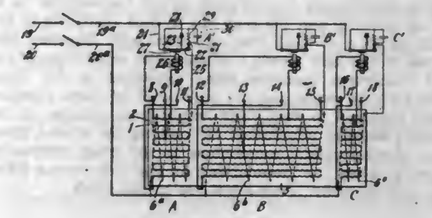
1,666,916. ELECTRICALLY-OPERATED DOOR. HAROLD ROWNTREE, Scarsdale, N. Y., assignor to National Pneumatic Company, New York, N. Y., a Corporation of West Virginia. Filed Oct. 4, 1924. Serial No. 741,698. 10 Claims. (Cl. 303—6.1.)



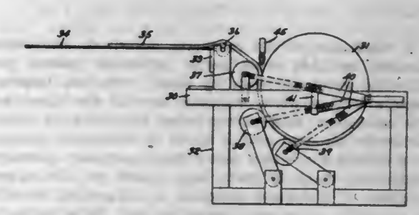
9. In operating mechanism for car doors, the combination with a door, of a door moving element operatively connected thereto, a non-reversible motor, reversible driving connections between the motor and the door moving element, electromagnetic means for controlling the driving direction of the driving connections, and electrical connections including the motor, said electromagnetic means and switch mechanism adapted to control the operations of the motor, and said electrical connections also including a normally open switch, the closing of which is caused by the application of air to the air brakes of the car.

1,666,917. VARIABLE-SPEED DRIVE FOR EXHAUST FANS. FREDERICK G. SARGENT, Westford, Mass., assignor to C. G. Sargent's Sons Corporation, Graniteville, Mass., a Corporation of Massachusetts. Filed Aug. 18, 1926. Serial No. 130,057. 8 Claims. (Cl. 34—12.)

2. The combination with a drying machine and its exhaust fan, of an endless apron for conveying the material in the machine and subjecting it to the action of the air therein for drying it, of a shaft rotatable in synchronism with the endless conveyor, a cam on said shaft, a yoke operated by the cam, a sliding guide movable with the yoke as the cam operates, and speed varying pulleys over which a belt travels connected for operating the exhaust fan, said guide being arranged to shift the belt back and forth, whereby the cam will control the action of the fan.



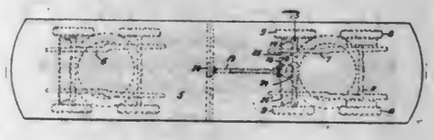
1,666,918. SIGHT FEED. EUGENE M. SCOVILLE, Cincinnati, Ohio, assignor of one-half to Floyd L. Swanberg, Pittsburgh, Pa. Filed May 19, 1927. Serial No. 192,770. 13 Claims. (Cl. 116—117.)



6. In combination, a body having a side opening, a transparent member covering said opening, a casing rotatably attached to said body above said opening, said casing having passages communicating with the interior of said body, a fitting pivotally supported by said body and embracing said casing, and a needle valve carried by said fitting and adjustable relative to said casing to control the flow of liquid through said passages.

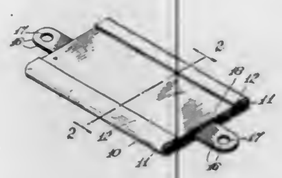
1,666,919. THERMOELECTRIC TRANSFORMER. JOHN H. STEUBER, Rockville Center, N. Y., assignor of one-half to Louis Charles Henkel, Rockville Center, N. Y. Filed June 25, 1925. Serial No. 39,585. 9 Claims. (Cl. 136—4.)

1. In a thermoelectric transformer, the combination with a plurality of thermoelectric couples connected in series, and provided with two series of junctions located in two separated lines substantially parallel to each other, of an electric heating element located in close proximity to but electrically insulated from one line of junctions, the other line of junctions, and the portions of the couples adjacent thereto being exposed to the atmosphere to facilitate radiation, and a terminal voltage regulating device in circuit with certain of said couples constructed to vary the heating circuit through the heating element in accordance with variations in the voltage generated in the couples connected therewith, and maintain a substantially constant terminal voltage in all of said couples.



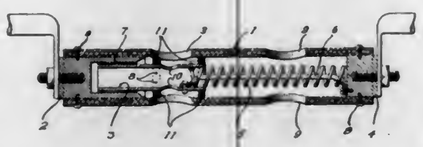
1,666,920. TRANSFERRING APPARATUS AND METHOD OF MAKING SAME. GUIDO VON WEBERN, Dayton, Ohio, assignor, by mesne assignments, to Oxford Varnish Corporation, Detroit, Mich. Original application filed July 30, 1924, Serial No. 729,135. Divided and this application filed May 1, 1925. Serial No. 27,276. 7 Claims. (Cl. 154—1.)

7. In an apparatus for forming transferring apparatus having impression material mounted on a backing roll, the combination of a frame, adjustable means for supporting a backing roll, means for feeding a sheet of impression material to the backing roll, means for heating one surface of the impression material, and yieldable adjustable means for holding the impression material in contact with the backing roll until it has cooled.



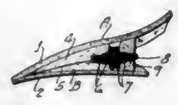
1,666,921. DOUBLE-TRUCK VEHICLE. OLIVER FRANCIS WARHUS, Albany, N. Y., assignor, by mesne assignments, to Versare Corporation, a Corporation of New York. Filed Aug. 30, 1924. Serial No. 735,063. 2 Claims. (Cl. 280—81.)

1. A vehicle having a body, a rear bogie truck having front and rear wheels on which the rear portion of the body is pivotally mounted, the front wheels of the truck



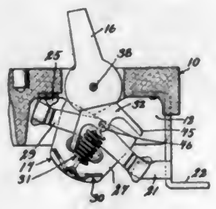
being pivotally mounted on the truck to turn about two separate substantially vertical axes, a steering member pivotally connected at its forward end to the body at a point on the body forward of the truck and pivotally connected at its rear end to the truck at a point on the truck forward of the pivotal connection of the truck to the body, whereby lateral movement of the forward end of the body causes the forward end of the member to be moved laterally and the rear end to turn relatively to the truck about a vertical axis, and transverse members connected to the said steering member, the outer ends of the said transverse members being connected to the front wheels of the truck, and the inner ends of these members being arranged to vary their longitudinal relation as the steering member is actuated for turning the wheels about their vertical pivotal connections to the truck differential amounts when the forward end of the body moves laterally and the body turns relatively to the truck.

1,666,922. CONDENSER. EDWARD J. WIGGINS, Chicago, Ill., assignor, by mesne assignments, to Electrical Research Laboratories, Inc., Chicago, Ill., a Corporation of Delaware. Filed Aug. 9, 1923. Serial No. 656,586. 2 Claims. (Cl. 175—41.)



1. A condenser of the character described, comprising a plurality of thin sheet metal conductor plates, provided with terminal receiving ends, with the terminal of each alternate plate disposed beyond the same end of the condenser, said plates being separated by sheets of dielectric material and a sheet of dielectric material being disposed above and below the superposed elements, a nonflexible metallic plate superposed on the uppermost sheet of dielectric material, a supporting metallic plate on which the conductor plates and dielectric material are superposed, said supporting plate being of greater width than the conductor plates and sheets of dielectric material, with both longitudinal sides of said supporting plate being bent upwardly and over onto the superposed elements into pressure applying relation with said non-flexible metallic plate whereby uniform pressure is applied throughout the superposed conductor plates and dielectric material, and a thin coating of moisture resisting material on the conductor plates and at the ends of the condenser.

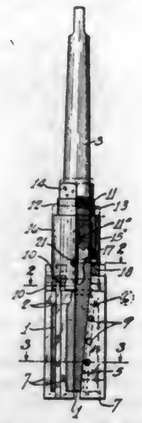
1,666,923. PROTECTIVE DEVICE. W. WARREN WOODRUFF, Swarthmore, Pa. Filed Nov. 3, 1922. Serial No. 598,733. 10 Claims. (Cl. 200—142.)



1. In a protective device constructed to operate when predetermined operating conditions have been reached, the combination of a casing perforated to allow a fluid to pass in engagement with the inside and outside thereof, a pair of elements supported by said casing so as to be normally held in operative relation to one another and adapted to be moved apart under predetermined operating conditions, said elements being mounted to have said fluid pass in contact therewith, means for holding said elements in normal operative relation, said means being responsive to a predetermined condition of said fluid, and means for positively moving said elements out of normal operative relation when the predetermined operating conditions have been reached.

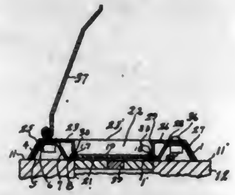
1,666,924. ARCH SUPPORT. JOSEPH ABRAMOWITZ, Madison, Ill., assignor of one-half to John J. Selb, Venice, Ill. Filed June 23, 1924. Serial No. 721,878. 6 Claims. (Cl. 36—71.)

1. In an arch support adapted to fit within a shoe, a pair of co-operating relatively movable superimposed sections, in combination with means adapted for removable edgewise disposition intermediate said sections and including a pair of relatively movable members and a screw-member having oppositely threaded opposed portions having engagement with said members, respectively, for adjustably spacing said members for correspondingly spacing said sections for varying the arch supporting height of the support.



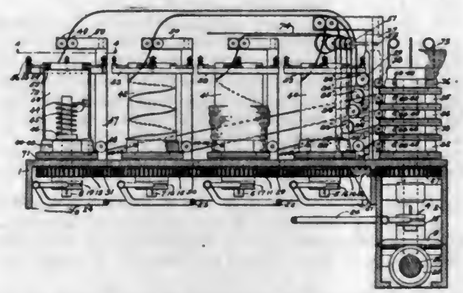
1,666,925. SWITCH CONSTRUCTION. REUBEN B. BENJAMIN, Chicago, and CHESTER E. WARNER, Berwyn, Ill., assignors to Benjamin Electric Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Nov. 5, 1923. Serial No. 672,755. 7 Claims. (Cl. 200—67.)

1. A switch construction comprising a pivoted oscillatable switch arm, a contact with which the switch arm is engageable and means for oscillating said switch arm, comprising a pivoted oscillatable actuating member, a coil tension spring connecting said switch arm and oscillatable member and a push member carried by said oscillatable member for engaging said spring to free said switch arm from said contact, after the spring has passed the dead center.



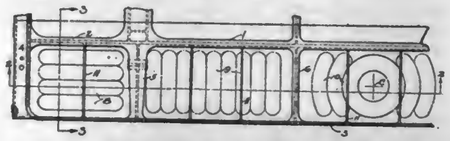
1,666,926. REAMING TOOL. ROBERT R. DAVIS, St. Louis, Mo., assignor, by mesne assignments, of one-half to George C. Albers and one-half to John D. Young, St. Louis, Mo. Filed Mar. 28, 1924. Serial No. 702,534. 8 Claims. (Cl. 77—75.5.)

1. A reamer comprising a bar having an annular series of radial slots opening upon its peripheral face and being externally threaded rearwardly of the slots, and cutters disposed in the slots for movement longitudinally of the bar, in combination with an internally threaded collet disposed for axial movement upon the



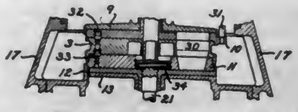
bar and having engagement with the cutters and an internally and externally threaded barrel also disposed upon the bar and having threaded engagement with both the bar and the collet for shifting the collet and the cutters axially of the bar.

1,666,927. METER-WINDOW FRAME. JOSEPH ROBERT DELANEY, Cincinnati, Ohio. Filed May 9, 1927. Serial No. 190,124. 10 Claims. (Cl. 189—77.)



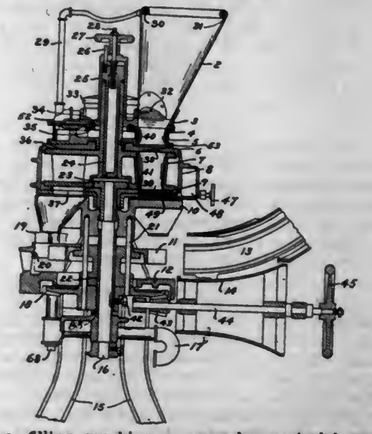
1. The combination with a casing having a window, of a main-frame secured in sealing relation to said casing and having a window registering with said first mentioned window, a glass in said window in said main-frame, a sub-frame releasably secured to said main-frame and engaging said glass, to releasably maintain said glass in its position.

1,666,928. ATTENUATION OF MATERIALS. MARTIN E. EVANS, Kankakee, Ill. Filed Nov. 29, 1921. Serial No. 518,687. 21 Claims. (Cl. 205—13.)



1. An apparatus for attennating material of rod-like form comprising in combination: a plurality of coaxially mounted drawing drums, dies associated with each of said drums, and an accumulator for each pair of drawing drums to hold material taken off one of the drums constituting a pair and to supply material to the other drum of the pair.

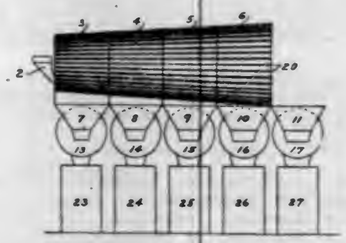
1,666,929. CAR UNDERFRAME. CHARLES F. FREDE, St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill., a Corporation of New Jersey. Filed Feb. 21, 1927. Serial No. 169,926. 18 Claims. (Cl. 105—236.)



1. In an underframe for a railway vehicle, longitudinal and transverse sills, and a corrugated horizontal wall extending between said sills and formed integrally therewith.

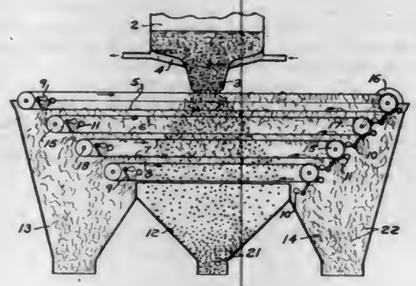
1,666,930. CAN-FILLING MACHINE. OSWALD H. HANSEN, Port Washington, Wis., assignor to Hansen Canning Machinery Corporation, Port Washington, Wis., a Corporation of Wisconsin. Filed Nov. 23, 1922. Serial No. 602,728. 8 Claims. (Cl. 226—102.)

1. In a can filling machine, an upper measuring element having openings therein, a lower measuring element having openings therein in alinement with said upper element openings, a removable intermediate element having openings therein of fixed size alinable with said upper and lower element openings to form measuring pockets, said intermediate element being replaceable by other intermediate elements having differently sized openings therein, means for feeding material to said pockets through said upper element openings, and means for effecting delivery of said material from said pockets through said lower element openings.



1,666,931. CAN-FILLING MACHINE. OSWALD H. HANSEN, Port Washington, Wis., assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis., a Corporation of Wisconsin. Filed June 7, 1923. Serial No. 643,850. 25 Claims. (Cl. 226—96.)

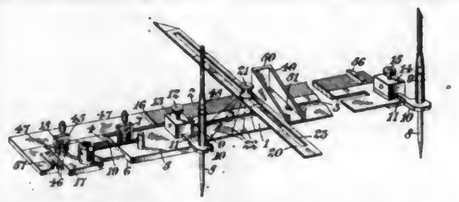
1. In a filling machine, a granular material supply hopper having a lower discharge opening, an agitator



within said pocket adjacent to said opening, means for directing liquid downwardly along the surface of said hopper beneath the granular material resting thereon, a series of pockets successively communicable with said opening, and means for positively urging granular material into said pockets as they pass laterally beyond said opening.

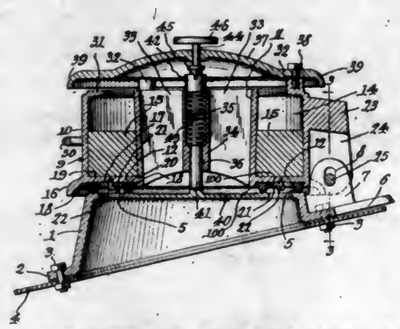
1,666,932. APPARATUS FOR FACILITATING THE TREATMENT OF CORN. OSWALD H. HANSEN, Port Washington, Wis., assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis., a Corporation of Wisconsin. Filed Oct. 2, 1924. Serial No. 741,218. 4 Claims. (Cl. 130—5.)

1. In combination, a grading drum having peripheral slots, a treating machine, and a rotary tapered drum having an internal helical groove for feeding corn bearing cobs from said grading drum to said machine.



1,666,933. CORN SILKER. OSWALD H. HANSEN, Milwaukee, Wis., assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis., a Corporation of Wisconsin. Filed June 14, 1926. Serial No. 115,774. 5 Claims. (Cl. 209—77.)

1. In combination, a series of superposed wires of different lengths, each of said wires being shorter than the wire thereabove, means for longitudinally moving said wires, means for dropping a mixture of kernels and silk upon said wires, and means for removing the silk from an end portion of each of said wires vertically beyond the end portion of the wire thereunder.

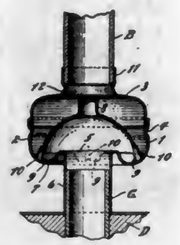


1,666,934. INSTRUMENT FOR DRAWING, MARKING OUT, AND MEASURING OR LIKE PURPOSES. ALBERT EDWARD HAYWOOD, Coventry, England. Filed Dec. 17, 1925. Serial No. 75,972, and in Great Britain Dec. 17, 1924. 2 Claims. (Cl. 33—159.)

1. An instrument assembly of the type described, comprising a graduated rule having a longitudinal slot therein, one side of the rule defining said slot being undercut, a slide carrying a block sliding in said slot, a portion of said slide extending under the undercut side of the rule,

and means penetrating said slide and said block whereby the slide may be fixed in relation to the rule, said slide carrying means to fix other instruments to said assembly.

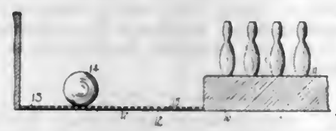
1,666,935. COMBINATION PRESSURE-VACUUM VALVE AND THIEF HATCH. HARRY HAMMOND HOWELL, Kansas City, Mo., assignor of one-half to W. H. Elliott, Tulsa, Okla. Filed Aug. 9, 1926. Serial No. 128,247. 4 Claims. (Cl. 220—85.)



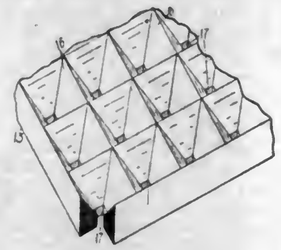
1. In an attachment for oil tanks, a tubular base, a substantially horizontal, weighted cover cooperating with the base to close it, means for connecting the cover to the base for swinging movement into a fully open position at the control of an operator, and for substantially vertical right-line sliding movement to and from closed position with respect to the base responsive to pressure within a tank, an inwardly opening vacuum release valve carried by the cover, and means for holding the valve yieldably in closed position.

1,666,936. PROCESS OF MANUFACTURING CERAMIC PRODUCTS. LUDWIG KERN, Baltimore, Md. Filed Oct. 13, 1925. Serial No. 62,306. 5 Claims. (Cl. 18—47.)

1. In the manufacture of molded articles, the herein described improvement which comprises adding to a sand and hydrated lime mixture, a substantial amount of hydrated silicic acid, molding the mixture under pressure, and indurating the product under superatmospheric pressure with an elastic fluid capable of entering into reaction and produce a hardening of the molded article.



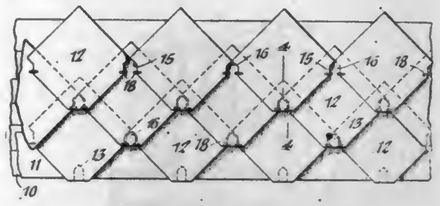
1,666,937. REFRIGERATOR-DRAIN TRAP. CHARLES E. KILBOURNE, Worcester, Mass., assignor to Harder Refrigerator Corporation, a Corporation of New York. Filed Oct. 4, 1927. Serial No. 223,939. 1 Claim. (Cl. 182—8.)



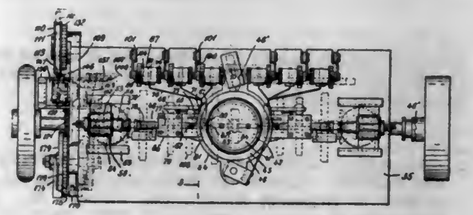
A refrigerator trap comprising a bowl member having a raised central overflow orifice and a coupling sleeve integrally joined to the bowl member at the overflow orifice, the annular water pocket thus provided in the bottom of the bowl being substantially semicircular in cross section, and a substantially hemispherical baffle loosely arranged over the overflow orifice and having its bottom edge discontinuous thereby providing spaced feet, the diameter

of the bottom of the baffle being substantially that of the deepest part of the water pocket and the feet having each a central vertical rib the bottom of which is shaped substantially to the curve of the water pocket so as to bear against an upwardly curving portion of the water pocket wall and allow the feet to rest in the bottom of the pocket.

1,666,938. BOWLING-ALLEY MAT. FRED KSELLMANN, Akron, Ohio. Filed June 2, 1927. Serial No. 195,942. 2 Claims. (Cl. 273—54.)



1. A pit mat for bowling alleys, said mat being constructed of soft, tough, vulcanized rubber formed with reticulations defining pockets of frusto-pyramidal shape, the division walls therebetween being formed with acuminate upper edges so that dust cannot collect upon the upper surface of the mat, the sides of said walls diverging widely to provide a sturdy base portion, the bottoms of the pockets having open passages extending therefrom through the mat whereby dust collecting in the pockets may pass freely through the mat.

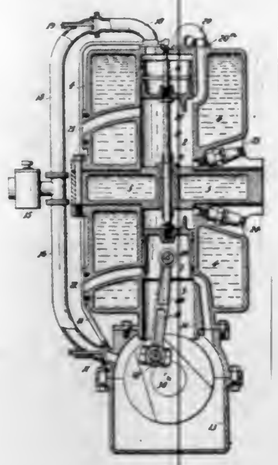


1,666,939. ROOFING CONSTRUCTION. JOHN F. LIETZ, Buffalo, N. Y. Filed June 16, 1927. Serial No. 199,260. 3 Claims. (Cl. 108—7.)

1. In a roofing construction, a pair of flexible diagonally-laid shingles notched in their opposing side edges, forming a recess, a third shingle overlying said pair and provided at its lower end with a locking tongue lying in said recess, the latter being wider than said tongue, per-

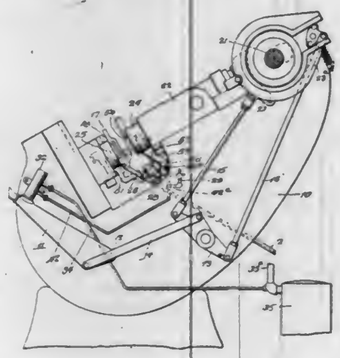
mitting lateral adjustment of the last-named shingle relative to said first-named pair, and means for retaining the tongue in said recess.

1,666,940. MESH MACHINE. FRED HARRIS LYNDS, North Attleboro, Mass., assignor to Whiting & Davis Company, a Corporation of Massachusetts. Filed Oct. 24, 1924. Serial No. 745,602. 60 Claims. (Cl. 140—3.)



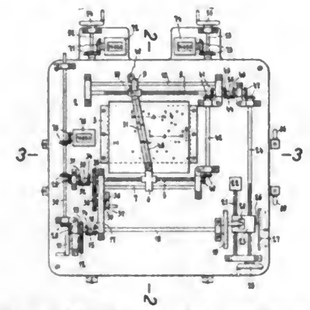
1. A machine for making link mesh comprising the combination of a support for a piece of mesh, link forming tools, power driven mechanism for giving the tools and the piece of mesh a step by step relative movement and for operating the tools in the periods of rest of this movement, a plurality of supplies of wire, a plurality of devices, one for each of the supplies, for feeding wire therefrom to the link forming tools, and means for controlling the action of the wire feeding devices to cause the wire to be fed from the supplies in a predetermined order of succession and including a pattern control member having effective areas arranged thereon in accordance with a predetermined pattern, actuating means for bringing these areas successively into position as each link is formed, and automatic means for rendering the actuating means ineffective throughout the formation of a group of links, the said automatic means including a member continuously advanced step by step, one step as each link is formed.

1,666,941. INTERNAL-COMBUSTION ENGINE. MORRIS MARTIN, Curl Curl, near Sydney, and WILLIAM ROBERT WERNER, Nymagee, New South Wales, Australia. Filed Dec. 16, 1927, Serial No. 240,542, and in Australia Oct. 15, 1926. 1 Claim. (Cl. 123—57.)



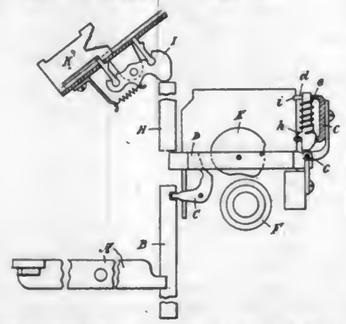
An improved internal combustion engine comprising, two combustion or firing cylinders arranged in tandem fashion, two pistons slidable one in each of said cylinders, a rod rigidly coupling said pistons together for movement in unison, an engine crank-shaft, a single connecting rod adapted to transmit the power strokes of both pistons to said crankshaft, a crankcase wherein gaseous fuel mixture is compressed, a transfer passage delivering said compressed fuel mixture from the crankcase to one of

the engine cylinders, means for supplying gaseous fuel mixture to one end of the other cylinder for compression, a transfer pipe delivering said compressed fuel mixture



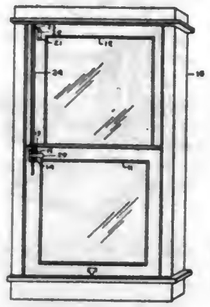
from said supplying means to the firing end of said other cylinder, and means for firing the fuel charges alternately in said cylinders.

1,666,942. AUTOMATIC DIE-PRESS STOPPING MECHANISM. CHARLES D. MCDONALD, Chicago, Ill., assignor to McDonald Machine Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 8, 1927. Serial No. 211,369. 8 Claims. (Cl. 192—128.)



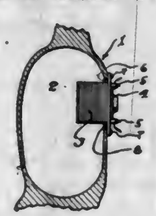
3. Automatic die press stopping mechanism, comprising in combination, the hand lever of the press starting and stopping mechanism of a die press having a strip feed way, a vacuum head having a suction end arranged to contact with said hand lever, whereby the lever is supported in starting position when vacuum is created in the suction end of said vacuum head, said vacuum head being connected with a vacuum source, a vent tube leading from the suction end of said vacuum head and having an air valve thereon, a normally inactive trip device associated with the strip feed way of the press and having a valve actuating member operating to open said air valve when an abnormal condition arises in the feed way.

1,666,943. RANGE FINDER. WILLEM ANNE MOUTON, The Hague, Netherlands, assignor to N. V. Nederlandsche Instrumenten Compagnie, The Hague, Netherlands. Filed June 8, 1925, Serial No. 35,839, and in Germany June 12, 1924. 2 Claims. (Cl. 235—61.5.)



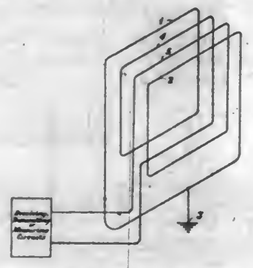
1. Device for ascertaining of a number of distance-values the mean value appertaining to a certain definite period, containing a writing ribbon, movable in a rectilinear direction, a marking device, which is movably disposed parallel to the plane of the writing ribbon and perpendicular to the direction of motion of the writing ribbon and adapted to mark on the writing ribbon the distance-values, a carriage which is displaceably disposed parallel to the direction of motion of the marking device, a ruler carried by the said carriage, means for imparting to the carriage a displacement by hand, other means for imparting to the carriage an automatic displacement, means for adjusting the speed of this automatic displacement, the ruler being disposed on the carriage movable about an axis which is perpendicular to the direction of motion of the writing ribbon and to that of the marking device, and means for automatically imparting to the ruler an angular displacement, on the said speed being altered.

1,666,944. ESCAPEMENT-ACTUATING MECHANISM OF TYPOGRAPHICAL COMPOSING MACHINES. CARL MUEHLEISEN, Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y. Filed Sept. 25, 1926, Serial No. 137,771, and in Germany Oct. 6, 1925. 7 Claims. (Cl. 199—25.)



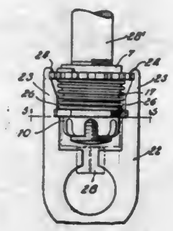
1. In escapement-actuating mechanism of a typographical composing machine, the combination with a series of pivoted cam-carrying yokes and a bar movably mounted above the pivots of said yokes, of pins carried by said bar adapted to yieldingly bear upon the cam-carrying yokes and a spring adapted to retain each of said pins in position on the bar and in contact with the respective cam-carrying yoke, each pin together with its spring being removable from and replaceable on the bar as an individual unit without disturbing the others when said bar is moved out of its operative position above the yokes.

1,666,945. SASH FASTENER. CARL PETERSEN SEKYER, Montreal, Quebec, Canada. Filed Aug. 2, 1926, Serial No. 126,515. Renewed Jan. 24, 1928. 2 Claims. (Cl. 292—305.)



1. A sash fastener comprising a rod bracket formed of an angle bracket having a key slot extending into the two sections, a rod having a key end adjustably secured in one section and inserted from the other section and secured to the frame through the latter, a lower bracket having the rod slidable therein and a clamping member binding said rod.

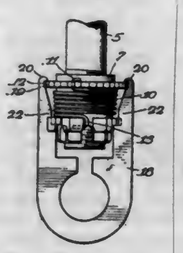
1,666,946. COMBINATION DOLL AND RADIO SET. CHARLES B. SHERLOCK, Philadelphia, Pa. Filed Dec. 29, 1923. Serial No. 683,526. 1 Claim. (Cl. 46—40.)



In a device of the class described, the combination of a doll body having a hollow interior and an opening at the front, a radio set inserted through said opening and having a flange for attachment to the exterior of the body of the doll around said opening, means for securing said flange to said body and means to operate the radio set from the exterior of the body.

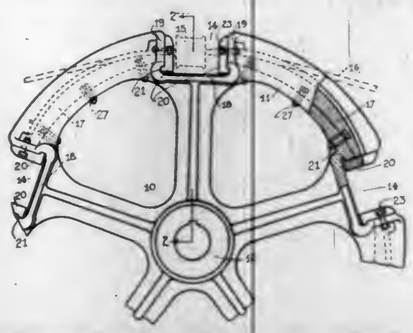
1,666,947. METHOD OF AND MEANS FOR REDUCING BODY-CAPACITY EFFECTS ON LOOP-ANTENNA SYSTEMS. HAROLD C. SILENT, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 31, 1924. Serial No. 759,095. 5 Claims. (Cl. 250—33.)

3. A loop antenna including a plurality of turns and having its outer turns connected to ground and its inner turns connected to the apparatus served by the antenna.



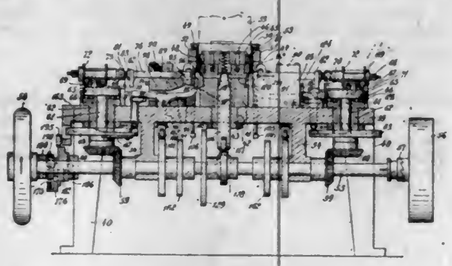
1,666,948. TAKE-UP DEVICE. STEPHEN A. SLAUSON, Cedar Rapids, Iowa, assignor to Vec Products Company, Cedar Rapids, Iowa, a Corporation of Iowa. Filed Feb. 2, 1925. Serial No. 6,167. 14 Claims. (Cl. 85—32.)

5. A take-up device comprising a main nut, a lock nut, and a key comprising resilient legs terminating in inturned hooks engaging one of said nuts, to hold it against axial movement in respect to the other nut, and provided with substantially parallel intermediate portions engaging the other of said nuts to prevent relative rotation of said nuts, said legs being provided with projections extending toward one another and having their ends spaced apart to permit the insertion of a tool.



6. A take-up device comprising a main nut, a lock nut, a spring having its ends connected respectively to said nuts and tending to cause relative rotation therebetween, a key to prevent such relative rotation, one of said nuts being provided with a plurality of means to receive said key, and with a plurality of means to receive one end of said spring and the other nut being provided with means to receive said key and with means to receive the other end of said spring.

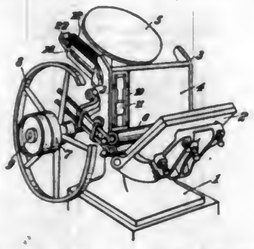
1,666,949. TAKE-UP DEVICE. STEPHEN A. SLAUSON, Cedar Rapids, Iowa, assignor to Vec Products Company, Cedar Rapids, Iowa, a Corporation of Iowa. Filed June 20, 1925. Serial No. 38,483. 7 Claims. (Cl. 85—32.)



4. A take-up device comprising a main nut, a flange on said main nut, said flange having a plurality of notches therein all of the same depth and form and arranged in pairs, the notches in each pair being arranged diametrically opposite to each other, a lock nut having a shoulder, said shoulder having a pair of oppositely disposed notches adapted to be brought into alignment with any one of the pairs of notches in said main nut, a spring connected to said nuts and adapted to cause relative rotation therebetween, and means on said main nut to receive one end of said spring in a certain position, the shoulder on said lock nut having an annular groove therein and also having a plurality of recesses intercepting the groove and co-operating therewith to form a plurality of means to receive the other end of said spring.

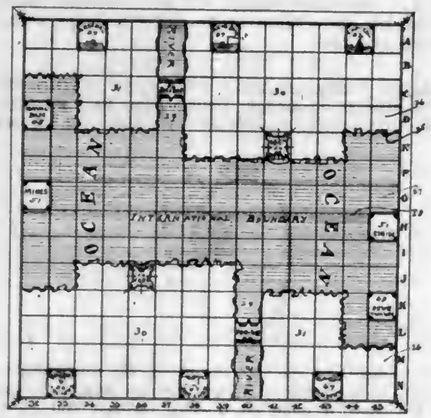
1,666,950. CABLE CONVEYER SPROCKET. RICHARD LIDSTONE SMALLWOOD, Toronto, Ontario, Canada. Filed June 20, 1927, Serial No. 200,156, and in Canada Mar. 1, 1927. 2 Claims. (Cl. 74—42.)

1. A cable conveyer sprocket comprising a web section, and a plurality of rim sections spaced to provide gaps therebetween adapted to receive the cable buttons, said rim sections terminating in vertically-arranged flanges having each a horizontally-arranged recess, and a button wearing plate detachably secured upon each of said flanges and having a lug engaging said recess.



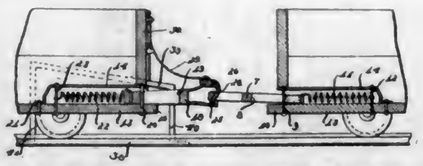
1,666,951. MESH MACHINE. OSCAR SODERSTROM, North Attleboro. Mass., assignor to Whiting & Davis Company, a Corporation of Massachusetts. Filed Nov. 2, 1923. Serial No. 672,271. 47 Claims. (Cl. 140—3.)

1. A machine for making link mesh, comprising the combination of a support for a piece of mesh, link forming tools, power driven mechanism for giving the tools and the piece of mesh a step by step relative movement and for operating the tools in each period of rest of this movement, a plurality of supplies of wire link material, a plurality of devices, one for each supply for feeding this material to the link forming tools, pattern mechanism for determining the supply from which material is to be fed and for controlling the action of the feeding devices, means for actuating the pattern mechanism, and means for controlling the operation of said actuating means.



1,666,952. ADDRESSING DEVICE FOR PRINTING PRESSES FOR PRINTING OF FIXED TEXT WITH CHANGEABLE ADDRESS. HUGO TOCKHORN, Berlin-Tempelhof, Germany. Filed Mar. 17, 1927. Serial No. 176,178. 13 Claims. (Cl. 101—67.)

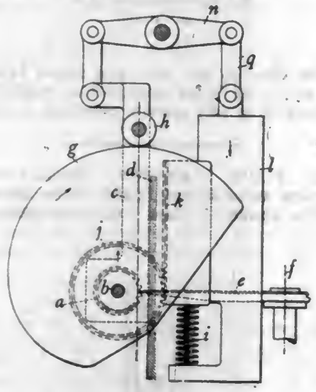
1. In an addressing device for printing presses for printing of fixed text with changeable address, a container for the address printing plates supplied for printing, said container being arranged below the inking means for the inking rollers of the printing press and behind the printing plane of the press, the delivery opening of said container being arranged in the printing plane of the press, a guide path for the address printing plates below said delivery opening of said container, said guide path being inclined in such a degree to the horizontal direction that



said address printing plates will slip along said guide path downward into printing position under the action of their own gravity.

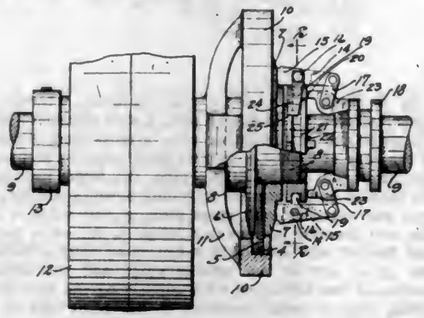
1,666,953. WAR GAME. JULIUS O. TUTTLE and ROY C. TUTTLE, Sioux City, Iowa. Filed May 7, 1927. Serial No. 189,556. 14 Claims. (Cl. 273—131.)

1. In a game, a board representing two sections of territory separated by a section of territory of different nature and subdivided into units, some of which are designated as a plurality of stationary defenses, stationary pieces for successively occupying said stationary defenses and limited to defending said stationary defenses, and moving pieces including a plurality of pieces movable only over the territory of one nature, and a plurality of pieces movable only over the territory of different nature, the stationary pieces being empowered to capture any moving piece occupying a unit adjacent its own unit.



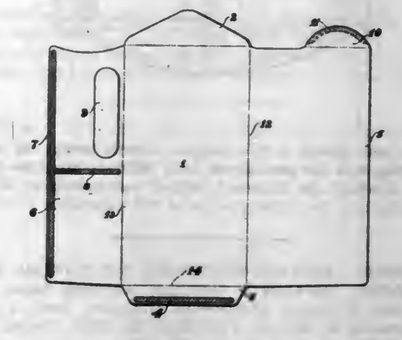
1,666,954. CAR COUPLING. JOSEPH WERNIS, Detroit, Mich. Filed Apr. 2, 1927. Serial No. 180,352. 3 Claims. (Cl. 213—211.)

1. In a car coupling mechanism of the class described, adapted for use with a car having an end wall; a rockably mounted coupling pin; a flexible member attached



at one end to said coupling pin and at its opposite end to a car with which used, said flexible member, upon being drawn taut, effecting a rocking of said coupling pin to inoperative position; and independent means mounted on said end wall and projecting outwardly from each side thereof, engageable with and disconnected from said flexible member for rendering said flexible member taut.

1,666,955. GRINDING OF GEAR-WHEEL TEETH. HARRY HALES ASBRIDGE, Ashton-on-Mersey, England, assignor to The Churchill Machine Tool Company Limited, Broadheath, near Manchester, England. Filed June 11, 1926, Serial No. 115,400, and in Great Britain Nov. 24, 1925. 3 Claims. (Cl. 51—52.)



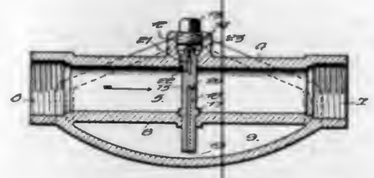
1. In a gear cutting machine, a grinding disc having a flat face, a templet and stationary abutment, the rolling of a tooth face relatively to the flat grinding face being effected, in one direction, by the interaction of said templet and stationary abutment, a spring for effecting rolling of the tooth in the opposite direction, means comprising a movable carrier for the spring, and means for co-ordinating the movements of the carrier with those of a member carrying the toothed wheel, substantially as described.

1,666,956. FRICTION CLUTCH. EMIL A. BEYL, Minneapolis, Minn. Filed June 17, 1927 Serial No. 199,502. 2 Claims. (Cl. 192—68.)

1. In a clutch, an axially movable clutch-setting member, a collar adjustable in respect to said member by a rotary movement and having inner and outer peripheral flanges and a plurality of circumferentially spaced lock notches in said inner flange, a spring finger, and a bolt extending through an aperture in the spring finger and aneboring the same to said member, said spring finger having a lock detent arranged to enter any one of said lock notches, said lock detent being held by the clutch-setting member and collar against endwise movement to prevent the same from moving out of the engaged lock notch.

1,666,957. DUPLEX ENVELOPE. CHARLES E. CATHER, Worcester, Mass., assignor to United States Envelope Company, Springfield, Mass., a Corporation of Maine. Filed Mar. 18, 1921. Serial No. 453,362. 2 Claims. Cl. 229—72.)

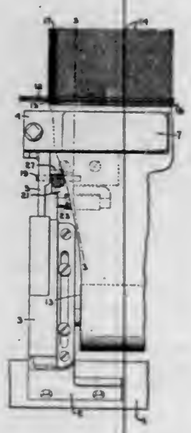
1. A double compartment envelope comprising a blank having a body portion, a relatively large side flap extending from one edge of said body portion and folded over said body portion to provide a relatively large compartment between said large flap and body portion, said large flap being approximately equal in length and width to said body portion, a relatively small side flap extending from said body portion at the edge opposite to the first mentioned edge, said small side flap being folded over said large side flap to provide a second compartment directly between said side flaps, the two compartments having one common boundary line, said small side flap having a gummed margin sealed to the outer face of said large side flap in a line between and parallel with said edges, an end flap extending from the lower edge of said body portion and sealed to the outer faces of both of said side flaps, a gummed sealing flap extending from the upper edge of said large side flap and foldable over said small side flap, the length of said gummed sealing flap being approximately equal to the width of said small side flap so as to form a closure for said second compartment, and a non-sealing closure flap extending from the upper edge of said body portion to form a closure for said relatively large compartment.



1,666,958. CATALYTIC COMBUSTION OF AMMONIA-OXYGEN MIXTURES. IVAR WALFRID CEDERBERG, Steglitz, near Berlin, Germany. Filed Dec. 8, 1924, Serial No. 754,655, and in Germany Dec. 4, 1923. 2 Claims. (Cl. 23—288.)

1. In the process of catalytically oxidizing ammonia to nitric oxides, the step which comprises passing a mixture of ammonia and oxygen over a catalyst heated to reaction temperature and maintained in a reaction zone, and cooling one face of the reaction zone whereby a high temperature gradient is formed between the catalyst and the cooled face.

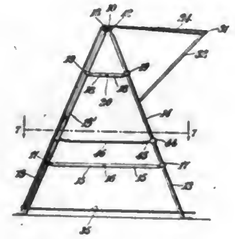
1,666,959. LUBRICATOR. OMAR E. CLARK, Denver, Colo., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo., a Corporation of Delaware. Original application filed Mar. 15, 1923, Serial No. 625,352. Divided and this application filed Feb. 19, 1924. Serial No. 693,886. 12 Claims. (Cl. 184—55.)



1. A lubricator comprising a casing having a fluid passageway therethrough and a lubricant reservoir walled from the passageway and a single stem extending through

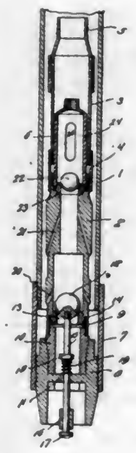
the wall into the passageway and into the reservoir, said stem having a lubricant outlet conduit consisting of an inlet communicating with the lower portion of the reservoir and an outlet opening into to the passageway, said

stem also having a fluid supply conduit having an inlet opening into the passageway in a different direction from the outlet of the lubricant conduit and having an outlet opening into the upper portion of the reservoir.



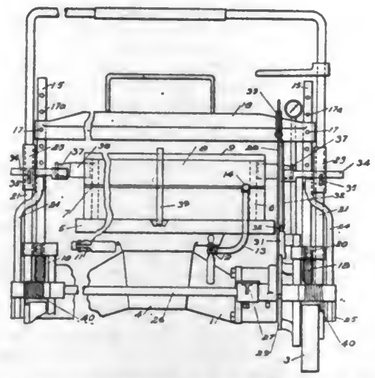
1,666,960. SELVAGE-RELIEVING MECHANISM FOR LOOMS. EDWARD A. CUNNIFF, Waltham, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed July 25, 1927. Serial No. 208,179. 11 Claims. (Cl. 139—292.)

1. A loom comprising means acting on the cloth forward of the fell to maintain the cloth stretched widthwise as it advances in the weaving operation, and means acting on the cloth at the selvage forward of the stretching means prior to beat-up to advance the fell at the selvage when beat-up occurs.



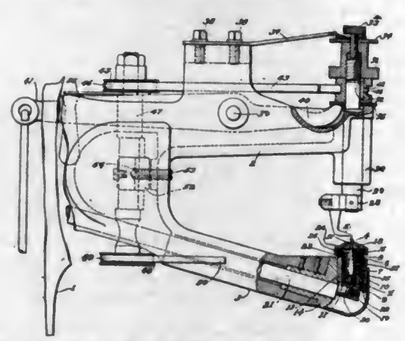
1,666,961. COMBINED TENT AND SWING FRAME. HART E. DELVIN, Evanston, Ill. Filed Dec. 31, 1923. Serial No. 683,636. 3 Claims. (Cl. 135—3.)

1. A tent comprising a ridge-pole having a pair of divergent legs at each end, said legs being composed of cylindrical tubular sections pivoted at their points of intersection, foldable braces independently connecting the upper and lower sections of each pair of legs, arms pivoted to the upper section of one of each pair of legs, said arms being angularly extensible or closely foldable alongside the legs, a pole extending between the lower ends of said legs on each side, said pole being also engageable with the outer ends of said arms when said arms are folded, a cover extensible over said ridge-pole between said pairs of legs to the lower ends thereof, means to



secure said cover to said pole, and means to secure the edges of said cover to the main portion thereof when the pole is elevated by said arms to constitute a canopy.

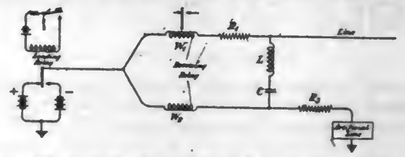
1,666,962. FLUID ELEVATOR. DOUGLAS B. DENNIS and CLAUD WILSON, Taft, Calif. Filed Mar. 9, 1926. Serial No. 93,468. 1 Claim. (Cl. 103—229.)



In a check valve for a fluid elevator wherein the latter includes a fluid lifting pipe, a shoe supported below the lower end of the lifting pipe, a cross piece arranged in the bore of a shoe, a tubular guide member secured in the lower end of the lifting pipe, the lower portion of the tubular guide member extending downwardly into the shoe and engaging said cross piece, a ball valve, a ring like seat therefor, an annular flange on the outer peripheral face of said seat, said flange being secured between the upper end of the tubular guide and the adjacent portion of the lifting pipe for supporting the seat in the lifting pipe, a stem threaded at its upper end in the bottom of the ball valve and extending downwardly through the cross piece in the shoe, a guide sleeve for the lower end of the stem and arranged in the lower portion of the shoe, a head on the lower end of the stem, a collar secured on the stem at a point above the cross piece, and a retractile coil spring encircling the stem and secured at its opposite ends to the collar and the cross piece respectively for normally holding the ball valve seated in a closed position.

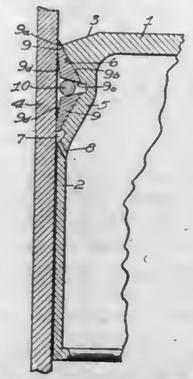
1,666,963. MOLDING MACHINE. EDWARD G. GERMER, EARL G. WALBRIDGE, and JOHN M. WYSOCKI, Erie, Pa.; said Walbridge and Wysocki assignors to said Germer. Filed Oct. 30, 1925. Serial No. 65,765. 11 Claims. (Cl. 22—48.)

1. In a molding machine, the combination of a molding machine platform; a flask lifter adapted to lift flasks from the platform comprising means pivotally engaging a flask; and a swinging mounting for said lifter.



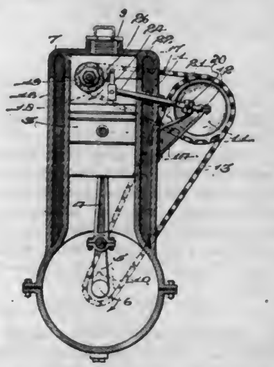
1,666,964. LINING-TRIMMING MACHINE. JOSEPH GOULDBOURN and JOHN WILLIAM GODDARD, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 28, 1925, Serial No. 12,427, and in Great Britain Mar. 8, 1924. 28 Claims. (Cl. 12—51.)

1. A machine for severing the lining which projects beyond an edge of the upper of a shoe having, in combination, a work support arranged to project into a shoe and to support a portion of the lining thereof, a cutter mounted in and movable relatively to said support to enter the shoe, and means for operating said cutter to sever the lining.



1,666,965. DIFFERENTIAL DUPLEX TELEGRAPH REPEATER. JOSEPH HERMAN, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed June 26, 1926. Serial No. 118,693. 2 Claims. (Cl. 178—58.)

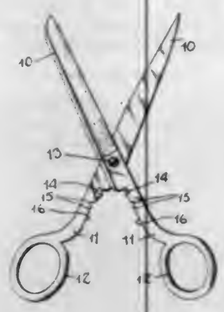
1. In a differential duplex telegraph repeater system, a line, an artificial line, a sending relay, a receiving relay having a first winding in series with said line and a second winding in series with said artificial line, a shunt path between said line and said artificial line, said shunt path including an inductance and a capacity of such values that they form a tuned circuit resonant at the frequencies of interfering alternating currents in the line, a first resistance in series with the first winding of the receiving relay, and a second resistance in the artificial line, said first resistance being of such a value that the



interfering alternating currents will divide between the two windings of the receiving relay, having no effect upon said relay, and said second resistance being of such a value that a duplex balance of the system is maintained.

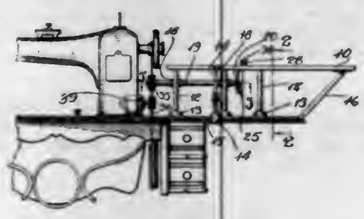
1,666,966. PISTON AND PISTON-RING CONSTRUCTION. ROSCOE GOULD HILL, River Falls, Wis., assignor of one-half to Frederic X. Knobel, River Falls, Wis. Filed June 3, 1927. Serial No. 196,317. 5 Claims. (Cl. 74—109.)

1. The combination with a piston having an annular groove V-shaped in cross section, of a pair of piston rings, each having a surface arranged to bear on a wall of the groove, and a contractile spring ring arranged to bear simultaneously on said piston rings and tending to force them outwardly.



1,666,967. IGNITER FOR INTERNAL-COMBUSTION ENGINES. HARLEY A. W. HOWCOTT, New Orleans, La. Filed Jan. 15, 1926. Serial No. 81,485. 8 Claims. (Cl. 123—143.)

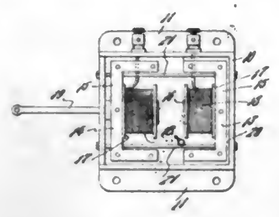
1. In combination with an engine cylinder having a piston operable therein to form a combustion chamber, an abrasive element situated solely and revoluble within



the combustion chamber, a metallic contactor also situated solely within the combustion chamber, and means carrying the contactor being reciprocatively mounted in the cylinder wall for periodically engaging the contactor with the surface of said element.

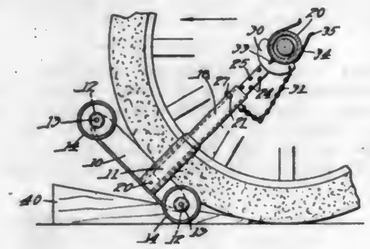
1,666,968. SCISSORS AND SHEARS. HENRY NEWTON JAMES, Miami, Fla. Filed Apr. 18, 1925. Serial No. 24,266. 1 Claim. (Cl. 7—6.)

In combination, a pair of members pivotally connected and having overlapping edges, the overlapping edges being provided with opposed rectangular notches, the bottoms of said notches being beveled to form opposed cutting edges, and the sides of the notches projecting beyond the cutting edges whereby to prevent slipping of an article being cut.



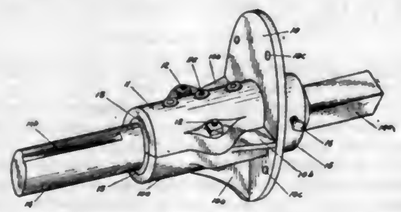
1,666,969. CLOTH CUTTER. HENRY NEWTON JAMES, Miami, Fla. Filed Oct. 5, 1925. Serial No. 60,588. 1 Claim. (Cl. 164—60.)

In a device of the kind described, a table having a slot therein, a rotating cutter journaled beneath said table and having a portion of its periphery projecting slantably above said table through said slot, a post extending upward from the table in parallel alignment with said slot, a clamp screw extending through the upper end of said post, a pair of arms each having one end pivoted to the clamp screw and the remaining end positioned adjacent said slot, and a cutter blade supported beneath the free ends of said arms and cooperating with the rotatable cutter.



1,666,970. ELECTROMAGNET. CARLOS LUIS JAUSS, Mexico, Mexico. Filed Sept. 23, 1925. Serial No. 58,146. 2 Claims. (Cl. 175—340.)

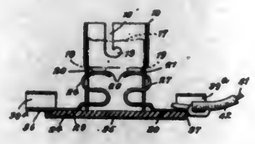
2. In an electromagnet, a support, electro-magnets carried thereby, each of said magnets comprising a substantially E-shaped bar including a middle leg and an inductance mounted upon the middle leg of each of said bars with the ends of the bars and the inductances arranged in opposed relation, means to fixedly secure one



of the magnets to the support and spaced parallel slide rods fixed to the support and extending through the bar of the other magnet to slidingly support the latter.

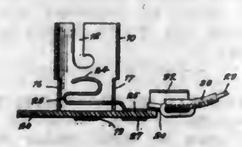
1,666,971. AUTOMOBILE JACK. EUGENE J. MCCARTY, Clinton, Mass. Filed Dec. 10, 1926. Serial No. 153,967. 1 Claim. (Cl. 254—94.)

In an automobile jack, the combination with a base having a socket projecting upwardly therefrom near one end, a telescoping support carried in said socket and connected with the base to hold the upper end of the telescoping support always at the same distance from the base, a head on the upper end of said support adapted to support the axle of a car and having a seat therethrough at the top, and means on said head for grasping the axle of an automobile simply by pressing the jack upwardly toward it so that the jack will be supported by and hung from the axle and will be capable of swinging about it.



1,666,972. MOTOR POWER TAKE-OFF. GUSTAF E. MILLER and OSCAR E. MILLER, Stratton, Nebr. Filed Feb. 21, 1927. Serial No. 170,065. 1 Claim. (Cl. 308—15.)

A motor power take off which is adapted to be secured to an automobile engine in the place of the universal joint, said power take off including a shaft and a support



therefor, said support including two parts, one of said two parts comprising a semi-cylindrical part and a circular disc, said circular disc being provided with apertures for securing said take off to the engine in the place of the universal joint, the other of said two parts being semi-cylindrical and having means for securing it to the semi-cylindrical portion of said first described part, bearings between said semi-cylindrical members, said shaft passing through said bearings and having its inner end portion in square form, an adjustable collar surrounding said shaft adjacent said square portion, and a set screw for securing said collar to said shaft.

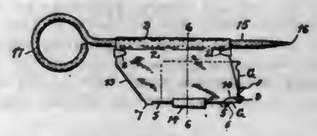
1,666,973. DOUBLE-CONTACT SOCKET FOR ELECTRIC LAMPS. FREDERICK J. MILES and DONALD C. THOMPSON, Newark, N. J., assignors, by mesne assignments, to Eugene Sullivan, New York, N. Y. Filed Nov. 14, 1924. Serial No. 749,906. 1 Claim. (Cl. 173—328.)

An electric lamp socket consisting of five parts, a base member of insulating material having a plurality of slots formed therein, a cylindrical sleeve or socket member having at one end two oppositely located bayonet-lock slots adapted to receive the laterally projecting pins of a lamp base, two oppositely located gaps at the other end and positioned diametrically opposite to the bayonet-lock slots, and two oppositely located lugs positioned between said gaps and adapted to pass through slots in the base, and bent over to clamp the sleeve in position; two contact members mounted on said base and projecting into the sleeve member through said gaps, each of said contact members being formed in one piece, stamped from sheet metal and having the contact end in the form of the letter S, lugs projecting from the mid-section adapted to pass through slots in the base plate and bent over to clamp the contact piece in position, and at the outer end having lugs for clamping a circuit wire thereto, and a plate of insulating material covering all said lugs on the under side of the base plate.

1,666,974. SOCKET FOR ELECTRIC LAMPS. FREDERICK J. MILES and DONALD C. THOMPSON, Newark, N. J., assignors, by mesne assignments, to Eugene Sullivan, New York, N. Y. Filed Nov. 14, 1924. Serial No. 749,907. 2 Claims. (Cl. 173—328.)

1. An electric lamp socket consisting of three pieces, one, a base member of insulating material having a plurality of slots formed therein; two, a cylindrical contact member having two oppositely located bayonet-lock slots adapted to receive the latterally projecting pins of a lamp base, a slot or gap for receiving the other contact element, and two oppositely located lugs adapted to pass through slots in the base piece and to be bent over for clamping same to the base piece and which lugs are adapted to make contact with a metallic piece included in a grounded circuit; and three, a spring contact member projecting into said cylindrical piece and having downwardly projecting lugs passing through slots in said base piece and bent over to clamp same in position and also having lugs for clamping a circuit wire to said contact member.

1,666,975. BELT ATTACHMENT. JOSEPH H. MONAHAN, Worcester, Mass. Filed May 11, 1927. Serial No. 190,588. 9 Claims. (Cl. 24—8.)

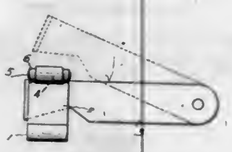


1. A belt attachment comprising a supporting member and a tongue mounted for swinging movement thereon, said tongue and supporting member having curved portions substantially concentrically disposed and forming a pivot bearing for said tongue, and a portion of said tongue engaging a portion of said supporting member adjacent said pivot bearing by which cooperative engagement said tongue is held under tension in assembled relation with said supporting member.

1,666,976. GASOLINE SUBSTITUTE AND PROCESS OF MAKING. JOHN B. NEUENDORFF, San Antonio, Tex. Substitute for application Serial No. 473,382, filed May 18, 1921. This application filed Aug. 6, 1926. Serial No. 127,705. 7 Claims. (Cl. 44—9.)

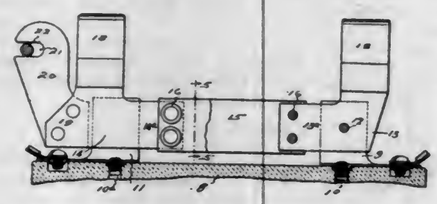
1. A process of improving petroleum distillates for use in internal combustion engines which comprises subjecting the said distillates in a liquid state to the action of clear lime water.

1,666,977. COMBINATION TOOL. CLARK H. RUTTER, New Castle, Pa. Filed Oct. 27, 1926. Serial No. 144,428. 1 Claim. (Cl. 30—20.)



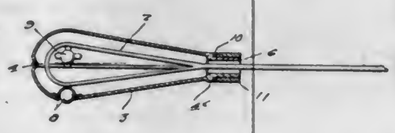
A tool comprising a body including two sides, a tubular portion formed at the juncture of the two sides and adapted to hold a stem removably therein, a blade located between the two sides, a clamp for detachably securing the blade in position, a tongue disposed at an angle from the corner of one of said sides, a second tongue extending from the corresponding corner of the other side, said tongues being located at right-angles to each other, there being a notch formed in the body between said tongues to expose a portion of said blade.

1,666,978. TERMINAL CONTACT CLIP. JOSEPH SACHS, Hartford, Conn. Filed Dec. 12, 1921, Serial No. 521,776. Renewed Aug. 14, 1926. 6 Claims. (Cl. 200—166.)



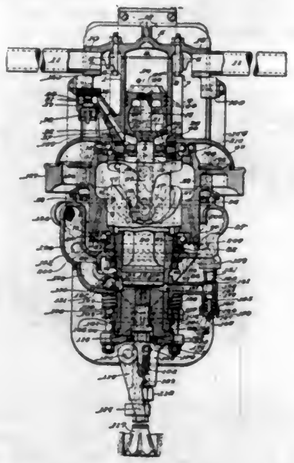
1. A rupture contact for an electric switch adapted to receive and contact with a switching member, the said contact comprising in combination a contact finger adapt-

ed to make electrical contact with said member, and a rotatable conducting rupture element electrically connected with the finger and held against bodily movement in directions parallel with the plane of the normal contact surface thereof, the said rupture element being positioned beyond



the end of the said normal contact surface of the finger so as to contact with the normal contact surface of the switching member during its circuit opening movement, thus providing a shifting rupture surface located beyond the end of the normal contact portion of the finger which is thereby protected from arcing manifestation.

1,666,979. FUSIBLE SWITCH. JOSEPH SACHS, Hartford, Conn. Filed Jan. 25, 1923. Serial No. 614,848. 1 Claim. (Cl. 200—114.)

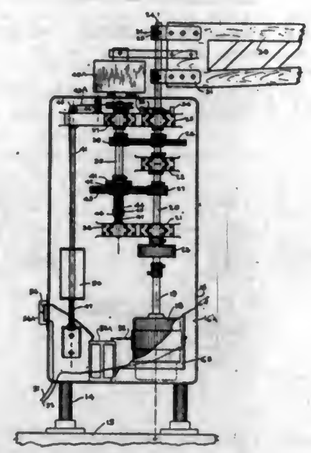


In an electric switch of the knife blade type, the combination with a base and two separated clips secured to the base in alignment with each other and each having ears with standard spacing between them, of a pivotally mounted switch member comprising four thin plates of conducting material arranged in pairs with the inner faces of the plates of each pair in direct contact with each other and with their combined thickness such as to adapt them to fit between and electrically engage at their outer faces with the ears of the corresponding terminal clips, opposed integral extensions on the plates of the respective pairs forming pairs of fuse receiving clips, and two spaced plates of insulating material connecting the conducting plates and respectively secured to and engaging the opposite outer faces of the said plates at portions thereof other than the terminal clip engaging portions.

1,666,980. CABLE HEAD. JOHN E. SHARP, Wheeling, W. Va. Filed Apr. 1, 1927. Serial No. 180,207. 4 Claims. (Cl. 175—376.)

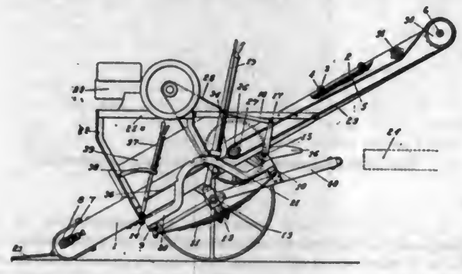
4. A snake head comprising concavo-convex sections hingedly connected together at their forward ends and having a comparatively large forward portion and antifriction devices carried by and protruding from said portions, and means for detachably holding the rear end portions of said sections together.

1,666,981. IMPACT OR PERCUSSIVE TOOL OF THE EXPLOSIVE-MOTOR TYPE. CHARLES STUART SOMERVELL, Riverton, N. J.; Bertha W. Somervell, administratrix of said Charles Stuart Somervell, deceased, assignor to Pennsylvania Gasoline Drill Company, Philadelphia, Pa., a Corporation of Delaware. Filed Aug. 25, 1923. Serial No. 659,350. 34 Claims. (Cl. 123—7.)



14. In an impact tool, the combination of a cylinder, a piston reciprocable therein on the principle of an internal combustion engine, a rotor surrounding said cylinder coaxially therewith and rotated by said piston-hammer, and an oil pan rigidly secured to said cylinder, surrounding said cylinder, extending upwardly to surround the lower portion of said rotor and having a flange at the top thereof extending inwardly close to the outer surface of said rotor to prevent the escape of oil over the top of said pan when said cylinder is inclined in any direction.

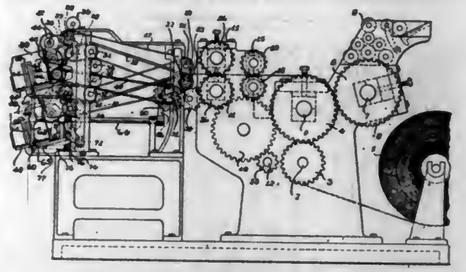
33. In an impact tool, the combination of a cylinder, a piston-hammer reciprocable therein on the principle of an internal combustion engine, said piston-hammer cooperating with said cylinder to draw air into a portion of said cylinder on the return stroke of said piston-hammer and to compress air in said cylinder during the power stroke of said piston-hammer, means to regulate and control the pressure of the air so compressed in said cylinder to vary and modify the force of the blow delivered by said piston-hammer, means to conduct some of the air so compressed to the bottom of the hole being drilled to remove detritus therefrom, and means to conduct some of the air so compressed from said cylinder to the combustion end of said cylinder to cool said end of said cylinder.



1,666,982. RAILWAY GATE. ROBERT STRICKLER and JOHN HENRY MCJANNETT, Woodstock, Ontario, Canada. Filed June 24, 1926. Serial No. 118,251. 2 Claims. (Cl. 39—7.)

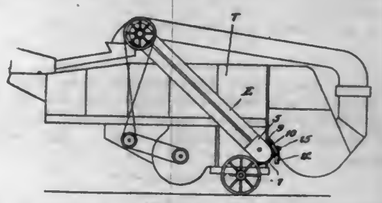
1. In a railway gate, a frame, a motor, a spindle, a bar carried by said spindle, a gear rigidly mounted upon said spindle, a long shaft arranged in parallel alignment with said spindle, a gear rigidly mounted upon said shaft and meshing with said first-mentioned gear, a friction disc rigidly secured upon said long shaft, a gear loosely mounted upon said long shaft and springheld against said friction disc, a short shaft in alignment with said spindle and the motor shaft and lying therebetween, a clutch member interposed between the

motor shaft and said short shaft adapted to operatively connect one with the other when the motor is rotating, a gear rigidly mounted upon said short shaft and meshing with said loosely mounted gear, and gravity operated means adapted for operating said short shaft in a direction opposite to that of the motor shaft.



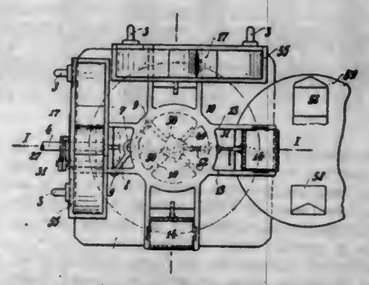
1,666,983. TRUCK LOADER. ERNEST W. SULLIVAN, Manteca, Calif. Filed Aug. 25, 1926. Serial No. 131,373. 1 Claim. (Cl. 198—121.)

A truck loader comprising a conveyor structure arranged to rest on the ground at one end and to slope upwardly from said end, a longitudinally extending frame under the conveyor intermediate its ends, means supporting the frame from the ground, hinge connections between the conveyor and frame at the lower end of the latter, cam members turnably mounted on the frame at its upper end and on which the conveyor rests, and manually operated lever means mounted on the frame and connected to the cam members for turning the same to raise and lower the conveyor and cause the same to turn about its hinge connection.



1,666,984. DELIVERY MECHANISM. LOUIS P. WILLSEA, Rochester, N. Y. Filed Jan. 26, 1927. Serial No. 163,773. 16 Claims. (Cl. 271—64.)

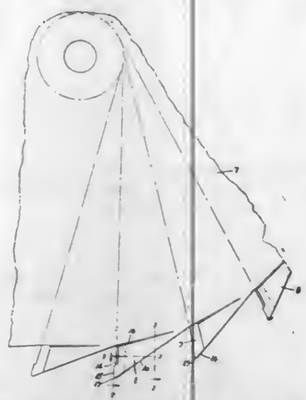
1. The combination with a sheet slitting mechanism and a transverse cutting mechanism for cutting the strips formed by the slitting mechanism, of a delivery mechanism having a plurality of feeding mechanisms receiving the pieces cut from the different strips, some



of said feeding mechanisms having their discharge ends discharging the pieces at the different horizontal planes from other of said feeding devices.

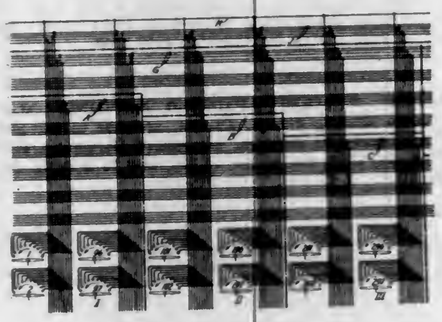
1,666,985. LATCH. WILLARD W. AYOTTE, Midale, Saskatchewan, Canada. Filed May 21, 1926. Serial No. 110,750. 1 Claim. (Cl. 292—113.)

A latch of the class described including a pair of brackets adapted to be attached to a support, a hook adapted to be attached to a closure or gate, links pivotally engaged with said brackets, a shank pivoted intermediate its ends to the extremities of the links, one end of said shank being twisted at right angles and bent to form a loop for engaging said hook.



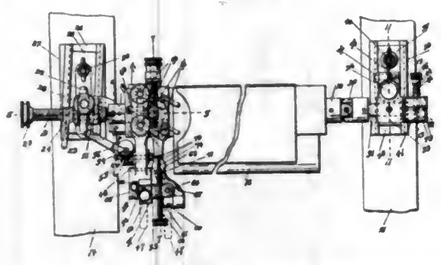
1,666,986. CIGARETTE-PACKING MACHINE. MAXIMILIAN BÄUML, Vienna, Austria, assignor to the Firm Jagenbergwerke Akt.-Ges., Dusseldorf, Germany. Filed Nov. 30, 1925, Serial No. 72,355, and in Austria Dec. 2, 1924. 5 Claims. (Cl. 226—5.)

1. A cigarette packing machine comprising in combination storage receptacles for the cigarettes, collecting receptacles for a certain number of cigarettes, means for intermittently feeding forward the collecting receptacles underneath the storage receptacles, compartments in the latter separated from one another by intermediate spaces,



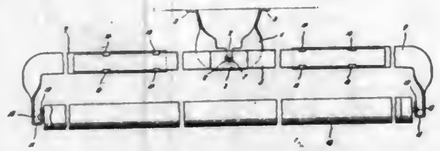
and means in these spaces for periodically releasing the cigarettes contained in the said compartments for permitting or preventing the passage of the cigarettes into the collecting receptacles.

1,666,987. SAW TOOTH. PERCY LEON BILLINGSLEY, Orlando, Fla., assignor of one-fourth to M. O. Overstreet, Orlando, Fla. Filed Nov. 26, 1926. Serial No. 150,950. 5 Claims. (Cl. 143—133.)



1. A saw whose teeth have bevelled faces with those edges between said faces and outer sides of the teeth forming cutting edges and being terminated within the height of the teeth by bevels reverse to the bevels of said faces.

1,666,988. TRUNKING SYSTEM. WILLIAM G. BLAUVELT, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Apr. 27, 1927. Serial No. 186,998. 6 Claims. (Cl. 179—18.)

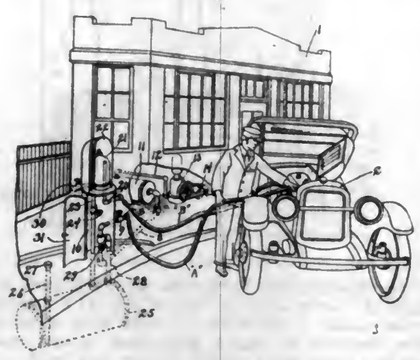


1. A trunking system in which a plurality of trunks gives service to a plurality of lines, the lines being divided into groups each having access to a number of trunks less than the total number provided, the trunks being divided into a plurality of groups, certain of said groups of trunks being assigned as first choice trunks to certain of said groups of lines, certain other of said groups of trunks being assigned as second choice trunks to certain pluralities of said groups of lines and another group of trunks being assigned as third choice trunks in common to all of said groups of lines, the numbers of the trunks of each group assigned to any group of lines and the order in which the trunks are selected being such that when a given number of the total number of trunks are busy the probability of one set of trunks of a given number being busy will be at least approximately the same as the probability that any other set of equal number will be busy.

1,666,989. RULING MACHINE. ALBERT BROADMEYER, Harrisburg, Pa., assignor to W. O. Hickok Manufacturing Company, Harrisburg, Pa., a Corporation of Pennsylvania. Filed Aug. 14, 1925. Serial No. 50,199. 9 Claims. (Cl. 33—39.)

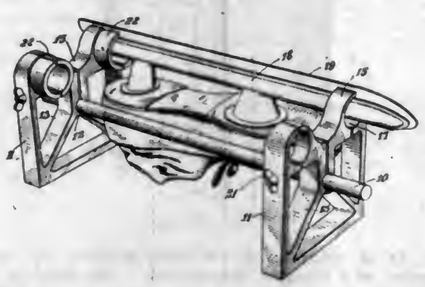
1. In ruling apparatus, the combination with a movable pen beam, of an actuated arm carried thereby, an actuating arm, a trip movably mounted on the actuating arm, and means adjustably mounted on the actuated arm for engagement by the trip.

1,666,990. WINDOW-SHADE APPARATUS. THOMAS S. CATLIN, Waveland, Ind., assignor to Catlin-Tompkins Corporation of Indiana, Indianapolis, Ind., a Corporation of Indiana. Original application filed Feb. 3, 1922, Serial No. 533,795, Patent No. 1,546,565, dated July 21, 1925. Divided and this application filed June 15, 1925. Serial No. 37,100. 2 Claims. (Cl. 156—28.)



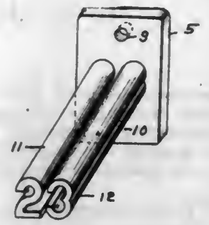
2. In window shade apparatus, the combination of a U-shaped bracket plate adapted to have its legs anchored to a horizontal overhanging surface, the plate having a vertical slot opening upwardly intermediate its ends, a flat bracket rod having an offset portion contacting with the bracket plate and pivotally engaging the same through said slot, and shade roller sustaining means carried by said bracket rod.

1,666,991. ELECTRICAL CONNECTER. SIDNEY COHEN, Neponsit, N. Y. Filed Aug. 25, 1925. Serial No. 52,437. 1 Claim. (Cl. 173—269.)



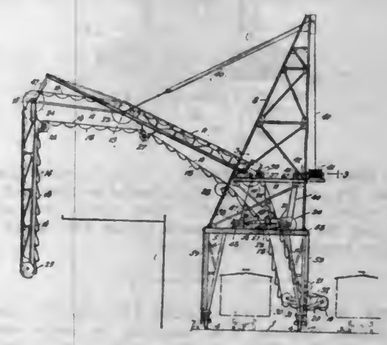
In a connecter for flexible electric conductors, the combination of a shank U-shaped in cross section having a terminal connection integral with one end and an upset bead projecting from the inside of the closed side of the shank, a jaw pivotally mounted in the terminal connection end of the shank and having its underside provided with a notch to coincide with the bead and a tooth to bite into the interposed flexible conductor, and a tapered insulating sheath slidable over the free ends of the jaw on said shank to force the two members into clamping position about the conductor.

1,666,992. APPARATUS FOR FORCING LUBRICANT FROM MOTOR-VEHICLE LUBRICANT-CONTAINING CASES. HENRY DEWARD COLLIER, San Francisco, Calif., assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif., a Corporation of Delaware. Filed Mar. 30, 1925. Serial No. 19,555. 5 Claims. (Cl. 184—1.5.)



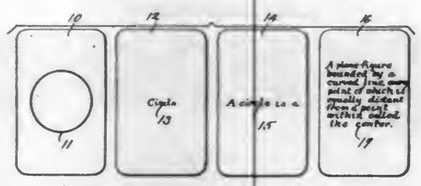
1. In an apparatus for discharging lubricant from a motor vehicle, the combination of a lubricant containing case, a discharge pipe secured to the said case and communicating with the same from below, the body of lubricant therein, and extending to a point readily accessible above the point at which the same is secured to the containing case, said pipe being adapted to normally prevent the flow of lubricant from the said case, an inlet communicating with the interior of the said case above the normal level of lubricant within the said case, means for connecting the said inlet with a source of air under pressure, and means for connecting the discharge pipe with a lubricant receiving container.

1,666,993. SHARPENING BLOCK FOR RACING SKATES. RICHARD D. CORKE, Yonkers, N. Y. Filed Dec. 2, 1926. Serial No. 152,236. 1 Claim. (Cl. 51—228.)



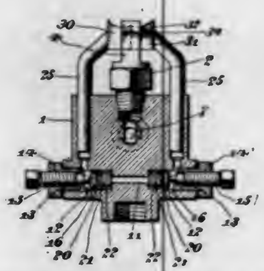
A device of the class described comprising a longitudinally extending bar and a plurality of clamping members slidably mounted thereon, each of said clamping members comprising a hub portion around the bar, a frame portion, means connecting the frame and hub, resilient clamping jaws carried by the frame and hub, and means for pulling the jaws of the frame and hub toward each other whereby the hub is put under tension on the bar.

1,666,994. MARKING SYSTEM. GEORGE H. CROSS, Merced, Calif., assignor of one-fifth to Samuel V. Cornell and two-fifths to Charles C. Hale. Filed June 20, 1925. Serial No. 38,586. 4 Claims. (Cl. 40—19.5.)



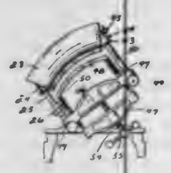
1. In a marking system a supporting rack adapted to be mounted upon a stationary support to project outwardly, said rack being of a configuration in transverse section corresponding to characters, in combination with a disc provided with perforations adapted to fit said rack bar.

1,666,995. MACHINE FOR LOADING AND UNLOADING SHIPS. BEMISS N. DAVIS, New Orleans, La. Filed June 1, 1925. Serial No. 34,019. 4 Claims. (Cl. 198—116.)



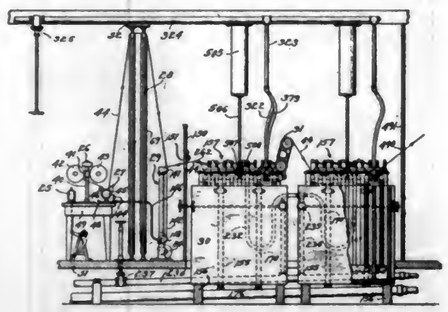
1. A machine for loading and unloading fruit and the like into and out of ships comprising a rigid supporting frame designed to be located entirely upon a dock and having gantry legs arranged inward and outward so vehicles may travel along the dock between the gantry legs, a boom connected to the frame above the gantry legs and adapted to overhang the ship, an endless conveyor, means carried by the frame and its boom for guiding the conveyor, and power-driven means for operating the conveyor in engagement with the load-carrying run thereof adjacent the frame-connected end of the boom, said conveyor including a bight portion guided on the frame and descending from the power-driven means into proximity to the dock permanently adjacent the inward gantry leg so that vehicles may be located outward relatively to said descending conveyor portion, said conveyor being guided on the boom and extending outward along the boom from the power-driven means and having a bight portion depending from the boom to enter the hold of the ship.

1,666,996. EDUCATIONAL CARD GAME. HAZEN DOUGLAS, Dundalk, Md. Filed Apr. 9, 1927. Serial No. 182,253. 3 Claims. (Cl. 273—152.)



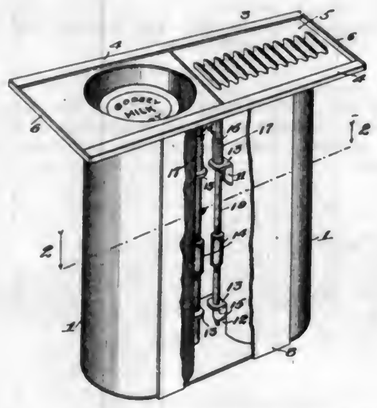
1. In an educational card game, a series of groups of cards, each group including a key card bearing the picotrial representation of a geometrical figure, and each group having a series of other cards bearing indica of facts relating to the geometrical figure illustrated on the key card.

1,666,997. PILOT BURNER. SVEN AUGUST ESKILSON and KARL AXEL BERNHARD HOLM, Stockholm, Sweden, assignors to American Gasaccumulator Company, Elizabeth, N. J., a Corporation of New Jersey. Filed Jan. 10, 1927. Serial No. 160,052. 6 Claims. (Cl. 67—16.)



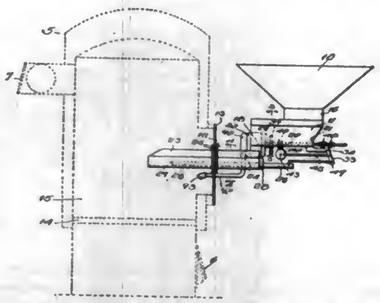
1. A pilot burner comprising a casing to which gas is supplied, the upper end of which casing is open and one side of which is provided with a notch, which notch opens out toward the body of the main burner with which the said pilot burner may be associated.

1,666,998. REPAIR VULCANIZING APPARATUS. MERLE E. FABER, Waupun, Wis., assignor, by mesne assignments, to The Shaler Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 13, 1926. Serial No. 94,444. 8 Claims. (Cl. 18—18.)



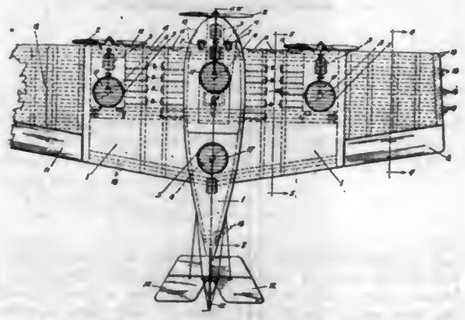
1. In a vulcanizing apparatus, the combination with a source of supply for heated fluid, of a post for interchangeably supporting a set of hollow mandrels in an axially tilted position to drain through one end, a set of hollow mandrels each having an elbowed member at one end adapted for sliding engagement with the end of the post, and a connecting member leading from the source of supply and adapted to be interchangeably coupled to the lower ends of the mandrels for fluid admission and exhaust purposes.

1,666,999. FILM-DEVELOPING MACHINE. FRANK E. GARBUTT and LEIGH M. GRIFFITH, Los Angeles, Calif., assignors to Paramount Famous Lasky Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 26, 1926. Serial No. 104,609. 14 Claims. (Cl. 95—94.)



1. An apparatus for developing motion picture film comprising: means suited to contain liquids; a plurality of roller means so placed that a single strip of motion picture film may be looped about each of said roller means in a single series passing through said liquid; and a series of prime movers, each independent of the other, and each adapted to drive one of said roller means.

1,667,000. MILK DISTRIBUTOR AND BOTTLE COLLECTOR. ROBERT D. GODSEY and MOSES P. LITTON, Bristol, Va., assignors of three-fourths to said Godsey and one-fourth to said Litton. Filed Mar. 9, 1927. Serial No. 173,915. 11 Claims. (Cl. 232—4.)

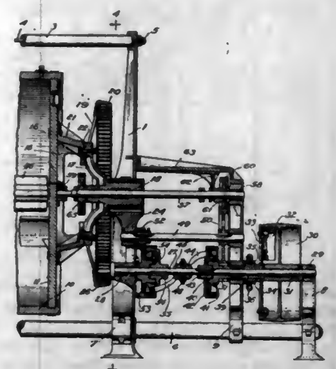


1. In an apparatus of the class described, the combination of a plurality of containers, a top structure including a sliding top upon said containers, and bodily movable locking means extending into said containers and actuated by the weight of a bottle and adapted to normally engage said top for preventing sliding movement thereof.

1,667,001. FURNACE. OWEN H. GRAY and CHARLES E. MURDOCK, Salt Lake City, Utah, assignors to Gray & Murdock Mfg. Co., Salt Lake City, Utah, a Corporation of Utah. Filed Mar. 3, 1927. Serial No. 172,260. 9 Claims. (Cl. 236—46.)

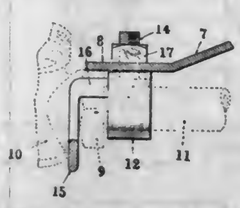
1. In a furnace, the combination of a mechanical fuel feed, means for periodically operating said fuel feed independently of temperature requirements, and means for varying the duration of the periodic fuel feeding operations produced by said first means and the intervals between said operations with the temperature requirements of the furnace.

1,667,002. AIRCRAFT. CHARLES S. HALL, Los Angeles, Calif., assignor to Hall Airways Corporation, Dover, Del., a Corporation. Filed Nov. 12, 1921. Serial No. 514,737. 8 Claims. (Cl. 244—7.)



3. In an aircraft the combination of a body and sustaining wing elements extending from each side thereof, a plurality of air tight compartments in said body and wings, said compartments having a lighter-than-air constituent therein, means for varying the weight of the constituent in the compartments, propelling means for advancing said aircraft, helicopter propellers between the compartments in said body and means to drive all of said propellers.

1,667,003. SCREW-CAP CLOSURE. JAMES S. HARDIMAN, Long Island City, N. Y., assignor to Anchor Cap & Closure Corporation, Long Island City, N. Y. Filed Oct. 31, 1922. Serial No. 598,061. 15 Claims. (Cl. 215—43.)

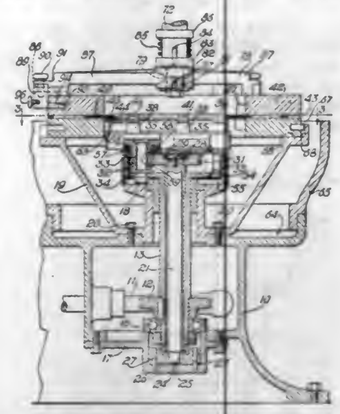


1. A closure cap having a cover portion, a skirt depending from said cover portion, the metal at the lower edge of said skirt being inturned and forming a hollow part adjacent the lower edge of said skirt, and a thread groove across said hollow portion to form a screw thread lug therein.

1,667,004. GUDGEON STRUCTURE FOR CHURNS AND BUTTER WORKERS. LEONARD F. HEITZ, Lake Mills, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 16, 1922. Serial No. 544,310. 3 Claims. (Cl. 308—36.)

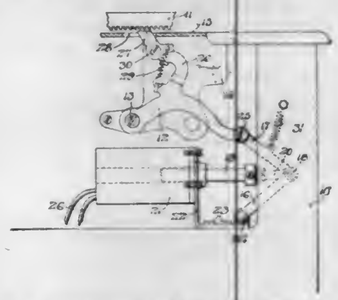
3. In apparatus of the class described, a gudgeon structure adapted to support a rotatable drum having rotatable roll shafts extending outwardly therefrom, comprising, in combination, a base portion adapted to be attached to said drum, a journal portion alined with the axis of said drum, and lateral extending portions having bearings therein for the outward support of said roll shafts.

1,667,005. ANGLE-COCK AND PIPE HOLDER. LOUIS A. HOERR, St. Louis, Mo., assignor to Railway Devices Company, a Corporation of Missouri. Filed Feb. 8, 1924. Serial No. 691,329. 2 Claims. (Cl. 248—31.)



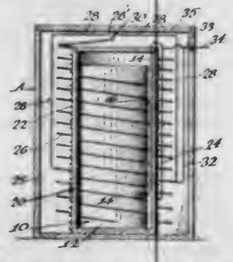
1. A supporting device for the elements of a railway car consisting of a train pipe, a train pipe nipple coupled to the pipe and an angle cock carried by the nipple, which comprises a one-piece bent plate adapted to be secured to the car at a point intermediate the ends of the plate, the rear end of said plate being bent downward to support the train pipe independently of the nipple, the forward end of said plate being positioned to prevent rotation of the angle cock, and means carried by said forward end of the plate and separable therefrom and adapted to support the forward end of the train pipe nipple.

1,667,006. LAPPING MACHINE. ROBERT HOFSTETTER, Berwyn, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 27, 1925. Serial No. 39,890. 7 Claims. (Cl. 51—161.)



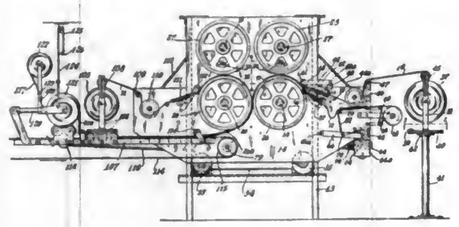
1. The combination of a lapping machine having upper and lower lapping plates mountable in operative position relative to each other, a work carrier mountable between said plates, means for providing a relative motion between

said plates and carrier whereby lapping movements between the work and plates are accomplished, of means for loading and mounting said carrier in operative posi-



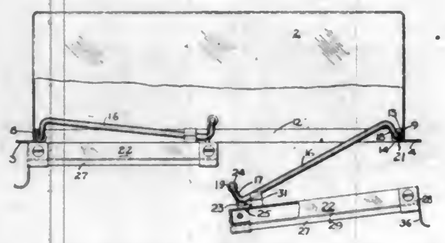
tion relative to said plates comprising a sectional ring like member adapted to be removed before the lapping operation.

1,667,007. BACKSPACING MECHANISM FOR TYPEWRITERS. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed July 29, 1925. Serial No. 46,747. 2 Claims. (Cl. 197—91.)



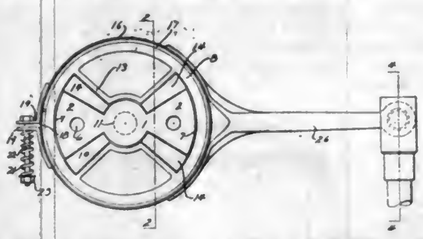
1. In a typewriter, a backspace lever, a solenoid, a plunger arranged to be operated by said solenoid and toggle mechanism for connecting said plunger with said lever.

1,667,008. UNDERGROUND ANTENNA. NICHOLAS KADEL, Glendale, Calif. Filed Dec. 27, 1926. Serial No. 157,061. 5 Claims. (Cl. 250—33.)



1. In an underground aerial for radio reception, a plurality of glass containers arranged one within another, the outermost being sealed, a bare wire coil arranged in each of said containers, and a lead connecting said coils in parallel and passing without said outermost container.

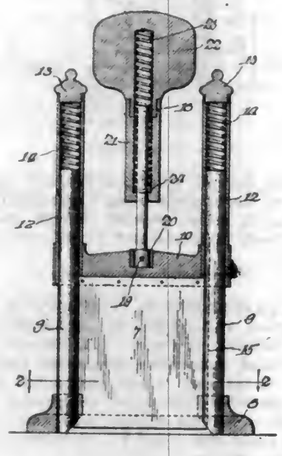
1,667,009. METHOD AND APPARATUS FOR MAKING LAMINATED STRIPS. GILBERT L. MATTHIAS, Cuyahoga Falls, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Feb. 16, 1924. Serial No. 693,398. 12 Claims. (Cl. 154—9.)



1. The method of making laminated imbricated units of adhesive sheet material which comprises progressively bringing separate series of sections of said material into face-to-face contact, and coordinating the super position of the sections of said series to bring the ends of the sections of any series in overlapping relation to the ends of a contiguous series.

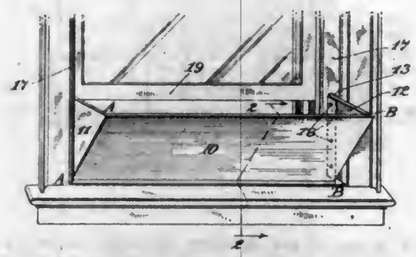
1,667,010. WALL-CABINET HINGE. DANIEL J. MURNANE, San Mateo, Calif., assignor, by direct and mesne assignments, to Murnane Universal Twin Mirror Company, San Francisco, Calif., a Corporation of California. Filed Nov. 30, 1925. Serial No. 72,154. 4 Claims. (Cl. 16—163.)

1. A hinge mounting for a cabinet door comprising a rod having arms at its ends extending from the rod in a common plane and in opposite directions, a pivot extending from each arm at right angles to said plane, a socket secured to the cabinet adjacent one side thereof for seating one of said pivots, and a second socket for seating the other of said pivots and secured to the door adjacent an edge remote from the first socket.



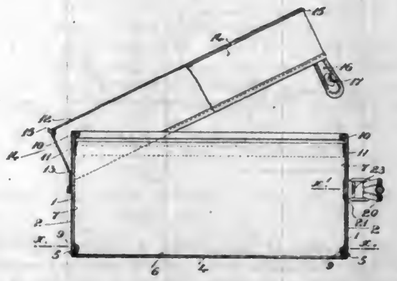
1,667,011. SHOCK ABSORBER. ELISHA LEONARD PEACOCK, San Francisco, Calif., assignor to George A. Peacock, San Francisco, Calif. Filed Feb. 23, 1926. Serial No. 90,017. 2 Claims. (Cl. 188—130.)

1. A shock absorber for vehicles comprising a hub fixedly attached to the frame of the vehicle, a plurality of radial arms integral with the hub, a drum mounted



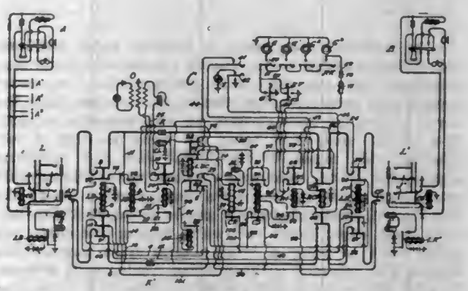
for rotary movement about the hub and arms, inwardly extending segments on the drum and spaced between the arms, cushioning means filling the space between the segments and the arms, and means connected to the axle and frictionally engaged with said drum.

1,667,012. PUNCHING AND CUTTING TOOL. ALBERT G. L. PIEPER, Chicago, Ill., assignor of one-half to Robert Hofeller, Chicago, Ill. Filed Dec. 21, 1923. Serial No. 682,081. 2 Claims. (Cl. 164—94.)



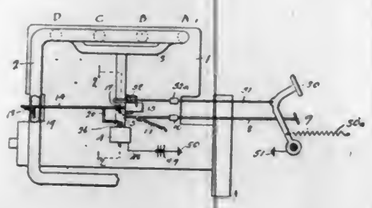
1. In a device of the character described, the combination of a base, a head movably mounted on the base, springs for retracting the head, a tool connected to the lower end of said head, a stem secured to the upper end of the head, a hammer slidably mounted on the stem for imparting a blow to said head to drive the tool, and a spring for retracting the hammer.

1,667,013. WIND DEFLECTOR. WILLIAM H. ROSE, Jersey City, N. J. Filed Apr. 13, 1927. Serial No. 183,590. 4 Claims. (Cl. 98—99.)



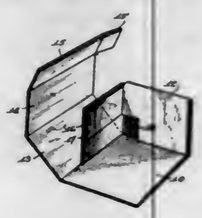
1. In a wind deflector made of corrugated cardboard, in combination, a front member, a triangular side member integral with each end of the front member having openings therein, a U shaped metallic strengthening member carried by the free side of each side member, the metallic member having oppositely positioned aligned openings so positioned that fastening means passed therethrough will affix the side members in abutment with a window frame, and a plurality of inwardly extended teeth carried by the inner edge of each metallic member inserted within the cardboard.

1,667,014. HAND BAG OR CASE. GEORGE CARRUTHERS ST. JOHN SNELL, Birmingham, England, assignor to J. B. Brooks and Company Limited, Birmingham, England, a British Company. Filed Aug. 7, 1926, Serial No. 127,764, and in Great Britain Mar. 31, 1926. 3 Claims. (Cl. 190—54.)



1. A hand travelling case comprising a body portion composed of a peripheral stiffening board set vertically on edge with the ends overlapping and joined together to form the required shape, separate top and bottom endless reinforcing frames corresponding in shape to the contour of the stiffening board and engaged with the inner face thereof, one adjacent the bottom and the other adjacent the top, an outer covering of flexible material the upper edge of which is turned over and secured to the inside face of the stiffening board so as to overlap the top reinforcing frame, and an inside lining covering the bottom reinforcing frame and secured to the inside face of the stiffening board.

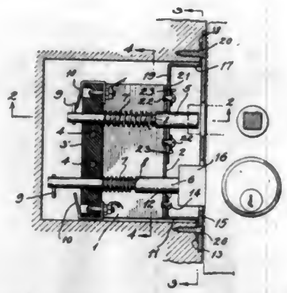
1,667,015. TELEPHONE SYSTEM. MICHAEL B. STAZAK, Chicago, Ill., assignor to Kellogg Switchboard & Supply Co., Chicago, Ill., a Corporation of Illinois. Filed June 18, 1926. Serial No. 116,804. 10 Claims. (Cl. 179—51.)



1. A telephone system having party lines each provided with a plurality of answering jacks and line signals terminating at a plurality of operators' positions, link circuits provided with connection terminals for interconnecting said lines, a calling subscriber and a called subscriber on one of said party lines connected in conversational circuit via one of said link circuits, and means in said link circuit including a disconnect relay energized upon the connection of one of said terminals to the party line and a supervisory relay controlled over said subscribers' telephone line for deenergizing said disconnect relay thereby disconnecting said link circuit from the jack of said party line.

1,667,016. METHOD AND MEANS FOR BRAKING VEHICLES. CHARLES L. STOKES, Los Angeles, Calif., assignor of one-half to George L. Erts, Los Angeles, Calif. Filed Apr. 23, 1925, Serial No. 25,345. Renewed Aug. 22, 1927. 10 Claims. (Cl. 192—3.)

1. The method of decelerating a vehicle impelled by an internal combustion engine, which comprises supplying a gaseous fluid to an engine rotated by the inertia of a vehicle, creating a back pressure in the engine by throttling the discharge of the gaseous fluid therefrom and governing said back pressure by the engine induction vacuum.

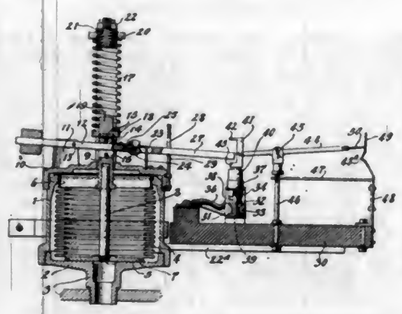


1,667,017. DOUBLE CORNER AND LOCK FOR CONTAINERS. EDWARD O. TINSLEY, New York, N. Y., assignor to Robert Gair Company, New York, N. Y., a Corporation of New York. Filed Nov. 20, 1924. Serial No. 751,014. 6 Claims. (Cl. 229—34.)

1. A container comprising, a bottom; outer side and end walls connected to the bottom; inner side walls connected to the outer side walls and provided with inner closure tabs each connected thereto by a corner fold; the lower portion of each closure tab and the adjacent portion of the inner wall being cut away to form a rectangular side recess in the inner wall and extending under said corner fold and an end space joining said recess and extending under the inner closure tab to the end thereof, each side recess having a substantially vertical inner edge; inner end walls joining the outer end walls, each carrying a locking strip lying against the bottom and provided with upturned locking ends disposed in said side recesses and projecting into said end spaces.

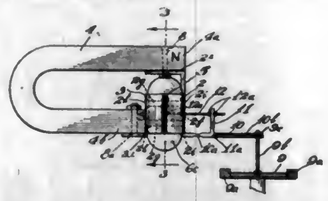
1,667,018. BURGLAR-ALARM MOUNTING. PAUL VICTOR VANDEVELDE, Corona, N. Y. Filed Apr. 13, 1926. Serial No. 101,654. 1 Claim. (Cl. 200—55.)

A circuit closer for burglar alarm system, adapted to be arranged behind the striking plate of a door latch, and including a support, and plungers movable in the support and spring urged toward the openings of the striking plate, and arranged to open a circuit when moved against the resistance of the springs by the bolts of the door, and means to enable the support to be connected to the door frame by the connecting means of the striking plate, including brackets for the ends of the support, each bracket consisting of laterally offset connected portions, one adapted to lie beneath the striking plate and having an opening for the securing means of the striking plate, and the other adapted to lap on the adjacent face of the support and to be secured thereto,



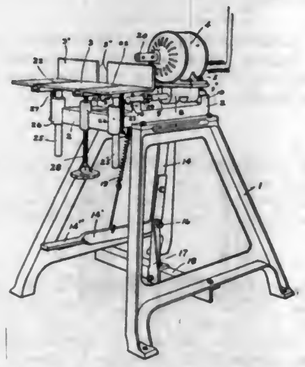
securing means for said other portions, the lapping portion of one of the brackets being longitudinally slotted, and the securing means passing through the slots to enable adjustment of the bracket for different lengths of striking plates.

1,667,019. PLASTER-BLOCK COMPOSITION. FREDERICK M. VENZIE, Philadelphia, Pa. Filed May 18, 1923. Serial No. 639,973. 1 Claim. (Cl. 106—84.)



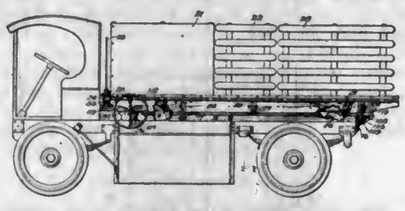
A plaster block composition comprising approximately from a half to one part of saw dust mixed with about one part of plaster-of-Paris, there being added about one part of water to wet the mixture, said water containing about 5% of liquid glue, about 5% of dextrine, and about 10% of silicate of soda.

1,667,020. PRESSURE-RESPONSIVE DEVICE. OTTO G. WENDEL, Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill., a Corporation of New Jersey. Filed Sept. 21, 1921. Serial No. 502,237. 13 Claims. (Cl. 200—81.)



1. A device of the character described comprising a support, a plunger adapted to be reciprocated relative to said support, a rocker arm pivoted to said support at one side of said plunger and extending transversely of said plunger between opposing portions of the same to permit of said plunger positively moving said arm back and forth; said opposing portions being spaced to permit of a limited independent movement of said arm between said opposing portions, and a snap action device interposed between said arm and said support for imparting a snap movement to said arm in one direction or the other depending on the direction of movement of said plunger, substantially as specified.

1,667,021. TRANSLATOR OF ELECTRICAL ENERGY. HENRY M. WILLIAMSON, Chicago, Ill., assignor to Johnson-Williamson Laboratories, Incorporated, Chicago, Ill. Filed Dec. 8, 1923. Serial No. 679,426. 17 Claims. (Cl. 175—337.)

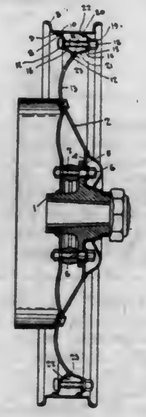


1. An electrical device including a magnet and pole-pieces for said magnet, an armature having a plurality of bearings intermediate its ends and means for changing relative polarities of said pole-pieces and said armature.

1,667,022. DRILLING MACHINE. HUGH C. WOOD, San Francisco, Calif. Filed Mar. 24, 1925. Serial No. 17,934. 3 Claims. (Cl. 144—92.)

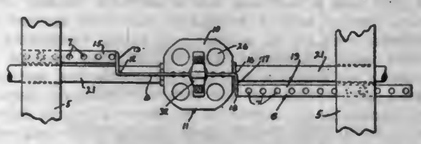
1. In a drilling machine of the character described, a floor stand, a pair of horizontally arranged bars thereon supported by and above the upper end of the stand, and a drilling carriage block slidably mounted on said bars, said bars being seated and secured in vertically open horizontal grooves formed on top of the stand and the bars being removable vertically from the open sides of the grooves.

1,667,023. REMOVABLE-BODY TRUCK. WILLIAM M. BAXTER, Chicago, Ill., assignor to Ideal Removable Body Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 14, 1922. Serial No. 581,565. 28 Claims. (Cl. 214—38.)



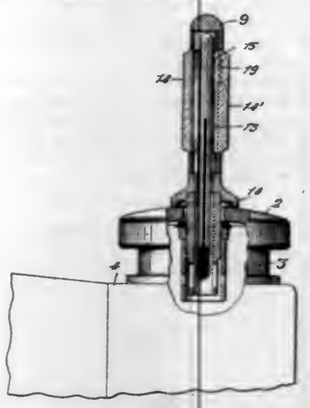
1. In a removable body truck, the combination of a chassis frame provided with a track, a removable body, and laterally yieldable supporting rollers mounted upon said body in position to engage said track.

15. In a removable body truck, the combination of a chassis frame, a removable body provided with a rack, a pinion adjustably mounted on said chassis frame in position to engage and actuate said rack, means including a worm drive for rotating said pinion, and means for vertically adjusting said pinion, said means including a bell crank lever, a spring carried thereby in position to exert an upward thrust upon the pinion, worm driven means for rocking said bell crank lever, and a lifting arm fixed to said bell crank lever to raise said pinion beyond the point to which it has been raised by the maximum thrust of said spring.



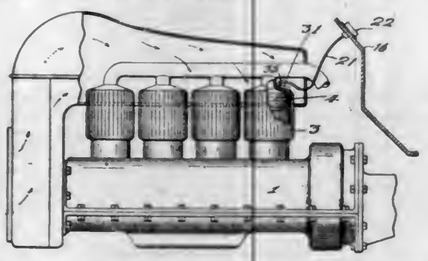
28. In a removable body truck, a chassis frame, a pinion carried by said frame, a body removably disposed upon said chassis, a rack carried by said body, means including a resilient element cooperative with said rack for resiliently elevating said body, and means to positively position said elevating means.

1,667,024. VEHICLE WHEEL. WILLIAM N. BOOTH, Detroit, Mich. Filed Aug. 21, 1922. Serial No. 583,340. 4 Claims. (Cl. 301—28.)



4. In a vehicle wheel, a wheel body having a flared seat and a radially inwardly spaced beaded portion, in combination with a demountable rim engageable with said flared seat and a sheet metal channel shaped clamping ring having an outer flange engageable with said demountable rim and an inner flange transversely sheared to terminate in peripherally separated diverging foot flanges engageable with said beaded portion to position said ring concentrically upon said wheel body.

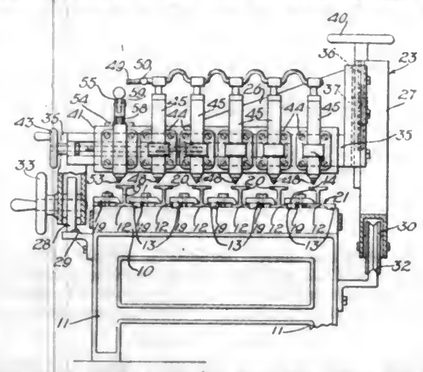
1,667,025. OUTLET-BOX HANGER. CLAUDE E. BOWERS, Los Angeles, Calif. Filed Oct. 21, 1925. Serial No. 63,874. 1 Claim. (Cl. 247—22.)



A hanger bar for terminal boxes comprising a strap metal bar having a terminal box supporting portion intermediate its ends, said bar being bent downwardly at the ends of the supporting portion and to one side of the space that may be occupied by a conduit, the end of each bend being again bent to form attaching portions extending parallel to the supporting portion, the surfaces of said attaching portions being disposed at substantially right angles to the surface of the box supporting portion, whereby the attaching portions will be disposed out of alinement with the box supporting portion of the bar.

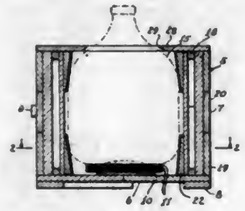
1,667,026. INDICATING INSTRUMENT FOR AUTOMOBILE RADIATOR CAPS AND THE LIKE. HARRISON H. BOYCE, Jericho, N. Y. Original application filed Oct. 31, 1917, Serial No. 199,413. Divided and this application filed Jan. 19, 1922. Serial No. 530,274. 7 Claims. (Cl. 73—52.)

1. In an instrument of the character described, a frame, an indicating dial mounted therein having a window, indicating means arranged for movement across said dial and window, and a crystal having a prismatic portion registering with said window and mounted in said frame on that side of said dial and indicating means which is away from the side from which said indicating means is intended to be observed.



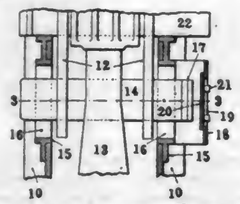
1,667,027. TEMPERATURE-INDICATING APPARATUS FOR VEHICLE-PROPELLING MOTORS. HARRISON H. BOYCE, Jericho, N. Y. Filed July 29, 1925. Serial No. 46,731. 2 Claims. (Cl. 73—52.)

1. In temperature indicating means for air-cooled internal combustion motors or motor vehicles, the combination of a flattened fluid filled bulb, means for securing said bulb with a flattened side in intimate thermal conductive contact with a portion of the outer surface of a cylinder wall of the motor, said means comprising a metallic casing extending over the bulb and secured to the motor wall, and a layer of non-conducting material between said casing and the bulb, an indicating instrument located in a position to be observed by the driver when operating the vehicle, and a means connecting said instrument for operating from bulb.



1,667,028. MATERIAL-WORKING APPARATUS. STANLEY EDWARD BOYNTON, Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 26, 1925. Serial No. 4,976. 4 Claims. (Cl. 164—86.)

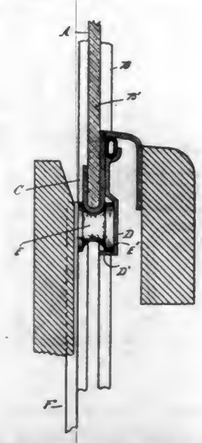
1. In a material working apparatus, means for supporting a plurality of blanks upon definite centers, a plurality of work tools adjacent thereto and upon centers corresponding to the blanks, means for moving said tools longitudinally and laterally of the blanks, means associated with said tools and blanks and designed for movement independent of said tools for indicating when said



tools are at a predetermined point with respect to said blanks, and means for causing said tools to perform work upon said blanks.

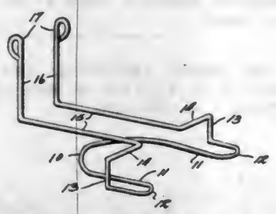
1,667,029. CARBOY-SHIPPING CONTAINER. OSCAR Z. BREWER, Spokane, Wash., assignor of one-half to Herbert H. McNeill, New York, N. Y. Filed Mar. 9, 1926. Serial No. 93,461. 10 Claims. (Cl. 217—54.)

1. In a carrier for carboys, in combination, a rectangular box, corner posts triangular in cross-section disposed in the corner angles of said box and extending from the top to the bottom of the box, spring members secured at their ends to the flat inward faces of the corner posts and extending longitudinally thereof for the length of the corner posts and spaced away from said faces for the portions of their lengths between said ends and having guideways on their inward faces, and a pair of triangular wedges for each spring member engaging the guideway of the spring member and spaced away from each other in apex to apex relation, one of said wedges being at the top of the spring member and the other being at the bottom of the spring member.



1,667,030. DRAFT GEAR. STERLING H. CAMPBELL, St. Louis, Mo., assignor to Western Railway Equipment Company, St. Louis, Mo., a Corporation of Missouri. Filed Sept. 26, 1925. Serial No. 58,692. 5 Claims. (Cl. 213—61.)

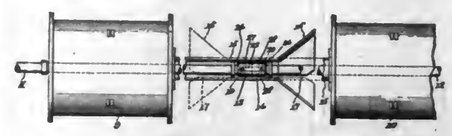
1. In a device of the class described, the combination with a pair of draft sills, of a draft key passing through said sills, a stop plate arranged in the path of said key,



said plate being provided with an opening for the insertion and removal of the key, and a closure piece for said opening.

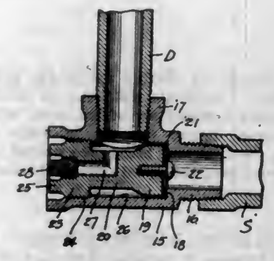
1,667,031. ROLLER FOR WINDOW-CONTROL MECHANISM. WELLS W. CARROLL and STANLEY W. NICHOLSON, Toledo, Ohio, assignors to The Dura Company, Toledo, Ohio, a Corporation of Delaware. Filed July 20, 1921, Serial No. 486,279. Renewed July 6, 1925. 4 Claims. (Cl. 268—126.)

1. The combination with a sliding window member and a control arm for actuating said window member, of a shock absorbing element carried by said arm and engaged with said window member to operate the latter from the former.



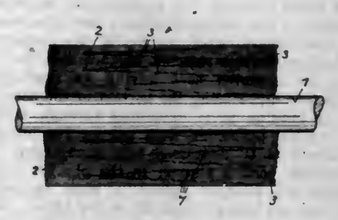
1,667,032. MILK-BOTTLE SUPPORT. CHESTER FRANKLIN and CHRISTINE FRANKLIN, Willard, Ohio. Filed Aug. 17, 1926. Serial No. 129,850. 1 Claim. (Cl. 248—65.)

A milk bottle holder comprising a U-shaped neck embracing portion contracted at its throat, and made of wire, the holder extending laterally from the ends of the U-shaped portion in opposite directions, then extending rearward, then extending upward at right angles to the U-shaped portion and then extending inward beyond the legs of the U-shaped portion, then extending longitudinally rearward beyond the bight end of the U-shaped portion, then extending upwardly and formed with attachment eyes, the inwardly extending portions being disposed in a plane above the U-shaped portion to thus provide means engageable over the top of a milk bottle to prevent upward movement of the milk bottle.



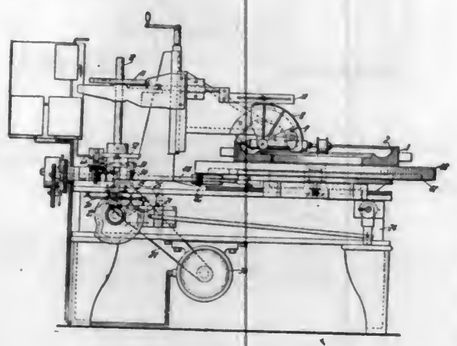
1,667,033. AUTOMATIC TRAIN-PIPE COUPLING. ARTHUR C. HARRELL, Pensacola, Fla. Filed July 6, 1926. Serial No. 120,815. 2 Claims. (Cl. 285—58.)

1. In combination with opposed train line sections having rotary heads, a radial pin on each head, a claw carried by each coupling head and extending beyond the coupling head for engaging the pin on the opposite head, and knuckles on the coupling heads at substantially 90° from said claw, said knuckles having opposed noses with



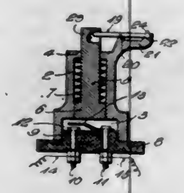
depressions at the bases of the noses for receiving the opposed noses whereby coupling heads may be drawn together and locked against accidental rotation.

1,667,034. SEALING VALVE FOR GAS LINES. HUGH B. HATTON, Jr., Glendale, Calif. Filed Feb. 9, 1927. Serial No. 1,166,981. 5 Claims. (Cl. 251—43.)



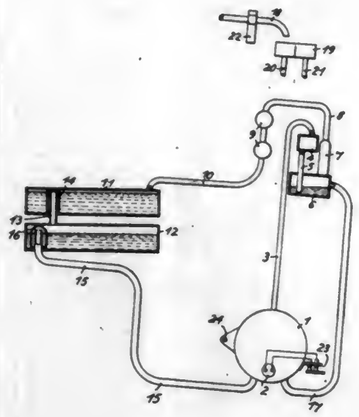
2. A sealing valve for gas lines comprising a T-shaped pipe body including an elongated tubular body, a connecting nipple at one end of the body, and a second connecting nipple between the ends of the body, a valve seat within the valve body adjacent its point of connection with the first nipple, a valve body insertable into the pipe body and including a valve head, and an adjusting head threaded in the pipe body to permit adjustment of the valve head to engage or disengage said seat, a duct in the valve body extending through the adjusting head, and a plug for the duct.

1,667,035. INSULATING TUBE. PETER ADOLF HÜNERMANN, Berlin-Weissensee, Germany, assignor to the Firm Jaroslaw's Erste Glimmerwarenfabrik in Berlin, Berlin-Weissensee, Germany. Filed Sept. 28, 1926, Serial No. 138,245, and in Germany May 14, 1925. 6 Claims. (Cl. 154—2.6.)



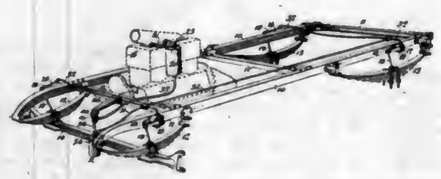
1. Insulating tube consisting of a spirally wound sheet of insulating material and comprising two adjoining sections, each consisting of closely adjoining layers of insulating material, the engaging ends of said sections having the form of concentric rings of conical section.

1,667,036. MOLD-ENGRAVING MACHINE. AUGUSTUS P. JAHANT, Akron, Ohio, assignor to The Akron Standard Mold Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 3, 1927. Serial No. 172,249. 9 Claims. (Cl. 90—13.4.)



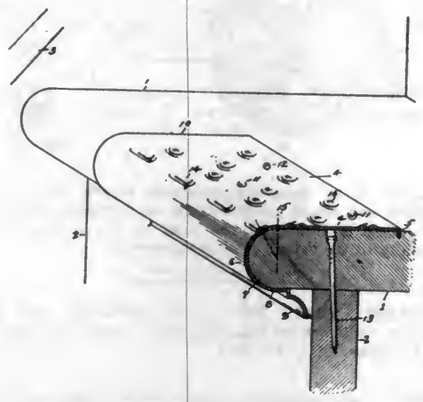
1. In a machine for cutting tire molds with repeated units of design, a rotatable mold and an oscillatory cutter head movable transversely of the mold, and means to rotate the mold during periodic intervals of cutting and spacing, said means being accelerated during the spacing interval over the speed during the cutting intervals.

1,667,037. ELECTRIC CIRCUIT CLOSER. EDUARD M. KYLE and EDWARD F. HURLEY, Lakeport, N. H. Filed Dec. 1, 1924. Serial No. 753,254. 1 Claim. (Cl. 200—142.)



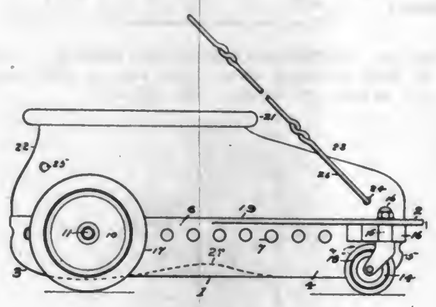
In a circuit-closer, a casing having a plunger chamber, a wall at the top of the plunger chamber having a plunger guide opening, an open-bottom enlargement at the bottom of the casing forming a base chamber, a horizontal arm integral with the top of the casing and provided with a forked fulcrum surface and an abutment surface, an insulated base having an upstanding boss threaded into and closing the bottom of the base chamber, a pair of binding posts extending through said boss, a contact spring connected with one of the binding posts and adapted to be depressed into engagement with the other binding post, a plunger in the plunger chamber for depressing the contact spring, a stem carried by the plunger and extending outwardly at its upper end through the guide opening in the top wall of the casing, said upper end of the plunger having a recess, a spring in the casing for depressing the plunger, and a rocker arm fulcrumed upon the forked fulcrum of the horizontal arm and having its inner end engaging the recess in the plunger stem and its outer end adapted to rest upon the abutment and to be secured thereto by fusible material.

1,667,038. REFRIGERATING SYSTEM. ERICH KINDERMANN, Berlin-Reinickendorf, Germany, assignor to A. Borsig G. m. b. H., Berlin-Tegel, Germany. Filed Mar. 10, 1926, Serial No. 93,685, and in Germany Mar. 10, 1925. 4 Claims. (Cl. 62—5.)



1. Absorption refrigerating machine comprising a generator absorber vessel, an evaporating vessel, and a condenser connected both with said generator absorber vessel and with said evaporating vessel a pipe connecting the said vessels, the whole system being arranged to be tipped automatically about a point below its centre of gravity, in consequence of the passage of liquid from one to the other vessel in the course of operation of the machine and means for causing liquid, which remained over in said evaporating vessel from an evaporating operation, to flow through said pipe into said generator absorber vessel when the system is tipped at the end of the generating period.

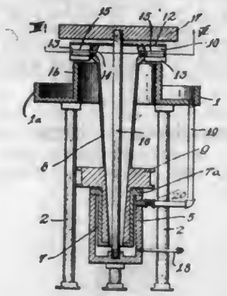
1,667,039. SHOCK ABSORBER. EDWARD J. KOLODZIEJ, Buffalo, N. Y. Filed Feb. 26, 1927. Serial No. 171,296. 3 Claims. (Cl. 267—65.)



1. A plurality of hydraulic shock absorbers mounted on different parts of a vehicle, a liquid reservoir, and a pump which is actuated by relatively movable parts of the vehicle and whereby liquid is delivered from said reservoir to the several shock absorbers, said pump comprising a cylinder adapted to be mounted on one part of the vehicle, a piston arranged in the cylinder, a rod connected with said piston, a spring for moving the piston in one direction, and a tappet on another part of the vehicle and adapted to engage said rod and move the piston in the opposite direction.

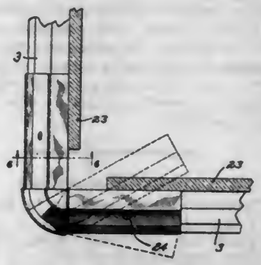
1,667,040. STEP PROTECTOR. DENNIS F. LARKIN, San Francisco, Calif., assignor to The Larkin Specialty Manufacturing Co., San Francisco, Calif., a Corporation of California. Filed Apr. 23, 1925. Serial No. 25,384. 3 Claims. (Cl. 20—79.)

1. A step protector comprising a strip of sheet metal having an edge flanged perpendicularly to and adapted to be countersunk into the step and a bent edge adapted to enclose the step nosing.



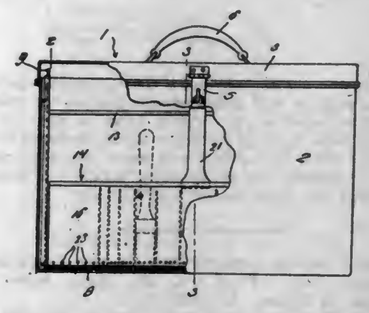
1,667,041. PERAMBULATOR. DENNIS F. LARKIN, San Francisco, Calif. Filed May 5, 1925. Serial No. 28,092. 3 Claims. (Cl. 280—47.)

1. A baby tender comprising an elongated enclosed body with a substantially circular top opening of less diameter than the internal width of said body; rear wheels mounted above the bottom of said body within reach of the occupant of the said body; and a rolling support for the front of said body.



1,667,042. OIL-BURNING APPARATUS. JAMES W. LOGAN, Chicago, Ill., assignor to The Vulcan Oil Burner Corporation, New York, N. Y., a Corporation of Nevada. Filed June 24, 1926. Serial No. 118,138. 5 Claims. (Cl. 158—77.)

1. In a liquid fuel burner, the combination with a combustion chamber, of a centrifugal member including a relatively long conical bore of sufficient divergence to effect fuel elevation at comparatively low speeds, a guide rod



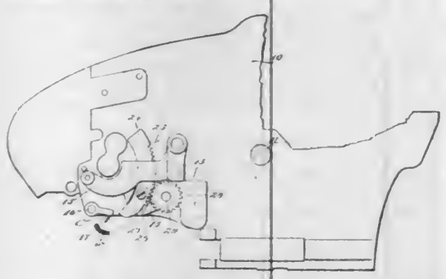
extending through said bore and about which said member is rotatable and fuel projecting means associated with the discharge end of said conical bore.

1,667,043. CORNER CAP FOR SASH STRUCTURES. FRED H. MEYER, Oakland, Calif., assignor to Non-Pressure Glazing Company, San Francisco, Calif., a Corporation of California. Filed Sept. 16, 1925. Serial No. 56,564. 5 Claims. (Cl. 20—56.4.)

1. A corner cap for sash structures comprising sheath members complementary to and overlying the ends of the adjacent sashes, one of said members terminating in a curved socket and the other member terminating in a curved end complementary to said socket and adapted to lie therein with the members at different angular relations.

1,667,044. BRUSH KIT. CHARLES A. ODDO, Buffalo, N. Y. Filed Apr. 15, 1927. Serial No. 184,095. 5 Claims. (Cl. 206—16.)

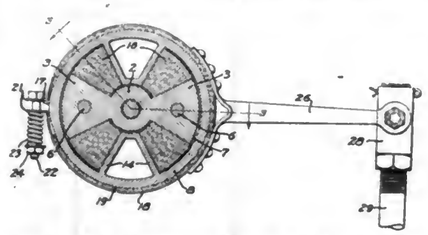
1. In a kit for brushes, an open top receptacle, a cover therefor, a brush carrying unit vertically slidable in the



receptacle, a handle associated with the unit for lifting the same upwardly to permit the ready removal of a brush when the cover for the receptacle is opened, said unit comprising a casing including complementary sections hingedly connected together at their lower edges, said sections being automatically separated when the unit is raised upwardly a predetermined distance in the receptacle.

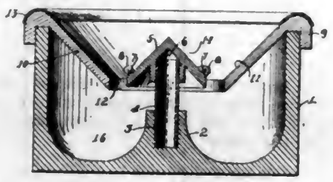
1,667,045. SHAVING-SOAP CAKE AND HOLDER THEREFOR. BLANCHARD OGDEN, San Diego, Calif. Filed Oct. 2, 1923. Serial No. 666,052. 2 Claims. (Cl. 45—28.)

2. A crescent shaped shaving soap holder comprising two mutually adjustable telescoping members having a bolt extending therethrough for clamping the same to the edge of a cake of soap, said members having flanges thereon for penetrating the sides and edge of the soap cake, a downwardly extending handle secured to one of said members, said members provided with confronting grooves adapted to receive ridges on the soap cake, for the purposes specified.



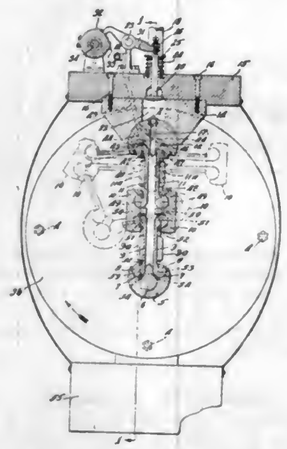
1,667,046. WELT-SEWING MACHINE. JOHN ROGER OLIVER, Medfield, Mass., assignor to Reece Shoe Machinery Company, Boston, Mass., a Corporation of Maine. Filed Oct. 26, 1925. Serial No. 65,014. 13 Claims. (Cl. 112—46.)

1. In a welt sewing machine, a shaft, a needle operated from the shaft, a welt guide member guiding the welt to the shoe or other work, a cutter fitted to move to the welt and sever it, a spring under strain arranged to actuate the cutter to advance and sever the welt, power means for putting the spring under strain, and a latch for holding the parts in set position.



1,667,047. SHOCK ABSORBER. GEORGE A. PEACOCK, Oakland, Calif. Filed Oct. 27, 1926. Serial No. 144,417. 4 Claims. (Cl. 267—9.)

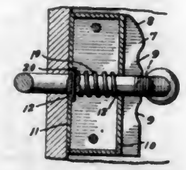
1. A shock absorber for vehicles comprising a hub having arms thereon, a drum mounted for rotary movement about said hub and having arms spaced between the arms of the hub, cushions filling the space between the arms to resiliently resist relative rotary movement between the hub and drum, a band frictionally engaging the drum and



adapted to be mediately connected to the axle of the vehicle, and means for increasing the frictional resistance to rotary movement of the band on the drum proportionally to the extent of such movement.

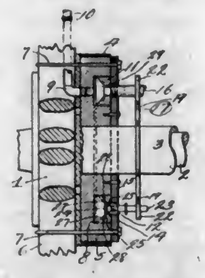
1,667,048. TRAP. WILLIAM E. RAWLINGS, near San Jose, Calif. Filed Jan. 26, 1927. Serial No. 163,752. 4 Claims. (Cl. 43—64.)

1. A device of the character indicated, comprising a receptacle, an upstanding yieldable element mounted upon the bottom thereof, and a chute extending downwardly into the receptacle to a point adjacent the said yieldable element.



1,667,049. INTERNAL-COMBUSTION ENGINE. JAMES S. REID, Cleveland, Ohio. Filed June 1, 1925. Serial No. 34,098. 12 Claims. (Cl. 123—1.)

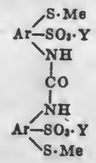
3. An internal combustion engine, comprising a relatively fixed member, a movable member, means forming an expansible gas chamber arranged between and having



operative connection with said fixed and movable members, said means comprising a plurality of collapsible walls extending between said fixed and movable members, and a sectional fly-wheel upon which the said movable member is mounted, the sections of said fly-wheel supplementing the said collapsible walls as an enclosure for the gas chamber, and means for exploding gases in said chamber so as to cause expansion of the same for operation of said movable member.

1,667,050. SIGNALING DEVICE FOR AUTOMOBILES. ARTHUR F. REMTER, Artois, Calif. Filed May 20, 1927. Serial No. 192,982. 2 Claims. (Cl. 116—52.)

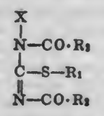
1. In a signal device of the class described, a casing having one of its walls provided with a portion projecting beyond an adjacent wall and formed with a series of notches, a member comprising a portion mounted for rotation in the second mentioned wall of the casing and the wall opposite thereto, and an operating arm and a signal arm extending in opposite directions from the opposite ends of the said portion of the member, the operating arm being angularly adjustable to effect adjustment of the signal arm and being engageable selectively in the notches in the projecting wall portion to be held in its positions of adjustment.



1,667,051. AUTOMOBILE TIRE AIR PUMP. WILLIAM H. RICE, East St. Louis, Ill. Filed Dec. 2, 1924. Serial No. 753,480. 1 Claim. (Cl. 152—11.)

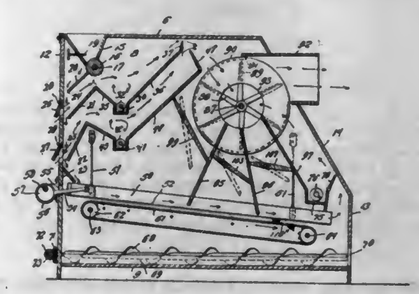
The combination with a rotatable wheel, an air pipe carried by said wheel, a stationary air supply pipe, of means for supplying air from the supply pipe to the wheel carried air pipe during the rotation of the wheel, said means comprising a plate secured to the wheel and rotatable therewith and provided with an annular air chamber, a ring slidably mounted in said air chamber and having an annular channel in the inner side thereof, said air supply pipe discharging into the air chamber through the ring and connected to the ring, an air supply pipe carried by said ring, a yoke clamped to a stationary support, said yoke being provided with bifurcations, a pin carried by said slidable ring, said pin and air supply pipe carried by the ring extending through the bifurcations of the yoke.

1,667,052. PHARMACEUTICAL PRODUCT. WALTER SCHOELLER, ADOLF FELDT, MAX GEHRKE, and ERICH BORGWARDT, Berlin, Germany, assignors to Firm: Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Original application filed May 9, 1925, Serial No. 29,207, and in Germany June 2, 1924. Divided and this application filed June 1, 1926. Serial No. 113,078. 4 Claims. (Cl. 260—11.)



1. As a new product, the derivative of an amino metal benzene compound corresponding to the formula

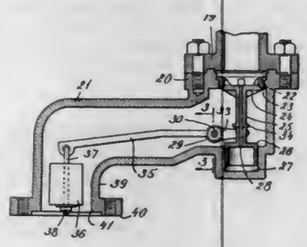
wherein Ar is a benzene nucleus, Me is a heavy metal, Y is hydrogen or a metal, more especially an alkali metal, such product as an acid dissolving only with difficulty, as an alkali salt readily in water and having a therapeutical effect more especially in cases caused by spirochaetae.



1,667,053. DIACYL ISOTHIOCARBAMIDE ETHER AND METHOD OF PRODUCING SAME. HERBERT SCHOTTE, Berlin-Wilmersdorf, Germany, assignor to the Firm Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Filed July 12, 1926, Serial No. 122,043, and in Germany July 16, 1925. 8 Claims. (Cl. 260—125.)

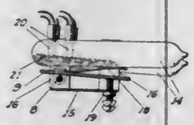
5. As a new product, the diacyl isothiocarbamide ethers having the formula

wherein X is a hydrogen atom or a univalent radical, while R_1 and R_2 may be any univalent radicals either of the same or of a different kind, these ethers being neutral bodies dissolving only with difficulty in water being soluble in most organic solvents and colorless provided that no chromophoric groups are present in the molecule.



1,667,054. COMBINED PURIFIER AND ASPIRATOR FOR MIDDLINGS. GEORGE W. T. SEIFERT, Cairo, Ill. Filed June 2, 1927. Serial No. 196,004. 1 Claim. (Cl. 209—21.)

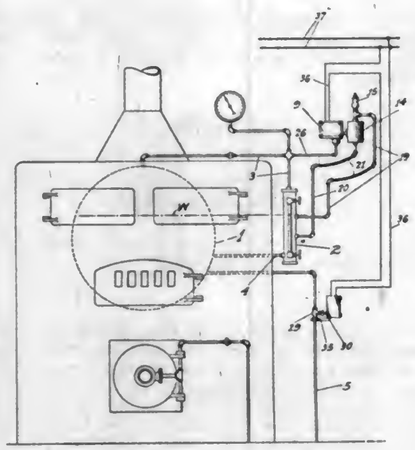
In a middlings purifier, a casing comprising a top wall, end walls, side walls, and a bottom longitudinal trough, a sieve longitudinally arranged in the casing immedi-



ately above the trough, a feed hopper in the top of the casing adjacent one end wall for the purpose of gravitating material to the sieve, said one end wall being provided with a pair of openings one above the other, means for forming air currentways leading from the openings longitudinally along the top of the casing, conveyor means transversely across said ways, a blower for creating air current in said ways, partitions in the casing rising upwardly from the sieve adjacent the other end of the casing to provide upright airways, the current in said upright airways being created by said current creating means.

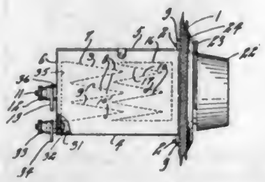
1,667,055. PRESSURE STILL. ALFRED JAMES SLOAN, Kansas City, Kans., assignor to Sinclair Refining Company, Chicago, Ill., a Corporation of Maine. Original application filed Sept. 15, 1923, Serial No. 662,797. Divided and this application filed May 18, 1926. Serial No. 109,880. 2 Claims. (Cl. 137—53.)

1. An automatic relief valve comprising casing having inlet and outlet openings, a valve seat in the casing adjacent the inlet opening, a valve head fitting the seat to close the inlet opening, a hollow stem attached to the head, a piston on the stem movable in a chamber communicating with the inlet through the stem and operable by the pressure on the inlet side of the head to force the latter toward the seat, and a weighted arm pivoted within the casing and having one end engaging the stem to force the head toward the seat.



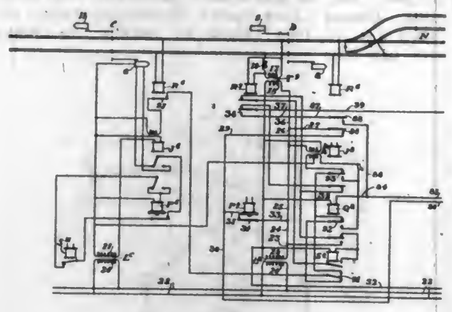
1,667,056. MERCURY-CONTACT SWITCH. IRA E. SMITH, Stockton, Calif. Filed May 4, 1927. Serial No. 188,826. 4 Claims. (Cl. 200—152.)

1. In a switch, a contact-tube supporting structure including a pivoted member, means for tilting the member, a contact-tube to extend longitudinally thereof, supporting means for the tube mounted in connection with the member, and means between said member and supporting means for enabling the angular setting of the tube relative to the member to be altered at will.



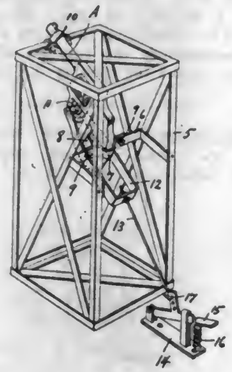
1,667,057. WATER-FEED-CONTROL-SYSTEM FOR BOILERS. IRA E. SMITH, Stockton, Calif. Filed June 20, 1927. Serial No. 199,990. 5 Claims. (Cl. 122—451.)

1. A water-feed control system for a steam boiler including a normally open electric switch, a water feed device controlled by the closing of said switch, a rockable lever, means between the lever and switch for causing the latter to be opened when the lever is tilted in one direction and vice vessa, means acting on said lever tending to tilt it in a switch closing direction, steam released stop means normally preventing the lever from thus being tilted, a vessel supported by the outer end of the lever and tending to tilt the lever in a switch



opening direction; the weight of said vessel when empty being insufficient to overcome said first named tilting means but causing said first named means to be overcome when the vessel is full of water, means causing said vessel to be filled with water when the water in the boiler is at a predetermined level, and means causing the vessel to be emptied of such water when the water in the boiler drops below such level.

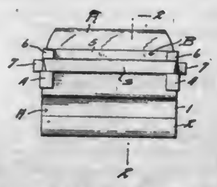
1,667,058. CONDENSER. SAMUEL HAROLD SMITH, Rocky River, Ohio. Filed Jan. 16, 1925. Serial No. 2,785. 2 Claims. (Cl. 175—41.5.)



1. An electric condenser comprising opposing series of interfitting wedge faces, insulation guide means protruding from one series and through the other series, rotatable adjusting means for propelling one series on said guide means toward the other, a housing for the members, castor oil in said housing extending between said faces, a terminal for one series of faces connected through the adjusting means and mounted on said housing, a terminal for the other series directly mounted on said other member, and a packing for the adjusting means as passing into the housing.

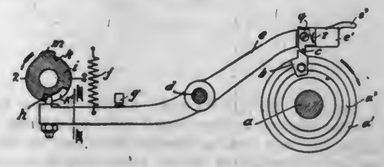
1,667,059. RAILWAY SIGNALING. LESTER E. SPRAY, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Oct. 29, 1926. Serial No. 144,935. 6 Claims. (Cl. 246—33.)

4. In combination, a stretch of railway track comprising a first, a second, and a third section, a stick relay, a signal for the third section controlled by said stick relay, and means for energizing the stick relay when a train moves from the second section into the first section.



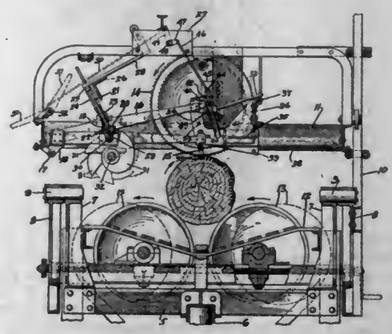
1,667,060. FIREARM-HOLDING AND TRIGGER-ACTUATING DEVICE. ALPHA PRENTIST STARK, Pampa, Tex. Filed Dec. 27, 1926. Serial No. 157,190. 8 Claims. (Cl. 89—1.)

1. In a device of the class described, a frame, a substantially U-shaped bracket secured on the frame, the crown portion of the bracket being shaped to receive the butt of a revolver, a complementary clamp for rigidly securing the butt on said bracket, an additional clamp for securing the barrel on the front of the frame, and remotely operable means for actuating the trigger of the revolver.



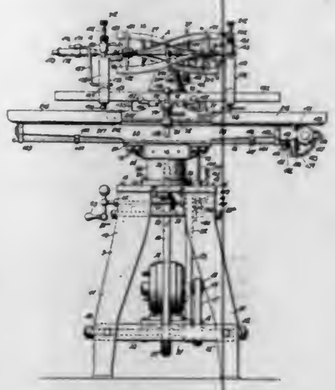
1,667,061. BLADE HOLDER. CLARENCE E. STRICKLAND, Atlantic City, N. J. Filed Apr. 5, 1927. Serial No. 181,080. 4 Claims. (Cl. 30—25.)

2. A holder for a razor blade comprising two members, one of said members constituting two overlying plates, the rear marginal portions of said plates being resiliently connected, the forward marginal portions of said plates being spaced apart, arms connecting the outer portions of said plates for positively maintaining such portions of the plates separated, a blade carrying member insertable between the plates of the first member, said blade carrying member having outstanding lugs coacting



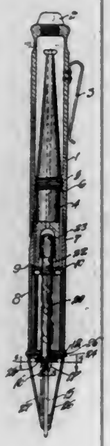
with the first named member for limiting the extent of insertion of the blade carrying member inwardly of the first named member.

1,667,062. AUTOMATIC CONTROL MECHANISM. KARL TESSKY, Esslingen-on-the-Neckar, Germany. Filed Feb. 4, 1926, Serial No. 85,057, and in Germany Feb. 21, 1925. 2 Claims. (Cl. 29—64.)



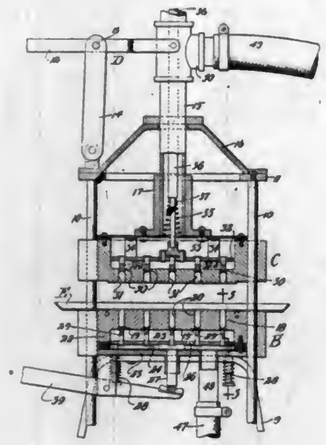
1. An automatic control mechanism comprising a driving shaft, a clutch on said driving shaft, a control shaft, a tappet on said control shaft, means adapted to be actuated by said tappet to operate said clutch, an adjustable pawl pivotally carried on said clutch-operating means, a projection on said pawl adapted to cooperate with said tappet, two contact faces on said pawl extending at an angle to each other, and a spring plunger slidably carried on said clutch-operating means and adapted to alternately engage said contact faces.

1,667,063. POLE-PUNCTURING MACHINE. ROBERT D. VALENTINE, Minneapolis, Minn., assignor, by mesne assignments, to National Pole & Treating Company, Minneapolis, Minn., a Corporation of Delaware. Original application filed June 4, 1923, Serial No. 643,256. Divided and this application filed June 3, 1926. Serial No. 113,483. 14 Claims. (Cl. 144—2.)



1. In a pole puncturing machine, means for supporting the end of the pole to be punctured, a puncture tool above the pole having means for engaging and rotating the pole on its support, and means for puncturing the surface of the pole during such rotation.

1,667,064. GRINDING MACHINE. HENRY YERKEY, Viola, Ill. Filed Nov. 21, 1925. Serial No. 70,517. 8 Claims. (Cl. 51—95.)



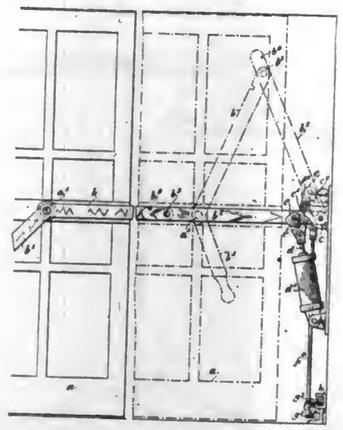
8. A machine for grinding an article having spaced spiral blades such as a lawn mower reel, comprising a device for turning the reel in opposite directions as the reel reverses its reciprocatory travel relatively to a tool, a plate having cam edges leading to an apex along which each blade individually is adapted to travel, escapement stops located one on each side of said apex and engageable by each blade as it moves off of said apex onto said edges, and an auxiliary escapement stop engageable by the blades and superposed on one of the first-mentioned stops.

1,667,065. CIGARETTE-HOLDER CASE. EDWARD E. BROSIUS, Spokane, Wash. Filed Apr. 19, 1926. Serial No. 102,908. 2 Claims. (Cl. 131—10.)

1. A device of the class described, comprising a case, a cigarette holder engaged therein, a barrel engaged with the case, a tube mounted in the barrel, a cap of absorbent material carried by the tube for engaging the socket of the holder when the case and barrel are interlocked with each other, as and far the purpose set forth.

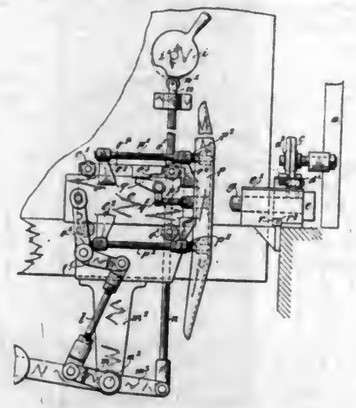
1,667,066. ART OF HANDLING CAPSULES FOR FILLING. GEORGE LANCE BROWN, Huntingdon Valley, Pa. Filed Apr. 17, 1926. Serial No. 102,613. 10 Claims. (Cl. 226—41.)

1. A capsule filling device comprising in combination, a holder for a plurality of empty assembled capsules, suction means for separating the parts of the capsules, means for reassembling the capsules after they have been filled, and means for ejecting the filled capsules.



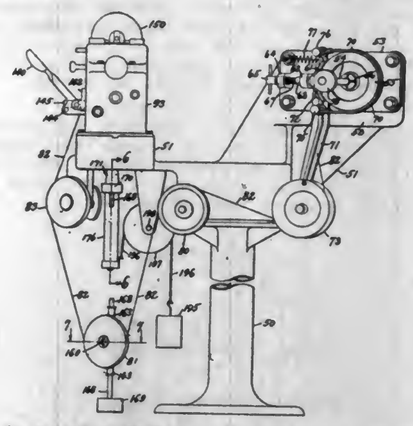
1,667,067. MOISTENING DEVICE. FRANK CHESLEY, Louisville, Ky. Filed Aug. 29, 1927. Serial No. 216,067. 6 Claims. (Cl. 15—133.)

1. A moistening device adapted to be attached to a finger, comprising, a ring, a body portion integral therewith, said body forming a well, and a wick extending from the well, said wick having its outer end overlying the outer face of the ring.



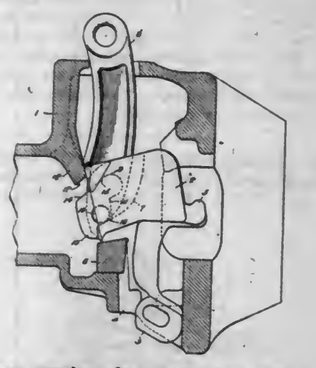
1,667,068. ELEVATOR. JOHN DARBY, Philadelphia, Pa., and CLAYTON W. OLD, Montclair, N. J., assignors, by mesne assignments, to Shur Loc Elevator Safety Corporation, Newark, N. J., a Corporation of New Jersey. Filed Apr. 30, 1926. Serial No. 105,742. 3 Claims. (Cl. 187—49.)

3. In an elevator, the combination of a shaft-door, a car, a control element for the car, a lock for the control element, a toggle lever system to operate the door, a lever carried by one of the toggle elements, a fixed control plate for cooperation with said lever in the movement of the toggle member, a shoe mounted movably on the car and operatively connected with the lock, a plunger mounted



on the shaft-way for cooperation with the shoe, and intermediate devices whereby the plunger is moved by the movement of said lever.

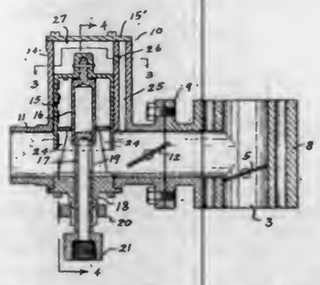
1,667,069. ELEVATOR. JOHN DARBY, Summit, N. J., assignor, by mesne assignments, to Shur Loc Elevator Safety Corporation, Newark, N. J., a Corporation of New Jersey. Filed Oct. 5, 1926, Serial No. 139,603. Renewed Sept. 30, 1927. 11 Claims. (Cl. 187—49.)



10. In an elevator, the combination of a car, a movable door, a notched controller on the car, a locking rod, means to press the locking rod into the notch of said controller, a sliding block operatively connected with the locking rod and movable therewith, a dog carried by the block and adapted to engage a stop when the locking rod is in the notch of said controller and prevent movement of the block and of the locking rod, and means actuated by the opening movement of the door to actuate the dog to engage the stop and prevent movement of the block and of the locking rod, such means including a shoe mounted movably on the block for coaction with the dog to move it to locking position.

1,667,070. ARMATURE-WINDING MACHINE. RUSSELL G. JONES, London, England, and CARL ZWIEBEL, Dayton, Ohio, assignors, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Original application filed Jan. 23, 1925, Serial No. 4,342. Divided and this application filed Apr. 11, 1927. Serial No. 183,019. 14 Claims. (Cl. 242—13.)

1. An armature winding machine comprising, in combination, a device for winding wire from a supply reel upon an armature core, means for guiding the wire from the reel to the device and including a movable member for maintaining a loop in the wire between the reel and the device during the winding operation, and means for controlling the movable member so that a substantial amount of wire may be pulled toward the winding device when desired without unreeling a substantial amount of wire from the reel.

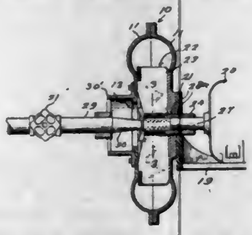


1,667,071. CAR COUPLER. WILLIAM KELSO, Pittsburgh, Pa., assignor to The McConway & Torley Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 27, 1925. Serial No. 26,131. 4 Claims. (Cl. 213—127.)

1. In a car coupler, the combination with a coupler head, knuckle, a knuckle opening lever, and a vertically movable lock for said knuckle adapted to swing rearwardly so as to engage and actuate said knuckle opening lever, of a lifter for actuating said lock, said head being provided rearwardly of said lock with a projection having an inclined face adapted to engage the lower end of said lifter to prevent accidental unlocking or said lock, said lifter being provided with oppositely extending trunnions and its lower end being adapted to stand beneath said projection when said lock and lifter are in normal locked relation, said lock being provided at its upper end

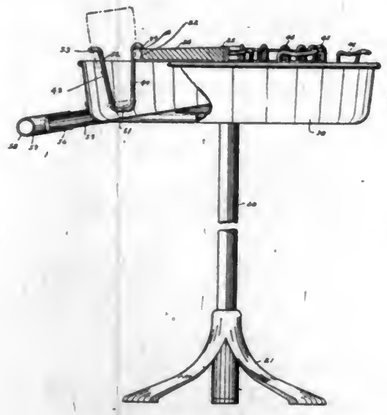
with an upwardly and rearwardly opening slot whose side walls are formed with recesses to receive said trunnions, the upper walls of said recesses when the lock is in normal locked position being more steeply inclined than said inclined face of said projection, said lifter being slidably and rotatably movable in said slot and being adapted when performing an unlocking operation to execute a preliminary movement with respect to said lock causing the lower end of said lifter to be withdrawn from beneath said projection, and the lower end of said lifter being adapted to engage and slide upon said projection during said preliminary movement while said trunnions are out of contact with the upper walls of said recesses.

1,667,072. PROPORTIONAL GAS AND AIR MIXING DEVICE. JOHN L. KLUPPEL, Houston, Tex., assignor to Portable Rotary Rig Company, Houston, Tex., a Corporation of Texas. Filed July 24, 1926. Serial No. 124,588. 6 Claims. (Cl. 48—180.)



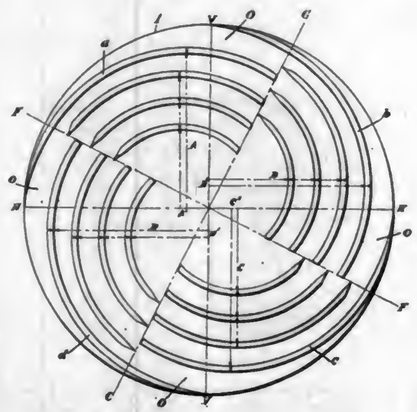
1. A mixing device including a fuel mixture intake conduit, a cylindrical member carried by said conduit and closed at its outer end, a plunger in said cylindrical member adapted to control the flow of air through said conduit, a nipple having a longitudinal discharge opening through the wall thereof into said conduit, and a sleeve valve fitted over the nipple and movable with said plunger and controlling said opening, there being a by pass connecting the conduit with said cylindrical member above the outer end of said plunger.

1,667,073. GLUE AND PROCESS OF MAKING SAME. PAUL KREISMANN, Chicago, Ill. Filed Mar. 28, 1921. Serial No. 456,193. 3 Claims. (Cl. 87—17.)



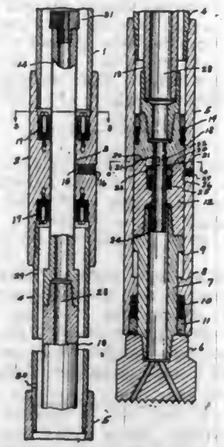
1. The process of making vegetable glue which consists in mixing potato starch, clay, water and an alkali, and subjecting the mixture to heat until the mixture is rendered semi-fluid by conversion.

1,667,074. CHARGE-FORMING DEVICE. ALBERT BREAKENRIDGE KNIGHT, Fairmont, W. Va. Filed May 7, 1927. Serial No. 189,677. 3 Claims. (Cl. 48—187.)



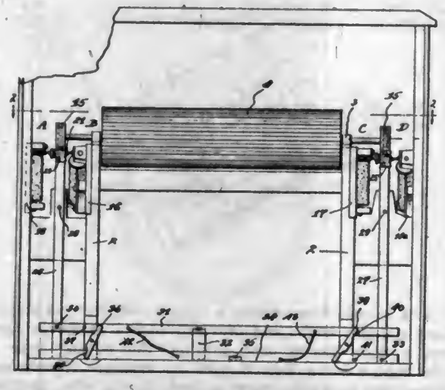
1. A device of the character described comprising a blower casing having an air inlet opening, a centrifugal blower including a plurality of blades mounted in said casing, said blower being provided with a hollow hub having openings therethrough, and a pipe having its outlet end arranged adjacent said hub and adapted to deliver gas to the interior of said hub.

1,667,075. MILK-BOTTLE-DRAINING DEVICE. ADOLPH J. LIPPOLD, Milwaukee, Wis., assignor to Milwaukee Dairy Supply Mfg. Co., Milwaukee, Wis. Filed Jan. 25, 1923. Serial No. 614,790. 5 Claims. (Cl. 221—69.)



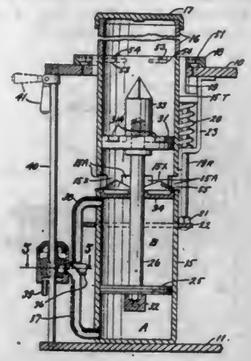
1. A bottle draining device including a pedestal having a tubular shaft, a plug within said shaft, a transverse pin extending through said plug and outwardly through said shaft, a rotor provided with a stub shaft rotatable within said tubular shaft in supported relation to said plug, a supporting casting exterior to said tubular shaft and notched to receive said transverse pin, an annular receptacle mounted upon said casting beneath said rotor, and means carried by said rotor for supporting bottles in an inverted position.

1,667,076. POLISHING WHEEL. DANIEL FREDERICK MCGOVERN, Montpelier, Vt. Filed Oct. 16, 1925. Serial No. 62,868. 2 Claims. (Cl. 51—209.)



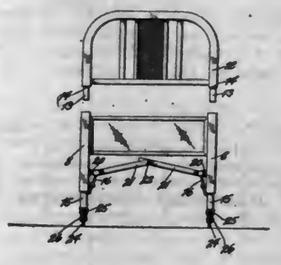
1. A polishing wheel comprising a plate having on its working face a plurality of sets of arcuate flanges disposed in symmetrically arranged groups lying between intersecting diameters of the plate, each flange set being centered on a diameter intersecting that of the preceding flange set, the leading ends of the outermost flanges of a pair of substantially oppositely disposed flange sets starting at substantially the horizontal or vertical median line of the plate and in advance of the tail ends of the flanges of the next preceding flange set.

1,667,077. DRILL. HARVEY MECOM, Liberty, Tex. Filed Aug. 9, 1926. Serial No. 128,175. 8 Claims. (Cl. 255—61.)



1. A drill including a rotatable stem, a coupling attached to the lower end of the stem and having a polygonal opening therethrough, a barrel connected to the lower end of said coupling, a tubular drill collar connected to the lower end of the barrel, a drilling tool embodying a bit and a separabe tubuar shank which extends up into said collar and is rotatable indepedently thereof, said collar and shank having interengaging shoulders to prevent the detachment of the drilling tool from the collar, a head connected to the upper end of said shank and fitting within said collar, a tubular hammer within the barrel whose upper end is polygonal and fits through the opening of said coupling, an enlarged detachable head carried by the lower end of the hammer which fits closely within the drill collar and forms a fluid tight joint therewith, the lower end of the hammer head and the upper end of the shank head having oppositely disposed correspondingly inclined faces which terminate in oppositely arranged abrupt vertically disposed shoulders, a tubing whose upper end is threaded into the lower end of the hammer and whose lower end works through the head of said shank.

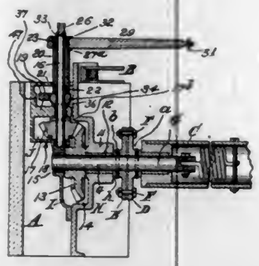
1,667,078. TOY PIANO AND METHOD OF OPERATING SAME. GEORGE M. PATTEN, Detroit, Mich. Filed Apr. 19, 1926. Serial No. 102,955. 9 Claims. (Cl. 84—95.)



1. A toy piano, comprising in combination, a keyboard, means for transmitting the oscillatory motion of the keys into a rotary motion, a pair of music boxes adapted to be actuated by said rotary movement, a single pinion and gear for actuating both of said music boxes, and means for effecting actuation of either of said music boxes by said single pinion.

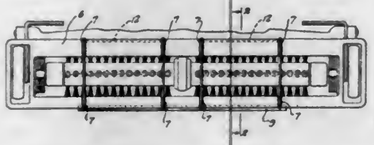
1,667,079. CORE-MAKING MACHINE. FRANK PIETRUSIAK, St. Paul, Minn. Filed May 20, 1927. Serial No. 192,844. 1 Claim. (Cl. 22—10.)

A core making machine comprising an upright fixed cylinder member mounted in suitable framework, a piston reciprocable in said cylinder and a piston rod extending downwardly from said piston, a molding cylinder adapted to be removably fixed concentrically on the upper end of said fixed cylinder, said fixed cylinder adapted to be filled with core sand on top of the piston when the latter is in lowered position, said molding cylinder being shorter than the distance from the lowest position of the piston to the top of the fixed cylinder, means for moving said piston upwardly to the top of said fixed cylinder to compress the core sand in the molding cylinder, and a core retaining device mounted at the upper end of the fixed cylinder comprising a series of circularly arranged inwardly directed and curved cam arms, an oscillatable ring about said cylinder, said cams fulcrumed on said ring, said upper end of the fixed cylinder provided with apertures slidably engaged each by one of said cam arms, means for oscillating said movable ring to move said cam arms inwardly to support the lower part of the sand core pressed into the molding cylinder.



1,667,080. MORTUARY BED. MAXWELL B. RAMSEY, St. Louis, Mo. Filed Feb. 12, 1927. Serial No. 167,646. 3 Claims. (Cl. 5—11.)

1. A bed comprising an approximately horizontal frame, a pair of uprights supporting each end of said frame, an element telescoping in the lower end of each of said

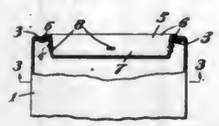


uprights, latches pivoted on said uprights for holding said elements in different adjustments, a rod extending inwardly from each of said uprights adjacent to said latches, springs for actuating said latches into latching engagement with said elements, and a pair of levers having their outer ends supported by said rods and engaging said latches and having their inner ends pivotally connected and being operative to release said levers from said elements.

1,667,081. METALLIC ROLLING SHUTTER. JOSEPH C. RAPER, Covington, Ky. Filed Nov. 4, 1926. Serial No. 146,271. 2 Claims. (Cl. 189—58.)

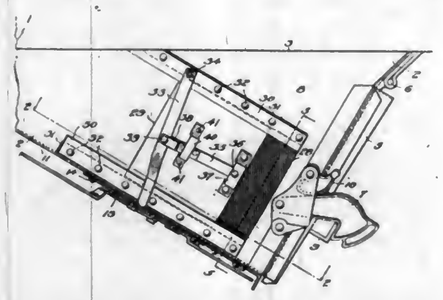
1. In a device of the character described, the combination with a spring-wound shutter-roller having a longitudinally-aligned central axis or shaft, a release-mechanism box or receptacle in which said shaft is journaled, a transverse auxiliary shaft having miter gear connection with said roller shaft in said receptacle, a ratchet wheel mounted to turn with said auxiliary shaft, in said receptacle, a rock sleeve concentrically mounted on the said auxiliary shaft and extending beyond the said receptacle, a strike-arm at the inner end of said rock sleeve and vertically below the said ratchet wheel, a swinging or gravitating pawl mounted on a shaft that lies parallel to said auxiliary shaft in the receptacle and with said pawl suspended in alignment with said strike-arm, a weighted arm extending from the outer end of said rock-sleeve and adapted to more positively or effectively hold a notched or shouldered part of said pawl in engagement with the respective teeth of said ratchet-wheel as well as to impart striking-heft adapted to cause said strike-arm to impart a quick and decisive blow to said pawl when the release mechanism herein has been brought into action, and a thermostatic frangible chain extending from the outer end of said weighted arm to a roller door or shutter mounting for automatic parting action when dangerous fire heat conditions occur in the opening that is to be closed and protected by said door, substantially as shown and described.

1,667,082. BRUSH GUARD. PATRICK H. ROBINSON, Racine, Wis., assignor to Hamilton Beach Mfg. Co., Racine, Mich., a Corporation of Wisconsin. Filed Sept. 13, 1926. Serial No. 135,120. 2 Claims. (Cl. 15—157.)



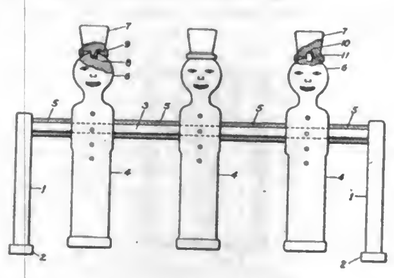
1. The combination with a vacuum cleaner casing provided with a downwardly opening elongated suction nozzle formed with lower front and rear longitudinally extending ribs and with transverse recesses in its front and rear lower edges, of a removble brush guard therefor comprising a rod and a plurality of U-shaped members having their end portions attached thereto, the said guard extending around and engaging the outer front and rear portions of said ribs and extending through said recesses, the recesses being of such depth that the U-shaped members of the brush guard will lie flush with the lower edge surfaces of the suction nozzle.

1,667,083. GELATIN-DYNAMITE EXPLOSIVE. ROSCOE B. SMITH, Kenvil, N. J., and ERNEST M. SYMMES, Wilmington, Del., assignors to Hercules Powder Company, Wilmington, Del., a Corporation of Delaware. Filed Nov. 27, 1926. Serial No. 151,243. 1 Claim. (Cl. 52—11.)



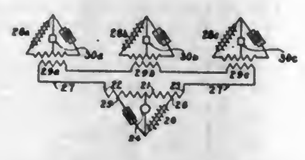
A low strength dynamite explosive comprising the below specified ingredients each within the proportion range specified, namely, nitroglycerin, 17–18 per cent; dinitrotoluol, 2–4 per cent; nitrocotton, .1–.2 per cent; sodium nitrate, 60–65 per cent; sulphur, 9–12 per cent; starch 2–5 per cent; and a small proportion of chalk.

1,667,084. CLOSURE. DAVID STERN, Dorchester, Mass. Filed July 21, 1926. Serial No. 123,874. 4 Claims. (Cl. 220—60.)



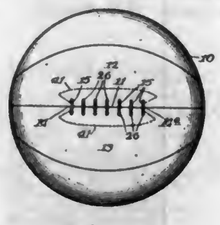
1. In combination with a can having a depending resilient lip outwardly turned at its lower edge within its mouth, a cup shaped closure therefor comprising a bottom portion and a side wall having an outwardly disposed lip engaging portion disposed for engagement with the edge of the lip of the container mouth when the closure is in seated position.

1,667,085. BALLAST CAR. BERNARD W. STRAW, Mount Airy, Md., assignor to Straw Ballast Distributor Corporation, Wilmington, Del., a Corporation of Delaware. Filed Mar. 14, 1927. Serial No. 175,339. 16 Claims. (Cl. 105—249.)



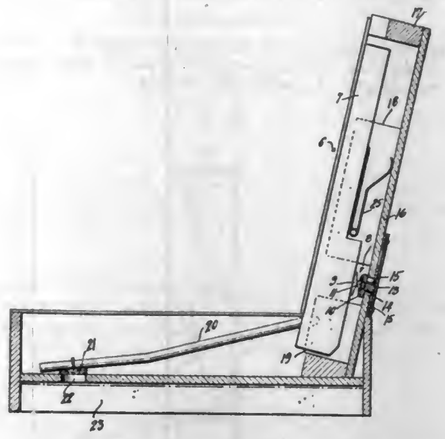
1. A vehicle formed with a hopper comprising a sloping floor and side walls, and provided with a discharge opening, a door closing said opening, the sloping floor of said hopper being formed with an aperture therein and means for gradually opening and closing said aperture while the vehicle is loaded for distributing material therefrom.

1,667,086. GAME TOY. JOHN F. STROMBECK, Moline, Ill. Filed Jan. 21, 1928. Serial No. 248,298. 1 Claim. (Cl. 273—127.)



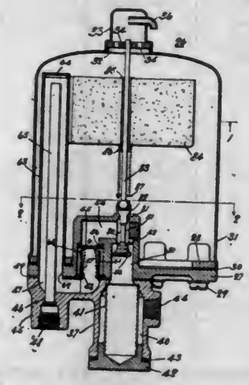
A game toy comprising a pivot rod, supports for the rod, a figure mounted to swing on the rod and having a head, a hat piece fitting on the head, and a dowel and pin connection between the hat piece and head.

1,667,087. SYSTEM OF ELECTRICAL TRANSMISSION AND TRANSFORMATION. PERCY H. THOMAS, Upper Montclair, N. J. Filed Aug. 7, 1925. Serial No. 48,795. 12 Claims. (Cl. 171—97.)



1. A network consisting of a reactance, a condenser and a transformer winding connected in a loop, in combination with a circuit connected across said loop and means for compounding the voltage in said circuit, said means consisting of connections between said circuit and an intermediate point of said winding to one side of the mid-point.

1,667,088. INFLATABLE BALL. ARCHIBALD J. TURNER, Chicago, Ill., assignor to Wilson-Western Sporting Goods Co., Chicago, Ill., a Corporation of Delaware. Filed Mar. 19, 1927. Serial No. 176,604. 16 Claims. (Cl. 273—65.)



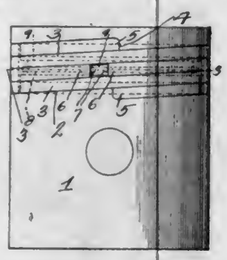
1. A ball comprising an outer casing having an entrance slit, and a lacing for said slit disposed flush with the outer surface of said casing in grooves comprising bends in said casing.

1,667,089. ACCORDION KEYBOARD. FRANK UMBRIACO, New York, N. Y. Filed Mar. 1, 1927. Serial No. 171,786. 6 Claims. (Cl. 84—376.)

5. In an accordion keyboard provided with a casing, a plurality of keys, a member on each of the keys intermediate their ends, a complementary member for each of the first mentioned members forming snap joint fulcrums therebetween, and means for securing the second mentioned members to the casing.

1,667,090. FUEL-SUPPLY DEVICE. HUGH WALLACE, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Aug. 3, 1925. Serial No. 47,676. 4 Claims. (Cl. 103—40.)

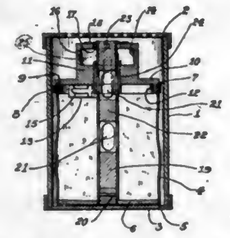
3. A fuel supply device comprising in combination, a tank having one closed end; a base attached to the open end of said tank and providing a bottom therefor, said base having a housing portion extending into the tank, the housing portion being provided with inlet and outlet passages; check valves in said passages; a tube extending within the tank and having a closed end adjacent the closed end of the tank and an open end communicating with an aperture in the base; a housing member secured to said base, said member having a passage communicating with one of the passages in the base and a second passage providing communication between both passages in the base and the aperture which communi-



cates with the tube; and a pipe extending through and secured to the housing member, said pipe extending into the tube and terminating adjacent the closed end thereof when the said member is attached to the base.

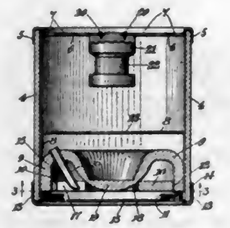
1,667,091. BULLETIN BOARD. FREDERICK S. WOLSTENHOLME, Richmond, Va. Filed Jan. 3, 1927. Serial No. 158,670. 8 Claims. (Cl. 40—64.)

1. A device of the character described comprising a board having an opening therein, a pair of supports fixed with respect to and having faces inclined downwardly toward said board and arranged adjacent opposite ends of said opening, and a sign plate adapted to be arranged against one face of said board to be visible through said opening, each end of said plate being provided with a projecting lip engaging one of said inclined faces.



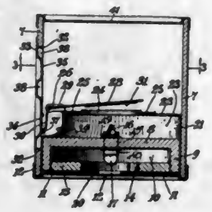
1,667,092. PISTON AND ROD PACKING. JAMES LEO AHERN and LETCHER GILBERT LEDGER, New Orleans, La. Filed Mar. 30, 1927. Serial No. 179,509. 4 Claims. (Cl. 74—109.)

3. The combination with a piston packing comprising helically shaped expansible rings disposed in a piston groove, of an expansible ring in the bottom of the groove, said expansible ring having outwardly extending arms engaging the ends of the inner convolutions of the rings.



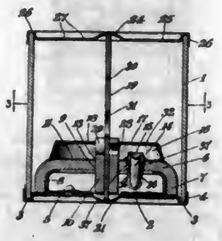
1,667,093. TALKING-TOY MECHANISM. LOUIS V. ARONSON, Newark, N. J., assignor to Voices Incorporated, a Corporation of Delaware. Filed Mar. 22, 1923. Serial No. 626,757. 3 Claims. (Cl. 46—46.)

3. A sound producing device having a bellows, a sound chamber, a reed operated by the bellows and arranged so that the sound from the reed passes into the sound chamber, said sound chamber having a port through which the sound issues therefrom to the outside and a valve member extending through said port to control the issuance of sound therefrom, said valve member comprising a hollow tubular member with a plurality of plugs therein, said plugs being spaced apart to provide a plurality of spaces therebetween and the tubular member being provided with apertures opposite said spaces, said



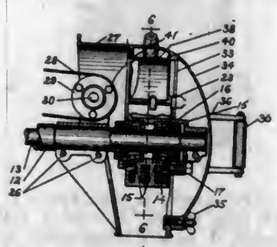
apertures being positioned to register with said sound chamber port when the bellows is operated and each aperture being of a length to permit the sound to pass therethrough and through said port from the sound chamber to the outside when the aperture registers with said port.

1,667,094. SOUND DEVICE. LOUIS V. ARONSON, Newark, N. J., assignor to Voices Incorporated, a Corporation of Delaware. Filed Feb. 7, 1924. Serial No. 691,103. 9 Claims. (Cl. 46—46.)



8. A sound device comprising a tubular container closed at one end, a sound chamber slidable back and forth in the container, sounding means operatively associated with the sound chamber to produce sound therein, said sound chamber having an opening in one side thereof, and a control member secured with respect to the opposite end of the container and adapted to slide in and out of said opening, the opposite side of the sound chamber being imperforate to said control member.

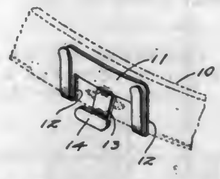
1,667,095. SOUND DEVICE. LOUIS V. ARONSON, Newark, N. J., assignor to Voices Incorporated, a Corporation of Delaware. Filed Mar. 6, 1924. Serial No. 697,216. 19 Claims. (Cl. 46—46.)



9. A sound device having in combination a tubular casing closed at one end, a plunger adapted to slide back and forth in the casing, a tubular bellows member, one end of which is secured to the plunger and the other end of which is secured to the casing, a reed pipe carried by the plunger, a pivoted flap valve carried by the plunger and adapted to control the sounding of said reed pipe, said flap valve having an arm extending therefrom toward the bellows end of the casing and adjacent the wall of the casing and a cam member on the wall of the casing adapted to engage said arm to operate the valve as the plunger slides in the casing.

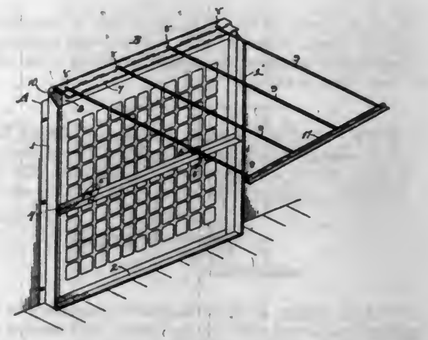
1,667,096. SOUND DEVICE. LOUIS V. ARONSON, Newark, N. J., assignor to Voices Incorporated, a Corporation of Delaware. Filed Mar. 31, 1924, Serial No. 703,037, and in Canada Mar. 21, 1924. 7 Claims. (Cl. 46—46.)

7. A sounding device having a collapsible air chamber with a weighty head movable by gravity to collapse said chamber, a guide member for the weighty head and along which the weighty head is adapted to slide, said guide member extending through the weighty head, said weighty head having surfaces of lead where it engages the guide member whereby the weighty head slides easily on the guide member, and sounding means operated by the movement of said weighty head.



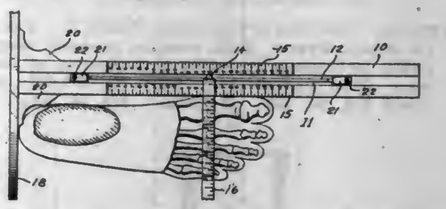
1,667,097. MACHINE FOR FILLING MOLDS. ELMER O. BEARDSLEY and WALTER F. PIPER, Chicago, Ill., assignors to The Beardsley & Piper Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 28, 1924. Serial No. 695,705. 12 Claims. (Cl. 22—36.)

1. In a projector for filling flasks, the combination of a casing provided with an arcuate, cylindrical portion and a rotor having open sides and a projecting member in coactive relation with said portion, and provided with means rigid therewith at both sides for confining the sand therebetween, said means being substantially spaced from the casing.



1,667,098. COLLAR BUTTON. OVILA J. BERGERON, Manchester, N. H. Filed Aug. 24, 1927. Serial No. 215,180. 1 Claim. (Cl. 24—101.)

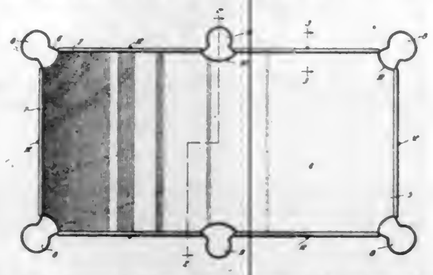
As an article of manufacture, a collar-button comprising a bar having a tongue extending from one of the longer edges of the bar at an angle to the plane of the bar, and elongated tongues extending from the opposite ends of said edge of the bar and being doubled inter-



mediate their lengths to extend transversely of the end portions of said bar, the doubled portions of said tongues extending beyond the said edge of the bar.

1,667,099. SIDE-WALL-REGISTER RACK. JAMES M. BREITENBACH, Battle Creek, Mich. Filed July 26, 1927. Serial No. 208,502. 4 Claims. (Cl. 34—26.)

1. In a device of the nature set forth, in combination with a side wall register having an open lattice, a portable frame adapted to lie against said register, adjustably arranged hooks carried by said frame and adapted to engage with the lattice of said register, a rack slidably mounted in a top piece of said frame and capable of being horizontally extended and held in an operative position.

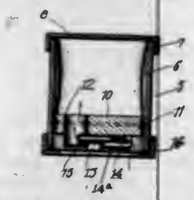


1,667,100. FOOT-MEASURING APPARATUS. CHARLES H. BROWN, Flushing, N. Y. Filed Aug. 3, 1925. Serial No. 47,706. 1 Claim. (Cl. 33—3.)

An apparatus as characterized having a base board laterally extended for engaging the heels of both feet of a customer at the same time; an elongated rule mounted midway thereon in perpendicular disposition thereto, said rule having a longitudinally disposed groove and calibrated edges at the opposite sides of said groove, the calibrations being disposed to assist in locating the position of the structural features of both right and left feet at approximately the same time, and particularly of the joints of the great toes thereof; a slidable index mounted in said groove and having pointing members

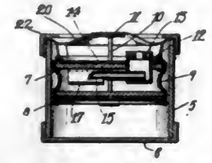
for registering with the calibrations on said edges; and a flexible measuring member mounted in said index adapted for measuring the width of the feet at opposite sides of said rule without moving said rule.

1,667,101. AMUSEMENT DEVICE. EDWARD A. CHRISTOPH, Chicago, Ill. Filed Aug. 1, 1927. Serial No. 209,695. 4 Claims. (Cl. 273—12.)



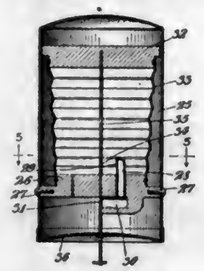
1. In a device of the class described, a one-piece rectangular frame looped at intervals to form pockets, and rubber tubing covering the straight portions of said frame between said pockets.

1,667,102. HINGE. BASIL R. CRAMPTON, Grand Rapids, Mich., assignor to Winters, Stryker & Crampton, Grand Rapids, Mich., a Corporation of Michigan. Filed Feb. 16, 1925. Serial No. 9,436. 2 Claims. (Cl. 16—135.)



1. In a hinge, a hinge member comprising a plate formed at one end with an outwardly bent section which is turned back upon itself in a second section located a distance outward from the first section and terminating in a pintle receiving roll, a second hinge member formed as a substantially flat plate and having an inturned flange at its sides and one end, said flange at each side and adjacent the opposite end of the plate being widened to form ears adapted to pass one at each end of the roll, and a pintle passing through said ears and roll for pivotally connecting the hinge members together, said plate of the second hinge member at the end thereof where said ears are located being formed with an inturned curved extension located over and covering the outer portion of said roll, substantially as described.

1,667,103. SOUND-REPRODUCING DEVICE. MATTEO DE CESARE, Newark, N. J., assignor, by mesne assignments, to Voices Incorporated, a Corporation of Delaware. Filed Mar. 21, 1923, Serial No. 626,615. Renewed Feb. 26, 1926. 6 Claims. (Cl. 46—46.)

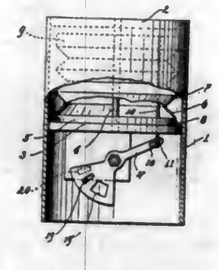


3. A sounding device having in combination a cylindrical casing having two heads therein, one fixed with respect to the casing and the other a weighty head movable back and forth in the casing toward and from the fixed head by gravity, and freely tiltable in all directions in the casing, a tubular bellows connecting said heads whereby the bellows will be compressed when the movable head moves toward the fixed head and distended when the movable head moves away from the fixed head, and a reed pipe carried by one of said heads, said reed pipe being arranged so that it will be operated by air passing into the bellows and will sound when the bellows is expanded.

1,667,104. SOUND-PRODUCING DEVICE. MATTEO DE CESARE, Newark, N. J., assignor, by mesne assignments, to Voices Incorporated, a Corporation of Delaware. Filed July 15, 1926. Serial No. 122,573. 2 Claims. (Cl. 46—46.

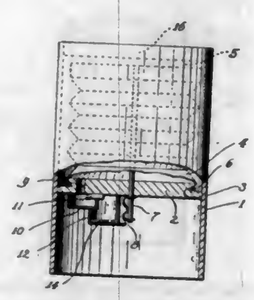
1. A sound producing device having a tubular bellows of elastic material, a relatively fixed head closing one end of the bellows, a relatively movable head closing the other end of the bellows, means for expanding the bellows by moving the movable head away from the fixed head and stretching the material of the bellows whereby the bellows will collapse due to the elasticity of the material of the bellows, said means including a manually operated push rod secured to the movable head and extending through the bellows and fixed head for extending the bellows, and a sound reed adapted to be operated by the bellows.

1,667,105. VOICE MECHANISM. FRED EVANS, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated, a Corporation of Delaware. Filed Nov. 23, 1922. Serial No. 602,705. 4 Claims. (Cl. 46—46.)



1. A sound device having in combination a cylindrical casing, a head fixed therein, a weighty head movable by gravity therein to form a compressible air chamber between said heads, a reed pipe carried by the fixed head, an opening through which the sound issues from the reed pipe, and a control member secured to said weighty movable head and movable therewith and having a plurality of apertures therethrough adapted to move past said opening to control the issuance of sound from the reed pipe.

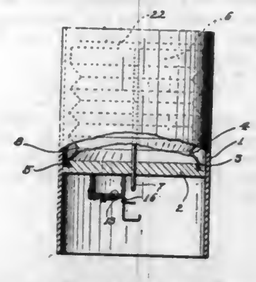
1,667,106. TALKING-TOY MECHANISM. FRED EVANS, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated, a Corporation of Delaware. Filed Mar. 21, 1923, Serial No. 626,495. Renewed Apr. 28, 1925. 14 Claims. (Cl. 46—46.)



1. In a device of the class described, the combination of a casing provided with a pair of spaced heads, a bellows attached to one of said heads, a weight attached

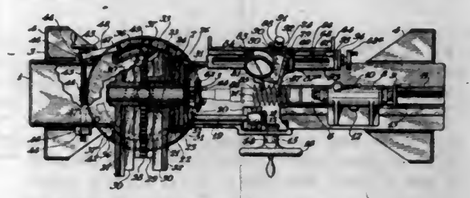
to said bellows, a rod movable with said weight through the head to which said bellows is attached, a reed chamber in communication with the interior of said bellows, an orifice chamber having an orifice in its wall, a reed in communication with the said reed chamber and the said orifice chamber, and a control arm pivoted

to said reed chamber having one end thereof connected to said rod, the other end being provided with a blank portion having spaced apertures, the said apertures being arranged to be brought successively into registry with said orifice as said weight causes the collapse of said bellows.



1,667,107. TALKING-TOY MECHANISM. FRED EVANS, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated, a Corporation of Delaware. Filed Mar. 21, 1923. Serial No. 626,501. 9 Claims. (Cl. 46—46.)

5. A device of the class described having in combination a collapsible air chamber, a sound reed operated thereby, means having an orifice through which the sound from the reed may escape, a valve normally closing said orifice and a control member, the control member having a member adapted to engage a member on the valve to open the valve when the air chamber is collapsed, and one of said members being formed of flexible rubber whereby the other member may easily slip by the same on one movement of the control member with respect to valve.



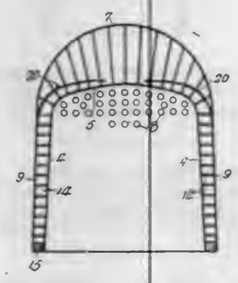
1,667,108. TALKING-TOY MECHANISM. FRED EVANS, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated, a Corporation of Delaware. Filed Mar. 21, 1923. Serial No. 626,502. 10 Claims. (Cl. 46—46.)

7. A sounding device having sound producing means, and means for controlling the same, said last mentioned means including a valve for opening and closing an orifice through which the sound is adapted to issue, and a

trip arm pivotally mounted on and supported by said valve and resiliently held in one position with respect thereto and operable to operate said valve.

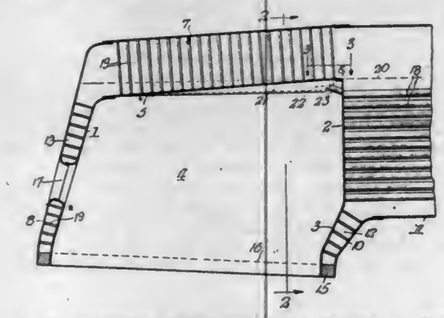
1,667,109. LEAD-TESTING MACHINE. PERCE E. GARLENT, Detroit, Mich., assignor to The Timken-Detroit Axle Company, Detroit, Mich., a Corporation of Ohio. Filed May 9, 1927. Serial No. 189,889. 24 Claims. (Cl. 73—51.)

1. A machine for testing the lead of screws comprising means for rotating a screw on its axis, means for moving said screw axially during the rotation thereof in a direction opposite to that in which the thread advances and at a rate corresponding to the advance of the thread of the screw having the desired lead, and means engaging the side of the thread of said screw, whereby inaccuracies in the lead of the screw cause movement of said screw engaging means.



1,667,110. FILM BOX. EMANUEL GOLDBERG and MARTIN NOWICKI, Dresden, Germany, assignors to the Firm: Zeiss-Ikon Aktiengesellschaft, Dresden, Germany. Filed Oct. 7, 1926, Serial No. 140,015, and in Germany Oct. 8, 1925. 1 Claim. (Cl. 242—71.)

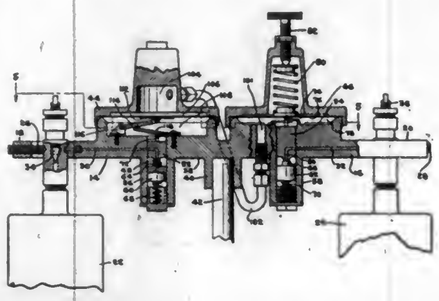
In a film magazine of the class described including two boxes one placed within the other with their side walls in spaced relation to form film channels, and



united at their bottom parts, and a common cover for the open top parts of both boxes, an inner projecting central rib on said cover, and outer flanges parallel to said rib to form grooves therewith for the reception of the ends of the side walls of both boxes to brace the same and holding these ends apart.

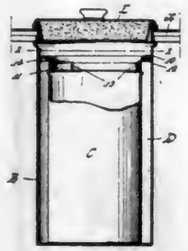
1,667,111. LOCOMOTIVE BOILER. CHARLES GILBERT HAWLEY, Cleveland, Ohio, assignor to Locomotive Firebox Company, Chicago, Ill., a Corporation of Delaware. Filed Apr. 8, 1926. Serial No. 100,480. 2 Claims. (Cl. 122—495.)

1. A locomotive boiler embodying therein, inner and outer stay bolted sheets defining a firebox and side water legs, and deflector plates positioned in said side water legs and operating at a predetermined low water level to deflect a part of the upwardly moving water in the side water legs toward that area of the crown sheet which becomes uncovered and to maintain the said area to one of small dimensions.



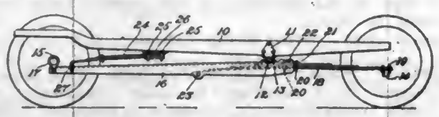
1,667,112. LOCOMOTIVE BOILER. CHARLES GILBERT HAWLEY, Cleveland, Ohio, assignor to Locomotive Firebox Company, Chicago, Ill., a Corporation of Delaware. Filed Apr. 8, 1926. Serial No. 100,482. 2 Claims. (Cl. 125—495.)

1. A locomotive boiler embodying therein, a firebox including a crown sheet and a flue sheets, said crown sheet being formed to provide channels therein terminating short of the flue sheet and a conduit opening at one end into the channel and at its other end through the flue sheet.



1,667,113. ANÆSTHETIZING APPARATUS. JAY A. HEIDBRINK, Minneapolis, Minn. Filed Feb. 23, 1924. Serial No. 694,485. 2 Claims. (Cl. 128—203.)

1. An anæsthetizing apparatus having a mixing chamber, two independent sources of supply of gases under pressure connected with said mixing chamber, a controlling device in one of said connections, a controlling device in the other of said connections, a diaphragm in said first controlling device constituting one of the walls of a gas chamber which is connected to said mixing chamber, means associated with said diaphragm for varying the supply of gas to said chamber, a diaphragm in said second controlling device constituting a partition between two separated gas chambers, a passageway connecting said first mentioned gas chamber with one of said



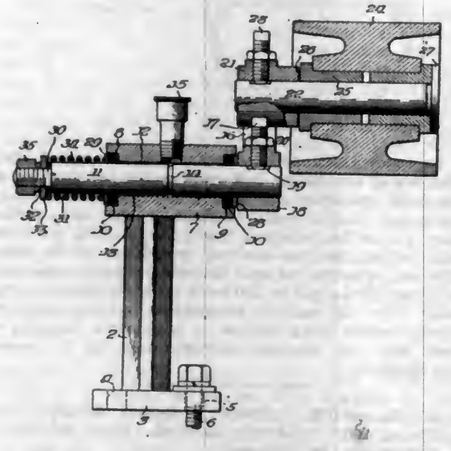
separated gas chambers, the other of said separated gas chambers being in the connection between its source of supply and the mixing chamber, a valve for controlling the supply of gas to said last mentioned chamber and connections between said second diaphragm and said valve for opening the latter to an extent in proportion to the pressure of gas in the first of said separated chambers.

1,667,114. REFRIGERATING CABINET. DUNCAN C. HOOKER, Farmington, Conn. Filed Jan. 27, 1926. Serial No. 84,248. 4 Claims. (Cl. 220—9.)

1. In a refrigerating cabinet, a dry container, a food can within and spaced from the walls of said container, and an outwardly and upwardly tapered flange having a rib removably fitting in the mouth of said food can and a rib on its outer periphery engaging the walls of the dry container at a distance from the top thereof.

1,667,115. SPRING SUSPENSION FOR VEHICLES. HENRY WEBB HYDE, North Cohasset, Mass., assignor to Hyde Engineering Company, Boston, Mass., a Corporation of Massachusetts. Filed May 28, 1923. Serial No. 641,932. 5 Claims. (Cl. 280—104.)

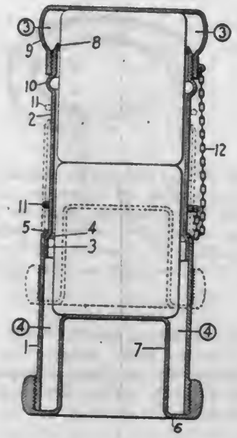
1. A spring suspension for vehicles including a pair of longitudinal reaches, each of said reaches comprising a rigid bar having at one end only a spring extension



connected at one end to the reach and at its opposite end to the axle, the opposite end of said bar being connected to the other axle, and a connection intermediate said axles between said reaches and the vehicle body about which the latter is free to rock with respect to the former.

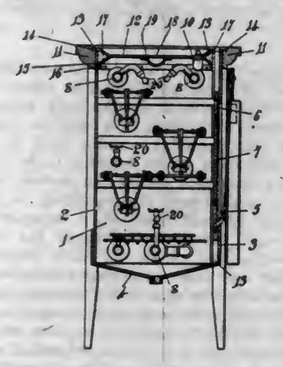
1,667,116. SPRING SUSPENSION FOR VEHICLES. HENRY WEBB HYDE, North Cohasset, Mass., assignor to Hyde Engineering Company, Boston, Mass., a Corporation of Massachusetts. Filed May 28, 1923. Serial No. 641,934. 12 Claims. (Cl. 280—104.)

1. In a vehicle having a body and axles, a spring suspension including a spring reach connected with each axle at one side of the vehicle, a connection between said reach and the body at one side of the center of gravity thereof upon which the body is free to rock, and a balancing spring at the same side of the center of gravity and connected at opposite ends to the body.



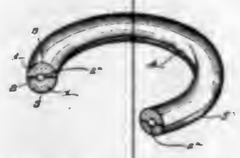
1,667,117. BELT-TIGHTENING-IDLER MOUNT. WARD S. IRELAND, Beloit, Wis., assignor to National Refrigeration Corporation, Beloit, Wis., a Corporation of Delaware. Filed July 15, 1926. Serial No. 122,573. 2 Claims. (Cl. 64—5.)

1. An idler pulley mount comprising, a bearing having a recess at one end of the bore thereof, a shaft rotatably mounted in and extending through said bore and beyond the ends thereof, a second shaft, means securing said second shaft to one end of the first said shaft out of alignment therewith ,a pulley rotatably mounted on the second shaft, means at the opposite end of the first said shaft for securing it against displacement, packing material in said recess and about the first said shaft, and resilient means normally compressing said material for imposing resistance to rotation of the first said shaft.



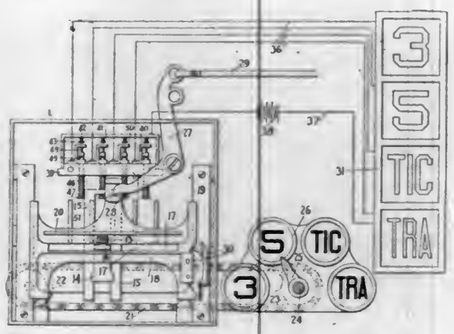
1,667,118. EJECTING HOLDER. GEORGE SHAFFER KECK, Pasadena, Calif. Filed Apr. 18, 1924. Serial No. 707,836. 7 Claims. (Cl. 206—56.)

7. A holder of the character described comprising two cylindrical sections slidably mounted one within the other, a closure for the outer end of one of said sections having a part extending into said section to support the material within said holder, said part being arranged to enter the other section when said sections are moved one



toward the other, and a removable closure for the outer end of said other section having a part arranged in line therewith to limit the movement of material beyond the end of the last mentioned section.

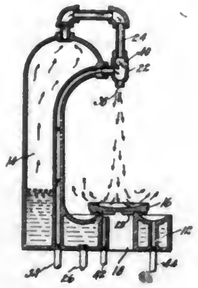
1,667,119. SPLASHPROOF CABINET FOR DISHWASHING AND SIMILAR PURPOSES. JAMES JOSEPH KEHOE, JR., WILLIAM CHARLES TREW MORSON, and ERIC MICHAEL DE SHERBININ, Toronto, Ontario, Canada, assignors, by mesne assignments, to Paragon Dishwasher Syndicate Incorporated, a Corporation of New York. Filed Nov. 10, 1923. Serial No. 674,094. 2 Claims. (Cl. 141—9.)



1. In a dishwashing machine a cabinet having vertical side, back and front walls and a bottom, and an opening in the front wall closed by a sliding door, a cabinet top comprising an open frame surrounding the upper ends of the side, back and front walls and extending above and below the top edges thereof, a pan shaped panel connected to the frame, overlying the frame above said walls and extending below their top edges and converging within the cabinet to provide grooves in which the upper ends of the walls are entered, and splash strips secured to the inner surfaces of the walls immediately below the cabinet top for covering the grooves and protecting the joint formed by the top edges of the walls and cabinet top.

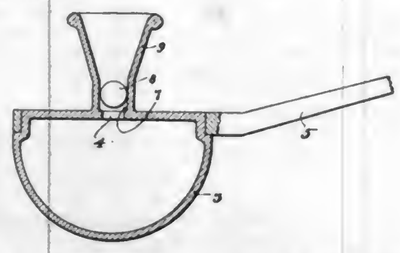
1,667,120. FEEDING OR DISPLACING BELT. ARTHUR J. KEISER, Rochester, N. Y., assignor to The Bircher Co., Inc., Rochester, N. Y. Filed Mar. 21, 1925. Serial No. 17,364. 4 Claims. (Cl. 74—66.)

1. An endless belt of the class described, circular in cross section, and having its innermost periphery under compression and its outermost periphery under tension in any position to which it may be turned about the center of said circular cross section, the belt being formed of a plurality of endless and seamless sections.



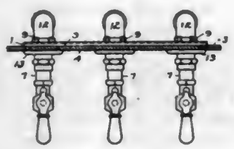
1,667,121. REGISTERING MECHANISM. CHARLES W. KETTEMAN, Dayton, Ohio, assignor to Ohmer Fare Register Company, Dayton, Ohio, a Corporation of New York. Filed Feb. 26, 1925. Serial No. 11,728. 8 Claims. (Cl. 235—33.)

1. The combination with a registering mechanism having a plurality of counters adapted to register different items, an operating member having both horizontal and vertical movement to select and actuate that one of said counters corresponding to the item to be registered, of an indicating device adapted to be mounted at a point remote from said registering devices and having a plurality of indications corresponding to the items to be registered by said counters, a separate lamp for illuminating each indication, a circuit for each lamp, a circuit breaker and closer for each circuit, and a part connected with said operating member and so arranged with relation to said circuit breakers and closers that the horizontal movement of said operating member will bring said part into operative relation with the circuit breaker and closer of that indication which corresponds with the item to be registered and the vertical movement of said operating member will actuate said circuit breaker and closer to close the circuit through the lamp of that indication.



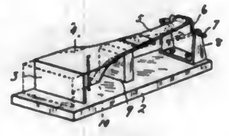
1,667,122. FUEL-OIL BURNER. CARL A. KILGUS, CHESTER A. BURTON, and GEORGE O. BERGMOSER, Detroit, Mich. Filed Feb. 4, 1927. Serial No. 165,782. 9 Claims. (Cl. 158—56.)

1. A fuel oil burner having a target plate, a water boiler having an annular portion spaced below said plate to permit air to flow therethrough and upwardly around the periphery of the plate and provided with an upright portion extending upwardly above said plate at one side thereof and in proximity thereto, a mixing chamber spaced above the plate and in proximity to the upper end of said upright portion of the boiler,



said mixing chamber provided with an outlet to discharge a fuel mixture toward said target plate, a steam passageway leading from the boiler to the mixing chamber and a fuel passageway leading into the mixing chamber.

1,667,123. TOY. KARL KOLLER, Los Angeles, Calif. Filed Mar. 2, 1925. Serial No. 12,599. 1 Claim. (Cl. 273—96.)

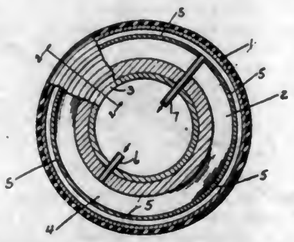


In a toy, a ball, a hollow body made of resilient material having an opening, and an extension-end provided on the body embodying a cylindrical engaging portion larger than and concentrically adjacent to the said opening having a conical receiving mouth portion with the wider end forming the free receiving termination of the extension end whereby the said ball can be held preparatory to being discharged by air force from the hollow of the body when the body is compressed, the said taper receiving mouth being adapted to facilitate a dropping of said ball into engaging position ready for a succeeding discharge.

1,667,124. PIPE SUPPORT. GEORGE LINIGER, Fort Wayne, Ind. Filed Mar. 20, 1926. Serial No. 96,215. 2 Claims. (Cl. 285—30.)

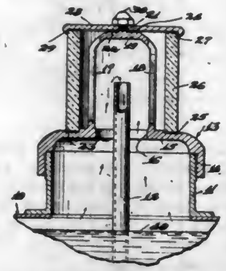
1. A supporting plate for faucets extending through the back wall of a sink and comprising a laterally elongated strip of bendable metal having flanges extending along its upper and lower edges to engage the back wall of a sink, said strip further having openings disposed in spaced alinement between the upper and lower edges of the strip, and tongues extending rearwardly from the strip around said openings for bending engagement over the flange of a pipe fitting.

1,667,125. SOUNDING DEVICE FOR TOY ANIMAL FIGURES. CONSTANTY MAJEWICZ, Detroit, Mich. Filed Dec. 13, 1926. Serial No. 154,461. 2 Claims. (Cl. 46—46.)



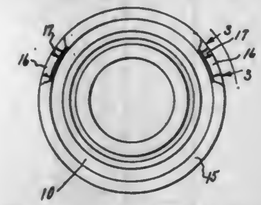
1. A sound producing device comprising a base having a rosin-treated top surface, an arm extending substantially parallel to said base, means carried by the base for reciprocating said arm upon said treated surface in substantial parallelism with the base, a flexible plate carried by said arm and bearing edgewise upon said base and a spring extending between said arm and base maintaining said plate pressed against the base.

1,667,126. COMBINATION LICENSE PLATE AND TAIL LIGHT. THOMAS MARTIN, Piedmont, Calif., assignor of one-half to Christian A. Jorgensen, Piedmont, Calif. Filed Mar. 17, 1926. Serial No. 95,337. 2 Claims. (Cl. 40—133.)



1. A combination license plate and tail light comprising a casing having a rectangular opening therein, the forward lower edge of said casing being offset to provide a transverse ledge and terminating in a rolled edge, the upper edge of said casing being offset to provide a seat and terminating in a rolled edge, a substantially rectangular frame disposed in said rectangular opening and bearing against said seats, said frame having upper and lower transverse rolled forward edges, hinged members connecting said frame to the lower edge of said casing and extending about the rolled lower edge of said casing and of said frame, and fastening elements attached to the upper edge of said frame and of said casing and extending completely about the upper rolled edge of said frame and casing, as and for the purpose specified, and a perforated license plate and glass plate mounted in said frame.

1,667,127. VULCANIZATION OF TIRE CASINGS. GEORGE J. MEAD, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed July 26, 1926. Serial No. 125,063. 2 Claims. (Cl. 18—45.)



1. A cord tire vulcanizing core of less cross section than the interior cross section of the casing to be vulcanized thereon, an annular cavity within the core, openings from said cavity to the surface of the core, a fluid pressure conduit opening from the inner circumference of the core to said cavity and a second conduit opening from the inner circumference of the core to the outer circumference thereof.

1,667,128. RADIATOR OVERFLOW. LEE B. METTLER, Los Angeles, Calif. Filed Jan. 12, 1925. Serial No. 1,952. 1 Claim. (Cl. 116—117.)

A radiator overflow indicator comprising a cap having an opening therethrough for communication with the radiator and for the extension therethrough of the upper end of the overflow pipe of the radiator, a transparent element surmounting the cap and enclosing the end of the overflow pipe, and a securing device for said element arising from the cap from a point thereon within said closure element, said securing device comprising a pair of upright legs and a bridge connecting the tops of said legs, a screw threaded pintle projecting upwardly from the central portion of said bridge, a head having an aperture through which said pintle projects, and a nut adapted to screw onto said pintle to clamp said head down upon the transparent element for the purpose of holding the latter in place.

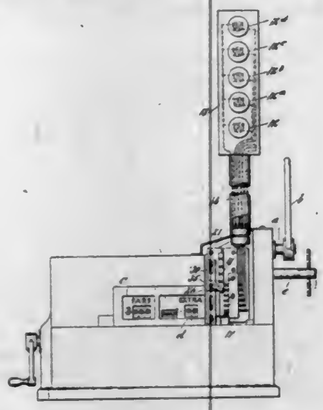
1,667,129. MOLD-ALIGNING MEANS. THOMAS MIDGLEY, Hampden, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Mar. 5, 1925. Serial No. 13,100. 2 Claims. (Cl. 18—42.)

1. A centering means for a split tire mold in which a plurality of centralizing units are used, each having but two sets of mating bearing surfaces, one to limit radial movement in but one direction and the other to limit circumferential movement in but one direction, said units being all located to one side of a diametrical plane through the mold.

1,667,130. TRIPPING DEVICE FOR POWER-LIFT PLOWS. WILLIAM L. PAUL, Berkeley, Calif., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Dec. 5, 1925. Serial No. 73,388. 12 Claims. (Cl. 97—47.)

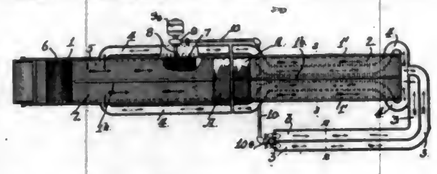
1. The combination with a tractor and a vehicle drawn thereby embodying mechanism adapted to be tripped into or out of operation, of tripping means mounted on the tractor having a tensioned connection with said mechanism.

5. The combination with a wheeled plow pivotally attached to a tractor and having self contained mechanism



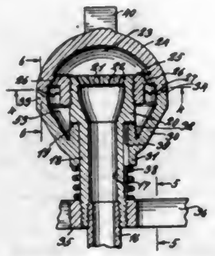
actuable to raise the plow and hold it out of operation, a tripping device, including a lever operative to release the plow to fall to the ground or to cause said mechanism to raise the plow, of means, mounted on the tractor, having a tensioned connection with said lever and operable at will to rock the same and actuate the tripping device.

7. The combination with a wheeled power lift plow having a tripping device and pivotally attached to a tractor, of a rocking mechanism mounted on the tractor, a flexible connection from said mechanism to the tripping device, means operable to rock said mechanism to actuate the tripping device, and means to hold said connection under constant tension.



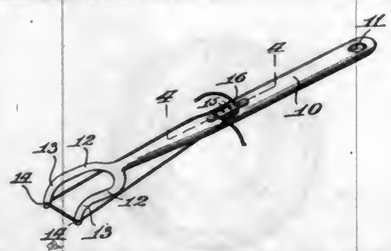
12. The combination with a wheeled power lift plow having a tripping device and pivotally attached to a tractor, a rockable mechanism mounted on the tractor including a vertically disposed crank shaft, a bearing in which the crank shaft is mounted, a support for said bearing secured on the tractor, a toothed sector rigidly secured on the shaft, a pulley on the upper part of said shaft, a cable leading over the pulley having one end secured to the plow and the opposite end attached to the tripping device, and a coiled spring fastened to said support and to the sector, the contractive force of said spring exerted to hold the cable under constant tension.

1,667,131. ANNUNCIATOR FOR TAXIMETERS. FRANK SAWYER, Boston, Mass., assignor to Ohmer Fare Register Company, Dayton, Ohio, a Corporation of New York. Filed Oct. 12, 1923. Serial No. 668,164. 8 Claims. (Cl. 235—30.)



1. In combination, a taximeter which includes a manually movable registering member, operable by a driver to register the number of passengers on board on a given trip; an annunciator including a plurality of normally inactive signals corresponding in number to the number of passenger seats in a vehicle, and means operable by the movements of said registering member to render said signals successively active, the arrangement being such that the number of passengers registered by the driver may be indicated to an inspector outside the vehicle, and compared with the number seen in the vehicle.

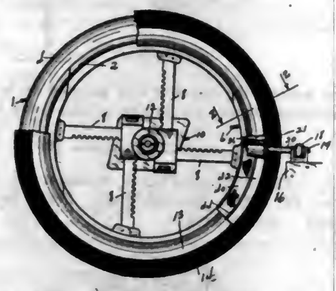
1,667,132. HANDLING FRUIT. PAUL A. SCHERER, Medford, Oreg. Filed Apr. 11, 1927. Serial No. 182,921. 14 Claims. (Cl. 146—194.)



12. A fruit-handling apparatus comprising a frame fitted with a treating element; a conveyer carried by said frame and adapted to advance the fruit through the treating element; a plurality of separate flowing liquid streams to receive the fruit allotted to each, each of said streams reaching and flowing over a separate area of the receiving end of the conveyer and each adapted to deliver its allotment upon its respective area; and means in association with said conveyer to maintain the individuality of each allotment.

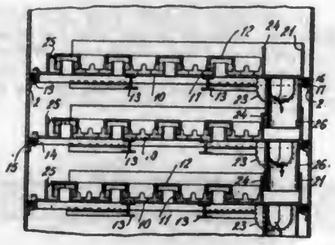
1,667,133. GAS BURNER. HAROLD D. SCHRADER, Denver, Colo. Filed Oct. 21, 1926. Serial No. 143,093. 10 Claims. (Cl. 158—99.)

1. A gas burner having a hollow hub member whose outer end is closed by a perforated partition, a hollow tip secured to the outer end of said hub and cooperating with the partition to form an expansion chamber, a frustoconical member secured to said hub portion and cooperating with the hub and with the tip member to form a second expansion chamber, the first mentioned chamber being connected with the interior of the hub and with the second expansion chamber by means of a plurality of openings, the walls of the second chamber having a plurality of openings connecting the second chamber with the atmosphere.



1,667,134. DENTAL FLOSS HOLDER. LESTER L. SHERWOOD, Los Angeles, Calif. Filed June 22, 1927. Serial No. 200,599. 2 Claims. (Cl. 132—91.)

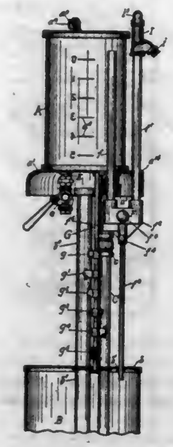
1. A dental floss holder comprising a handle, the forward end of which is bifurcated to provide a pair of spaced arms, the outer portions of which are curved in the same direction, the outer edges of the ends of the curved portions of said arms being provided with notches



that occupy a plane parallel with the plane occupied by the handle and a plate of thin, resilient material secured on the handle to the rear of the bifurcated forward end thereof, the end portions of which plate are spaced apart from the surface of the handle.

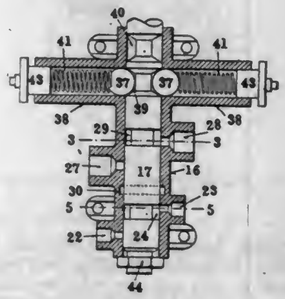
1,667,135. TIRE-BUILDING MACHINE. GEORGE F. WIKLE, Milwaukee, Wis. Filed Mar. 19, 1924. Serial No. 700,395. 10 Claims. (Cl. 154—10.)

1. A device of the character described comprising a rotatable core, a resilient roll, freely rotatable upon a shaft, and adapted to be positioned against the side of a tire carcass supported on said core, and a tension roll and a guiding device supported by said shaft.



1,667,136. GAS AND LIQUID CONTACT APPARATUS. CLIVE M. ALEXANDER, Tulsa, Okla. Filed Nov. 27, 1926. Serial No. 151,067. 11 Claims. (Cl. 261—114.)

1. An improved bubble tower comprising a vertically arranged container having a series of plates supported therein in spaced relation, said plates being sealed with the walls of the container so as to form a series of compartments intermediate successive plates of the series, means for receiving a liquid at corresponding points in a vertical line on the upper surface of each of said plates and for flowing a stream of the liquid therefrom across each of the plates in the series in the same direction, means for contacting liquid on the surface of said plates with a gas or vapor rising upwardly therethrough, means for returning the liquid in compact streams in free communication with the vapor space of the compartment immediately above each of said plates to a point on said plates near said receiving means and for discharging the liquid therefrom through each of said plates to the receiving means for the next lower plate of the series.

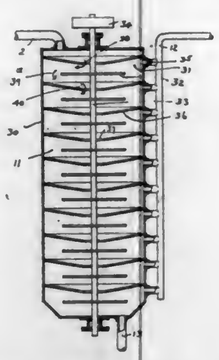


1,667,137. LIQUID MEASURING AND DISPENSING APPARATUS. LINNAEUS E. BAKER and CARROLL L. MERRIMAN, Fort Wayne, Ind., assignors to Wayne Company, Fort Wayne, Ind., a Corporation of Indiana. Filed July 24, 1924. Serial No. 727,987. 9 Claims. (Cl. 221—100.)

1. In combination with a liquid measuring and dispensing apparatus having an elevated container from which liquid is dispensed, a U-tube slidably adjustable in a vertical plane and having branches of substantially the same height and having the inlet branch open at the

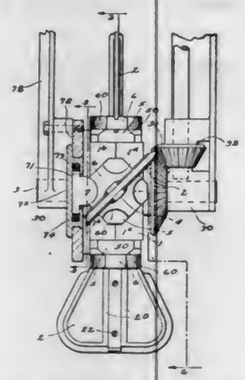
top, a stuffing box in the bottom of said container through which said inlet branch passes, said inlet branch terminating within said container, the outlet branch of said U-tube being formed for use in serving customers.

1,667,138. VALVE MECHANISM. FRANK S. BARES, St. Louis, Mo. Filed Apr. 6, 1925. Serial No. 20,941. 3 Claims. (Cl. 103—227.)



1. In a device of the class described, the combination with a valve casing provided with ports, of a valve for controlling said ports, and provided with a stem, a spring carried by said stem, means engaging said spring to move the stem, and restraining means for the valve comprising a pair of oppositely disposed spring pressed balls free to rotate and engaging with a recess in the valve.

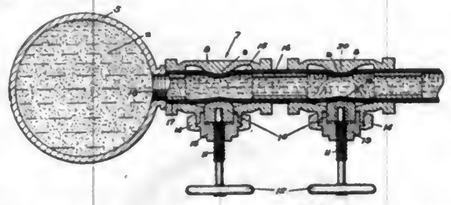
1,667,139. GAS SEPARATOR. JOHN F. BORDEN, Alameda, Calif., assignor to Oliver Continuous Filter Company, Oakland, Calif., a Corporation of California. Filed Mar. 20, 1924. Serial No. 700,494. 1 Claim. (Cl. 183—3.)



Apparatus of the character described comprising a vertically arranged cylinder with means at its upper end for controlling the admission of fluid thereto, a series of spaced shelf partitions within the cylinder each slanted downwardly and with an opening through the lowest por-

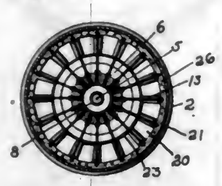
tion, a spreader disk positioned between each pair of shelves adapted to spread material passing through the opening of one shelf to the outer portion of the next shelf,

means for rotating the spreader disks, and means for applying a suction just below the highest portion of each shelf.



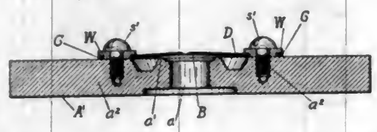
1,667,140. FEATHERING PADDLE WHEEL. EPHRAIM JAMES CLARK, Seattle, Wash. Filed Nov. 15, 1926. Serial No. 148,461. 7 Claims. (Cl. 170—110.)

1. A feathering paddle wheel comprising a rotative hub, a plurality of paddles radiating from said hub and each journaled in said hub for rotation about an axis extending radially of the hub, a quadrangular cam secured to and rotative with each paddle, and having a notch entering each corner, a fixed cam engageable with a notch of each of said rotative cams in turn, as the paddles corresponding to the respective rotative cams reach the end of their power stroke, to turn said paddles through a quarter revolution into feathering position, and a second fixed cam also engageable in turn with a succeeding notch in the said rotative cams, as the corresponding feathering paddles reach a position corresponding to the start of a power stroke, to turn said paddles in the same direction as the first fixed cam, and through a quarter revolution, into working position.



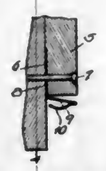
1,667,141. VALVE. JOSEPH P. CROWLEY, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed June 22, 1925. Serial No. 38,637. 3 Claims. (Cl. 251—5.)

1. A valve of the character described comprising a housing, a compressible member running through said housing, means for compressing said member, and bushings arranged within the housing at opposite ends thereof for securing said member in place, one of said bushings



extending beyond the housing and adapted to be engaged with a suitable support for retaining said valve in desired position.

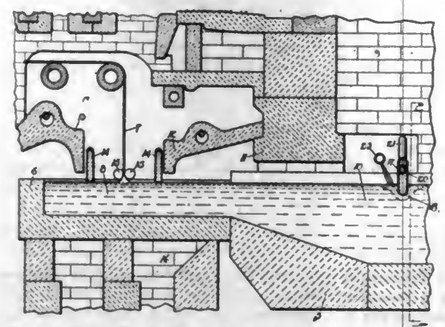
1,667,142. THERMOCOUPLE. WILLIAM A. DARRAH, Chicago, Ill. Filed Feb. 24, 1925. Serial No. 11,261. 5 Claims. (Cl. 136—4.)



1. A thermo electric couple consisting of two metals of granular form interlocked with an insulating support.

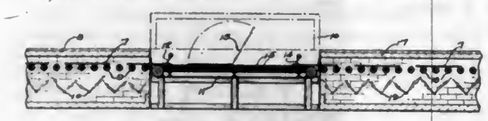
1,667,143. DISCHARGE VALVE FOR ICE-MACHINE COMPRESSORS. EDWARD R. DE LUIZ and HARRY L. MITCHELL, Fort Wayne, Ind., assignors to Wayne Company, Fort Wayne, Ind., a Corporation of Indiana. Filed July 11, 1927. Serial No. 204,780. 8 Claims. (Cl. 251—119.)

1. In a relief valve mechanism a resilient plate valve whose mid-portion covers the port, superimposed means adapted to progressively conform to the shape of said valve as flexed for limiting the flex of said valve and means for holding said valve down at both ends but without clamping it so as to permit said valve to make sliding adjustment longitudinally at the ends when said valve is flexed.



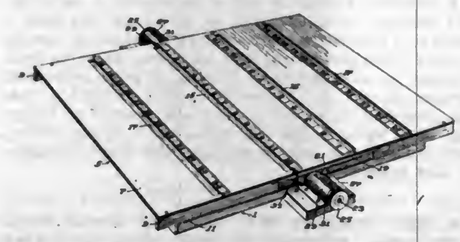
1,667,144. WEATHER STRIP. WILLIAM J. DENNIS, Chicago, Ill. Filed Apr. 11, 1924. Serial No. 705,834. 1 Claim. (Cl. 20—69.)

A weather strip comprising an integral metal strip having a longitudinal base portion, an intermediate portion extending from said base and forming a sharp angle



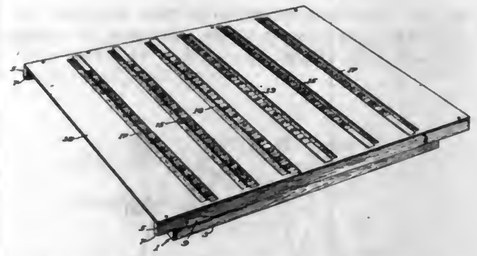
therewith, the free end of said intermediate portion bent sharply upon itself outwardly and backwardly forming a narrow portion of double thickness, and an arcuately formed outer portion extending from said portion of double thickness, the free end of said outer arcuate portion stopping short adjacent said sharp angle of said base and intermediate portions.

1,667,145. DRAWING SHEET GLASS. HUGO N. DIEDERICHS, Charleston, W. Va., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed May 5, 1924. Serial No. 710,991. 6 Claims. (Cl. 49—17.)



2. Means for providing a deeper flow of conditioned glass from a producing tank to a sheet drawing means, comprising a metallic heat-absorbing body positioned in the path of flow of the surface strata of the molten glass, in combination with means for reheating the surface glass after passing under the heat-absorbing body.

1,667,146. SHEET OF GLASS AND PROCESS OF PRODUCING THE SAME. JOHN L. DRAKE, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Mar. 27, 1926. Serial No. 97,000. 13 Claims. (Cl. 49—79.)

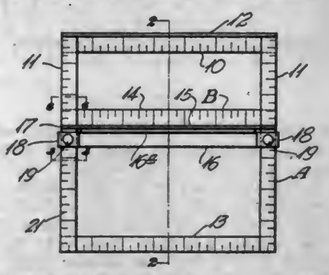


11. The process of producing polished sheet glass, consisting in grinding both surfaces of a sheet of glass, passing the ground sheet through a heating chamber, fire-polishing one side of the sheet, then turning the sheet over and fire-polishing the second side, and then cooling said sheet.

1,667,147. GAME. SYDNEY TEMPLETON FARRELL, Newton, Mass. Filed Jan. 23, 1925. Serial No. 4,222. 12 Claims. (Cl. 273—93.)

1. In a game, a chart having numerous plays described thereon, an adjustable slide over the chart having elongated apertures and numbers along and adjacent to said apertures, said slide being adjustable in response to each new play condition to disclose through said apertures only plays on the chart which are possible while such play condition exists.

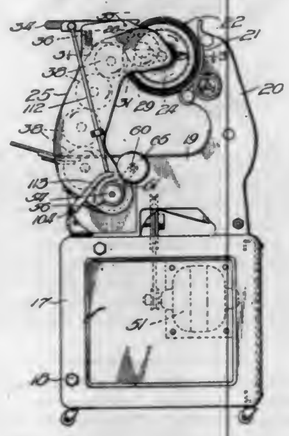
1,667,148. FOOTBALL GAME. SYDNEY TEMPLETON FARRELL, Newton, Mass. Filed Jan. 23, 1925. Serial No. 4,221. 10 Claims. (Cl. 273—94.)



1. In a football game, the combination of a chart having arranged thereon groups of descriptions of football plays corresponding to a number of different game conditions, the plays of each group being suitable for a particular game condition, means cooperating with said chart for selecting any one of said groups of plays; a dial separate from said chart having characters thereon corresponding to the number of plays in any one of said groups, and a pointer adapted to be spun and come to rest at any one of said characters to indicate which play of the selected group is to be made.

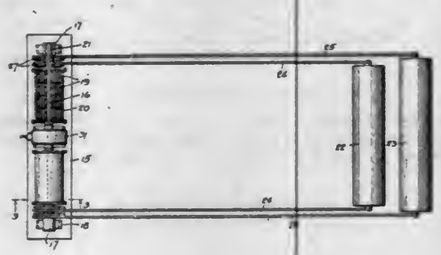
1,667,149. ACOUSTIC DEVICE. ERWIN GERLACH, Berlin-Siemensstadt, Germany, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany, a Corporation of Germany. Filed Nov. 5, 1926, Serial No. 146,333, and in Germany Aug. 11, 1925. 18 Claims. (Cl. 179—116.)

4. In a device of the character described, a diaphragm consisting of two curved portions, a U-shaped rib into which extend the adjacent edges of said diaphragm portions, said rib being free to vibrate in a direction transverse to its length, and electrical means associated with said rib.



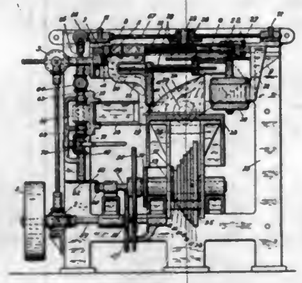
1,667,150. DRESSMAKER'S GAUGE AND CREASER. MINNIE GRIFFITH, Almira, Wash. Filed May 7, 1927. Serial No. 189,472. 3 Claims. (Cl. 33—80.)

1. A dressmaker's gauger and creaser, comprising a rectangular frame having a ruling edge fixed at one end thereof, an upstanding cross member adjustably and slid-



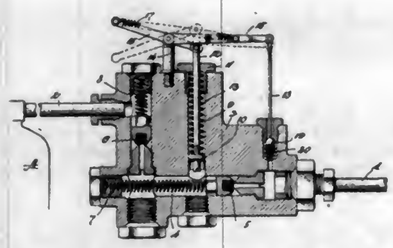
ably mounted on said frame parallel relative to said ruling edge, a straight edge dependent from said cross member, said straight edge extending towards said ruling edge and also being spaced from and beneath said frame, and an upstanding creaser edge mounted on said frame parallel to and adjacent to said ruling edge.

1,667,151. DRIVING MECHANISM FOR IRONING MACHINES. CHRISTOPHER GROEN, Algonquin, Ill. Filed Aug. 25, 1924. Serial No. 733,930. 19 Claims. (Cl. 68—9.



1. In an ironing mechanism, a shoe and a rotatable roll, a movable feed board adjacent to the roll, mechanism for effecting relative bodily movements between the shoe and the roll, mechanism for rotating the roll, and means controlled by movements of said feed board for setting said mechanisms into operation.

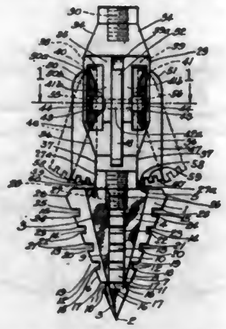
1,667,152. WAVE MOTOR. MARTIN HEGGE, Los Angeles, Calif. Filed May 19, 1926. Serial No. 110,227. 2 Claims. (Cl. 185—30.)



1. In a wave motor, a spring motor unit including a shaft, a drum comprising an open ended cylinder and heads closing the ends of the cylinder and rotatably mounted on the shaft, one of the heads having an axial extension to provide an elongated hub on the shaft, a plurality of coil springs in the drum having their outer ends fixed to the cylinder and their inner ends fixed to the shaft, pinions fixed to the hub, ratchet rings rotatably mounted on the hub and formed internally with teeth to provide gears, planetary pinions meshing with said gears and pinions, arms fulcrumed on the hub and adapted to be oscillated by floats, and pawls carried by the arms and engaging the ratchet rings, whereby oscillation of the arms will operate the pawls and thereby effect unidirectional rotation of the drums to wind the springs.

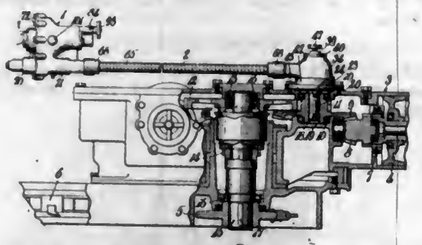
1,667,153. MACHINE FOR PRODUCING IRREGULAR SURFACES. BRUNO HEYMANN, San Francisco, Calif. Filed Aug. 14, 1924. Serial No. 732,475. 32 Claims. (Cl. 90—15.)

1. Apparatus for generating quadric surfaces comprising a stationary frame, a cutting tool and independent motor means for operating said tool, a chuck and driving connections therefor compelling the movement of said tool, a carriage slidably mounted in said frame and adapted to support raw material positioned before said tool, means constructed and adapted to move said tool and other means constructed and adapted to move said material relative to said tool whereby the material is cut in a plurality of complete horizontal ellipses whose major and minor axes are progressively changed on second degree curves.



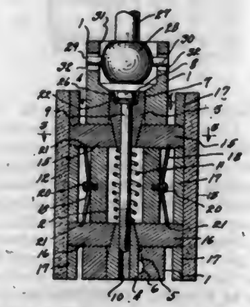
1,667,154. SAFETY VALVE. CHARLES F. HEYWOOD, Detroit, Mich. Filed Apr. 28, 1926. Serial No. 105,338. 9 Claims. (Cl. 230—27.)

1. Pressure regulating means comprising a valve device adapted for arrangement in a pressure line from a pump to a receiver, said device having a chamber therein, a relief valve permitting when open free discharge from a pump to eliminate load thereon, a pressure-movable member exposed to the pressure in said chamber, a linkage extending from said member and adapted to engage said relief valve to open the same, and a spring backing said member and adapted to resist the normal pressure in said chamber.



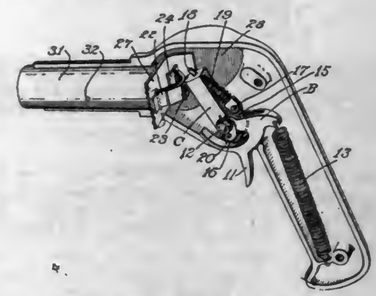
1,667,155. DRILLING BIT. ZALMON B. HODON, Ponca City, Okla. Filed Mar. 18, 1927. Serial No. 176,396. 5 Claims. (Cl. 255—76.)

5. A drilling bit comprising an initial cutting portion of inverted conical form, and a series of sets of cutting arms of varying lengths pivotally mounted above said initial portion with their pivots in substantially the same horizontal plane, some of said arms being mounted for



greater outward throw than others, each of said sets being adapted to cut next adjacent the swath cut by the next preceding set.

1,667,156. DRILLING TOOL. MORRIS P. HOLMES, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Oct. 2, 1925. Serial No. 60,076. 35 Claims. (Cl. 255—47.)



1. In a drilling tool, a power driving element, cooperating gearing driven thereby, a flexible transmisson shaft driven by said gearing, a swivel mounting for said flexible shaft coaxial with one of said gears, and a drilling tool driven by said flexible shaft.

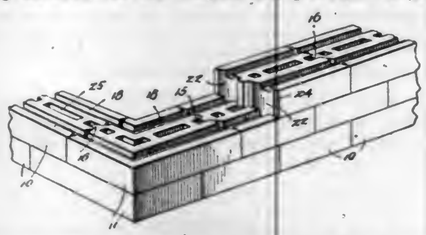
1,667,157. CYLINDER GRINDER. MARSDEN C. HUTTO, Detroit, Mich. Filed July 18, 1925. Serial No. 44,444. 3 Claims. (Cl. 51—206.)

1. On a grinding tool, an apertured body member, a pair of cones therein, a rod on which the cones are mounted in spaced relation, said rod being threaded at one end and provided with a head at the other, one of said cones being threaded to receive the threaded end of the rod, means for preventing rotation of the threaded cone relative to the rod, the other of said cones being free to turn on the rod, said last named cone having a recess in its larger end for the head of the rod, a friction device for preventing the relative turning of the rod and said last named cone consisting of a spring wire extending through an aperture of the said head and having its free ends engaging the side wall of the recess, and a spring between the cones tending to move the free cone to maintain the head and spring in position in the recess therein.

1,667,158. ELECTRIC SWITCH. CLIFFORD E. IVES, Chicago, Ill. Filed Apr. 28, 1924. Serial No. 709,468. 13 Claims. (Cl. 200—157.)

3. An electric switch comprising a finger trigger pivotally mounted at one end, a contact operating yoke pivotally mounted at one end, a lever pivotally mounted and having a free end connected with the yoke by a spring and adapted to swing back and forth to place the spring beyond a neutral point whereby the yoke snaps from a normal to an alternate position and vice versa, and a connection between the trigger and lever to operate the latter whereby when the trigger is pulled the lever and yoke are moved to an alternate position, and a spring acting upon the trigger whereby it remains pulled while pressure is held thereon but automatically restores to restore the yoke when the pressure is removed.

1,667,159. SHOE. GEORGE A. JONES, Lynn, Mass., assignor to Shoe Products, Inc., Lynn, Mass., a Corporation of Massachusetts. Filed Dec. 24, 1926. Serial No. 156,928. 3 Claims. (Cl. 36—37.)



1. In a shoe, the combination of an insole having a hole in the heel portion thereof, and a rubber cushion comprising a thin diaphragm having a collar projecting from the lower face of the diaphragm into said hole and of a depth substantially the same as the thickness of the sole, said diaphragm having a wide margin projecting out beyond the collar and resting upon the portion of the insloe surrounding the hole, said diaphragm being adapted to pulsate over the hole when the wearer of the shoe is walking.

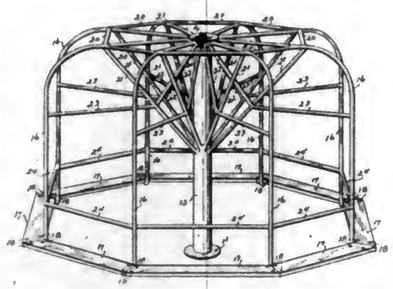
1,667,160. WALL CONSTRUCTION. EDWARD H. KLEINFELDT, New York, N. Y. Filed Mar. 30, 1927. Serial No. 179,574. 6 Claims. (Cl. 72—38.)

3. A wall construction including a plurality of courses of building blocks, each comprising laterally spaced portions joined by integral webs and defining air circulation spaces between the portions, the said blocks each having a vertical tongue at one end and a vertical groove at the opposite end for interengagement with similar elements formed on adjacent blocks, the upper face of each block portion having a longitudinal groove for the reception of

a bonding material and the lower face of each block portion having a longitudinal tongue of lesser depth than the groove to afford a space for accommodating the bonding material, the said tongues and grooves of adjacent

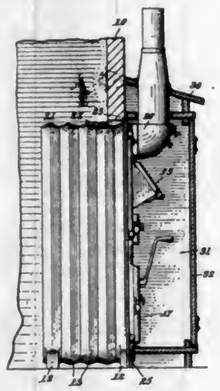
superimposed blocks adapted to interfit, the upper portion of the tongues being of a size to snugly fit the grooves for insuring proper alinement of the outer surfaces of the blocks.

1,667,161. GARMENT. MORRIS KOSOFSKY, New York, N. Y., assignor to Kenilworth Manufacturing Co. Inc., New York, N. Y., a Corporation of New York. Filed Aug. 17, 1926. Serial No. 129,697. 1 Claim. (Cl. 2—77.)



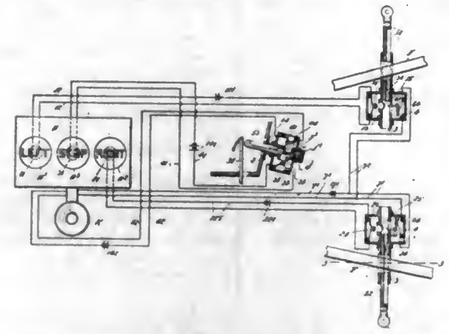
A woman's athletic garment of the middy blouse type comprising a loose body consisting of front and back sections, and a band connecting said sections with each other and consisting of relatively inelastic portions and an elastic knit insert permanently secured to the same, and located in said band so as to normally lie in approximate registry with the base of the spine when the garment is worn, said band being arranged to pass between the legs of the wearer to maintain the body of the garment in position on the wearer and having its opposite edges curved to fit the thighs at the crotch.

1,667,162. SIZE MARKER FOR HATS. JOHN P. KUHNS, Dayton, Ohio, assignor to National Tag Manufacturing Corporation, Dayton, Ohio, a Corporation of New York. Filed May 15, 1926. Serial No. 109,440. 3 Claims. (Cl. 40—5.)



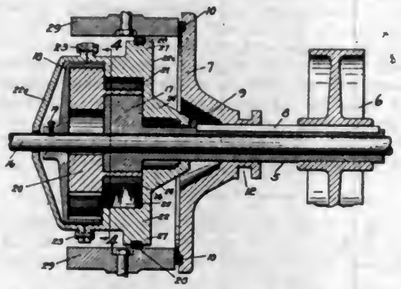
1. A hat marker of the character described comprising a blank having parallel sections each having a size mark at each end of each side thereof, said sections being foldable alternatively to expose the marks on either side of either section.

1,667,163. MERRY-GO-ROUND. RALPH FRANKLIN LAMAR, Garden City, Kans. Filed Feb. 18, 1927. Serial No. 169,222. 5 Claims. (Cl. 272—33.)



1. In a device of the class described, an axle designed to be held in a vertical position by having one of its ends buried in suitable material, a single hub member rotatably mounted on and embracing the major portion of the length of said axle, radially extending arms from the upper portion of said hub member first outwardly and then downwardly, a platform secured to the free ends of said arms, and braces leading from said supporting arms to a point on the center portion of said hub member that is of a height greater than that of the said platform.

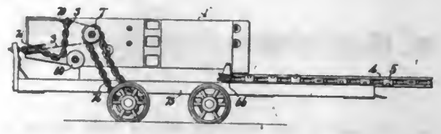
1,667,164. HEATING APPARATUS. ARCHER A. LANDON, Buffalo, N. Y. Filed Mar. 10, 1924. Serial No. 697,995. 5 Claims. (Cl. 126—58.)



1. The combination of a structure to be heated having an opening in a wall thereof, with a heating apparatus of smaller outline than that of said opening and comprising a plurality of connected sections adapted to confine a heating fluid; the back and intermediate sections thereof extending freely through said opening and into said structure, and a front section extending without said structure and having openings in its exposed portion, a peripheral flange extending entirely around an exposed portion of said heating apparatus for securing said heating apparatus, as a whole, in position partly within and partly without said structure, and for sealing the space between said heating apparatus and the edge of the opening surrounding the same whereby to prevent communication between the interior of said structure and the interior of said heating apparatus by way of said space and the openings in said front section, substantially as specified.

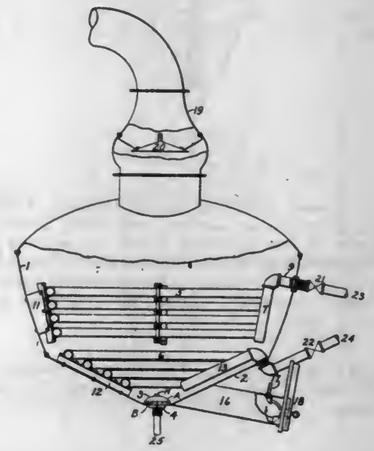
1,667,165. AUTOMOBILE SIGNAL. LETTERIO MARTINO, Everett, Mass. Filed Jan. 24, 1922. Serial No. 531,383. 1 Claim. (Cl. 200—16.)

In a vehicle electric signal system, a switch box containing two normally open switches, one of which comprises a two-armed, spring-pressed lever, and the other of which comprises a ball, combined with a slide rod having a member to engage one arm of said lever, and having also a rounded shoulder part to engage said ball; whereby both of said switches may be closed, to render two signals operative, by a longitudinal movement of said slide rod.



1,667,166. VARIABLE-SPEED TRANSMISSION. FRANCIS L. ORR, Denver, Colo. Filed Nov. 29, 1924. Serial No. 752,978. 18 Claims. (Cl. 74—34.)

1. In variable speed transmission, the combination with a driving element and a driven element, of motion transmitting differential gearing including a rotary control element, an eccentric on the driving element, an internal gear wheel on the driven element and an external gear wheel, means for transmitting motion from the eccentric to the external gear wheel in the circle of the teeth of the internal gear wheel, a motion transmitting member rotating with the driving element, yieldable means for urging the motion transmitting member in one direction, said member and control element having cooperative means for their conjunctive rotation in a determinate position of the member, an adjustment including a rotatable member engaging the motion transmitting member and the controlling element to transmit motion to the latter at a selective speed ratio, and means controlled by said control element for controlling the rotation of the external gear.



1,667,167. MINING MACHINE. CHARLES F. OSGOOD, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed June 18, 1923. Serial No. 646,000. 36 Claims. (Cl. 262—30.)

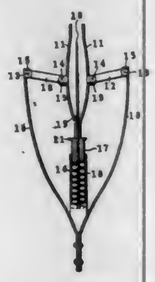
1. In a mining machine, a frame slidable on its bottom on the mine bottom during cutting and having cutting mechanism projecting from one end thereof, a motor driving said cutting mechanism, variable speed mechanism driven wholly by said motor and having a terminal element rotatable by said motor at different speeds, and feeding means disposed to the rear of said

cutting mechanism and driven by the terminal element of said variable speed mechanism, said feeding means including a plurality of independent planetary gearings and being operable to feed said machine in a direction parallel to the working face during cutting.

1,667,168. STEAM TURPENTINE STILL. JESSE O. REED, Paxinos, Pa., assignor to the Government and the People of the United States of America. Filed July 28, 1927. Serial No. 209,094. (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L., 625.) 2 Claims. (Cl. 203—3.)

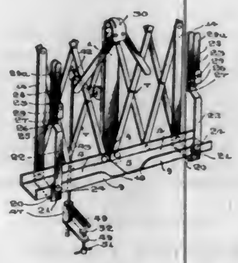
1. In a turpentine still, a jet for introducing steam into the bottom of said still, said jet comprising a head having a plurality of radial passageways communicating with a vertical central passageway, a valve in said head between said radial passageways and said central passageway, a steam supply pipe communicating with said central passageway, said valve so arranged as to be operable by pressure in the said steam line to permit communication between said central and said radial passageways.

1,667,169. BOILER-TUBE CLEANER. PETER RUCK, Brooklyn, and MICHAEL SCHUTZ, New York, N. Y., assignors to Saul Lewis, New York, N. Y. Refiled for abandoned application Serial No. 548,091, filed Mar. 30, 1922. This application filed June 7, 1927. Serial No. 197,207. 3 Claims. (Cl. 15—104.18.)



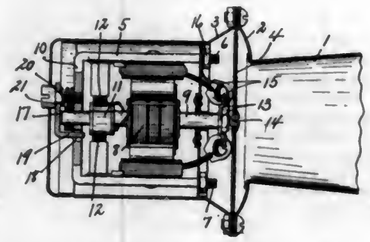
1. As a new article of manufacture a boiler tube cleaner including a body, a head comprising a cylindrical shell, one end of which is attached to the body, the shell being longitudinally slotted from its other end

throughout the major portion of its length to define a plurality of integrally connected spring fingers, the free ends of which are turned inwardly and of general sectoral shape cooperatively defining an annulus having a relatively small central opening therein, arcuate scraper



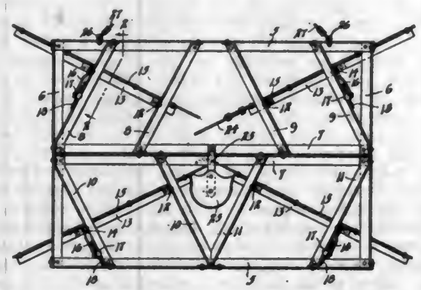
plates attached to the inwardly turned ends of the fingers and including scraping edges extending radially therebeyond, and a spring pressed conical spreader normally urged through the central opening to expand the blade carrying fingers.

1,667,170. TWEEZERS. SAMUEL SEGAL, New York, N. Y. Filed Apr. 15, 1924. Serial No. 706,644. 16 Claims. (Cl. 128—354.)



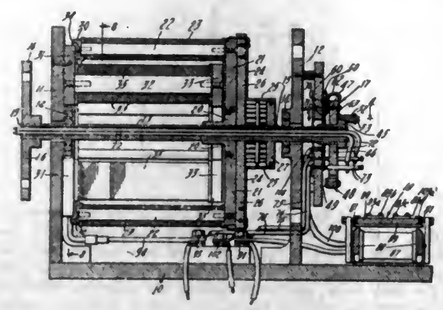
1. A tweezer, including, in combination, a pair of gripping jaws, means mounting said jaws, means forming a part of said mounting means for resisting bodily rearward movement thereof, and means for moving said jaws into gripping position and subsequently forcing the same bodily rearwardly against the resistance of said means.

1,667,171. BOOK REST. FRANK DAVID SHOLIN, Portland, Oreg. Filed Jan. 13, 1927. Serial No. 160,902. 8 Claims. (Cl. 45—58.)



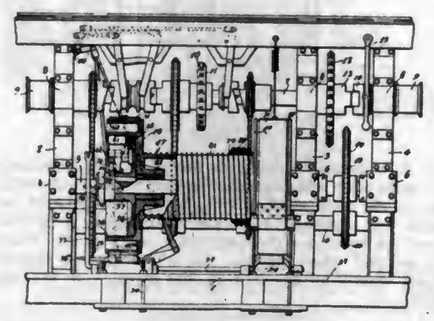
1. A rest of the character described including a holder frame having a back comprising a middle supporting member, a pair of end bars, extensible and contractile means connecting said end bars with said middle member, and a base comprising a pair of sections pivotally connected at their inner ends with the lower part of said middle member on the back so that said base sections may swing vertically substantially from the plane of said middle member to positions to extend substantially at right angles with said middle member, and vice versa, said end bars having forward extensions at their lower ends for supporting the outer end portions of said base sections when said base sections are disposed substantially at right angles with said middle member of the back, said forward extensions having up-turned front end portions, and retaining arms pivotally connected with said up-turned end portions of the forward extensions.

1,667,172. SIGNALING DEVICE. WILLIAM SPARKS, Jackson, Mich., assignor to The Sparks-Withington Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 27, 1922. Serial No. 609,333. 4 Claims. (Cl. 308—166.)



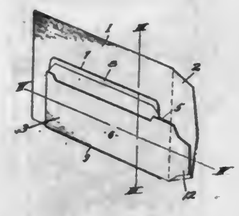
1. An apparatus of the character described comprising a case section, a shaft journaled in said case section, and means for adjusting said shaft comprising an adjusting bar at the rear of said case section and having a portion in contact with the end of said shaft, a flange on said adjusting bar engaged with the case section at one side of said shaft, a rotary adjusting member engaged with the adjusting bar and having a threaded engagement with the case section on the side of said shaft opposite said flange, and a spring interposed between the adjusting bar and the case section.

1,667,173. ROAD SCRAPER. ROY E. STEWART, Brentford, S. Dak. Filed Mar. 27, 1926, Serial No. 97,883. Renewed Mar. 15, 1928. 7 Claims. (Cl. 37—148.)



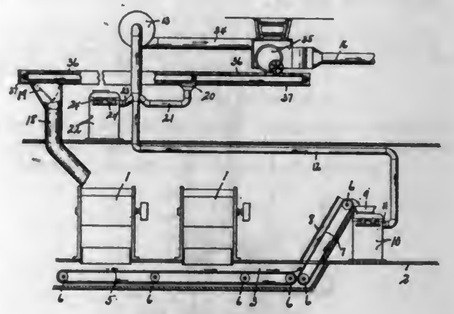
1. A road drag or scraper having in combination, a frame, a pair of blades diverging forwardly toward their outer ends and separated in overlapping relation at their inner ends, means for swinging said blades about horizontal axes and for holding said blades in various positions, a pair of blades diverging rearwardly toward their outer ends in the rear of said first mentioned blade and means for swinging said latter blades about horizontal axes and for holding said blades in various positions.

1,667,174. OSCILLATING SIGNAL. ROBERT R. THOMPSON, Los Angeles, Calif.; Mary W. Thompson executrix of said Robert R. Thompson, deceased. Filed Nov. 22, 1919. Serial No. 339,788. 4 Claims. (Cl. 177—329.)



1. In a device of the character described, an oscillatable system balanced in substantially neutral equilibrium and including a signal member, means mounting said system for oscillation, and electro-magnetic means for oscillating said system including a rotary motor having an inner field of small diameter and an armature of large diameter mounted for oscillation around said field, said armature forming a part of said oscillatable system.

1,667,175. CLUTCH FOR THREE-SPEED DRAW WORKS. EDWARD TIMBS, Los Angeles, Calif., assignor to Union Tool Company, Torrance, Calif., a Corporation of California. Original application filed Apr. 21, 1924, Serial No. 707,937. Divided and this application filed Sept. 14, 1925. Serial No. 56,257. 5 Claims. (Cl. 192—77.)

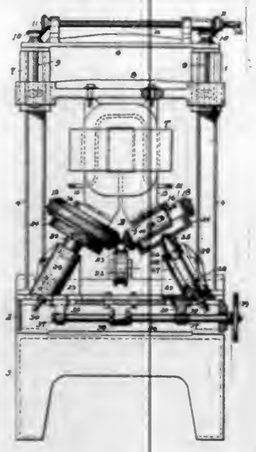


1. In a rotary drawworks, the combination of a frame, a drum-shaft mounted on the frame, means for driving the drum-shaft, a drum loose on the drum-shaft and having a head with a projecting flange, a friction clutch member with a disc rigidly secured to the drum-shaft and having a shoe in the form of a single expansion ring to engage the inner side of the flange, said ring being fixed at one end only on the disc and extending uninterruptedly along substantially the entire circumference of the flange to constitute a friction clutch, a rocker pin mounted on the disc, a rocker on the pin attached to the other end of the expansion ring, means for adjustably guiding the rocker pin on the disc to regulate the pressure of the ring on the flange, and means for actuating the rocker to move the expansion ring to close the clutch.

1,667,176. DUPLEX ENVELOPE. ADAM F. TORRANCE, Kansas City, Mo. Filed May 24, 1926. Serial No. 111,111. 2 Claims. (Cl. 229—72.)

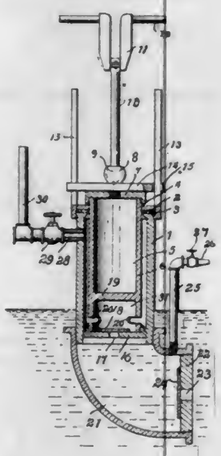
1. The combination of an envelope having a closing flap, of a smaller envelope superimposed upon the face of and fastened to the larger one and provided with top and bottom opening and a sealing flap for each of said openings, the top flap folding over the front face of the small envelope to seal the top opening and the bottom flap folding upon the back of the large envelope to seal the bottom opening.

1,667,177. COTTON-TREATING APPARATUS. HARRY W. TROUT, Syracuse, N. Y., assignor to Cotswold Comfortable Company, Syracuse, N. Y., a Corporation of New York. Filed May 13, 1926. Serial No. 108,793. 4 Claims. (Cl. 19—107.)



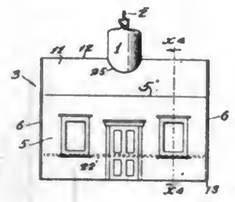
1. An apparatus for recovering from and supplying cotton to Garnett machines comprising in combination with a plurality of Garnett machines, of a continuous channel extending under all of said machines, means in said channel for conveying cotton escaping from the Garnett machines, a separator for receiving the recovered cotton from said conveying means, mechanical means in the separator for breaking up the cotton, a fan connected to the separator for producing a suction therein and for withdrawing the separated cotton from the separator and mechanism for receiving the cotton from the fan and re-supplying it to the Garnett machine.

1,667,178. ELECTRICAL WELDING APPARATUS. ISADORE J. VAN HUFFEL, Warren, Ohio. Original application filed Apr. 14, 1926, Serial No. 101,885. Divided and this application filed Oct. 13, 1926. Serial No. 141,291. 10 Claims. (Cl. 219—6.)



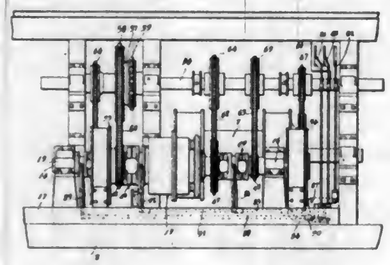
1. An electrical welding apparatus, comprising a transformer having a secondary, provided with depending ter-

minals, an independently rotatable electrode of circular form adjustably mounted opposite each terminal, and



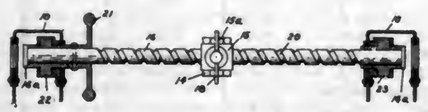
brushes for said electrodes having clamping connection with said terminals adjustable in a direction toward the circular welding portions of said electrodes.

1,667,179. PUMP. MIFFLIN H. WILDE, Martinsburg, W. Va. Filed Oct. 12, 1926. Serial No. 141,153. 2 Claims. (Cl. 103—7.)



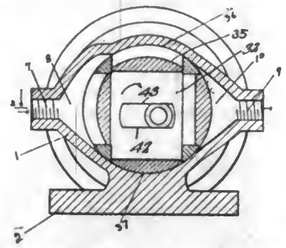
1. A pump comprising a cylinder open at its lower end and having an outlet adjacent its upper end, a head for the upper end of said cylinder, a piston extending through said head into said cylinder and adapted to move fluid into the cylinder through the open lower end thereof and force the fluid through the outlet when the piston is reciprocated, an elbow having one end connected with the lower end of said cylinder, a head removably connected with the other end of said elbow and formed with an inlet opening, an inwardly opening closure for said inlet, a valve controlled air inlet pipe leading from said elbow, and means for reciprocating said piston.

1,667,180. FIREWORKS AND BLANK FOR MAKING THE SAME. WILLIAM HENRY WILLSON, Los Angeles, Calif. Filed Sept. 20, 1926. Serial No. 136,458. 5 Claims. (Cl. 46—46.)



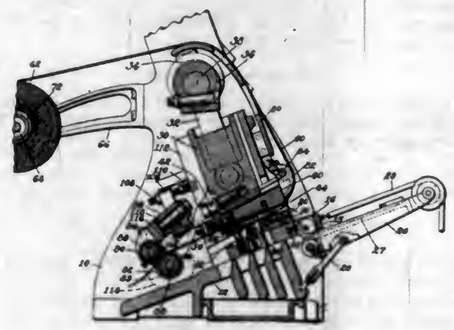
1. A piece of fire works comprising a box-like structure having a chambered base, a peaked roof and walls connecting the base and the roof; said roof having an aperture in the peak, and said base comprising a bottom plate and a floor deck; said deck having an aperture vertically below the aperture in the roof; and an upright powder holding shaft seated on the bottom sheet and extending through both apertures, and said chambered base adapted for the storage of the combustibles to be ignited by fire amanating from said shaft.

1,667,181. DIFFERENTIAL-GEAR MECHANISM. LEWIS E. ZERBE, Moneta, Calif., and MERTON T. ARCHER, Pittsburgh, Pa. Original application filed Apr. 30, 1925, Serial No. 26,880. Divided and this application filed May 11, 1926. Serial No. 108,256. 5 Claims. (Cl. 74—34.)



1. In a device of the class described, the combination of a main shaft and bearings therefor, a quill shaft revolvable on the main shaft, differential gearing between said shafts and mounted upon the main shaft, a sprocket wheel revolvable on the quill shaft, a clutch for locking the sprocket wheel thereto, and a plurality of sprocket wheels revolvably mounted on and drivable by the main shaft.

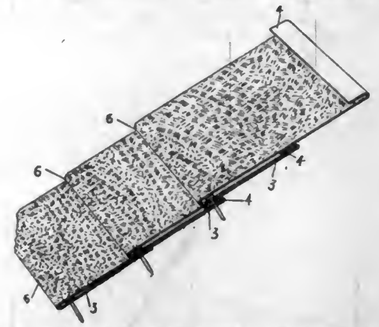
1,667,182. MOUNT FOR GUNS. HARRY C. ZIMMERMAN, Washington, D. C. Filed Oct. 4, 1927. Serial No. 223,923. (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L., 625.) 7 Claims. (Cl. 89—41.)



6. In a gun mount, a traversing screw, means for rotating the screw, a pivoted gun-carrying frame movable along the screw and a releasable connection between said frame and screw.

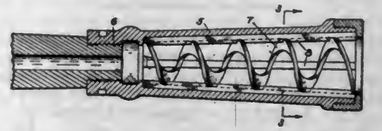
1,667,183. ROTARY PUMP. FRANK ARNOLD and WALTER RANDOLPH, Oakland, Calif. Filed June 1, 1925. Serial No. 33,972. 1 Claim. (Cl. 103—161.)

A rotary pump comprising a casing having an inlet and an outlet, a rotary cage in said casing comprising four frame members arranged so that the outer faces of the same form parts of a cylinder while their inner faces form two diametrical passages arranged transversely to one another, two U shaped elements reciprocable in the passages and arranged so that the legs of either straddle the base of the other and having outer faces complementary to those of the frame members and eccentric means engaging both elements so as to cause the same to reciprocate when the cage is revolved, the latter means comprising a concentric disc mounted with freedom of rotary adjustment and a shaft extending eccentrically therefrom into slots provided in the bases of the U shaped members.



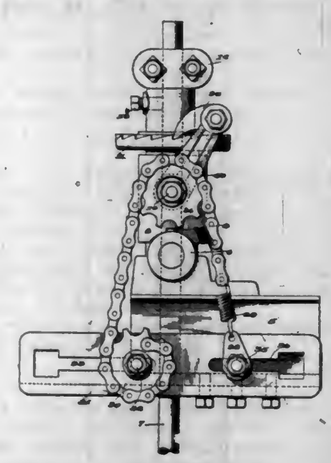
1,667,184. CUTTING MACHINE. MILTON H. BALLARD, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 30, 1925. Serial No. 5,880. 20 Claims. (Cl. 164—89.)

1. In a machine of the character described, a cutting die, a presser member adapted to force the work against the die, said presser member having an adjustable portion with a work-contacting surface, and means co-operating with the adjustable portion of the presser member to prevent overthrow due to changing conditions or a possible looseness of the operating parts, said means being constructed and arranged so that it is unaffected by adjustments of the position of the adjustable portion of the presser member.



1,667,185. ROOFING SHINGLE. WALTER E. BARTELS, Cincinnati, Ohio. Filed July 26, 1926. Serial No. 124,882. 1 Claim. (Cl. 108—7.4.)

A roofing shingle of flexible type, comprising a body portion, an underturned flange at the lower end of said body portion, said flange being of substantially half the length of said body portion, and a short upturned flange along the upper end of said body portion, said lower flange being adapted to receive a line of nails adjoining the body portion, and said upper and lower flanges being arranged to interlock and being arranged to be so positioned with respect to the next higher shingle when



laid, that the line of nails through the lower flange of said higher shingle will engage through the interlocking portions of the lower shingles.

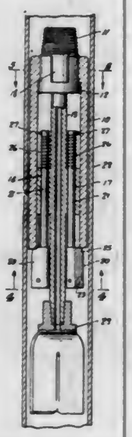
1,667,186. MUZZLE ATTACHMENT FOR GUNS. WILLIAM R. BLUEHDORN, Hartford, Conn. Filed May 31, 1927. Serial No. 195,507. 3 Claims. (Cl. 89—42.) (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L., 625.)

3. An attachment for guns embodying a casing and a helical baffle within the casing having an axial bore gradually increasing from rear to front.

1,667,187. POLISHED-ROD ROTATOR. ALEXANDER BOYNTON, San Antonio, Tex. Filed June 29, 1926. Serial No. 119,509. 8 Claims. (Cl. 255—14.)

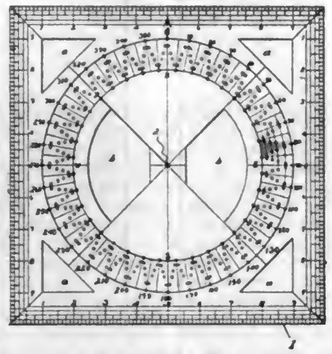
1. A polished rod rotor comprising a ratchet wheel having a hub provided with means whereby the same may be locked to a polished rod, a crank having a pawl engaged with said ratchet wheel, a sprocket wheel having connection with said crank, and a chain trained about said sprocket wheel for rocking the same.

1,667,188. HAIR CURLER. MAURICE BOXER, San Francisco, Calif. Filed Aug. 31, 1925. Serial No. 53,738. 5 Claims. (Cl. 132—33.)



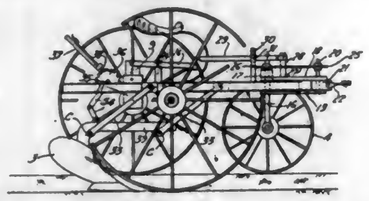
1. A hair curling device comprising a longitudinally split tapered frame on which the hair may be wound, means for resiliently retaining the frame sections together, and means for spreading the frame sections to stretch the hair.

1,667,189. SYNTHETIC RESIN. CHARLES E. BURKE and HORACE H. HOPKINS, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Apr. 28, 1927. Serial No. 187,411. 11 Claims. (Cl. 260—2.)



1. The process of producing a synthetic resin which comprises heating to reaction temperature a reaction mass containing pentacrythrite, a polybasic acid and a drying oil acid.

1,667,190. ROTARY UNDERREAMER. STEWART L. CAMPBELL, Berkeley, Calif., assignor to John Grant, Los Angeles, Calif. Filed Feb. 1, 1926, Serial No. 85,126. Renewed Aug. 12, 1927. 23 claims. (Cl. 255—75.)

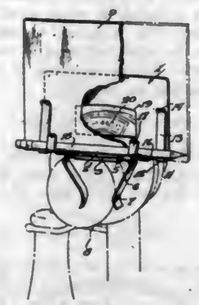


1. A tool of the character described comprising the combination of a body provided with a cutter receiving space, cutters mounted thereon for longitudinal movement and lateral swinging movement about longitudinal axes whereby they may be swung laterally so as to be retracted or so as to be protracted, said body having ways for said cutters whereby the latter are held protracted in a selected longitudinal position, and spring means tending to move said cutters longitudinally into protracted position.

1,667,191. MARINE PROTRACTOR. SAMUEL A. CHAPIN, Seattle, Wash. Filed July 6, 1926. Serial No. 120,850. 1 Claim. (Cl. 33—104.)

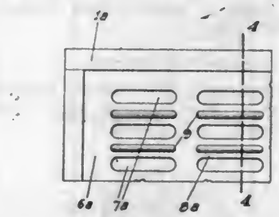
A protractor of the class described comprising a square sheet of substantially transparent material having a hole in the center of said sheet, an inner circle marked on said sheet, an outer circle spaced from and concentric with said inner circle, radial lines from one circle to the other indicating the degrees by fives, perforations on said alternate lines at the outer circle, perforations on the remaining lines at the inner circle, and perforations in line from the inner to the outer perforations to indicate divisions of one degree each.

1,667,192. SULKY PLOW. HERBERT J. CLEARY, Topeka, Kans. Filed Nov. 3, 1926. Serial No. 146,034. 2 Claims. (Cl. 97—85.)



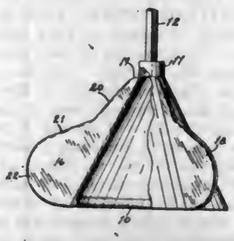
1. In a sulky plow, the combination of a frame mounted on wheels, parallel bars longitudinally and intermediately positioned in the frame, of diagonal bracing between the parallel bars and the sides of the frame, of a plow with its beam centrally positioned relative to the bars, of bars pivoted to the first of said bars and being rearwardly inclined and pivotally connected to the plow beam, and means to raise the plow so that the beam will pass between the first of said bars.

1,667,193. TELEPHONE ATTACHMENT. EDWARD COLEMAN, Oakland, Calif. Filed July 2, 1925. Serial No. 41,221. 1 Claim. (Cl. 45—82.)



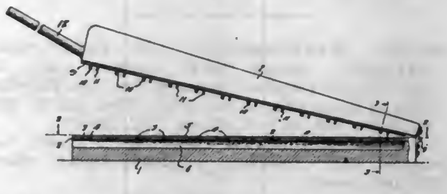
A pencil and memoranda holding attachment for telephones comprising a backing plate, a substantially flat horizontally disposed sleeve member integral with the lower edge of the plate and extending longitudinally

thereof, a resilient clamping member comprising an intermediate portion retained within the sleeve and lateral gripping fingers for embracing the mouthpiece of a tele-



phone transmitter to support the plate in upright position thereon, and pad and pencil holding means upon the plate.

1,667,194. SCREEN FOR SEPARATING ALMONDS AND HULLS. THOMAS JAMES CRAIG and ARTHUR L. SCOFIELD, Merced, Calif. Filed Mar. 3, 1926. Serial No. 91,890. 1 Claim. (Cl. 209—397.)



A screen for the purpose noted comprising a thin flat body provided with narrow slits, relatively wide webs between the slits, and upstruck curved ribs on the upper sides of the webs leaving a part of the flat plane of the webs between the edges of the ribs and the edges of the slits.

1,667,195. AGITATOR FOR WASHING MACHINES. HARRY J. CRINER, Clarinda, Iowa, assignor to Clarinda Manufacturing Company, Clarinda, Iowa, a Corporation of Iowa. Filed Mar. 3, 1926. Serial No. 91,934. 2 Claims. (Cl. 259—128.)

1. An agitator for washing machines, comprising a hollow cone-shaped body, a means connected with the upper end of said body for causing a rotary oscillation, and a plurality of independent wings formed on and radiating from said body, the upper portion of each wing being arranged on a substantially straight line diverging outwardly slightly from the body and extending not more than one half the total length of the wing, the lower portion being formed on a relatively large arc to which the base of the cone-shaped body is substantially tangent, whereby currents of liquid are drawn inwardly toward the base of said body when it is rotated and thence upwardly and between said wings.

1,667,196. MACHINE FOR CUTTING OPENINGS FOR FASTENERS IN METAL SHEETS TO BE USED AS FORMS FOR MAKING CONCRETE FENCEPOSTS. JAY DARLING, Williamsport, Ind. Filed Sept. 9, 1927. Serial No. 218,544. 5 Claims. (Cl. 164—91.)

1. In a device for stamping perforations in sheet metal forms for making concrete posts, the combination of a base having a metal strip mounted thereon, said strip having perforations of the required shape to receive the desired type of fasteners, a channel extending longitudinally of the base and directly under the perforated portion of the metal plate, a top hinged to the base at one end, said top having a handle at the other end, and a metal plate affixed to the top, said plate having a series of projections corresponding in shape and position with the perforations in the metal plate carried on the base, the base also being suitably recessed to receive the sheet of metal to be perforated.

1,667,197. WATER-RESISTANT POLYHYDRIC ALCOHOL-CARBOXYLIC-ACID RESIN AND PROCESS OF MAKING SAME. CHARLES R. DOWNS, Cliffside, and LOUIS WEISBERG, Grantwood, N. J., assignors to The Barrett Company, a Corporation of New Jersey. Filed Dec. 22, 1920. Serial No. 432,408. 46 Claims. (Cl. 260—8.)

3. The process of making a resin which comprises heating a mixture containing a dibasic aliphatic carboxylic acid and a polyhydric alcohol until a water-resistant resin results.

17. A water-resistant polybasic aliphatic carboxylic acid-polyhydric alcohol resin.

1,667,198. WATER-RESISTANT CARBOXYLIC ACID-POLYHYDRIC ALCOHOL RESINS. CHARLES R. DOWNS, Cliffside, and LOUIS WEISBERG, Grantwood, N. J., assignors to The Barrett Company, a Corporation of New Jersey. Original application filed Dec. 22, 1920, Serial No. 432,408. Divided and this application filed Sept. 7, 1921. Serial No. 498,995. 24 Claims. (Cl. 260—8.)

9. A water-resistant tribasic aliphatic carboxylic acid-polyhydric alcohol resin.

1,667,199. WATER-RESISTANT CARBOXYLIC ACID-POLYHYDRIC ALCOHOL RESIN. CHARLES R. DOWNS, Cliffside, and LOUIS WEISBERG, Grantwood, N. J., assignors to The Barrett Company, a Corporation of New Jersey. Original application filed Dec. 22, 1920, Serial No. 432,408. Divided and this application filed Sept. 7, 1921. Serial No. 498,996. 12 Claims. (Cl. 260—8.)

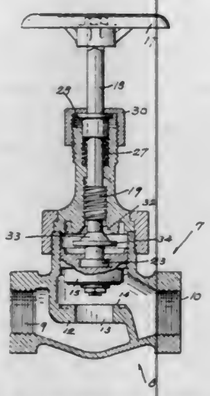
9. A water-resistant resin such as can be obtained from malic acid and a polyhydric alcohol.

1,667,200. WATER-RESISTANT CARBOXYLIC ACID-POLYHYDRIC ALCOHOL RESIN. CHARLES R. DOWNS, Cliffside, and LOUIS WEISBERG, Grantwood, N. J., assignors to The Barrett Company, a Corporation of New Jersey. Original application filed Dec. 22, 1920, Serial No. 432,408. Divided and this application filed Sept. 7, 1921. Serial No. 498,997. 12 Claims. (Cl. 260—8.)

1. A water-resistant succinic acid-glycerol resin.

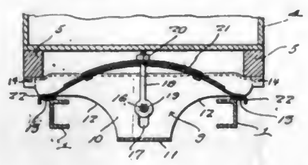
2. The process of making a resin, which comprises heating succinic acid and a polyhydric alcohol for about 20 hours between 170° and 200° C., then below 135° C. for about 10 hours, then between 170° and 250° C. until a water-resistant resin results.

1,667,201. WEATHERPROOF AND DECAY-PROOF MATERIAL. DOZIER FINLEY, Berkeley, Calif., assignor to The Paraffine Companies, Inc., San Francisco, Calif., a Corporation of Delaware. Filed Aug. 6, 1923, Serial No. 656,125. 11 Claims. (Cl. 91—68.)



1. A sheathing material comprising a fibrous base saturated with a compound comprising asphalt, stearin pitch and creosote.

1,667,202. METHOD OF MANUFACTURING PISTONS. HENRY FORD, Dearborn, Mich. Filed Apr. 22, 1926. Serial No. 103,952. 4 Claims. (Cl. 29—156.5.)



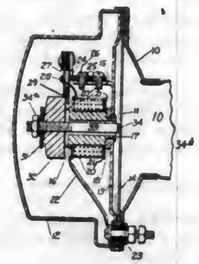
2. The method of manufacturing pistons which consists in forming a head of relatively thick material, said head having an annular flange adjacent to its lower edge, forming a tubular skirt of thinner material, and butt welding the edge of the skirt to the flange, the cross section of the flange and skirt adjacent to the weld being substantially the same.

1,667,203. VALVE. ERNEST C. HARRIS, Denver, Colo. Filed Oct. 4, 1926. Serial No. 139,501. 1 Claim. (Cl. 251—50.)

In a device of the character described, a pipe section having a partition with a diametrical perforation, a radial extension of the pipe arranged coaxially with the perforation, a cap on said extension, means for holding the cap in place, a valve stem threaded into the cap and having a valve revolvable on its lower end adapted to be seated on the rim of the perforation when the stem is threaded inwardly, a tapered annular rib extending from the cap and forming a valve seat, and a second valve fixed on the stem adapted to engage said seat when the stem is threaded outwardly, the second valve comprising a tapered section adapted to recede into the rib and a disc bearing on the rib.

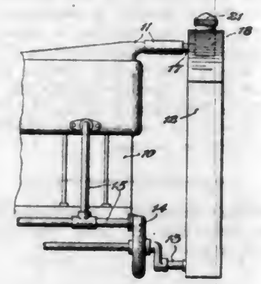
1,667,204. TRUCK-BODY MOUNTING. CHARLES B. HUGHES, Cherrydale, Va. Filed Aug. 23, 1926. Serial No. 130,948. 3 Claims. (Cl. 296—35.)

1. Means for mounting a vehicle body on a vehicle chassis, comprising means securing the body at a pair of spaced points to said chassis, and resilient means connecting the body with the chassis at a third point spaced from the first mentioned pair of points and normally and yieldly retaining said body in engagement with said chassis at points at opposite sides of and spaced from the said third point.



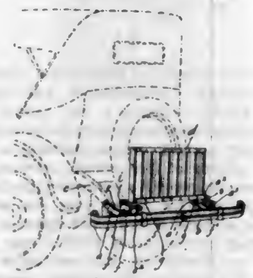
1,667,205. ARTIFICIAL JAWS. GUSTAV FRED INGWERSEN, Denver, Colo. Filed May 29, 1924. Serial No. 716,713. 2 Claims. (Cl. 35—16.)

1. As a new article of manufacture, an artificial mouth structure for taxidermal use, comprising two members simulating the jaws of an animal inclusive of the tissues and the teeth, and a member simulating the tongue of the animal, the members being immovably fixed together in their natural open position.



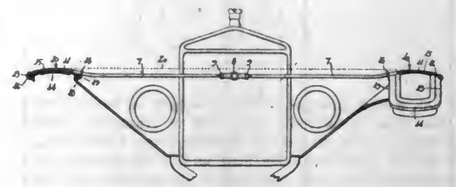
1,667,206. SIGNALING DEVICE. OTTO KERSTEN, Highland Park, Mich., assignor to Ford Motor Company, Detroit, Mich., a Corporation of Delaware. Filed Jan. 29, 1923. Serial No. 615,547. 1 Claim. (Cl. 177—7.)

In an electric signaling device, a disc shaped diaphragm, a dished disc attached thereto, said disc having a central opening therein and having a second opening adjacent thereto formed by punching a tongue out of said disc and causing the tongue to extend at an angle to the body of said disc, a U shape yoke member having a central opening therein adapted to register with the opening in said disc, a hollow magnet core member having a sleeve extended therefrom, said sleeve being extended through the openings in the disc and yoke and riveted over to secure said members together, a coil mounted on said core, a spring member extended between the ends of said yoke, a relatively heavy armature member disposed between the coil and spring member, a striker bar adjustably mounted in said armature and extended through the coil and disc to position to actuate the diaphragm, means for securing the striker bar to the spring member, a unitary preassembled make and break structure adjustably mounted on said tongue in position to be



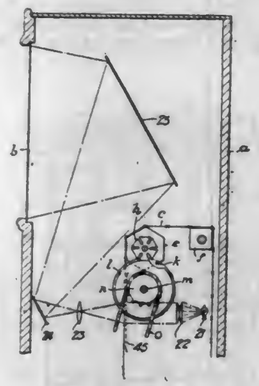
actuated by the armature, and means for including the coil and make and break structure in an electric circuit to actuate the signaling device.

1,667,207. COOLING SYSTEM FOR INTERNAL-COMBUSTION ENGINES. JAMES A. KINNARD, Detroit, Mich., assignor to The Fulton Syphon Company, Knoxville, Tenn., a Corporation of Delaware. Filed Apr. 14, 1927. Serial No. 183,891. 15 Claims. (Cl. 236—34.)



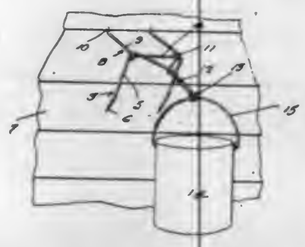
1. In a cooling system for internal combustion engines, in combination with a radiator provided with a filler opening, a thermostatically-operated valve mechanism insertible into the radiator through the filler opening and adapted to determine the circulation of water through the radiator.

1,667,208. PIVOTED LUGGAGE CARRIER. FRANK J. LAHER, Portland, Oreg. Filed Feb. 26, 1925. Serial No. 11,764. 8 Claims. (Cl. 224—29.)



8. A luggage carrier attachment for vehicles provided with longitudinally extended carrying members, comprising a rack and means for supporting the rack on said carrying members, said means including L-shaped brackets having one arm pivotally connected to said supporting means respectively and the other arm secured longitudinally adjustable to the rack adjacent the lateral sides thereof.

1,667,209. TRUSS ROD. JESSE D. LANGDON, Los Angeles, Calif., assignor to Petroleum Machinery Development Corporation, Reno, Nev. Continuation of application Serial No. 672,619, filed Nov. 3, 1923. This application filed Aug. 17, 1925. Serial No. 50,691. 2 Claims. (Cl. 280—152.)

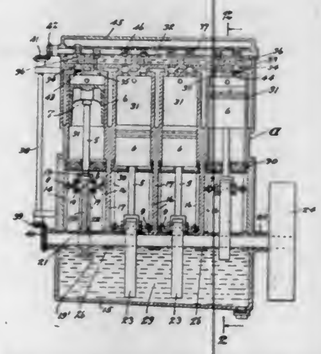


1. A truss rod having curved portions to extend across objects and terminal hooks to engage the outer edges of said objects, said rod having means between said portions for contracting the rod lengthwise so as to tension the rod, and hook members slidable on the rod to engage the inner edges of said objects and so arranged that the straightening out effect of the rod, when tensioned, between said curved portions will draw said members tighely into engagement with said inner edges of the objects.

1,667,210. ADVERTISING DEVICE. KARL OSCAR LEON, Lidkoping, Sweden. Filed Feb. 4, 1925, Serial No. 6,878, and in Great Britain Feb. 8, 1924. 5 Claims. (Cl. 88—28.)

1. An advertising device, comprising a casing, an intermittently moving carrier divided into sections some of which bear advertising matters and other of which are left blank, means for projecting an image of each section of the carrier in turn, a clock unit the time indicating parts of which are normally in an inoperative position in relation to the projecting means, and means for effecting the projection of an image of said time indicating parts only when a blank section of the carrier is in projecting position in relation to the projecting means.

1,667,211. BUCKET HANGER. FLOYD F. LIGHT, Beckley, W. Va. Filed Aug. 22, 1927. Serial No. 214,635. 2 Claims. (Cl. 248—24.)

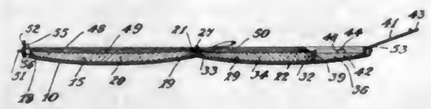


1. As a new product of manufacture, a bucket hanger of the class described comprising a frame-like member including a pair of spaced parallel arms terminating at one end in right-angularly bent anchoring prongs, having intermediate eyes, and provided at its opposite end with a suspension hook, and a substantially U-shaped prop, whose bight portion is extended through said eyes.

1,667,212. ENAMEL FOR COATING CANS. ROGER H. LUECK, Oak Park, Ill., assignor, by mesne assignments, to the Public of the United States of America. Filed Mar. 23, 1926. Serial No. 96,880. 2 Claims. (Cl. 134—39.)

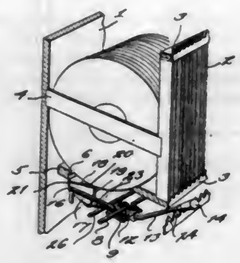
1. An enamel for coating cans which are to contain food products, consisting of a substantially neutral oleoresin varnish substantially free from lead and having incorporated therein an insoluble metallic compound of such metal or metals forming sulphides which are not dark colored, so that said compound is permanently embodied in the enamel and held in place on the inside of the container during processing and subsequent thereto.

1,667,213. INTERNAL-COMBUSTION MOTOR. PAUL MARCHETTI, Stockton, Calif., assignor to Marchetti Motor Patents, Incorporated, a Corporation of Nevada. Filed June 2, 1925. Serial No. 34,374. 2 Claims. (Cl. 74—14.)



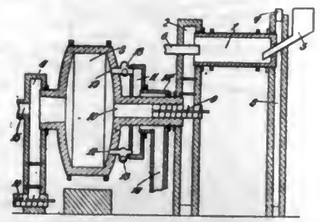
2. In a device of the type described, a piston, a piston rod rigidly secured to said piston, a pair of guide grooves for said piston rod, a rotatable member having a double cam groove therein, ball-bearings disposed in said grooves, adjustable means carried by said rod for moving said ball-ball-bearings into the grooves, ball-bearings disposed in said first named rod guiding grooves, cups for receiving said last named ball-bearings, and being adjustably connected to said piston.

1,667,214. CONDENSATION PRODUCT FROM OLEFINES AND HYDROCARBONS OF THE NAPHTHALENE SERIES AND PROCESS OF MAKING THE SAME. RICHARD MICHEL, Uerdingen-on-the-Rhine, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed June 21, 1927, Serial No. 200,500, and in Germany Feb. 4, 1926. 7 Claims. (Cl. 260—168.)



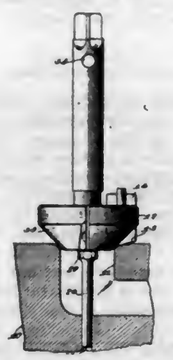
1. Process which comprises reacting with olefines upon hydrocarbons of the naphthalene series, in the presence of a catalytically active metallic halide, under conditions of elevated temperature over 50° C. and superatmospheric pressure.

1,667,215. CONTAINER. ALBERT E. MULLEN, New York, N. Y. Filed Apr. 16, 1927. Serial No. 184,332. 5 Claims. (Cl. 132—83.)



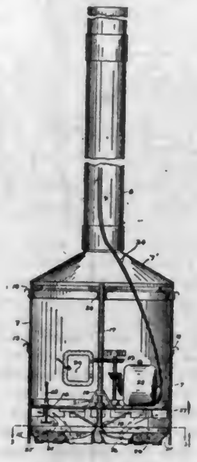
3. In a container, in combination, a bottom member, a removable tray compact holder within the bottom member spaced from one end thereof, a top member hingedly attached to the bottom member, a removable tray compact holder within the top member, a removable tray rouge holder within the top member, spaced from one end thereof, means within the bottom member guiding the top member and bottom member during the closure of the device and a metallic mirror carried by the top and bottom hinge capable of covering the interior of the top member and bottom member.

1,667,216. RECORD CABINET. FERDINAND NIGRA, San Antonio, Tex. Filed Jan. 22, 1926. Serial No. 83,101. 9 Claims. (Cl. 312—19.)



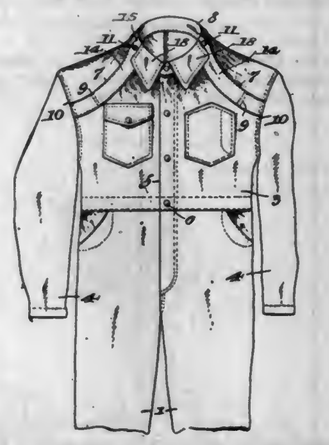
1. The combination with a cabinet for disc records or the like, divided into compartments, and each of said compartments wholly receiving a disc record of the like therein, a pivotally supported spring influenced dog in each compartment serving as an obstruction to prevent the withdrawal of any of the records, latching means for holding the dogs in record obstructing position, means, slidable longitudinally on the cabinet and swingable to engage with a selected record, and likewise engageable with the latching means of the holding dog in the said compartment, to permit of the withdrawal of such record, means for locking the latching means in such position and for sustaining the latching means out of engagement with the dog, whereby the withdrawn record may be reinserted in only its proper compartment, and releasing means for the locked ejecting means, permitting the latter to return to normal position and to release the latching means to allow its reengagement with the dog.

1,667,217. METHOD OF OBTAINING VALUABLE PRODUCTS FROM COMBUSTIBLE MATERIALS. ADAM HELMER PEHRSON, Stockholm, Sweden, assignor to Dunford & Elliott (Sheffield) Limited, Sheffield, England. Filed Aug. 13, 1923, Serial No. 657,242, and in Sweden Aug. 19, 1922. 8 Claims. (Cl. 202—8.)



1. In a rotating or oscillating chamber the method of heat treating solid carbonaceous material which consists in continuously introducing the material into the chamber through an opening in one end thereof, tumbling, rolling or agitating the material by the actuation of said chamber, introducing gaseous fluid beneath the surface of the material thereby heating the same, maintaining the depth of the material uniform throughout said chamber and at such a depth that said gaseous fluid is caused to thoroughly permeate said material throughout its mass and removing the residues or product through an opening in the opposite end of said chamber to that at which the material enters.

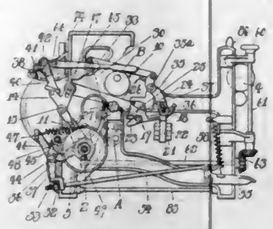
1,667,218. TOOL FOR PLANING VALVE SEATS. THEODORE S. PURNIS, Aberdeen, S. Dak., assignor to The K. O. Lee & Son Company, Aberdeen, S. Dak., a Corporation of South Dakota. Filed July 1, 1926. Serial No. 119,909. 1 Claim. (Cl. 90—12.5.)



A device of the character described for planing the passage in a cylinder block having a valve seat in the outer end of the passage and comprising a cutter head having a cylindrical upper portion and a conically shaped lower portion, said conically shaped head being provided with vertical slots disposed radially, each slot opening through the outer wall of the head with the inner wall of the slot being located adjacent the center, a cutter blade mounted in each radial slot, said head being provided with a passage slanting into each vertical slot at one side thereof, a pin forced into each slanting passage and provided with an inclined face engaging a cutter blade for forcing the cutter into engagement with the rear wall of the vertical slot, means for rotating the cutter head, one of the cutter blades being adapted to be disposed within the passage in the cylinder block and adapted to plane the wall of the passage simultaneously with the planing of the valve seat by the other cutter blade.

1,667,219. DREDGING APPARATUS. JOHN REAM, Sacramento, Calif. Filed Nov. 29, 1926. Serial No. 151,314. 7 Claims. (Cl. 37—58.)

1. Dredging apparatus comprising a cylindrical watertight casing, a vertical shaft revolvably supported therein and extending through the bottom thereof, a propeller-like fan mounted on the lower end of said shaft, means within the casing for driving said fan and an annular receptacle surrounding the fan adapted to receive material drawn through the fan upon revolving the same.

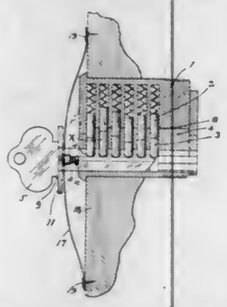


1,667,220. UNION GARMENT. JACOB RIPKIN, Wilkes-Barre, Pa. Filed Aug. 10, 1925. Serial No. 49,308. 1 Claim. (Cl. 2—79.)

A union outer garment or overalls comprising a blouse and leg or pants parts, the blouse having an open front from its neck downwardly and provided with suitable fastening means therefor, and being provided forward of

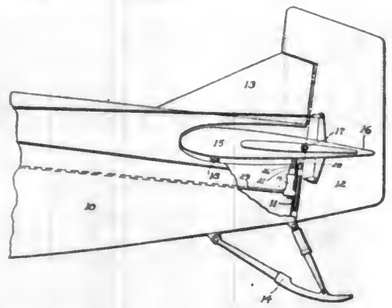
its shoulder parts below the crests of said shoulder parts with vents extending downwardly in general diagonal arrangement from the neck to the general region of the junction of the sleeves with the blouse below the crests of the shoulder parts, the blouse and the shoulder parts being provided with overlapping parts at the vents, and means for fastening the overlapping parts together.

1,667,221. LET-OFF FOR LOOMS. KYUGORO SAKAMOTO, Hamamatsu, Japan. Filed Mar. 13, 1926, Serial No. 94,463, and in Japan Apr. 18, 1925. 5 Claims. (Cl. 139—108.)



1. A warp tension regulating means for looms comprising the combination of a brake member arranged to restrain the free rotation of the warp beam with a guide roll pivoted on a lever which rocks in accordance to the up-and-down motion of the guide roll due to tension of the warps, a cam lever pivoted on the loom frame having a weight which slides along the lever in connection with the variation in diameter of the warp beam, and a three armed lever each arm of which being respectively connected with the aforesaid three members, that is to say, the brake member, the guide roll, and the cam lever, in such a manner that the motion of the cam lever due to the decrease in the diameter of the warp beam or the motion of the guide roll due to the abnormal tension of the warps, makes the brake member to release its brake effect on the warp beam.

1,667,222. DRESSING. ERNEST J. SCHELLING, Toledo, Ohio. Filed Jan. 12, 1925. Serial No. 1,948. 1 Claim. (Cl. 134—11.)



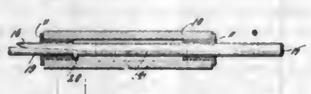
A brake band dressing composed of approximately 95% castor oil and 5% lard oil by volume.

1,667,223. LOCK DEVICE. HIRAM R. SIMPSON, San Francisco, Calif. Filed Sept. 28, 1926. Serial No. 138,141. 10 Claims. (Cl. 70—9.)

1. Apparatus for releasing a pin tumbler lock of the character described which comprises a slug key provided with substantially uniform notches to receive the tumblers and adapted for longitudinal movement into the key slot beyond the seating position of the tumblers in the notches.

1,667,224. AIRPLANE STABILIZER. CHARLES J. SMITH, Dearborn, Mich., assignor to Ford Motor Company, Detroit, Mich. Filed Dec. 27, 1926. Serial No. 157,341. 1 Claim. (Cl. 244—29.)

In a device of the character described, a fuselage having a tail post at the rear end thereof, said fuselage having a horizontal longitudinal slot therethrough adjacent to said tail post, a stabilizer plane extended through said slot and pivotally mounted adjacent to its forward end within said slot, and means secured to said tail post and coacting with said stabilizer plane to adjust that stabilizer plane about its pivot, the pivotal mounting and the adjusting device both being disposed substantially within the lines of the fuselage whereby the said parts may not increase the wind resistance of the stabilizer plane materially.

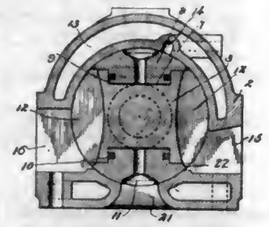


1,667,225. MANUFACTURE OF NEW SULPHONIC DERIVATIVES OF UNSATURATED FATTY ACIDS. ALFRED THAUSS, Cologne-Deutz, GUSTAV MAUTHE, Cologne-Muhlheim, and ALFRED GÜNTHER, Cologne-Riehl, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed Dec. 21, 1926, Serial No. 156,266, and in Germany Dec. 22, 1925. 9 Claims. (Cl. 260—159.

1. A process for making sulphonic acids of unsaturated fatty acids aralkylated on a carbon atom which comprises reacting an aralkyl halogenide with an unsaturated fatty acid and treating the resultant product with a sulphonating agent.

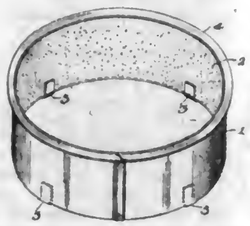
1,667,226. PROCESS FOR THE PREPARATION OF SULPHONIC ACIDS OF ARALKYLATED UNSATURATED FATTY ACIDS. ALFRED THAUSS, Cologne-Deutz, GUSTAV MAUTHE, Cologne-Muhlheim, and ALFRED GÜNTHER, Cologne-Riehl, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 17, 1927, Serial No. 176,300 and in Germany Apr. 24, 1926. 5 Claims. (Cl. 260—108.)

1. Process which comprises reacting an aralkyl halogenide with a glyceride of an unsaturated fatty acid and sulphonating the product.



1,667,227. BUSHING REMOVER. ELBERT I. THOMPSON, Osage City, Mo. Filed Dec. 28, 1925. Serial No. 78,010. 1 Claim. (Cl. 29—88.2.)

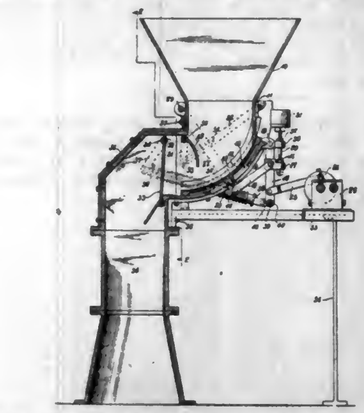
A bushing remover comprising a driving bar of cylindrical form and uniform diameter for the major portion of its length, the bar at one end being recessed in one



side to provide a flat face inclined with respect to the axis of the bar and a shoulder at the inner end of the face extending substantially at right angles to the axis of the bar, and a key having a transversely arcuate side of the same curvature as the bar and a flat side extending its entire length and inclined with respect to the axis of the bar and to the same degree as the face of the bar, the said key having its inner end transversely flat to engage the shoulder of the bar, and an eccentric outstanding flange at the inner end of the arcuate side of the key to engage the end of a bushing into which the said end of the bar and the key are inserted.

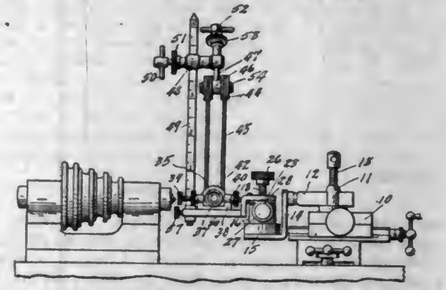
1,667,228. ROTARY VALVE. WILLIAM D. TIPTON, Baltimore, Md. Filed July 25, 1923. Serial No. 653,799. 2 Claims. (Cl. 123—190.)

1. In an internal combustion engine, in combination with the cylinder, a valve chamber having an inlet port, exhaust port and cylinder port, of a rotary valve positioned within said valve chamber, comprising a body portion provided with circular pockets, shoe members slidable radially mounted piston tight in the circular pockets of said body portion, the said shoe members having ports arranged to register with the cylinder port on the compression and expansion stroke of the engine.



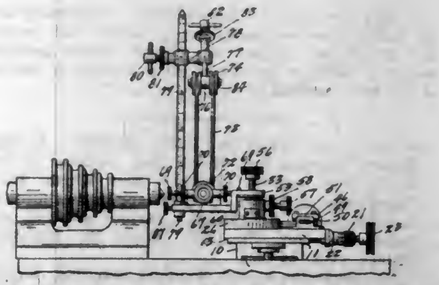
1,667,229. KINDLER HOLDER FOR WICKS. HAROLD EUGENE TREWORGY, Brunswick, Me. Filed Feb. 17, 1927. Serial No. 168,989. 2 Claims. (Cl. 67—69.)

1. The combination with a heating device, of a kindler holder, of a wick held in position by the kindler holder, of means for easily removing the kindler holder and wick from the heating device, consisting of a flange portion extending laterally of the holder, means for maintaining the wick in operative relationship with the holder, consisting of lug portions integrally a part of the holder and bent inwardly and upwardly thereof.



1,667,230. STOKER AND THE LIKE. WILBURT WARD, Forest, Ohio. Filed June 20, 1927. Serial No. 199,933. 11 Claims. (Cl. 198—226.)

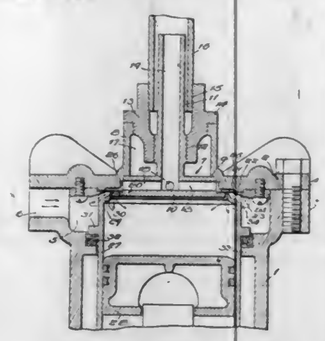
1. A stoker comprising in combination, an oscillating feeder, driving means for said feeder comprising a pivoted arm, a block slidable on said arm, a link connected to said feeder and said block, means to preserve the position of said block on said arm during normal operation of the



feeder, said last-named means yielding to permit said block to slide when the feeder is stalled during oscillation of the arm and means to oscillate the arm.

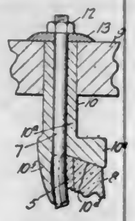
1,667,231. ATTACHMENT FOR PIVOT POLISHERS. JAMES P. WOOD, Bastrop, Tex. Filed Sept. 12, 1925. Serial No. 55,983. 3 Claims. (Cl. 51—259.)

1. In a pivot polisher attachment, a post supporting bar, a tubular post fixed thereon, a spindle support having an interiorly threaded shank disposed within the bore of said post, a screw threaded through said shank to vertically adjust the same and retained in said bar against axial movement, a spindle carrying a polishing tool mounted upon the spindle support, and driving means for the spindle carried by said support.



1,667,232. PIVOT POLISHER. JAMES P. WOOD, Bastrop, Tex. Filed Sept. 12, 1925. Serial No. 55,984. 5 Claims. (Cl. 51—259.)

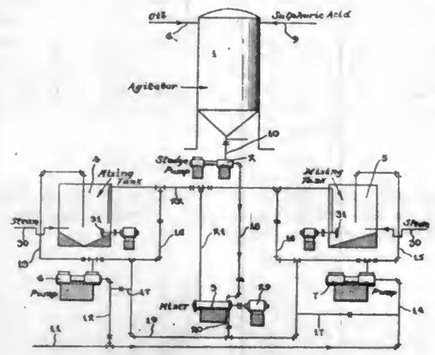
1. In a pivot polisher, a supporting slide, a vertical tubular post having an enlarged base rotatably confined



on the slide, the post having an axial bore, a bracket for supporting a pivot polisher and having a cylindrical shank disposed within said axial bore, a vertical adjusting screw threaded into said shank and extending axially of the bore of the post and rotatably confined therein against vertical movement, and means for rotatably adjusting the post.

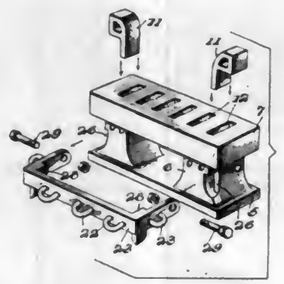
1,667,233. COMPRESSOR. BURTON S. AIKMAN, Milwaukee, Wis., assignor to National Brake & Electric Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Apr. 14, 1927. Serial No. 183,652. 21 Claims. (Cl. 230—179.)

1. In a device of the class described, a cylinder having a head therefor, a valve sleeve in said cylinder, a piston in said sleeve, an annular plate secured at its outer margin to said head, a circular plate secured to said head, said plate having a flange extending radially outward beyond the inner edge of the annular plate to form a valve seat engaged by the inner margin of said annular plate, said valve sleeve being adapted to engage the annular plate and form a pneumatic seal in conjunction therewith.



1,667,234. FLUME CONSTRUCTION. RUSSELL E. BARNARD, Denver, Colo., assignor to The R. Hardesty Manufacturing Company, Denver, Colo., a Corporation of Colorado. Filed Mar. 1, 1927. Serial No. 171,785. 6 Claims. (Cl. 61—15.)

1. As a new article of manufacture, an abutment sleeve for flume structures comprising a tubular body member, and at an end thereof, an integral lateral projection having a wedging surface slanting relative to the axis of the body member.



1,667,235. APPARATUS FOR MIXING SLUDGE. ROBERT BEATTIE, Fort Worth, Tex., assignor to Texas Pacific Coal and Oil Company, Fort Worth, Tex., a Corporation of Texas. Original application filed June 6, 1927, Serial No. 196,901. Divided and this application filed Nov. 29, 1927. Serial No. 236,556. 7 Claims. (Cl. 44—2.)

1. An apparatus of the character described, including a sludge tank, a mixing tank, a mixer, a sludge pump and a second pump for forcing a mixture of liquid hydrocarbons and neutralizing agent, and valve pipes connecting said elements in such manner that the second pump may circulate such mixture through the tank without

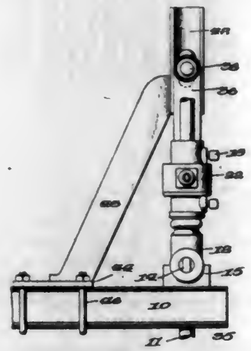
passing through the mixer, and whereby both pumps may circulate the sludge and mixture through the mixer and mixing tank.

1,667,236. ANVIL FOR BIT-DRESSING HAMMERS. CHARLES H. BERGQUIST, Okmulgee, Okla., assignor of one-half to Emery A. Locke, Okmulgee, Okla. Filed Feb. 23, 1926. Serial No. 90,076. 2 Claims. (Cl. 78—7.)

1. An anvil comprising a body having a head provided with openings extending therethrough, and stop members having shanks received in said openings, the opposed inner sides of the stop members being inclined outwardly to form a vertical gradually restricted entrance opening to the space between the stop members, said stop members being provided with laterally projecting heels on the outer sides thereof to engage the adjacent portion of the anvil to brace the stop members against lateral pressure and to limit the entrance of the shanks into said openings.

1,667,237. PROCESS FOR THE PREPARATION OF ORGANIC ARSENIC COMPOUNDS. ARTHUR BINZ, Berlin, and CURT RÄTH, Rangsdorf, Germany. Filed July 18, 1926, Serial No. 122,265, and in Germany July 22, 1925. 3 Claims. (Cl. 260—15.)

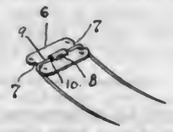
1. Process for the preparation of organic arsenic compounds containing the group —As—As— which comprises condensing an arsine of the formula $R—AsH_2$ with an arsine compound of the general formula $R_1—AsX$ wherein X represents oxygen or two halogens in the presence of a reducing agent, which is capable of reducing arsonic acids to arseno compounds, R and R_1 being similar or dissimilar aliphatic, isocyclic or heterocyclic radicals.



1,667,238. METHOD FOR THE REDUCTION OF ARSONIC ACIDS. ARTHUR BINZ, Berlin, and CURT RÄTH, Rangsdorf, Germany. Filed July 18, 1926, Serial No. 122,267, and in Germany July 22, 1925. 4 Claims. (Cl. 260—15.)

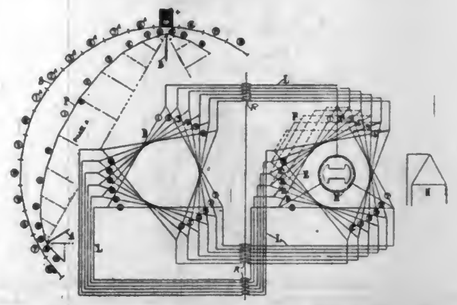
1. Method for the reduction of arsonic acids not condensing with addition products of sulphoxylic acid which comprises treating said acids with addition products of sulphoxylic acid.

1,667,239. ALKYL DERIVATIVES OF DIPHENOLISATINE AND PROCESS FOR MAKING SAME. ANDRÉ BLANKART, Basel, Switzerland, assignor to The Hoffmann-La Roche Chemical Works, New York, N. Y., a Corporation of New York. Filed July 7, 1927, Serial No. 204,150, and in Switzerland Oct. 9, 1926. 5 Claims. (Cl. 260—47.)



1. As new products the alkyl derivatives of diphenolisatine which may be produced by treating diphenolisatine with an alkylating agent, the new products being crystallizing, neutrally reacting, very constant compounds showing with ferricyanate or potassium and a solution of sodium hydroxide no colour-reaction, and being insoluble in water, alkali and acids, but dissolving easily in the usual organic solvents, alcohol, benzol, concentrated acetic acid and the like.

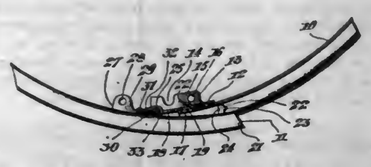
1,667,240. POLISHED ROD ROTATOR. ALEXANDER BOYNTON, San Antonio, Tex. Filed June 19, 1926. Serial No. 117,193. 5 Claims. (Cl. 255—14.)



1. A polished rod rotator comprising a body having means whereby the same may be connected to a polished rod, an intermittent turning device associated with the body, an arm connected to the turning device, a member rotatably and slidably connected to the arm, and an actuator to which said member is slidably connected.

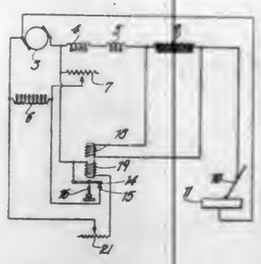
1,667,241. PAPER-MARKER FASTENER. MACIEJ BUDNY, Garfield Heights, Ohio. Filed Nov. 23, 1923. Serial No. 676,534. 3 Claims. (Cl. 24—150.)

1. A paper marker fastener comprising a pair of prongs joined at sharp right-angles by an integrally formed straight cross bar of a length less than the length of said prongs, said prongs having elongated points and being bent to uniform curvature upon a long radius.



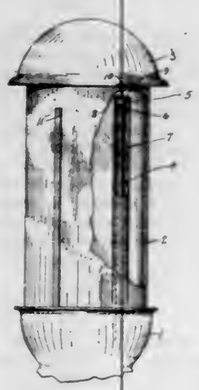
1,667,242. ELECTRIC CONVERTING APPARATUS. JOHN EARNSHAW CALVERLEY, Preston, and WILLIAM EDEN HIGHFIELD, London, England, assignors to The English Electric Company, Limited, London, England. Filed Nov. 12, 1925, Serial No. 68,588, and in Great Britain Dec. 10, 1924. 8 Claims. (Cl. 171—123.)

1. A polyphase transforming arrangement comprising a set of windings forming an electrically symmetrical closed ring and connected to commutating gear, by-pass circuits arranged in connection with the said set of windings and including coils grouped together on transformer cores to form an auxiliary transforming arrangement, the grouping being such that the by-pass circuits offer a relatively low impedance to harmonic currents and a relatively high impedance to currents of fundamental frequency, substantially as and for the purpose set forth.



2. A polyphase transforming arrangement comprising a set of windings forming an electrically symmetrical closed ring and connected to commutating gear, an auxiliary transforming arrangement consisting of a polyphase transformer core structure and coils thereon, by-pass circuits arranged in connection with the sections of the said closed ring winding, the said by-pass circuits including coils on the auxiliary transformer the said coils being so formed as regards their respective number of turns and so grouped as regards their respective phases that the total number of ampere turns acting on any one core of the auxiliary transformer due to the by-pass current at any instant is approximately zero, substantially as described.

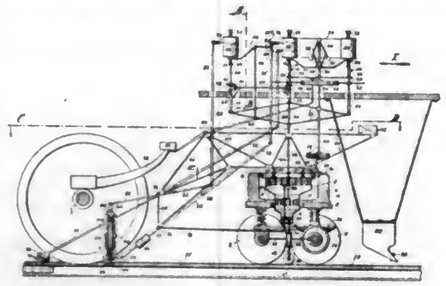
1,667,243. WHEEL-RIM LOCKING AND CONTRACTING APPLIANCE. ANGUS CAMERON, Summerstown, Ontario, Canada, assignor of fifty-two one-hundredths to William Douglas Knight, Cornwall, Ontario, Canada. Filed June 12, 1926. Serial No. 115,661. 2 Claims. (Cl. 301—30.)



1. The combination with a transversely split tire supporting rim, of a locking plate rigidly secured on one side of the split and extending across the split and having an opening therein, a swingingly mounted hook on the opposite side of the split to the locking plate engaging the opening therein to hold the rim contracted.

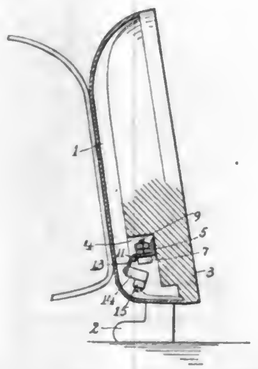
1,667,244. ELECTRIC-WELDING APPARATUS. ALEXANDER CHURCHWARD, New York, N. Y., assignor to Wilson Welder & Metals Company, Inc., Hoboken, N. J., a Corporation of New York. Filed Nov. 8, 1926. Serial No. 147,145. 7 Claims. (Cl. 219—8.)

1. In combination with a direct current generator having a shunt field and a rheostat in the circuit thereof, said generator being adapted to supply current to a welding circuit, means responsive to the opening of the welding circuit and to sub-normal open-circuit voltage at the brushes of the generator for short-circuiting said rheostat.



1,667,245. DISPENSING RESERVOIR. EMORY CROUSE, Wichita, Kans. Filed Dec. 27, 1921. Serial No. 524,903. 8 Claims. (Cl. 221—100.)

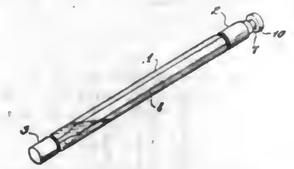
1. In a liquid dispenser, the combination with a container having an overflow pipe terminating in the upper portion thereof, of a supply pipe extending upwardly into the container, and having its outlet opening at least as high as the top of the overflow pipe, and a housing enclosing said supply pipe, said housing being opened at the bottom and having a vent opening in its top.



1,667,246. RAILWAY-TRACK INSPECTION APPARATUS. HANS DREYER, Munich-Harlaching, Germany. Filed Mar. 26, 1926, Serial No. 97,805, and in Germany Nov. 17, 1924. 6 Claims. (Cl. 234—1.)

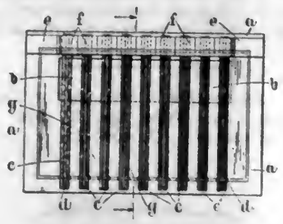
1. In apparatus for recording railway track imperfections, the combination with a suitable carrier vehicle of an auxiliary recorder carriage located intermediate the wheels of said vehicle, recorder supporting means supported by universal joint connections from said recorder carriage, recording tape operating drums supported by said recorder supporting means, recording means cooperating with said tape, means cooperating with the track to be operated by imperfections therein, and operating

connections between such track cooperating means and the recording means, said track cooperating and recorder operating means being supported from said recorder supporting means.



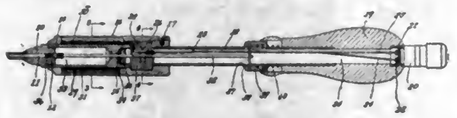
1,667,247. ELECTRIC SWITCH. JOHN J. EGAN, Boston, Mass., assignor to William L. Collins, Boston, Mass. Filed Mar. 25, 1926. Serial No. 97,272. 1 Claim. (Cl. 200—52.)

In a gravity switch for electric flat irons having a heel rest, the combination with the flat iron, of a vertical plate attached to the flat iron, two spaced insulated contacts attached to said plate, a second plate having an angularly disposed flange hinged at its edge to the upper edge of said vertical plate, and a single elongated contact member attached to the second plate to normally rest against said spaced contacts, the latter being terminals in the heater circuit of the flat iron, whereby the center of gravity of the second plate and its contact member is materially beyond a vertical plane through said hinge, and gravity cannot break the circuit until the flat iron is tipped nearly upon its heel rest.



1,667,248. CLINICAL THERMOMETER AND STERILIZING CASE. LOGAN EISELE, Nashville, Tenn. Filed Aug. 31, 1926. Serial No. 132,757. 2 Claims. (Cl. 206—16.5.)

1. A case of the class described, comprising a tubular body of glass, and ends of metal, the ends of the body and the interior of the metal ends shaped to provide a friction fit to hold the ends in place, one of the ends having an axial bore to receive a clinical thermometer,

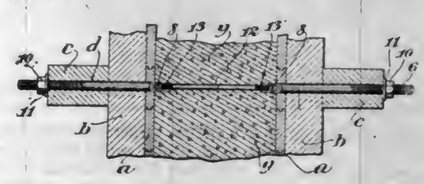


the thermometer having a plug formation shaped to frictionally fit the bore whereby to hold the thermometer in place in the bore.

1,667,249. APPARATUS FOR COMPARING THE COLOR OF LIQUIDS BY REFLECTED AND TRANSMITTED LIGHT. HENRY AUGUSTUS ELLIS, London, England, assignor to The British Drug Houses, Limited, London, England, a Corporation of Great Britain. Filed Feb. 25, 1925, Serial No. 11,451, and in Great Britain Nov. 12, 1924. 7 Claims. (Cl. 88—14.)

1. A device for comparing the colour of translucent objects by reflected and transmitted light simultaneously comprising a base of suitable material having a reflecting surface; an opening formed therein; a translucent object of standard colour secured thereto in a position to allow light reflected from the surface of said base and transmitted through the opening therein to pass through said translucent standard and an object placed next it to be compared therewith substantially as set forth.

1,667,250. ELECTRIC SOLDERING IRON. WALTER ENSDORF, New York, N. Y., and JOHANNES SANDBERG, Elizabeth, N. J. Filed Mar. 23, 1927. Serial No. 177,528. 2 Claims. (Cl 219—27.)

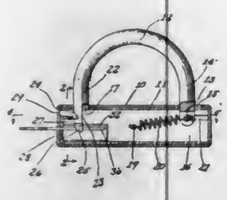


1. A device of the class described comprising a soldering head having a passageway therein, a cylindrical hollow body split into two sections, a semi-circular cover and an additional semi-circular member, a cylindrical removable reservoir in said body having the soldering head engaged therewith, a hollow stem extending from said body, a handle on said stem, removable blocks in said body having terminal posts thereon, a heating unit encircling said reservoir, a plunger in said stem and reservoir slidable therein, a packing in said reservoir, and a sleeve mounted slidably on said stem connected to said plunger for retracting the same.

1,667,251. SOUND-RADIATING DEVICE. RICHARD D. FAY, Cambridge, and ROBERT E. BREWER, Boston, Mass. Original application filed Apr. 17, 1925, Serial No. 23,917. Divided and this application filed Nov. 20, 1925. Serial No. 70,399. 3 Claims. (Cl. 181—31.)

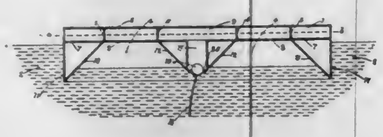
1. In a sound-radiating device, two oppositely-disposed sound-radiating members constructed and arranged for the propagation through the air of relatively intense sound waves of like pressure phase, and means for preventing interference between the sound waves produced by the inner and outer surfaces of said sound-radiating members.

1,667,252. TIE ROD. JOHN B. HAWLEY, Jr., Minneapolis, Minn. Original application filed Sept. 2, 1924, Serial No. 735,247. Divided and this application filed Mar. 13, 1926. Serial No. 94,422. 3 Claims. (Cl. 25—131.)



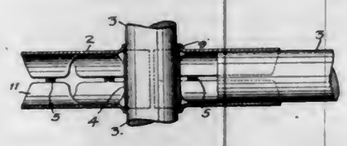
2. A tie rod for insertion through prepared concrete forms, made up of outer end and intermediate rod sections, the outer end sections being of substantially uniform diameter throughout, the inner section having a diameter not greater than the outer end section diameter and having externally threaded ends, the outer ends sections having internally threaded ends to engage the threaded ends of the intermediate rod, and externally threaded ends, and nuts applied to the externally threaded ends of the outer rod sections.

1,667,253. TIE ROD FOR CONCRETE FORMS. JOHN B. HAWLEY, Jr., Minneapolis, Minn. Filed Aug. 10, 1927. Serial No. 212,053. 9 Claims. (Cl. 25—131.)



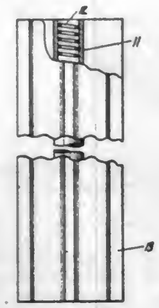
1. An assembly for holding concrete forms comprising two bolts each having a screw socket on one end and a form stop on the other end, a connecting rod threaded into said socket ends and a spring clip fastened to said connecting rod for holding the forms against collapse.

1,667,254. PADLOCK. HERMAN HEDRICH, Brooklyn, N. Y. Filed Apr. 9, 1927. Serial No. 182,201. 4 Claims. (Cl. 70—105.)



1. In a padlock, a barrel having slots therein, a curved hasp slidably and pivotally mounted in said barrel, a slidable stud pivoting one end of said hasp in said barrel, said stud being slidable in said barrel, and means in said barrel for simultaneously latching and locking said hasp in closed position.

1,667,255. OCEAN STAGE. OSCAR HERMANSON, New York, N. Y. Filed July 24, 1926. Serial No. 124,665. 1 Claim. (Cl. 114—0.5.)

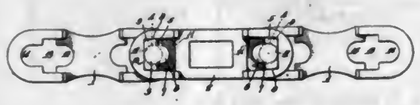


The combination of a maritime structure, comprising a tank with open bottom, with a substantial body of compressed air, filling the tank from top to bottom, so that this body of compressed air and the water underneath can move without obstruction up and down within the tank, in order to serve as a buffer for the purpose of calming the waves around the tank, substantially as described in the foregoing.

1,667,256. TOY CONSTRUCTION SET. WILLIAM HERSCHAFT, New York, N. Y. Filed June 8, 1927. Serial No. 197,290. 7 Claims. (Cl. 46—35.)

1. A toy construction set comprising a number of mating plates having axial openings and corrugated to form split radial sockets, and a number of rods adapted to be inserted in such sockets and to pass through such axial openings, clamping sleeves adapted to be interposed between said plates to grip axial rods by compression, and means for drawing said plates together.

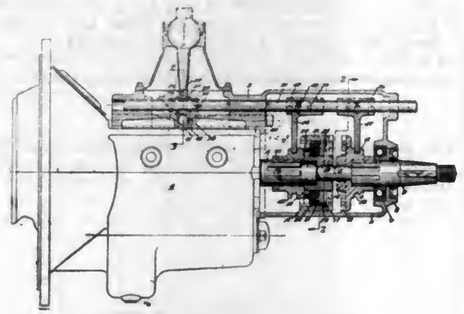
1,667,257. ELECTRIC HEATER. WILLIAM WESLEY HICKS, San Francisco, and ARTHUR J. KERCHER, Berkeley, Calif. Filed Nov. 27, 1926. Serial No. 151,205. 4 Claims. (Cl. 219—34.)



1. In an electric heater, a tube, a heating wire in the tube and in direct thermal conducting relation therewith, and a sheathing disposed over the tube and forming with the external surface of the tube a series of longitudinal spaces.

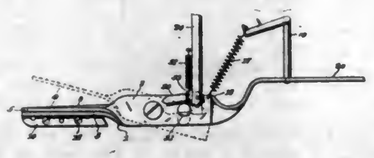
1,667,258. ENVELOPE. WILLIAM H. HOLLAR, Jr., Drexel Hill, Pa. Filed Apr. 7, 1926. Serial No. 100,330. 3 Claims. (Cl. 206—1.)

3. The combination with an envelope formed of flexible sheet material, including a normally open closure flap; of a key holder including a flexible metallic member extending within the envelope inclosure and adapted to there hold a key; both ends of said metallic member extending exterior to said envelope; and sealing means including a body of frangible material upon the exterior of the envelope, and adherent thereto, and imbedding both ends of said holder; whereby it is necessary to break said seal to release said key from said inclosure.



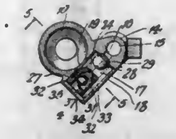
1,667,259. SPROCKET CHAIN. THOMAS J. HUGHES, Pottsville, Pa. Filed June 10, 1926. Serial No. 114,927. 1 Claim. (Cl. 74—32.)

A drive chain having central links, each having a substantially rectangular opening in each end, said openings communicating with a bearing notch on one side and an extension opening on the other; side links, each having a recess at each end in its outer side, the side walls of the recess converging toward the adjacent end of the link, an extension opening and a bearing notch communicating with each said recess; a pintle for connecting a central link with two side links having a



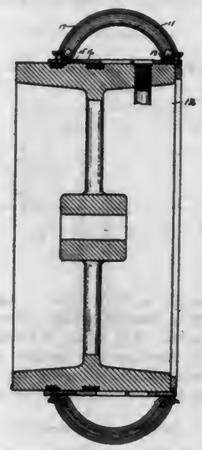
journal part adapted to engage said bearing notches, a head on each end substantially trapezoidal in shape engaging the side walls of each said recess, a projection on said head normally out of line with said extension openings, whereby upon the shifting of said central links toward each other, the head on each side of said pintle is disengaged from said side walls and upon revolving said pintle 180° said projection is brought in alignment with said extension openings, enabling said pintle to be passed through all said links.

1,667,260. TRANSMISSION CLUTCH. ERNEST W. JACKSON, Sausalito, Calif., assignor to Perfecto Gear Differential Co., Oakland, Calif., a Corporation of Washington. Filed Feb. 19, 1924. Serial No. 693,785. 11 Claims. (Cl. 74—58.)



6. The combination with a gear set and a shift lever therefor, of a driving shaft adapted to be driven thru said gear set, a driven shaft, complementary clutch members on said driving and driven shafts, a slidably mounted bar connected to said shift lever, and means for connecting each clutch member to said bar for movement therewith toward or from the other clutch member.

1,667,261. CUTTING MECHANISM FOR AUTOMATIC LOOMS. DAVID LEMIEUX, Lewiston, Me. Filed Jan. 25, 1927. Serial No. 163,456. 6 Claims. (Cl. 139—263.)

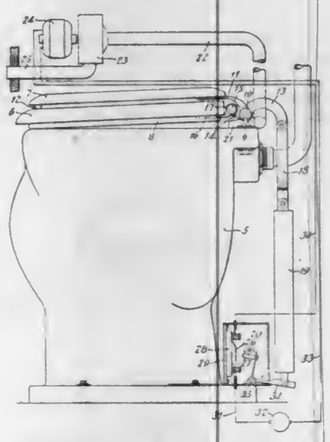


1. A cutter attachment for a loom comprising a pair of relatively pivoted members having coacting jaws and cutters, one of said members having an extension serving as a handle for attaching the device to the loom, jaw tensioning means normally holding the jaws and cutter in closed position, a projecting pin on one of said jaws, an operating rod, a pivoted finger carried by the rod and projecting over the said pin to press down on the latter for opening the jaws and cutters when the said rod is moved downwardly, said finger being free to swing downwardly from the horizontal but restricted from any upward movement above the horizontal, said finger being beveled to allow the pin to slip past after the jaws and cutters have been opened, and a spring for normally retaining the finger in horizontal position.

1,667,262. RELIEF VALVE FOR FIRE-EXTINGUISHER PUMPS. PETER GRAHAM MACGREGOR, Pequannock, N. J., assignor to Pyrene Manufacturing Company, Newark, N. J., a Corporation of Delaware. Filed May 5, 1927. Serial No. 188,974. 2 Claims. (Cl. 103—42.)

1. A pump head having an intake passage, a relief vent and a valve chamber, the wall of said valve chamber being provided with an intake valve seat and a plurality of spaced ribs, a valve cage carried within said chamber and provided with an opening and a relief valve seat, said valve cage being formed with a plurality of ribs adapted to cooperate with the first mentioned ribs to anchor said valve cage against turning within said chamber, an intake valve carried within one end of said valve cage and adapted to cooperate with said intake valve seat to open and close said intake passage, and a relief valve located within the opposite end of said valve cage and adapted to cooperate with said relief valve seat to close and open said relief vent as said intake valve is moved to open and closed positions respectively.

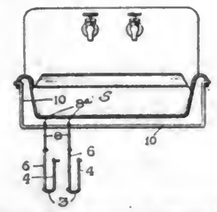
1,667,263. TIRE-BUILDING APPARATUS. GEORGE L. MATHER, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed May 15, 1922. Serial No. 560,892. 10 Claims. (Cl. 154—10.)



1. A pulley adapted to support a tire carcass and provided with means adapted to seal the edges of the carcass to the pulley.

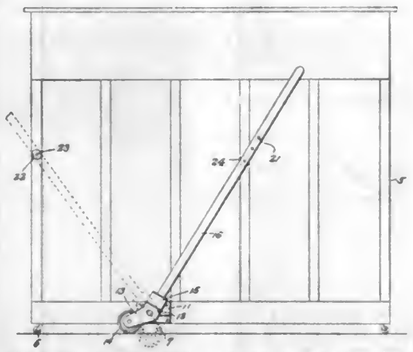
1,667,264. COMBINATION TIE PRESS AND RACK. HOWARD B. MINNICK, Chicago, Ill. Filed June 29, 1927. Serial No. 202,262. 2 Claims. (Cl. 223—19.)

1. In a device of the character described, a tapered board of flexible material, a fitted cloth cover detachably secured thereto, a wire tie rack which sustains said board by spring pressure, means to secure said rack to the wall, and arms on said rack from which ties may be suspended.



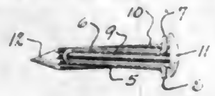
1,667,265. VENTILATING APPARATUS FOR TOILET BOWLS. ENOCH E. NEAL, Malden, Mass. Filed Feb. 18, 1927. Serial No. 169,367. 4 Claims. (Cl. 4—213.)

1. In combination a toilet bowl, a vent pipe communicating therewith, a suction pump connected to said pipe, an electric motor for said pump, a switch for said motor, a seat for said bowl, and a weight rigidly connecting said seat and said switch, whereby the latter is operated by said seat to control the operation of said motor.



1,667,266. PAN-LID HOLDER. BERTALAN PAPP, Bethlehem, Pa. Filed July 23, 1926. Serial No. 124,477. 2 Claims. (Cl. 211—41.)

1. In a pan lid holder, a skeleton frame comprising a horisontal loop having parallel side rods and connecting end rods, a pair of perpendicular guide rods carried by each side rod intermediate the ends thereof with one pair of guide rods longer than the other pair, a hanger rod swiveled to the upper ends of the longer pair of guide

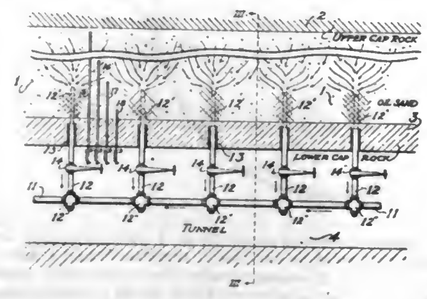


rods, and an outwardly arched cross-head at the upper ends of the shorter pair of guide rods to provide a clearance passage for a lid handle.

1,667,267. COMBINATION PIANO JACK AND TRUCK. ELBRIDGE S. PITCHER, Auburn, Me. Filed Apr. 12, 1926. Serial No. 101,522. 3 Claims. (Cl. 280—44.)

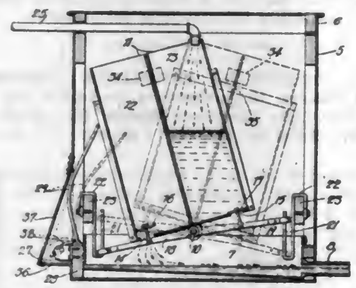
3. In combination with a piano, a shaft journaled in the base of the piano, a roller frame fixed on the shaft at one end of the latter, and a roller frame fixedly mounted on the other end of the shaft, said frame issuing into a handle receiving socket for rotating the shaft, substantially as described.

1,667,268. DRIVESCREW EXPANSION AND METHOD. HENRY W. PLEISTER, Westfield, N. J., assignor, by mesne assignments, to Henry B. Newhall Corporation, Garwood, N. J., a Corporation of New Jersey. Filed May 11, 1926. Serial No. 108,230. 4 Claims. (Cl. 85—2.4.)



1. The method of manufacturing a wire nail expansion consisting in bending a strand of wire back on itself to form a two strand wire, then bending and twisting the two strand wire on itself to form a four-strand expansible shield, the strands of which are in a position to cooperate with long pitch spiral threads of a drive screw.

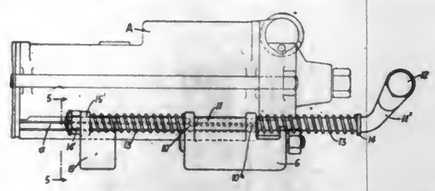
1,667,269. OIL-MINING METHOD AND APPARATUS. LEO RANNEY, New York, N. Y., assignor to Standard Oil Development Corporation, a Corporation of Delaware. Filed June 18, 1926. Serial No. 116,857. 7 Claims. (Cl. 262—1.)



1. In securing hydrocarbons from a hydrocarbon-bearing stratum by means of a collecting system arranged in a mine gallery outside the stratum but adjacent thereto,

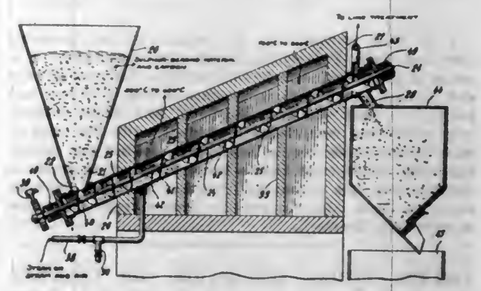
the improvement which comprises establishing a plurality of test points within the stratum, each giving substantially immediate indicia of changing conditions there-

in, determining from said indicia the conditions existing in the stratum at such points, and regulating the operation accordingly.



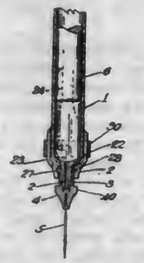
1,667,270. LIQUID METER. HARRY MOYER RYDER and LEON J. BAILEY, Bradford, Pa., assignors to Petroleum Reclamation Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 16, 1927. Serial No. 175,703. 6 Claims. (Cl. 249—34.)

1. A liquid meter comprising a tank unit, including a pair of tanks, each of said tanks having an outlet opening, a shaft supporting said unit for oscillatory movement thereon, a valve for each of said openings, an operating lever for each valve, each of said levers being pivotally connected to said shaft and adapted to move with said unit through a portion of its cycle of operation, and means for alternately obstructing the movement of said levers whereby said valves are alternately opened.



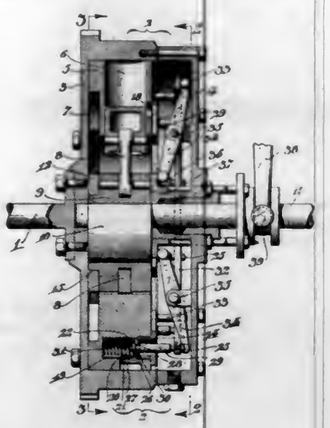
1,667,271. HANDLE ATTACHMENT FOR DRILLS. SAMUEL SEAVER, Haileybury, Ontario, Canada, assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed May 16, 1925. Serial No. 30,661. 11 Claims. (Cl. 121—36.)

1. The combination with a drill of the cradle or shell mounted type of a handle device for adapting the drill to manual operation comprising a block secured to the feed nut of the drill, a rod slidably mounted upon said block and carrying a handle at one end, resilient means on said rod on opposite sides of said block yieldingly to limit the movement of said rod, and means on said rod engaging the cradle or shell engaging portions of the drill for preventing angular movement of said rod rela-



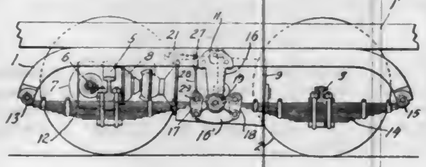
tive to said block, certain of said resilient means being arranged yieldingly to maintain said last named means in spaced relation with said block.

1,667,272. PROCESS FOR THE PRODUCTION OF GAS. HAROLD HARDY SMITH, Johannesburg, South Africa, assignor to Minerals Separation North American Corporation, New York, N. Y., a Corporation of Maryland. Filed Sept. 14, 1922. Serial No. 588,127. 3 Claims. (Cl. 23—181.)



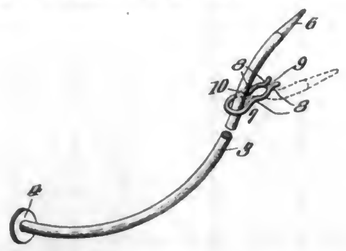
3. A process of producing a gas which consists in passing steam and a restricted amount of air through a mixture including sulphur-bearing material and carbon to produce a gas consisting largely of hydrogen sulphide.

1,667,273. SYRINGE SHIELD. WILLIAM EVERETTE STEWART, Nashville, Tenn., assignor to Eisele & Company, Nashville, Tenn., a Corporation of Delaware. Filed June 22, 1926. Serial No. 117,693. 9 Claims. (Cl. 128—218.)



1. A syringe shield comprising a tubular body having a bifurcated lower portion, the furcations normally resiliently held in spaced relation, and means co-operating with the furcations for pressing them together to removably clamp a needle base and the lower portion of a syringe barrel or tube.

1,667,274. FLUID SPEED TRANSMITTING MECHANISM. TIMOTHY WALSH, HARRY S. COOVER, and JOHN V. ABRONSKI, Philadelphia, Pa. Filed Dec. 22, 1925. Serial No. 76,959. 8 Claims. (Cl. 192—60.)

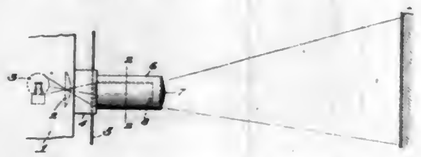


1. In fluid transmitting mechanism of the character described, inlet controlling mechanism consisting of a series of piston cylinders having ports in their peripheries and pistons mounted to reciprocate in the cylinders and adapted to close and open the ports, and outlet controlling mechanism comprising individual units for each of said cylinders, sleeves in said units, means for actuating said sleeves, said means being arranged to function preliminarily for removing resisting pressure without actuating said sleeves and to immediately thereafter actuate said sleeves.

1,667,275. SPRING SUSPENSION FOR VEHICLES. OLIVER F. WARHUS, Albany, N. Y., assignor to Versare Corporation, a Corporation of New York. Filed Aug. 6, 1926. Serial No. 127,504. 5 Claims. (Cl. 280—104.)

1. In a vehicle a body frame, front and rear sets of wheels on which the body frame is supported, at least one of said sets of wheels comprising a group of four wheels, an equalizing spring suspension system for said group of four wheels comprising a set of rear springs each of which at its rear end has a pivot-pin mounting which is fixed with respect to the body frame, a set of front springs each of which at its forward end has a pivot-pin mounting which is fixed with respect to the body frame, each of said springs being associated with one of the wheels of said group, an equalizing bar between each front and rear spring and having a pivotal mounting which is fixed with respect to the body frame, and shackles connecting each equalizer bar with the adjacent ends of the two corresponding springs, said shackles being connected to the springs and equalizer bar by pivot-pin connections, the parts of said equalizing spring suspension system being unconnected with any device having elastic reaction.

1,667,276. SHOE FASTENING. JOSHUA WEINGARTEN, Philadelphia, Pa. Filed Oct. 24, 1927. Serial No. 228,307. 1 Claim. (Cl. 24—143.)

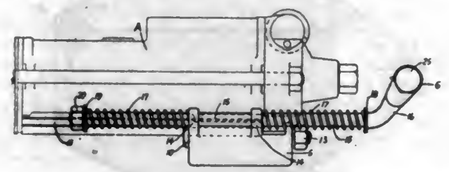


A fastening device comprising a lacing strand, an anchoring element at one end of the strand, and a guard consisting of a U-shaped member having its width alternately expanded and contracted, the lacing strand passing through an expanded portion of the guard in one direction, over a contracted portion, and through a second expanded portion in the opposite direction.

1,667,277. TREATMENT OF FINE COAL. ELTOFT WRAY WILKINSON, Queens Village, N. Y., assignor to Minerals Separation North American Corporation, New York, N. Y., a Corporation of Maryland. Filed Aug. 4, 1926. Serial No. 127,183. 7 Claims. (Cl. 209—166.)

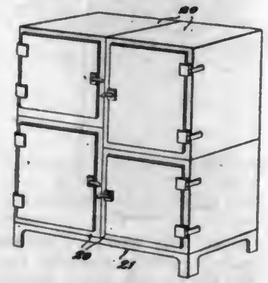
1. The process of treating fine coal which consists in agitating the fine coal in an aqueous pulp with the addition of a fraction of one per cent of an agglomeration improving sulphur-containing organic compound under such conditions that there is obtained an oil-coated floating coal, and separating the coal from excess water.

1,667,278. PROJECTING APPARATUS. ARTHUR W. WOLFE, Chicago, Ill., assignor of one-half to The Diamond Ray Light Company, Chicago, Ill. Filed Mar. 21, 1927. Serial No. 177,063. 2 Claims. (Cl. 88—24.)



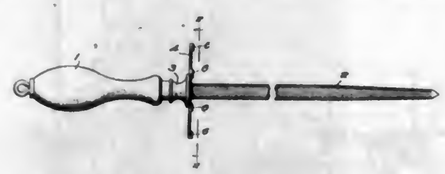
1. In a projection apparatus, a film having a series of irregular designs thereon, a tubular casing in front of the film, a substantially V-shaped support within said casing having its free ends bent inwardly and downwardly to form depending fingers, and a substantially V-shaped member having opposed reflecting surfaces positioned in said casing and having its upper edges disposed beneath said fingers whereby to retain the same against vertical movement in the casing.

1,667,279. PACKING DEVICE. FLOYD P. ALLEN, Cleveland, Ohio, assignor to The Enamel Products Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 29, 1925. Serial No. 53,262. 5 Claims. (Cl. 206—60.)



4. As an article of manufacture, means for packing tray-like articles having corners, said means comprising a protective wrapping adapted to wrap about both edges of the corners of two of such articles adjacently placed and have its ends tucked in therebetween.

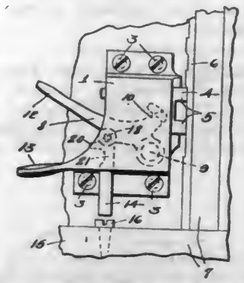
1,667,280. DETACHABLE HANDLE FOR DRILLS. FORREST H. BLANDINO, Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed July 10, 1924. Serial No. 725,315. 15 Claims. (Cl. 121—36.)



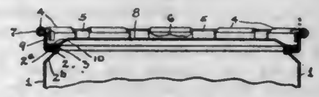
2. The combination of a drill of the cradle or shell mounted type and a handle device detachably secured to the drill comprising a block having grooves receiving the projecting portions of the cradle or shell engaging parts of the drill with a sliding fit, means utilizing the feed nut projection of the drill for securing said block upon the drill, and a handle attached to said block to adapt the drill for use as a manually supported tool.

1,667,281. REFRIGERATOR. SEBASTIAN G. BRINKMAN, Perth Amboy, N. J. Filed Feb. 23, 1927. Serial No. 170,363. 5 Claims. (Cl. 217—7.)

1. A refrigerator including a plurality of molded spaced double walled porcelain refrigerator units, each having spaces for a vacuum between its walls, and integrally formed reinforcing areas built up between the several walls of each unit.



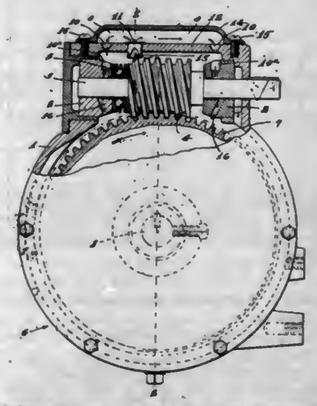
1,667,282. GUARD FOR KNIFE SHARPENING STEELS. PRESTON D. CALLUM, Baltimore, Md. Filed Sept. 9, 1925. Serial No. 55,210. 12 Claims. (Cl. 2—17.)



1. In a guard for a knife sharpening steel, a disk and a plurality of members projecting from the plane of the disk.

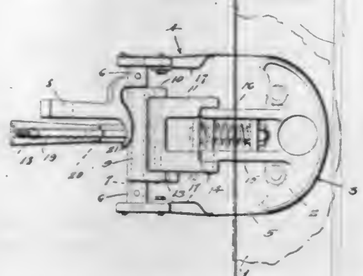
1,667,283. COMBINED SASH HOLDER AND STARTER. EDWARD F. CHAFFEE, Syracuse, N. Y., assignor to The O. M. Edwards Company Inc., Syracuse, N. Y., a Corporation of New York. Filed Feb. 3, 1927. Serial No. 165,513. 13 Claims. (Cl. 292—5.)

1. A sash starter and holder comprising a base, sash holding mechanism carried by the base and including a movable operating element, a sash starter member pivotally connected to said element and movable downwardly thereby to pry against the window sill when said element is operated to withdraw the mechanism, and means for shifting the starting member laterally on its pivot at the end of the operating movement of said element, in combination with a raised abutment on the sill against which the starter member thrusts prior to its lateral movement.



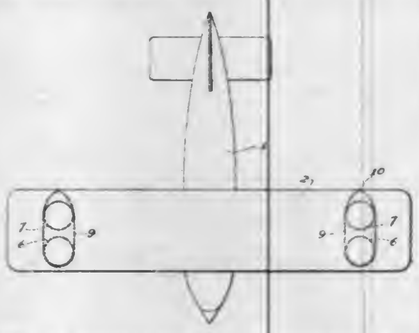
1,667,284. METAL CONTAINER. ALFRED J. CHAMBERLAIN, Lakewood, Ohio. Filed Aug. 9, 1924. Serial No. 731,229. 3 Claims. (Cl. 220—59.)

1. In a metal container, the combination of a body portion provided adjacent its open end with an inwardly directed flange formed by folding the material of said body inwardly, the upper portion of said flange lying at substantially right angles to said body portion to form a seat and the lower portion of said flange lying in close contact with such upper portion for a short distance adjacent its inner edge and then inclining downwardly and outwardly whereby to form an intermediate buttress for the seat, and a cover adapted to fit within such end of the container body and having a complementary seat.



1,667,285. WORM-OILING MEANS. ALBERT B. CLISSON, Geddes, N. Y., assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Nov. 22, 1923. Serial No. 676,442. 6 Claims. (Cl. 184—11.)

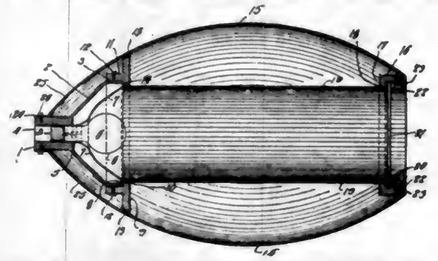
1. In a lubricating means for the bearings of worms, the combination of a casing having bearings therein, a shaft journalled in the bearings and having a worm



thereon, a worm gear mounted in the casing and meshing with the worm, a portion of the casing enclosed with the worm gear, constituting an oil reservoir, an oil receiver arranged in proximity to the worm, and having an inlet arranged near the worm for receiving oil thrown by the worm, and outlet passages leading from the receiver to the bearings.

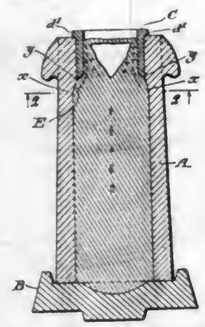
1,667,286. NECKBAND CLAMP FOR SHIRT-PRESSING MACHINES. ALBERT B. CLISSON, Syracuse, N. Y., assignor to The Prosperity Company Inc., Syracuse, N. Y., a Corporation of New York. Filed Mar. 8, 1926. Serial No. 93,075. 13 Claims. (Cl. 68—1.)

1. A neck band clamp for shirt pressing machines comprising a body having a curved surface against which the front of the neck band is clamped, a clamp in the form of a loop having its opposite end portions pivotally mounted to enable the intermediate portion of the loop to swing into and out of position opposed to said surface and means tending to move the loop on its pivot and means for moving it bodily toward and from said surface.



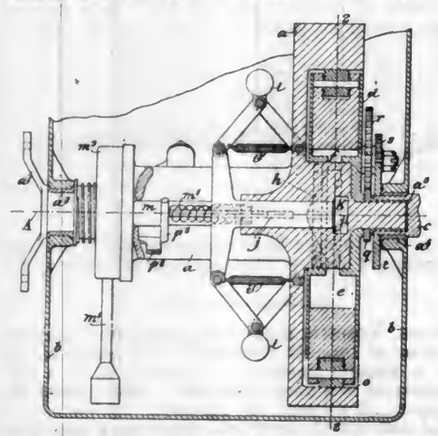
1,667,287. SOUND-PROJECTING HORN ON WING STRUCTURE OF AIRCRAFT. JAMES M. COBURN and BERNARD KNAPP, Kansas City, Mo., assignors to Plane Speaker Corporation, Kansas City, Mo., a Corporation of Delaware. Filed June 2, 1926. Serial No. 113,182. 8 Claims. (Cl. 244—31.)

1. In an aeroplane structure, the combination with the wing structure of sound projecting horns mounted in a manner to constitute an integral supporting structural member thereof.



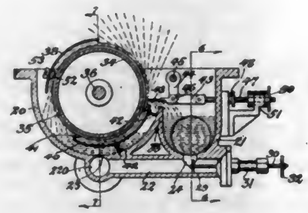
1,667,288. AUTOMOBILE HEADLIGHT. CHARLES BOOTH FAIRCHILD, Chicago, Ill., assignor of one-half to Louise A. Moore Fairchild, Chicago, Ill. Filed Apr. 24, 1926. Serial No. 104,344. 2 Claims. (Cl. 240—41.)

1. An automobile headlight comprising a casing, a support mounted in the casing, the support having a housing integral therewith, a rim upon the housing, a parabolic reflector mounted upon the rim within the housing, a diaphragm mounted upon the rim, the diaphragm clamping the reflector to the housing, a cylindrical member mounted at one end in the diaphragm,



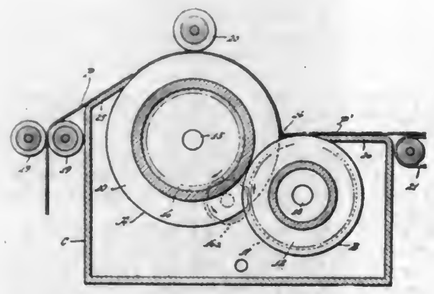
the cylindrical member bearing against the reflector and means for supporting the other end of the cylindrical member within the casing.

1,667,289. INGOT MOLD. EMIL GATHMANN, Baltimore, Md. Filed Aug. 8, 1927. Serial No. 211,431. 8 Claims. (Cl. 22—139.)



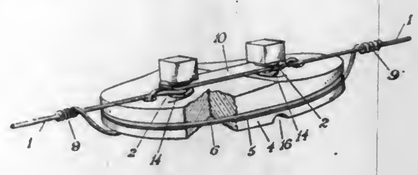
1. A metallic ingot mold having a chamber formed with rounded corners extending upwardly and inwardly from bottom toward the top and having relatively narrow parallel upper wall portions formed with corners which are relatively acute.

1,667,290. VARIABLE POWER-TRANSMISSION MECHANISM. ERNEST CONWAY GAYER, London, England. Filed Dec. 23, 1924, Serial No. 757,637, and in Great Britain Dec. 28, 1923. 2 Claims. (Cl. 74—34.)



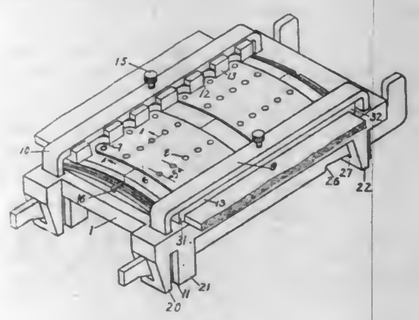
1. In a variable power transmission mechanism, including a driving shaft, a rotary driving unit connected thereto, a rotary driven unit, and a rotary unit intermediate of and co-axial with the said driving and driven units; a torque responsive device connecting said driving shaft and driving unit, comprising a rotatable casing inwardly threaded at one end to receive corresponding threads formed on said driving shaft, a hydraulic cylinder in said casing filled with a suitable fluid, a plunger also formed on the end of said driving shaft, passing through a stuffing box into said cylinder, a second substantially smaller plunger extending from the opposite direction through an oppositely disposed stuffing box, into the other side of said cylinder, its outer end forming a connecting rod leading to a valve arrangement in said driving unit.

1,667,291. APPARATUS FOR SPRAYING AND TREATING LIQUIDS. CHARLES O. LAVETT, Buffalo, N. Y., assignor, by mesne assignments, to Buffalo Foundry & Machine Co., Buffalo, N. Y., a Corporation of New York. Filed Aug. 11, 1924. Serial No. 731,254. 14 Claims. (Cl. 299—68.)



1. An apparatus for spraying liquid comprising a feed trough adapted to contain the liquid to be sprayed, a cylinder rotatably mounted in said trough and provided on its periphery with circumferential ribs, the lower parts of said cylinder and ribs positioned to dip into the liquid and project the same in the form of a spray and means for confining the liquid close to the underside of said cylinder and ribs.

1,667,292. MACHINE FOR MAKING ELASTIC PAPER. WILLIAM A. LORENZ, West Hartford, Conn., assignor to The Otaka Fabric Company, Hartford, Conn., a Corporation of Connecticut. Filed Apr. 9, 1927. Serial No. 182,303. 7 Claims. (Cl. 92—69.)

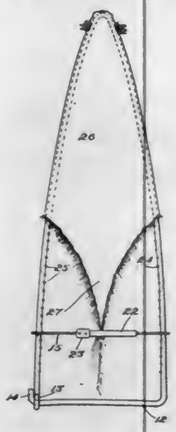


1. In a machine for crinkling paper webs, a cylinder, a rotating doctor intersecting the periphery of said cylinder, and means for driving the doctor in the same direction as but at a slower speed than said cylinder.

1,667,293. ELECTRIC SWITCH. JOHN R. MARSHALL, McKean, Pa. Filed June 5, 1925. Serial No. 35,094. 3 Claims. (Cl. 200—153.)

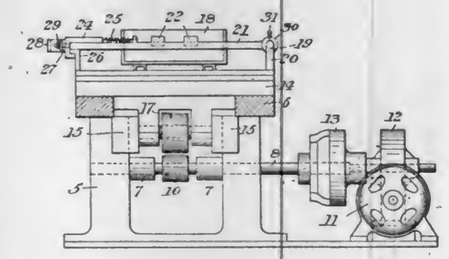
1. In an electric switch, the combination of an insulating block having perforations therethrough and a surrounding re-enforcing wire; conductors looped through the perforations and insulated from the surrounding wire said conductors supporting the block; and a switch plate detachably connecting said conductors.

1,667,294. BELT FASTENING AND RIVETING APPARATUS. STANLEY D. MYERS, Roseland, N. J. Filed Feb. 12, 1927. Serial No. 167,638. 15 Claims. (Cl. 218—19.)



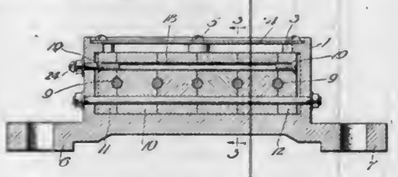
1. An apparatus for fastening and riveting belts utilizing perforated metal grip plates and rivets having split ends comprising; a base member to receive the two ends of the belt, said base member having a series of transverse ridges and grooves, a pair of clamps disposed one on each side of the base member so as to engage a belt end, said clamps being spaced apart to receive said grip plates therebetween, means for drawing the clamps tightly down onto the belt ends, and means associated with at least one of the clamps to position said grip plates so the perforations in the grip plates will be substantially positioned over ridges in the base member whereby when a split rivet is inserted in a perforation and driven through the belt the opposite portions of the rivet will follow the contour of the grooves on opposite sides of a given ridge and be forced by the next adjacent ridge to enter the pulley side of the belt thereby clinching the rivet.

1,667,295. PELT OR HIDE STRETCHER. JOHN J. SMITH, Allston, Mass. Filed Nov. 3, 1925. Serial No. 66,499. 10 Claims. (Cl. 149—21.)



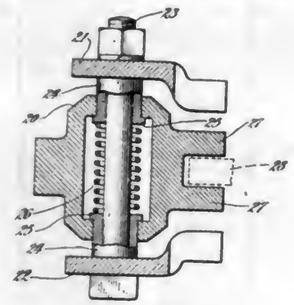
1. A hide stretcher comprising a frame having spaced expansible and contractible springs arms, a spreader bar slidable on said arms and connecting the arms together,

said bar having means for permitting relative movement of said arms longitudinally of the bar and also having



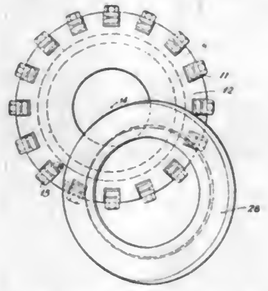
means for permitting movement thereof relatively to the arms in a transverse direction to lock the arms in various adjusted positions.

1,667,296. MOLDING MACHINE. SAMUEL BLAINE STINE, Osceola Mills, Pa. Filed Aug. 11, 1927. Serial No. 212,315. 6 Claims. (Cl. 25—41.)



1. Molding apparatus comprising a mold table, means for vibrating the same, hanger bars for holding a mold box upon the table, and means for adjusting said hanger bars in a horizontally transverse direction, for adapting them to mold boxes of various dimensions.

1,667,297. TRAIN-LINE COUPLER. HERBERT E. VAN DORN, Chicago, Ill. Filed May 9, 1921. Serial No. 468,059. 4 Claims. (Cl. 173—332.)

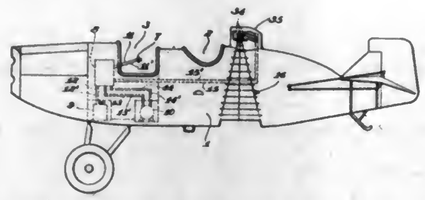


1. In a coupler, a casing open at the front end, a body of insulating material arranged in said casing and adapted to be taken out of and placed in the casing through said open end, contacts projecting from said body of insulating material beyond the front end of the casing, bolts passing transversely through said body and said casing to prevent displacement of said body in the longitudinal direction, and set screws arranged between one wall of the casing and said body for holding said body against movement lengthwise of the bolts.

1,667,298. RAILWAY DRAWBAR. HERBERT E. VAN DORN, Chicago, Ill. Filed Feb. 16, 1927. Serial No. 168,609. 3 Claims. (Cl. 213—12.)

1. In combination, a drawbar having at its front end a housing provided with a longitudinal bore extending through the same, a cylindrical stem fitted in said bore so as to be rotatable therein, means at the front end of the stem for supporting a coupler head, a shoulder on the stem engaged with the front end of the housing, a stud screwed into the rear end of the stem, a pin extending transversely through the stem and stud, and a nut on the stud bearing against the rear end of the housing.

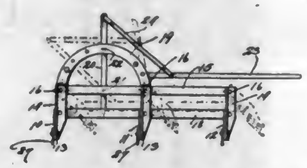
1,667,299. GEAR CUTTER. ERNEST WILDHABER, Brooklyn, N. Y., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Filed Mar. 16, 1927. Serial No. 175,859. 20 Claims. (Cl. 29—105.)



1. A gear cutter blade having a cutting portion provided with front, end, side, and back faces, the front face being concave and forming with the side faces and end face two side and an end cutting edge, said side faces being curved longitudinally from front to back, said side faces and end face being relieved with reference to said cutting edges.

20. A gear cutter comprising a head adapted to be rotated and carrying a plurality of cutting blades, each of said cutting blades having a cutting portion projecting from said head in the general direction of the axis of said head and provided with front, end, side, and back faces, said front face being concave from side to side and inclined rearwardly from the end face toward said head and forming with the side faces and end face a pair of side cutting edges and an end cutting edge, each of said blades being so positioned on the head that a line drawn radially from the axis of the head will contain points on

the opposite side cutting edges, said blades being of equal width in a plane perpendicularly to the axis of the head and corresponding side cutting edges of the blades being equally inclined to said plane.



1,667,300. AEROPLANE AMPLIFIER. SAMUEL E. ADAIR, Chicago, Ill., and BERNARD KNAPP, Kansas City, Mo., assignors, by direct and mesne assignments, to Plane-Speaker Corporation, Kansas City, Mo., a Corporation of Delaware. Filed May 12, 1925. Serial No. 29,839. 4 Claims. (Cl. 244—31.)

1. The combination of an aircraft having a body comprising longerons and a sheathing, a sound-projecting horn mounted within said aircraft, said horn being suspended within the said body and resting at its lower discharge end upon spaced apart longerons, the said discharge end of the horn opening through the bottom of said body, and the said sheathing adjacent the discharge end of the horn forming a substantial continuation of the sides thereof.

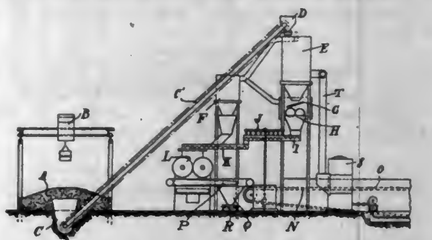
3. A sound projecting horn comprising four similarly shaped trapezoidal walls secured to each other at their adjacent edges to form a tubular body, partitions disposed within the interior of the body dividing it into a plurality of similar compartments, a cap piece rigidly secured to the smaller end of the body and provided with openings extending therethrough and communicating with each of said compartments, and a sound conveying tube secured in each of said openings.

1,667,301. ADJUSTABLE ROAD DRAG. AARON T. BASS, Eaton, Colo. Filed Feb. 19, 1927. Serial No. 169,594. 2 Claims. (Cl. 37—175.)

2. A leveler or road drag including a plurality of transversely extending blades, upwardly extending angle irons attached to each blade at the middle and ends thereof, upper and lower longitudinally extending bars pivoted at their ends to the upwardly extending angle irons of the forward and rear blades and at their middles to the upwardly extending angle irons of an intermediate blade, a lever pivoted to one of the longitudinally extending bars and pivotally connected to the other bar, an arcuate member attached to certain of said angle irons and over which said lever moves, means for locking said lever in any desired position on the arcuate member, a second lever pivoted to the arcuate member, and a link connecting the second lever to the first lever.

1,667,302. DISPENSING RECEPTACLE. ROBERT A. BERNHARD, Rochester, N. Y. Filed July 17, 1925. Serial No. 44,406. 1 Claim. (Cl. 215—38.)

In combination, a liquid containing and dispensing tube provided with a tapering neck portion having a capillary outlet orifice therein, a flexible ring inserted upon the base of said tapering neck portion and being forced inwardly thereon and expanded thereby with its entire inner peripheral face in gripping engagement with said tapering neck portion, a cap adapted by an inward movement upon the neck of the bottle to surround

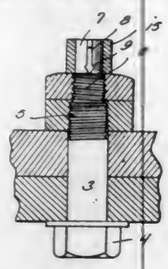


and tightly grip the entire outer peripheral surface of the ring by which it is held in spaced relation to the neck of the bottle and a plastic body disposed within the cap and adapted to be pressed against the end of the neck to close said orifice.

1,667,303. FLEXIBLE METAL WALL AND METHOD OF MAKING SAME. FRED K. BEZZENBERGER, Cleveland Heights, Ohio, assignor, by mesne assignments, to The Fulton Syphon Company, Knoxville, Tenn., a Corporation of Delaware. Filed July 26, 1924. Serial No. 728,375. 2 Claims. (Cl. 148—4.)

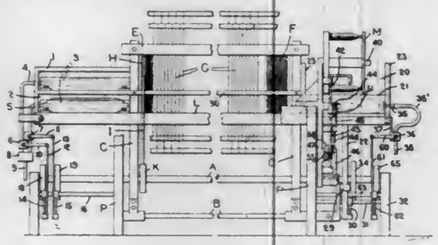
1. In a method of making flexible deeply corrugated tubular metal walls, the steps which consist in forming a tube of soft ductile metal into a deeply corrugated tube, and then alloying with the metal of said tube a substance capable of increasing the elastic limit and tensile strength thereof.

1,667,304. MANUFACTURE OF FUEL BRIQUETTES. ERNEST WINDSOR BOWEN, London, England. Filed Sept. 27, 1927, Serial No. 222,322, and in Great Britain Sept. 30, 1926. 3 Claims. (Cl. 44—16.)



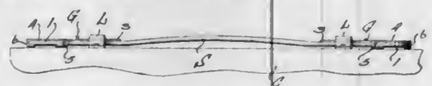
1. A metnod of the kind set forth for the manufacture of fuel briquettes characterized by the separation of the fine dust or flour from the granular portion of the fuel while dry, and the re-introduction of a definite proportion of said dust or flour into the granular material after the latter has been mixed with the binder.

1,667,305. NUT LOCK. GEORGE W. BOWMAN, Seymour, Tex. Filed July 16, 1927. Serial No. 206,275. 2 Claims. (Cl. 151—27.)



1. The combination in a nut lock, of a bolt having a threaded portion and a terminal portion, the latter with a diametrical kerf extending to its end and enlarged at the inner end of the kerf, a nut on the threaded portion

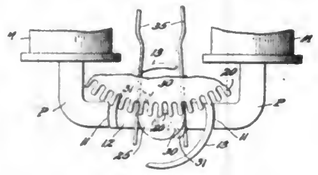
of the bolt, a key disposed in the kerf of the bolt and having an enlargement or head at its inner end and also having a projection at its outer end, and an annulus re-



ceiving the terminal portion of the bolt and the key and opposed to the outer side of the nut and having a notch receiving or seating the said projection of the key.

1,667,306. LOOM. JOHN C. BROOKS, Paterson, N. J., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Sept. 9, 1925. Serial No. 55,398. 13 Claims. (Cl. 139—20.)

1. In a loom having two warp sheds, a lay, two superposed shuttle boxes on one end of the lay, a single shiftable shuttle box on the other end of the lay, means for throwing a shuttle from one of the two shuttle boxes through one warp shed, means for simultaneously throwing a shuttle from the single shuttle box through the other warp shed, and means to shift the single shuttle box after the shuttle is thrown therefrom into position to receive the shuttle coming from the opposite end of the lay.

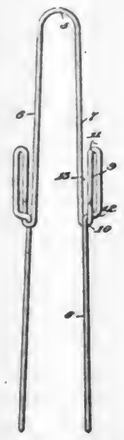


1,667,307. GUARD FOR HAND STRAPS. WILLIAM H. BUCKINGHAM, Mayfield, Pa., assignor of one-half to Samuel Salzburg, Mayfield, Pa. Filed Mar. 12, 1927. Serial No. 174,985. 1 Claim. (Cl. 190—57.)

In combination with a hand strap provided with a cross head at each end, a guard for each end portion of such strap comprising a plate disposed over a portion of a face of the strap and the head, the marginal portions of the plate being provided with flanges clinching the marginal portions of the strap.

1,667,308. SILENT SECONDARY CLOCK. THADDEUS STEPHENS CASNER, Plainfield, N. J., assignor to Radio Electric Clock Corporation, New York, N. Y., a Corporation of Delaware. Filed May 29, 1926. Serial No. 112,542. 5 Claims. (Cl. 58—26.)

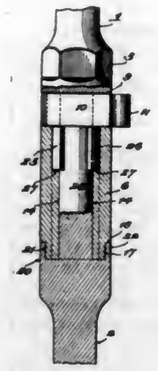
4. Mechanism for intermittently rotating a shaft or the like including in combination, a toothed wheel mounted on the shaft, a second shaft rotatable about a fixed axis, two spaced pins carried by the second shaft and normally lying in adjacent notches of the toothed wheel, and means for intermittently rotating said second shaft



thru a half revolution, said toothed wheel being advanced one tooth by said pins for each half revolution of said second shaft.

1,667,309. METHOD OF ORNAMENTING STONE. ELROY A. CHASE, Northfield, Vt. Filed Apr. 4, 1927. Serial No. 180,799. 4 Claims. (Cl. 41—39.)

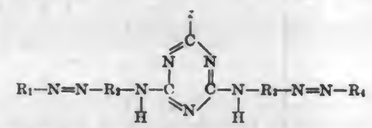
1. A method of ornamenting a surface of granite or other similar material, which consists in coating the surface to be ornamented with a layer of sand-resisting compound, stencilling the outline of a desired figure therein, sand-blasting the stencilled outline in the stone to a relatively slight depth, removing the compound from the figure within the sand-blasted outline shaping the exposed surface of the figure to a desired contour, re-surfacing the contoured figure with compound, removing the compound from the background of the design, and sand-blasting the background to a desired depth.



1,667,310. HAIRPIN. SPRY OWEN CLAYTOR, Newark, Ohio. Filed Aug. 5, 1926. Serial No. 127,270. 2 Claims. (Cl. 132—50.)

1. A wire hairpin having a head portion and two legs, each of said legs comprising an upper portion and a lower portion, said portions being integrally joined by a twisted

loop extending from the junction of said portions toward said head and spaced from said upper portions to form slots adapted to receive strands of hair in compressive engagement.

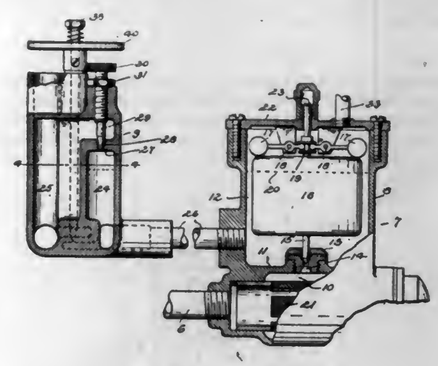


1,667,311. ROD COUPLER. JOHN D. FITZGERALD, San Diego, Calif. Filed Apr. 22, 1926. Serial No. 103,926. 1 Claim. (Cl. 287—103.)

A coupler for rods and the like comprising socket and piston members adapted for telescopic engagement and respectively having cooperating groove and wing elements for interlocking engagement on the turning of one of said members relative to the other whereby said elements are held against longitudinal movement, said socket member having a transverse key-way extending therethrough and a recess formed at one end thereof, a locking face formed on the piston member and adapted to be rotated in alinement with the wall of the key-way, and a key adapted to be inserted in said key-way to engage said locking face and to have its extremity turned into said recess.

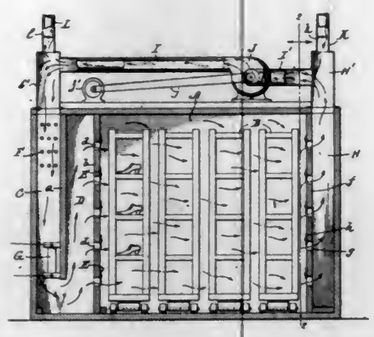
1,667,312. AZODYESTUFFS AND PROCESS OF MAKING SAME. HERMANN FRITZSCHE, EDUARD KRUMMENACHER, HANS GUBLER, and OTTO KAISER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Dec. 21, 1923, Serial No. 682,107, and in France Jan. 9, 1923. 4 Claims. (Cl. 260—27.)

4. As new products the herein described azo dyestuffs which contain the cyanuric nucleus, and which correspond with the general formula—



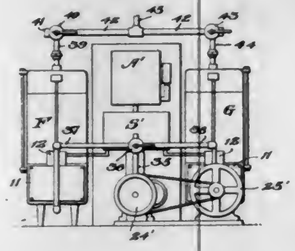
wherein R_1, R_2, R_3 and R_4 represent any aromatic nuclei which may carry any substituents, and wherein ε is one of a group of metalloids comprising O, S, N and Cl and which may be linked to hydrogen or radicals which may take its place, which dyestuffs form powders more or less intensely colored, dissolving in water to solutions of all colors of the spectrum, and of those which are obtained by combination of the said colors, and dyeing the textile fiber similar tints.

1,667,313. FLOOR-LAYING DEVICE. PASQUALE GALASSI, New York, N. Y. Filed May 19, 1927. Serial No. 192,661. 10 Claims. (Cl. 94—18.)



3. A dividing strip for terrazzo and similar floors, comprising a strip member adapted to terminate on a level with and to divide the upper layer of the floor, and a supporting member therefor, comprising a rib member adapted to be inserted into the floor bed, and supporting means laterally extending therefrom, adapted to rest on top of said bed, said rib member being adapted to receive the lower edge of said strip member and being permanently connected thereto, by forcing outwardly portions of the adjoining metal surfaces of said two members at spaced intervals along the length of said strip, said outwardly forced portions forming laterally extending prongs adapted to anchor said strip into said bed.

1,667,314. FLOW REGULATOR FOR OIL BURNERS. JACKSON G. GILMORE and AUGUSTUS J. FRAME, Columbus, Ohio. Filed Sept. 1, 1926. Serial No. 133,056. 2 Claims. (Cl. 158—36.)



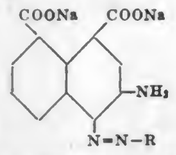
1. A fuel regulator for oil burning systems comprising in combination with a fuel line and a source of air pressure, a casing including a pair of separate chambers, means situated in said fuel line for maintaining a normal liquid fuel level within one of said chambers, a valved regulated port carried by said casing and disposed above said fuel level and serving to establish communication between the two chambers, means for introducing air into said fuel line to cause the liquid to elevate and flow through said port and into the other of said chambers, and a supplemental valve carried by said casing and serving to regulate an orifice located below said fuel level permitting of a constant flow of liquid between said chambers.

1,667,315. METHOD OF CONDITIONING SHOES AND ANALOGOUS PRODUCTS. GORDON D. HARRIS, Freeport, N. Y., assignor to The Industrial Dryer Corporation, Stamford, Conn., a Corporation of Connecticut. Filed Jan. 17, 1925. Serial No. 3,139. 4 Claims. (Cl. 34—19.)

1. In the art of conditioning products the different components of which have varying moisture contents, the process which consists in exposing the products within a chamber to a drying atmosphere the humidity of which corresponds substantially to that component having the lowest moisture content, circulating the atmosphere within a closed circulatory path which includes said chamber for the product, heating the atmosphere to a desired temperature during the repeated cycles of its circulation, and conditioning the drying atmosphere by discharging from its circulatory path a given volume of moist air and feeding to the circulatory path a corresponding volume of fresh atmospheric air.

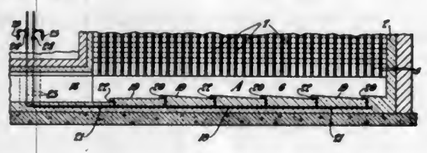
1,667,316. DEHYDRATOR. HARRY BUXTON HARTMAN and FRANK E. HARTMAN, Scottdale, Pa., assignors to Electric Water Sterilizer and Ozone Company, Scottdale, Pa., a Corporation of Pennsylvania. Filed Sept. 16, 1925. Serial No. 56,736. 8 Claims. (Cl. 34—9.)

1. In a dehydrator, a dehydrating material holder section, an air receiving section, a dry air discharging cap section, an electrical heating element in the air receiving section, means for manually cutting in said electrical heating element to reactivate the dehydrating material at predetermined periods, and means for automatically cutting out said heating element when the reactivating period has ended.



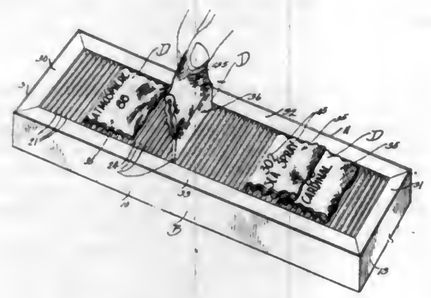
1,667,317. DRY CELL. GEORGE W. HEISE, Bayside, and HARRY H. THOMPSON, Flushing, N. Y., assignors to National Carbon Company, Inc., a Corporation of New York. Filed Nov. 18, 1922. Serial No. 601,882. 6 Claims. (Cl. 136—107.)

1. A dry coil comprising a mix bobbin cathode immersed in electrolyte paste, and an anode in contact with the paste and having a smaller effective area than the corresponding oppositely disposed surface of the mix bobbin.



1,667,318. AZODYESTUFFS DERIVED FROM 1:8-NAPHTHALENE DICARBOXYLIC ACID AND PROCESS OF MAKING THE SAME. MAX ISLER and LUCAS VON MECHEL, Basel, Switzerland, assignors to the Firm: Society of Chemical Industry in Basle, Basel, Switzerland. Filed Aug. 3, 1925, Serial No. 48,004, and in Switzerland Aug. 16, 1924. 8 Claims. (Cl. 260—90.)

5. As new products the herein described new azo dyestuffs corresponding in form of their sodium salts with the general formula:



wherein R means an aromatic residue carrying a hydroxyl group in ortho position to the azo-bridge, which products form reddish-brown to black powders, dissolving in water with yellowish brown to red, violet and brown, in sulfuric acid with greenish-yellow to red, violet and reddish-brown coloration, dyeing wool in an acid bath yellowish-olive to red, brown, violet and greenish-brown tints which are converted by afterchroming into yellowish-olive to red-brown, bordeaux and green tints and yielding when printed on cotton with chromium mordants olive to greenish-gray, gray and brown tints.

1,667,319. REGENERATIVE FURNACE. DAVID B. JONES and FRANK C. SWARTZ, Cleveland, Ohio. Filed Apr. 28, 1926. Serial No. 105,240. 2 Claims. (Cl. 263—19.)

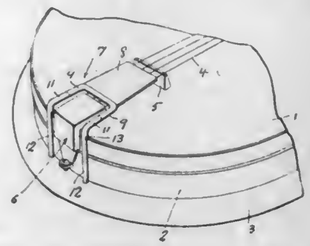
1. The combination with the checker-chamber of a regenerative furnace, having checker-work supported above a plurality of distributing flues extending longitudinally along the bottom of said chamber, of a plurality of fluid pressure nozzles permanently mounted at spaced longitudinal points in the bottom wall of each of said flues, and adapted to direct fluid under pressure along the bottom walls of said flues toward the stack end of said chamber to blow deposits of dust and other foreign matter from said flues into the stack, and means for supplying fluid under pressure to said nozzles.

1,667,320. SAMPLE AND SAMPLE CONTAINER. EDWIN MARSHALL KINSEY, Riverside, N. J. Filed Feb. 23, 1927. Serial No. 170,262. 14 Claims. (Cl. 206—82.)

1. A sample device comprising a box consisting of a body and a cover, the box body being of elongated formation including side walls and end walls and a bottom, with transverse closely spaced partition walls defining a plurality of compartments arranged longitudinally of the box, and samples detachably fitted into said compartments having relatively overlapping flexible portions arranged in stepped relation along the box on top of the partition walls.

1,667,321. VEGETABLE-SLICING MACHINE. JULIUS H. KINTZELE, St. Louis, Mo., assignor to Potato Waffles, Inc., New York, N. Y., a Corporation of Delaware. Filed Jan. 15, 1926. Serial No. 81,502. Renewed Aug. 10, 1927. 19 Claims. (Cl. 146—78.)

1. Apparatus of the character described comprising a pair of angularly arranged endless drive mechanisms, spaced cutting means carried by each of said mechanisms the paths of said cutting means intersecting substantially at a common point, the cutting means of each of said mechanisms being adapted to pass said intersecting point alternately, means for driving said mechanisms, and means for feeding articles to be cut to said intersecting point in the path of travel of said cutting means.



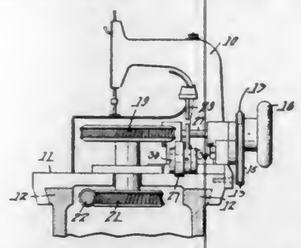
1,667,322. AMMONIA SYNTHESIS PROCESS AND CATALYST. ALFRED T. LARSON, Wilmington, Del., assignor to Lazote, Incorporated, Wilmington, Del., a Corporation of Delaware. Filed July 30, 1925. Serial No. 47,140. 16 Claims. (Cl. 23—237.)

1. A process for producing a catalyst for the synthesis of ammonia which comprises making an intimate admixture of iron oxide, potassium oxide and magnesium oxide, forming the mixture into particles and treating the particles with a hydrogen-containing gas at a temperature of 300°–700° C.

1,667,323. AMMONIA SYNTHESIS PROCESS AND CATALYST. ALFRED T. LARSON, Wilmington, Del., assignor to Lazote, Incorporated, Wilmington, Del., a Corporation of Delaware. Filed Feb. 16, 1926. Serial No. 88,687. 29 Claims. (Cl. 23—237.)

1. A process for producing a catalyst for the synthesis of ammonia which comprises making an intimate mixture of iron oxide, an alkali metal oxide, and an alkaline earth metal oxide, forming the mixture into particles and treating the particles with a hydrogen-containing gas free from permanent catalyst poisons at a temperature of 300–700° C.

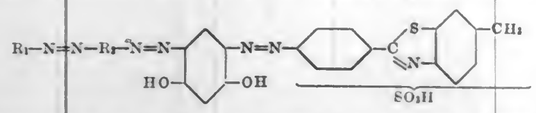
1,667,324. BANJO HAND REST. JOHN LATERRA and FRANK JOY, Paterson, N. J. Filed Jan. 13, 1927. Serial No. 160,938. 2 Claims. (Cl. 84—328.)



1. A handrest for a stringed musical instrument of the class described in the form of a plate to overlie a predetermined portion of the strings, and attaching means for said plate, said attaching means comprising a U-shaped member to the bight portion of which, one end of said plate is integrally connected, and a pair of retaining bolts for said member.

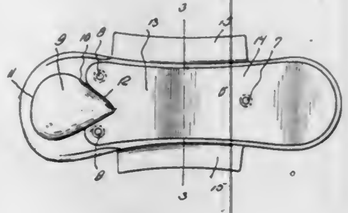
1,667,325. VETERINARY IMPLEMENT. PETER F. LAUWAGIE and JOHN P. KONINGS, Dell Rapids, S. Dak. Filed June 11, 1925. Serial No. 36,443. 1 Claim. (Cl. 128—350.)

A device of the class described comprising an elongated tubular member formed from a single strand of material, said member being tapered from one end toward the other, the convolutions of the strand and major portion of the length of the member being in close contact, and the convolutions of the strand at the smaller end portion being also in close contact, a portion of said convolutions inwardly of the second named portion being spaced apart to provide entrance openings, said member having its opposite ends open, the smaller end of the device being of a diameter approximately two-fifths of the larger end.



1,667,326. SEWING MACHINE. EDWIN H. MARBLE, Worcester, Mass., assignor to Curtis & Marble Machine Company, Worcester, Mass., a Corporation of Massachusetts. Filed Sept. 29, 1927. Serial No. 222,893. 7 Claims. (Cl. 112—2.)

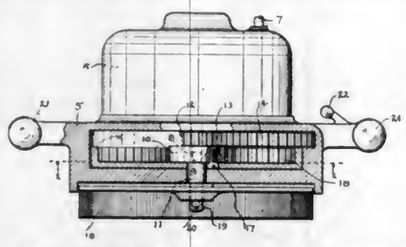
1. In a sewing machine for the purpose described, the combination with a carriage, a stationary rack, and a worm driving device comprising a worm wheel on the top of the carriage, of a slide on the carriage having a shaft thereon, a worm on the shaft meshing with the worm wheel, means for constantly operating the said shaft in all positions thereof, and means for moving the slide back and forth on the carriage to engage and disengage the worm and worm wheel.



1,667,327. TRISAZO DYES DERIVED FROM DEHYDRO-THIO-P-TOLUIDINE-SULPHONIC ACID AND RESORCINOL AND PROCESS OF MAKING SAME. BERTRAM MAYER, Basel, and JOSEF GRIMMER, Neuewelt, near Basel, Switzerland, assignors to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Filed Feb. 24, 1927, Serial No. 170,736, and in Switzerland Mar. 8, 1926. 12 Claims. (Cl. 260—72.)

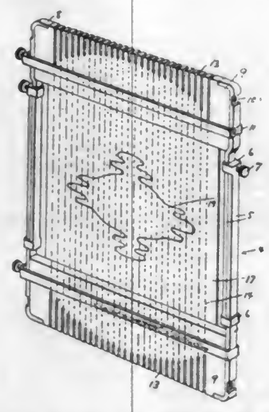
5. As new products the new substantive azo-dyestuffs of the probable general formula:

in which R_1 and R_2 are aromatic nuclei free from hydroxy groups, which may be different from each other and of which at least one carries at least one sulphonic group, the said products forming dark brown to black brown powders which, on addition of soda solution, dissolve in water with yellow brown to red brown and violet brown colors, and which dye cotton very even, yellow-brown to orange-brown, red-brown, and violet-brown tints.



1,667,328. ARCH SUPPORTER. FRANK P. MCCORD, Mexico, Mo. Filed Jan. 25, 1927. Serial No. 163,401. 1 Claim. (Cl. 36—71.)

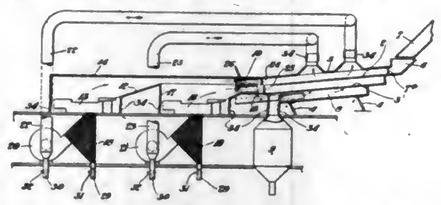
An arch support of the class described comprising a flexible leather sheet and a superimposed resilient metallic strip secured thereto, the leather sheet extending beyond the forward edge of the metallic strip and having a hump formed on the upper edge thereof provided with a V-shaped rear edge, the forward edge of the metallic strip being provided with a V-shaped notch to receive said V-shaped edge.



1,667,329. MEAT-BLOCK SCRAPER AND DRESSER. MAX M. MENZEL, Kenosha, Wis. Filed Oct. 12, 1925. Serial No. 62,026. 1 Claim. (Cl. 144—119.)

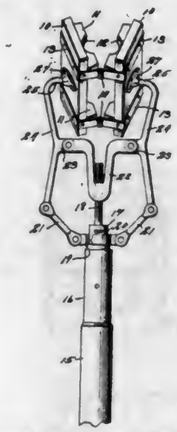
A device of the class described, comprising a body portion, an electric motor carried thereby and having a drive shaft extending into said body portion, a ring gear having teeth on its inner circumferential side within said body portion, a stud shaft having an enlarged head with a ball-bearing therein keyed to said ring gear and projecting from said body portion, the aforementioned drive shaft having its lower end journaled within the bearing in the head of the stud shaft, a gear wheel on the drive shaft, a larger gear meshing with said gear, a shaft for the larger gear, a smaller gear on the last-mentioned shaft

engaging the teeth of the ring gear, and a circular dressing member removably and revolubly mounted on the outer portion of said stud shaft.



1,667,330. HAND LOOM. SUSAN I. ODLIN, Dayton, Ohio. Filed Aug. 10, 1927. Serial No. 212,097. 2 Claims. (Cl. 28—15.)

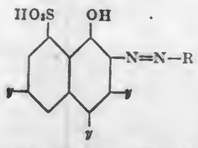
1. As a new product of manufacture, a hand loom comprising a frame embodying longitudinally extensible side bars, end members connected with the end portions of



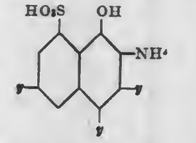
said side bars, said end members being provided on their outer edges with a multiplicity of slots for receptions of warp strands, said slots being graduated in length from the center of the end members toward the ends of the latter, thus permitting arrangement of the strands in substantially arcuate lines for the making of hammocks, together with longitudinally shiftable clamping loops embracing the end portions of the side bars, and said end members.

1,667,331. CLEANING AND SIZING APPARATUS. EDWARD O'TOOLE, Gary, W. Va. Filed Sept. 27, 1927. Serial No. 222,309. 5 Claims. (Cl. 209—44.)

1. A sizing and cleaning apparatus for coal and the like comprising, in combination, a sizing screen and a cleaning table, a wind box connected to the under-side of said table, a fan having its blowing port connected to said box, a hood over said table adapted to receive the air blown upwardly through said table from said wind box, a wind box under said screen, means connecting said hood over said table with said wind box under said screen, a closed passage above said screen and connected to the upper side of said table through which the screened coal is delivered to said table and into which air passing upwardly through said screen is trapped, means for preventing the free passage of air from said table through said closed passage, and a conduit connecting said closed passage to the intake port of said fan whereby a suction is created in said closed passage above said screen and said hood above said table and the air passing upwardly through said screen is returned to said fan.



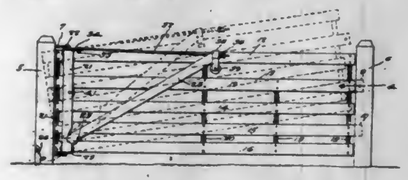
1,667,332. FUSE TONGS. LESTER L. STAHLER, Union City, Ind. Filed Aug. 31, 1926. Serial No. 132,829. 5 Claims. (Cl. 81—3.)



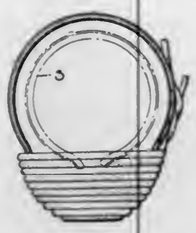
4. A fuse tongs including opposed jaws, hinge members attached to the jaws and pivotally engaged with each other whereby said jaws may be turned into or out of a parallel position, a pole constituting a handle, means for swivelly supporting the jaws upon the pole and permitting the jaws to move toward or from each other, and means for moving the jaws toward or from each other including intorengaging screw-threaded elements, one mounted upon the handle pole and the other operatively connected to the jaws whereby a rotation of the handle pole will act to shift the jaws toward or from each other.

1,667,333. DYESTUFFS AND PROCESS OF MAKING SAME. FRITZ STRAUB, Basel, and HERMANN SCHNEIDER, Riehen, near Basel, Switzerland, assignors to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Filed Mar. 12, 1926, Serial No. 94,317, and in Switzerland Mar. 28, 1925. 16 Claims. (Cl. 260—11.)

1. As a step in the production of complex metal compounds of the dyestuffs corresponding with the general formula:



wherein the *y*'s stand for hydrogen atoms which are replaced at least once and at most twice by sulfogroups which latter are not adjacent to each other and of which at least one is in 3 or 4-position, R meaning the residue of a coupling component having at least two nuclei, the herein described process which consists in the coupling of the diazotized aminohydroxynaphthalene disulfonic acids corresponding with the general formula:

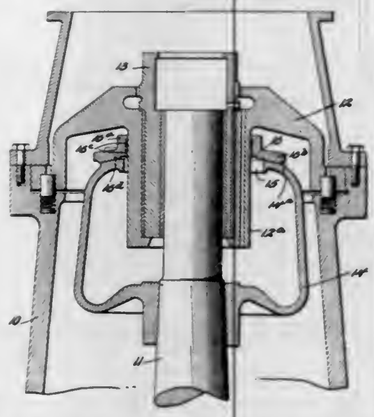


wherein the *y*'s stand for hydrogen atoms which are replaced at least once and at most twice by sulfogroups which latter are not adjacent to each other and of which at least one is in 3 or 4-position, with a coupling component having at least two nuclei in a highly concentrated caustic potash medium.

1,667,334. FARM GATE. HENRY WESLEY THOMPSON, Altamont, Ill. Filed May 7, 1927. Serial No. 189,661. 3 Claims. (Cl. 39—33.)

1. A gate structure of the class described comprising a pair of posts, a pair of brackets projecting from one post, the other post having a pair of recesses, a standard rotatably mounted between the brackets, an arm, means for limitedly hinging one end of the arm to the lower portion of the standard, a plate at the upper end of the standard, a rod loosely engaged with said plate and projecting through an opening in the other end of the arm, an abutment on the rod to limit the downward movement of the arm, a bracket on said other end of the arm, a roller journalled in said bracket, a bracket on said standard, a roller journaled in said second bracket, a gate comprising a plurality of rails connected by a plurality of cross members, one rail of the gate being slidable through the first bracket and on its roller, another rail of the gate being slidable through the second bracket and guide ro[illegible]

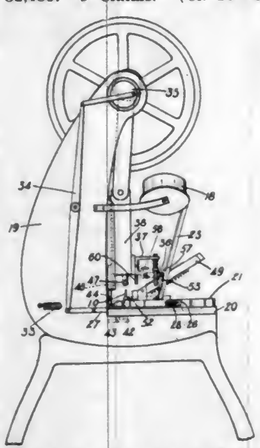
1,667,335. PROCESS OF MAKING CANDY BASKETS. ARIS VARKAS, NICK VARKAS, JAMES B. VARKAS, and JAMES PAXON, Boise, Idaho. Filed July 1, 1926. Serial No. 119,965. 3 Claims. (Cl. 107—54.)



1. The process of making candy baskets which comprises coiling a candy strand, while heated to a degree to render it plastic, initially in the bottom of a concave mold, and disposing the coils in mutually superposed relation against the wall of the mold, and permitting the arranged coils to cool before removal from the mold.

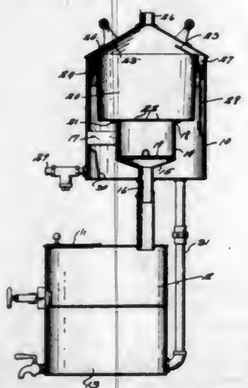
1,667,336. CHLORINATED AMINES FROM CHLORINATED HYDROAROMATIC KETIMINO COMPOUNDS AND PROCESS OF MAKING SAME. THEODORE VOLTZ, Basel, Switzerland, assignor to Durand & Huguenin S. A., Basel, Switzerland. Filed May 21, 1923. Serial No. 640,554, and in Germany June 3, 1922. 5 Claims. (Cl. 260—60.)

1. A process for the manufacture of chlorinated aromatic amines, consisting in treating a hydroaromatic benzene derivative containing nitrogen in the form of a chlorinated ketimino group and having in the same hydroaromatic nucleus most of the hydrogen atoms substituted by chlorine, with a reducing agent at a moderate temperature and so far as possible with exclusion of water and strong acids.



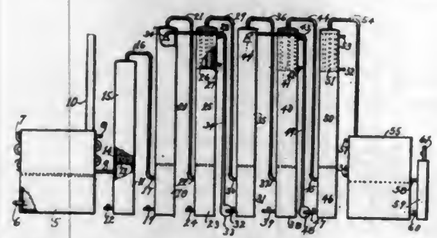
1,667,337. GYRATORY CRUSHER. WILLIAM S. WESTON, Columbia, S. C. Filed Feb. 23, 1926. Serial No. 90,121. 5 Claims. (Cl. 308—121.)

4. In a gyratory crushing machine, the combination with a frame, a bearing mounted in the frame and having a central cylindrical portion surrounding the gyratory shaft, an open mouthed oil receptacle mounted upon the gyratory shaft and movable therewith, and means for preventing escape of oil from the mouth of the receptacle as the shaft gyrates including an annular lid having a cylindrical central portion fitting around the cylindrical portion of the bearing, and a peripheral flange projecting outwardly therefrom, the lower surface of which rests upon the upper edge of the oil receptacle, said lower surface and the inner surface of the cylindrical central portion being concentrically grooved, for the purpose set forth.



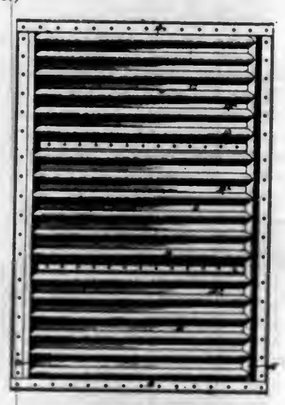
5. The combination set forth in claim 4 in which the lower surface of the peripheral flange of the lid is formed as a spherical surface centered about the axis of gyration of the shaft and the top edge of the oil receptacle comprises a mating spherical surface, a circular groove being formed in the spherical surface of the lid the diameter of which is slightly greater than the diameter of the open mouth of the oil receptacle.

1,667,338. APPARATUS FOR FORMING DOUBLE-HEADED NAILS. NATHANIEL YATES, Jr., Augusta, Ky., assignor to F. A. Neider Company, Augusta, Ky., a Corporation of Kentucky. Filed May 23, 1925. Serial No. 32,459. 9 Claims. (Cl. 10—43.)



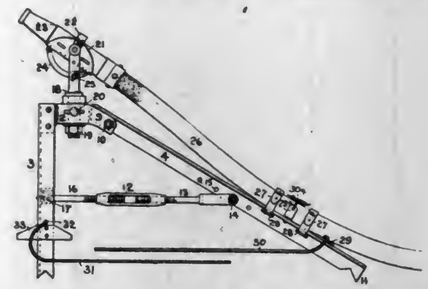
1. In a device of the class described the combination with an intermittently rotatable table having perforations therein, means for inserting circular washers in the perforations in said table, means for inserting a headed nail in the perforation in the washer, a sectional bell mouthed swage adapted to clamp about the nail with the washer in engagement upon the mouth of the swage, and plunger means adapted to drive the washer and nail against the swage whereby the washer material is forced into binding relation upon the nail.

1,667,339. GLUE DISSOLVER AND CONVERTER. FRANCES C. ZIMMERMAN, Cincinnati, Ohio. Filed May 19, 1927. Serial No. 192,666. 4 Claims. (Cl. 126—284.)



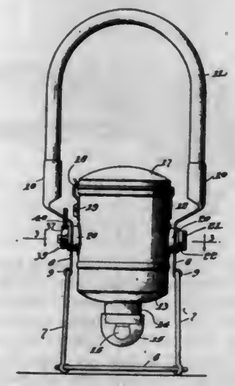
1. A glue converter and dissolver of the character described comprising an outer tank having a removable cover and means for admitting steam thereto, a vertically extended catch basin open at its upper end, having a diameter less than the diameter of the outer tank and having its bottom spaced from the bottom of the outer tank and having a discharge pipe extending through the bottom of the tank, and a vessel for containing dissolving glue having a diameter less than the diameter of the tank and adapted to be inserted therein and having substantially steam-tight engagement with the top of the catch basin but removable therefrom, the central portion of the vessel circumscribed by the wall of the catch basin having perforations.

1,667,340. PROCESS OF FRACTIONATING OILS. CLIVE M. ALEXANDER, Tulsa, Okla. Filed Jan. 12, 1926. Serial No. 80,691. 7 Claims. (Cl. 196—94.)



5. The process which comprises distilling oil, contacting vapors therefrom with reflux condensate from said vapors having a lower final boiling point than the highest boiling constituent of said vapors that are being contacted, and subsequently contacting the vapors with a higher boiling condensate.

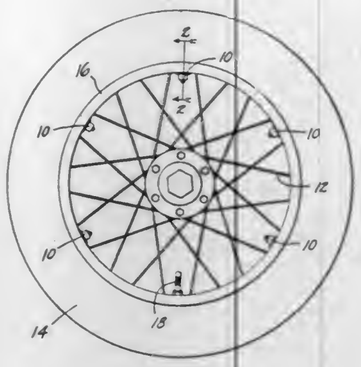
1,667,341. METALLIC CAR DOOR. ALLAN S. BARROWS, Los Angeles, Calif., assignor to The Youngstown Steel Door Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 5, 1925. Serial No. 67,177. 2 Claims. (Cl. 189—46.)



1. In a car door, the combination with a metallic body member; of a re-enforced edge construction for said body member, comprising an integral angular portion of said main body member turned outwardly of the face of the door away from the main plane of said door, said integral portion having an integral extension extending at an angle to the angular portion and outwardly toward the edge of the door; a re-enforcing strip having its inner edge secured to the main body member inwardly of said angular portion and extending toward the edge of said door in spaced relation with reference to said angular portion and extension; and an angular member having an angular portion spaced outwardly of said angular portion of the main body member and extending substantially normal to the main plane of said door, and another angular portion extending substantially at right angles thereto, said angular member being secured to said extension and to said strip and co-operating therewith to provide a hollow tubular formation.

1,667,342. PORTABLE FIRE-NOZZLE SUPPORT. JACOB B. BLAW, Atlantic City, N. J.; Sadie H. Blaw executrix of said Jacob B. Blaw, deceased. Filed Jan. 24, 1924. Serial No. 688,151. 7 Claims. (Cl. 248—29.)

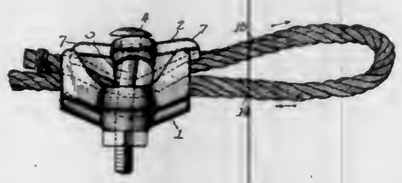
1. A portable fire nozzle and hose support, comprising a head block having a vertical bearing, two widely spread legs united by a cross bar and rigidly connected at their top portions to the head block so that they have a fixed relative position with respect to the vertical bearing of the head block, a rearwardly extending and obliquely arranged leg hinged at its upper end to the rear of the head block, an adjustable tie member connected at one end with the oblique leg and at its other end with the transverse bar of the front frame, an upwardly arranged yoke journaled in the bearing of the head block and having supporting means for a fire hose nozzle, and means for clamping the yoke rigidly to the head block, and in which each of the leg portions are provided with transversely extending parts projecting from the sides thereof at a distance from their lower ends to form supports for them under special conditions, said transversely extending parts arranged to project transversely to a vertical plane through the oblique leg portion.



1,667,343. LANTERN. EDMOND B. BRONSON, Blue Island, Ill. Filed Oct. 23, 1922, Serial No. 596,270. Renewed Mar. 15, 1928. 10 Claims. (Cl. 240—10.5.)

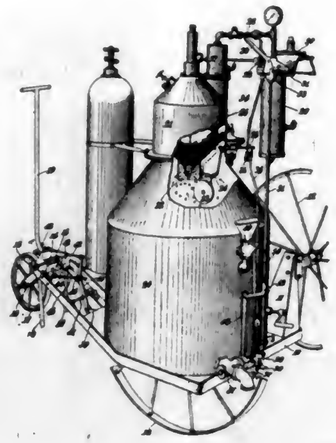
1. A lantern comprising a suitable supporting base having a carrying element connected therewith, a battery casing pivotally mounted in said base, a socket on said

casing, a switch upon the exterior of said casing, conductors leading from said socket to adjacent said switch, and means operable by the movement of said body upon its pivot for electrically connecting said switch, and conductors.



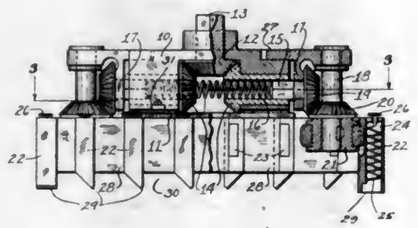
1,667,344. AUTOMOBILE WHEEL. ALLAN B. COUTURE, Detroit, Mich., assignor to Chrysler Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 9, 1926. Serial No. 134,416. 9 Claims. (Cl. 301—5.)

1. An automobile wheel comprising a felloe, a valve stem in said felloe, a variable weight diametrically opposite said valve stem secured to the inner periphery of said felloe, and other variable weights secured to the inner periphery of said felloe spaced at equal intervals between said first mentioned weight and said valve stem.



3. In a device of the class described comprising a part to be balanced, a cup shaped member, a plurality of members having varying apertures therein adapted to be received in said cup member, and means for securing said cup member and members on the part to be balanced.

1,667,345. WIRE CLAMP. THOMAS K. CUMMINS, St. Paul, Minn., assignor to Northern Malleable Iron Company, St. Paul, Minn., a Corporation of Minnesota. Filed Nov. 10, 1926. Serial No. 147,597. 15 Claims. (Cl. 24—135.)

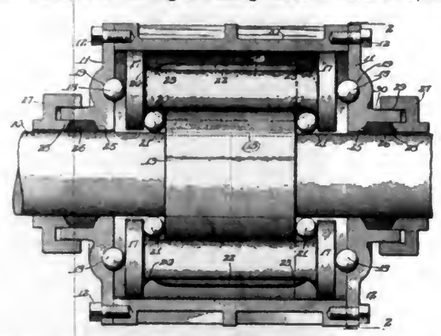


1. A device of the class specified comprising upper and lower gripping members one of which is provided with holding and guiding means between which the ends of the other member may fit and slide longitudinally, said members having wire or cable engaging seats between which the wires or cables may be gripped, said guiding means forming recesses for the ends of the other member at least as wide as the ends of said member to permit free movement of the members toward one another and also having inclined seats adapted to grip the wires of cables more firmly as the result of a relative longitudinal movement of said upper and lower members and bolt members for holding said gripping or clamping members in position and permitting relative longitudinal movement between the same.

1,667,346. ACETYLENE GENERATOR. EARL M. EVLETH, Grand Haven, Mich., assignor to The Bastian-Blessing Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 4, 1925. Serial No. 48,023. 20 Claims. (Cl. 48—36.)

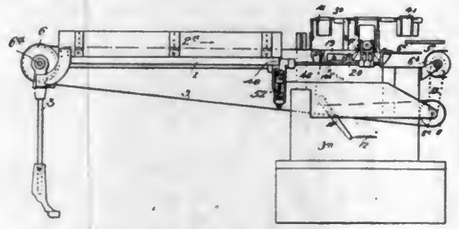
1. A portable acetylene generator having a generator controlling member, means for locking the same, a truck for supporting the generator, and having running gear, means for locking said running gear, and means for preventing the release of the first mentioned locking means when the running gear is unlocked.

1,667,347. CHAIN SAW. LEE C. FIELD, Cincinnati, Ohio. Filed May 25, 1927. Serial No. 194,063. 10 Claims. (Cl. 144—73.)



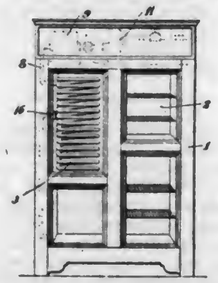
1. An endless flexible saw comprising a series of spaced and vertically extending hollow cutting elements; flexible elements adapted to extend from one of said cutting elements to the other; and means for operating said saw.

1,667,348. ROLLER BEARING. JOHN W. FOLEY, Chicago, Ill. Filed Feb. 9, 1927. Serial No. 166,833. 12 Claims. (Cl. 308—206.)



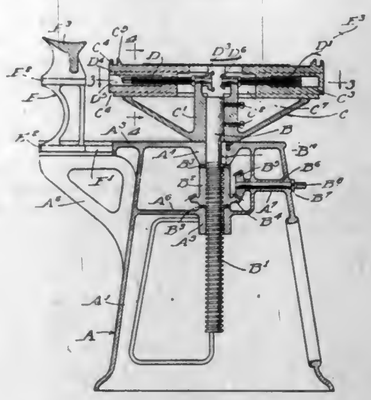
1. A roller bearing embodying a casing, a shaft extending therethrough, a sleeve carried by the shaft, said sleeve being of a diameter considerably less than the diameter

of the casing and of a length to terminate short of the end walls of the casing, rollers between the sleeve and the casing and having a rolling contact with both, ball



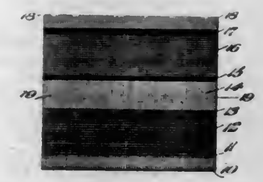
bearings between the casing end walls and the adjacent ends of the respective rollers, and elongated spacing rollers between adjacent first recited rollers.

1,667,349. CONVEYING MECHANISM. CHARLES GUERITEY, Passaic, N. J., assignor to Passaic Metal Ware Co., Passaic, N. J., a Corporation of New Jersey. Original application filed Nov. 27, 1922, Serial No. 603,610. Divided and this application filed Oct. 23, 1923. Serial No. 670,284. 1 Claim. (Cl. 113—115.)



The combination of means to feed containers successively, a transferrer having means to receive said containers, a shaft carrying said transferrer, a gear upon the shaft, a rack to operate the gear, a reciprocative rod to operate the rack, said rod having a plurality of members and interposed resilient means to cushion the thrusts of the rod, means to reciprocate the rod, means to push containers from the transferrer, and seaming mechanism comprising a turret provided with receivers for the containers.

1,667,350. REFRIGERATING APPARATUS. LOUIS HELMER, New York, N. Y. Filed May 27, 1924. Serial No. 716,141. 1 Claim. (Cl. 62—116.)

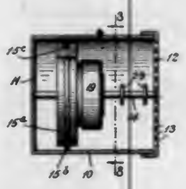


In a refrigerator, a cyclic gas cooling system comprising an expansion coil located in one compartment, a condenser located in the wall of the refrigerator and substantially covering the entire area thereof, a compressor and fluid actuated motor therefor located above the condenser in a compartment of the refrigerator, and means connecting the exhaust of said fluid actuated motor to the condenser whereby the exhaust fluid acts to liquefy the condensed gas.

1,667,351. TIRE REMOVER. SAMUEL L. LEVITT, Chicago, Ill. Filed Mar. 9, 1927. Serial No. 173,807. 8 Claims. (Cl. 157—6.)

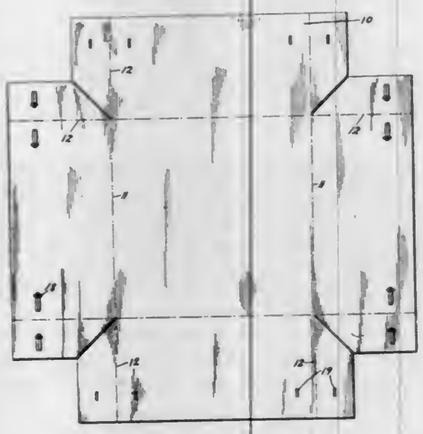
1. A tire removing and applying device which includes a base, tire supporting means thereon, a working head, rim or wheel engaging means mounted thereon, means for imparting to said working head a vertical movement in relation to said tire supporting means, and means for forcing the tire valve out of line with the wheel or rim in response to such relative movement of tire and rim or wheel.

1,667,352. STOCKING TOP. HAROLD LICHTEN, Philadelphia, Pa. Filed Feb. 26, 1924. Serial No. 695,208. 1 Claim. (Cl. 66—173.)



In a stocking construction, a welt, a continuous reinforcing band extending circumferentially in said welt and formed of fabric knitted with more threads than the body of said welt and of a greater thickness than said body, and a pair of spaced bands on opposite sides of said reinforcing band and formed by knitting a yarn of different color from the yarn in said reinforcing band.

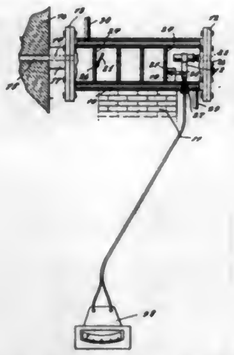
1,667,353. TOY. BURT E. LLOYD, Woodcliff, N. J. Filed Oct. 23, 1923, Serial No. 670,261, and in Great Britain Apr. 26, 1923. 5 Claims. (Cl. 46—46.)



3. A device of the kind described comprising an air chamber, a plunger slidably fitting the interior of said chamber and adapted to force air therefrom, a sound-

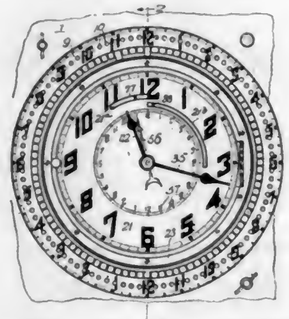
producing device carried by said plunger and operated by the air forced from said chamber, a stem extending in the direction of the length of said chamber from one

end thereof, spaced discs located on said stem and a flexible lip carried by said plunger whereby the sound emanating from said device is articulated.



1,667,354. CONTAINER OR BOX. LOUIS A. LUPIEN, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed July 12, 1924. Serial No. 725,581. 3 Claims. (Cl. 229—32.)

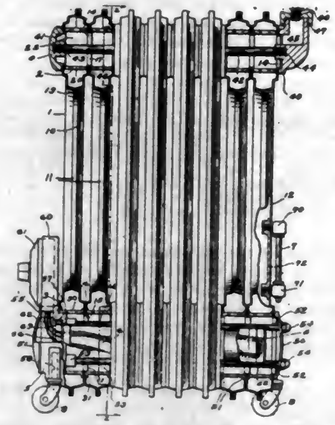
1. As an article of manufacture, a container blank adapted to be formed into a box, fastener members formed of sheet metal and provided with an eye opening at one end, said fastener members including prong members extending in a side-by-side relation in the same plane, and anchoring members passing through the blank and the eye openings to hold the fastener member in a flat disposition on a surface of the blank until used to hold the blank in folded container form the anchoring members being visible from the exterior when the blank is in folded form, the prongs being adapted to hold the box in assembled relation by extending through apertures in the blank and by being spread beyond the aperture.



1,667,355. DEVICE FOR HOLDING PYROMETERS. FREDERICK H. NORTON, Newell, W. Va., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Feb. 7, 1925. Serial No. 7,514. 7 Claims. (Cl. 73—32.)

1. In a device for holding a radiation pyrometer or the like, a container having a passage therethrough, the rear end of said container being adapted for close association with a sight hole of a combustion kiln or the like, means in said container for holding a thermo-element in a sighting position with reference to said passage and with the sighting end thereof adjacent the

front end of the container, and means for preventing circulation of gases from said kiln through said container.

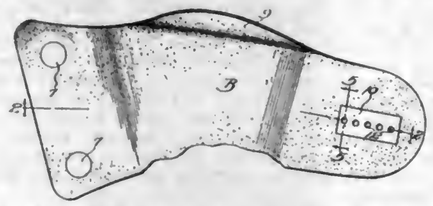


1,667,356. TIME-CONTROLLED APPARATUS. CHARLES M. PEACOCK, Oak Park, Ill. Filed Aug. 29, 1925. Serial No. 53,223. 7 Claims. (Cl. 200—37.)

2. An apparatus of the kind described embodying therein, an escapement wheel, means normally acting to rotate the same, a contact member carried thereby, means providing a plurality of annularly arranged yieldable contact fingers concentric with said wheel, means normally holding said contact fingers in an inoperative position with respect to said contact member, means for releasing desired contact fingers so that they will yield inwardly to an operative position to be engaged by said contact member, an anchor member associated with said escapement wheel to alternately yield to and hold said wheel, a constantly rotating shaft, and means connecting said shaft and anchor to actuate the same.

1,667,357. SHEET-METAL RADIATOR. CLARENCE H. PICKERING and JOHN CAMPBELL, Seattle, Wash., assignors to Swan Heating Company, Seattle, Wash., a Corporation of Washington. Filed Dec. 31, 1925. Serial No. 78,546. 3 Claims. (Cl. 257—140.)

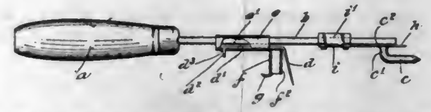
3. In a radiator, in combination with a plurality of units having aligned apertures, a cap closing the outermost aperture at one end of the radiator, a ring closing the aperture at its other end, a plurality of clamping rods extending between said cap and said ring, and arranged about the axis of the aligned apertures, a tube open at one end, and having its open end received within the ring and its closed end supporting by said rods, a flange surrounding the open end of said tube, the ring



being shouldered to receive said flange, and a clamping ring threaded in said ring and clamping said flange between itself and said shoulder.

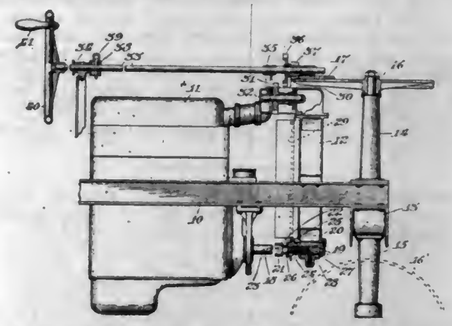
1,667,358. FUEL BRIQUETTE AND METHOD OF MAKING SAME. JACOB SHOTWELL ROBESON, Pennington, N. J. Filed Sept. 26, 1924. Serial No. 740,040. 16 Claims. (Cl. 44—24.)

1. A fuel briquette of tubular form, including fine coal, oil and lignone, the surface portions being harder than the inner portions, and containing a lower percentage of volatile matter.



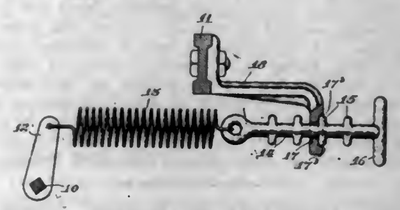
1,667,359. ARCH SUPPORT. EUGENE SESSLER, Chicago, Ill. Filed June 9, 1926. Serial No. 114,600. 3 Claims. (Cl. 36—71.)

1. In an arch support, the combination of an elongated spring plate arched lengthwise and provided at its forward end with diverging arms, the plate being slotted in the region of the arch center whereby to increase its flexibility at that point, a cushion supported by the plate and extending thereover at every point, means fixedly connecting the cushion to the plate at the forward ends of the two arms thereof, and other means adjustably securing the cushion to the plate at a point adjacent the rear end thereof, the curvature of the arch in the plate being variable according to adjustments in the connection between the cushion and plate.



1,667,360. CAN OPENER. JOHN T. SWEENEY, Kingston, N. Y. Filed Aug. 4, 1922. Serial No. 579,586. 6 Claims. (Cl. 30—3.)

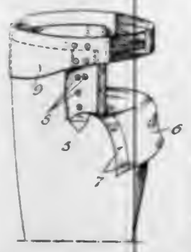
1. A can opener embodying therein a shank, a piercing point projecting forwardly of the end of said shank and having a pivot portion whereby said point is spaced away from said shank, and a slide including therein a metal cutting blade, a guide member adjacent thereto and projecting from said shank a distance greater than said piercing point, and laterally of said shank with the opposite sides or wings thereof projected forwardly to form separated bearing points upon opposite sides of said blade, whereby said slide will automatically adjust itself to cans of different diameters, and means carried



by said slide and having a free sliding fit with said shank, whereby said metal cutting blade may be quickly brought into a desired relation to the top of a can adjacent the edge thereof, and said guide will engage the outside of a can body closely adjacent said cutting blade, said slide being adapted to move freely toward and from said piercing point when removing the top from a can.

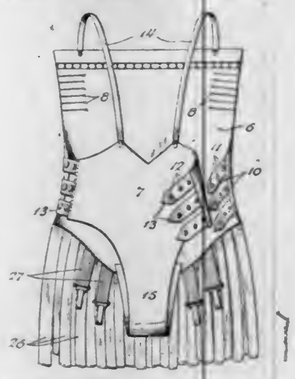
1,667,361. CONTROL MECHANISM FOR TRACTORS. JOHN E. ANTHONY, Chicago, Ill., assignor to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Nov. 26, 1923. Serial No. 677,161. 3 Claims. (Cl. 180—78.)

1. Control mechanism for self-propelled vehicles comprising the combination of an upright steering standard having an arcuate rack fixed thereto, a cranking shaft having drive gearing connected thereto and located adjacent said arcuate rack, and an axially shiftable actuating shaft provided with spur gears positioned between said rack and drive gearing and adapted to be engaged with either, alternatively, by axial movement of said actuating shaft.



1,667,362. TENSION-ADJUSTING DEVICE. MENNO VAN DER VLIET, Chicago, Ill., assignor to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Apr. 20, 1923. Serial No. 638,368. 8 Claims. (Cl. 267—73.)

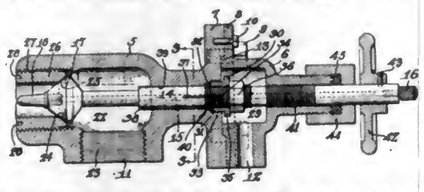
1. A tension adjusting device comprising the combination with a retractile spring and a fixed bracket member provided with a slotted opening and a seat on its outer face, of a rod positioned in said opening and having one end swiveled to the spring, and a series of spaced projections along said rod adapted to pass through the



opening in the bracket when the rod is turned to a certain position and to engage said seat under tension of the spring when the rod is turned to another position, the rod being locked against turning when in the last mentioned position.

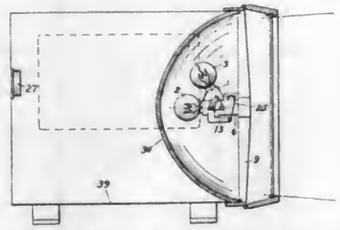
1,667,363. TROUSERS. MARIA STINGHE WAGNER, New York, N. Y. Filed Mar. 2, 1927. Serial No. 172,021. 2 Claims. (Cl. 2—227.)

2. A pair of trousers comprising a waist section including front and back portions, a waist encircling belt secured to the waist section over the hips and having the front portion thereof simulating a part of a waistcoat, and a plurality of fasteners secured to said front portion and to said belt over the hips, said fasteners being arranged in upwardly diverging rows to either of which may be secured said back portion, and said back portion of the waist section covering the back portion of said belt when the former is secured to said fasteners.



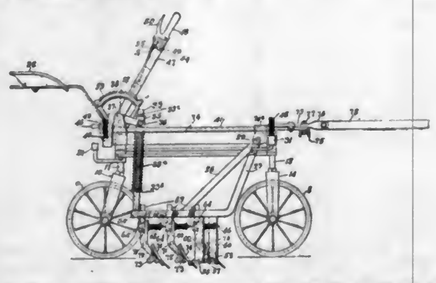
1,667,364. UNDERGARMENT. MARIA STINGHE WAGNER, New York, N. Y. Filed Mar. 2, 1927. Serial No. 172,023. 1 Claim. (Cl. 2—30.)

A combination undergarment including front and back sections each adapted to partially encircle the body of the wearer and cooperating to form a combined corset and brassière, means to adjustably secure said sections together over the hips of the wearer, an intermediate section forming an extension of said back section and attachable to said front section, and a skirt for the undergarment including a plurality of separable strips depending from the lower edge of said front section.



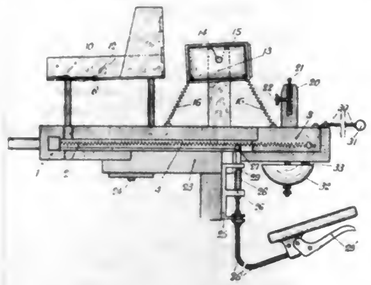
1,667,365. ADJUSTABLE OIL BURNER. ARTHUR C. WARD, Oakmont, Pa., assignor to The Autocar Company, Ardmore, Pa., a Corporation of Pennsylvania. Filed Apr. 21, 1923. Serial No. 633,596. 10 Claims. (Cl. 158—76.)

1. In an oil burner, a hollow body, an adjustable valve seat within the body having lateral oil openings, a hollow spindle extending longitudinally of the body, a tapered valve carried by the spindle and engaging the seat, an air inlet to the body supplying air about the valve, a portion of the body being bored to fit the surface of the spindle and in closed positions of the valve to shut off lateral access to oil openings leading into



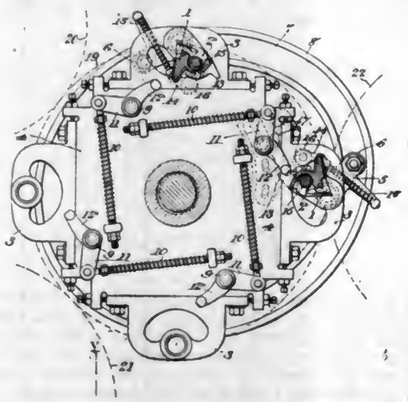
the interior of the spindle, a cut-off valve adjustable in position to expose varying lengths of these openings, an oil inlet permitting flow of oil about the cut-off valve and means for moving the spindle axially to open the air valve and cut-off valve and expose the openings concurrently.

1,667,366. AUTOMATIC SAFETY HEADLIGHT. ALEXANDER W. WEIR, Bronx, JACOB WEINGARTEN, Brooklyn, and WILLIAM G. SWITZER, Menands, N. Y. Filed June 10, 1927. Serial No. 197,950. 17 Claims. (Cl. 240—37.)



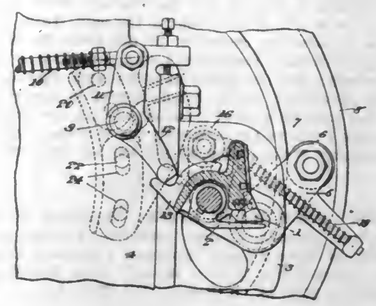
1. In a lamp of the class described, a reflector, a movable support associated with the reflector, a plurality of electric bulbs, carried by the support so one is normally in the focus of the reflector, means for holding the support in said normal position, part of said means adapted to be destroyed either by current flowing therethrough or by breakage, means under the control of the current passing through the bulb normally at the reflector focus, for passing current through said part to be destroyed and means associated with said holding means for initiating movement of said support to carry another of said bulbs into substantially the position first occupied by said first normally positioned bulb, after said part is destroyed.

1,667,367. CULTIVATOR. JOHN F. WILGUS, Casstown, Ohio. Filed Dec. 7, 1921. Serial No. 520,508. 5 Claims. (Cl. 97—242.)



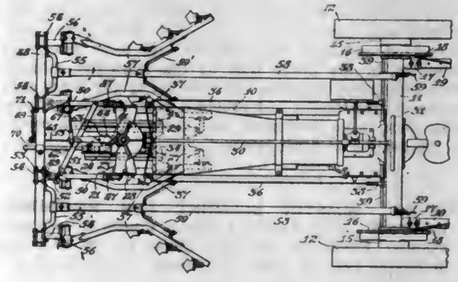
1. In a cultivator, the combination, with a frame and supporting wheels located at the front and rear of the frame, the rear wheel being substantially on the central line of draft and the forward wheels being spaced apart on either side thereof, of two pairs of shovel gangs, one pair at each side of said wheels, and rack and pinion mechanism adapted to adjust the gangs laterally.

1,667,368. APPARATUS FOR AUTOMATICALLY IGNITING FLASH-LIGHT POWDER. PIETER JAN BAKKER, Amsterdam, Netherlands. Filed Oct. 16, 1926, Serial No. 142,124, and in the Netherlands May 5, 1926. 8 Claims. (Cl. 67—33.)



1. In an apparatus for automatically igniting flashlight powder, a first ignition unit for igniting a flashlight powder, a second ignition unit for lighting said first unit, an igniting surface for said second unit, means for automatically shifting said second unit along said ignition surface in order to light said second unit, and means for moving said second unit, while burning, to a position adjacent said first unit to light the latter and thereby ignite the flashlight powder.

1,667,369. SHEET-FOLDING MECHANISM. HOWARD M. BARBER, Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I., a Corporation of Delaware. Filed Apr. 2, 1927. Serial No. 180,500. 8 Claims. (Cl. 270—71.)

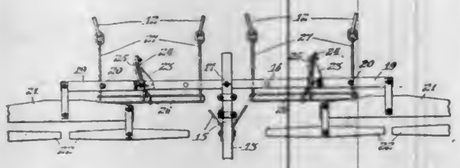


1. In a sheet folding mechanism, floating folding jaws, and means for counteracting their centrifugal force during a predetermined arc of their rotary path.

1,667,370. SHEET-FOLDING MECHANISM. HOWARD M. BARBER, Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I., a Corporation of Delaware. Filed Apr. 2, 1927. Serial No. 180,501. 6 Claims. (Cl. 270—71.)

1. In a folding mechanism, a rotary carrier, a pair of folding jaws carried thereby, and means for controlling the opening and closing of the jaws, said means including an extensible and contractible cam.

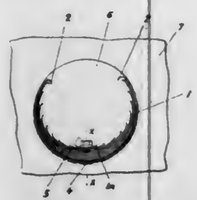
1,667,371. TRACTOR CULTIVATOR. BERT R. BENJAMIN, Oak Park, and CLEMMA R. RANEY, Chicago, Ill., assignors to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Aug. 5, 1925. Serial No. 48,200. 17 Claims. (Cl. 97—47.)



1. In a power propelled cultivator, the combination of a main frame, an implement frame mounted thereon for lateral movement and carrying vertically movable tool beams, means for raising and lowering the beams, dirigible carrying means supporting the front of the main frame and differentially driven traction wheels supporting the rear, individually operable brakes for the traction wheels, steering means connected to the front carrying means and the implement frame for guiding the machine and correspondingly shifting the implement frame laterally, means operable by the steering means for actuating the brakes of the traction wheel at the inner side during a turn, and means for preventing operation of the brakes by the steering means when the beams are down.

8. In a power propelled cultivator, the combination of a frame, cultivating tools mounted thereon for lateral movement, a swiveled steering truck supporting the front of the frame and differentially driven traction wheels supporting the rear, individually operable brakes for the traction wheels, means for steering the truck including an upright rotatable shaft, an arm journaled on said shaft and having a brake applying connection with each brake, a second oppositely extending arm fixed on said shaft and having a lost motion coupling with the first arm, means for connecting said second arm to the tools

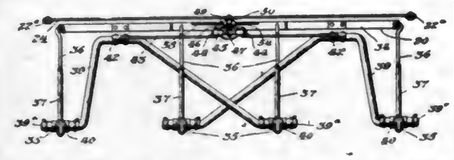
to impart lateral movement thereto, and means restricting lateral movement of the tools when so connected to within the range of independent movement of the fixed arm.



14. In a tractor cultivator for use in fields prepared for row crops, the combination of a narrow tread dirigible truck forming a support for the tractor, earth working tools on each side of and behind the said truck, means actuated by steering movement of the truck for shifting the tools laterally including means providing a range of movement for the tools amplified over that of the steering movement, means complemental to the steering truck for causing a short turn of the tractor, and unitary control means for actuating the steering truck and for obtaining a short turn at the end of the rows.

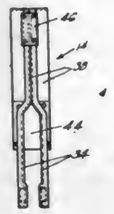
1,667,372. FOUR-HORSE HITCH. SHERMAN W. CADY, Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Dec. 4, 1924. Serial No. 753,793. 6 Claims. (Cl. 278—9.)

1. In a device of the class described, the combination of a main horizontally extending equalizer bar having a pivotal support at its center, substantially vertical draft levers pivoted between their ends near the respective ends of said bar, substantially horizontal draft levers also pivoted on said main equalizer bar each lever being link connected to the upper ends of the respective vertical levers, secondary equalizer bars carried by the lower ends of the vertical levers and provided with means for coupling them to an implement, and draft connecting means on the horizontal draft levers.



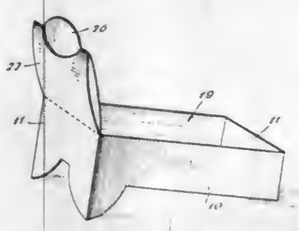
1,667,373. ELASTIC ELEMENT FOR RESILIENT WHEELS. JEAN FRANÇOIS PASCAL COSTE, Billancourt, France. Filed Apr. 29, 1926, Serial No. 105,374, and in France Jan. 16, 1926. 2 Claims. (Cl. 152—28.)

1. An elastic element for a resilient wheel comprising an assemblage of spring plates of progressively decreasing lengths superposed centrally upon each other, secured together at the median lines thereof and curved to the form of a split ring, the shortest plate being nearest the center.



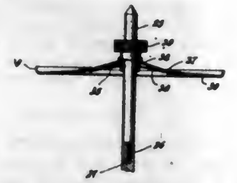
1,667,374. CULTIVATOR. SAMUEL K. DENNIS, Chicago, Ill., assignor to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Nov. 12, 1921. Serial No. 514,500. 46 Claims. (Cl. 97—155.)

10. A cultivator comprising a frame, swiveled wheels supporting the frame, a pair of laterally shiftable arches suspended from the frame, the inner arms of said arches being extended and crossed, cultivator beams pivoted to the arms of said arches, guiding mechanism connected to said wheels and arches for shifting them towards either



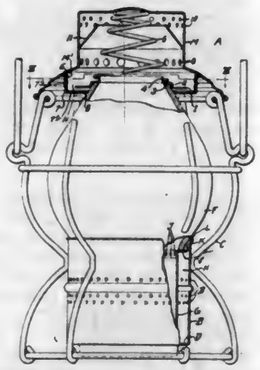
side in unison, and means for moving the arches towards and from each other, thereby correspondingly moving the beams of both pairs simultaneously.

1,667,375. METHOD OF MAKING BRAKE SHOES. ADIEL Y. DODGE, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed July 27, 1925. Serial No. 46,242. 4 Claims. (Cl. 29—148.)



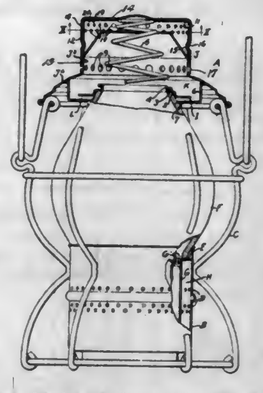
4. That method of making brake shoe sections which comprises the operations of drawing two reversely contoured sheet metal parts each having a curved web and a laterally-extending arcuate flange thereon, assembling the said parts with the webs back to back at one portion of their length and separated at another and with the arcuate flanges in axial alinement to present a widened support for a brake lining, and connecting the abutting portions of the web to form a unitary structure.

1,667,376. DISPLAY CONTAINER. EMIL WILLIAM FEHRENKAMP, Kansas City, Mo., assignor to Burd & Fletcher Company, Kansas City, Mo., a Corporation of Missouri. Filed July 8, 1926. Serial No. 121,073. 1 Claim. (Cl. 206—44.)



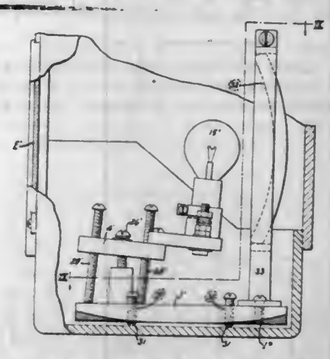
A foldable display container the material of which is scored to provide a body including sides and ends, bottom sections extending from the lower edges of said sides and having cooperating means for interlocking the same, bottom flaps extending from said ends and foldable inwardly into superimposed relation to said bottom sections with one of said flaps cut to provide supporting members depending from one end of the container to support the body in an inclined position, said bottom sections and bottom flaps combining to form the bottom of the container, and side flaps extending from the sides of said body and each having a portion engageable with one of said sides and another portion engageable with the bottom formed by said bottom flaps and sections to reinforce the same, the combined widths of the latter portions of said side flaps being substantially equal to the distance between the sides of said body with the free longitudinal edges of said latter portions in abutting relation to each other whereby said other portions will be disposed in the same plane with each other and in engagement with said bottom flaps.

1,667,377. LOCKING DEVICE. MORRIS M. GRUBER, East Orange, N. J., assignor, by mesne assignments, to Sonora Phonograph Company, Inc., a Corporation of New York. Filed Feb. 21, 1923. Serial No. 620,470. 3 Claims. (Cl. 274—1.)



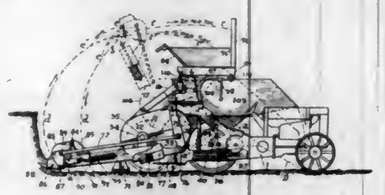
3. In a device of the character described, a record support, a spindle projecting beyond said support and adapted to transfix disk records by their central orifices, a collar slidable upon said spindle, said collar being provided with radially arranged, inwardly projecting, upwardly slanting slits extending through the wall of said collar, spring members each having its inner end positioned in one of said slits and its outer end extending radially from said collar and secured at its extremity to a record securing plate arranged concentrically to said collar and having a central orifice in which said collar is positioned, whereby said collar and said plate may be moved together along said spindle and when said collar is moved along said spindle and relatively to said plate, the ends of said spring members positioned in the slits of said collar will be pressed against said spindle by a movement in one direction of said collar and drawn out of contact with said spindle by the reverse movement of said collar, thus permitting said plate to be locked to said spindle by relative movement of said collar to said plate.

1,667,378. HAND LANTERN. ALEXANDER H. HANDLAN, St. Louis, Mo. Filed Oct. 24, 1925. Serial No. 64,508. 3 Claims. (Cl. 240—38.)



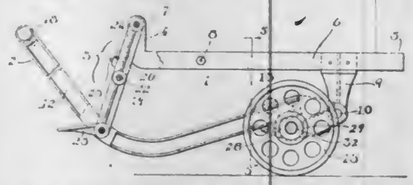
1. A lantern having a dome, a globe, a seat for the bottom face of said globe, a spring-pressed globe holder within said dome, and means whereby said globe holder is retained in position with relation to said dome, the last mentioned means including a cup-shaped member having attaching means whereby said member may be secured in place and a portion which overlaps a portion of said globe holder and limits the downward movement of said globe holder, said member being removable whereby said globe holder may be removed from the lantern.

1,667,379. LANTERN. ALEXANDER H. HANDLAN, St. Louis, Mo. Filed Oct. 29, 1925. Serial No. 65,665. 5 Claims. (Cl. 240—38.)



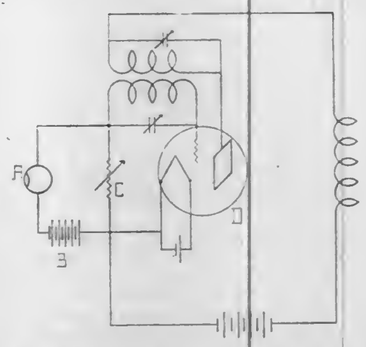
1. A lantern having a dome provided with apertures formed through a wall thereof, an annular rotatable member arranged adjacent to said apertured wall of said dome, and means whereby said rotatable member is rotatably connected to said dome but is prevented from moving longitudinally thereof, said means comprising an annular bead formed on one of said elements and extended into an annular depression in the other of said elements.

1,667,380. LIGHT-SOURCE SUPPORT. ALEXANDER H. HANDLAN, St. Louis, Mo. Filed Feb. 6, 1926. Serial No. 86,470. 3 Claims. (Cl. 240—44.)



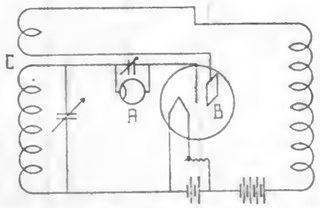
1. A device for focusing a lamp relatively to a reflector, comprising, in combination, a support having apertures therein, adjusting members extending through the apertures, a fibrous supporting plate secured to and offset from the support, a lamp supporting sleeve carried by the fibrous supporting plate, and binder posts mounted on the fibrous supporting plate for connecting the lamp supporting sleeve with electric terminals, the support being operable by means of the adjusting members to impart tilting adjustment in all directions to the lamp supporting sleeve.

1,667,381. EXCAVATING MACHINE. OLAF HETLESATER, Seattle, Wash.; Elisabeth Hetlesater executrix of said Olaf Hetlesater, deceased. Filed Mar. 10, 1926. Serial No. 93,754. 10 Claims. (Cl. 214—78.)



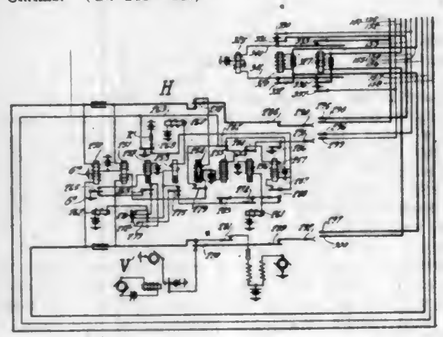
1. The combination of an excavator, a tractor, two side pockets relatively supported on axles having a common center with rear axle of said tractor, a pair of wheels on each of said axles, a supplementary axle on each of said side pockets, a locking device on said tractor, and a balancing wheel on each of said supplementary axles.

1,667,382. LOAD LIFTING AND TRANSPORTING DEVICE. HARRY A. HUNTOON, La Grange, Ill., assignor to International Harvester Company, a Corporation of New Jersey. Filed June 21, 1926. Serial No. 117,325. 7 Claims. (Cl. 254—8.)



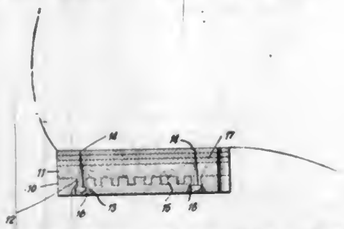
1. In a hand lift truck, a vertically movable horizontal platform adapted to support a load, a lever, supports connecting the lever and the platform at separated points, both of said supports acting as compression members to support the platform with a load thereon when the platform is in load transporting position, and one of said supports acting as a lock constantly pivotally connecting said platform and said lever but releasable to allow the platform and its load to move downwardly.

1,667,383. GRID COUPLED CELL CIRCUIT. CHARLES FRANCIS JENKINS, Washington, D. C. Filed Oct. 22, 1924. Serial No. 745,209. 5 Claims. (Cl. 179—171.)



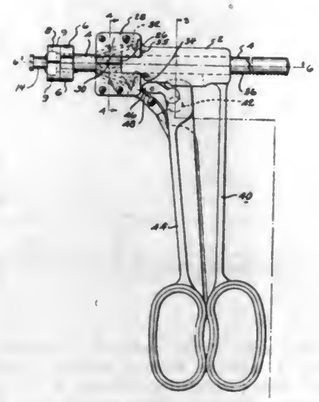
2. In the method of transmitting signals or the like involving the use of radio frequency oscillations, the step which includes interrupting the oscillations in accordance with light transmission from a given source.

1,667,384. GRID-LEAK CELL CIRCUIT. CHARLES FRANCIS JENKINS, Washington, D. C. Filed Oct. 22, 1924. Serial No. 745,211. 1 Claim. (Cl. 250—36.)



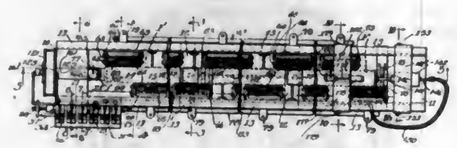
The combination with an electron valve, of a circuit including input and return conductors connected respectively with the grid and filament electrodes of the valve, a variable stopping condenser in series with said input conductor, and a resistance leak in said input conductor shunted about the condenser and comprising a light sensitive cell.

1,667,385. AUTOMATIC TELEPHONE SYSTEM. EDWIN E. JONES, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Feb. 9, 1921, Serial No. 443,654. Renewed June 15, 1927. 15 Claims. (Cl. 179—18.)



14. In a telephone system, a line, two sets of terminals, the conductors of said line being connected to both sets of terminals, a relay, the connection of said line to one set of terminals including said relay in series, the connection of said line to the other set of terminals excluding said relay, another line, a trunk, means for connecting said other line to said trunk, and means controlled by said relay for extending a talking connection from said trunk to said first line.

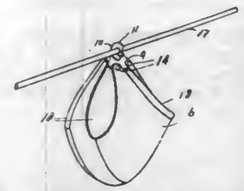
1,667,386. COMPOSITE LEATHER HEEL. MILTON B. KETCHAM, Ridgewood, N. J. Filed May 4, 1926. Serial No. 106,646. 1 Claim. (Cl. 36—35.)



A composite cushion heel comprising a leather top lift having holes therethrough near the edge, said holes being enlarged at their outer parts, and a rubber back or body for the top lift having the rubber extended into and filling the aforesaid holes which are disposed to receive fastening nails.

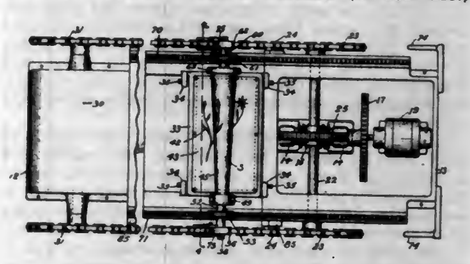
1,667,387. METAL-DRAWING APPARATUS. DELAMAR C. KINNEAR, Waterbury, Conn., assignor, by mesne assignments, to The American Brass Company, Waterbury, Conn., a Corporation of Connecticut. Filed May 14, 1927. Serial No. 191,522. 10 Claims. (Cl. 205—17.)

1. A drawing apparatus comprising a clamp, an open sided die holder, means for moving said die holder away from said clamp, in combination with a split die the two parts of which have extensions adapted to enter said die holder, a carrier to which said parts are pivoted, and means carried by said die holder along which said carrier is slidable forward and from said die holder.



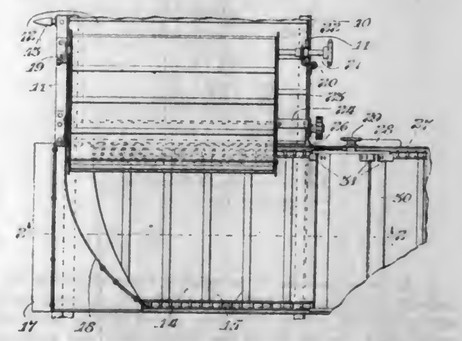
1,667,388. FLUE CLEANING, CUTTING, AND HANDLING MACHINE. JOHN T. MCGRATH, Bloomington, Ill. Filed Aug. 25, 1924. Serial No. 733,877. 26 Claims. (Cl. 29—81.)

1. In a flue cleaning machine, flue supporting elements and rotary driving means, the latter engageable with an end of a flue, a series of lengthwise spaced cleaner elements adapted by gravity for movement from the tube cleaning position, and means to resiliently press the series of cleaner elements against the exterior of the flue.



1,667,389. SLIDING CLOTHESPIN BAG. WILLIAM H. ORTH, Philadelphia, Pa. Filed Mar. 24, 1927. Serial No. 177,917. 2 Claims. (Cl. 68—11.)

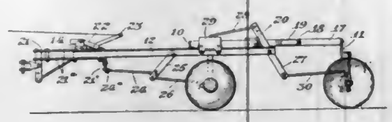
1. A clothes pin bag comprising a hook including a head and base plate, the latter having a plurality of corners, each having a hole passing therethrough, a piece of flexible fabric of relatively greater dimension than said base plate and having corner portions disposed over the holes in the base plate, buttons, one superimposed on each



corner of the material and one underlying each hole in the base plate, and threads engaging the buttons and passing through the holes in the base plate and the corners of the material for securing the fabric to the plate.

1,667,390. PRINTING MACHINE. EMIL PEDRAZZO, Guttenberg, and MARIUS TUA, Union City, N. J. Filed Oct. 23, 1925. Serial No. 64,328. 6 Claims. (Cl. 101—115.)

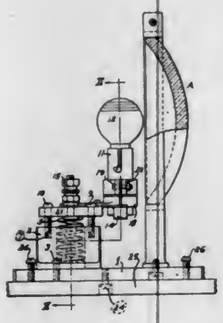
1. In combination, in a printing machine of the character described, a stationary printing unit, a detachable mandrel constructed to securely support the article to be printed, conveying means, means for automatically securing the mandrel to the conveying means, thereby permitting the conveying means to convey the mandrel to and in rolling contact with the printing unit, and means for automatically detaching the mandrel from the conveying means.



1,667,391. CONVEYING AND FEEDING MECHANISM FOR HARVESTER THRASHERS. CLEMMA R. RANEY, Riverside, and ARNOLD E. W. JOHNSON, Chicago, Ill., assignors to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Jan. 21, 1926. Serial No. 82,092. 8 Claims. (Cl. 198—160.)

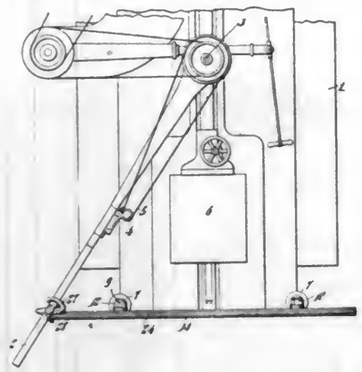
1. In a harvester, the combination of a main transversely disposed platform conveyer, a longitudinally disposed feeding conveyer communicating therewith, and an

upper supplemental platform conveyer overhanging the feeding conveyer and being of narrower width than the main platform conveyer.



1,667,392. TRACTOR DISK HARROW. CHARLES W. ROBINSON, Auburn, N. Y., assignor to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Jan. 7, 1922. Serial No. 527,578. 7 Claims. (Cl. 55—83.)

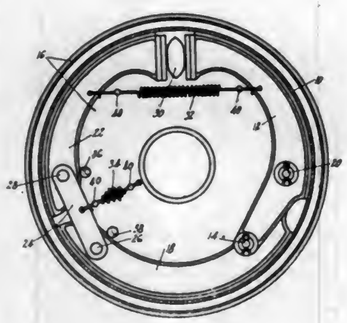
1. In a harrow, front and rear angular frames, couplings between the frames comprising straight rigid members fixed to the outer ends of one frame and projecting towards the second frame, brackets secured to the outer ends of the second frame and provided with projecting portions having fore and aft openings in which said members are loosely received, and means permitting limited longitudinal movement of said members within said openings.



7. In a disk harrow, a harrow frame, disk gangs, and draft governed devices for controlling the angling and straightening of the gangs, said devices including a unitary reversible rod having means formed thereon which in one position of adjustment of the rod enables the gangs to be positively angled by a backward thrust transmitted to the gangs through said unitary reversible rod and in another position of adjustment of the rod provides a lost motion connection which determines the angles which the gangs may be made to assume upon the application of a forwardly directed pull to the harrow.

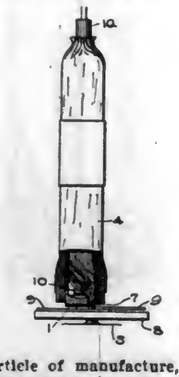
1,667,393. FOCUSING DEVICE FOR SIGNAL LAMPS. GEORGE H. ROLFES, St. Louis, Mo., assignor to Alexander H. Handlan, St. Louis, Mo. Filed June 19, 1926. Serial No. 117,043. 2 Claims. (Cl. 240—44.)

1. A device for use in focusing a lamp relatively to a reflector comprising a hollow base member, a compression spring located within said base, an adjustable lamp-carrying plate located above the hollow base and normally urged upwardly by means of said compression spring, and a plurality of fastenings spaced about the compression spring and extending from said adjustable plate to the hollow base, said fastenings being independently adjustable to tilt the lamp-carrying plate relatively to the reflector.



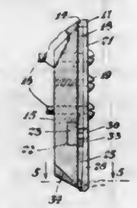
1,667,394. ROUTING MACHINE. VERNON ROYLE, Paterson, N. J. Filed Jan. 11, 1923. Serial No. 612,139. 15 Claims. (Cl. 90—13.2.)

1. In apparatus of the character described, a guide bar having a metallic wearing surface throughout its length and means supporting said bar to allow its rotation to present different bearing surfaces for the support of a sliding tool arm.



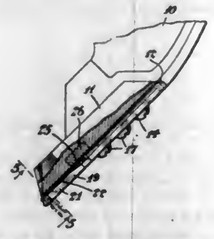
8. In apparatus of the character described, a guide bar, and a combined stop and holder mounted on one end of said guide bar for limiting the lateral movement of the cutter arm of the apparatus while substantially in contact with the guide bar, and also for holding the cutter arm in an inoperative position with respect to the guide bar.

1,667,395. BRAKE. ROY S. SANFORD, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 2, 1925. Serial No. 66,272. 21 Claims. (Cl. 188—78.)



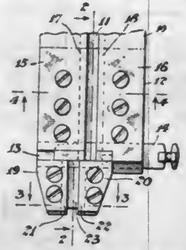
1. A brake comprising, in combination, a drum, shoes engageable with the drum and one of which is pivotally anchored and a rigid floating link pivotally connected at its ends directly to the shoes, the shoes being so arranged that the unanchored shoe turns with the drum and forces the other shoe against the drum through said link.

1,667,396. STEAMING-TUBE PLUG. WILLIAM G. SHELTON, St. Louis, Mo. Filed Dec. 19, 1927. Serial No. 241,107. 7 Claims. (Cl. 132—36.1.)



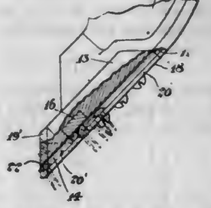
1. As a new article of manufacture, a closure for a hair waving steaming tube comprising a cup-shaped plug with a longitudinally disposed slot in its side adapted to receive a strand of hair.

1,667,397. RIVET-FEEDING MECHANISM. EDWIN B. STIMPSON, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed May 27, 1927. Serial No. 194,628. 5 Claims. (Cl. 218—3.)



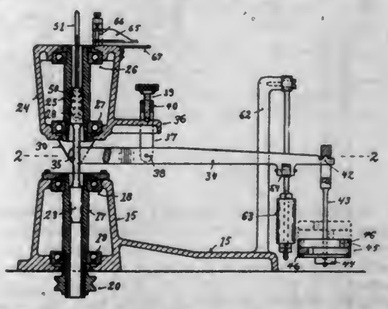
5. Rivet feeding mechanism including a receiving pocket, an inclined feedway in cooperative relation to the pocket, said feedway having a T-shaped feed slot formed therein, a T-shaped delivery slot offset from the feed slot, the lateral arms of the T-shaped delivery slot being of gradually decreasing depth toward the lower end of the feedway, and a reciprocating slide for transferring a rivet from the feed slot to the delivery slot

1,667,398. RIVET-FEEDING MECHANISM. EDWIN B. STIMPSON, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed May 27, 1927. Serial No. 194,629. 4 Claims. (Cl. 218—3.)



1. A rivet feeding mechanism including an inclined feedway having a T-shaped feed slot formed therein, a T-shaped delivery slot offset from the feed slot, the lateral arms of the T-shaped delivery slot being of a uniform depth throughout a major portion of their length, said depth being less than that of the lateral arms of the feed slot, and means for transferring a rivet from the feed slot to the delivery slot.

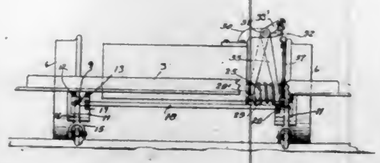
1,667,399. RIVET-FEEDING MECHANISM. EDWIN B. STIMPSON, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed May 27, 1927. Serial No. 194,630. 3 Claims. (Cl. 218—3.)



3. Rivet feeding mechanism including an inclined feedway having a T-shaped feed slot formed therein, a T-shaped delivery slot offset from the feed slot, the lateral arms of the delivery slot being of less depth than those of the feed slot and being of uniform depth throughout their length, and a slide for transferring a rivet from the feed slot to the delivery slot, the slide having a T-shaped slot therein, the lateral branches of the slot having their lower walls inclined to guide the rivet heads from the deep feed slot to the shallow delivery slot.

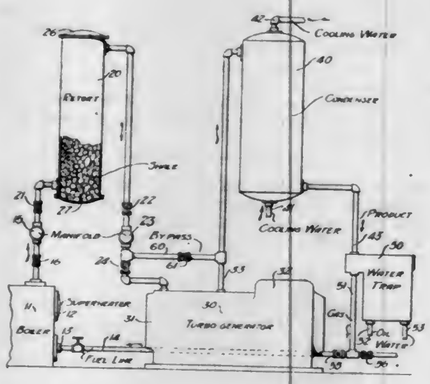
1,667,400. RIVET-FEEDING MECHANISM. EDWIN B. STIMPSON, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed June 9, 1927. Serial No. 197,652. 4 Claims. (Cl. 218—3.)

1. Rivet feeding mechanism including an inclined feedway having a T-shaped feed slot formed therein, a T-shaped delivery slot offset from the feed slot, the lateral arms of the T-shaped delivery slot being of a uniform depth throughout a major portion of their length and being constricted near the lower end of the delivery slot, and means for transferring a rivet from the feed slot to the delivery slot.



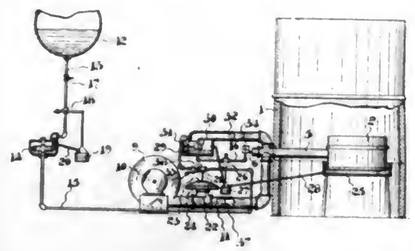
1,667,401. TESTING METHOD AND APPARATUS. FREDERICK W. STOCKMEYER, Cincinnati, Ohio. Filed Sept. 21, 1926, Serial No. 136,859, and in Germany June 11, 1925. 10 Claims. (Cl. 265—13.)

1. A method of testing comprising rotating a test bar in a substantially vertical position with one end of the



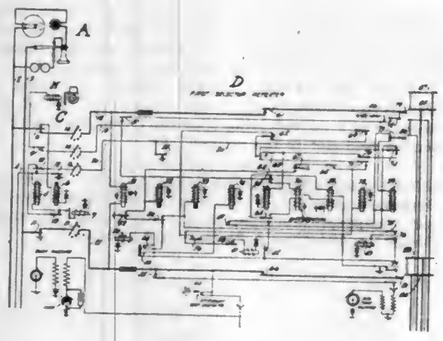
bar upon a fixed axis of rotation and the opposite end of the bar unrestrained, and applying a bending moment to said bar substantially uniform over the whole length of the section under test.

1,667,402. CAR-TRACK-GROOVE CLEANER. EDWARD F. TIPTON, San Francisco, Calif., assignor of one-fourth to Vincent P. King and one-fourth to William W. Bostwick, San Francisco, Calif. Filed Oct. 14, 1926, Serial No. 141,446. Renewed Dec. 19, 1927. 2 Claims. (Cl. 37—36)



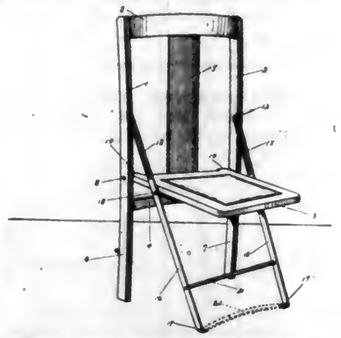
2. In a track groove cleaner for cars, a yoke pivotally mounted upon a car truck, a second yoke at the opposite side of the car truck from the first truck, means connecting them to operate them together to be raised or lowered, a screw thread on the car axle, a lever in contact with said screw thread whereby the yokes are raised when the car is traveling in one direction and lowered when the car is traveling in the opposite direction, and a pin carried by each yoke which is adapted to project into the grooves of each rail when the car is traveling in the proper direction and the yoke lowered.

1,667,403. METHOD OF PRODUCING POWER. MILON J. TRUMBLE, Alhambra, Calif. Filed Oct. 25, 1922. Serial No. 596,725. 3 Claims. (Cl. 60—88.)



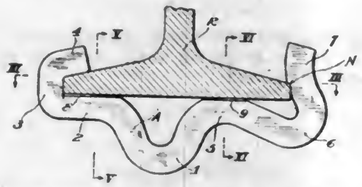
1. A method of utilizing low grade fuel comprising: placing the fuel in an enclosed chamber; blowing steam through said fuel to vaporize the hydrocarbons contained in said fuel; utilizing said steam and hydrocarbon vapors together in a prime mover; and recovering, by condensation, some of the hydrocarbon values from the exhaust of said prime mover.

1,667,404. FUEL-OIL-BURNING APPARATUS. ROBERT C. WHEELER, Toronto, Ontario, Canada, assignor to Superior Engineering Company Limited, Toronto, Canada. Filed Oct. 5, 1926. Serial No. 139,678. 4 Claims. (Cl. 158—42.2.)



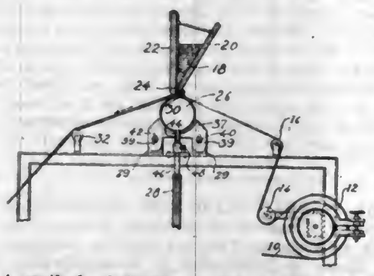
1. In oil burning apparatus, the combination of a burner nozzle; an air supply pipe adapted to supply air to said nozzle; an oil supply pipe adapted to supply oil to said nozzle; a valve in said oil supply pipe; a lever controlling said valve; a diaphragm chamber connected with said air pipe; a diaphragm adapted to be held in a raised position by pressure of air in said chamber; means connecting said lever and diaphragm whereby the lever may be actuated; a second lever adapted to actuate the first mentioned lever; and means for collecting oil from said nozzle adapted when a sufficient weight of oil has accumulated to actuate said second lever to rock the first mentioned lever to close the valve.

1,667,405. AUTOMATIC TELEPHONE SYSTEM. JOHN WICKS, Oak Park, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Dec. 14, 1923, Serial No. 680,596. Renewed Aug. 26, 1927. 60 Claims. (Cl. 179—27.)



1. In a telephone system, a first directively controlled automatic switch, a second directively controlled automatic switch, means for setting up a connection from a calling to a called subscriber, said connection including said switches in serial relation, a calling bridge in the first switch used during the establishment of the connection to control the second switch, a talking bridge in said first switch used during conversation to supply talking battery to the called line through said second switch, a change-over means in said first switch, and means in the second switch for operating said change-over means to open said calling bridge and to close said talking bridge, the last named means operating whenever the mechanical operation of the second switch is completed.

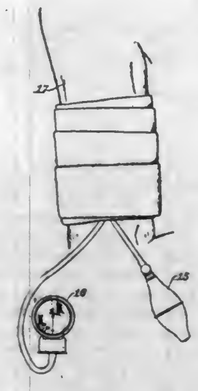
1,667,406. CHAIR. JOHN J. WILKINSON and MICHAEL A. WILKINSON, Owego, N. Y. Filed Oct. 8, 1927. Serial No. 224,904. 5 Claims. (Cl. 155—141.)



1. A folding chair comprising a frame constituting the rear legs and back, a seat pivoted to said frame, and front legs supporting said seat and having direct pivotal and guided sliding connection with said frame and foldable therewithin.

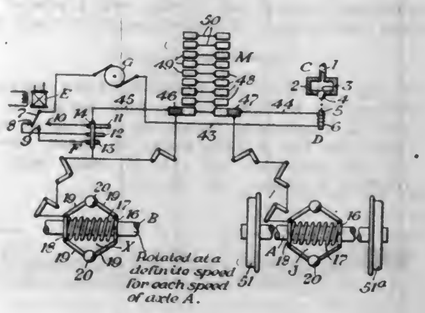
1,667,407. RAIL ANCHOR. EMANUEL WOODINGS, Oakmont, Pa., assignor to Woodings Forge & Tool Company, Verona, Pa., a Corporation of Pennsylvania. Filed Feb. 18, 1926. Serial No. 89,069. 6 Claims. (Cl. 238—330.)

1. A one-piece rail anchor adapted to extend under a rail and to be retained on the base thereof, having a plurality of faces adapted to engage the underside of the rail at points spaced inward from the edges of the rail and at the forward edges only of the faces, and means to hold the anchor with the edges in engagement with the underside of the rail.



1,667,408. METHOD AND APPARATUS FOR COATING FABRICS. RALPH S. ALLEN, Newark, N. J., assignor to Duratex Corporation, Newark, N. J., a Corporation of New Jersey. Filed Nov. 9, 1921. Serial No. 513,908. 13 Claims. (Cl. 91—68.)

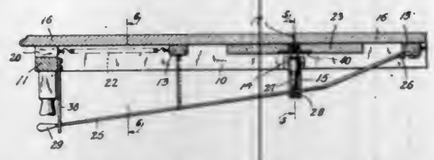
1. A method of forming coated fabrics, which comprises applying a coating composition to the nap of a napped fabric and drawing said composition into said nap by suction applied to the opposite side of said fabric.



8. An apparatus for coating fabrics which comprises a long suction chamber, a slot in the upper part of said chamber, a composition feeding trough above said slot and a doctor blade adjacent said trough.

1,667,409. ANATOMICAL SLEEVE. DANIEL R. BARR, Grand Rapids, Ohio, assignor to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed Sept. 21, 1927. Serial No. 221,102. 3 Claims. (Cl. 128—327.)

1. In a device of the character described, the combination with an elastic air bag, of a binder of a flexible fabric for securing the bag to a limb, comprising at one end a pocket portion for receiving the bag, an intermediate portion defining a continuation of the pocket portion, having the same width as the latter and a length sufficient to substantially overlap the pocket portion in operative position on the limb, and a strap portion at the other end, the strap portion having a width not in excess of one half the width of the other portions and a length sufficient to provide at least three turns about the limb, the strap portion lying on one side of the longitudinal center line of the binder.



1,667,410. SPEED-RESPONSIVE SYSTEM. CHARLES R. BEALL, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Sept. 5, 1923. Serial No. 661,026. 4 Claims. (Cl. 175—355.)

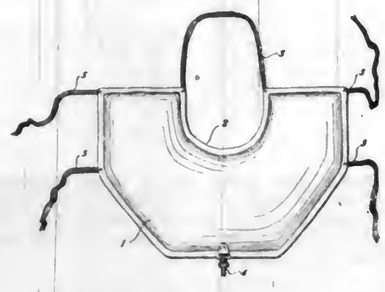
2. In combination, an axle, a first centrifugal device operated by said axle, a shaft operated at a definite speed for each speed of said axle, a second centrifugal

device operated by said shaft, a brush operated by said first centrifugal device, a second brush operated by said second centrifugal device, and means for electrically connecting said first brush with said second brush only when said shaft and said axle are operating at proper relative speeds.

1,667,411. EXTENSION TABLE. JOHN BELLOCCHIO, New York, N. Y. Filed Jan. 4, 1927. Serial No. 158,843. 3 Claims. (Cl. 45—112.)

1. In an extension table, a frame, means to support the frame, a normal table top comprising two parts supported upon the frame and slidable along the same toward and from each other for contraction and extension respectively of the table top, means tending automatically to draw the top members together, an auxiliary leaf nested normally beneath the top aforesaid and located in notched portions of the frame, a plunger rigidly attached to and extending beneath the auxiliary leaf, a lever pivoted to the frame and having sliding connection with the plunger, the free end of the lever extending forward adjacent to one end of the table, and a spring extending between the frame and the lever tending to lift it and the auxiliary leaf automatically bringing it into the plane of the table top when the top members first mentioned are drawn apart.

1,667,412. CONTINUOUS-SHEET-ROLLING APPARATUS. WILLIAM M. BLECKER, Canton, Ohio, assignor to Edward A. Langenbach, Canton, Ohio. Filed Dec. 7, 1925. Serial No. 73,597. 6 Claims. (Cl. 29—17.)



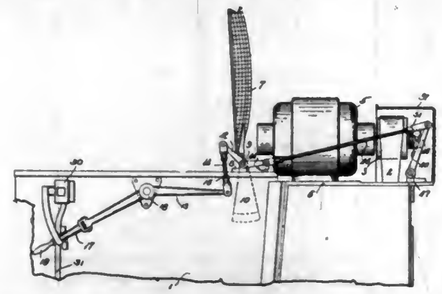
6. An apparatus for the continuous rolling of sheets from bars and the like, including a bar furnace, a series of roughing mills, a matching table, a second series of roughing mills, a second matching table, a series of finishing mills, a doubler, a second series of finishing rolls, loosening and opening mechanism, and means for continuously passing bars through said apparatus and rolling them to sheets of desired gauge in a single pass.

1,667,413. CONTINUOUS-SHEET-ROLLING METHOD. WILLIAM M. BLECKER, Canton, Ohio, assignor to Edward A. Langenbach, Canton, Ohio. Original application filed Dec. 7, 1925, Serial No. 73,597. Divided and this application filed June 30, 1926. Serial No. 119,675. 3 Claims. (Cl. 29—19.)

3. The method of continuous rolling of sheets from bars and the like which consists in passing heated bars successively through a series of roughing mills, matching and reheating the reduced bars, passing them through a second series of roughing mills, again matching and reheating them, passing the matched piles through a series of finishing mills, doubling the piles and passing the doubled packs through a second series of finishing mills and rolling them to sheets of desired gauge all in a single continuous pass.

1,667,414. LIFE PRESERVER. CLYDE W. BRENINGER, Canton, Ohio. Filed Mar. 10, 1927. Serial No. 174,286. 5 Claims. (Cl. 9—17.)

1. A life preserver comprising a pair of substantially semi-circular air bags, and means for supporting one of said bags beneath each arm, so that the ends of the bags are positioned across the back and chest of the wearer.

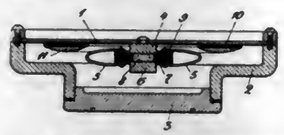


1,667,415. LADY'S HAT. MARGARET DAVIDSON, Philadelphia, Pa. Filed Mar. 15, 1927. Serial No. 175,465. 1 Claim. (Cl. 2—175.)

A lady's hat formed of a crown piece having a depending edge; a foundation element having a central opening and a V-cut with the edges of the V-cut secured together; and a brim section having a central opening and a V-cut with the edges of the V-cut secured together; the edge of the central opening of the foundation element being adapted to be secured to the depending edge of the crown piece, and the edge of the central opening of the brim being adapted to be secured to the outer edge of the foundation element; the outer edges of the foundation element as above formed having a lateral dimension greater than the normal width of the central opening of the brim, whereby the sides of the brim are forced downwardly into drooping position and the front and back of the brim sprung upwardly to prevent drooping of the said front and back, substantially as described.

1,667,416. SAFETY GUARD FOR CENTRIFUGAL MACHINES. CLARENCE H. GARLAND, Boston, Mass., assignor to American Tool and Machine Company, Boston, Mass., a Corporation of Massachusetts. Filed Mar. 31, 1926. Serial No. 98,788. 19 Claims. (Cl. 192—136.)

1. A centrifugal machine of the type having a rotating basket, a casing therefor, a movable cover for the casing, and means for driving the basket, said machine comprising common means for moving the cover and for starting

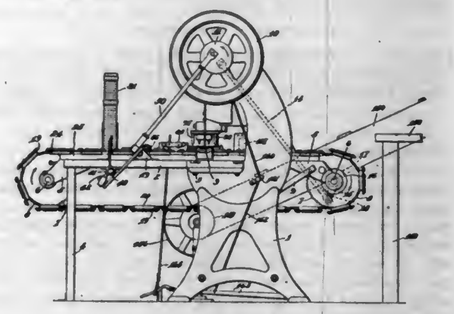


and stopping the basket, said means being so constructed and arranged that the cover cannot be moved from closed to open position as long as the basket is turning.

1,667,417. TOOL AND PROCESS OF MAKING SAME. THOMAS F. GITHENS, Cleveland Heights, Ohio, assignor to The Cleveland Twist Drill Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 17, 1925. Serial No. 69,602. 4 Claims. (Cl. 76—108.)

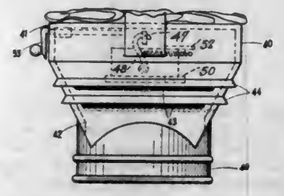
1. A tool making process comprising forming an end of a metal shank piece to receive an end of a flute piece in interlocking relation, and in said relation to form with said flute piece end longitudinally extending grooves spaced about the periphery of said end portions, assembling said pieces in said relation, and uniting said pieces by welding along said grooves.

1,667,418. SUBAQUEOUS SOUND-SIGNALING APPARATUS. WALTER HAHNEMANN, Kitzeberg, near Kiel, and ALARD DU BOIS-REYMOND, Plon, near Kiel, Germany, assignors to the Firm Signal Gesellschaft m. b. H., Kiel, Germany. Filed Feb. 4, 1921, Serial No. 442,583, and in Germany Nov. 29, 1915. 5 Claims. (Cl. 177—386.)



4. In a submarine sound signaling apparatus, a sound radiating diaphragm having a diameter of at least ten centimeters and formed of a material of low specific weight, and energy-converting means connected with said diaphragm, said apparatus having an aggregate damping decrement for the vibratory parts amounting to at least 0.3 whereby the apparatus is substantially prevented from giving an audible sound when it is subjected to the normally occurring undesired extraneous disturbances, the greater portion of said damping being radiation damping developed by said radiating diaphragm.

1,667,419. METHOD OF OXIDIZING MINERAL HYDROCARBONS. JOSEPH HIDY JAMES, Pittsburgh, Pa. Filed Dec. 6, 1921. Serial No. 520,283. 9 Claims. (Cl. 196—142.)



1. In the treatment of a liquid mineral hydrocarbon containing hydrocarbons of different molecular weights, the steps consisting of subjecting the same to heat treatment, at least sufficient to convert a part thereof into vapor or gaseous phase, separating from heavier portions thereof a lighter portion in the vapor or gaseous phase, thereafter mixing a lighter portion while still in vapor or gaseous phase with a gas containing oxygen, passing the vapor-oxygen mixture in contact with a catalyst and partially oxidizing the same within a range of temperature below that of continuous self-sustained combustion and which produces partial oxidation products.

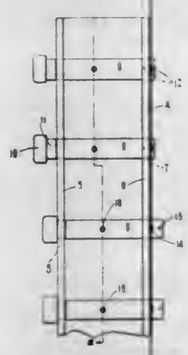
1,667,420. TESTING MACHINE. WILLIAM J. KENT, Brooklyn, N. Y., assignor to The Mechanical Rubber Company, Chicago, Ill., a Corporation of New Jersey. Filed Apr. 18, 1927. Serial No. 184,500. 11 Claims. (Cl. 209—81.)

1. In a machine for testing the location of electrically conductive inserts in a relatively non-conductive material, means for positioning the material, a contact device comprising a plurality of conductors forming part of an open single electrical circuit, and means for relatively moving said contact device and material to a position where properly located inserts in the material may close the circuit through said conductors.

1,667,421. APPARATUS FOR SAFELY SENDING MAIL BAGS, LUGGAGE, AND SIMILAR OBJECTS FROM AERIAL CRAFTS TO THE GROUND. MARCEL KÜNZER, La Chaux-de-Fonds, Switzerland, assignor to Societe Anonyme pour l'Exploitation des Brevets Künser, Basel, Switzerland. Filed Dec. 11, 1925, Serial No. 74,832, and in Switzerland July 21, 1925. 1 Claim. (Cl. 244—21.)

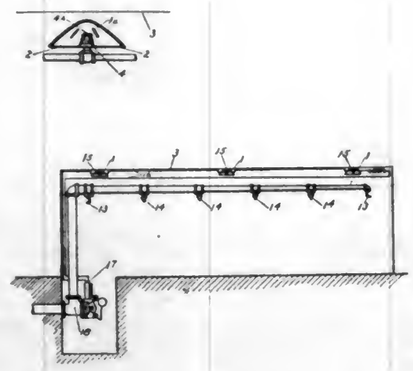
In an apparatus for safely dropping objects from aerial crafts to the ground and in combination a casing with means for attaching a load thereto, a folded parachute attached to said casing and arranged on the top plate of the same, locking means for containing said parachute, unlocking means and means for facilitating the unfolding of the parachute said means comprising slots and guide planes provided in the side walls of the casing and arranged so as to form a passage way for the air draught created by the falling apparatus and perforations in the top plate adapted to direct said air draught to the under side of the folded parachute.

1,667,422. DEMAGNETIZER. JOHN A. LEWELLYN, Toledo, Ohio, assignor, by mesne assignments, to Robert L. Hinds, Toledo, Ohio. Filed Nov. 13, 1920. Serial No. 423,882. 6 Claims. (Cl. 175—181.)



3. A demagnetizer including a section of influence including flux carrying poles to be contacted by the article to be demagnetized, an electromagnet for maintaining said section of influence, said electromagnet embodying simultaneously similar polarity terminal poles, a housing for sustaining the magnetic influence section and enclosing the electromagnet, and a non-conductor non-magnetic filler for the housing.

1,667,423. PROCESS FOR OBTAINING ALKALINE-EARTH-METAL SULPHIDES FROM ALKALINE-EARTH-METAL SULPHATES. THEODOR LICHTENBERGER, Heilbronn, and KONRAD FLOR, Buckeburg, Germany. Filed Mar. 4, 1926, Serial No. 92,334, and in Germany May 8, 1925. 8 Claims. (Cl. 23—137.)

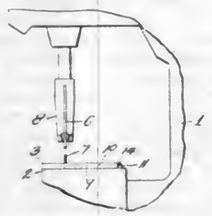


4. Process for obtaining sulphur compounds from alkaline-earth-metal sulphates, comprising dissolving the sulphate in molten alkaline-earth-metal salts which are fusible without water and do not decompose alkaline-earth-metal sulphates when in a molten condition, adding coke to obtain alkaline-earth-metal sulphide, separating the alkaline-earth-metal salts from the alkaline-earth-metal sulphide by sedimentation and drawing off the alkaline-earth-metal salts above.

1,667,424. FENCEPOST. HARRY LINDENSMITH, Walkerton, Ontario, Canada. Filed Mar. 17, 1926. Serial No. 95,439. 1 Claim. (Cl. 256—43.)

A fence post comprising a single member, U-shaped in cross section; spaced square openings in one of the sides of said member; annular openings in the other side of said member, registering opposite said square openings; wire openings in the central portion of said member; tension pins operating in said oppositely registering openings; each of said tension pins provided with a head at one end and a square shoulder adjacent said head, each shoulder being adapted to fit its said square opening; the body portion of said pins being round and adapted to fit its said annular opening, the free end of said pins being provided with transverse openings spaced apart slightly greater than the length of said shoulder and a cotter pin adapted to be fitted into the inner of said openings to retain said shoulder in its said square opening and into the outer of said openings to retain said pin from full disengagement from said member when said pin is partially pulled out.

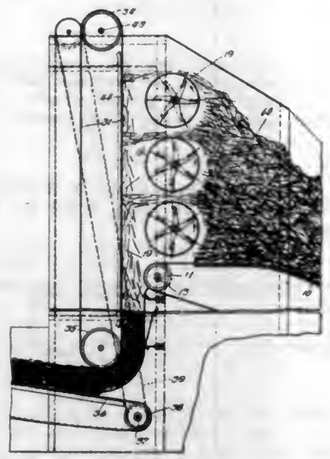
1,667,425. HEAT-RESPONSIVE APPARATUS. ALBERT J. LOEPSINGER, Providence, R. I., assignor, by mesne assignments, to General Fire Extinguisher Company, Providence, R. I., a Corporation of Delaware. Filed Aug. 27, 1921. Serial No. 496,011. 6 Claims. (Cl. 169—5.)



1. Heat responsive apparatus adapted to be controlled by the occurrence of a fire in a predetermined region, comprising means for concentrating heat rays emanating from said region combined with heat responsive means located at the point of concentration.

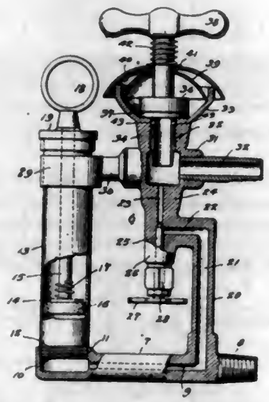
4. An automatic sprinkler adapted to discharge over a region combined with means adapted to gather heat rays from the said region at the heat responsive part of said sprinkler, said means comprising a reflecting surface having openings therein for permitting passage of fluid beyond the said surface.

1,667,426. GAS-TREATING PROCESS. CORNELIS LOURENS, Amsterdam, Netherlands, assignor to General Norit Company, Limited, Amsterdam, Netherlands, a Corporation of the Netherlands. Filed Nov. 11, 1922, Serial No. 600,483, and in the Netherlands Nov. 14, 1921. 1 Claim. (Cl. 183—4.)



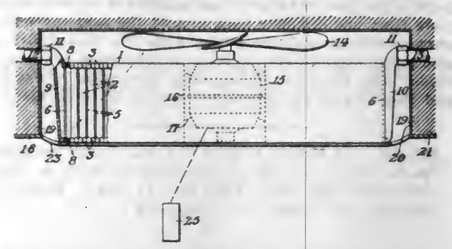
The process of separating gases which comprises passing the gases through a plurality of containers charged with active carbon and cooling said containers so that the last container is cooled more than the first.

1,667,427. SHOE-STITCHER ATTACHMENT. ARNOLD LUTSCHG, Great Bend, Kans. Filed May 18, 1927. Serial No. 192,199. 1 Claim. (Cl. 112—45.)



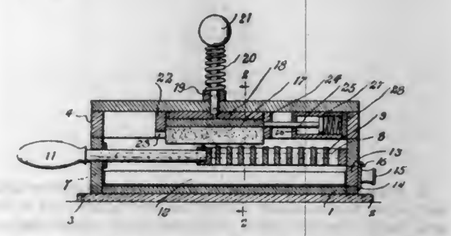
The combination with a stitching machine bed plate, a presser foot above said bed plate, a needle adjacent said presser foot and bed plate, of a channelling device, said device comprising a plate detachably connected to the bed plate, a shaft rotatably mounted in a channel in the underside of the plate, said plate having elongated alined apertures in its outer end in alinement with the needle and through one of which the needle works, a knife carried by the shaft and disposed in the other elongated aperture, the other end of said shaft terminating at the rear side of the plate in a right angularly disposed arm and lugs carried by the rear end of the plate at opposite sides of the shaft and under which the arm is received for holding the knife in operative or inoperative position as desired.

1,667,428. ART OF AGRICULTURE. ARTHUR J. MASON, Homewood, Ill., assignor to Mason Alfalfa Process Company, a Corporation of Delaware. Filed Aug. 18, 1926. Serial No. 129,986. 19 Claims. (Cl. 34—12.)



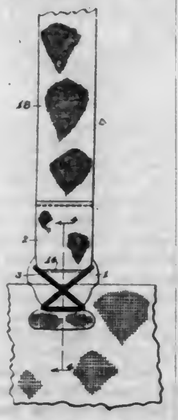
1. In the formation for desiccation of a crop mat of substantially uniform thickness and permeability, the herein described step of loosely depositing the pieces practically individually and promiscuously on a cross sectional surface of the mat.

1,667,429. BLOWTORCH. BRUNO MARTIN, Saginaw, Mich. Filed Oct. 22, 1926. Serial No. 143,360. 9 Claims. (Cl. 158—33.)



7. In a blow torch, a member having a lateral pipe for connection with a tank, and a filling cup, a closure for the filling cup, a valve controlling the outlet from the filling cup and having a rod passed through said closure, and supplemental closure means within the said closure and within the cup and through which the valve rod loosely passes.

1,667,430. APPARATUS FOR EXCHANGE OF HEAT. VICTOR MAUCK, Merion, Pa. Filed Sept. 13, 1926. Serial No. 134,964. 6 Claims. (Cl. 257—137.)



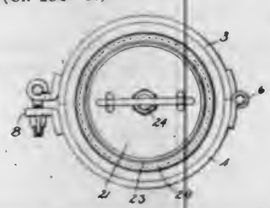
2. In a heating system, a radiator of cellular structure, formed of thin sheet metal walls, forming passageways for air; of a casing exterior to said radiator, in spaced relation therewith; and means arranged to effect the forced circulation of air between said casing and radiator in one direction, and through the radiator in the opposite direction.

1,667,431. ERASER CLEANER. FREDERICK B. MEYERS and HARRY W. DARNEY, Baltimore, Md., assignors of one-half to Reginald Bragonier, Baltimore, Md. Filed July 12, 1927. Serial No. 205,239. 7 Claims. (Cl. 15—142.)

1. An apparatus for the purpose set forth comprising a container constructed to admit an eraser, means for mounting an eraser within the container, a reciprocable scraper fitted within the container to act upon an eraser mounted therein, means for closing the container around the eraser, and means for pressing the eraser against the scraper.

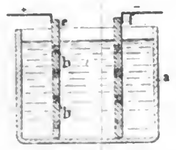
1,667,432. GARMENT SUPPORTER. GEORGE C. MOORE, Westerly, R. I. Filed Feb. 23, 1926. Serial No. 90,028. 2 Claims. (Cl. 24—245.

1. A garment-supporter comprising suspending means, a plate connected above with said suspending means and



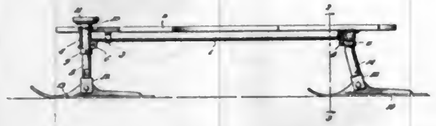
below provided with an anchor-neck adapted to be enveloped by a portion of the garment which is engaged thereby, and a flexible binder connected with one of said parts above the anchor-neck and adapted to be wrapped in more than one complete turn around the said enveloping garment-portion and the anchor-neck, the inflexibility of said plate intermediate the point of connection of the said binder and the said anchor-neck preventing relaxation and loosening of the enwrapped portion of the binder.

1,667,433. OIL-WELL PUMP. WILLIAM DAVID OGLETREE, Mexia, Tex., assignor of one-fourth to John A. Fain, Oklahoma City, Okla. Filed Oct. 11, 1922. Serial No. 593,925. 10 Claims. (Cl. 103—179.)



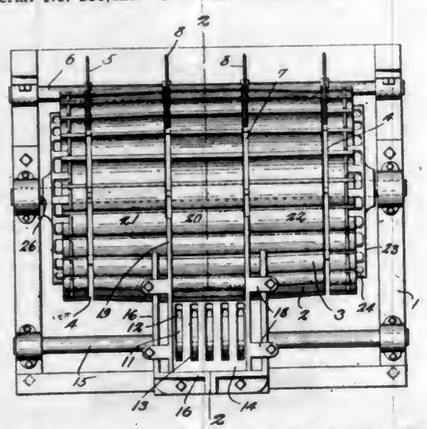
1. A pump of the character described comprising upper and lower heads, means connecting said heads, and a movable head operable upon the connecting means between the first mentioned heads.

1,667,434. METHOD AND APPARATUS FOR MAKING BUILDING UNITS. CHARLES L. NORTON, Boston, Mass. Filed July 15, 1926. Serial No. 122,592. 7 Claims. (Cl. 154—2.)



7. A method of manufacturing columnar building units comprising the cutting of a long piece of yieldable fibrous material, coating one of the longitudinal margins of the same with adhesive, overlapping the longitudinal margins and pressing them into adhesive engagement whereby a tubular shell is formed, preparing another similar tubular shell of a smaller diameter, locating one of the shells within the other and placing the shells within a supporting casing having an inner diameter somewhat greater than the outer diameter of the outer shell and pouring cementitious material in the space between the shells while the adhesive in the outer shell remains in a semi-soft state whereby relative movement between the overlapping marginal portions of the shell may take place and it may expand and conform somewhat to the shape imposed by the pressure of the poured material and defined by the internal shape of the casing.

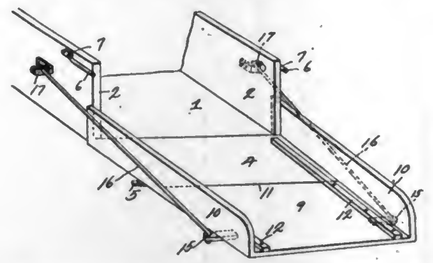
1,667,435. LEAD ACCUMULATOR. RENE OPPENHEIM, Levallois-Perret, France, assignor to Société Anonyme le Carbone, Levallois-Perret, France. Filed Apr. 18, 1925, Serial No. 24,235, and in France June 14, 1924. 7 Claims. (Cl. 136—27.)



1. An electrode element for lead accumulators comprising an intimate mixture of powdered electrode material and a finely divided porous material rendered impermeable to liquids but having a high absorption power for gases.

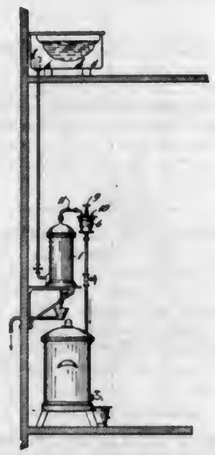
1,667,436. SCOOTER SLED. AUSTIN E. RAINEY, Grove City, Pa. Filed Mar. 23, 1927. Serial No. 177,786. 2 Claims. (Cl. 280—16.)

1. A coaster sled comprising a reach bar, a cluster fitting at each end of the reach bar, short bars coupled to the rear fitting and projecting laterally therefrom in opposite directions, a platform secured to the reach bar and engaging the rear cross bars, a steering post mounted in the front fitting, a steering member coupled to the upper end of the steering post, a rear post coupled to the rear fitting, and runners at the lower ends of the steering and rear posts.



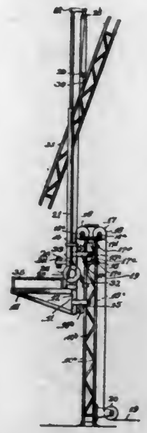
1,667,437. MACHINE FOR CUTTING FISH. ARTHUR R. ROGERS, Jonesport, Me. Filed Sept. 29, 1926. Serial No. 138,423. 5 Claims. (Cl. 17—2.)

1. A machine for cutting fish including a rotary drum tapered toward its ends from its center and having longitudinal channels in its periphery, said channels being inclined from intermediate points toward the ends of the drum, means for centering fish upon the central portion of the drum and within the respective channels, cutters



working transversely of the channels while the drum is in motion, and means for washing fish from the center of the drum head first toward the ends of the channels into the path of the cutters.

1,667,438. WAGON-BODY SHOVELING BOARD. ORVILLE SANDS and CHARLES EUSTICE, Cuba, Wis. Filed Mar. 27, 1926. Serial No. 97,882. 1 Claim. (Cl. 296—58.)



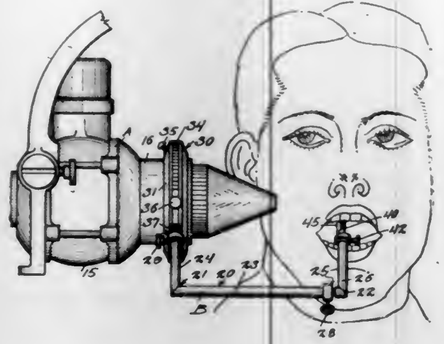
The combination with a wagon end gate, a wagon body, side members carried by the wagon body, said end gate being hingedly connected to the wagon body, of a shovel extension engaging the free end of the end gate in the plane thereof, side members carried by the shovel extension, said side members engaging opposite ends of the end gate and the outer sides of the wagon body sides, cleats carried by the inner side of the shovel extension and spaced from the side members thereof whereby when the end gate is closed said cleats will be received between the side members of the wagon body, cleats carried by the outer side of the shovel extension, all of said cleats engaging opposite sides of the end gate.

1,667,439. APPARATUS FOR PURIFYING AND SIMULTANEOUSLY STERILIZING WATER OR OTHER LIQUIDS OR GASES. JOHAN NICOLAAS ADOLF SAUER, Amsterdam, Netherlands. Filed Aug. 6, 1923, Serial No. 656,056, and in Germany Aug. 18, 1922. 2 Claims. (Cl. 210—132.)

2. An apparatus for purifying fluids comprising a closed container, fluid inlet and outlet means for said container, means in said container for suspending absorbent material in the fluid in said container, a device in said container for separating absorbent material from the fluid and communicating with said fluid outlet means, and a filter chamber communicating with the said fluid outlet means of said container, said chamber containing a filtering body comprising active carbon.

1,667,440. MAST-ERECTING APPARATUS. ALBERT T. SCANNELL, Chicago, Ill. Filed Dec. 31, 1925. Serial No. 78,713. 27 Claims. (Cl. 189—16.)

1. Apparatus of the class described comprising a mast consisting of detachable aligned portions, a frame freely slidable up and down on the erected portions throughout the height thereof, a gin pole carried by said frame, power actuated means for elevating said frame from the ground level together with workmen and another mast portion, and mechanism on said frame adapted to cooperate with said pole for supporting said other portion of said mast in position for attachment to the upper end of said erected portion.



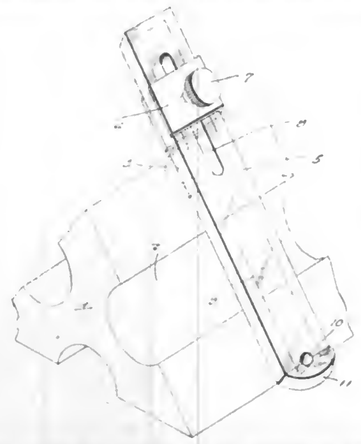
1,667,441. SCRUBBING BOARD. ROBERT L. SHERROD, Brownsville, Tenn., assignor of one-sixth to G. G. Mulherron, one-sixth to Ted Martin, one-sixth to F. W. Whitehurst, one-sixth to T. D. Gooch, and one-sixth to Roy S. Moore, Brownsville, Tenn. Filed Feb. 26, 1927. Serial No. 171,265. 4 Claims. (Cl. 68—29.)

1. A scrubbing board comprising side bars, a sheet arranged between and carried by the side bars, said sheet having its material bent to provide spaced transverse

water receiving pockets, having forward shoulders, and rubbing elements held within the water receiving pockets, each rubbing element being formed of a plurality of tightly twisted strands of wire, the rear sides of each rubbing element being arranged rearwardly of the forward shoulder of the corresponding pocket, the outside diameter of each rubbing element being sufficiently large so that the forward side of the rubbing element projects forwardly beyond the shoulder of the pocket for free engagement with the articles being washed.

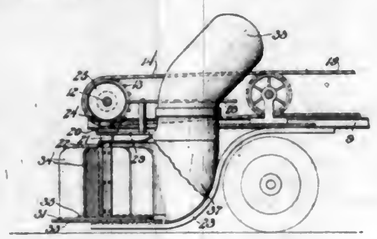
1,667,442. DENTAL X-RAY FILM HOLDER. THOMAS E. SIKES, Greensboro, N. C. Filed Apr. 17, 1926. Serial No. 102,751. 3 Claims. (Cl. 250—34.)

1. The combination with an X-ray machine, of a film holder for receiving and maintaining the film in a flat condition against distortion, a ring rotatably mounted upon the X-ray machine, a substantially U-shaped frame connecting the film holder with the rotatable ring, and means for adjusting the frame to conform to the facial characteristics of the patient on which the machine is used.



1,667,443. GAS-EXPELLING DEVICE. LORENSE G. SIMONSEN, Benson, Nebr. Filed Aug. 15, 1927. Serial No. 212,985. 1 Claim. (Cl. 128—349.)

A gas relieving device of the character described comprising a flat jaw holding device having a central aperture and recesses in its upper and lower edges, a flexible tubular member adapted to be inserted through said aperture, said tubular member being formed from wire convolutions, the wire convolutions of the tubular member at the forward end of the device being in spaced relation.



1,667,444. DIMENSION GUIDE DEVICE. EPPENETES W. SMITH, Brooklyn, N. Y. Filed Jan. 13, 1927. Serial No. 160,923. 3 Claims. (Cl. 33—189.)

1. A dimension guide device comprising a transparent member adapted to be arranged at one side of a triangular scale, and having a vertical indicator, and also having at its lower end an angularly disposed foot and in its lower portion an apertrue in alignment with said indicator, a spring arm adapted to exert tension against another side of the triangular scale, and means adjustable

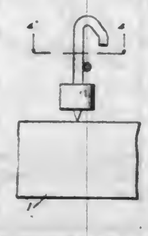
on the transparent member in the direction of the length thereof for adjustably connecting the spring arm to the transparent member.

1,667,445. SNOWPLOW. JAMES N. SMITH, Bonair, Iowa. Filed June 25, 1926. Serial No. 118,552. 4 Claims. (Cl. 37—43.)

1. In a snow plow, the combination of a plurality of vertical shafts, each with a horizontally disposed disk secured to its lower end, cutter sections removably secured to the edge of the disk, fan blades secured radially of each shaft and with their lower edges secured to the disk, means for rotating said shafts, and a casing for receiving the snow and ice from the fans and directing it to the side of the roadway.

1,667,446. PROCESS FOR OBTAINING TRICALCIUM SACCHARATE. CARL STEFFEN, Jr., Vienna, Austria. Filed Apr. 27, 1926, Serial No. 105,012, and in Austria Nov. 17, 1925. 3 Claims. (Cl. 127—47.)

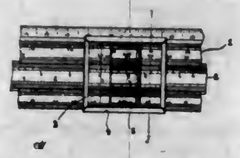
1. In the process of washing a filter cake of impure tricalcium saccharate containing soluble non-sugars, the step which comprises washing the cake under pressure with a tricalcium saccharate suspension substantially free of soluble non-sugars.



1,667,447. METHOD OF MAKING IMPRESSIONS. HILTON SWAN, Upper Montclair, N. J., assignor to Bakelite Corporation, New York, N. Y., a Corporation of Delaware. Filed Sept. 28, 1925. Serial No. 59,209. 4 Claims. (Cl. 41—25.)

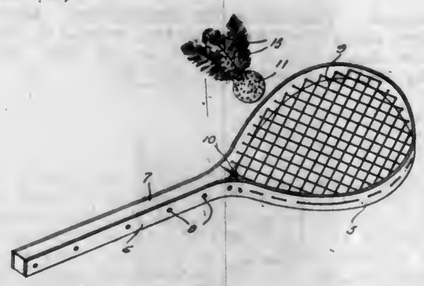
1. In a method of making a transformable plastic material adapted for receiving a negative impression from

a positive, the step which comprises spraying a surface layer of metal onto a potentially reactive, heat induratable, resin composition.



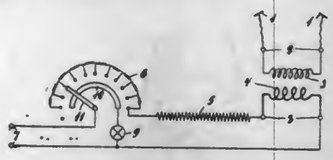
4. A matrix blank comprising a backing sheet of potentially reactive, heat indurtable, resin composition having a firmly united sprayed metal surface thereon.

1,667,448. FURRING UNIT. GEORGE F. VOIGHT, Oakland, Calif., assignor to Economy Products Corporation, a Corporation of California. Filed Sept. 26, 1923. Serial No. 664,897. 4 Claims. (Cl. 72—118.)



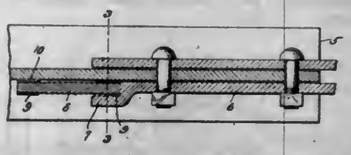
2. A furring unit comprising a driven element and a substantially cylindrical spacing element, said spacing element formed of a strip of paper bound on and around the shank of said driven element, to normally resist removal therefrom.

1,667,449. MAGNIFYING DEVICE FOR SLIDE RULES. FRITZ WÖMPNER, Geroldsgrun, near Nuremberg, Germany, assignor to the Firm: A. W. Faber, Stein, near Nuremberg, Germany. Filed Jan. 26, 1927, Serial No. 163,819, and in Germany Nov. 2, 1926. 2 Claims. (Cl. 88—39.)



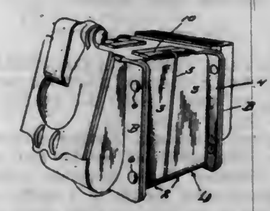
1. The combination with a slide rule of a cursor having members extending in the direction of the slide rule and a magnifying glass slidably mounted on the cursor between said guide members, for the purposes set forth.

1,667,450. GAME. VICTOR ZIMMERMAN, Holyoke, Mass. Filed Nov. 30, 1926. Serial No. 151,776. 1 Claim. (Cl. 273—73.)



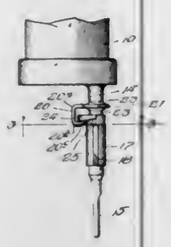
A racket comprising a bowed frame terminating in straight parallel spaced extremities, a filled bar between the extremities, coextensive therewith and fixed thereto, stringing in the bowed frame, and a hook on one end of the bar and extending into the bowed frame to engage portions of the stringing.

1,667,451. APPARATUS FOR THE TREATMENT OF ORGANISMS WITH ELECTRICAL CURRENTS. WILHELM TEODOR ARNBERG, Liljeholmen, Sweden. Filed June 28, 1926, Serial No. 119,148, and in Sweden July 19, 1925. 5 Claims. (Cl. 74—177.)



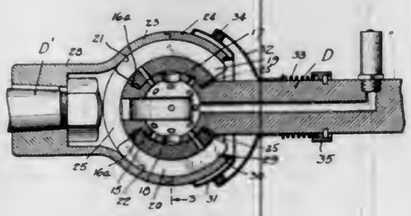
1. An apparatus for the treatment of organisms with electrical current supplied to the organism by means of electrodes, characterized by the electrodes being connected to the secondary circuit of a transformer the primary winding of which is connected through a series resistance to a source of low frequency alternating current the voltage of which is relatively high and adapted to be reduced by the said series resistance to a suitable low primary terminal voltage which in turn is stepped up by the transformer to a secondary terminal voltage sufficient to overcome the initial resistance of the organism; said secondary terminal voltage automatically decreasing, upon the electrodes being applied to the organism, to a value which is safe to the organism with regard to the subsequent decrease of its resistance.

1,667,452. FISHPLATE BOND. GEORGE BARNES, Princeton, Ind., assignor of one-third to Joseph G. Applegath and one-third to George W. Jenkins, Princeton, Ind. Filed July 17, 1926. Serial No. 123,222. 1 Claim. (Cl. 173—262.)



A fish plate for connecting adjacent railway rails including a body portion having lateral offset end portions, the upper and lower edges of the offset end portions lying in parallel relation with the treads and bases of the rails, a wire bond including a length of wire, sleeves connected with the ends of the wire, the sleeve at one end of the wire being positioned between the offset portion of the fish plate and the rail and welded to the offset portion, the sleeve at the opposite end of the wire being welded to a rail with which the fish plate is associated.

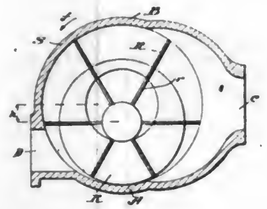
1,667,453. ADJUSTABLE PEDESTAL WAY LINER. DONALD S. BARROWS, Rochester, N. Y., assignor to The Symington Company, New York, N. Y., a Corporation of Maryland. Filed May 9, 1927. Serial No. 189,914. 11 Claims. (Cl. 105—225.)



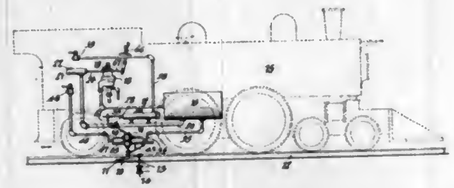
1. In combination with a journal box having pedestalways at the sides thereof, a laterally adjustable liner disposed within each way.

1,667,454. SYRINGE. HAROLD BRIX, Chicago, Ill., assignor to Sharp & Smith, Chicago, Ill., a Corporation of Illinois. Filed Mar. 28, 1925. Serial No. 19,036. 4 Claims. (Cl. 128—221.)

1. A syringe provided with a cylinder; a tapered extesion on the cylinder; a detachable needle having a socket with a tapered bore adapted to fit over the tapered extension; and means for holding said socket in place on said extension, said means comprising a holding finger formed from a flat strip of sheet material having a hole in one end, the tapered extension on the syringe extending through said hole and the finger being attached thereto, and a part on the socket adapted to engage said finger by rotation of said socket on said tapered extension to tighten said socket on said extension.



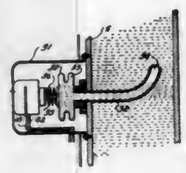
1,667,455. UNIVERSAL JOINT. ELMER G. BURNS, Los Angeles, Calif. Filed Dec. 14, 1925. Serial No. 75,426. 6 Claims. (Cl. 64—91.)



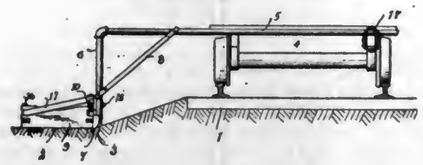
1. A universal joint comprising a ball member, a socket member, a housing for the members, shafts respectively secured to the ball member and housing provided with an opening through which the shaft for the member extends, the wall of said opening being provided with a groove, and a closure for the opening comprising a member having a lip engaging within the groove, and a second member on the ball member shaft having sliding engagement with the lipped member.

1,667,456. ROTARY PUMP AND COMPRESSOR. RENÉ JEAN PAUL EMILE COZETTE, Neuilly-sur-Seine, France. Filed June 15, 1926. Serial No. 116,225. 1 Claim. (Cl. 103—136.)

A rotary pump, comprising, a stator with an inlet and an outlet, a rotor positioned within, and eccentric to, the stator, propeller blades rotatably carried by the rotor and non-movable thereto in a radial direction, a gear at one end of the rotor, a drive shaft, coaxial with the stator, and a gear on the drive shaft in mesh with the rotor gear, the rotor comprising, a plurality of like sectors held in spaced relationship, the blades projecting through the spaces between the sectors and bearing in a fluid tight manner against the inner surface of the stator, an axle journalled at each end in, and concentric with, the stator, separate collars snugly but rotatably carried by the axle, the blades being each fixed to separate ones of the collars.

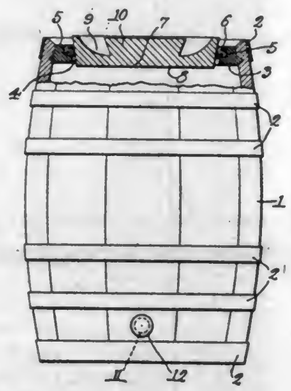


1,667,457. AUTOMATIC TRAIN-STOPPING APPARATUS. DANIEL M. DALEY, Lackawanna, N. Y., assignor of one-half to John H. Shea, Lackawanna, N. Y. Filed June 16, 1925. Serial No. 37,509. 12 Claims. (Cl. 246—183.)



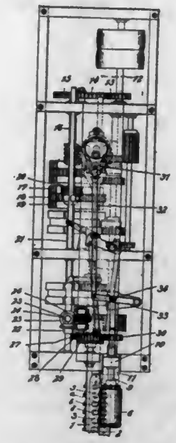
1. In an automatic train stopping apparatus, the combination with a locomotive having an air brake system including a main air reservoir and a brake valve, of pneumatically-operated means for actuating the brake valve communicating with said reservoir, a controlling valve interposed between the reservoir and said brake valve-actuating means, a trip device, and pneumatically-governed means on the locomotive arranged to be tripped by said device for actuating said controlling valve.

1,667,458. TEMPERATURE-REGULATING MEANS FOR LIQUID-COOLED ENGINES. WILLIAM H. DRISCOLL, Jersey City, N. J. Filed June 18, 1927. Serial No. 199,728. 2 Claims. (Cl. 219—38.)



1. In an engine cooling system comprising a radiator, a housing mounted on the shell of the radiator, contact members in said housing, a switch in the housing adapted to bridge said contact members, means in the lower compartment of the radiator and directly responsive to temperature changes of the liquid therein for opening and closing said switch, a heating unit in the lower compartment of the radiator mounted on the radiator shell and means for establishing a circuit through the heating unit, the contact members and a source of electrical energy.

1,667,459. BALLAST TOWLINE MARKER AND SHOULDER CLEANER. WILLIAM C. HOLCOMB, Carrizozo, N. Mex. Filed May 16, 1927. Serial No. 191,827. 2 Claims. (Cl. 37—105.)



1. A towline marking tool and shoulder cleaner comprising a bar adapted to be connected at one end to a push car and provided at its opposite end with a standard, a marker at the lower end of the standard, a drag, a bar connecting the inner end of the drag with said standard, and a second bar connecting the outer end of the drag with the bar forming connecting means between the standard and drag.

1,667,460. KEG. JAMES W. HUSSEY, Martinsville, Ind. Filed Mar. 9, 1927. Serial No. 173,969. 1 Claim. (Cl. 217—76.)

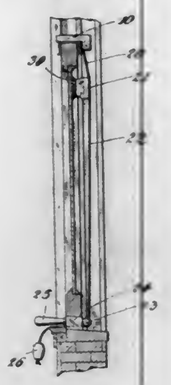
A device of the class described including a container, a ring seated in one end thereof formed of material expansible by moisture, said ring having a cylindrical inner wall formed with a continuous rabbet in its upper portion, a gasket seated in the rabbet and extending inwardly beyond the inner periphery of the ring, said gasket being formed of a material expansible by moisture, and a closure having an unbroken tapered periphery, said closure being insertable downwardly within the gasket to compress the gasket in the rabbet, that portion of the ring below the gasket constituting a stop for limiting the movement of the closure during the compressing of the gasket.

1,667,461. APPARATUS FOR ARRANGING EDGES OF NET FABRICS IN NET-MAKING MACHINES. SAIBEI KAKUDA, Fukuyama-Shi, Japan, assignor to Saibi Mojiami Kabushiki Kaisha, Fukuyama-Shi, Japan. Filed Mar. 28, 1927, Serial No. 179,103, and in Japan Apr. 5, 1926. 2 Claims. (Cl. 96—4.)

1. An apparatus for arranging edges of net fabric in net-making machines for inter-locked netting, which consists of a take-up roller, means to intermittently rotate and reciprocate laterally said take-up roller two endless belts put over the ends of the said take-up roller and a plurality of catch pins secured to each of said endless belts.

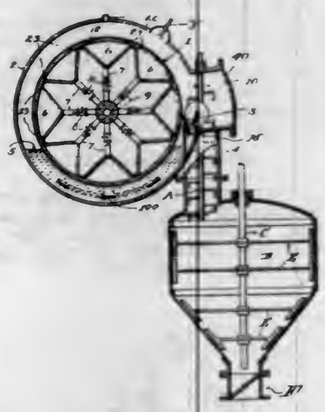
1,667,462. COMBINATION TOOL. GEORGE A. LOGAN, New York, N. Y. Filed May 18, 1925. Serial No. 30,963. 6 Claims. (Cl. 30—10.)

4. The herein described razor blade knife comprising the combination with a handle, a blade holder pivoted in one end of the handle and a blade carried by the holder and adapted to swing therewith into the handle or to be projected from the handle, of a guard for the blade slidable over the holder and blade and carrying means at one end to co-operate with the handle to lock the blade and holder in open position.



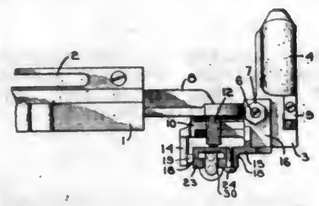
1,667,463. FASTENING DEVICE FOR FENCING, ETC. BENJAMIN K. ROSE, Warren, Ohio, assignor to Frost Steel Products, Inc., Warren, Ohio, a Corporation of Ohio. Filed Feb. 11, 1927. Serial No. 167,521. 1 Claim. (Cl. 256—57.)

The combination with a wire fence and a post therefor of a fastening clip comprising a loop-like strand of wire surrounding one of the fence strands and the post



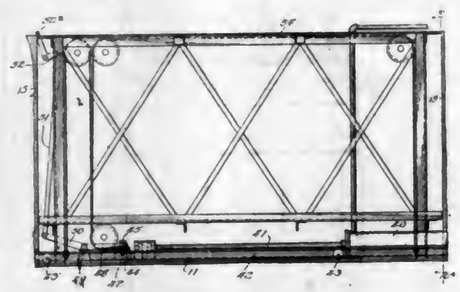
and having its ends formed to constitute opposed helixes that have been given rotative movement as a unit in order to twist the adjacent portions of said fastening clip.

1,667,464. CLEANING DEVICE. GEORG WAGNER, Monsey, N. Y. Filed Apr. 7, 1927. Serial No. 181,633. 3 Claims. (Cl. 15—251.)



1. A cleaning device comprising a portable frame having perforated ears adjacent the opposite ends of one side providing bearings, a spring roller mounted in said ears, clamping members affixed to the ends of the frame adjacent said ears, a carriage, a flexible member secured at its ends to said carriage and to said roller, a cleaning implement mounted on said carriage, a bracket, a guide roller carried by the bracket, and a flexible member connected to the carriage and passing around the guide roller to be pulled to operate the carriage and cleaning implement.

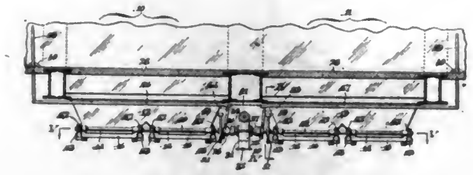
1,667,465. FILTER AND FILTERING METHOD. JUSTIN F. WAIT, New York, N. Y. Filed Mar. 10, 1925. Serial No. 14,514. 6 Claims. (Cl. 210—201.)



6. In pressure filtration, the method including the formation of a filter cake, removal of a portion thereof, mixing of the remaining portion with the mass of material within the filter and subjecting the same to another step of filtration.

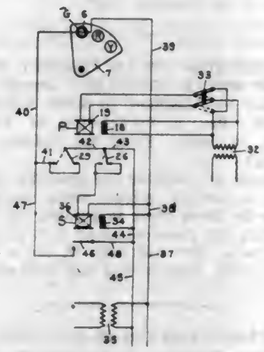
1,667,466. LATCHING MECHANISM FOR INTERMITTENT THREAD-CUTTING TEMPLES. GEORGE H. WILLARD, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Nov. 5, 1926. Serial No. 146,392. 4 Claims. (Cl. 139—266.)

1. A self-contained latching mechanism for an intermittent thread cutting temple, the head of which presents a cap and a pod united by a screw, which mechanism comprises a base, a latching mechanism for controlling the operative and inoperative position of the cutting mechanism carried by and mounted on said base, and a projection from the base fitting against the temple head and around said screw, the said screw when in place acting to clamp the projection to the temple head and hold the base in place, whereby the latching mechanism may be attached to an existing temple without alteration thereof.



1,667,467. GARAGE. HUGH E. YOUNG, Chicago, Ill., assignor of one-half to Eugene S. Taylor. Filed Feb. 16, 1927. Serial No. 168,620. 5 Claims. (Cl. 214—16.1.)

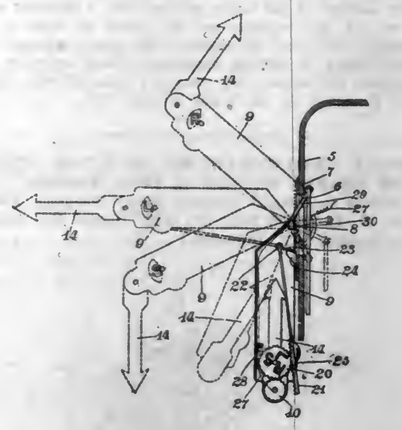
1. In a storage garage for vehicles, a plurality of cages adapted to lie in a single storage plane and substantially fill a storage space of predetermined area, each cage adapted to contain a vehicle, each cage having a top, said cages being separated by fire walls when in the storage plane, and means for raising each cage out of the storage plane to permit egress of a vehicle therefrom over the tops of adjacent cages.



1,667,468. MECHANISM FOR ACTUATING THE GATES OF GRAVITY DISCHARGE HOPPERS. WILLIAM J. BURNETT, Glenside, Pa., assignor to Beaumont Manufacturing Company, Philadelphia, Pa., a Corporation of New Jersey. Filed Dec. 9, 1926. Serial No. 153,533. 3 Claims. (Cl. 221—145.)

1. Mechanism for actuating the gates of a multiplicity of gravity discharge hoppers including an individual shaft for each hopper and equipped with gear pinions in mesh with toothed racks on the associated gates, speed-reduction mechanism interposed between the contiguous shaft ends, an electric motor adapted to drive the speed-

reduction mechanism in opposite directions to open and close the gates, and means whereby the respective shafts may be selectively coupled with said speed-reduction mechanism.

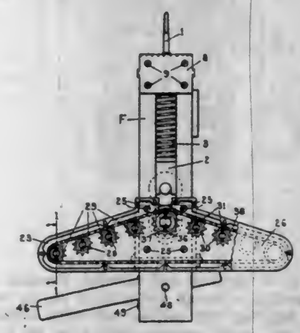


1,667,469. LIGHT SIGNAL. PAUL E. CARTER, Bronxville, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Nov. 9, 1921, Serial No. 514,053. Renewed Sept. 27, 1927. 12 Claims. (Cl. 177—327.)

11. In a light signal, an incandescent lamp and an optical device for projecting light from said lamp, a member comprising a plurality of color screens, means mounting said member for movement to an intermediate and two extreme positions to thereby interpose one of said screens in the path of the light, said member being biased to said intermediate position, an energizing circuit for said lamp, an alternating current relay for operating said member and for opening said energizing circuit when said member is in its intermediate position, a slow-releasing alternating current relay energized and de-energized respectively, as said member assumes either extreme position or its intermediate position, and another energizing circuit for said lamp including a back contact of said slow-releasing relay.

1,667,470. AUTOMOBILE SIGNAL. GEBHARDT A. FRIEDRICH, Columbus, Ohio. Filed Mar. 14, 1927. Serial No. 175,130. 7 Claims. (Cl. 116—52.)

1. A direction indicator mechanism for attachment to a motor vehicle comprising, in combination, a swinging casing or frame having its outer edge closed and its inner edge open, a translucent pointer pivoted therein, means for moving said pointer into said casing and out

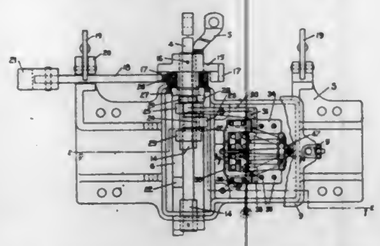


of the open edge of the same into three different indicating positions, and means within the pointer for illuminating the same.

1,667,471. GLOW CATHODE AND ELECTRON TUBE CONTAINING SAME. ERNST FRIEDERICH, Berlin-Charlottenburg, Germany, assignor to Radio Corporation of America, a Corporation of Delaware. Filed Nov. 28, 1925. Serial No. 72,044, and in Germany Dec. 1, 1924. 6 Claims. (Cl. 250—27.5.)

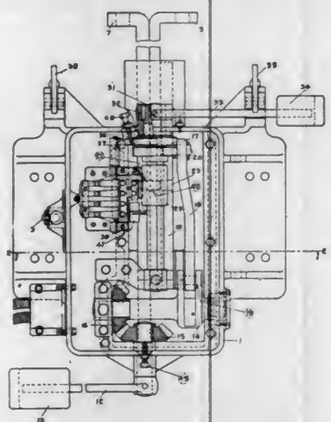
1. A glow cathode for electron tubes comprising a metal wire containing a small percentage of carbon and a coating on this wire containing a carbide of a metal capable of high electron emission.

4. The method of forming a cathode which consists in coating a highly refractory filamentary core with a mixture of carbon and a compound of a metal having a high electron emitting capacity and heating the resulting product sufficient to form a carbide of the metal.



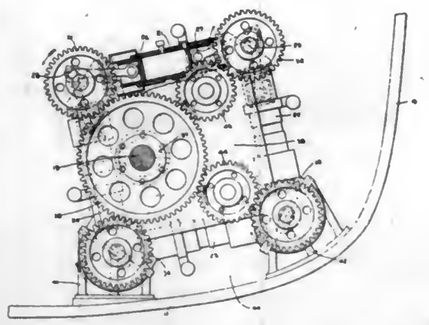
1,667,472. POWER-OPERATED WRINGER. WINTHROP K. HOWE, Rochester, N. Y., assignor, by mesne assignments, to General Railway Signal Company, Rochester, N. Y., a Corporation of New York. Filed Oct. 21, 1922. Serial No. 506,074. 5 Claims. (Cl. 68—32.)

1. A wringer comprising, a support frame, brackets fastened to the frame, an upper wringer roll, a lower wringer roll, means for forcing said rolls together, a



plurality of conveyor rolls mounted in the brackets on one side of the lower wringer roll and having the plane of their top surfaces approximately tangential to the upper surface of the lower wringer roll, a sprocket within one of the brackets on the shaft of each of the conveyor rolls and the shaft of the lower wringer roll, and a chain in driving engagement with each of said sprockets for causing the conveyor rolls to turn in the same direction as the lower wringer roll.

1,667,473. RAILWAY-SWITCH-SELECTOR-OPERATING MEANS. WINTHROP K. HOWE, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Dec. 17, 1926. Serial No. 155,484. 12 Claims. (Cl. 246—242.)



12. In combination, a track switch and operating rod, a power operated switch machine and operating rod, and a hand operated switch stand and operated rod, a casing slidably receiving the three said rods, and means for coupling the operating rod to either of the operated rods at will.

1,667,474. RAILWAY-SWITCH-SELECTOR-OPERATING MEANS. WINTHROP K. HOWE, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Jan. 12, 1927. Serial No. 160,679. 5 Claims. (Cl. 246—253.)

3. In a switch operator and selector, a casing, a switch rod in the casing, a second and a third rod in the casing, means for coupling the switch rod with either of the other rods, manually operable means in the casing for operating one of said other rods, a power operated machine for operating the other of said other rods, and means, operated by the operation of said coupling means, for controlling energization of said machine.

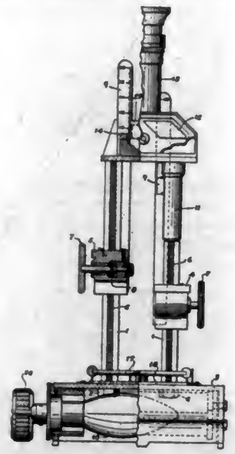
1,667,475. MARINE POWER INSTALLATION. ALEXANDER T. KASLEY, Moore, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 25, 1927. Serial No. 186,361. 16 Claims. (Cl. 115—38.)

1. In a marine power installation, the combination of a propeller shaft, a polyhedral internal combustion engine unit encompassing the propeller shaft, gearing means transmitting power from the engine unit to the propeller shaft, and means for offsetting the engine unit with respect to the propeller shaft.

1,667,476. METHOD OF INCREASING THE ELASTICITY OF METAL ARTICLES. GEORGE L. KELLEY, Philadelphia, Pa., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Sept. 14, 1926. Serial No. 135,490. 2 Claims. (Cl. 148—12.)

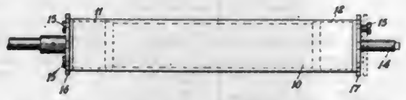
1. The process of restoring the elasticity in steel locking rings of automobile wheels which consists in first cold working the blank stock to produce the rings, thereafter subjecting the produced rings to a heat lying substantially between 200° and 800° F. for a period varying between thirty minutes and one half minute.

1,667,477. PRODUCING COLOR PICTURES. WILLIAM V. D. KELLEY, Brooklyn, N. Y., assignor, by mesne assignments, to Prizma, Incorporated, a Corporation of New Jersey. Filed Feb. 4, 1920. Serial No. 356,159. 11 Claims. (Cl. 95—2.)



1. Process for making a color picture upon a support having a sensitive coating including strata of different speeds, consisting in first printing, developing and bleaching a color selection print in the fastener stratum, then printing and developing a complementary print in the slower stratum, and fixing both.

1,667,478. COLORIMETER. ROBERT E. KLETT, Teaneck, N. J., assignor to Klett Manufacturing Company, Inc., New York, N. Y., a Corporation of New York. Filed Nov. 25, 1924. Serial No. 752,163. 15 Claims. (Cl. 88—14.)

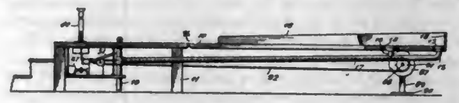


1. In a colorimeter, the combination with color observing means for standard and test solutions, of color

intensity indicating means for each of the solutions, means carried by said colorimeter for indicating the rela-

tion between said intensities of colors, and means adjacent the first mentioned means for observing the last two mentioned means.

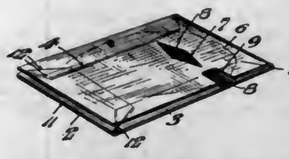
1,667,479. CHART DRIVE ROLL FOR STRIP-RECORDING APPARATUS. HERMAN KOESTER, Waterbury, Conn., assignor to The Bristol Company, Waterbury, Conn., a Corporation of Connecticut. Filed Dec. 2, 1926. Serial No. 152,185. 5 Claims. (Cl. 74—31.)



2. A drive roll for the charts of strip recording apparatus, comprising a cylindrical roll member, separated driving sprockets movable therewith, the one sprocket being freely movable axially of said roll to accommodate automatically variations of width in the chart operating over the roll, and means to limit the axial movement of said movable sprocket.

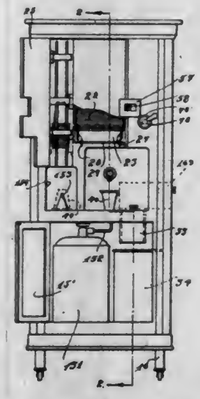
1,667,480. ALKALI FUSION. VAMAN R. KOKATNUR, New York, N. Y. Filed Jan. 22, 1926. Serial No. 83,136. 9 Claims. (Cl. 260—154.)

1. The improvement in substantially anhydrous alkali fusions which consists in reacting upon an aromatic radical of an organic compound with caustic alkali by fusing the compound with the alkali in the presence of an inert hydrocarbon diluent, the amount of alkali introduced into the fusion being less than about twice the amount required by theory for the reaction.



1,667,481. GAME. CARVEL H. LANGE, New York, and EDWIN W. VOLLERT, Brooklyn, N. Y., assignors to Playmor Golf, Inc., a Corporation of New York. Filed Dec. 17, 1926. Serial No. 155,359. 13 Claims. (Cl. 273—35.)

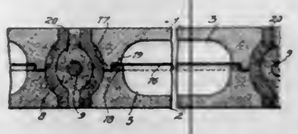
1. A device of the character described, comprising a platform upon which a player is adapted to stand, said platform having associated therewith a positioning member adapted to hold a golf ball in a stationary position to be struck by a golf club in the hands of the player, said platform further including a playing field and a target towards which the ball is adapted to be driven and means to return the ball to the playing position, said means including a feeding member for engaging



the ball, moving it to a predetermined definite position relatively to said platform and maintaining it in said postion until said ball is propelled therefrom by the player.

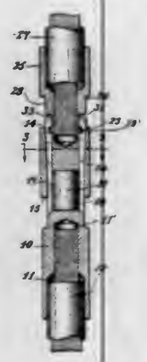
1,667,482. CONTAINER AND DISPLAY DEVICE. EDWIN A. LEE, Philadelphia, Pa. Filed Oct. 18, 1926. Serial No. 142,232. 1 Claim. (Cl. 229—87.)

A container of the character stated composed of transparent material and comprising a substantially rectangular base, elongated side flaps integral with the longer opposed edges of said base, a relatively short end flap integral with one of the shorter edges of said base, said side and end flaps being adapted to fold inwardly over said base, and a relatively long end flap integral with the opposite short edge of said base and adapted to be folded inwardly to cover said container, said elongated flap having an unobstructed aperture in its body portion, and being also provided with a recess aligning with a recess in the lower adjacent side flap, both of said recesses being cut inwardly through which the goods in said container may be felt and seen when the container is closed.



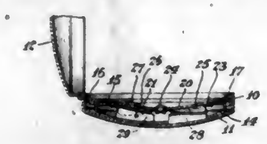
1,667,483. LIQUID DISPENSER. CHARLES LEOF, Detroit, Mich. Filed Jan. 24, 1927. Serial No. 163,157. 7 Claims. (Cl. 225—21.)

5. A liquid dispenser of the class described comprising: a plurality of containers; a plurality of receptacles, each in communication with one of said containers; control means for opening and closing said communication; a conduit; means communicating each of said receptacles with said conduit; control means mounted in said com-



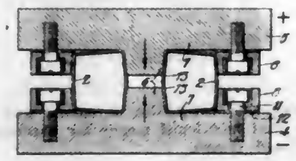
municating means for opening and closing communication of said receptacles with said conduit; a delivery pipe communicating with said conduit; a valve for controlling the flow of liquid to said delivery pipe; a valve in said delivery pipe for controlling flow of liquid therefrom; means for opening said control means controlling the flow of liquid from said receptacles to said conduit; means for selecting the control means to be opened; means for closing communication between said receptacles and said containers upon the opening of said control means; and means simultaneously operable with the closing of said control means for opening the control means controlling communication of said delivery pipe with said conduit; and separate means for, simultaneously with said action, closing the control means controlling the flow of liquid from said delivery pipe; a cup receptacle; and means for feeding said cups therefrom individually upon the opening of said control means; a straw magazine; and means for feeding straws therefrom individually upon the opening of said control means.

1,667,484. TRANSLUCENT WALL, CEILING, AND FLOOR STRUCTURE. PAUL LESSE, Berlin-Tempelhof, Germany. Filed Apr. 1, 1927, Serial No. 180,126, and in Germany Feb. 17, 1925. 4 Claims. (Cl. 72—30.)



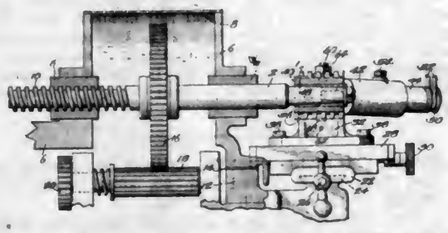
1. As an article of manufacture, a translucent hollow block divided longitudinally into two sections, the adjacent or meeting faces of said sections having portions disposed transversely of the length of the block, and a binding medium at opposite ends of the block for uniting the sections thereof.

1,667,485. CONNECTER. ROB ROY MACDONALD, New York, N. Y., assignor of one-half to Leo O. Smith, Brooklyn, N. Y. Filed Aug. 25, 1927. Serial No. 215,305. 9 Claims. (Cl. 173—308.)



1. In an electric cable connecter, a socket member adapted at one end for connection to a cable and having a plurality of spaced tongues at the other end thereof, a stud member adapted at one end for connection with a cable and having a stem at the other end thereof, and means associated with the tongues for forcing the same into contact with the said stem when the stem is in position between the said tongues.

1,667,486. VANITY CASE. SIMON MORRISON, New York, N. Y. Filed May 20, 1926, Serial No. 110,355. Renewed Mar. 8, 1928. 9 Claims. (Cl. 132—82.)

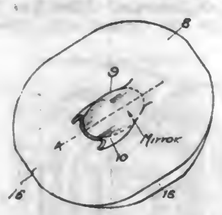


1. In a vanity case, a powder receptacle having a pivoted closure, an opening in the closure, and cooperating means carried by the receptacle and the closure for forcing powder from the opening.

1,667,487. BUTT WELDING. THOMAS E. MURRAY, Jr., Brooklyn, N. Y. Filed July 21, 1926. Serial No. 123,845. 5 Claims. (Cl. 219—4.)

1. An apparatus for the electric resistance butt welding of hollow products from a single piece, including in combination an electrode engaging the work near the joint continuously along the length of the work and a part exerting lateral pressure on the opposite portion of the work and engaging the work only at intervals along its length.

1,667,488. HOB GRINDER. CARL G. OLSON, Chicago, Ill., assignor to Illinois Tool Works, Chicago, Ill., a Corporation of Illinois. Filed Feb. 5, 1926. Serial No. 86,206. 17 Claims. (Cl. 51—52.)



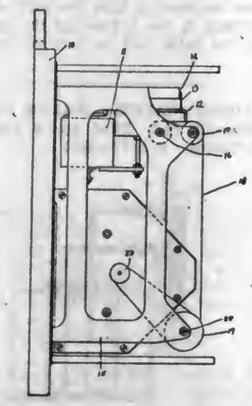
1. A hob grinding machine having a hob spindle, a grinder spindle, a base frame, means for causing relative movement between the base frame and the hob spindle in a direction parallel to the hob spindle, a grinder spindle frame for holding the grinder spindle at an oblique angle to the hob axis, and removable means insertible between the base frame and the grinder spindle frame for holding the latter at an angle with the hob spindle corresponding with the helix angle of the hob.

1,667,489. ANTIGLARE LENS FOR AUTOMOBILE HEADLIGHTS. ROBERT A. OSBURN, Birmingham, Ala., assignor of one-third to John F. Williams, Birmingham, Ala. Filed June 19, 1925. Serial No. 38,871. 2 Claims. (Cl. 240—48.4.)

1. An anti-glare lens for headlights having substantially at and confined to the center zone of its inner surface a

glass bracket shaped to present an upwardly inclined mirror shelf and a mirror surface on said shelf adapted to

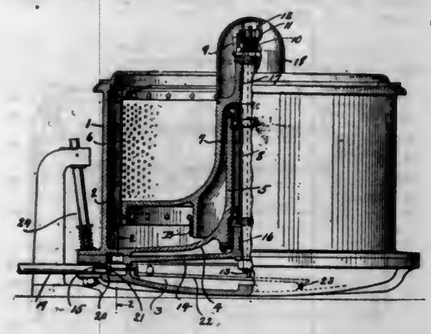
reflect the rays of the light striking it upwardly against the headlight reflector, the lens being unobstructed except for said mirror and the bracket support therefor.



1,667,490. PROCESS FOR MAKING CALCIUM ARSENATE. WILLIAM C. PIVER, Hillside, N. J. Filed Jan. 18, 1924. Serial No. 687,134. 6 Claims. (Cl. 23—53.)

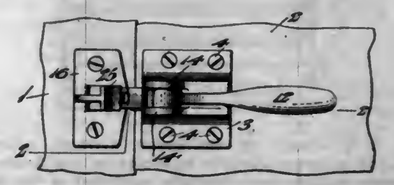
1. A process for making calcium arsenate, which consists in first hydrating calcium oxide only to a sufficient degree to hydrate the same and to produce a dry product, agitating the hydrated calcium oxide and applying arsenic acid of a predetermined specific gravity thereto while being agitated, the acid being applied only in sufficient quantity and at a rate to cause the heat of the resultant reaction to drive off any excess water present, including the water of hydration, to produce the calcium arsenate in a dry powder form.

1,667,491. METHOD OF MAKING COMMERCIAL CALCIUM ARSENATE. WILLIAM C. PIVER, Hillside, N. J. Filed July 5, 1924. Serial No. 724,512. 7 Claims. (Cl. 23—53.)



1. The method of manufacturing commercial calcium arsenate in a dry powdered form, comprising first treating commercial calcium oxide with less water than is required for its complete hydration while agitating the material, and then the addition of arsenic acid thereto, the calcium oxide being always sufficiently in excess to remove all of the free water and to produce calcium arsenate in a dry powdered form.

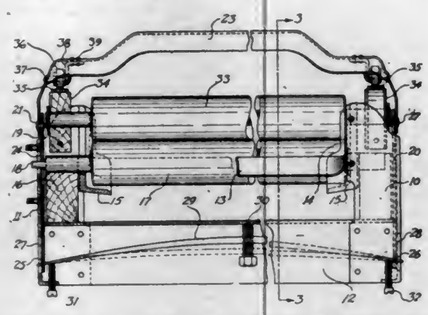
1,667,492. GRAPHIC-METER CHART AND DRIVE. EMMET G. RALSTON, Indianapolis, Ind. Filed May 21, 1926. Serial No. 110,683. 1 Claim. (Cl. 234—1.)



A combination for obtaining a permanent substantially instantaneous and continuous and accurate record comprising a supply roll, a rewind roll, means for continuously and uniformly rotating said rewind roll, a chart strip mounted upon the supply roll and wound upon the rewind roll with an intermediate plane portion, a recording device including a pivoted pen arcuately movable across the chart in a plane parallel to the same and having a portion engaging said chart at the intermediate plane portion thereof for recording variations to which the device is sensitive, said chart strip having a plurality of parallel arcuate time space divisions formed by linear demarkations thereon, said divisions being progressively and uniformly varied as to spacing to compensate for the uniform change in external diameter of the rewind roll and the chart as wound thereon, said time division demarkations having the same radius as the pen travel radius, whereby pen movement is parallel to the time division linear demarkations, whereby the record is substantially instantaneously, continuously and accurately recorded on said chart strip.

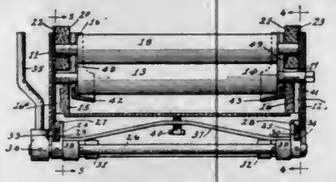
1,667,493. CENTRIFUGAL. CARL SCHAUM, Philadelphia, Pa., assignor to Fletcher Works, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 15, 1927. Serial No. 161,391. 2 Claims. (Cl. 210—71.)

1. A centrifugal comprising a stationary tub providing upper and lower non-communicating chambers or compartments, a shaft lying wholly within the confines of said tub, a portion of the shaft lying within the upper and the remainder within the lower of said chambers, a rotatable basket in the upper of said chambers and attached to said shaft, turbine blades in the lower compartment or chamber of the tub carried by said shaft to drive the shaft and thereby to rotate said basket, a stem valve in the lower chamber for controlling the admission of steam to said blades, and a governor in the upper chamber controlling said valve.



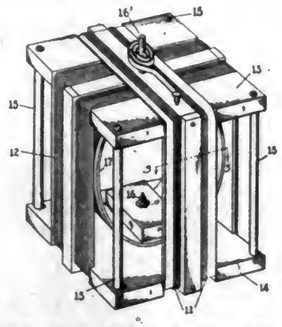
1,667,494. LATCHING DEVICE FOR REFRIGERATOR DOORS. THOMAS O. SCHRADER, Allentown, Pa., assignor to Dent Hardware Co., Fullerton, Pa., a Corporation of Pennsylvania. Filed July 14, 1925. Serial No. 43,475. 1 Claim. (Cl. 292—165.)

In a latching device the combination of a housing and a door arranged in parallelism therewith, a casing having an open back secured directly to said door, said casing



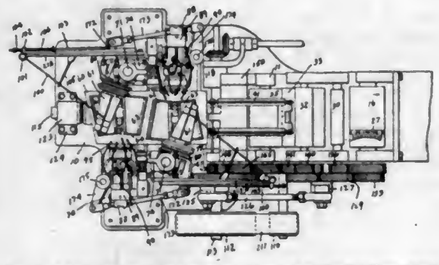
having at one end a squared opening and having mounted for longitudinal movement therethrough, a spring pressed latch-bar, the longitudinal axis thereof being arranged at an inclination with respect to the outer surface of the door, which latch-bar is of rectangular cross-section at its forward end having an opening 6, a bifurcated part 7, the opposite end of said latch-bar being of circular cross-section, that end of said latch-bar adjacent said bifurcated part being notched at 11 for engaging with the squared opening in said casing in retracted position of said latch-bar, a roller mounted in said bifurcated part, a keeper secured to said housing with which keeper the end of said latch-bar carrying said roller is adapted to cooperate, a pair of lugs secured to the outer face of said casing, a longitudinally arranged handle pivoted between said lugs for causing tilting of said latch-bar, said handle having a laterally extended cam portion for engaging within said opening 6 of said latch-bar, and a right angle part arranged between said roller and opening 6 and movable through the part 5 and with which said cam portion contacts in locked position of said latch-bar.

1,667,495. SAFETY WRINGER MECHANISM. SIMON E. SCHROEDER, Newton, Iowa. Filed Jan. 14, 1924. Serial No. 686,120. Renewed Sept. 26, 1927. 5 Claims. (Cl. 68—32.)



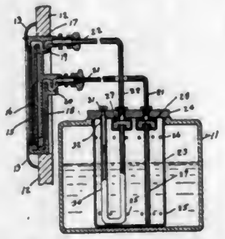
1. In a device of the class described, a main frame having a power roll mounted therein, an auxiliary frame slidably mounted on said main frame, a transversely extending flat spring mounted on said main frame and having its ends connected with the auxiliary frame, an upper wringer roll having bearings mounted in said main frame and a quick release arm pivotally connected with the auxiliary frame on an axis parallel with the axes of the rolls having means engaging the bearings of the upper roll and maintain said roll in pressure relation to the lower roll, said arm being swingable on its axis to engage and disengage said means and bearings.

1,667,496. WRINGER. SIMON E. SCHROEDER, Newton, Iowa. Filed Nov. 28, 1924. Serial No. 752,603. Renewed Sept. 26, 1927. 10 Claims. (Cl. 68—32.)



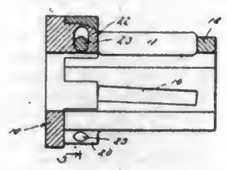
1. In a wringer, in combination, a frame, a wringer roll and a spring member supported in the frame, bar members slidably and removably supported in the frame, a second wringer roll, a connection between the second wringer roll and the bar members and means for releasably locking the bar members to the spring member for applying pressure to the wringer rolls.

1,667,497. PHASE SHIFTER. LAZARUS SHAPIRO, New York, N. Y., assignor to Radio Corporation of America, a Corporation of Delaware. Filed Aug. 27, 1923. Serial No. 659,424. 20 Claims. (Cl. 171—119.)



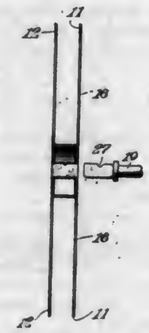
1. A phase shifter having a rotor and a stator, one of which comprises a branched circuit, said branches having unequal resistance and comprising impedances adapted to pass the greater part of the current through the branch having the lesser resistance.

1,667,498. MACHINE FOR MANUFACTURING PAPER CUPS. PAUL R. SIMMONS, Indianapolis, Ind., assignor to Paramount Paper Products Company, Indianapolis, Ind., a Corporation. Filed Dec. 12, 1924. Serial No. 755,409. 33 Claims. (Cl. 93—36.)



2. A machine for forming paper cups including means for applying glue to the bottom edge and one of the side edges of the paper blank, means for bending the blank cylindrically and causing the lateral edges to overlap and adhere together to form the body of the cup, and means for folding in the bottom of the cup under pressure so that the folds will be secured permanently together.

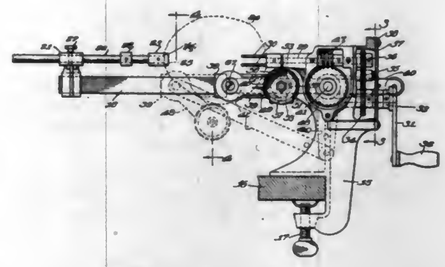
1,667,499. LIQUID GAUGE. WILLIAM CARLETON STARKEY, Indianapolis, Ind. Filed Apr. 6, 1925. Serial No. 21,112. 3 Claims. (Cl. 73—54.)



1. The combination with a liquid tank, of a remote liquid indicator comprising a U-tube remotely positioned from said tank and containing an indicating fluid therein, a pressure tube connected with one end of said U-tube and extending into said tank, and means associated wtih said pressure tube for preventing moisture from accumulating therein.

1,667,500. TUBING ROLLER. WILLIAM VAN ES and WILLIAM J. GEIST, Long Beach, Calif. Filed May 31, 1927. Serial No. 195,365. 6 Claims. (Cl. 153—82.)

3. A tubing roller including an annular body, a plurality of lugs on one side of the body, a plurality of carriers having recesses in their inner ends to receive the lugs, means connecting the carriers and lugs, the carriers having sockets extending into them from the recesses, and rollers carried in the sockets.



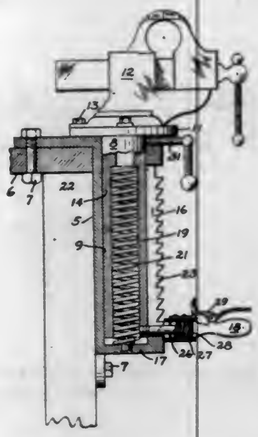
1,667,501. FILM REEL. STERLING W. WARNER, Boundbrook, N. J., assignor to Pathe Exchange, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 26, 1927. Serial No. 186,635. 2 Claims. (Cl. 242—70.)

1. A reel comprising two spaced side discs, a core member between said discs, said core member being composed of a plurality of sides of sheet metal to adapt it for disposition on a multi-sided spindle, and a projection on the interior of the core member adapted to snap into a depression on the spindle when the reel is placed on the spindle.

1,667,502. PARING MACHINE. GEORGE WEISS, Chicago, Ill. Filed Dec. 13, 1924. Serial No. 755,685. 17 Claims. (Cl. 146—43.)

1. A paring machine including means for holding the article, a bodily and freely reciprocable cutter, means common to the said holding means and the said cutter for rotating the article and for reciprocating the cutter while the direction of operation of the said reciprocating means

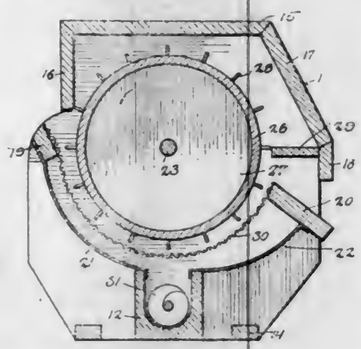
remains constant, and means for varying the extent of reciprocating movement of the cutter by the second said means.



1,667,503. MAIL BOX. WILLIAM F. WEMHOENER, St. Louis, Mo. Filed Apr. 24, 1926. Serial No. 104,350. 8 Claims. (Cl. 232—19.)

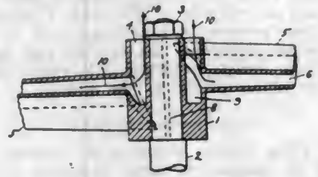
1. In combination with a mail box adapted to be built into a wall, a face plate for the exterior wall, a face plate for the interior wall, and means mounted on said box for drawing said face plates towards each other and gripping said walls between them.

1,667,504. ADJUSTABLE MOUNTING FOR BENCH TOOL AND THE LIKE. ABRAHAM N. ZELBEROLWT, Oakland, Calif. Filed May 14, 1924. Serial No. 713,346. 2 Claims. (Cl. 81—41.)



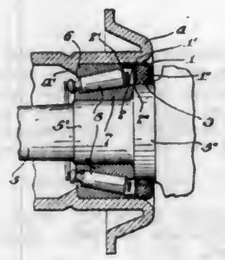
1. An adjustable bench tool mounting comprising a vertically disposed fixed guideway, a unitary tool supporting member slidably engaging in said guideway for movement of the parts thereof in fixed paths, a spring supporting said member for movement between predetermined positions, and means arranged for supporting said member

independently of said spring in said predetermined positions, said means comprising a rack fixed with respect to



said guide, a pawl fixed to said supporting member for vertical movement therewith arranged to engage said rack, and a handle for moving said member in said guide.

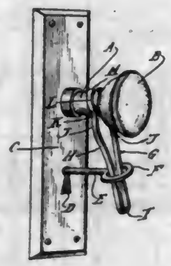
1,667,505. COTTON-CLEANING MACHINE. STEPHEN HARVEY ASSITER, Floydada, Tex. Filed Dec. 22, 1926. Serial No. 156,490. 1 Claim. (Cl. 19—85.)



In a cotton cleaning machine, an elongated hollow body comprising a top wall, a relatively shallow front wall depending from the forward side of the top wall, and a downwardly and rearwardly inclined rear wall extending from the rear side of the front wall, a relatively shallow vertical wall section extending longitudinally at the lower edge of the said inclined rear wall, an upwardly and forwardly inclined beam, the body of the cleaner further including end walls, the said beam extending between the end walls in spaced relation to and in a plane below the lower edge of the front wall, a rearwardly and downwardly inclined member extending between the end walls and in a plane below and spaced with respect to the lower edge of the vertical rear wall section, a drum rotatably mounted in the body and having its circumference located relatively close to the lower edge of the front wall and the lower edge of the said beam, the said surface of the drum being located relatively close to the upper forward edge of the member which extends below and in spaced relation to the lower edge of the vertical rear wall section, a baffle extending longitudinally between the end walls of the body and forwardly within the body from substantially the upper edge of the said vertical rear wall section with its forward edge located relatively close to the circumference of the said drum, teeth upon the surface of the drum, a foraminous screen secured at its forward and rear edges respectively to the forward beam which is located below and in spaced relation to the front wall of the body and to the forward and upper edge of the member which is located below and in spaced relation to the vertical rear wall section, the said screen being curved concentric to the said drum, a trough extending longitudinally beneath the drum substantially in the vertical plane of the axis of rotation of the drum, imperforate bottom members extending on curved lines between the said beam at the front of the body and the forward upper side of the trough and between the upper rear side of the trough and the said member which extends below and in spaced relation to the vertical rear wall section, a screw conveyor operating in said trough, and means for imparting rotary motion simultaneously to the said drum and to the said conveyor.

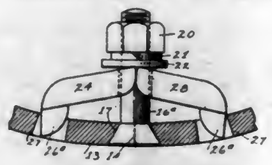
1,667,506. PROPELLER. JOHN S. BANKRAT, Hempstead, N. Y. Filed Feb. 10, 1927. Serial No. 167,233. 1 Claim. (Cl. 170—172.)

In a propeller, the combination with a cylindrical hub, of means to mount said hub on a shaft, an outer cylinder concentric with said hub and attached to said hub in the rear, forming a circular clearance in front of said hub, blades attached to said outer cylinder and provided with hollow passages inside in a communication with said circular clearance, a partition in said clearance between said hub and said outer cylinder separating said clearance for said blades, and spiral guiding surfaces in said partitions extending from the front end of said hub to the inside of said hollow blades and forming smooth passages for air from the front of said hub to the inside of said blades, said blades being provided with a plurality of small apertures in a communication with the inside of said blades and extending through the full length of said blades on one side.



1,667,507. CLOSURE FOR BEARINGS. TRACY V. BUCKWALTER, Canton, Ohio, assignor to The Timken Roller Bearing Company, Canton, Ohio, a Corporation of Ohio. Filed Mar. 10, 1922. Serial No. 542,616. 4 Claims. (Cl. 308—187.)

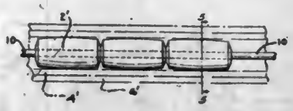
1. A device of the character described comprising a plurality of annular members of L-shaped cross section;



a metal shell containing a circular channel and having a circular laminated flange extending laterally therefrom, the inner lamina of said shell being of less diameter throughout its width than the outer lamina of said shell, in combination with a ring of pliable fibrous material disposed in said channel and projecting beyond the same.

1,667,508. KEY FASTENER. SAMUEL F. BUNKER, Chicago, Ill. Filed Mar. 7, 1927. Serial No. 173,410. 2 Claims. (Cl. 70—65.)

1. A key fastener in the form of an open ended loop of spring material configured to afford a tapered closed tip end merging into side sections bowed outwardly in opposition to one another and inwardly to afford reduced neck portions, the side sections beyond the neck portions being backwardly flared away from one another to the degree required to embrace the shank of a door knob, substantially as described.

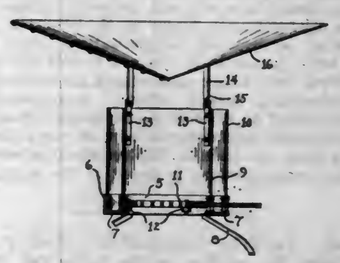


1,667,509. METAL-WHEEL-TIRE EXPANDER. CARL B. CHANDLER, Havana, Ill. Filed Mar. 29, 1923. Serial No. 628,526. 3 Claims. (Cl. 301—16.)

1. A device for expanding the steel felloe of a wheel into a demountable tire rim comprising a split steel felloe having the sections of its opposed end portions adapted to receive the head of a bolt, lever members, the ends of said levers being in abutting relation and curved to provide a rocking engagement with each other, the opposite ends of said lever members having means for engagement with the felloe, and a nut on the bolt to effect the proper spacing of the last mentioned means by engaging the adjacent ends of the levers.

1,667,510. ELECTRIC CONDUCTOR. JAMES ROBERT COE, Watertown, Conn., assignor to The American Brass Company, Waterbury, Conn., a Corporation of Connecticut. Filed July 30, 1924. Serial No. 728,998. 6 Claims. (Cl. 173—13.)

6. A cable constituting an electrical conductor for high tension transmission lines having, in combination, a core comprising a plurality of members having axial apertures, and a flexible member upon which said mem-

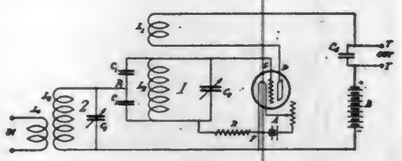


bers are strung, and contacting wires of high electrical conductivity arranged spirally side by side and surrounding said members.

1,667,511. LOOSE-LEAF BINDER. HOLLAND D. COTTRELL, Detroit, Mich. Filed Jan. 15, 1925. Serial No. 2,469. 7 Claims. (Cl. 129—41.)

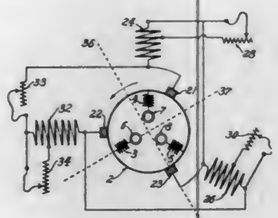
5. In a loose leaf binder, a pair of cover members formed to provide a channel pocket at the center, one of the cover members being provided with an inturned flap, an inner pair of cover members having a channel pocket seating in the channel pocket of the outer cover member, and straps permanently attached to the flap of the outer cover member and extending across the channel pocket of the inner cover member and permanently attached at the opposite ends to the other outer cover member, the straps intermediate the ends being free from connection with the outer cover member.

1,667,512. DEVICE FOR CURING TOBACCO AND THE LIKE. GEORGE O. CRUIKSHANK, Leipsic, Ohio. Filed May 13, 1927. Serial No. 191,010. 10 Claims. (Cl. 126—58.)



1. The combination with a fire pot having an opening at its upper end and provided with a grate at its lower end, of a deflector supported above and in spaced relation to the upper end of the fire pot, and a drum encircling the fire pot in spaced relation thereto and open at its upper and lower ends, to promote a vertical current of air adjacent the fire pot, which mingles with the hotter gases emitted from the fire pot, to constitute a substantially homogeneous mixture of nearly uniform temperature.

1,667,513. RADIO RECEIVING APPARATUS. CLYDE J. FITCH, Brooklyn, N. Y., assignor, by direct and mesne assignments, to Radio Corporation of America, New York, N. Y., a Corporation of Delaware. Filed May 31, 1924. Serial No. 717,116. 5 Claims. (Cl. 250—20.)

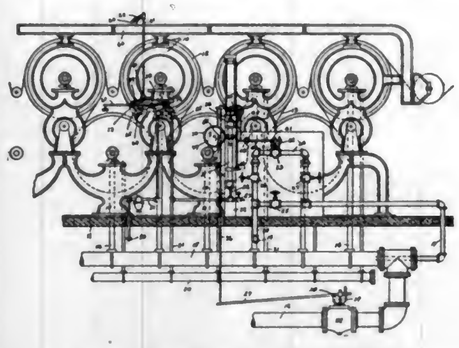


1. The combination of a valve, of a pair of condensers in series, means for impressing a signal wave on the in-

ner sections thereof, a circuit connecting the outer section of one condenser with the grid and a circuit con-

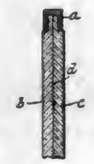
necting the outer section of the other condenser to the filament, said latter circuit including an impedance equal to the input impedance of the tube.

1,667,514. SYNCHRONOUS MOTOR. VALÈRE A. FYNN, St. Louis, Mo. Original application filed Nov. 26, 1923, Serial No. 677,157. Divided and this application filed Aug. 2, 1926. Serial No. 126,686. 6 Claims. (Cl. 172—280.)



1. A synchronous motor which carries variable load at synchronous speed, having a primary and a secondary member, said primary member being adapted to produce a primary flux which revolves with respect to the primary, a commutator on said primary, brushes located along n displaced axes, means on the secondary adapted to produce n displaced magnetizations, each of said means being connected to brushes located along one of the n brush axes to set up conduced ampereturns in the said magnetizing means, different magnetizing means being connected to brushes located along different axes, and the angular displacements between the n brush axes differing from the angular displacements between the n secondary magnetizations produced by the conduced currents.

1,667,515. PLATING APPARATUS. FRED P. GREEN, St. Louis, Mo., assignor to The Lustre Co., St. Louis, Mo., a Corporation of Missouri. Filed Mar. 28, 1927. Serial No. 178,927. 4 Claims. (Cl. 204—11.)

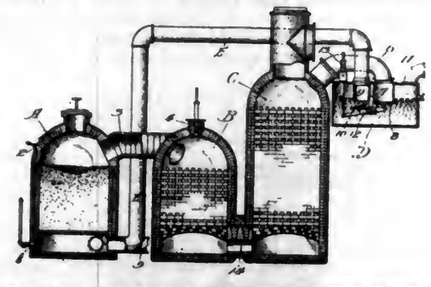


1. In a plating apparatus, a tank for electrolytic solution, means for supporting anodes in the solution in the tank, a rock shaft, a pair of arms attached to said rock shaft above the level of the solution in the tank, rods supported by said arms at opposite sides of said shaft for supporting the work, and means for rocking said shaft and said arms to raise and lower the work in the solution substantially the same distance from the anodes.

1,667,516. RECORDING DEVICE FOR PAPER MACHINES. CHARLES J. GUENTHER, Boston, Mass., assignor to Stickle Steam Specialties Company, Indianapolis, Ind., a Corporation. Filed Nov. 2, 1925. Serial No. 66,300. 3 Claims. (Cl. 234—1.)

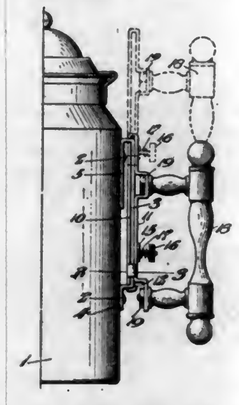
1. In a paper making machine having means controlled by the tautness of the sheet of paper for controlling the heat in drying the same as it passes through the machine, and a recording device, a connection between said heat controlling means and recording device for operating the recording device whereby it will record and indicate the tautness of the sheet of paper during its manufacture.

1,667,517. METAL-FRAMED HALF-TONE SCREEN AND METHOD OF FORMING THE METAL FRAME THEREON. FRITZ HERMANN HAUSLEITER, Munich, Germany. Filed Apr. 8, 1926, Serial No. 100,716, and in Germany Dec. 5, 1925. 4 Claims. (Cl. 95—81.)



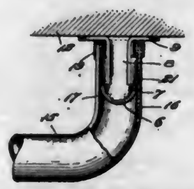
1. In the herein described method of manufacturing half tone screens in which ruled plates are secured in superimposed relation, the step of forming a metal frame directly on the edge of the screen.

1,667,518. PROCESS OF MAKING CARBURETED WATER GAS. FRED B. HAYES, Fort Wayne, Ind., assignor to Western Gas Construction Company, Fort Wayne, Ind., a Corporation of Indiana. Filed Sept. 25, 1924. Serial No. 739,757. 3 Claims. (Cl. 48—208.)



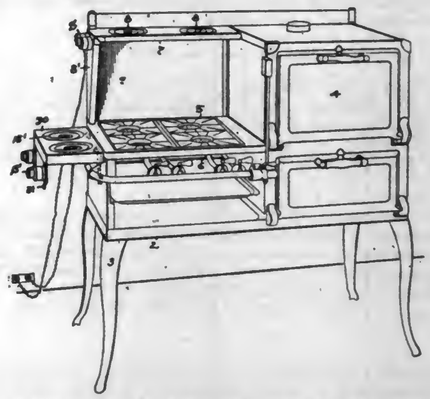
1. The improvement in the process of making carbureted water gas by the alternate up and down steam run method, which consists in passing the up run water gas through a carbureter and simultaneously enriching the same with oil flowed into said carbureter, in by-passing

the down run blue water gas with respect to the carbureter, in making oil gas in the carbureter during the



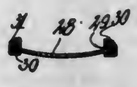
steam down run period, and ultimately commingling the by-pass blue water gas, the carbureted water gas and the oil gas in a holder.

1,667,519. HANDLE FOR COFFEEPOTS OR THE LIKE. FREDERICK W. HECHLER, Darby, Pa. Filed Oct. 15, 1927. Serial No. 226,304. 4 Claims. (Cl. 53—3.)



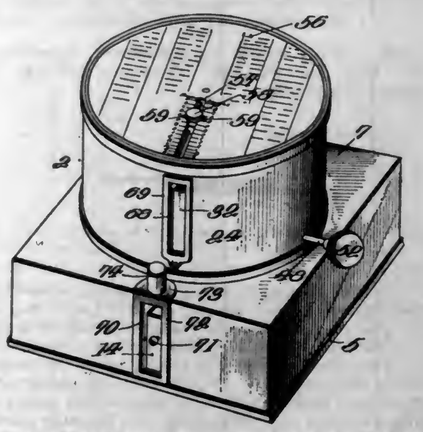
1. A cooking utensil having a vertical guide plate fixed thereto, a handle carrying member having a downturned, hook-like end slidable vertically of said plate, means operative to lock said member with respect to said plate, and a handle detachably fixed at each end to said member which member has detachable relation with respect to said utensil.

1,667,520. CURTAIN SUPPORT. JAMES N. HENRY, Providence, R. I. Filed Nov. 8, 1927. Serial No. 231,810. 1 Claim. (Cl. 156—22.)



The combination of a hollow yieldable rod provided with an internal projection adjacent its end, attaching lugs, legs upon the lugs within the rod, and a plate upon the end of the legs adapted to contact with the projection to expand the rod during its passage into the rod.

1,667,521. COMBINED GAS AND ELECTRIC COOK-STOVE OR RANGE. FRED C. ALBER, Cleveland, Ohio. Filed Nov. 26, 1924. Serial No. 752,430. 4 Claims. (Cl. 219—35.)

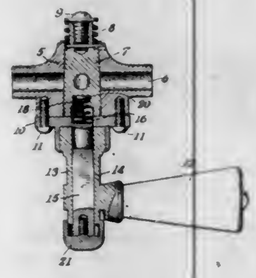


1. A cook shelf for a stove or range having a cooking top, containing a gas burner, said shelf being mounted upon a rear wall of said range and having electric heaters therein, and an electric switch for said heaters mounted at one end of said shelf and offside of said cooking top.

1,667,522. COMBINATION SANITARY BELT AND NAPKIN HOLDER. LUIS AMEZAGA, Forest Hills, N. Y. Filed Mar. 22, 1927. Serial No. 177,437. 1 Claim. (Cl. 128—289.)

A device of the class described, comprising a napkin holder sheet, means for securing a napkin thereto, the sides of the napkin holder sheet being bent upon themselves, and end strips of resilient material with wedge shaped slots forced on the bent sides, so as to stay thereon.

1,667,523. DISPENSING CABINET. FRANK H. BACHELDER, Orange, Mass. Filed May 2, 1924. Serial No 710,586. 8 Claims. (Cl. 312—95.)



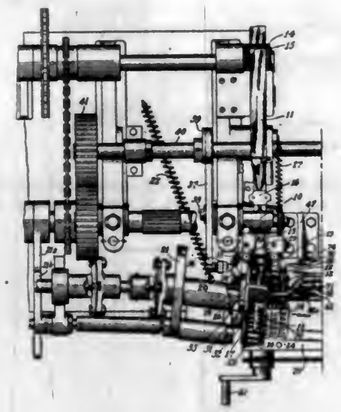
1. A dispensing cabinet comprising a housing, a rotatable member in the housing, supports connected to the

said rotatable member, the said supports having open tops and outer ends, a vertically arranged pocket with an open inner side, said pocket telescoping the said support, the housing having a vertical opening through which the said pocket may be moved outward through said openings to permit access to its contents.

1,667,524. PROCESS FOR DYEING ARTIFICIAL SILK. JAMES BADDILEY, PERCY CHORLEY, and CARLTON BUTLER, Manchester, England, assignors to British Dyestuffs Corporation Limited, Manchester, England, a Company of Great Britain and Ireland. Filed Apr. 2, 1927, Serial No. 180,610, and in Great Britain June 4, 1926. 4 Claims. (Cl. 8—5.)

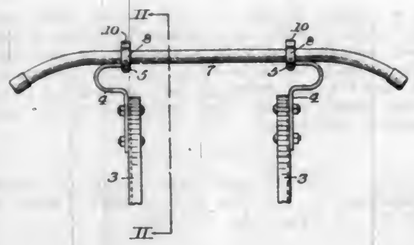
1. The process of dyeing which comprises dyeing regenerated cellulose silks with the secondary diazo dyestuffs which can be made by combining amino-o-hydroxycarboxy acids of the benzene series with the usual middle components, further diazotizing and combining with a sulphonated 1:8-di-substituted naphthalene derivative.

1,667,525. SAFETY VALVE. GABRIEL BASHCONGI, Brooklyn, N. Y. Filed Nov. 3, 1927. Serial No. 230,810. 4 Claims. (Cl. 251—99.)



1. A valve comprising a body and cap member, a plug revolvable in the body member, a handle revolvably supported in the cap member and a plunger mounted in the handle and provided with means for interlocking with the cap member or the plug member at will.

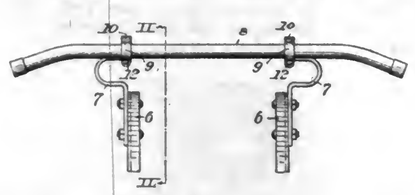
1,667,526. VEST. FRANK A. BIEBERSTEIN, Milwaukee, Wis. Filed Apr. 25, 1927. Serial No. 186,376. 4 Claims. (Cl. 2—102.)



1. In a vest, the combination of front and back portions secured together at their meeting edges to form a flap of several plies extending between the armhole and the lower edge of the vest, one of said plies extending beyond the edges of the remaining plies to form a lip folded to embrace the remaining plies, a line of stitching joining said front and back portions to form an alterable side seam and defining the inner edge of said flap, and stitching extending across said flap at its ends to retain said flap against said back portion.

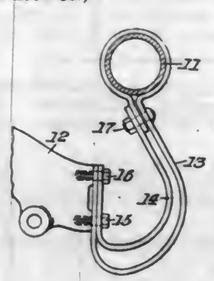
1,667,527. METHOD AND APPARATUS FOR MANIPULATING FASTENERS AND TABS THEREFOR. VIRGIL H. BODLE, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Oct. 7, 1926. Serial No. 140,043. 17 Claims. (Cl. 12—1.)

1. Apparatus of the character described comprising means for associating articles with adhesive tabs and presenting them in succession in a determinate position and conveying means for so moving the successive articles as to cause their tabs to overlap each other in a chain of units.



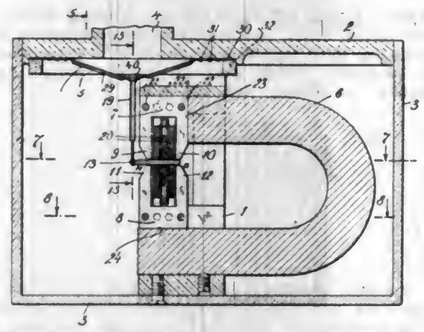
1,667,528. AUTOMOBILE BUMPER. FREDERICK G. BREMER, Pittsburgh, Pa., assignor to United States Chain & Forging Company, Pittsburgh, Pa., a Corporation of Delaware. Filed July 20, 1927. Serial No. 207,178. 11 Claims. (Cl. 293—55.)

1. Bumper structure comprising a bumper bar, two curved buffer springs connected at their outer ends to said bar, and means for pivotally connecting the inner ends of said springs to a vehicle frame, on vertical axes.



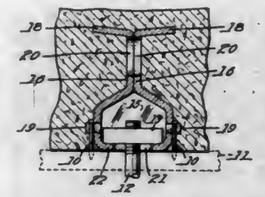
1,667,529. AUTOMOBILE BUMPER. FREDERICK G. BREMER, Pittsburgh, Pa., assignor to United States Chain & Forging Company, Pittsburgh, Pa., a Corporation of Delaware. Filed July 26, 1927. Serial No. 208,498. 8 Claims. (Cl. 293—55.)

1. Bumper structure comprising a bumper bar, a curved buffer spring pivotally connected at its outer end to said bar, a brace connected to said buffer spring at a point adjacent to its inner end, and means for connecting the



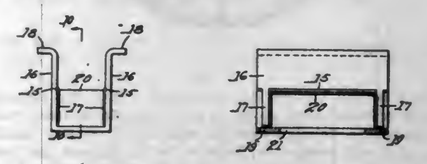
inner ends of said spring and brace to a vehicle frame, on an axis transverse to the axis of the first-named pivotal connection.

1,667,530. BUMPER STRUCTURE. FREDERICK G. BREMER, Pittsburgh, Pa., assignor to United States Chain & Forging Company, Pittsburgh, Pa., a Corporation of Delaware. Filed Dec. 6, 1927. Serial No. 238,060. 11 Claims. (Cl. 293—55.)



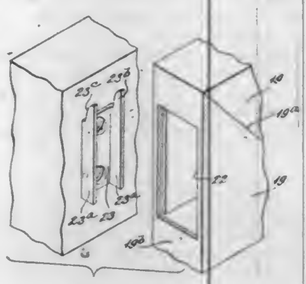
1. A buffer spring comprising a yieldable member having its outer portion bent to substantially annular form, a supplementary yieldable member, and means for holding said portion in clamping engagement with an impact bar, and for connecting the said supplementary member thereto, the inner ends of said members being arranged for attachment to a supporting member.

1,667,531. SOUND-REPRODUCING APPARATUS. BEN E. BROWN, Mountain Lakes, N. J., assignor to B. B. Laboratories, Inc., East Orange, N. J., a Corporation of New Jersey. Filed Oct. 1, 1926. Serial No. 138,882. 8 Claims. (Cl. 179—119.)



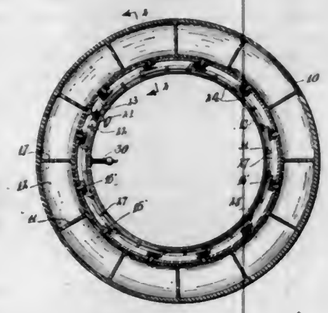
3. Sound reproducing apparatus of the class described which comprises a permanent magnet, pole pieces for said magnet forming between them an air gap, an armature of magnetic material mounted for a limited rotational movement through said air gap in magnetic flux transferring relation with said pole pieces, pole faces provided on said pole pieces at the said air gaps of sufficient flux conducting capacity to carry without saturation the maximum quantity of magnetic flux normally required for a satisfactory energy output, the said pole faces and the said armature being of comparable flux carrying capacity, and a sloped portion on said pole pieces constituting a tapered end for the pole pieces terminating at the said pole face and extending back in one direction from said pole face at a relatively sharp angle to the direction of extent of said pole face to form the full section of the pole piece of at least twice the area of the pole face.

1,667,532. CONCRETE HANGER BLOCK. HJALMAR G. CARLSON, Worcester, Mass., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass., a Corporation of Massachusetts. Filed Oct. 1, 1926. Serial No. 139,000. 1 Claim. (Cl. 72—105.)



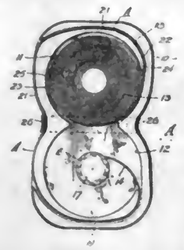
As an article of manufacture, a sheet metal hanger block adapted to be embedded in concrete having a flat bottom having an opening therethrough for a fastening means and provided with a flat surface for a supporting means inside, the bottom having two integral ends each in one piece projecting therefrom in opposite directions and bent upwardly in vertical planes and having vertical edges and tops converging inwardly, the sides of the hanger block being also integral with the bottom and bent upwardly and overlapping the ends throughout their width and contacting with them along the vertical and slanting edges of the center and projecting upwardly therefrom.

1,667,533. CONCRETE HANGER BLOCK. HJALMAR G. CARLSON, Worcester, Mass., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 10, 1927. Serial No. 167,182. 2 Claims. (Cl. 72—105.)



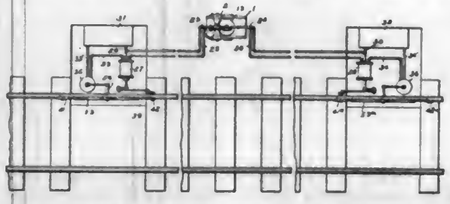
2. As an article of manufacture, a hanger block, adapted to be embedded in concrete, comprising a piece of pressed metal having a flat bottom with an opening therethrough for a fastening device, and a second sheet metal member bent into a U-shape with its end edges resting on said bottom to close the space in the block, the two sides integral with the bottom projecting upwardly and encompassing the second member and provided with integral vertical ribs near the ends to hold the second member in place and projecting upwardly from the top of said second member at opposite inclinations and provided with inclined diverging flanges to anchor the block in the concrete.

1,667,534. PARTITION STRUCTURE. ROBERT F. CARPENTER and THOMAS F. ANDERSON, Cleveland, Ohio, assignors to The Sanymetal Products Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 7, 1924. Serial No. 711,589. 5 Claims. (Cl. 189—34.)



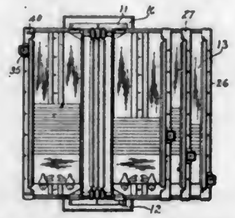
1. In building structures, an adjustable partition structure including an upright channel member having a substantially horizontally extending bottom supporting flange provided with a slot, and a partition engaging within said channel member and seated upon the bottom flange thereof, said partition being provided with a set screw cooperating with said flange slot so as to enable said channel member and said partition to be secured together in any adjusted position.

1,667,535. SECTION TIRE FOR VEHICLES. WILLIAM E. CELESTIN, New York, N. Y. Filed Aug. 24, 1926. Serial No. 131,140. 1 Claim. (Cl. 152—22.)



In a section tire of the class described a tire member proper provided with walls, so as to provide separate compartments, a tubular member adapted to engage inside the said tire member proper, so as to depress the said tire member proper, air valve chambers adapted to contain air valves proper, said air valve chambers attached to the said tubular member and to the said tire member proper, said tire valves proper normally held in a closed position by a spring, a manually operable means of opening the said tire valves proper comprising, a rod rotatively mounted in the said tubular member, a knob attached to the extended extremity of the said rod, a spool attached to the said rod, a flexible member attached to and wound in the said spool, said flexible member attached to an operating rod slidably mounted in the said tubular member, said operating rod attached to the said tire valves proper, so as to allow the said valves to open without the movement of the said operating rod.

1,667,536. MEANS FOR PREVENTING PREMATURE UNCOILING OF FILM BOBBINS. GASTON L. CHANIER, Jersey City, N. J., assignor to Pathe Exchange, Inc., New York, N. Y., a Corporation of New York. Filed Feb. 4, 1927. Serial No. 165,817. 8 Claims. (Cl. 206—52.)

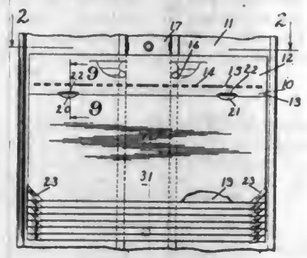


1. The combination with a film holder having an inner space for the reception of a roll of film and a guide passage for the film out of the holder, of means unattached to and surrounding the roll and passing with the film through said passage out of the holder, to prevent premature uncoiling of the bobbin in said space.

1,667,537. AUTOMATIC RAILWAY-CROSSING GATE. THOMAS N. COFFELDER, Pittsburgh, Pa. Filed Nov. 27, 1926. Serial No. 151,119. 10 Claims. (Cl. 246—272.)

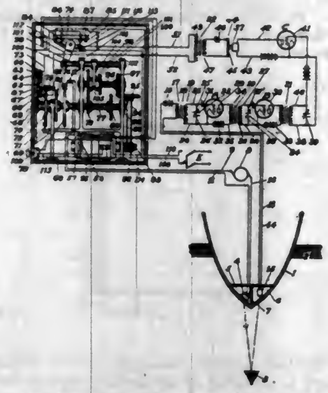
1. An automatic railway-crossing gate comprising a vertically swinging gate arm, operating mechanism for said arm, a fluid pressure cylinder having a piston for actuating said operating mechanism, a fluid pressure pump communicating with said gate operating cylinder, a storage tank for maintaining a supply of the operating medium, a valve communicating with said cylinder, pump, and tank to regulate the flow of the operating medium from the pump to the operating cylinder and from the latter to the tank and track instruments operating said pump and regulating said valve, said track instruments, pump and valves being remote from the gate.

1,667,538. INDEX OR FILE LEAF. WILLIAM H. DAY, East Haven, Conn., assignor, by mesne assignments, to Remington Rand Inc., Tonawanda, N. Y., a Corporation of Delaware. Filed Jan. 11, 1924. Serial No. 685,574. 24 Claims. (Cl. 129—16.)



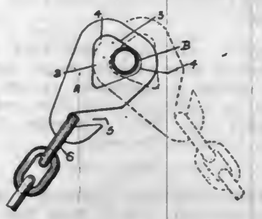
1. In an index or file, a substantially rectangular support for cards or the like, comprising a relatively thin plate, one side edge and both end edges thereof being reenforced by a one-piece structure, and means straddling the other side edge and extending the entire length thereof to reenforce the same.

12. In an index or file, a leaf provided with means to retain reference member thereon, an edge covering for the outer edge of said leaf adapted to overlie the edges of said reference members, means to connect the edge covering to the edge of said leaf whereby spaced raised portions are presented along said edge, and a tab adapted to hold an index slip detachably secured upon the edge of said leaf by engagement with the raised portion of said connecting means.



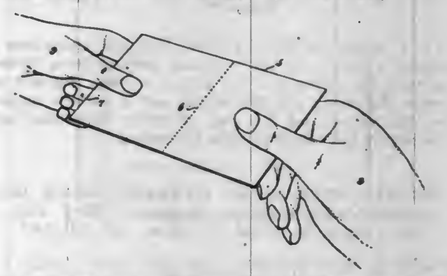
20. In an index or file, a support for cards or the like, an edge-covering straddling an edge of said support, said edge-covering terminating at each end thereof in knobs whereby spacing members are formed to space one support from another.

1,667,539. INDEX OR FILE. WILLIAM H. DAY, East Haven, Conn., assignor, by mesne assignments, to Remington Rand Inc., Tonawanda, N. Y., a Corporation of Delaware. Filed Apr. 21, 1925. Serial No. 24,765. 9 Claims. (Cl. 129—16.7.)



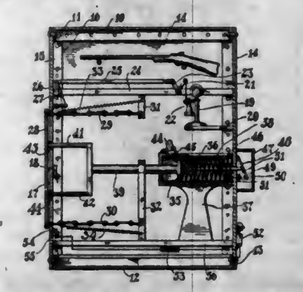
1. In an index or file, a pair of reference members in superimposed relation with the side edges and a marginal edge of one coinciding with the corresponding edges of the other, and means secured to one adapted to detachably retain the other thereon, said means comprising a preformed ribbon-like member.

1,667,540. METHOD AND APPARATUS FOR MEASURING DISTANCE. HERBERT GROVE DORSEY, Gloucester, Mass., assignor to Submarine Signal Corporation, Boston, Mass., a Corporation of Delaware. Filed Dec. 22, 1923. Serial No. 682,243. 33 Claims. (Cl. 177—386.)



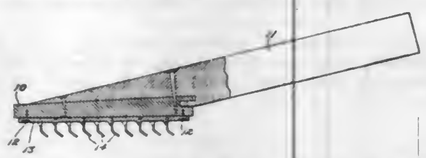
29. In an apparatus for measuring distance and depths, means for receiving a compressional wave signal, a scale and means for indicating the reception of the compressional wave with reference to the scale including a gaseous lamp constantly moving with reference to the scale, a relay having its winding connected to said receiver and a transformer having its primary winding normally closed by the armature of said relay and having its secondary connected to said gaseous lamp to produce upon the operation of said relay by a momentary local illumination of said lamp a momentary illumination of said scale indicating the desired measurement.

1,667,541. COUPLING MEMBER OR LINK. TOD S. EDEBURN, Cleveland, Ohio, assignor to Alfred N. Edeburn, Cleveland, Ohio. Filed Mar. 31, 1927. Serial No. 179,788. 4 Claims. (Cl. 24—230.5.)



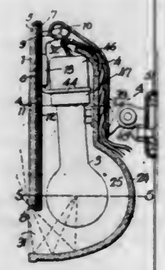
1. A coupling member or link for hammocks, swings and the like, having one end thereof formed with a straight bearing portion extending at right angles to the longitudinal median line of said link and terminating in downwardly-extended rounded portons, which are spaced so as to limit the rocking movements of the link equal distances on opposite sides of the said median line, and the opposite end of said link being constructed to suspend a connecting part therefrom on the same median line.

1,667,542. IDENTIFICATION BLOTTER. JAMES L. FLANAGAN, Sacramento, Calif. Filed June 25, 1925. Serial No. 39,524. 4 Claims. (Cl. 120—24.)



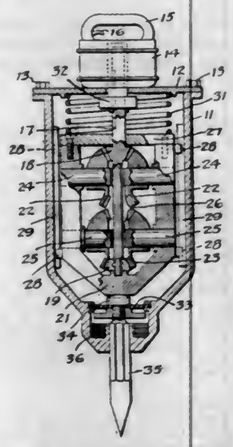
1. As a new article of stationery, a sheet of ink blotting material treated to provide a surface adapted to readily receive finger print impressions when the sheet is handled under normal conditions of use.

1,667,543. SAFETY CLOSET. FRANK FÓNAGY, Flagtown, N. J. Filed Aug. 23, 1927. Serial No. 214,841. 6 Claims. (Cl. 89—36.)



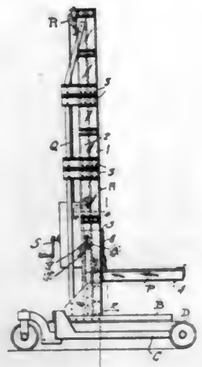
1. A safety closet of the class described comprising a pivotally mounted door, and a bumper thereon adapted to be projected forwardly.

1,667,544. WATERPROOF CATTLE CARD. WHITNEY M. FRYE, Wilton, N. H. Filed Sept. 25, 1924. Serial No. 739,839. 2 Claims. (Cl. 119—98.)



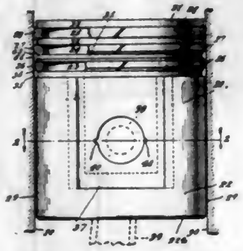
1. A waterproof cattle card comprising a sheet of fibre stock having holes therein, metal teeth in said holes, and a coating of waterproof varnish containing rosin covering the surfaces of said sheet and filling the interstices about said teeth, said rosin impregnating the fibre sheet to harden the same.

1,667,545. ILLUMINATING MIRROR. WILFRED B. GODDARD, Burlingame, Calif. Filed Nov. 15, 1926. Serial No. 148,535. 18 Claims. (Cl. 240—2.)



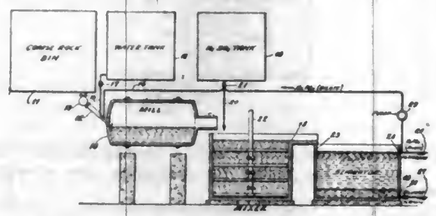
1. A device of the character described comprising a casing, a mirror, a light emission opening being formed between the casing and the mirror, a lamp disposed between the casing and the mirror, and a unitary support for the mirror and the lamp pivotally connecting both the mirror and the lamp with the casing.

1,667,546. MECHANICAL HAMMER. RUDOLF GOLDSCHMIDT, Charlottenburg, Germany. Filed July 9, 1925. Serial No. 42,353. 1 Claim. (Cl. 74—14.)



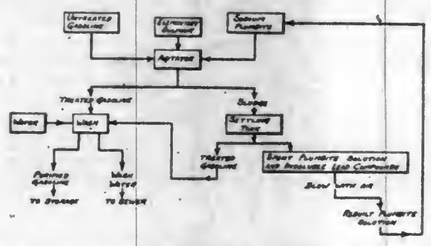
In a mechanical hammer the combination with an enclosing casing and a motor, of a tup within said casing comprising a frame, a pair of shafts extending transversely of said frame, four weights mounted on said shafts so as to cause the reciprocation of said tup due to the centrifugal action of said weights, gears adapted to rotate said weights, pinions meshing with said gears, a vertical shaft on which said pinions are mounted, said vertical shaft extending through said transverse shafts and connected to said motor.

1,667,547. PORTABLE ELEVATOR. HAROLD GREEN, Yonkers, N. Y., assignor to Henry S. Germond, jr., Bayonne, N. J. Filed Mar. 12, 1926. Serial No. 94,179. 7 Claims. (Cl. 187—9.)



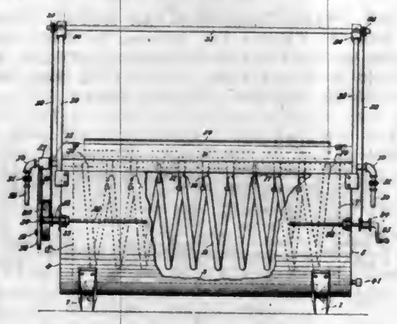
5. The combination of a load carrying member having a supporting portion and a load carrying portion offset from said supporting portion, said member having a pair of rollers at each of opposite sides thereof, the rollers of each pair being spaced longitudinally and offset laterally of said supporting portion, and a pair of spaced and parallel guides one arranged at each side of said member and each including a pair of channel bars each having one flange abutting one flange of the other and each of said channel bars having one of the corresponding pair of rollers arranged therein to roll on the said flange thereof abutting the adjacent channel bar.

1,667,548. PISTON. CHARLES C. HANCH, Indianapolis, Ind. Filed Jan. 5, 1924. Serial No. 684,639. 8 Claims. (Cl. 74—109.)



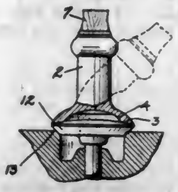
1. An internal-combustion-engine piston having near its head-end a plurality of piston-ring grooves with rigid lands between said grooves and between the piston-end and the adjacent groove, said lands being directly exposed to the outside of the complete piston, and the piston-ring-engaging walls of said grooves being substantially perpendicular to the piston axis, a land nearer the piston-end being of larger diameter than a land farther from the piston-end.

1,667,549. ART OF PHOSPHORIC ACID MANUFACTURE. INGENUIN HECHENBLEIKNER, Charlotte, N. C., assignor to Chemical Construction Company, New York, N. Y., a Corporation of North Carolina. Filed Apr. 1, 1924. Serial No. 703,460. 2 Claims. (Cl. 23—165.)



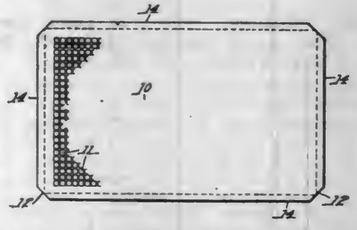
1. The herein described continuous method of producing phosphoric acid from phosphate rock which consists in grinding the rock in phosphoric acid with additions of dilute phosphoric acid sufficient to provide a substantially continuous overflow of acid and the fluent product of the grinding, and reacting the overflow with sulphuric acid.

1,667,550. CONVERSION OF LEAD SLUDGE. JOSEPH BENNETT HILL, Philadelphia, Pa., assignor to The Atlantic Refining Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 16, 1927. Serial No. 206,253. 4 Claims. (Cl. 23—51.)



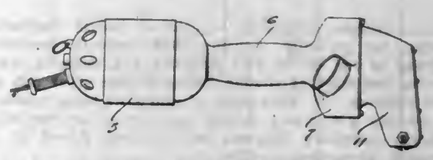
1. A method of recovering lead compounds from lead sludge, which comprises treating the lead sludge with a solution of an alkali metal hydroxide in the presence of an oxygen-containing gas.

1,667,551. ANTIFRICTION AGITATOR. JOHN BENJAMIN HINSHAW, Topeka, Kans. Filed Sept. 24, 1924. Serial No. 739,598. 2 Claims. (Cl. 257—78.)



2. In combination, an open-top vat, a heat exchange agitating coil suspended within and supported by the ends of the vat for oscillation about a horizontal axis and freely removable from the vat upon elevation of the same, oscillating means for the coil including actuating elements freely separable when the coil is elevated, said coil including end pintle members having rigid depending knife edge bearing elements, and said ends of the vat having open-top sockets provided with V-shaped bottom portions in the crotches of which said bearing elements seat.

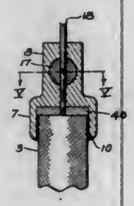
1,667,552. VALVE-GRINDING TOOL. DENNIS T. IGOU, Springfield, Ohio. Filed Dec. 22, 1924. Serial No. 757,354. 4 Claims. (Cl. 57—29.)



1. In a valve grinding tool, a vacuum cup having an outer flat inclined annular seat and an inner flat inclined annular seat, the inner seat being formed at a greater inclination than the outer seat, said inner seat being adapted to engage a valve of the smaller size and said outer seat being adapted to engage a valve of the larger size.

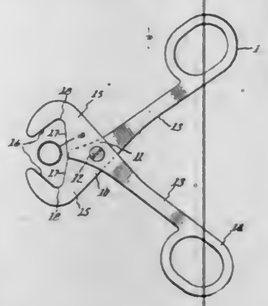
1,667,553. FISH FLAKE. GEORGE M. JOHNSTON, Clinton, Mass., assignor to Wickwire Spencer Steel Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 19, 1926. Serial No. 142,727. 2 Claims. (Cl. 34—17.)

1. A fish flake comprising a single piece of perforated non-corrosive sheet metal having the integral edge portions thereof folded over against the body portion thereof and in close engagement therewith, and corrugated lengthwise to stiffen said flake.



1,667,554. ELECTRIC CLOTHESBRUSH. RICA KRUG, Gardner, Ill. Filed Dec. 30, 1925. Serial No. 78,378. 1 Claim. (Cl. 15—7.)

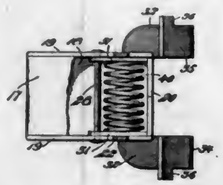
A clothes brush consisting essentially of a motor casing, a motor therein, a fan casing spaced in front of the motor casing, a rotary fan in the fan casing, a brush casing in front of and communicating with the fan casing and extending forwardly and downwardly from the fan casing and gradually increased in width as it recedes from the fan casing and having a lower portion spaced below the plane of the fan casing and an opening in said lower portion, a transverse rotary brush in the brush



casing and protruding through said opening, a tubular portion of reduced cross section at right angles to said brush and joining the motor and fan casings; said tubular portion and the contiguous portions of the motor and fan casings shaped to form a handle, a shaft operable by the motor and extending through said tubular portion and the fan and brush casings and carrying the fan, and a driving connection in the brush casing and between said shaft and brush.

1,667,555. PARKWAY-CABLE TERMINAL. WILLIAM H. B. LAVARACK, Pinebush, N. Y., and DANIEL W. RICHARDS, Roanoke, Va. Filed Sept. 28, 1926. Serial No. 138,162. 3 Claims. (Cl. 173—353.)

2. In a cable connector, in combination: a metallic body formed with a cavity for receiving a cable, an orifice for receiving a conductor of a cable and an orifice for receiving a conductor for electrical connection with the conductor of the cable and an orifice connecting the last two named orifices for receiving a soldering metal.

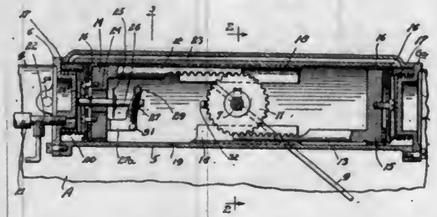


1,667,556. CRIMPER. WILBUR S. LEWIS, Cleveland, Ohio. Filed Aug. 17, 1925, Serial No. 50,818. Renewed Aug. 1, 1927. 5 Claims. (Cl. 132—32.)

1. A crimper comprising a pair of crossed elements, means for pivotally securing said elements together, handles at one end of said elements, and crimping jaws having jaw faces of similar outline at the other end of said elements, the inner edges of said jaws being opposed to provide a crimping surface and having substantially straight angularly disposed end portions joined by a rounded intermediate portion.

1,667,557. COUPLER. HANS LUEY, Providence, R. I. Filed Oct. 28, 1927. Serial No. 229,318. 5 Claims. (Cl. 24—201.)

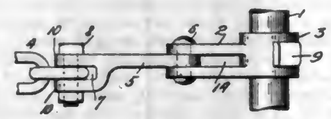
1. In a coupler of the type set forth, a casing provided with a slot in its end and sides, a rod fixed in the sides of the casing, spaced attaching members comprising flat arms provided with perforations to loosely receive the rod, broad laterally extended forwardly projecting hooks



integral with the arms extending through the slots, and a spring in the casing for distending the attaching members.

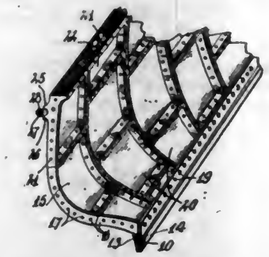
1,667,558. CROSS-ARM CLAMP. ADOLPH W. MALONE, Fillmore, Utah, assignor of one-third to Albert H. Vestal, Anderson, Ind., and one-third to Alvin M. Lockwood, San Antonio, Tex. Filed Feb. 14, 1928. Serial No. 254,308. 7 Claims. (Cl. 189—33.)

1. The combination with an upright pole and a transverse cross arm, of means for attaching the cross arm upon the pole comprising a pair of opposed clamping members, and means for drawing the clamping members toward each other about a pole independently of the engagement with the cross arm, one of said clamping members having its ends extended and formed to embrace the cross arm, substantially as set forth.



1,667,559. WINDSHIELD-CLEANER MOTOR. ALBERT G. MCCALEB, Chicago, Ill., assignor, by mesne assignments, to Trico Products Corporation, Buffalo, N. Y., a Corporation of New York. Filed July 11, 1924. Serial No. 725,345. 9 Claims. (Cl. 121—164.)

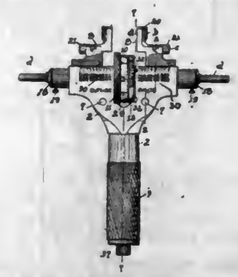
1. An automatic windshield cleaner motor comprising a cylinder element; a piston element therein; one of the aforesaid elements being movable relative to the other;



a suction passage for establishing continuous and uninterrupted communication between the interior of the cylinder at one side of the piston and a source of suction, when the motor is operating, for effecting movement of the movable one of said first two named elements in one direction, the interior of the cylinder at the opposite side of the piston being opened to the atmosphere; means for moving said movable element in the opposite direction when the pressures on the opposite sides of the piston are substantially equalized; and valve means including a snap action carried by the piston and operable by and during movement of said movable element for substantially equalizing the pressures on the opposite sides of the piston and without interrupting the continuous communication through the suction passage.

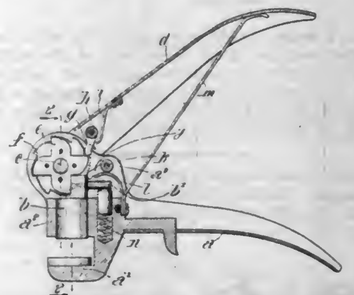
1,667,560. DEVICE FOR TAKING UP BRAKE CHAIN SLACK. JOHN MCMULLEN, Buffalo, N. Y. Filed July 13, 1926. Serial No. 122,056. 1 Claim. (Cl. 74—110.)

In a brake device, the combination with a chain for transmitting motion to the brake shoes, of means for taking up the slack consisting of a lengthened connecting slotted link to which the chain is pivoted and a slotted elongated lever arm pivoted to said link, said lever arm having a hub, and a post on which the said hub is secured, and means for rotating the post, in order that the lever and link may take up the slack in the chain quickly and the balance of the chain gradually so as to exert a strong braking effect.



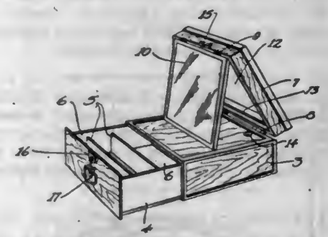
1,667,561. DIE-CAST-BOAT CONSTRUCTION. LEOPOLDO MEDIAVILLA, New York, N. Y. Filed Apr. 18, 1927. Serial No. 184,457. 1 Claim. (Cl. 114—79.)

In a ship of the class described, a keel comprising an inner section and arcuately arranged series of side plates comprising flanges for joining the adjacent plates together and to said keel disposed adjacent each other throughout the entire length of said keel, each alternate series comprising an arrangement of individual plates joined together at substantially the same distance above said keel and at a different elevation from the joint of those series therebetween for providing irregular seams.



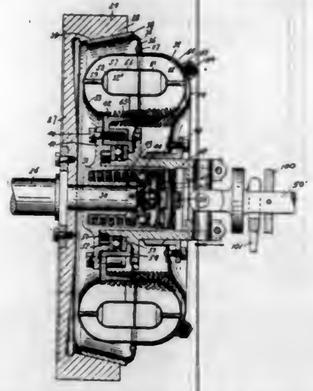
1,667,562. MICROMETER. FERDINAND NEUBAUER, Brooklyn, Ohio. Filed Dec. 21, 1926. Serial No. 156,199. 9 Claims. (Cl. 33—164.)

1. A micrometer, comprising a pair of movable jaw members having stepped contact places for inside and outside measuring purposes, means for shifting said members, and measuring means for the movement of said jaw members, including a zero marking element shiftable in limits in respect to said measuring means and adapt-



ed to compensate for lost motion in said parts and promote accurate readings for both inside and outside measurements.

1,667,563. SEALING DEVICE. FRANCIS PERRIN, Paris, France. Filed May 20, 1927, Serial No. 192,943, and in Belgium May 31, 1926. 2 Claims. (Cl. 81—9.1.)



1. A device of the class described comprising in combination a supporting element, a pressure element, an assembly including a bossed cam and a toothed ratchet, said ratchet having a plurality of large teeth to a number equal to some whole multiple of the number of bosses on the cam, said large teeth having smaller teeth formed thereon, a detent formed to engage with the small teeth of said ratchet, a second detent formed to engage only with the large teeth of said ratchet, and means for transmitting pressure to said second detent.

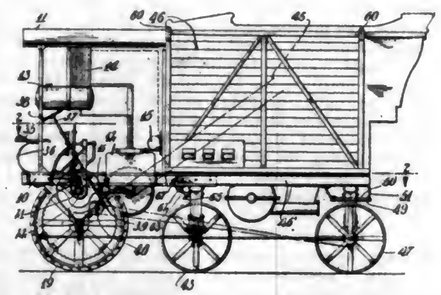
1,667,564. TOILET-CABINET. OLAF S. PEARSON, Kansas City, Kans. Filed July 18, 1927. Serial No. 206,635. 2 Claims. (Cl. 132—79.)

1. A toilet cabinet comprising a box member having a top table surface, a drawer member slidably mounted within one side of said box member, a cover member hinged to the opposite side of said box member, and a mirror hingedly carried by the free side of the cover member, said mirror being movable independently of said drawer member and adapted by resting the free edge of said mirror upon said table surface to support the cover member in open position.

1,667,565. HYDRAULIC POWER-TRANSMITTING APPARATUS FOR MOTOR VEHICLES. CARLTON R. RADCLIFFE, New York, N. Y.; Cressida C. Radcliffe executrix of said Carlton R. Radcliffe, deceased. Filed Apr. 24, 1917. Serial No. 164,256. 4 Claims. (Cl. 60—54.)

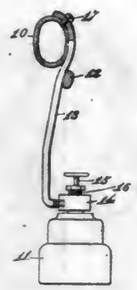
2. In a motor vehicle, the combination with the engine fly wheel and the change speed gear of the vehicle, of a hydraulic power transmitting apparatus interposed between said elements and including a casing, and means on said fly wheel and said casing for engaging or disengaging, at will, said last named two elements.

1,667,566. DROWNING RING FOR ANIMAL TRAPS. GEORGE C. RUPERT, Decatur, Ill. Filed Feb. 23, 1927. Serial No. 170,079. 3 Claims. (Cl. 43—96.)



1. A drowning ring for animal traps comprising a main ring, a loop connected with said ring, disposed substantially in the same plane thereof for attaching a trap thereto, and a loop on said ring opposite from said first mentioned loop formed substantially at right angles to the plane of said ring comprising side portions converged substantially adjacent each other at their base, said converging side portions being adapted to clamp a flexible cord threaded through said last mentioned loop when said ring is moved in a predetermined direction.

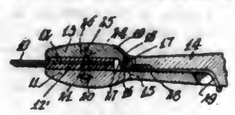
1,667,567. HANDLE FOR TRAVELING BAGS, SUITCASES, ETC. MAURICE B. SHWAYDER, Denver, Colo., assignor to Shwayder Trunk Manufacturing Co., Denver, Colo., a Corporation of Colorado. Filed Sept. 27, 1926. Serial No. 137,946. 1 Claim. (Cl. 190—57.)



A handle for suitcases and the like comprising a metallic tie strip terminating in loops; a unitary rubber casing molded around said strip; and links molded within said casing so as to pass through said loops for attaching said handle to said suitcase.

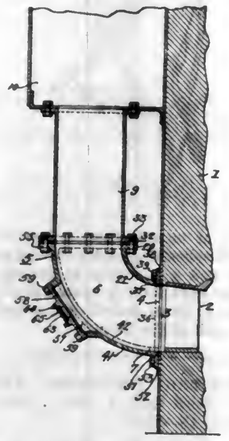
1,667,568. INTERCHANGEABLE AGRICULTURAL MACHINE. FERENC SOMOGYI, Paris, France. Filed Oct. 28, 1926. Serial No. 144,891. 2 Claims. (Cl. 296—35.)

2. In an interchangeable agriculture device of the class described, a chassis frame having spaced openings therein, a shaft rigidly mounted on said chassis frame, a plurality of operatively connected pawl members rotatively mounted on said shaft, teeth on one of the said pawl members, a shaft rotatively mounted on said chassis, a worm on said shaft meshed with the teeth of said pawl member, a body member having openings therein adapted to register with the openings in said chassis frame, blocks on said body member having grooves therein, and extension on said pawl members adapted to engage in said grooves and to be forced therein by rotation of said worm for bringing said body member to a predetermined position on said chassis frame to render the openings therein in registration with the openings of chassis frame.



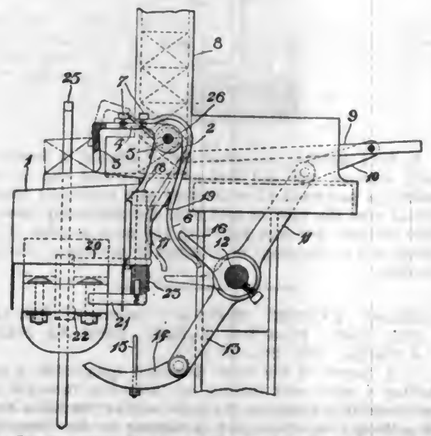
1,667,569. THERMOSTATIC CONTROLLING DEVICE FOR CARBURETORS. EINAR N. SORENSEN, Fernandina, Fla., assignor to Auto-Carburetor Corporation, Fernandina, Fla., a Corporation of Florida. Filed Mar. 20, 1925. Serial No. 17,088. 2 Claims. (Cl. 297—11.)

1. A fuel feed control for carburetors comprising a solid metal bar, means for attaching the bar directly to an engine manifold, a head on the lower end of said bar, a needle valve adjustably mounted in said head and a clamp bushing threaded in said head for locking said needle valve, substantially as described.



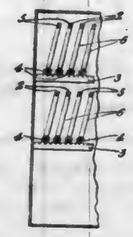
1,667,570. MANICURING IMPLEMENT. CESS THELANDER, New York, N. Y. Filed Mar. 24, 1927. Serial No. 177,041. 8 Claims. (Cl. 132—73.)

6. The combination with a glass nail scraper of arcuate curvature for manicuring, of a pair of pivotally connected jaw members, a pad on one of said jaw members having a convex surface adapted to conform to the curvature of one side of said scraper, a pad on the other jaw member having a concave surface adapted to conform to the curvature of the other side of said scraper, and



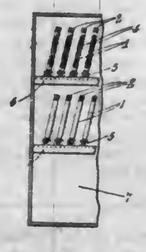
means on said jaw member for resiliently urging one pad thereof in the direction of the other pad for firmly gripping said scraper therebetween.

1,667,571. TUYÈRE WINDBOX. HARRY W. TITCOMB, Philadelphia, Pa. Filed Feb. 12, 1926. Serial No. 87,880. 9 Claims. (Cl. 266—30.)



1. A cupola having an air opening, and a wind-box therefor having a discharge end in operative relation to said air opening, said wind-box having a removable plate extending from said air opening, the inner surface of said plate being curved.

1,667,572. SHUTTLE-CHANGING APPARATUS FOR AUTOMATIC LOOMS. KICHIRO TOYODA, Nagoya, Japan. Filed Aug. 23, 1926. Serial No. 130,907. 2 Claims. (Cl. 139—225.)

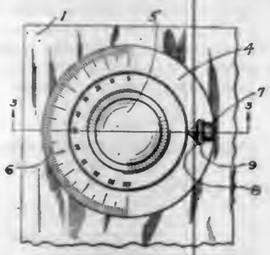


1. In an automatic loom, the combination of the slay, the shuttle magazine, a shuttle-box having a movable front-wall, a shuttle ejecting means, a picker, a check therefor, a pivoted arm carrying said movable front-wall, a spring-controlled extension secured to said arm, a horizontal rock-shaft, means carried thereby for simultaneously operating said shuttle ejecting means and said pivoted arm, a vertical rock-shaft adapted to be rocked by said extension, means on said vertical rock-shaft for releasing said picker, and means on said vertical rock-shaft for moving said picker out of the path of the fresh shuttle.

1,667,573. FISH-SMOKING APPARATUS. JAMES R. TURNER, Jersey City, N. J. Filed Apr. 2, 1927. Serial No. 180,598. 5 Claims. (Cl. 99—2.)

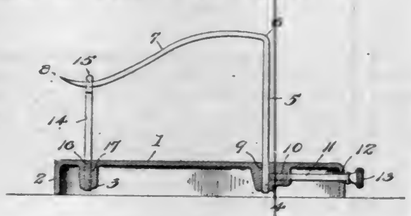
1. An apparatus for smoking fish, comprising a smoking chamber and a plurality of racks having openwork backs adapted to support fish to be smoked, together with means for detachably supporting said racks in slightly spaced positions within said chamber and at such inclination that the backs support the fish pieces without slippage and permit them to drain, and the fumes pass upwardly between adjacent racks to act substantially uniformly on both sides of the fish pieces.

1,667,574. ART OF SMOKING FISH FILLETS. JAMES R. TURNER, Jersey City, N. J. Filed Oct. 29, 1927. Serial No. 229,544. 2 Claims. (Cl. 99—9.)



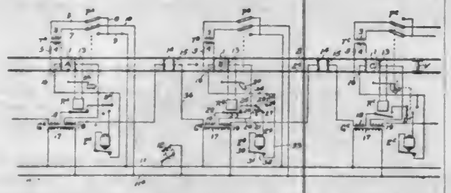
1. The process of producing smoked fish fillets, which comprises placing fresh fillets upon a screen and 'setting' them thereon while the screen is in substantially horizontal position, then tilting the screen to a steeply inclined position and passing smoke fumes upwardly past both sides of the screen.

1,667,575. GEARING FOR INSTRUMENT DIALS. MELVIN E. VANSICKLE, Newark, N. J., assignor, by mesne assignments, to Brandes Laboratories Inc., Newark, N. J., a Corporation of New Jersey. Filed Feb. 2, 1924. Serial No. 690,162. 1 Claim. (Cl. 74—7.)



A dial for revolving an instrument shaft arranged to project through a stationary panel comprising a rotatable member having a central knob thereon, a substantially flat circular portion extending from said knob, a shaft member projecting through the peripheral edge of said circular portion in a radial direction and screw threaded into

said circular portion, a roller journaled on said shaft member and projecting through said flat circular portion for frictionally engaging the surface of said stationary panel,

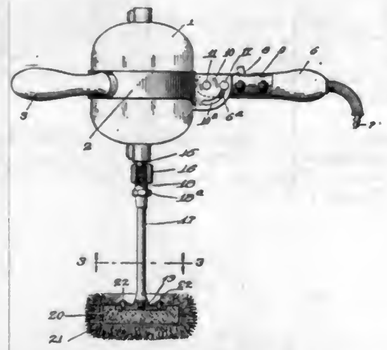


said flat circular portion being beveled around its peripheral edge on opposite sides of said shaft member for receiving indicia thereon.

1,667,576. FILING DEVICE. GEORGE HANSON VAN VALKENBURGH, Nashville, Tenn. Filed Oct. 19, 1925. Serial No. 63,383. 1 Claim. (Cl. 129—23.)

A filing device of the character described, consisting of a flanged base, a threaded boss depending from said base near one end thereof, a post having a lower threaded end engaging said threaded boss and having a hook at its upper end, a boss at the other end of said base and depending therefrom and having a vertical smooth opening and also having a horizontal threaded opening at right angles to said smooth opening and communicating therewith, a file holder having a vertical arm fitting in said smooth openings and formed with an arm to engage said hook of the post, and a screw having at one end a handle and having its other end threaded to engage said horizontal threaded opening and file holder to retain the file holder in place and mounted intermediate of its length in the flange of the base.

1,667,577. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. HERBERT A. WALLACE, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed May 25, 1923. Serial No. 641,387. 22 Claims. (Cl. 246—37.)

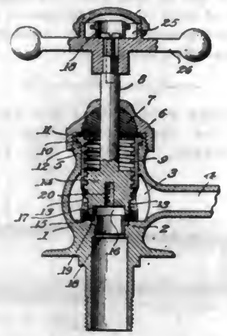


1. Railway traffic controlling apparatus comprising track rails, means for applying an alternating difference of potential across said rails and another alternating difference of potential along said rails, means for at times intermittently interrupting the supply of one of said potential differences to the rails, train carried governing means controlled jointly by the currents in the track rails due to said potential differences but not affected by said intermittent interruption of the one difference of potential, and other train carried governing means responsive to said intermittent interruption of said one difference of potential.

1,667,578. COW-TAIL HOLDER. ROBERT WYLLIE, South Franklin, Mass. Filed Jan. 27, 1927. Serial No. 164,078. 1 Claim. (Cl. 119—127.)

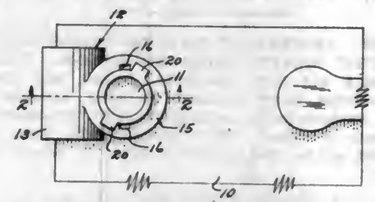
As an article of manufacture, a cow tail holder comprising a pair of opposite uprights having grooves in their outer surfaces, and a plurality of springs spaced apart and having their ends located in said grooves and riveted to the uprights at those points, and constituting a cage for holding the tail of the animal.

1,667,579. ELECTRIC POLISHER. HARRY A. ZWEIG, Chicago, Ill. Filed Sept. 4, 1926. Serial No. 133,520. 8 Claims. (Cl. 15—97.)



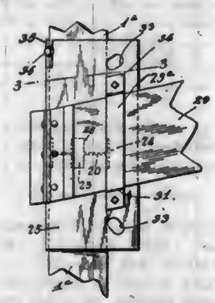
3. In a polisher, a motor driven spindle, a relatively soft, circular, felt pad secured to the free end of said spindle, a polygonal piece of sheep skin having its corners folded over the back of said pad, and means for securing said corners over said pad with the main portion of the sheep skin at the front of said pad to provide a polishing surface.

1,667,580. FAUCET. WILLIAM F. ALBRECHT, Salt Lake City, Utah. Filed July 2, 1927. Serial No. 203,152. 4 Claims. (Cl. 251—27.)



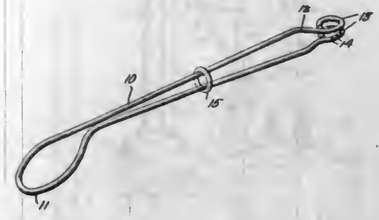
1. A faucet of the class described comprising a body having a valve seat therein, an internally threaded barrel removably fitting in the body and having holes therein adjacent its lower end, a washer in the lower end of the barrel engaging the seat, a valve head threaded to engage the threads in the barrel and having a recess

in its lower end which forms an annular projection for engaging the washer, a stem connected with the head, a handle on the stem, a cap encircling the stem and re-



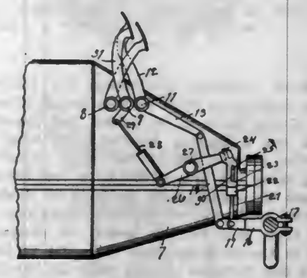
movably connected with a part of the body and a sleeve having a part extending into the hole in the washer for preventing spreading of the same.

1,667,581. BATTERY-TERMINAL CLIP. ERNEST M. BAILEY, Woodsdale, N. C. Filed Mar. 5, 1926. Serial No. 92,580. 3 Claims. (Cl. 173—259.)



1. A battery terminal clip of the character described comprising a tubular portion having a tapered bore extending longitudinally thereof for anchoring a cable end therein, a circular portion carried by the tubular portion to receive a battery post therein and provided with oppositely disposed bayonet slots within its inner sides, and a sleeve having oppositely disposed lugs adjacent its lower periphery adapted for registration with the bayonet slots in the circular portion to lock the sleeve within the circular portion and against the battery post.

1,667,582. DERRICK. NOAH BENJIMAN BIGGS, Wichita, Kans., assignor to Fred J. Anthony, Wichita, Kans. Filed July 28, 1925. Serial No. 46,666. 5 Claims. (Cl. 20—0.5.)

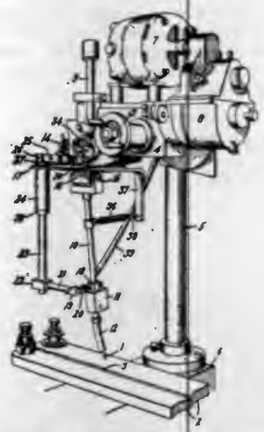


1. An element of a derrick construction comprising means for securing the abutting ends of corner posts and girders in locked relation and comprising an angle iron having a pair of side walls disposed at right angles to each other, stops secured to the outer faces of the walls, a bracket secured to each wall adapted to receive the end of a girder with the end of the girder abutting the stops, and a key plate received between the walls of the angle iron and having sockets at its opposite faces to receive the abutting ends of the corner posts, and complementary means included in the angle iron and key plate for maintaining the relative position of the plate and angle iron.

1,667,583. SLEEVE HOLDER. AUSTIN L. BLACK, Colorado Springs, Colo. Filed Nov. 20, 1926. Serial No. 149,717. 1 Claim. (Cl. 24—15.)

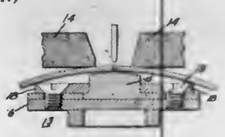
A sleeve holder comprising a member bent upon itself to provide an elongated loop adapted to receive a finger or thumb, arms outwardly flared from the loop, said arms being inwardly offset adjacent the extremities thereof, rings projected in parallelism from the offsets, the adjacent faces of the ring being radially notched to provide gripping surfaces, and a ring slidably mounted upon the arms being adapted to contract the rings for active use when shifted in juxtaposition thereto.

1,667,584. LOCKING DEVICE FOR AUTOMOBILES. MANLEY J. CHAPLIN, Berkeley, Calif. Filed Mar. 11, 1927. Serial No. 174,599. 4 Claims. (Cl. 70—128.)



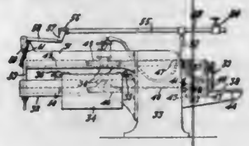
1. In a motor vehicle, a rocker bar adapted to actuate the brakes of a motor vehicle, a lever secured to said rocker bar, means for connecting said lever to the brake pedal of said motor vehicle, a ratchet positioned on said rocker bar and means for locking said ratchet against retrograde movement.

1,667,585. AUTOMATIC ARC WELDING. VERNI J. CHAPMAN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed May 22, 1926. Serial No. 111,048. 8 Claims. (Cl. 219—8.)



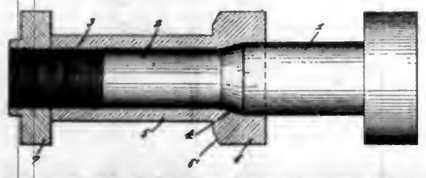
1. The method of fusion welding wherein the source of heat is oscillated across the works which comprises moving the heat source relatively slowly across the center of the line of the weld and relatively rapidly at points

distant from the center of the line of the weld as compared to the rates of movements with a sinusoidal oscillation of the end of the electrode.



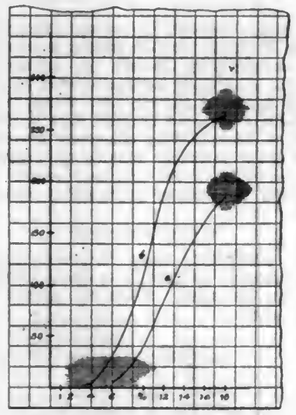
8. A fusion seam welding machine comprising a pivoted member for directing a source of heat along a seam to be welded, means for oscillating said member, and a connecting means between said oscillating means and said member adjustable to different distances from the pivot point of said member to adjust the amplitude of oscillation.

1,667,586. APPARATUS FOR FUSION WELDING. VERNI J. CHAPMAN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 2, 1926. Serial No. 126,709. 7 Claims. (Cl. 219—17.)



1. A work clamping mechanism for fusion welding apparatus comprising work holding means arranged along the line of the seam to be welded and spaced laterally therefrom and a backing member comprising a backing strip having a relatively narrow work engaging portion extending along the line of the seam and being provided with means for engaging the parts to be welded on each side of the seam spaced laterally therefrom a greater distance than said holding means to produce bending moments in the work to force the edges of the parts to be welded into intimate contact with the backing strip.

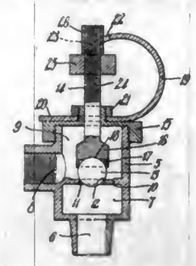
1,667,587. WELDING MACHINE. VERNI J. CHAPMAN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 30, 1926. Serial No. 132,379. 6 Claims. (Cl. 219—8.)



1. Apparatus comprising a pressure member, means for actuating said pressure member, a supporting arm for said actuating means, a second arm against which said pressure member acts, means for supporting said arms in spaced relationship with one end of one of said arms free of external support, removable means for reinforcing the free end of said arm, and means operated by the movement of said reinforcing means to prevent the actuation of said pressure member until said reinforcing means is in operative position.

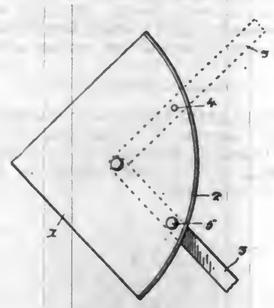
1,667,588. WRIST PIN. OSCAR COX and ORVIS CARRY WILLIS, Cotton Valley, La. Filed July 18, 1927. Serial No. 206,639. 2 Claims. (Cl. 74—38.)

1. A wrist pin of the class described comprising a pin having a reduced part threaded at its outer end, a bevelled shoulder connecting the reduced part to the other part, a sleeve fitting over the reduced part and having a bevelled wall engaging the shoulder and a nut threaded on the pin for holding the sleeve against the shoulder.



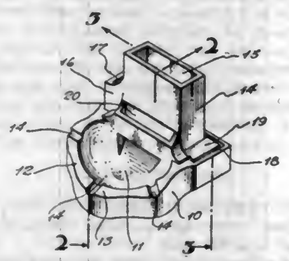
1,667,589. PROCESS OF MANUFACTURING PHOTOGRAPHIC SILVER HALID EMULSIONS. WALTER DIETERLE and OTTO MATTHIES, Dessau, and JOSEF REITSTÖTTER, Berlin-Friedenau, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed July 12, 1926, Serial No. 122,038, and in Germany Oct. 7, 1925. 3 Claims. (Cl. 95—7.)

1. A process of making photographic silver halid emulsions which comprises adding during emulsion making substances extractable from proteins by electro-dialysis.



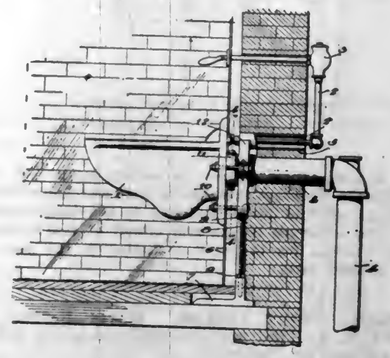
1,667,590. RELIEF VALVE. EDWARD F. DONNELLY, Malden, Mass. Filed June 11, 1926. Serial No. 115,375. 2 Claims. (Cl. 251—121.)

1. A relief valve having, in combination, a casing provided with an inlet passage, an outlet passage and with a valve seat intermediate said passages, a spherical valve member engaging said valve seat, a stem for said valve member extending loosely through said casing, a stop fused at the upper end of said valve stem, a spring secured at one end thereof to said casing, the other end of said spring being curved and terminating adjacent to said stop, and a nut adjustably mounted upon said



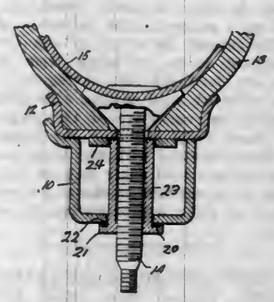
valve stem and engaging the under side of the upper portion of said spring, said stop limiting the movement of said nut toward said spring.

1,667,591. SNOW SHOVEL. EDWARD H. EDEN, St. Louis, Mo. Filed May 20, 1927. Serial No. 193,020. 1 Claim. (Cl. 294—49.)



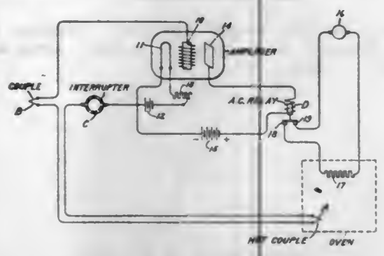
A snow shovel comprising a flat segmental blade whose rounded edge is flanged upwardly, a handle on the upper face of the blade pivoted thereto centrally with respect to the flange and to the apex of the blade, said blade at points equidistant from the pivot, and adjacent to the flange having openings therethrough, and a holding means designed to be passed through said openings and through the handle for holding the handle in a line with either of the angle edges of the blade.

1,667,592. COMBINATION HOLDER AND CIGARETTE-EXTINGUISHING ASH TRAY. HENRY EVENS, Duluth, Minn. Filed Aug. 27, 1926. Serial No. 131,980. 2 Claims. (Cl. 131—51.)



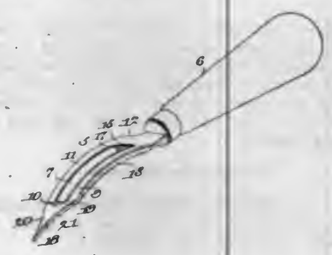
1. An article of the class described including a body providing a depressed portion serving as an ash receptacle, and a second body upstanding from the first mentioned body and providing a plurality of compartments and providing a groove forwardly of its front wall for the reception of the lighted end portion of cigarettes, said groove having longitudinal wall portions tapering inwardly and downwardly toward each other and having a lower end portion opening into said ash receptacle.

1,667,593. WATER-CLOSET SUPPORT. RICHARD T. FREY, Newburgh, N. Y. Filed Feb. 4, 1927. Serial No. 165,923. 7 Claims. (Cl. 4—252.)



1. In combination with a bowl of a water closet or the like, a wall plate, adjustable supporting means for said bowl and said wall plate and means adjustable to angular irregularities comprising ball and socket joints, for bringing said bowl and said wall plate together, an exit pipe through said wall plate from said bowl and a water supply therefor.

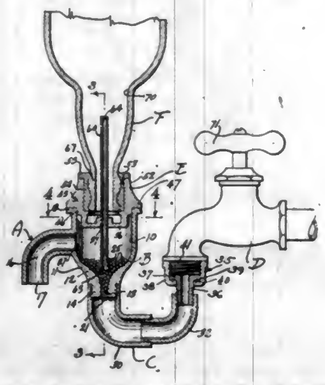
1,667,594. VALVE-STEM ATTACHMENT. FORREST H. GIBBONS, Russell, N. Y. Filed Apr. 3, 1926. Serial No. 99,648. 2 Claims. (Cl. 152—12.)



1. An attachment for use upon and in conjunction with pneumatic tire valves comprising a sleeve provided with an outwardly extending annular flange upon one end and periphery thereof, said flange having an annular groove upon its under side to seat a resilient washer adapted for frictional engagement with the outer side of a wheel felly and for encircling the valve stem opening therein, the flange being adapted for threaded engagement with the valve stem, and means carried upon the inner side of the rim adapted for engagement with the inwardly extending end of the sleeve.

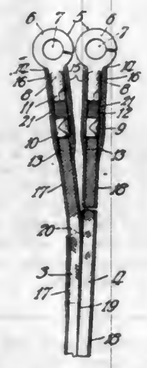
1,667,595. TEMPERATURE-CONTROL MEANS. SIMON HALLE, Colorado Springs, Colo., assignor to Edison Electric Appliance Company, Inc., a Corporation of New York. Original application filed Apr. 5, 1921, Serial No. 458,686. Divided and this application filed Mar. 1, 1926. Serial No. 91,821. 8 Claims. (Cl. 219—20.)

6. A temperature control for electric ovens comprising an electron discharge tube having grid and plate circuits, a thermo electric device subjected to the temperature in the oven connected in the grid circuit of said tube, and control means for the oven connected in the plate circuit of said tube.



1,667,596. FRUIT PEELER. HYMAN KAPOTA, New York, N. Y. Filed Sept. 11, 1922. Serial No. 587,453. 8 Claims. (Cl. 30—20.)

1. A fruit peeling implement comprising a member curved to form a concavity, the curvature of which conforms to the general curvature of the fruit, a longitudinally curved blade extending from said member downwards and forwards and having its cutting edge within said concavity, said cutting edge being concentric to the longitudinal curvature of the major portion of the blade, guard walls bounding the blade adapted to come in intimate contact with the fruit, so as to cause said blade to maintain an angle and cut the peel or skin of the fruit of a uniform thickness approximating the depth, and of a width approximating the length of the blade.

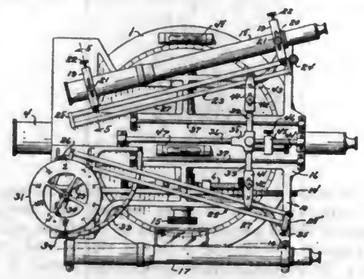


1,667,597. BOTTLE-WASHING APPARATUS. MICHAEL J. KREUTZER, Dayton, Ohio. Filed Nov. 20, 1922. Serial No. 602,191. 1 Claim. (Cl. 15—95.)

A bottle washing apparatus comprising a body having a compartment entirely open at its upper end and having its lower end provided with a relatively small inlet opening diverging into said compartment, said body having a lateral exit opening therein of relatively greater dimension than said inlet opening, a U-shaped connection for attachment in said body at the inlet end thereof, said U-shaped connection being adapted for attachment to a liquid supply source, a cap member upwardly carried by said body including a spider portion depending into said body compartment providing a passageway therethrough, a tube longitudinally disposed within said compartment and adjustable in the passageway of said spider, the lower end of said tube being outwardly flared and enlarged as to its opening for disposal adjacent the inlet opening of said body, shots disposed within the compartment on the surface thereof adjacent said inlet opening, screens

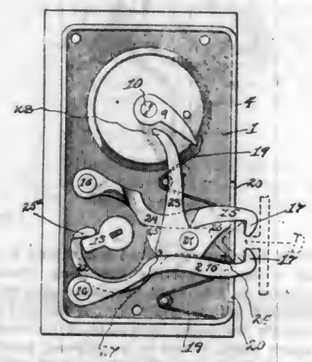
over the inlet and outlet openings of said body, and a resilient bottle receiving bushing disposed within said cap, a bottle when in said bushing being invertedly disposed so that said adjustable tube extends upwardly into the same.

1,667,598. INSULATED TERMINAL. JACOB MAYO LENZ, Chicago, Ill., assignor to Runzel-Lenz Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 3, 1924. Serial No. 703,967. 7 Claims. (Cl. 173—269.)



1. In a device of the character described, a pair of conductors each having an insulating covering thereon, a terminal on each of said conductors, said terminals each having a sheath of insulating material and an exposed end portion serving as a contact, said sheaths extending rearwardly from said terminals over said insulating covering, one of said sheaths embracing both said conductors at a point spaced from said terminals and the other of said sheaths terminating on its conductor under said first sheath to bind the free end thereof in position.

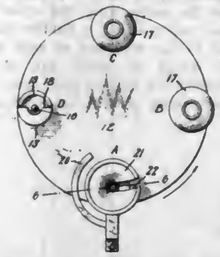
1,667,599. SURVEYING INSTRUMENT. TONY MARIOTTI, Lorain, Ohio. Filed Apr. 21, 1926. Serial No. 103,544. 3 Claims. (Cl. 33—66.)



1. An instrument of the class described comprising a supporting frame, a telescope connected with one side of the frame, an elongated frame pivotally supported at its front end to the main frame, a telescope carried by said

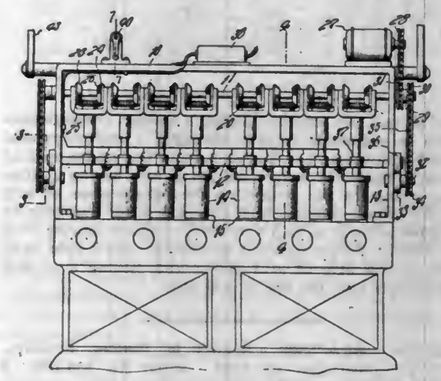
elongated frame, a second elongated frame pivotally connected with the main frame at its rear end, indicating mechanism operated by the movement of the second elongated frame, a sliding member supported on the main

frame and movably connected with the elongated frames so that movement of the sliding member will actuate the elongated frames and means for securing fine adjustment of the sliding member after the same has been moved by hand.



1,667,600. SLIDING-DOOR LOCK. MICHAEL MARTINEK, Lyons, Ill., assignor to Western Wire & Iron Works, Inc., Chicago, Ill., a Corporation of Illinois. Filed Mar. 7, 1927. Serial No. 173,402. 2 Claims. (Cl. 70—31.)

1. A sliding door lock comprising a keeper member and a casing member, the casing having an opening in one edge and provided interiorly with a pair of lever arms having their movable ends adapted for operative locking engagement with the keeper member, means for holding said arms normally in the locked position, a key actuated device secured to one side of the casing and a knob actuated device secured to the other side of the casing, a pivot in the casing between the lever arms, two lever devices mounted movably in superposed relation upon said pivot, and each adapted to engage and spread apart both lever arms, a wing member connected with the knob actuated device to contact with and actuate one of said pivoted lever devices independently of the other pivoted actuating device.

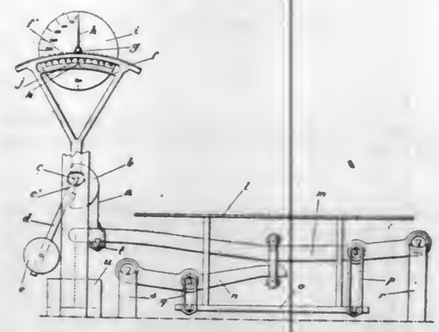


1,667,601. EXHAUST-TUBE REMOVER. LOUIS A. MAUERER, Irvington, N. J., assignor to General Electric Company, a Corporation of New York. Filed Feb. 14, 1923. Serial No. 619,028. 4 Claims. (Cl. 176—2.)

1. In a machine of the character described, the combination of a holder having a recess with elastic walls for gripping an article, an ejector mounted adjacent said holder, and means for producing relative movement between said holder and said ejector to cause said holder to pass adjacent said ejector and to bring said ejector

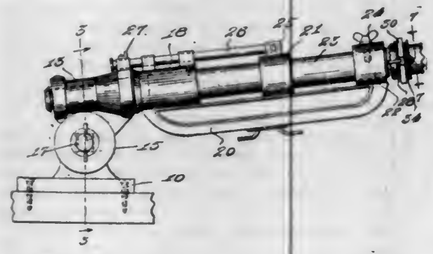
into contact with an article in said holder, and thereby distort said elastic walls sufficiently to release the article.

1,667,602. VALVE-GRINDING MACHINE. EDWARD PAUL O'DONNELL, Kiefer, Okla. Filed Sept. 9, 1927. Serial No. 218,567. 1 Claim. (Cl. 51—29.)



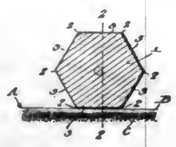
A means for grinding valves in an engine block, comprising a substantially U-shaped frame which is removably bolted on the block, valve engaging tools designed to each engage with a valve, a rod associated with each tool having an upper squared end, beveled gears having hub portions journaled on the frame having squared bores to receive the squared ends of the rods therein, oppositely disposed mutilated gears engaging each of the beveled gears, a shaft for the last mentioned gears, means for revolving the shaft whereby to cause the last mentioned gears to impart reverse motion to the first mentioned gears and to the rods associated therewith, guide means for the rods, comprising a reciprocating member mounted on the frame, rollers on the ends of said member, cams on the stub shafts mounted adjacent to and engageable with the first mentioned rollers, means for revolving the cams to elevate the guide means, means supporting the rods on the guide means for causing the same to be raised with the guide means and solenoids surrounding each rod and the tool engaging element thereon, and means for energizing the solenoids to attract the valves to raise the same from their seats.

1,667,603. AUTOMATIC BALANCE. CHARLES PECCAUD, Morbier, France. Filed Feb. 4, 1925, Serial No. 6,693, and in France Feb. 6, 1924. 1 Claim. (Cl. 265—62.)



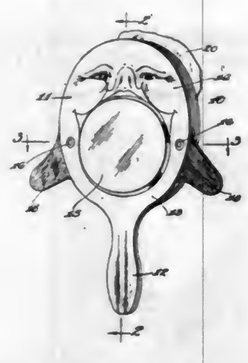
An automatic weighing balance comprising in combination, a traverse, a scale plate supported by said traverse, a main lever, a stationary support on which one end of

said main lever rests, means for suspending one end of said traverse to said main lever, a secondary lever, a stationary support on which one end of said secondary lever rests, means for suspending said secondary lever on said main lever, means for suspending the other end of said traverse to said secondary lever, a flexible metal band attached at one end to the free end of said main lever, a rectifying cam to which the other end of said flexible metal band is attached, an axle of said cam, an arm fixed on said axle, a balancing weight on said arm, a sector



fixed on said cam axle and having a toothed circumference which is concentric to said cam axle, a stationary dial behind said sector and having a scale the graduations of which indicate the weight units and also having graduations along its rim indicating the sub-divisions of said weight units, a pointer rigid with said sector and adapted to move in front of said unit scale, a pinion gearing with the toothed circumference of said sector, and a light hand fixed on the axle of said pinion and moving over said graduations near the rim of said dial.

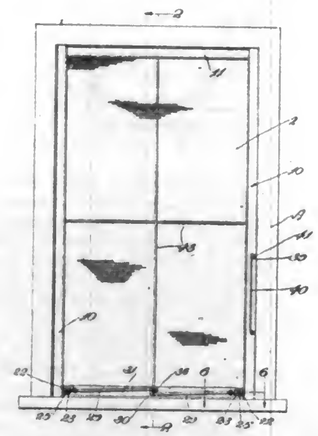
1,667,604. BRACKET. ROBERT B. PETERS, Brooklyn, N. Y. Filed Apr. 12, 1927. Serial No. 183,129. 2 Claims. (Cl. 248—37.)



2. A device for use upon poles comprising a bracket, supporting means for the bracket affording angular-adjustment thereto, a socket member rotatably mounted within the bracket, an arm carried by the socket member, sleeve members mounted upon the arm having the bores thereof disposed in alignment with the opening within the socket member to receive the pole therein, ears carried upon one of the sleeve members socket member and bracket, and an operating lever pivotally mounted between a pair of the ears for rotating the socket member within the bracket and adapted for locking engagement between the remaining ears upon the socket and bracket members respectively.

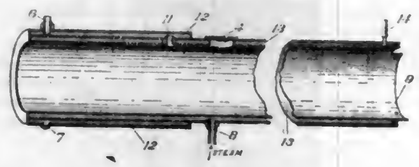
1,667,605. RUG OR CARPET BEATER. DANIEL PARKS RANSOM, Woodstock, Vt. Filed Mar. 7, 1925. Serial No. 13,870. 1 Claim. (Cl. 15—92.)

A rug or carpet beater comprising a rotary beating element of polygonal form in cross section and having a continuous unbroken periphery made up of ridges and flat beating surfaces alternating with the ridges, and means for rolling the beating element across the carpet or rug.



1,667,606. TOY NOVELTY. JOHN ROMANO, Brooklyn, N. Y. Filed May 23, 1927. Serial No. 193,604. 1 Claim. (Cl. 46—53.)

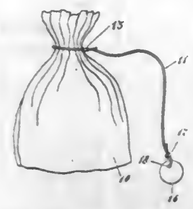
An article of the class described comprising a body portion having a handle portion extending therefrom, a grotesque picture on said body portion, a pair of sections pivotally mounted within said body portion and normally concealed therein and being indicative of the ears of said grotesque figure when moved to an exposed position, and manipulating portion extending from said sections beyond the sides of said body portion and movable within said body portion upon actuation of the same to move said sections to an exposed position on opposite sides of said body portions, said manipulating portions co-acting with said picture to form a part thereof.



1,667,607. LATCHING MEANS FOR WINDOW SCREENS. PETER SCHNURR, Chicago, Ill. Filed June 29, 1923. Serial No. 648,588. 1 Claim. (Cl. 292—87.)

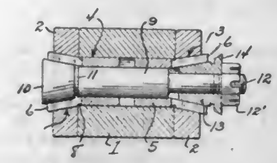
In combination, latching means for a window screen including substantially channel shaped guiding members extending along corresponding edge portions of a screen member and having openings formed therein, a bracing plate adapted to be attached to the lower edge portion of the screen member, guiding blocks having open ends and adapted to be carried by the bracing plate at opposite end portions thereof, latch bolts slidably associated with the guiding blocks, and having end portions adapted for projection through the openings, spring members operable on the latch bolts for urging the end portion of the latch bolts into projecting position through the openings, said guiding blocks having openings in the face thereof, handle portions on said latch bolts protruding through said openings, and adapted for manipulation to move the ends of said latch bolts from projecting position through the openings, and means for connecting the latch bolts for simultaneous operation permitting the end portions to be moved in unison from projecting position through the openings, said means including a disc rotatably supported

by the bracing plate and having a notch formed in the rim thereof, rod members having end portions eccentrically connected to the disc and opposite end portions connected to the latch bolts, and a member pivotally connected to the bracing plate and having a bill adapted for engagement with the notch, substantially as described.



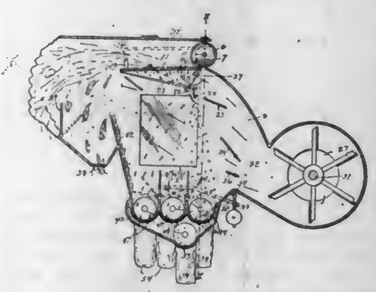
1,667,608. MACHINE FOR STERILIZING COTTONSEED. WILLIAM JOHN STAHMANN, El Paso, Tex. Filed Jan. 11, 1926. Serial No. 80,604. 2 Claims. (Cl. 257—246.)

1. In combination with a cotton seed conveying pipe and its auger, a jacket surrounding the pipe, means for introducing steam into the jacket for heating the pipe and the auger, a second jacket surrounding a part of the first jacket, means for placing the second jacket in communication with the pipe and means for introducing liquid into the second jacket so that it will be vaporized by the heat from the first jacket and the resulting vapor will pass into the pipe.



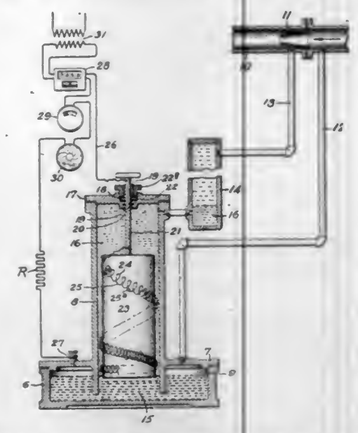
1,667,609. BAG SEAL. JAY TAMASSY, New York, N. Y. Filed Nov. 12, 1926. Serial No. 148,021. 1 Claim. (Cl. 53—8.)

An infusorial container comprising an open mouthed bag made of flexible fabric, having its mouth closed by gathering its folds together to form a neck, a flexible suspension member therefor, having one of its ends formed into a loop encircling said neck, and a metallic clip formed by a relatively short length of flat metallic wire having a body portion abutting against the strands of said loop and having two slanted ends each end being



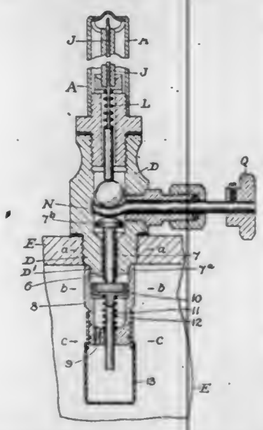
bent and flattened over both said strands, fastening the free end of said loop to the body portion of said suspension member.

1,667,610. WEAR-COMPENSATING PIN. JOHN W. TEWALEY, Waverly, N. Y. Filed Apr. 12, 1927. Serial No. 183,158. 2 Claims. (Cl. 308—64.)



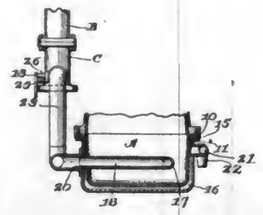
1. In a device for the purpose set forth, a pin having an outwardly tapered head at one end and its opposite end reduced and threaded, a bushing having outwardly tapered ends arranged on the pin and the bore of one end of the bushing receiving the head of the pin thereon, a tapered collar on the pin received in the second end of the bushing and a link screwed on the pin and contacting with the collar.

1,667,611. GRAIN SEPARATOR. ERNEST S. THOMPSON, Porterville, Calif. Filed June 20, 1927. Serial No. 200,247. 2 Claims. (Cl. 209—35.)



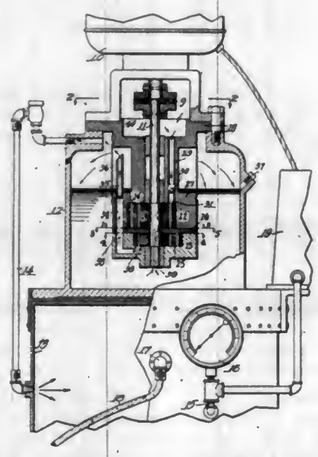
1. In a grain separator of the character described, a shaking screen adapted to have grain placed thereon, an inclined member positioned beneath said screen and adapted to receive the grain passing through said screen, a trap positioned at the lower extremity of said board, said trap comprising a stationary board and a movable plate resiliently held in spaced relation to said board, means for producing an air current through said screen and beneath said trap, for the purpose specified.

1,667,612. FLOW METER AND THE LIKE. LOUIS WILLARD THOMPSON, Schenectady, N. Y., assignor, by mesne assignments, to Bailey Meter Company, a Corporation of Delaware. Filed Sept. 22, 1922. Serial No. 589,775. 2 Claims. (Cl. 201—57.)



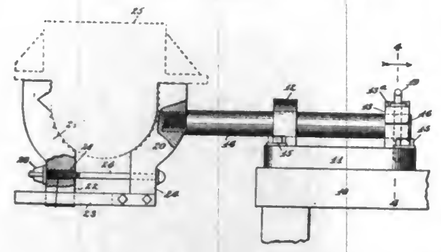
2. In an indicating instrument for flow meters and the like, the combination of a U-tube, a liquid therein which is a conductor of electricity, a supporting member in a leg of the U-tube, and a looped resistance wire spirally wound on said supporting member with the loops flattened against said supporting member and arranged with the lower end of each successive loop located above the lower end of the preceding loop whereby when the liquid rises and falls in such leg of the U-tube it cuts the loops out of and into circuit a loop at a time.

1,667,613. HYDROCARBON-VAPOR BURNER. FREDERICK CHARLES TILLEY, Hendon, London, England. Filed Apr. 23, 1927, Serial No. 186,104, and in Great Britain May 25, 1926. 10 Claims. (Cl. 158—58.)



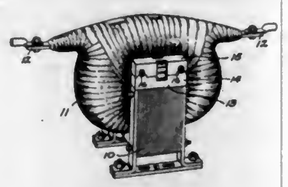
1. The combination with a hydrocarbon fuel supply, of a burner including a vaporizing tube having a jet orifice, a spring-opened jet valve, a spring-closed fuel control valve, manually operated means for closing the jet valve and permitting the fuel valve to close, and means for directing the excess gas pressure in the tube to automatically open the fuel valve so that such excess gas will pass into the fuel supply.

1,667,614. AUTOMOBILE OIL-HEATING DEVICE. GUY TOLLERUD, Austin, Minn. Filed Mar. 15, 1927. Serial No. 175,486. 2 Claims. (Cl. 184—104.)



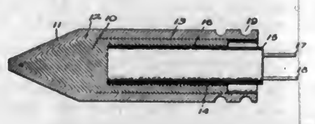
1. An oil heating attachment for motor vehicles comprising a pan adapted to be arranged in spaced relation and to completely surround the oil containing section of a crank case of an internal-combustion engine and providing in connection therewith a heating chamber, a substantially U-shaped conveyor pipe located within said section and having one of its legs extending through one of the walls of said section and opening into said chamber and having the other of its legs extending through such wall, and said chamber and through a wall of said pan, means for conveying exhaust from an engine directly to said last mentioned leg, and means connected to one of the walls of said pan for delivering the exhaust from said chamber.

1,667,615. ROTARY COMPRESSOR. ALONZO W. WHITCOMB, Worcester, Mass. Filed Nov. 20, 1924. Serial No. 751,137. 2 Claims. (Cl. 230—158.)



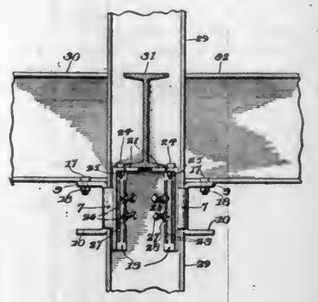
1. In a rotary compressor, the combination with a casing and a vertical central driving shaft, of a gear-shaped rotary member fixed thereto, a ring outside said rotary member and having the same thickness and provided with teeth on the inner surface meshing with the teeth on the gear at one side, a crescent shaped member located in fixed position to fill the space between the two toothed members, and means for discharging compressed air or gas from the pump into the casing, said casing being filled with lubricant up to a lower level and the shaft being provided with an exposed passage extending into it at the bottom and communicating with the exterior of the shaft to conduct lubricant up from the bottom under the pressure of the air or gas in the casing and distribute it around said gears.

1,667,616. TRANSMISSION STAND. HARRY J. WRIGHT and GEORGE SHIRK, Waynesburg, Pa. Filed Feb. 24, 1927. Serial No. 170,592. 2 Claims. (Cl. 29—89.)



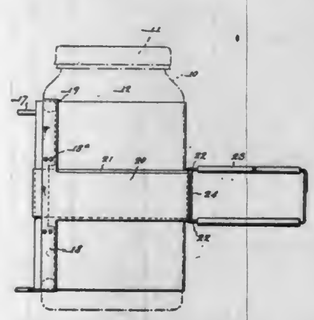
1. A transmission stand including a pair of relatively adjustable upwardly and outwardly curved jaws cooperatively forming a cradle, a horizontally disposed rotatably adjustable supporting shaft connected to one of the jaws near the upper end of the latter and projecting laterally therefrom, whereby the cradle is rotatably adjustable about a horizontal axis coincident with the axis of the supporting shaft.

1,667,617. TERMINAL BLOCK FOR CURRENT TRANSFORMERS. ELMER J. ZELT, Fort Wayne, Ind., assignor to General Electric Company, a Corporation of New York. Filed Aug. 29, 1927. Serial No. 216,030. 3 Claims. (Cl. 175—358.)



1. A current transformer terminal block comprising a base, secondary terminals and a device for short circuiting said terminals mounted on said base, and a cover formed to fit said base in either of two positions, said short circuiting device being arranged when in short circuiting position to prevent application of said cover to the base in one of its said two positions.

1,667,618. SOLDERING IRON. CHARLES C. ABBOTT, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Jan. 8, 1924. Serial No. 685,067. 2 Claims. (Cl. 113—105.)

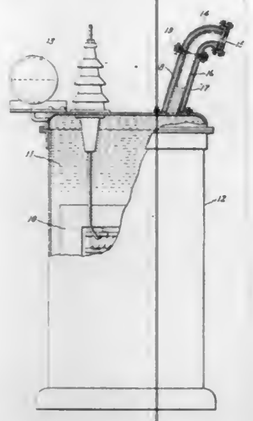


1. A soldering iron comprising a mass of copper, a protecting sheath for said mass provided with a working surface, and a soldered joint between said sheath and said mass in the vicinity of said working surface, said sheath fitting loosely over the remaining portion of said mass so as to provide an air space to obstruct the transfer of heat therefrom.

1,667,619. SEAT FOR GIRDERS AND BEAMS. RICHARD BOLDT, San Francisco, Calif. Filed May 18, 1927. Serial No. 192,310. 16 Claims. (Cl. 113—99.)

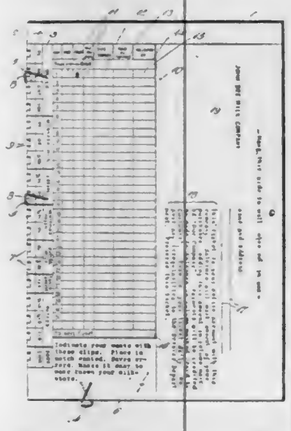
1. An adjustable, removable seat structure for supporting structural irons comprising a combined supporting and coupling element including a seat for a structural iron, a supporting section including a seat for a structural iron, and means common to said element and section for detachably clamping them together and for detachably clamping said element in position whereby said element and section are removably secured in supporting position for the structural iron.

1,667,620. JAR-HANDLING TOOL. CHARLES EDWARD BONGE, Creighton, Nebr., assignor of one-third to Everett A. Houston and one-third to Everett T. Houston, Niobrara, Nebr. Filed Mar. 22, 1927. Serial No. 177,888. 3 Claims. (Cl. 81—3.2.)



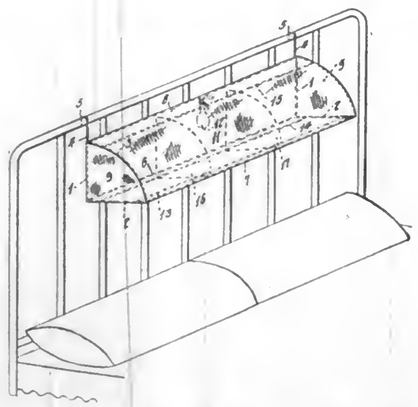
1. A tool of the class described including a strip of spring metal bent into substantially circular form with its ends overlapping, handle means for contracting or expanding the strip, and means slidably connecting the overlapping ends to guide the expansive or contractile movement of the strip, said means including pairs of ears carried by each end of the strip and guiding the opposite end.

1,667,621. PRESSURE-RELIEF PIPE FOR ELECTRICAL-APPARATUS CASINGS. LOCKE H. BURNHAM, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Apr. 4, 1927. Serial No. 180,981. 1 Claim. (Cl. 220—85.)



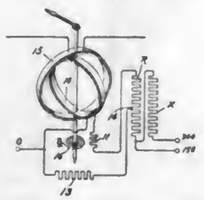
The combination with a casing for oil immersed electrical apparatus, of a pressure relief pipe communicating

with said casing and extending above the oil level, and a yieldable member normally closing the outer end of



said pipe, said pipe comprising two concentric sections with an intervening heat insulating space to prevent rapid dissipaton of heat from said inner pipe section.

1,667,622. ORDER BLANK. WILLIAM LYON CALDWELL, Indianapolis, Ind. Filed Feb. 21, 1927. Serial No. 170,009. 1 Claim. (Cl. 116—130.)

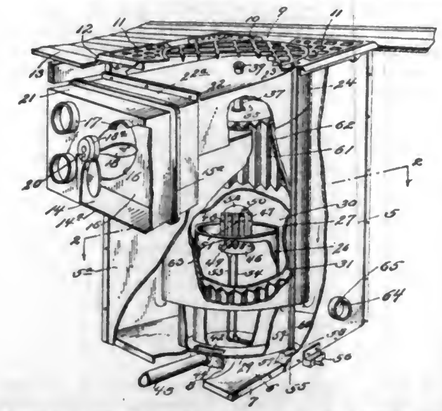


An order blank for products intended to be placed at a point accessible to a deliveryman; said blank comprising a card having printed matter spaced along an edge denoting various products and quantities thereof, said edge having notches at the quantity designations, and clips adapted to frictionally straddle said edge of card at designations showing the product and quantity wanted, said clips having portions for reception in said notches, whereby the clips are held against accidental sliding out of place, said notches having their opposed edges disposed in inwardly diverging relation to more effectively hold the clips against accidental slippage and also permitting the deliveryman to read the order by touch if delivering in darkness.

1,667,623. LAMP SHADE FOR READING LIGHTS. ARTHUR G. CAREY, Bluefield, W. Va. Filed Sept. 1, 1927. Serial No. 216,948. 3 Claims. (Cl. 240—108.)

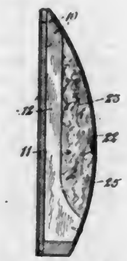
1. A lamp shade, comprising a casing, a lamp in said casing, said casing having an opening for the emission of light rays from said lamp, and partitions slidably carried by said casing and adapted to be adjusted to direct the light rays through said opening.

1,667,624. ELECTRICAL MEASURING INSTRUMENT. ALMON J. CORSON and STEPHEN C. HOARE, Lynn, Mass., assignors to General Electric Company, a Corporation of New York. Filed Oct. 17, 1924. Serial No. 744,268. 3 Claims. (Cl. 171—95.)



1. In an alternating current electrical measuring instrument, a moving coil armature, a control spring for opposing the torque of the armature, a temperature compensating resistance connected in series with the armature, a permanently connected resistance element having several times the resistance of the above mentioned series circuit connected in series therewith, and a resistor shunting the armature, compensating resistance and a substantial portion of the high resistance element, the parallel branches thus formed having sufficiently low and similar time constants to prevent appreciable frequency errors.

1,667,625. GAS FLOOR FURNACE. HARRY E. DICKINSON, Houston, Tex. Filed Dec. 29, 1926. Serial No. 157,782. 10 Claims. (Cl. 126—116.)

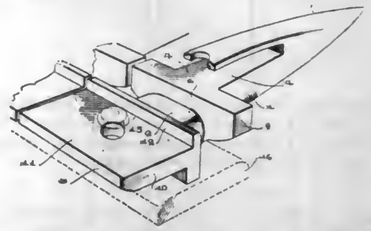


1. A gas floor furnace of the class specified, having enclosing means and an inner vent chamber with burners therein including a pilot light and combustion and heating chambers surrounding the said burner chamber, the lower part of the furnace having means for supplying air to and carrying off the products of combustion therefrom and also means for admitting cold air, an upper supplemental casing with a top closure plate

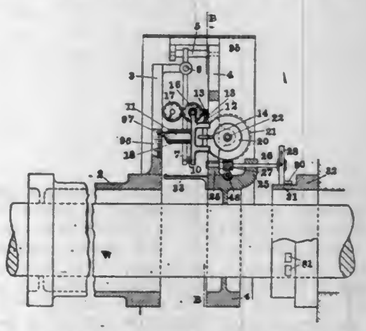
and an outer distributing chamber with which the burners and combustion and heating chambers cooperate as heating means, a register over the top of the closure plate having removable members, and a tube extending

upwardly from an interior part of the furnace and through the said closure and having a removable cap with a transparent covering for igniting a part of the burners and for observing the operation of the latter through the top of the furnace.

1,667,626. SPINE SUPPORT. MAX EPSTEIN, New York, N. Y. Filed Mar. 24, 1927. Serial No. 178,064. 3 Claims. (Cl. 155—188.)



1. A spine support, comprising a back, a plurality of bracing members connected with the back, each of said bracing members having a beveled upper end and a projecting lower end, said projecting lower end having an inclined section, a flat spring for each of said bracing members, said flat springs at their ends fitting flatwise against the beveled sections at the top and bottom, means for adjusting each of said springs independently for varying the degree of permanent bowing of the spring, and covering means for covering said springs, back and bracing members

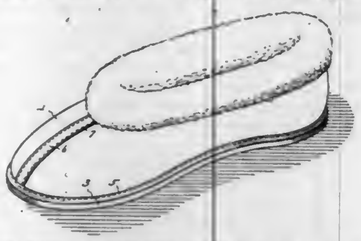


---

1,667,627. GUARD FINGER FOR MOWING MACHINES. EUGENE S. FISHER and ELDON R. MENDROP, Hollandale, Miss. Filed Dec. 15, 1926. Serial No. 154,965. 1 Claim. (Cl. 56—310.)

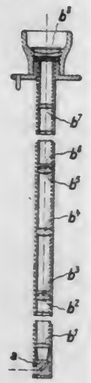
As a new article of manufacture, a guard finger for mowing machines comprising a forward end portion, an intermediate portion, and an attaching rear end portion, said forward end portion being slotted longitudinally in a forward direction from its rearward end for part of its length and having a pair of oppositely extending lateral lugs at its rearward end, said intermediate portion having its upper face terminating below the level of the bottom of the slot in the forward end portion, and the top edge of a rear side wall extending parallel to the said laterally extending lugs at the rear side of the intermediate portion thus defining a transverse channel having substantially vertical forwardly and rearwardly disposed parallel side walls, said rear end portion having its upper face disposed in a plane below the top edge of the rearward side wall of said intermediate portion, said rear end portion being apertured for the reception of a fastening element and having a transversely extending rearwardly facing shoulder at the forward edge of its lower side and depending for a distance sufficient to shield and protect the lower end portion of a fastening element positioned in the said aperture the transverse width of the rear end portion being slightly greater than that of the rear end of the forward end portion of the guard in the plane of the laterally extending lugs thereof, the intermediate portion being of a less width than the rear attaching portion and substantially equal to that of the rear end portion of the tapered forward end portion and immediately forward of the lugs.

1,667,628. DIRECT-READING TORSION METER. HERMANN FÖTTINGER, Zoppot, near Danzig, Germany. Filed June 21, 1923, Serial No. 646,963, and in Germany June 26, 1922. 9 Claims. (Cl. 265—25.)



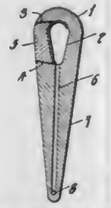
1. A rotating torsion meter for direct indication of torsional displacement of a shaft or the like, comprising opposed elements relatively movable in response to torsional displacement of the shaft, mechanism for multiplying the movement of said elements, and means for indicating the extent of the multiplied movement, said indicating means being fixed with relation to said shaft and disposed in a plane perpendicular to the plane of rotation and parallel to and substantially adjacent to a plane passing through the shaft axis of rotation.

1,667,629. SLIPPER. HENRY FRIEDMAN, Brooklyn, N. Y. Filed Apr. 1, 1927. Serial No. 180,228. 1 Claim. (Cl. 36—16.)



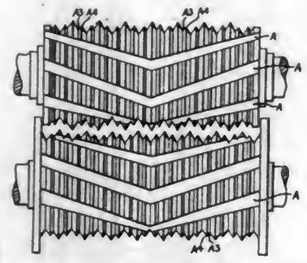
A slipper, comprising an upper having an outwardly extending margin, a sole formed of a size and shape to extend to the outer edge of said margin, a seam formed by an over-and-over stitch connecting the outer portion of the sole with said margin, said stitching and margin extending entirely around the sole, a protecting strip

substantially U-shaped in cross section straddling said margin and the outer edge of said sole, and a second line of stitching extending directly through both legs of said



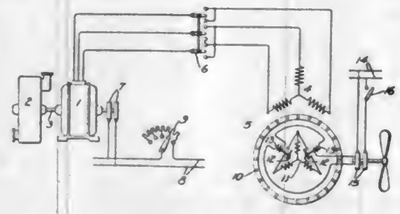
protecting strip, through said margin and the outer part of said sole for securing the protecting strip in place, and presenting additional securing means for connecting the margin of the upper and sole together.

1,667,630. OPTICAL TUBE FOR CYSTOSCOPES, GASTROSCOPES, AND THE LIKE. GÜNTHER LOECK, Berlin, Germany, assignor to the Firm: Georg Wolf G. m. b. H., Berlin, Germany. Filed Mar. 17, 1927, Serial No. 176,250, and in Germany Mar. 20, 1926. 2 Claims. (Cl. 128—6.)



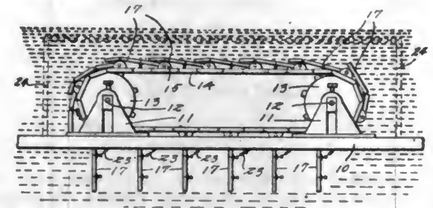
1. Optical tube for cystoscopes, gastroscopes and the like, containing optical parts adapted to present to the observer an image of the part of the body to be examined, which optical parts comprise lens systems composed of a plurality of lenses, the single members of these systems consisting of different kinds of glass in order to achieve chromatic correction and not being cemented with each other, and means adapted to secure the optical parts in the tube in their position.

1,667,631. FOUNTAIN COMB. FRANK C. MACH, Dillonvale, Ohio. Filed Oct. 20, 1927. Serial No. 227,524. 3 Claims. (Cl. 132—13.)



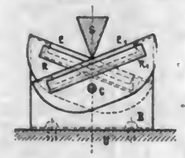
1. A fountain comb, comprising a back having a recess therein, extending laterally of the back and to the outer surface thereof teeth carried by said back, and having conduits therethrough communicating with said recess, and a presser plate fitting snugly in said recess to feed the contents of said recess through said conduits and adapted to be actuated by the fingers of the operator.

1,667,632. ROLL FOR SUGAR-CANE AND LIKE MILLS. WILLIAM MACKIE, Glasgow, Scotland. Filed Jan. 25, 1924, Serial No. 688,535, and in Great Britain Oct. 18, 1923. 1 Claim. (Cl. 100—47.)



In a mill for breaking, crushing and shredding sugar cane, fed side-on or end-on, co-operating horizontal rolls each having a crushing surface constituted by a series of equi-spaced acute-angled circular wedges each of the full diameter of the roll and each having two flanks equally and oppositely inclined to the plane of rotation and each of the same depth, and intermediate said wedges circular wedges each of less than the full diameter of the roll and each having two flanks equally and oppositely inclined to the plane of rotation, at the same inclination to said plane as the flanks of said first named wedges, adjacent wedges presenting between them V-shaped grooves differently spaced from the axis of the roll, a plane of rotation equi-spaced from the apexes of two adjacent wedges of the full diameter of the roll containing the bottom of the groove between two intermediate wedges, the said apexes and said groove bottom defining acute-angled imaginary wedge-surfaces having equally inclined flanks, the apexes of said intermediate wedges projecting beyond said imaginary surfaces and the bottoms of the grooves between said first named wedge and said intermediate wedges being nearer the axis of the roll than said imaginary surfaces, the apexes of all the wedges of one roll being coplanar with the bottoms of grooves formed in the other roll.

1,667,633. POWER SYSTEM. CAMPBELL MACMILLAN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed July 26, 1923. Serial No. 654,008. 2 Claims. (Cl. 172—280.)

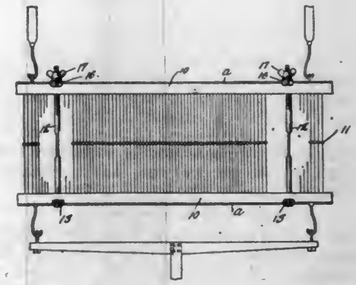


1. The combination of an induction motor comprising a rotor member having a high resistance winding and a low resistance winding arranged to have its terminals interconnected during normal operation, a plurality of contactors mounted within the rotor structure of said motor and arranged so that they will be unaffected by sudden acceleration or deceleration of the rotor structure and by centrifugal forces for interconnecting said terminals, and means external to said motor for controlling the energization of said contactors.

1,667,634. CURRENT MOTOR. JESSE R. MEEKINS, Marshalltown, Iowa. Filed May 10, 1927. Serial No. 190,296. 2 Claims. (Cl. 170—91.)

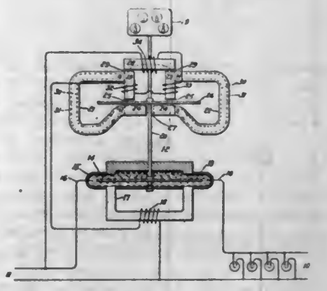
1. In a current motor and a housing, a frame, supports affixed to the frame, sprockets having shafts journaled in the supports, endless chains passing over the sprockets, feathering blades pivoted to the chains in spaced relation to each other, said blades being composed of two sections hinged together so that they may drop down into the current to propel the chains, and feather upon the chains on their return against the current, the hinge being so formed that the parts, when extended, abut edge to edge and are held rigidly in this position by the hinge, flexible connections for each blade further supporting the blades in a perpendicular position with relation to the rotating chain, said flexible connections being attached at one end to the hinge of the upper-most blade section, and extending in a direction reverse to the direction of movement of the chain, and being attached to the pivot of the next succeeding blade.

1,667,635. KNIFE-EDGE BEARING FOR WEIGHING APPARATUS. FRIEDRICH NAUSS, Vienna, Austria. Filed Apr. 14, 1927, Serial No. 183,859, and in Austria May 11, 1926. 4 Claims. (Cl. 308—2.)



4. A bearing block for a knife edge comprising in combination: a bearing-block, senting members having oppositely inclined surfaces mounted on said bearing block, and means for enabling said bearing members to turn about axes parallel to the oppositely inclined surfaces in such manner as to swing into true lineal contact with the knife edge, substantially as described.

1,667,636. CABLE GRIP. ARVID H. NERO, New Britain, Conn., assignor to The Arrow Electric Company, Hartford, Conn., a Corporation of Connecticut. Filed June 8, 1923. Serial No. 644,148. 10 Claims. (Cl. 173—322.)

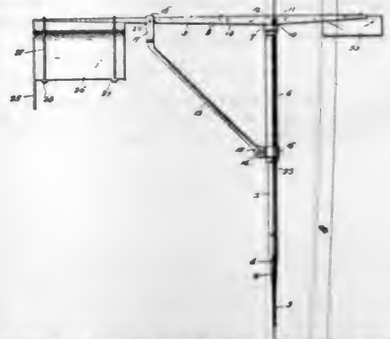


1. A pendent fitting comprising an element apertured to afford a cable entrance, in combination with a one-piece cable grip comprising a base secured to said fitting element and apertured in alignment with the cable entrance, a bushing lining said aperture, and a pair of cable-receiving jaws integral with the base and substantially axially aligned with the cable entrance of said fitting element and in extension thereof, and means for clamping said jaws upon an inserted cable.

1,667,637. LOOM ATTACHMENT. EDWARD A. PENNOYER, Greenville, S. C. Filed Aug. 29, 1924. Serial No. 734,086. 2 Claims. (Cl. 139—91.)

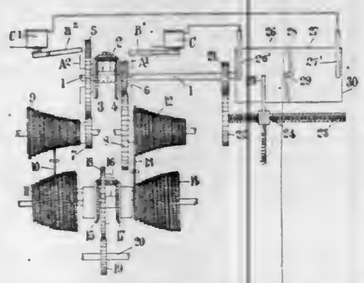
1. In combination with the heddle frame of a loom, rods extending transversely of the frame, hooks extending laterally from the rod for engagement over bars of the frame, means to connect one of the hooks with the rod to permit of longitudinal sliding adjustment of the hook upon the rod to adjust the hooks relative to one another and means to hold the slidable hook against independent outward movement.

1,667,638. ADJUSTABLE MAGNET DEVICE. HAROLD B. REX, Lynn, Mass., assignor to General Electric Company, a Corporation of New York. Filed July 29, 1927. Serial No. 209,375. 12 Claims. (Cl. 171—84.)



12. An integrating electric meter, a source of supply with which said meter is associated, a permanent magnet damping system for said motor, and electromagnetic means responsive to a variable condition of said source of supply for varying the damping effect of said permanent magnetic damping system.

1,667,639. COMBINED MAIL BOX AND SIGNPOST. ROBERT B. SMITH, Sargent, Nebr., assignor of one-half to George E. Steinhoff, Sargent, Nebr. Filed Apr. 9, 1927. Serial No. 182,466. 8 Claims. (Cl. 232—40.)

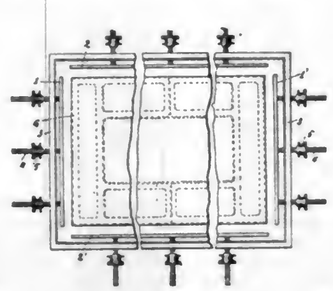


5. A device of the class described including a post, a sleeve fitted on the post for rotary adjustment, a service arm having narrow longitudinal side flanges pivoted to

the sleeve, a collar encircling the lower portion of the sleeve and having extended terminals, an inclined brace pivoted at its lower end between the ends of the collar

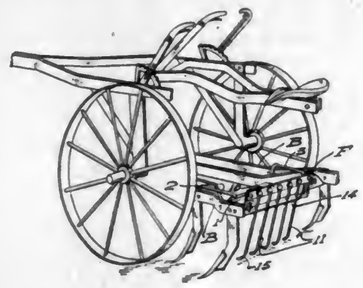
and having a forked upper portion adjustably secured to the flanges of the service arm, and a counterbalance weight secured between the said side flanges.

1,667,640. APPARATUS FOR THE CONVERSION OF MOTION ACCORDING TO ONE LAW INTO MOTION ACCORDING TO ANOTHER LAW. WILLIAM STROUD, Glasgow, Scotland, assignor to Barr and Stroud, Limited, Glasgow, Scotland. Filed Feb. 1, 1924, Serial No. 689,885, and in Great Britain Feb. 2, 1923. 5 Claims. (Cl. 74—34.)



1. Apparatus for the conversion, within the limits of a prescribed extent of movement, of motion according to one law into motion according to another law, comprising conversion mechanism of the rotary member type, operable for converting motion according to one law into motion according to another law, each such conversion mechanism being operable for conversion of a separate portion and one and the same portion only, of the prescribed extent of movement, the sum of the separate portions constituting the prescribed extent of movement, a driving element rotatable according to the prescribed extent of movement to be converted, means for transmitting from the driving element motion according to the portions of movement to be converted, each to its apportioned conversion mechanism respectively, separately and in succession, a driven element rotatable according to the prescribed extent of movement converted, and means for transmitting to the driven element motion according to the portions of movement converted, each from its apportioned conversion mechanism respectively, separately and in succession.

1,667,641. BEARING ALLOY. IRVING R. VALENTINE, Erie, Pa., assignor to General Electric Company, a Corporation of New York. Filed Sept. 25, 1925. Serial No. 58,502. 3 Claims. (Cl. 75—1.)



1. A bearing alloy comprising about 70 parts copper, a hardening metal, about 25 parts lead, and a fractional part of arsenic.

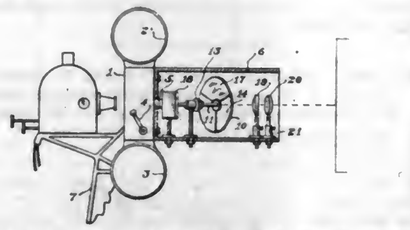
1,667,642. METHOD FOR PREVENTION OF CRACKING OF CASTINGS. CARLO VANZETTI, Milan, Italy. Filed Sept. 22, 1925, Serial No. 57,961, and in Italy Sept. 23, 1924. 5 Claims. (Cl. 22—96.)

2. A mold for large castings, comprising a frame; a plurality of plates provided in said frame; and means in said frame for actuating said plates in order to exert a pressure on the molding sand in the frame to thus force the sand to contract and move with the cooling of the casting.

1,667,643. CULTIVATOR ATTACHMENT. HERBERT W. WALDMANN, Concord, Wis. Filed Oct. 16, 1926. Serial No. 142,054. 2 Claims. (Cl. 97—179.)

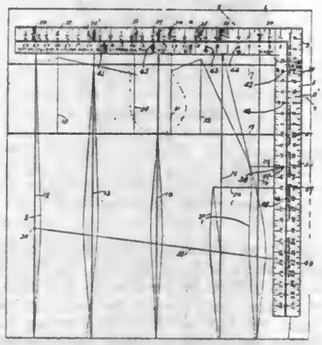
1. A cultivator attachment comprising a head member, arms connected with the head member and adapted to be attached to the beams of the cultivator, bolts carried by the head member and having end portions disposed beyond the side thereof, link members having slots which receive the bolts, nuts screwed upon the bolts and adapted to clamp the link members against the head member, upper and lower cross bars pivoted to the ends of the link members and bridging the space between them, the lower cross bar having an intermediate portion disposed in a plane at a right angle to the plane in which the intermediate portion of the upper cross bar lies, and teeth pivoted to the upper cross bar and loosely received in the intermediate portion of the lower cross bar.

1,667,644. FASTENER. HARRY ALPHONSE WIDMER, London, England, assignor of one-half to A. Lewis (Finsbury) Limited, London, England, a Company of Great Britain. Filed Oct. 9, 1926, Serial No. 140,659, and in Great Britain Sept. 24, 1926. 1 Claim. (Cl. 24—265.)



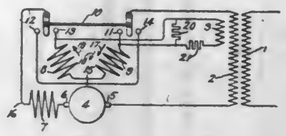
In a fastening for straps, shoes and the like, a loop in one member thereof, a strap end adapted to be adjusted passing through said loop and then bent back and passing

in and out of a series of transverse slits in the body of the strap wider than the bent back portion of the strap end so that flat surfaces of the strap the full width of



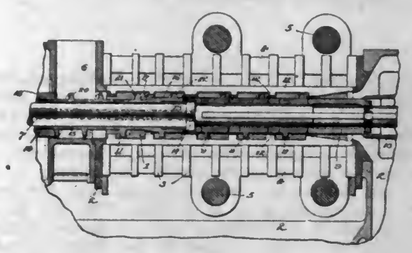
the strap end lie in contact with said end which is retained in position by friction when the strap is in use on the member on which it is fastened.

1,667,645. MOTION-PICTURE PROJECTOR. THEODORE F. YAGLE, Philadelphia, Pa. Filed Aug. 8, 1924. Serial No. 730,945. 3 Claims. (Cl. 88—16.6.)



1. An appliance for attachment to a motion picture machine which includes a direct picture projecting means, a casing for detachable connection to the frame of said machine, a shutter operable upon an axis at an acute angle to the axis of the lens tube of the direct picture projecting means, a projecting lens and color filter with its axis in direct alignment with the axis of the direct picture projecting means, said shutter being divided into three portions, an open section, a closed or covered section and a mirror or reflecting section, a complementary plano color filter in the casing to one side of the axis of the direct picture projecting means, and an adjustable mirror for receiving the reflection from the mirrored or reflecting section of the shutter and reflecting the picture through the plano color filter.

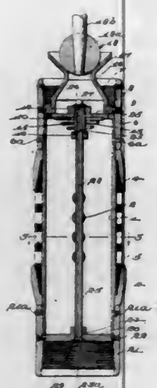
1,667,646. SQUARE FOR DESIGNING GARMENT PATTERNS. ANTOINETTE ZINGALI, New York, N. Y. Filed Oct. 29, 1925. Serial No. 65,551. 2 Claims. (Cl. 33—16.)



1. A square for designing garment patterns, comprising a right angled body having each of its members provided with a central division line and graduated in inches on each side of said line throughout its length, one member having along its outer edge two sets of differently colored marks, one set of marks being between the other set and spaced different distances from the edge and the other member having on its outer edge two sets of differently colored marks, one set of marks being beyond the first set and spaced a less distance apart than the first set, whereby vertical and horizontal construction lines of a garment may be produced, each member of the square being provided on its inner edge with colored marks and one member being provided with two marks of a different color and located between two of the first named marks, whereby the vertical and horizontal construction lines of a sleeve may be produced.

1,667,647. ELECTRIC MOTOR. ERNST F. W. ALEXANDERSON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 11, 1925. Serial No. 14,822. 7 Claims. (Cl. 172—276.)

1. An electric motor comprising an armature winding provided with a commutator and a field winding characterized by the fact that said field winding includes a group of parallel connected coils arranged to be connected in series with said armature winding for producing the compensating field of said motor, a second group of coils arranged to be connected in series with said armature and compensating windings to produce an exciting field for driving said motor in one direction, and a third group of coils angularly displaced from said second group of coils and arranged to be connected in series, with said armature and compensating windings to produce an exciting field for driving said motor in the opposite direction all of said coils having uniform end connections.



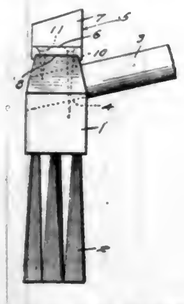
1,667,648. PRESS. RAYMOND T. ANDERSON, Cleveland, Ohio, assignor to The V. D. Anderson Company, Cleveland, Ohio, a Corporation of Ohio. Filed June 28, 1926. Serial No. 119,184. 2 Claims. (Cl. 100—48.)

2. In a press of the character specified, the combination of a shell; a feed hopper located at one end thereof; a shaft extending through the hopper and the shell; a series of spaced pressing worms mounted upon the shaft adjacent the discharge end of the press and rotatable therewith; a quill encircling the shaft adjacent the intake end of the press, said quill at its inner end being enlarged in external diameter and connected to the forward portion by an inclined face; a feed worm formed upon the exterior of the quill adjacent the intake end of the press; a combined feeding and pressing worm located

between the last named flight or worm and the inclined face, aforesaid; and a pressing worm mounted upon the quill at its inner end where its external diameter is enlarged, said feeding flight, feeding and pressing flight, and pressing worm being likewise spaced apart.

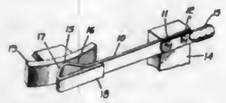
1,667,649. DEVICE FOR CEMENTING WELLS. ALEXANDER BOYNTON, San Antonio, Tex. Filed Dec. 4, 1925. Serial No. 73,189. 3 Claims. (Cl. 166—1.)

1. A device for cementing wells including a combined back pressure valve seat and seat for a differential float and valve comprising a flange, and a double conical member connected with the flange.



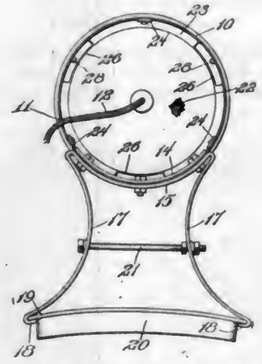
1,667,650. THEFT SIGNAL SWITCH. JAMES P. BRADLEY and OMRI A. PROUGH, Weed, Calif. Filed Apr. 29, 1925, Serial No. 26,798. Renewed Feb. 6, 1928. 1 Claim. (Cl. 200—52.)

A theft alarm for a motor vehicle comprising an alarm circuit, a casing connected with one part of the circuit and having a longitudinal slot, a plunger in the casing formed of non-conducting material, a groove in the plunger adapted to register with the slot, a headed pin carried by the plunger in the groove and movable in the slot, said headed pin being connected with the other part of the circuit, a lip at one end of the slot turned into the groove for engaging one end thereof to limit the movement of the plunger in one direction, and a spring in the cylinder for engaging the plunger to retain the head of the pin in contact with a part of the cylinder when the plunger is in projected position and means for normally holding the plunger in retracted position.



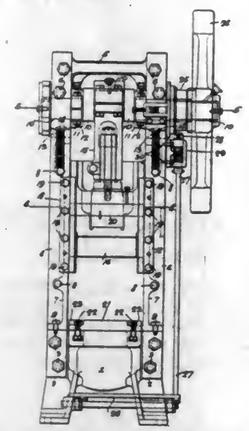
1,667,651. HAMMER ATTACHMENT FOR PAINT-BRUSHES. WILLIAM A. BRADY, Ohiopyle, Pa. Filed Nov. 26, 1926. Serial No. 150,952. 4 Claims. (Cl. 145—29.)

1. A device of the character set forth, comprising a mount provided with an eye, a handle having one end positioned in the eye, a head having an elongated base and a poll projecting from the base, the head being positioned on the mount with its base in contact there-



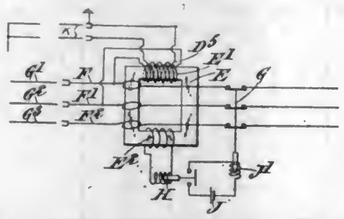
with and with the face of its poll in substantially parallel relation to the eye, and attaching means engaging the base and mount.

1,667,652. CONTACT FINGER. FRANK E. CASE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 22, 1925. Serial No. 25,151. 3 Claims. (Cl. 200—166.)



1. A contact finger comprising a metal strip having a free end bent to form an intermediate offset contact portion with diverging sides and provided with means for maintaining the said diverging sides of the offset portion in operative relation when the contact portion wears through.

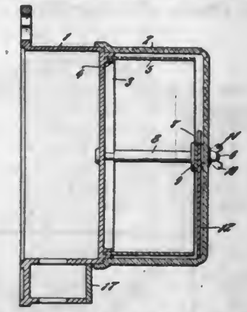
1,667,653. SIGNALING DEVICE FOR VEHICLES. ROBERT CIZEK, Francis Creek, Wis. Filed Mar. 26, 1925. Serial No. 18,578. 1 Claim. (Cl. 248—20.)



In a support for attaching signal lights to the fenders of vehicles, a single strip of resilient material having its central portion shaped to conform to the shaping of the wall of the signal light means for securing the strip to a signal light, the ends of the strip standing downwardly and diverging from one another and having opposed hooks formed upon their lower ends and means engaging the legs intermediate the ends thereof for constructing the legs to draw the hooks to one another to engage with the opposite side edges of the fender.

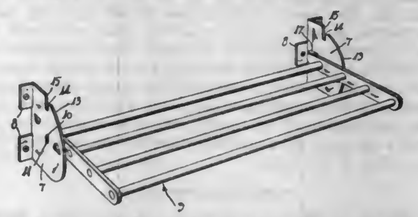
1,667,654. TRIMMING PRESS. EUGENE C. CLARKE, Chambersburg, Pa., assignor to Chambersburg Engineering Company, Chambersburg, Pa., a Corporation of Pennsylvania. Filed June 30, 1925. Serial No. 40,708. 4 Claims. (Cl. 164—23.)

1. A frame comprising a base, a yoke, tie bars secured both to the frame and the yoke and maintaining the yoke vertically spaced with respect to the base, reinforcing separators secured between the respective pairs of tie bars, journal elements operatively associated with the yoke, and jacks adjustably supported by the separators and engaging the under sides of said journal elements.



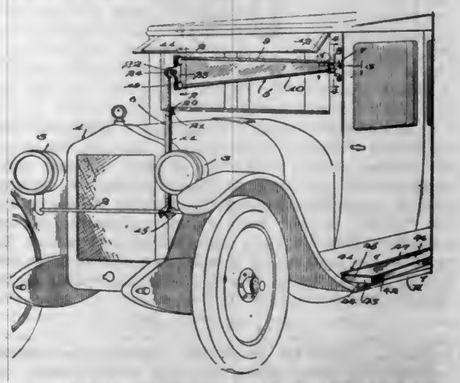
1,667,655. CONTROLLING OR TRIPPING APPARATUS FOR ALTERNATING-CURRENT ELECTRIC CIRCUITS. HENRY WILLIAM CLOTHIER, Wallsend-on-Tyne, and WILLIAM ANTHONY AMBROSE BURGESS, Monkseaton, England, assignors to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England, a Company of Great Britain. Filed Sept. 17, 1925, Serial No. 57,014, and in Great Britain Oct. 3, 1924. 2 Claims. (Cl. 175—294.)

2. In an electric protective arrangement for a three-phase trailing cable between an electromagnetically-controlled switch and electrical apparatus, the combination with the earthed pilot circuit of the cable, of an electromagnetic tripping device for the switch including an earth-leakage or core-balance transformer through which the three phase conductors pass from the switch, said transformer being provided with three windings, a primary winding connected between two of the phases, a secondary winding, and an auxiliary winding normally short-circuited by the earthed pilot circuit and acting in conjunction with the secondary winding to control the switch.



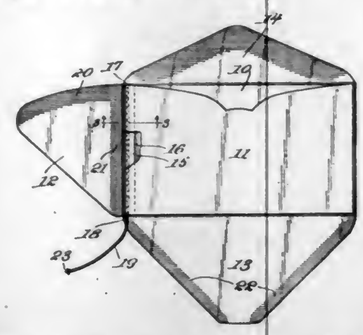
1,667,656. ANTITHEFT ATTACHMENT FOR METERS. WALTER A. DILZELL, New Orleans, La. Filed Aug. 16, 1926. Serial No. 129,627. 2 Claims. (Cl. 171—84.)

1. In combination with the base and cover of a meter, the base having an annular groove therein adjacent its point of junction with the cover, a cylinder within the cover and having one end entering the groove, the other end of the cylinder being spaced a short distance from



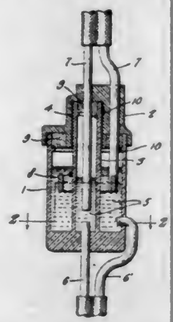
the closed end of the cover, bolts for connecting the cover with the base and means on the cylinder engaged by the bolts for holding the cylinder in place.

1,667,657. WALL TABLE, SHELF, OR RACK. FRANK C. DOBERT, Rutherford, N. J., assignor to Amelia Kretzmer, Clifton, N. J. Filed Apr. 29, 1926. Serial No. 105,579. 3 Claims. (Cl. 211—96.)



1. A device of the character described comprising a pair of brackets each having a vertical slot and a notch above the slot, and a member between the brackets having portions in said slots for hingedly mounting said member, and having other portions to move downwardly into said notches when said member is swung to an upwardly extending position, said brackets having portions for the contact of said member when it is swung downwardly to substantially horizontal position for supporting said member in such position.

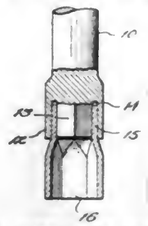
1,667,658. GLARE SHIELD. HARRY GODFREY EGLEY, Morris Plains, N. J. Filed Apr. 6, 1925. Serial No. 21,028. 7 Claims. (Cl. 296—97.)



1. In a glare shield for vehicles, a tapering shield body, means for securing the smaller end of the body to the vehicle body, and means for securing the larger end of the shield body to the vehicle in front of the body thereof.

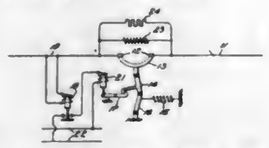
1,667,659. ENVELOPE OPENER. LEWIS WM. ENDER, Fountain City, Wis. Filed Oct. 24, 1925. Serial No. 64,640. 2 Claims. (Cl. 229—86.)

1. An envelope comprising a body, an end flap of substantially the same size as the body and folded over upon the rear face of the latter, an attaching flap extending along the outer edge of the end flap and folded inward and secured to the adjacent end of the body, a relatively small end flap extending from the end of the body opposite the first mentioned flap and folded upon the latter, a flexible member looped over the first mentioned flap and extending downward between the flaps below the envelope, said relatively small flap being sealed along its top and inner edge, a bottom flap sealed upon the end flaps and enclosing the ends of the flexible member with the extremities of the latter extending outward to provide a gripping portion and a closure flap extending from one edge of the body.



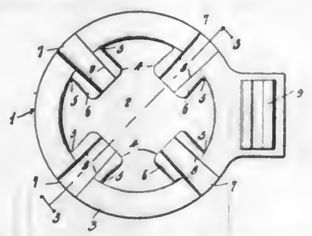
1,667,660. LIQUID CONTACT CONNECTER. EUGENE H. GEHM, Stockton, Calif. Filed Jan. 27, 1927. Serial No. 164,048. 2 Claims. (Cl. 173—324.)

1. An electric connecter comprising a stationary casing having a central tubular portion, both the casing and the tubular portion containing mercury and said parts being formed of non-conducting material, a movable cover of non-conducting material covering the casing and the tubular portion and rotatably mounted thereon, conductors extending into the tubular portion and the casing at the bottom thereof and a pair of conductors carried by the cover and extending into the mercury in the tubular portion and in the casing.



1,667,661. SOCKET WRENCH. JACOB F. GRASLEY, Zanesville, Ohio. Filed Apr. 18, 1925. Serial No. 24,199. 1 Claim. (Cl. 81—121.)

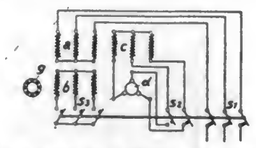
A tool comprising a bar provided with a rectangular tool engaging portion upon one end, a sleeve of enlarged dimensions being carried upon the opposed end of the bar, and a lug projected from the bar and within the sleeve being adapted to provide a recess therebetween within which may be received the attaching portion of



a socket wrench to preserve the corners thereof and to prevent bulging which frequently results in loose fitting connections.

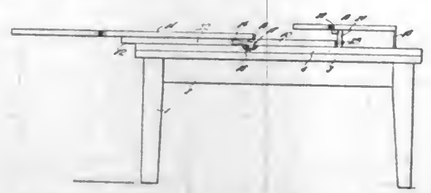
1,667,662. PROTECTIVE ARRANGEMENT. HENRY S. HOLBROOK, Rugby, England, assignor to General Electric Company, a Corporation of New York. Filed Feb. 11, 1926, Serial No. 87,724, and in Great Britain Feb. 14, 1925. 2 Claims. (Cl. 175—294.)

1. In combination, a circuit, a current limiting inductive reactance therein, a switch permanently connected across the reactance and arranged when closed to shunt the same, means responsive to a predetermined overload on the circuit for tripping open the switch, and a resistance connected in shunt with said reactance.



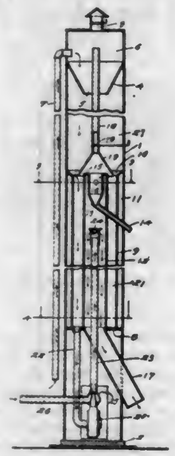
1,667,663. ASH TRAY. BERNARD J. HOOS, Baltimore, Md. Filed Apr. 24, 1926. Serial No. 104,420. 1 Claim. (Cl. 131—51.)

An ash tray comprising a hollow dish having a relatively thick marginal side wall, projections extending inwardly from said wall, grooves provided through said wall and projections, said grooves decreasing in width inwardly, and the inner portions of the projections being cut away downwardly and inwardly.



1,667,664. COMPENSATED INDUCTION MOTOR FOR SINGLE OR POLYPHASE ALTERNATING CURRENT. FRIEDRICH KADE, Kiel, Germany, assignor to Deutsche Werke Kiel Aktiengesellschaft, Kiel, Germany, a Corporation of Germany. Filed June 20, 1925, Serial No. 38,578, and in Germany June 25, 1924. 2 Claims. (Cl. 172—274.)

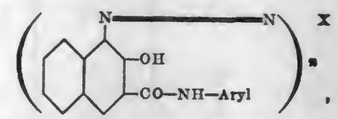
1. A compensated induction motor, having a main stator winding adapted to be connected with the mains, a polyphase auxiliary stator winding, a commutator, brushes on the commutator adapted to be connected with said auxiliary stator winding, a polyphase commutator winding, said commutator winding and said auxiliary stator winding forming the exciting circuit of the motor, a working winding on the rotor provided with short-



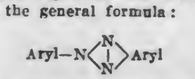
circuiting contacts, an auxiliary squirrel cage starting winding, and controlling means adapted to successively connect the several phases of the said exciting circuit.

1,667,665. COMBINED IRONING BOARD AND TABLE. HARVEY W. KLINGENSMITH, Reynoldsville, Pa. Filed Feb. 12, 1926. Serial No. 87,896. 1 Claim. (Cl. 68—10.)

A table having its top made up of sections, one of said sections being hingedly connected to one of the sections and adapted to be swung over said section when in operative position, a rail having beveled edges centrally fixed on the under face of the hinged section, an ironing board arranged over the rail, a pair of spaced cleats on the under face of the ironing board having their inner edges beveled to slidably engage with the beveled edges of the rail to hold the board on the swingable top section to permit of longitudinal movement of said board on said top section, and latching means for limiting the outward sliding of the board on the said table top section.



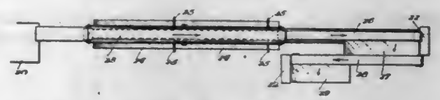
1,667,666. PROCESS AND APPARATUS FOR DRYING HAY, GRAIN, AND THE LIKE. ARTHUR W. KOON, Schriever, La. Filed Mar. 30, 1926. Serial No. 98,538. 12 Claims. (Cl. 34—34.)



1. A drying apparatus having inner and outer chambers, a blower, a pipe communicating with one of the chambers and with the discharge port of the blower, a second pipe communicating with the other chamber and with the intake port of the blower, means for feeding material to said last named chamber, and a pipe for conducting a heating medium into said first pipe.

1,667,667. AZODYESTUFFS AND PROCESS OF MAKING SAME. AUGUST LEOPOLD LASKA and ARTHUR ZITSCHER, Offenbach-on-the-Main, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort, Germany. Filed Sept. 10, 1925, Serial No. 55,628, and in Germany Oct. 3, 1924. 3 Claims. (Cl. 260—95.)

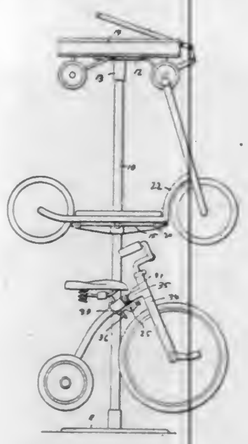
1. As new compounds azodyestuffs, having probably the general formula:



in which formula X represents the residue of a pseudoazimino body of the general formula:

and n is either 1 or 2, which dyestuffs are when dry scarlet red to black violet powders, soluble in sulfuric acid to a red, violet to blue solution, yielding on reduction with stannous chloride an aminopsendoazimino body and an arylid of 1-amino-2-hydroxy-3-naphthoic acid, which dyestuffs are adapted for the production of valuable color lakes, when mixed with the usual substrata, and dye when produced on the fiber, the vegetable fiber in scarlet red to dark violet shades of an excellent fastness, especially to kier boiling.

1,667,668. APPARATUS FOR MANUFACTURING MATCHED FLOORING. CLARKE R. MCLAUGHLIN, Longville, La. Filed July 16, 1926. Serial No. 122,988. 2 Claims. (Cl. 143—92.)

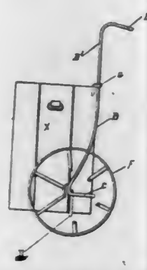


1. In an apparatus for the manufacture of matched flooring of the type described, including side and end matchers between which the flooring strips are conveyed and saw tables between the side and end matchers having saws for the removal of knots and imperfections, a conveyor for receiving flooring strips from the side matcher and extending above the saw tables, and a second conveyor leading to the end matchers and having a portion thereof arranged beneath the saw tables and vertically spaced below the first mentioned conveyor.

1,667,669. DISPLAY STAND. JOSEPH W. MEGEE, Tulsa, Okla. Filed Sept. 14, 1925. Serial No. 56,308. 1 Claim. (Cl. 211—24.)

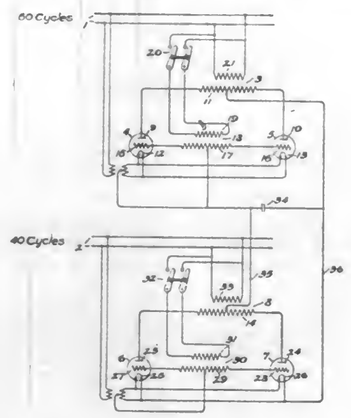
A bracket adapted to be used with a vertical support comprising a sleeve adapted to be mounted for vertical and rotatable adjustment on the support and having a radial arm, said arm having at its end a terminal sleeve horizontally disposed, a second arm mounted in the horizontally disposed sleeve and being angular and capable for positioning with one of its its steme extending downwardly or upwardly or horizontally in a general radial direction from the standard, means carried by the second sleeve for holding the second arm in any one of its aforesaid positions, a threaded sleeve on the

stem of the second arm and having a yoke to straddle a bar of a velocipede, means for holding the third sleeve in



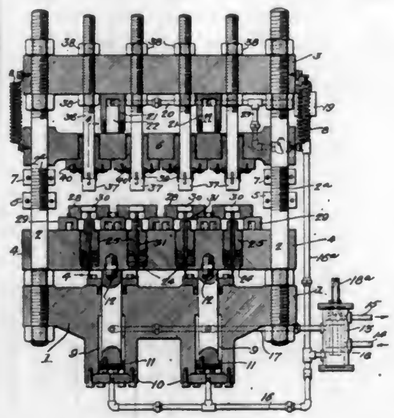
different positions on the stem, the third sleeve having an extension with an opening to receive a saddle post of the velocipede, thereby holding the latter on display.

1,667,670. BOILER COMPOUND. WILLIAM M. NEELEY, Amarillo, Tex., assignor to Neeley Chemical Company, Amarillo, Tex., a Corporation of Nevada. Filed Dec. 9, 1926. Serial No. 153,732. 1 Claim. (Cl. 87—27.)



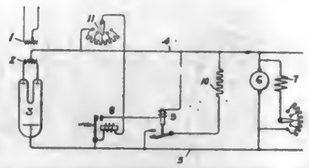
A boiler compound consisting of one gallon of water glass, one and one-half gallons of caustic soda, one gallon of tannic acid, three gallons of soda ash, and a quantity of water sufficient to make a batch of fifty gallons.

1,667,671. TRUCK. FREDERICK R. NIES, Lynn, Mass. Filed May 25, 1926. Serial No. 111,655. 5 Claims. (Cl. 280—53.)



1. A hand truck comprising a pair of wheels and an axle therefor formed with an intermediate bent portion for supporting a load, a frame for the truck bent to provide spaced side bars and a transverse supporting bar, said frame having portions thereof above the side bars lying together to provide a shank, and the ends of the frame being bent outwardly to form handles for the truck, said transverse supporting bar being off-set from the lower ends of the side bars, and engaging about and connected with the horizontal bearing portions of the axle, and said supporting bar and the bent portion of the axle cooperating to form a pocketing device for the load.

1,667,672. FREQUENCY CHANGER. SAMUEL P. NIXDORFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 22, 1926. Serial 137,155. 5 Claims. (Cl. 172—281.)

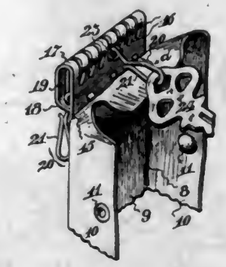


1. The combination of a plurality of circuits operated at different frequencies, space discharge apparatus provided with a plurality of cathodes and anodes connected between said circuits, and electrostatic control means operable to change the direction of power transmission between said circuits.

1,667,673. MOLDING MACHINE. CHARLES H. PEIRSON and WILLIAM A. BOHNE, Philadelphia, Pa., assignors to E. F. Houghton & Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 12, 1926. Serial No. 128,828. 6 Claims. (Cl. 69—8.)

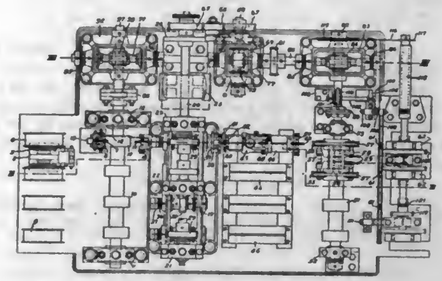
1. The combination in a machine for molding cups of leather and like material, of a fixed die; a movable die for forming a cup around the fixed die; a second movable die cylindrical in form and arranged to press the edge of the cup to size; a stop to limit the movement of the first movable die; fluid pressure mechanisms for said movable dies; a valve for controlling the flow of an actuating fluid to said mechanisms; and a pressure valve in the line leading to the fluid pressure mechanism of said second movable die adapted to be operated automatically by increased pressure when the cup-forming movement of the first movable die is interrupted by the stop, whereby the second movable die will be actuated to compress the edges of the cup to size.

1,667,674. SYSTEM OF DISTRIBUTION. OTHMAR POLLOK, Berlin-Halensee, Germany, assignor to General Electric Company, a Corporation of New York. Filed May 9, 1925. Serial No. 29,201, and in Germany July 18, 1924. 5 Claims. (Cl. 171—97.)



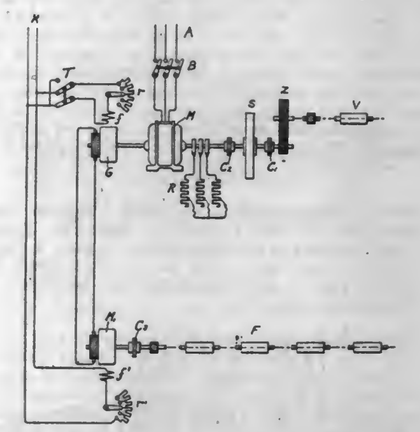
1. In a system of distribution a source of alternating current, a direct current consumption circuit, a rectifier connected therebetween, a resistance element associated with said rectifier, and means operable in response to slight variations in the voltage of said direct current circuit for effecting the connection of said resistance element to said rectifier in shunt to said direct current circuit.

1,667,675. ACCELERATOR FOR HARDENING PHENOL UREA PRODUCTS. HOWARD VINCENT POTTER and JOHN WILLIES CRUMP, Birmingham, England, assignors to The Damard Lacquer Company Limited, London, England, a British Company. Filed Sept. 11, 1926. Serial No. 134,938, and in Great Britain Oct. 23, 1925. 2 Claims. (Cl. 260—4.)



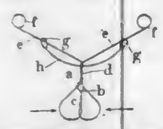
1. In the manufacture of hard synthetic resin bodies by the process according to which an intermediate product is produced by the condensation of a phenol, a urea and an aldehyde in the presence of a substantial proportion of the phenol and by subsequently dehydrating the resulting product, the step of treating said intermediate product in the cold with a hardening agent having an acid reaction.

1,667,676. KEY CASE OR PURSE. CHARLES S. PRICE, Bethlehem, and FRED WEINDEL, Jr., Allentown, Pa., assignors to L. F. Grammes & Sons, Inc., Allentown, Pa., a Corporation of Maryland. Filed July 21, 1924. Serial No. 727,194. 7 Claims. (Cl. 150—40.)



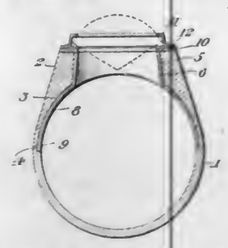
1. In a key case of the type described the combination of a holder member having a portion apertured and retroverted to afford a series of elongated slots having enlarged inner ends, and a complemental series of key-attaching clips having helico-volute heads pivoted in said slots with capacity for individual removal and universal movement over a relatively long range.

1,667,677. WIRE-COILING MACHINE. HEINRICH MARTIN HUBERT REUFEL and HENDRIK DE JONG, Eindhoven, and WILLEM GUSTAAF FREDERIK WENTINK, The Hague, Netherlands, assignors to General Electric Company, a Corporation of New York. Filed Dec. 17, 1924, Serial No. 756,564, and in the Netherlands Jan. 28, 1924. 12 Claims. (Cl. 153—67.)



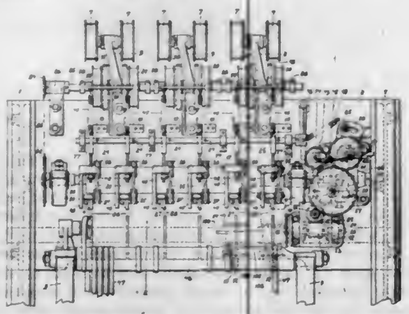
1. In a coiling machine the combination with a winding head of a pair of mandrel wire feed members mounted with said winding head between them and movable to pass the mandrel wire longitudinally through said head and means for positively driving both of said members at such relative speed as to cause both members to move the mandrel wire at the same speed.

1,667,678. ELECTRIC ROLLING-MILL DRIVE WITH LEONARD CONTROL. ERNST RIECKE, Charlottenburg, Germany, assignor to General Electric Company, a Corporation of New York. Filed May 20, 1926, Serial No. 110,558, and in Germany June 30, 1925. 3 Claims. (Cl. 80—31.1.)



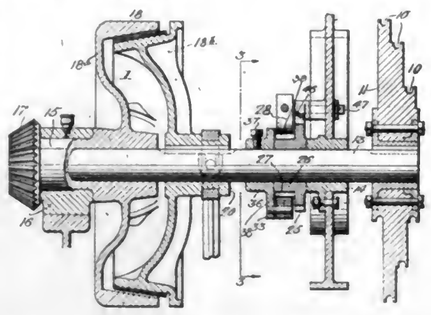
3. In combination in a drive for rolling mills and the like, a substantially constant speed stand, an alternating current motor for driving the same, a flywheel driven by said motor, a connection between said stand and said motor arranged to connect said motor in driving relation with said stand or disconnect the same therefrom, a variable speed stand, and a Leonard drive for said variable speed stand comprising a separately excited generator driven by said motor and a separately excited motor connected to said variable speed stand and supplied with armature current from said generator.

1,667,679. DEVICE FOR SUPPORTING TIES. JEAN ROURA, Nerac, France. Filed Dec. 17, 1926, Serial No. 155,529, and in France Sept. 18, 1926. 6 Claims. (Cl. 24—57.)



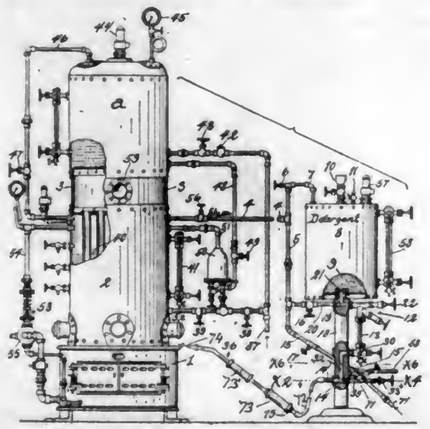
1. A device for supporting ties, made of a metallic spring wire and comprising on said wire, a loop similar to the spring tongs, means to open and close the two branches of the loop, two arms diverging from said means, a distinctive cross piece fitting on said two arms by two terminal slides, on said cross piece, a stop on each arm for said slides.

1,667,680. RING. ACHILLE SAMMARTINO, Providence, R. I. Filed Sept. 24, 1926. Serial No. 137,550. 2 Claims. (Cl. 63—15.)



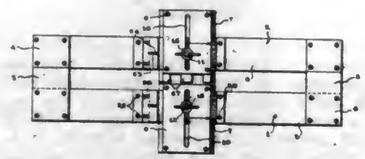
1. A ring having a hollow base which is widened outwardly from the shank of the ring, the shank of the ring from the opposite sides of the base being cutaway and the said shank having depressions that communicate with the said cut-away portions, a lining for the shank, including a box-like portion that is received in the opening in the base, and having an outstanding flange to overlie the base, the opposite sides thereof being arched to be received in the said cut-away sides of the shank and the ends of the said arched portions having tongues to be received in the depressions in the shank, a bezel arranged over the base of the ring and the box-like portion and a box over the bezel and said lining, said bezel being soldered to the base of the ring and to the lining, and said box having a flanged portion which rests on and which is soldered to the bezel.

1,667,681. WIRE-COILING MACHINE. RICHARD SHEPHERD and WALTHER DALHEIMER, Eindhoven, Netherlands, assignors to General Electric Company, a Corporation of New York. Filed Dec. 3, 1924, Serial No. 753,738, and in the Netherlands Jan. 29, 1924. 11 Claims. (Cl. 153—67.)



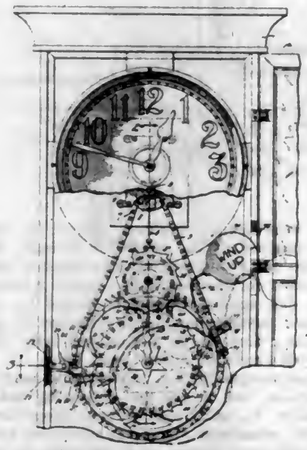
1. In a coiling machine, the combination with a rotary winding head, of means for directing a mandrel wire through said head, and a driving member in positive driving engagement with said unwound mandrel wire as it passes into and with the wound mandrel wire as it leaves said winding head.

1,667,682. BRAKE FOR PILE-WIRE-CONTROLLING MECHANISM FOR LOOMS. WILLIAM E. SMITH, Milltown, N. J., assignor to Gulbenkian Seamless Rug Company, New Brunswick, N. J., a Corporation of New Jersey. Filed Aug. 3, 1926. Serial No. 126,899. 5 Claims. (Cl. 139—42.)



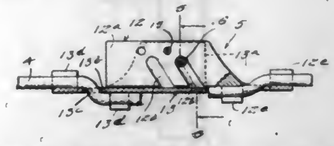
1. In pile wire controlling mechanism for looms having a reciprocating carriage, a rope motion for moving said carriage inward with respect to said loom, and means for moving said carriage outward with respect to said loom, said rope motion including a shaft adapted to be rotated in a direction to move said carriage inward, and to rotate freely in a reverse direction when the carriage moves outward, means operable by the reverse movements of said shaft, adapted to oppose the rotation of said shaft when the carriage is moving outward and to permit rotation of said shaft free of the said opposition when the carriage is moving inward.

1,667,683. APPARATUS FOR CLEANSING AND DISINFECTING. ALFRED H. THOMPSON and RUSSELL F. THOMPSON, Los Angeles, Calif. Filed Dec. 1, 1924. Serial No. 753,392. 3 Claims. (Cl. 299—84.)



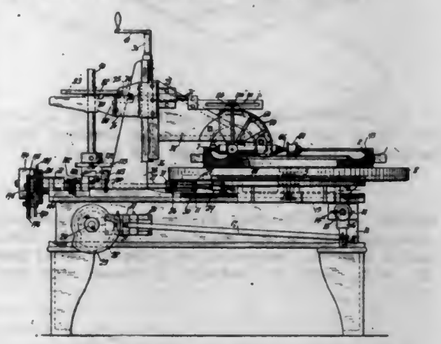
1. A cleansing apparatus comprising a detergent chamber; a mixing chamber; means for delivering detergent from the detergent chamber to the mixing chamber; a steam generator; a source of cold water supply; a manifold connected to the steam generator and to the top of the detergent chamber; a valve in the manifold between the steam pipe and the top of the detergent chamber; a valved pipe between the manifold and the bottom of the detergent chamber; a bottom valved pipe from the manifold below the connection to the bottom of the detergent chamber; a nozzle connecting said bottom valved pipe from the manifold to the mixing chamber; means for supplying a regulated flow of detegent from the detergent chamber to the mixing chamber; means for supplying a regulated flow of cold water from the cold water supply to the mixing chamber; and means for discharging mixture from the mixing chamber.

1,667,684. CAR BODY AND TRUCK GAUGE. WILLIAM ORAN TRIMBLE, Phalanx Station, Ohio, assignor of one-third to Frank Cappellin and one-third to Charles J. Cappellin, Niles, Ohio. Filed Apr. 28, 1926. Serial No. 105,237. 7 Claims. (Cl. 33—180.)



1. A car body and truck bolster gauge consisting of a pair of elements of which one is provided with means for determining the relative planes of the central plate and side bearings of a car body and the other provided with means for determining the relative planes of the central plate and side bearings of a truck bolster, the two elements being engageable with each other after setting to determine the relative planes of the central plates of the body and bolster.

1,667,685. CLOCK ATTACHMENT. WILLIAM B. ATKINSON, Bowling Green, Ky.; Bowling Green Trust Company, executor of said William B. Atkinson, deceased, assignor to A. G. Schwab & Sons, Cincinnati, Ohio, a Partnership composed of Julian G. Schwab, Louis Lange, and Herbert C. Schwab. Filed Nov. 10, 1923. Serial No. 673,958. 5 Claims. (Cl. 58—5.)

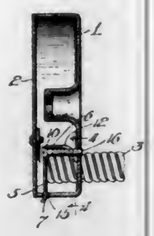


1. A propelling and calendar attachment for a clock including a spring actuated motor having a driving wheel, said wheel having spaced pins thereon, a shaft in the clock movement for propelling the same, means transmittingly connecting said wheel and shaft, a peripheral toothed calendar dial rotatably mounted adjacent said wheel, and dial advancing means intermediate said wheel and dial adapted to be engaged by successive pins, and engageable with successive teeth of said dial, whereby said dial is moved in synchronism with said clock movement.

1,667,686. ANTISKID DEVICE FOR AUTOMOBILE WHEELS. WILLIAM BENIEN and JAMES I. FLAHERTY, Lincoln, Kans. Filed Feb. 4, 1926. Serial No. 85,987. 2 Claims. (Cl. 24—123.)

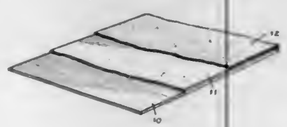
1. In an anti-skid device, links for connecting the cross members of the device to the side members thereof and consisting of solid bodies provided in their outer ends with recesses for the reception of the terminals of the cross members, pivots connecting the links to the cross members, the links being provided adjacent their inner ends with openings for the reception of the side members and provided with slots extending from the openings to their inner ends to permit the side members to be inserted in the openings, the openings and slots being arranged in parallel relation to the pivots, and bolts passing through the links inwardly beyond the openings for clamping together those portions of the links located inwardly beyond the openings and at opposite sides of the slots.

1,667,687. MOLD-ENGRAVING MACHINE. ANDREW J. FLEITER and THEODORE A. MILLER, Akron, Ohio, assignors to The Akron Standard Mold Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 30, 1926. Serial No. 98,477. 42 Claims. (Cl. 90—13.7.)



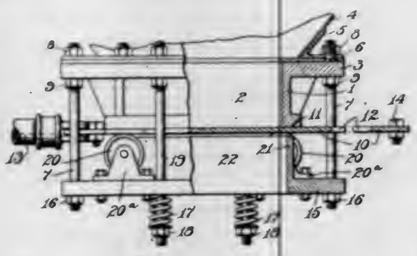
1. In a machine for automatically cutting repetitions of a pattern in a tire mold, a turntable for supporting the mold, a cutter over the turntable, intermittently operative means to reciprocate the cutter and to oscillate the mold simultaneously, turntable rotating mechanism adapted to move the mold for the next pattern, and mechanism to cause the last named mechanism to operate during the pauses in the operation of the first named means.

1,667,688. CLAMP FOR CONNECTION BOXES. WILLIAM GOETZELMAN, Chicago, Ill., assignor to Appleton Electric Company, a Corporation of Illinois. Filed Aug. 30, 1926. Serial No. 132,649. 2 Claims. (Cl. 247—25.)



1. The combination with a connection box having a hole in the bottom near a side wall, an angle plate arranged within the box and having one wing parallel and spaced

apart from the bottom wall and the other wing parallel with the side wall and extending from the inner end of said first wing toward said bottom wall, a screw passing through the first wing and the bottom wall, said side wall and the free end of the first wing having cooperating means interlocked with each other to form a rocking con-



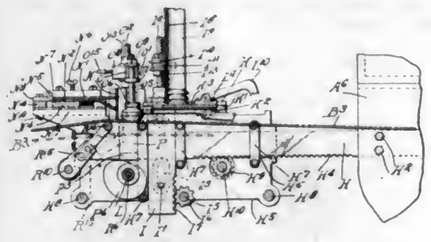
nection, the free edge of the second wing being bent toward the side wall somewhat above said bottom wall to form a lip to engage a conduit extending through said hole, and there being in said first wing a hole in alignment with and of about the same size as said hole in the bottom wall.

1,667,689. TRANSFER MEDIA. WILLIAM F. GRUPE, Lyndhurst, N. J., assignor to Peerless Roll Leaf Co., Inc., New York, N. Y., a Corporation of New York. Filed May 24, 1926. Serial No. 111,170. 7 Claims. (Cl. 41—33.)

1. A transfer medium, the combination of a carrier strip and a layer of metallic powder admixed with a condensation product of aldehyde and phenol.

1,667,690. SAND GATE. ROLLIE HAMM, Indianapolis, Ind., assignor to Indiana Gravel Company, Indianapolis, Ind., a Corporation of Indiana. Filed Sept. 22, 1926. Serial No. 137,069. 5 Claims. (Cl. 221—145.)

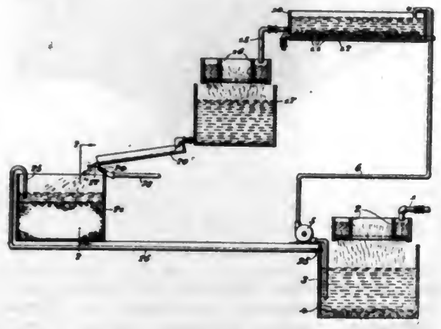
1. In a storage bin for wet sand, the combination with a hopper having a discharge throat, of a transversely movable gate slidable across the face of said throat, and resiliently supported rollers bearing on the under side of said gate and holding the same clamped against the face of said throat sufficiently tight to seal the throat against the escape of sand while permitting the escape of water.



1,667,691. PROOFED PAPER. JAMES REID, Mount Vernon, N. Y., assignor to The Scutan Company, a Corporation of Delaware. Filed Nov. 26, 1926. Serial No. 150,868. 13 Claims. (Cl. 91—70.)

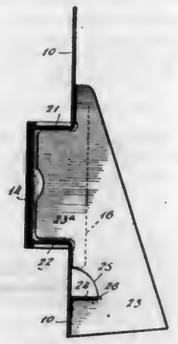
1. A process of proofing close-grained paper of substantial strength and flexibility without destroying such flexibility and strength, which comprises the steps of passing a sheet of such paper through a bath of relatively high melting point proofing material of a bituminous nature heated to a temperature substantially above 250° F., and until the bath is liquid but still viscous, and removing the sheet from the bath before it is saturated with the proofing material.

7. As a new product, a highly flexible sheet of close grained fibrous cellulosic material a surface layer of which is infused with a bituminous proofing material which has a melting point above 250° F. and which has a layer which is non-infused, the infused layer being substantially non-tacky at atmospheric temperatures.



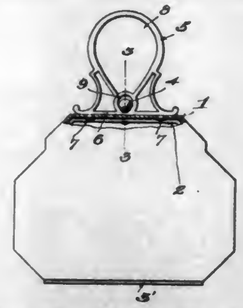
1,667,692. BISCUIT-HANDLING MACHINE. FERDINANDO G. SALERNO, Chicago, Ill. Filed July 18, 1927. Serial No. 206,744. 38 Claims. (Cl. 107—1.)

1. In a sandwiching machine, means for advancing the lower member of the sandwich through such machine, a stop adapted to engage and position said lower member, means for positioning an upper member above said lower and against said stop, means for discharging the upper member and for superposing it upon said lower member, and means for subsequently advancing the completed sandwich beyond said stop.



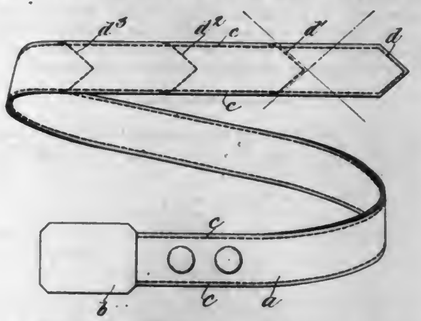
20. In combination with a sandwiching machine having a conveyor and means for delivering lower sandwich members to said conveyor, a supporting frame longitudinally adjustable along said conveyor, stop means positioned on said frame and adapted to halt the lower sandwich members at a predetermined point, a magazine mounted on said frame, means for delivering upper sandwich members from said magazine and for delivering them against said stop means and above the lower sandwich members halted thereagainst, and positive means for thrusting said upper sandwich members downwardly against said lower sandwich members including a plunger and means for imparting generally vertical movement to it and means for adjusting said plunger longitudinally in relation to said frame.

1,667,693. METHOD OF MAKING COPPERAS. HENRY CARLISLE STEWART, Philadelphia, Pa., assignor to The Westmoreland Chemical & Color Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 3, 1923. Serial No. 636,437. 4 Claims. (Cl. 23—126.)



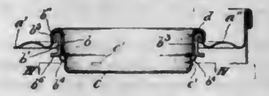
1. The method of producing copperas from a solution of ferrous sulphate of a density of 35° to 40° Baumé, which comprises the discharge of said solution in the form of a stream and projecting a stream of air against and transversely of the said stream of solution to atomize and effect crystallization of the ferrous sulphate therein.

1,667,694. DISPLAY DEVICE. ALBERT W. P. VERGEER, New York, N. Y., assignor to The T. F. Moore Company, Inc., New York, N. Y., a Corporation of New York. Filed July 6, 1925. Serial No. 41,482. 2 Claims. (Cl. 40—126.)



1. A collapsible display device, comprising a display card having an opening therein, a sheet of material adapted to be bent and to protrude through said opening to represent a part of a container, means for holding said sheet in set-up position, flaps extending from opposite edges of said opening and adapted to be turned forward within said bent sheet, and a folding prop hinged to the back of said card and having a part projecting beyond its hinge line adapted to turn said flaps outwardly when the prop is turned to set-up position.

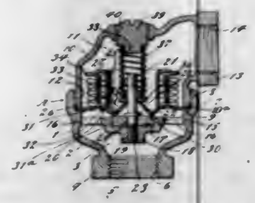
1,667,695. VANITY CASE. CARL M. WENDELSTEIN, North Attleboro, Mass., assignor to Bliss Brothers Company, Attleboro, Mass. Filed Sept. 17, 1927. Serial No. 220,088. 2 Claims. (Cl. 132—83.)



1. In a vanity case, a body, a rigid handle having a finger-receiving opening projecting outwardly from a side of the body, a cover for the body, a mirror on the inside of the cover, and means to hingedly connect the cover to the body at a point opposite to the handle so as to hold the cover when open at an obtuse angle to the plane of the body.

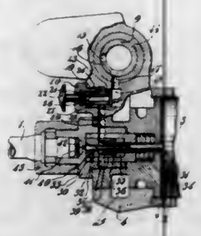
1,667,696. BELT STRAP. HOWARD M. BALLOU, North Attleboro, Mass., assignor to R. Blackinton & Co., North Attleboro, Mass., a Copartnership. Filed Feb. 16, 1927. Serial No. 168,563. 2 Claims. (Cl. 241—8.)

1. A belt strap comprising plural layers of leather secured together by longitudinal rows of stitches extending along the edge portions of the belt from end to end, and interior transverse rows of stitches at substantial intervals intersecting and binding the longitudinal rows of stitches to permit shortening the belt by cutting it across close to and outside of one of the transverse rows of stitches, thereby preventing the side stitches from unraveling and holding the newly formed end edges together.



1,667,697. CLOSURE FOR SHEET-METAL CONTAINERS. CHARLES T. DRAPER, Cleveland, Ohio, assignor to The Draper Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 5, 1925. Serial No. 7,076. 1 Claim. (Cl. 220—60.)

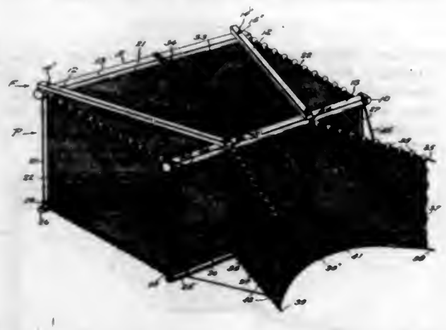
In combination with a sheet metal container having a circular inwardly flanged opening, of an annulus engaging said flange interiorly of said container throughout



the upper portion of the flange adapted to reinforce it against the expanding action of a closure, said flange being provided with retaining means for holding the annulus in position and with a lower locking rim, and a friction closure member interiorly fitting into and sealing said flanged opening and provided with means coacting with said locking rim, substantially as set forth.

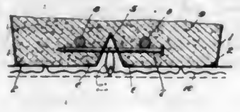
1,667,698. VALVE. LEWIS W. EGGLESTON, Clarence Township, Erie County, N. Y., assignor to American Radiator Company, New York, N. Y., a Corporation of New Jersey. Filed Apr. 28, 1926. Serial No. 105,056. 13 Claims. (Cl. 251—144.)

1. A valve of the character described comprising a body having ports, a partition in said body and between said ports, said partition having a valve-engaging surface, and said body having a passage around said partition, a hollow valve member having a passage therethrough and having an end portion adapted to seat on said surface to prevent flow through said valve member, a flexible sealing element connecting said valve member to the body and exposed to pressure within the valve body, said valve member having a wall within said end portion and means oppositing said pressure and engaging said wall to urge the valve member toward its seat on said surface.



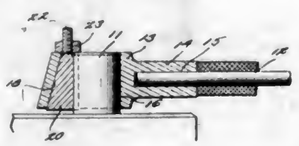
1,667,699. MOTOR. ELMER GEORGE GARTIN, Claremont, N. H. Filed Apr. 23, 1919. Serial No. 292,092. 5 Claims. (Cl. 121—10.)

1. In a rock drill, a stationary means for conducting a flow of cleansing fluid to a drill steel, valvular means operable to vary the flow of cleansing fluid thereto, and means providing a cleansing fluid leak passage always open even when said valve is in its normally closed position thereby to allow flow of cleansing fluid automatically to said steel whenever a source of pressure fluid has communication with said valvular means.



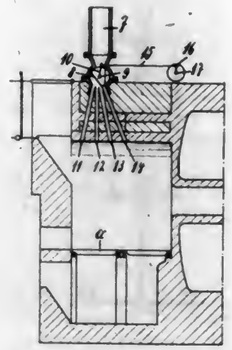
1,667,700. POT SEINE. LOUIS HANKEN, Seattle, Wash. Filed Feb. 23, 1927. Serial No. 170,150. 3 Claims. (Cl. 43—104.)

1. In fishing apparatus of the character described, a pot comprising netting supported by a collapsible buoyant frame, said frame consisting of two transverse members held in parallel spaced apart relation by brace members extending from the central portion of the forward of said members to within close proximity with the ends of the other of said members, towing cables secured to the central portions of said forward member and by branch cables with the outer ends of the same, seine leads depending from the respective towing cables and extending



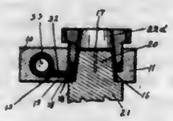
into the pot to constitute side walls of a tunnel, and floor netting connecting the lower edges of the seine leads both inside and outside of the pot.

1,667,701. SUPPORT FOR PLASTER BASES. AUGUST J. LUEDKE, Milwaukee, Wis., assignor to Milwaukee Corrugating Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 7, 1925. Serial No. 28,556. 4 Claims. (Cl. 72—70.)



3. A concrete floor construction comprising a plurality of elongated inverted trough-shaped members embedded in the under-side of the floor, the interiors of the trough-shaped members opening to below the floor, a plurality of pins extending transversely through each trough-shaped member and located at spaced points thereon, the pins extending through the trough-shaped members and beyond the sides of the same and having their end portions embedded in the concrete and means carried by the portions of the pins located within the trough shaped members and adapted to support a plaster base, or the like.

1,667,702. CONNECTER. RALPH E. POWELL, Toledo, Ohio. Filed Apr. 23, 1926, Serial No. 104,178. Renewed Feb. 4, 1928. 1 Claim. (Cl. 173—259.)



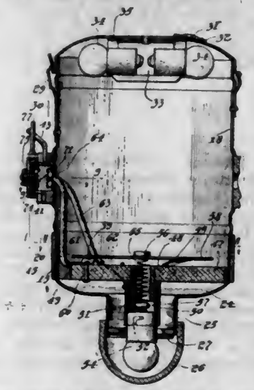
A connecter of the class described, comprising an element including a shank portion and having a socket extending perpendicularly of the main axis of the shank portion, the socket having elliptical edge portions of different area with an intervening flared wall, a tapered element adapted to engage the flared wall and to engage an element received within the socket, said tapered element having an outer convex surface and an outer concave surface and including a threaded extension, and threaded means engaging the extension and the adjacent edge portion of the socket.

1,667,703. APPARATUS FOR CHARGING FIREPLACES WITH HIGHLY-INFLAMMABLE LOOSE FUEL. ERNST SIMON, Werden-on-the-Ruhr, Germany. Filed Mar. 7, 1924, Serial No. 697,510, and in Germany Mar. 10, 1923. 1 Claim. (Cl. 110—118.)

A furnace having a fire box defined by walls including a top wall, a grate of substantial area in the fire box, a distributing valve structure above said top wall, said structure including a casing and a single distributing valve mounted for oscillation therein, the casing having at the top a port of substantial area for admission of fuel in communication with a fuel supply conduit, and the casing also having at the bottom a series of adjacent distinct distribution ports, the valve being of tubular downwardly tapering interior form and designed to afford selective communication between said inlet port and a single one of said distribution ports when selectively positioned, passages extending through said top wall on lines radiating substantially from the center of oscillation of said valve and entering the top of the fire box at spaced points and directed to afford distribution of fuel over substantially the entire grate area, and means external to said valve casing for selectively positioning the valve thus to afford distribution of the fuel through the several passages over the entire grate.

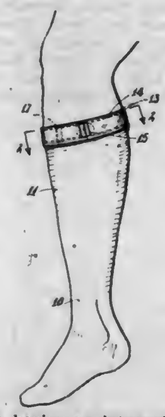
1,667,704. TERMINAL FOR STORAGE BATTERIES. RUDOLPH A. SZEITS, Hawthorne, Calif. Filed Sept. 14, 1926. Serial No. 135,326. 6 Claims. (Cl. 173—259.)

1. A device as described consisting of a base member formed with a bore, a collar, and a channel communicating with said bore and collar, said channel being completely filled with lead, means associated with said collar for clamping in position an electrical terminal, said means having a leaden contact with said lead filling in said channel, and a leaden film in said bore contacting with said leaden filling and adapted to receive and clamp an electrical cord.



1,667,705. SELF-INDUCTION COIL. KURT VON WYSIECKI, Lausanne, Switzerland. Filed Nov. 28, 1925, Serial No. 71,994, and in Germany Aug. 18, 1924. 5 Claims. (Cl. 175—359.)

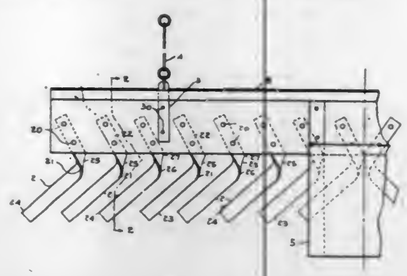
1. A loading coil comprising a core of ferromagnetic material having a shape which is elongated and cruciform in cross section, a casing of ferromagnetic material surrounding the core, windings crossing each other at right angles on the ends of the core and passing through opposite sectors formed by the arms of the core and by



the casing, the magnetic resistances of core and casing being proportional to the power flux produced by the windings at the places of core and casing.

1,667,706. ELECTRIC LANTERN. EDMOND B. BRONSON, Blue Island, Ill. Filed Oct. 23, 1922. Serial No. 596,269. 12 Claims. (Cl. 240—10.5.)

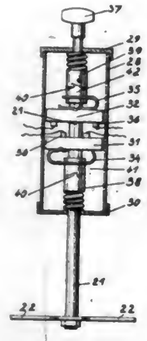
1. In a portable electric lantern a battery receiving casing, trunnions upon opposite sides thereof one of which is hollow, a handle swingingly mounted upon said trunnions, a suitable switch mechanism housed within the hollow trunnion and outside said casing, and means operated by the reciprocation of said handle to open and close said switch.



1,667,707. GARTER HOSIERY. NICHOLAS CHERNIAK, Bronx, N. Y. Filed Apr. 13, 1926. Serial No. 101,617. 1 Claim. (Cl. 2—240.)

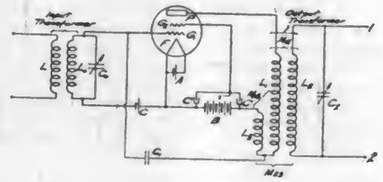
In hosiery, a hose having an inturned hem, an elastic member disposed in the circumferential pocket formed by said hem, means on the extremities of said member for

detachably securing said extremities together, said hem being provided with an aperture for insertion and removal of said elastic member, a pair of outwardly diverging flaps secured within and extending without the hem at opposite sides of said aperture and fastening means secured to said flaps for attaching the adjacent ends together.



1,667,708. WEEDING MACHINE. JOSEPH ANTON RUZALSKI, Blackie, Alberta, Canada. Filed June 21, 1926. Serial No. 117,375. 1 Claim. (Cl. 55—149.)

In a weeding machine, a plurality of knives, each knife having a comparatively narrow shank broadening into a bend forming the beginning of the blade and in cross section shaped to taper from a thick rounded back to a cutting edge, said bend forming a twist in the metal from which the continuation of the blade extends at an obtuse angle to said shank, said twist transversely curving from the rounded back to the cutting edge, this curve gradually decreasing in sharpness and reversing across the central portion of the bend and forming thereacross and thereunder a recessed surface merging into a flat though tapered extension forming the main cutting portion.



1,667,709. RAILWAY SIGNALING DEVICE. HERMANN SCHIEBING and ARTHUR REINHARDT, Apolda, Germany. Filed July 11, 1927, Serial No. 204,962, and in Germany July 16, 1926. 2 Claims. (Cl. 246—191.)

1. In a railway signaling device, a double switch on the locomotive of a train, one for the signal "line blocked" and the other for the signal "line free," comprising a casing, two insulating discs fixed in said casing, conductively connected metal sectors and terminals on said discs to which terminals electric leads are attached, a common rotary axle passing through said discs and projecting at both ends from said casing, axially movable spring-pressed coupling members on said axle within said casing, oppositely directed gripping faces on said coupling members, sleeves fixed on said axle and engaging with said gripping faces, and contact springs carried by said sleeves and in slidable contact with said metal sectors, and engagement between said sleeves and said oppositely directed gripping faces being such that at a rotation of

said axle in one direction one switch and at a rotation of said axle in the other direction the other switch is operated.

1,667,710. ELECTRICAL AMPLIFIER CIRCUIT. LEWIS M. HULL, Boonton, N. J., assignor to Radio Frequency Laboratories, Incorporated, Boonton, N. J., a Corporation of New Jersey. Filed Aug. 24, 1927. Serial No. 215,189. 3 Claims. (Cl. 179—171.)

1. An electrical amplifier circuit comprising, in combination, a vacuum tube device including an anode, a cathode, and a control electrode, an input circuit associated with said cathode and control electrode, a plate coil connected to said anode, a second coil coupled to said plate coil, and connected in series therewith between said cathode and anode, and a balancing condenser connected between said control electrode and the junction of said plate coil and said second coil, whereby said amplifier circuit may be balanced to reduce retroaction.

April 3, 1928

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

A/S Bakteriologisk Laboratorium "Ratin." (See Bakteriologisk Laboratorium, Neumann & Co. i Aalborg.)
Abendroth Brothers, Port Chester and New York, to Abendroth Brothers, Port Chester, N. Y. Cast-metal soil pipes and fittings. 68,966; renewed May 12, 1928.
Aetna Mills. (See Larabee Flour Mills Company.)
Agasote Millboard Co., The. (See Harvey & Outerbridge, assignor.)
Aguilar, New York, N. Y. Wood cabinets. 240,698; Apr. 3; Serial No. 257,462; published Jan. 24, 1928. Class 32.
American Diamalt Company, The, Cincinnati, Ohio, to The American Diamalt Company, New York, N. Y. Malt extract. 70,236; renewed Aug. 11, 1928.
American Underwear Manufacturing Co. Inc., Allentown, Pa. Underwear. 240,599; Apr. 3; Serial No. 258,013; published Jan. 17, 1928 Class 39.
Anderson, Alexander L., doing business as Anderson Beverage Co., Buffalo, N. Y. Beverages. 240,663; Apr. 3; Serial No. 257,912; published Jan. 24, 1928. Class 45.
Ashton Chemical Company. (See Berger, David A.)
Asphalt Products Company, Chicago, Ill. Paving, roofing, and building asphalt, asphalt filler, etc. 240,604; Apr. 3; Serial No. 250,290; published Jan. 17, 1928. Class 12.
Associated Attleboro Manufacturers, Inc. (See Briggs, D. F., Co., The.)
Bakteriologisk Laboratorium, Neumann & Co. i Aalborg, Gravensgade 1, Aalborg, to A/S Bakteriologisk Laboratorium "Ratin," Frederiksberg, Denmark, successor. Bacteriological preparations for the extermination of rats and mice. 69,723; renewed June 30, 1928.
Barber Asphalt Company, The, Philadelphia, Pa. Bituminous material. 240,637; Apr. 3; Serial No. 256,992; published Jan. 3, 1928. Class 12.
Bassick Company, The, Bridgeport, Conn. Slides and wheels for furniture casters. 240,590; Apr. 3; Serial No. 258,448; published Jan. 24, 1928. Class 13.
Baton Rouge Dental Chemical Co., Baton Rouge, La. Antiseptic mouth wash. 240,624; Apr. 3; Serial No. 258,791; published Jan. 24, 1928. Class 6.
Bauer, Henry, St. Louis, Mo. Hair oil. 240,623; Apr. 3; Serial No. 258,792; published Jan. 24, 1928. Class 6.
Beiersdorf, P., & Co. Inc., New York, N. Y. Medicinal preparation. 240,677; Apr. 3; Serial No. 257,464; published Jan. 24, 1928. Class 6.
Belknap Hardware & Manufacturing Company, Louisville, Ky. Milk and cream cans, buckets, pails, etc. 240,579; Apr. 3; Serial No. 249,259; published Jan. 24, 1928. Class 2.
Belknap Hardware & Manufacturing Company, Louisville, Ky. Incubators, brooders, and egg-turning trays. 240,580; Apr. 3; Serial No. 240,694; published Jan. 10, 1928. Class 50.
Belknap Hardware & Manufacturing Company, Louisville, Ky. Chamois skins. 240,581; Apr. 3; Serial No. 249,695; published Jan. 10, 1928. Class 1.
Berge, Joseph, doing business as Crowner Company, New York, N. Y. Metal covers or heads for fasteners. 240,684; Apr. 3; Serial No. 255,431; published Jan. 24, 1928. Class 13.
Berger, David A., doing business as Ashton Chemical Company, Cleveland, Ohio. Sink-trap-cleaning compound. 240,660; Apr. 3; Serial No. 257,958; published Jan. 24, 1928. Class 6.
Black Hawk Coffee & Spice Company, Waterloo, Iowa. Coffee. 67,561–2; renewed Feb. 11, 1928.
Blue Ribbon Products Co., Kalama, Wash. Wooden shingles. 240,645; Apr. 3; Serial No. 256,711; published Jan. 10, 1928. Class 12.
Blue Ridge Quarries, Inc., Slatington, Pa. Slate. 240,566; Apr. 3; Serial No. 239,571; published Jan. 10, 1928. Class 50.
Borden & Remington Co., Fall River, Mass. Adhesive gums, sizings, pastes, etc. 240,649; Apr. 3; Serial No. 256,392; published Jan. 24, 1928. Class 5.
Bourjois, Inc. (See Wertheimer, E., & Cie., assignor.)
Boye Needle Co., The, Chicago, Ill. Key chains, coiled-wire curtain holders, key hooks, and hasps. 240,727; Apr. 3. Class 13.
Brewer & Company Inc., Worcester, Mass. Lime. 240,636; Apr. 3; Serial No. 256,998; published Jan. 3, 1928. Class 12.
Briggs, D. F., Co., The, to Associated Attleboro Manufacturers, Inc., Attleboro, Mass., successor. Chains for personal adornment. 68,029; renewed Mar. 3, 1928.
Brooks, Thomas E., & Company, Red Lion, Pa. Cigars. 240,689; Apr. 3; Serial No. 255,226; published Jan. 24, 1928. Class 17.
Butler Brothers, New York, N. Y., to Butler Brothers, Chicago, Ill. Certain tools. 70,073; renewed July 28, 1928.
California Canneries Company, San Francisco, Calif. Canned fruits packed in wine sirup, sugar sirup, and in water. 240,700–1; Apr. 3; Serial Nos. 257,400–1; published Jan. 24, 1928. Class 46.
Celanese Corporation of America, New York, N. Y. Compositions in raw or partly-prepared condition. 240,681; Apr. 3; Serial No. 255,961; published Jan. 17, 1928. Class 1.
Chamberlain Metal Weather Strip Company, Detroit, Mich. Weather strips for doors. 240,707–8; Apr. 3; Serial Nos. 257,277–8; published Jan. 10, 1928. Class 12.
Charles Clothes. (See Solomon, Charles.)
Chicago Norfolk Western Coal Company, The, Chicago, Ill. Coal. 240,726; Apr. 3. Class 1.
Cifuentes Pego y Compañía, Habana, Cuba. Cigars, cigarettes, and smoking tobacco. 240,574; Apr. 3; Serial No. 246,594; published Jan. 24, 1928. Class 17.
Cleveland Twist Drill Co., assignor to The Cleveland Twist Drill Company, Cleveland, Ohio. Twist drills, reamers, taps, and the like. 31,414; renewed Mar. 8, 1928.
Climax Rubber Company. (See Stein, Jacob.)
Crowner Company. (See Berge, Jacob.)
Daisy, Limited, Leeds, England, assignor to J. E. Ellis Ltd., Horsforth, England. Medicinal powder for cure of headache. 31,160; renewed Jan. 18, 1928.
David & Blum, Inc., New York, N. Y. Gloves. 240,638; Apr. 3; Serial No. 256,915; published Jan. 17, 1928. Class 39.
David & Blum, Inc., New York, N. Y. Leather gloves. 240,653; Apr. 3; Serial No. 256,101; published Jan. 17, 1928. Class 39.
Delhon, Frank G., Brooklyn, N. Y. Shoes. 240,610; Apr. 3; Serial No. 251,721; published Jan. 17, 1928. Class 39.
Denver Fire Clay Company, The, Denver, Colo. Fire brick and fire-clay tile, etc. 240,656; Apr. 3; Serial No. 257,003; published Jan. 3, 1928. Class 12.
Denver Fire Clay Company, The, Denver, Colo. Fire brick and fire-clay tile. 240,711; Apr. 3; Serial No. 257,152; published Jan. 10, 1928. Class 12.
Denver Fire Clay Company, The, Denver, Colo. Fire brick and fire-clay tile. 240,712; Apr. 3; Serial No. 257,151; published Jan. 3, 1928. Class 12.
Detroit Brass & Malleable Works, Detroit, Mich. Brass and malleable-metal faucets and cocks. 240,576; Apr. 3; Serial No. 248,288; published Jan. 24, 1928. Class 13.
Deutsche Sl'-Sl' Werke mit beschränkter Haftung, Hamburg, Germany. Lemonade, Seltzer water, and fruit juices. 69,805; renewed July 7, 1928.
Diamond, Jacob, doing business as Diamond Mercantile Co., Cincinnati, Ohio. Hosiery. 240,575; Apr. 3; Serial No. 246,891; published Jan. 17, 1928. Class 39.
Dixie Manufacturing Co., Inc., Jackson, Miss. Rubber patch for automobile tire tubes, etc. 240,615; Apr. 3; Serial No. 220,451; published Jan. 24, 1928. Class 35.
Donaldson, T. B., Medicine Mfg. Company, The. (See Read, Edward P.)
Droescher, Severin R., Cranford, N. J. and New York, N. Y. Hones, oilstones, and whetstones. 70,032; renewed July 28, 1928.
Dryzer, Harry B., doing business as H. B. Dryzer & Company, Knoxville, Tenn. Coats, hats, suits, etc. 240,614; Apr. 3; Serial No. 252,694; published Jan. 17, 1928. Class 39.
Dudley, B. C., Coal Company, Indianapolis, Ind. Coal. 240,721; Apr. 3. Class 1.
Eastern Finishing Works, Kenyon, R. I. Treated fabrics for protective coverings. 240,644; Apr. 3; Serial No. 256,719; published Jan. 3, 1928. Class 50.
Ellis, J. E., Ltd. (See Daisy, Limited, assignor.)
Ely & Walker Dry Goods Co., St. Louis, Mo. Caps. 240,631; Apr. 3; Serial No. 258,171; published Jan. 17, 1928. Class 39.
Fanning Bread and Butter Pickle Company, Inc., New York, N. Y., and Streator, Ill. Pickles. 240,709; Apr. 3; Serial No. 257,264; published Jan. 24, 1928. Class 46.
Filene's, Wm., Sons Company, Boston, Mass. Men's suits, overcoats, topcoats, and tuxedos. 240,725; Apr. 3. Class 39.
Finzer Brothers Clay Company, The, Sugar Creek, Ohio. Building bricks. 240,697; Apr. 3; Serial No. 253,235; published Jan. 10, 1928. Class 12.
Fit All Cap Co., Inc., New York, N. Y. Men's and boys' caps. 240,635; Apr. 3; Serial No. 258,021; published Jan. 17, 1928. Class 39.
Fletcher Works, Philadelphia, Pa. Hydroextractors for use in laundries and other arts. 240,659; Apr. 3; Serial 257,975; published Jan. 24, 1928. Class 24.
Ford Roofing Products Company, Chicago, Ill. Asphalt shingles. 240,687; Apr. 3; Serial No. 255,376; published Jan. 17, 1928. Class 12.
Ford, Ruth S., doing business as Ford's Service Bureau, New London, Conn. Orange marmalade. 240,632; Apr. 3; Serial No. 258,075; published Jan. 24, 1928. Class 46.

Fort Smith Furniture Manufacturers' Company, Fort Smith, Ark. Furniture. 240,688; Apr. 3; Serial No. 255,239; published Jan. 24, 1928. Class 32.
Frank Tea & Spice Co., The, to The Frank Tea & Spice Company, Cincinnati, Ohio, successor. Foods. 69,275; renewed June 2, 1928.
Freeman, Albert, New York, N. Y. Smoking tobacco, cigars, cigarettes, etc. 240,667–S; Apr. 3; Serial Nos. 257,732–3; published Jan. 24, 1928. Class 17.
Fulton Company, The, assignor to The Fulton Sylphon Company, Knoxville, Tenn. Heat or temperature regulators. 68,046; renewed Mar. 3, 1928.
Gamson & Company, Philadelphia, Pa. Women's and misses' coats and suits. 240,602; Apr. 3; Serial No. 258,411; published Jan. 17, 1928. Class 39.
Genesee Pure Food Co., Le Roy, N. Y., assignor, by mesne assignments, to Postum Company, Incorporated, New York, N. Y. Substitutes for coffee made of grain. 31,172; renewed Jan. 25, 1928.
Gilbert, John O., Chocolate Company, Jackson, Mich. Candy. 240,586; Apr. 3; Serial No. 258,742; published Jan. 24, 1928. Class 46.
Ginsburg, Ben, Co., Inc., New York, N. Y. Coats and dresses. 240,646; Apr. 3; Serial No. 256,669; published Jan. 17, 1928. Class 39.
Globe-Wernicke Company, The, Cincinnati, Ohio, to The Globe-Wernicke Co., Norwood, Ohio. Document files. 69,605; renewed June 23, 1928.
Gonsalves, Manuel F., doing business as Pomery Club Sales Co., New York, N. Y. Ginger ale. 240,650; Apr. 3; Serial No. 256,341; published Jan. 24, 1928. Class 45.
Grand Rapids Plaster Company, Grand Rapids, Mich. Plaster. 240,605; Apr. 3; Serial No. 250,339; published Jan. 17, 1928. Class 12.
Great Valley Anthracite Corporation, East Radford, Va. Coal. 240,676; Apr. 3; Serial No. 257,476; published Jan. 10, 1928. Class 1.
Grey, Herbert J., doing business as The H. J. Grey Company, New York, N. Y. Wrapping paper, tissue paper, etc. 240,657; Apr. 3; Serial No. 258,119; published Jan. 10, 1928. Class 37.
Griner, Hubert B., doing business as International Pe-Can-Dy Company, Albany, Ga. Nut candy bars. 240,658; Apr. 3; Serial No. 257,979; published Jan. 24, 1928. Class 46.
Groobman, Louis, doing business as Whittier, Walnut Packing House Co., Whittier, Calif. Walnuts. 240,710; Apr. 3; Serial No. 257,062; published Jan. 24, 1928. Class 46.
Gruendler Patent Crusher and Pulverizer Company, St. Louis, Mo. Crushers, shredders, breakers, etc. 240,680; Apr. 3; Serial No. 255,986; published Jan. 24, 1928. Class 23.
Hairtite Barber Apron Co., Tampa, Fla. Barber's hair cloth and apron. 240,719; Apr. 3. Class 39.
Hardwick Stove Company, Cleveland, Tenn. Heating stove. 240,674; Apr. 3; Serial No. 257,579; published Jan. 24, 1928. Class 34.
Hartwell Brothers, Hollywood and Memphis, Tenn.; Chicago, Ill.; and New York, N. Y. Clubs, rammer rods, and handles for axes, hatchets, etc. 240,683; Apr. 3; Serial No. 255,849; published Jan. 24, 1928. Class 23.
Harvey & Outerbridge, New York, N. Y., assignor to The Agasote Millboard Co., Ewing Township, N. J. Millboard. 69,252; renewed June 2, 1928.
Hebert Shoe Co., Stoneham, Mass. Boots and shoes. 240,584; Apr. 3; Serial No. 257,981; published Jan. 17, 1928. Class 39.
Heller, George W., Inc., New York, N. Y. Waistcoats. 240,672; Apr. 3; Serial No. 257,626; published Jan. 17, 1928. Class 39.
Henderson Corporation, Seattle, Wash. Mechanical heater. 240,643; Apr. 3; Serial No. 256,724; published Jan. 24, 1928. Class 23.
Humphrey, James L., Jr., New Bedford, Mass. Butter, milk, cheese and cream. 31,852; renewed Aug. 9, 1928.
Husk, Harry M., Company, Newburyport, Mass. Boots and shoes. 240,634; Apr. 3; Serial No. 258,027; published Jan. 17, 1928. Class 39.
International Pe-Can-Dy Company. (See Griner, Hubert B.)
Isaacson, William O., Chicago, Ill. Nails and anchors. 240,567; Apr. 3; Serial No. 239,935; published Jan. 24, 1928. Class 13.
Isabey-Paris-Inc., New York, N. Y. Face powder. 240,620; Apr. 3; Serial No. 256,647; published Jan. 24, 1928. Class 6.
Isabey-Paris-Inc., New York, N. Y. Perfumes and toilet water. 240,647; Apr. 3; Serial No. 256,648; published Jan. 24, 1928. Class 6.
Janette Manufacturing Company, Chicago, Ill. Circulating pumps. 240,664; Apr. 3; Serial No. 257,874; published Jan. 24, 1928. Class 23.
Jewelers Circular Pub. Co., The, to Jewelers Publishing Corporation, New York, N. Y., successor. Periodical. 67,435; renewed Feb. 4, 1928.
Jobbing Association—Farmers Educational and Cooperative Union of America—Kansas Branch, The, Kansas City, Mo. Butter. 240,611; Apr. 3; Serial No. 252,046; published Jan. 24, 1928. Class 46.
Johns-Manville Corporation, New York, N. Y. Plaster weatherproof coating for insulation. 240,713; Apr. 3; Serial No. 257,101; published Jan. 10, 1928. Class 12.
Julius Kayser & Co., New York, N. Y. Knit silk underwear. 70,107; renewed July 28, 1928.
Kansas Milling Company, The, Wichita, Kans. Wheat flour. 70,051; renewed July 28, 1928.
Katz, Jacob F., New York, N. Y. Hairdressing. 240,682; Apr. 3; Serial No. 255,851; published Jan. 24, 1928. Class 6.
Keller-Kohn Company, The, Cleveland, Ohio. Coats. 240,606–7; Apr. 3; Serial Nos. 250,549–50; published Jan. 17, 1928. Class 39.
Kenmoor Sportswear, Inc., New York, N. Y. Misses' and women's coats, suits, and dresses. 240,666; Apr. 3; Serial No. 257,801; published Jan. 17, 1928. Class 39.
Kiddy Kraft Plak Co., Indianapolis, Ind. Plaques formed with figures in relief. 240,582; Apr. 3; Serial No. 249,731; published Jan. 3, 1928. Class 50.
Kilburn Mill, New Bedford, Mass. Combed yarn. 70,372; renewed Aug. 25, 1928.
Klaxon Company, The. (See Lovell-McConnell Manufacturing Company, assignor.)
Klein's Rapid Shoe Repair Co. Inc., New York, N. Y. Leather shoe soles. 240,640; Apr. 3; Serial No. 256,875; published Jan. 17, 1928. Class 39.

Want a Bucket of Rain-Water? For Mel'O, a Water Softener. Hygienic Products Company. 10,747; Apr. 3.
Watch Me Roll a Great Cigarette. For Tobacco. R. J. Reynolds Tobacco Company. 10,757; Apr. 3.
You've Probably Been Wishing For This Very Thing. For Wheat Breakfast Food. Cream of Wheat Co. 10,744; Apr. 3.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 3D DAY OF APRIL, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A C Spark Plug Company. (See Gustafson, Edwin A., assignor.)
A C Spark Plug Company. (See Helgeby, Ralph O., assignor.)
Abbott, Ransloe B., Reading, Pa. Insulated rail joint. 1,664,725; Apr. 3.
Abbott, William T., Cambridge, Mass. Individual tea bag. 1,665,080; Apr. 3.
Acker, Philip, Brooklyn, N. Y. Shade-supporting adapter for lamps. 1,664,843; Apr. 3.
Adde and Company. (See Ek, Emil, assignor.)
Adler, Henry A., New York, N. Y. Removable bridgework. 1,664,726; Apr. 3.
Agassiz, Lewis R. S., Vancouver, British Columbia, Canada. Paint-spraying machine. 1,664,803; Apr. 3.
Aglow, Harry, New York, N. Y., assignor to The New York Lighting Fixture Mfg. Co. Lighting-fixture body or article of similar nature. Des. 74,815; Apr. 3.
Albers, August W., assignor to Electro Dental Manufacturing Company, Philadelphia, Pa. Switch. 1,665,156; Apr. 3.
Aldrich, Lester K., Sidney, Ohio. Convertible oscillating rotary feeder. 1,664,960; Apr. 3.
Aldrich, Lester K., Sidney, Ohio. Convertible oscillating rotary feeder. 1,664,961; Apr. 3.
Aldridge, Blair G. (See Card, E. W., Aldridge, and Multer.)
Allen, George E., Buffalo, N. Y. Lantern. 1,664,447; Apr. 3.
Allen, George E., Buffalo, N. Y. Tool guard. 1,665,804; Apr. 3.
Amato, Peter, Lynn, Mass. Loud-speaker unit. 1,664,448; Apr. 3.
American Assembling Machine Company. (See Richards, Ernst R., assignor.)
American Can Company. (See Hothersall, John M., assignor.)
American Can Company. (See Magill, Donald G., assignor.)
American Chain Company. (See Pierce, Robert C., assignor.)
American Laundry Machinery Company, The. (See Colclough, William, assignor.)
American Optical Company. (See Boutelle, William H., assignor.)
American Optical Company. (See Gunning, William A., assignor.)
American Optical Company. (See Tillyer, Edgar D., assignor.)
American Rolling Mill Company, The. (See Reinartz, L. F., and Nead, assignors.)
American Rolling Mill Company, The. (See Tytus, John B., assignor.)
American Telephone and Telegraph Company. (See Herman, Joseph, assignor.)
American Telephone and Telegraph Company. (See King, Robert W., assignor.)
American Telephone and Telegraph Company. (See Strieby, Maurice E., assignor.)
American Telephone and Telegraph Company. (See Watson, E. F., and Weaver, assignors.)
American Textile Company. (See Ball, Ben A., assignor.)
Amplitone Company. (See Wilson, James M., assignor.)
Anderson, James B., Portland, Oreg. Safety landing and takeoff device for aeroplanes. 1,664,844; Apr. 3.
Anderson, Samuel H., Seattle, Wash. Ground-speed meter. 1,664,395; Apr. 3.
Andrews, Leonard, Westminster, England. Valve mechanism for controlling the discharge of powdered material and sand from tanks or other receptacles. 1,665,081; Apr. 3.
Appleby, W. C. (See Waid, Calvin R., assignor.)
Arnolds, Werner, Porta Westfalen, Germany, assignor to F. H. Westerschulte, Chicago, Ill. Vehicle spring. 1,664,655; Apr. 3.
Arndt, Hermann, Berlin, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, Germany. Automatic section block system for railroads. 1,665,008; Apr. 3.
Aronson, Louis V., Newark, N. J. Changeable exhibitor. 1,664,962; Apr. 3.
Art Wire and Stamping Company. (See Wiberg, Peter E., assignor.)
Ash, Charles ... Royal Oak, Mich. Wheel structure. 1,664,765; Apr. 3.
Ashcroft, Robert E., Nucla, Colo. Wrench. 1,664,391; Apr. 3.
Aske, Leonard E., Duluth, Minn. Manifold heater. 1,664,727; Apr. 3.
Associated Oil Company. (See Hanna, G. Dallas, assignor.)
Atkins, E. C., & Company. (See Gommel, Dewey E., assignor.)
Atmospheric Nitrogen Corporation. (See Slade, R. E., and Parke, assignors.)
Atwell, Harold V., assignor to Standard Oil Company, Whiting, Ind. Liquid seal. 1,664,963; Apr. 3.
Automotive Maintenance Machinery Co. (See Wacker, Frederick G., assignor.)
Auvera, Hugo, Dresden, Germany, assignor to Mitchell, Woodbury Company, Boston, Mass. Plate or similar article. Des. 74,816; Apr. 3.
Bacon, Harry S. C., assignor to E. S. Edmondson Company, Philadelphia, Pa. Advertising device. 1,665,009; Apr. 3.
Bailey, David R., Sacramento, assignor to California Almond Growers Exchange, San Francisco, Calif. Salting apparatus. 1,664,474; Apr. 3.
Baker, Abraham. (See Reynolds, Robert O., assignor.)
Baker, Hugh J., Indianapolis, Ind. Beam hanger. 1,664,499; Apr. 3.
Baker, Roy C., Quincy, Mass. Bookbinding and producing the same. 1,665,049; Apr. 3.
Baldwin Chain & Mfg. Co. (See Klaucke, Hermann, assignor.)
Baldwin, James L., Chicago, Ill. Package elevator. 1,664,912; Apr. 3.
Ball, Albert P., assignor to Square D Company, Detroit, Mich. Switching device. 1,664,845; Apr. 3.
Ball, Ben A., assignor to American Textile Company, Inc., Pawtucket, R. I. Lace. Des. 74,817; Apr. 3.
Ball, Charles F., assignor to Chain Belt Company, Milwaukee, Wis. Water, power, and speed control mechanism for concrete-mixing and similar machines. 1,665,050; Apr. 3.
Ballard, George L., assignor to Wildman Mfg. Co., Norristown, Pa. Knitted fabric and making the same. 1,664,805; Apr. 3.
Barbour, Perley E. (See Lyon, Harry, assignor.)
Barbour Welting Company. (See Lyon, Harry, assignor.)
Bardet, Edouard, New York, N. Y. Safety-razor-blade holder. 1,665,125; Apr. 3.
Barnes, Llewellyn T., assignor to The Gem Engineering Corporation, Hempstead, N. Y. Switching apparatus. 1,664,586; Apr. 3.
Barol, Hugo, Philadelphia, Pa. Lady's hat bag. 1,665,010; Apr. 3.
Barrett, George E., assignor to Lenher Engineering Company, New York, N. Y. Steering mechanism for vessels. 1,665,011; Apr. 3.
Bartholdy, Max, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Testing taper holes. 1,664,535; Apr. 3.
Bartlett, C. O., & Snow Company, The. (See First, Mahlon E., assignor.)
Baruch, Alphons, Hamburg, Germany. Integral receiver for suspending toilet-paper rolls. 1,664,392; Apr. 3.
Bassett Metal Goods Company, The. (See Russ, John B., assignor.)
Bates, George T., assignor to Illinois Watch Case Company, Elgin, Ill. Catch for cases and the like. 1,664,500; Apr. 3.
Bauer, George J. (See Benham, E. M., and Bauer.)
Bausch and Lomb Optical Company. (See Sweeney, James A., assignor.)
Bechard, Joseph C., Fall River, Mass. Spiral rotary ship or similar vessel. 1,665,012; Apr. 3.
Becker, Joseph, Pittsburgh, Pa., assignor to The Koppers Company. Gas purification. 1,665,013; Apr. 3.
Beckworth, Otto Q., Los Angeles, Calif. Thermostatic current control. 1,665,014; Apr. 3.
Beech-Nut Packing Company. (See Howe, D. W., Pickett, and McBean, assignors.)
Behr, Allen, Brooklyn, N. Y. Sport shoe. 1,664,728; Apr. 3.
Beidler, George C., Rochester, N. Y. Photographing and developing apparatus. 1,664,729; Apr. 3.
Beidler, George C., Rochester, N. Y. Film-roll box and mounting. 1,664,730; Apr. 3.
Beidler, George C., Rochester, N. Y. Coil-film developer. 1,664,731; Apr. 3.
Belden Manufacturing Company. (See Wermine, Hugh H., assignor.)
Beloit Iron Works. (See Berry, Earl E., assignor.)
Bement, Newton S., Ann Arbor, Mich. Traffic light. 1,664,536; Apr. 3.

Bendix Brake Company. (See Kulick, Edward L., assignor.)

Bendix Brake Company, The. (See Parsons, Ben G., assignor.)

Benham, Edgar M., Norwood, Ohio, assignor to The Mosler Lock Company, Covington, Ky. Lock. 1,665,015; Apr. 3.

Benham, Edgar M., Norwood, and G. J. Bauer, Madisonville, Ohio, assignors to The Mosler Lock Company, Covington, Ky. Lock. 1,665,016; Apr. 3.

Benjamins, Israel, Brooklyn, N. Y. Writing pen. 1,664,501; Apr. 3.

Bennett, George L., Cleveland Heights, Ohio. Sheet wall tiling. 1,664,396; Apr. 3.

Bennett, Wynn M. (See Cornell, Carl M., assignor.)

Bens, Samuel J., New York, N. Y. Lost-ball indicator. 1,664,397; Apr. 3.

Bentley, William P., Dallas, Tex. Treatment of rock asphalt. 1,664,846; Apr. 3.

Bergen, George B., sr., Milwaukee, Wis. Stone veneer. 1,664,964; Apr. 3.

Bergner, John C., Lansdowne, assignor of one-half to F. E. Morris, Philadelphia, Pa. Cooking apparatus. 1,665,017; Apr. 3.

Berry, Earl E., assignor to Beloit Iron Works, Beloit, Wis. Drier construction. 1,664,656; Apr. 3.

Bertrand, Frederic E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Apparatus for use in making shoes. 1,664,657; Apr. 3.

Betterley, Roland O., assignor to Hermance Machine Company, Williamsport, Pa. Cutter head for woodworking machines. 1,664,806; Apr. 3.

Bewley, Claude G., Spokane, Wash., assignor of one-half to R. F. Wilcox & Co., Montebello, Calif., and one-half to Spokane Concrete Flower Pot Machine Company, Inc., Spokane, Wash. Plant-potting machine. 1,664,913; Apr. 3.

Bijur, Joseph, assignor, by mesne assignments, to Eclipse Machine Company, New York, N. Y. Engine starting apparatus. 1,664,847; Apr. 3.

Biller, David J., assignor to Day-Brite Reflector Company, St. Louis, Mo. Reflector housing for display-case lights. Des. 74,818; Apr. 3.

Bixler, L. B. Henry. (See Bixler, William L. and L. B. H.)

Bixler, William L. and L. B. H., Fresno, Calif. Pick off for conveyer systems. 1,664,393; Apr. 3.

Black, Percy S., Fort Worth, Tex. Electric swivel socket. 1,665,018; Apr. 3.

Blake, R. P., et al. (See Simpson, Arthur E., assignor.)

Blalack, Charles E., and G. H. Eckstein, Los Angeles, Calif. Piano. 1,664,587; Apr. 3.

Blankenship, William J., Valdosta, Ga. Sleeping pillow. 1,664,537; Apr. 3.

Blanning, Edwin J. (See Jones, G. J., and Blanning.)

Blazer, Clyde P., Nehalem, Oreg. Jelly-bag holder. 1,664,658; Apr. 3.

Blumenthal, William, Philadelphia, Pa. Coat shield. 1,664,449; Apr. 3.

Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall bracket plate or similar article. Des. 74,819; Apr. 3.

Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Arm for an electric wall bracket plate or similar article. Des. 74,820; Apr. 3.

Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Chandelier or similar article. Des. 74,821; Apr. 3.

Bohnenblust, Arnold, Riley, Kans. Suction force pump. 1,665,082; Apr. 3.

Bol, Cornelis, assignor to N. V. Philip's Gloeilampenfabrieken, Eindhoven, Netherlands. Vacuum pump. 1,664,398; Apr. 3.

Bonds, Albert, Cleveland, Ohio. Apparatus for temperature control. 1,664,965; Apr. 3.

Bonneau, Joseph C., Webster, Mass. Kier. 1,664,475; Apr. 3.

Boor, Nicholas J., Claflin, Kans. Cattle yoke. 1,664,304; Apr. 3.

Boston Wire Stitcher Company. (See Briggs, Thomas A., assignor.)

Boulogne, Arthur, Levallois-Perret, France. Pivoting emergency seat. 1,664,766; Apr. 3.

Bousfield, Alfred, assignor to E. and T. Fairbanks and Company, St. Johnsbury, Vt. Weigh beam. 1,664,502; Apr. 3.

Boutelle, William H., Sturbridge, assignor to American Optical Company, Southbridge, Mass. Ophthalmic temple. 1,664,966; Apr. 3.

Bouy, Jules, New York, N. Y. Support or similar article. Des. 74,822; Apr. 3.

Bowlus, Henry C., assignor to A. D. Hosterman, Springfield, Ohio. Flushing and ventilating apparatus for closets. 1,664,588; Apr. 3.

Boyce, Charles P. (See Donald, F. E., and Boyce.)

Boyle, Jacob C., Indianapolis, Ind. Locomotive-cab-window protector. 1,665,019; Apr. 3.

Boynton, Charles B., East Orange, assignor to Perco Heater Corporation, Newark, N. J. Boiler. 1,664,914; Apr. 3.

Boynton, Jesse L., assignor of fifty per cent to C. A. Marshall, New York, N. Y. Method and apparatus for timing the use of electrical circuits. 1,664,873; Apr. 3.

Braun, Justus, Nuremberg, Germany. Compressor. 1,664,733; Apr. 3.

Breeden, Alfred J., Grinnell, Iowa. Catcher attachment for lawn sweepers and the like. 1,664,659; Apr. 3.

Breese, Charles P. (See Brown, E., and Breese.)

Breyer, Frank G., E. H. Bunce, and J. H. Weikel, Palmerton, Pa., assignors to The New Jersey Zinc Company, New York, N. Y. Zinc oxide. 1,664,767; Apr. 3.

Briggs Manufacturing Company. (See Marshall, William, assignor.)

Briggs, Thomas A., Providence, R. I., assignor to Boston Wire Stitcher Company, Portland, Me. Packaging staples or the like and package produced thereby. 1,665,051; Apr. 3.

Brodie, Herbert, assignor of one-half to A. R. Saunders, Detroit, Mich. Brake-operating mechanism. 1,664,732; Apr. 3.

Broken Hill Proprietary Company, The. (See Power, W. P., and Lewis, assignors.)

Brown, Ellsworth, Dayton, Ohio, and C. P. Breese, Norfolk, Va. Multiple-engine drive gear. 1,664,399; Apr. 3.

Brown, Lloyd J., Evanston, assignor to E. P. Smith, Springfield, Ill. Safety device for brake beams. 1,664,538; Apr. 3.

Browne, William G., Yonkers, N. Y., and R. W. Olmsted, San Francisco, Calif. Advertising sign. Des. 74,852; Apr. 3.

Brownell, Barnett M., St. Louis, Mo., assignor to Diamond Metal Products Co. Pipe coupling. 1,664,848; Apr. 3.

Brownell, George L., Worcester, Mass. Spool support for twisting machines and the like. 1,665,083; Apr. 3.

Brundy, David N., Los Angeles, Calif. Perforated casing. 1,664,734; Apr. 3.

Brunell, Leo W., Foxboro, assignor of one-third to B. F. Upham and one-third to E. W. Calkins, Boston, Mass. Treating sheet material with heat. 1,665,185; Apr. 3.

Bryans, H. H., trustee. (See Filer, Adelbert F., assignor.)

Bryant, Ozro N., Moores, Pa., assignor to Westinghouse Electric & Manufacturing Company. Governor. 1,664,849; Apr. 3.

Bryce, James W., Bloomfield, N. J., assignor to The Tabulating Machine Company, Endicott, N. Y. Brush reading device for combinational hole records. 1,664,539; Apr. 3.

Buckingham, Francis. (See Tretch, W. J., and Buckingham.)

Budd, Edward G., Manufacturing Co. (See Meadowcroft, Joseph W., assignor.)

Bull, William C., Los Angeles, Calif. Listing, counting, and printing machine. 1,664,768; Apr. 3.

Bunce, Earl H. (See Breyer, F. G., Bunce, and Weikel.)

Burke, George W., jr., Dayton, Ohio. Fire extinguisher. 1,664,450; Apr. 3.

Burns, James F., assignor to V V Fittings Company, Philadelphia, Pa. Safety switchboard. 1,665,126; Apr. 3.

Burri, Jacob J. (See Harer, G. W., and Burri.)

C-S Engineering Company. (See Schellens, Christopher, A., assignor.)

Cadwell, William H., New Britain, Conn. Radiator valve. 1,665,052; Apr. 3.

California Almond Growers Exchange. (See Bailey, David R., assignor.)

Calkins, Edward W., et al. (See Brunell, Leo W., assignor.)

Cameron, Will J., Chicago, Ill. Nasal retractor or speculum. 1,664,660; Apr. 3.

Campbell, Neil L., Glendale, assignor, by mesne assignments, to Carthage Mills Incorporated, Cincinnati, Ohio. Floor covering. 1,664,589; Apr. 3.

Capstaff, John G., assignor to Eastman Kodak Company, Rochester, N. Y. Film-treating apparatus. 1,664,735; Apr. 3.

Carlson, Alexander. (See Pettingell, F. A., and Carlson.)

Carlson, Enock A., Delvalle, Tex. Twine holder. 1,665,127; Apr. 3.

Carney, Samuel C., Tulsa, Okla., assignor to Roxana Petroleum Corporation. Making ice crystals. 1,664,850; Apr. 3.

Carpio, Carlos, New York, N. Y. Propelling mechanism for boats. 1,665,053; Apr. 3.

Carr, Edward G., Chicago, Ill., assignor to The Lakewood Engineering Company, Lakewood, Ohio. Finishing machine. 1,665,054; Apr. 3.

Carthage Mills Incorporated. (See Campbell, Neil L., assignor.)

Cassal, Arthur V., Rochester, N. Y. Circuit camera. 1,664,590; Apr. 3.

Caster, John E., assignor to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machinery. 1,665,084; Apr. 3.

Cather, Charles E., Worcester, assignor to United States Envelope Company, Springfield, Mass. Reenforced folder or file holder. 1,665,128; Apr. 3.

Catlin, Winfield, Rockville, assignor of one-half to W. N. Cox., Bloomingdale, Ind. Animal trap. 1,665,020; Apr. 3.

Cavanna, Eugene L., Chicago, Ill. Shoe support. Re. 16,924; Apr. 3.

Centrifix Corporation. (See Hawley, Charles G., assignor.)

Chain Belt Company. (See Ball, Charles F., assignor.)

Chance, Henry M., Philadelphia, Pa. Method and apparatus for centrifugal thickening of mixtures and clarifying of liquids. 1,664,769; Apr. 3.

Chase, George C., South Orange, assignor, by mesne assignments, to Monroe Calculating Machine Company, Orange, N. J. Full-cycle positioning mechanism. 1,664,661; Apr. 3.

Cheney, S., & Son. (See Littler, James H., assignor.)

Chicago Cardboard Company. (See Ziemmerman, Henry, assignor.)

Christensen, Niels A., Milwaukee, Wis. Duplex brake. 1,664,451; Apr. 3.

Christensen, Oscar, assignor to Locke Insulator Corporation, Baltimore, Md. Self-cleaning oil burner. 1,664,967; Apr. 3.

Christianson, Arnold and C., Hammond, Ind. Side bearing. 1,664,915; Apr. 3.

Christianson, Christian. (See Christianson, Arnold and C.)

Chryst, William A., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Dynamo frame. 1,664,540; Apr. 3.

Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)

Cincinnati Butchers' Supply Company, The. (See Schmidt, Gustav, assignor.)

Cincinnati Grinders Incorporated. (See Caster, John E., assignor.)

Cincinnati Grinders Incorporated. (See Einstein, S., Peaslee, and Haas, assignors.)

Cincinnati Grinders Incorporated. (See Kimmel, George C., assignor.)

Citron, William J., San Francisco, Calif. Method of and apparatus for recording and exhibiting. 1,664,770; Apr. 3.

Clark, Virginius E. (See Geyer, H. D., and Clark.)

Clary, William B. (See Ganzfried, A., and Clary.)

Class, George M., assignor to Gisholt Machine Company, Madison, Wis. Tool post. 1,664,851; Apr. 3.

Cleveland, Charles F. (See Miller, C. G., and Cleveland.)

Clifton Manufacturing Company. (See Thrower, Alvin H., assignor.)

Clot, Augustus, West New York, N. J. Sound box for sound-reproducing machines. 1,664,591; Apr. 3.

Coenen, Edouard, Brussels, Belgium. Lathe. 1,664,968; Apr. 3.

Coffman, James W., Webb City, Okla. Oil-tube cap. 1,664,593; Apr. 3.

Cohen, Joseph H., Bridgeport, Conn. Automatic electric switch for cable-carrying. 1,665,021; Apr. 3.

Cohn, Edward, Brooklyn, N. Y. Reenforced safety bat. 1,665,195; Apr. 3.

Cohoes Envelope Co. (See Kleebauer, C. P., and Lackey, assignors.)

Coil, William D., Muncie, and W. J. De Reamer, Crown Point, Ind. Turning mechanism for conveying devices. 1,664,663; Apr. 3.

Colclough, William, assignor to The American Laundry Machinery Company, Norwood, Ohio. Cover clamp for ironing boards or bucks. 1,664,916; Apr. 3.

Cole, Lyndon C., Hamilton, Ohio, assignor to Niles-Bement-Pond Company, New York, N. Y. Rotating cutter head. 1,664,807; Apr. 3.

Collis, Meyer, Charleston, S. C. Electrical dough-imprinting machine. 1,665,196; Apr. 3.

Columbus McKinnon Chain Company, The. (See Shay, Warren J., assignor.)

Commonwealth Steel Company. (See Pfiager, Harry M., assignor.)

Compagnie des Forges & Acieries de la Marine & d'Homecourt. (See Rimailho, Emile, assignor.)

Conant, Arthur P., Fort Thomas, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase. Des. 74,823; Apr. 3.

Congoleum-Nairn, Inc. (See Fauser, Oscar W., assignor.)

Conover, John C., Somerville, N. J. Guide for molder tables. 1,664,969; Apr. 3.

Consolidated Ashcroft Hancock Company. (See Heise, Otto W., assignor.)

Consolidated Car-Heating Company. (See Hynes, Lee P., assignor.)

Consolidated Car-Heating Company. (See Oakley, George E., assignor.)

Constantinesco, George, Weybridge, England. Unidirectional driving device. 1,664,874; Apr. 3.

Continental Railway Supply Corporation. (See Schroeder, Frank J., assignor.)

Continuous Train Control Corporation. (See Stone, Charles B., assignor.)

Cook, Edward W., assignor of one-half to E. I. Field, Los Angeles, Calif. Cooling tower. 1,665,022; Apr. 3.

Cooley, Ralph M., St. Paul, Minn. Vehicle supporting device for soft roads. 1,664,592; Apr. 3.

Cooper, Alfred, Stowmarket, England. Teaching device. 1,664,808; Apr. 3.

Cooper, George H., Hartford, Conn. Tuned transformer. 1,664,541; Apr. 3.

Copp, Earl F., Montclair, N. J. Golf tee. 1,664,400; Apr. 3.

Cornell, Carl M., assignor of one-half to W. M. Bennett, Buffalo, S. Dak. Bulkhead wall for culverts. 1,664,503; Apr. 3.

Corning Glass Works. (See Peltz, Gordon M., assignor.)

Cowan Lath Board Company. (See Cowan, Samuel K., assignor.)

Cowan, Samuel K., New York, N. Y., assignor to Cowan Lath Board Company, Nashville, Tenn. Lath. 1,664,875; Apr. 3.

Cox, William N. (See Catlin, Winfield, assignor.)

Craddock, John E., Perry Point, Md. Amusement device. 1,665,129; Apr. 3.

Craig, Alfred, Mitcham, assignor to James Pain & Sons Limited, London, England. Toy bomb or projector. 1,664,401; Apr. 3.

Cramer, Harry I., assignor to The Sterling Jewelry Company, Dayton, Ohio. Wrist watch. Des. 74,825; Apr. 3.

Creamer, Isaac P., and F. Joseph, New York, N. Y. Soap box. 1,664,736; Apr. 3.

Crum, Leo J., assignor of one-half to L. L. Vosler, Kalamazoo, Mich. Exercising device. 1,664,664; Apr. 3.

Cumming, William G., Montreal, Quebec, Canada. Tire-inflating mechanism. 1,664,970; Apr. 3.

Cummings, Charles D., Tully, N. Y. Claw hammer. 1,664,594; Apr. 3.

Cummins, Norman W., Plymouth, Mich. Side-clamp hood fastener. 1,664,771; Apr. 3.

Cunningham, Dennis J., Washington, D. C. Roller guard for automobiles. 1,665,085; Apr. 3.

Currie, Robert A., Syracuse, assignor to R. E. Dietz Company, New York, N. Y. Bail-attaching means for lanterns and the like. 1,665,055; Apr. 3.

Currier, Hiram D., and W. G. Shull, assignors to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,664,665; Apr. 3.

Cutler, Clifford A., Buffalo, N. Y. Surface block. 1,664,737; Apr. 3.

Dahnke, George H., Benton Harbor, Mich. Traffic-controlling device. 1,665,157; Apr. 3.

Daine, Robert L., assignor to Trans-Lux Daylight Picture Screen Corporation, New York, N. Y. Feeding tape. 1,664,772; Apr. 3.

Danforth, George L., jr., assignor, by mesne assignments, to Open Hearth Combustion Company, Chicago, Ill. Open-hearth furnace. 1,665,086; Apr. 3.

Daniels, Samuel, and G. J. Himmelein, Dayton, Ohio. Mold. 1,664,452; Apr. 3.

Daprato Statuary Company. (See Mariotti, Joseph J., assignor.)

Darling, Frank L., Long Beach, Calif. Crimped-cap opener. 1,664,595; Apr. 3.

Davis, Charles E., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,664,666; Apr. 3.

Davis, Cleveland G., Grand Rapids, Mich. Device for forcing ice-cream bricks from molds. 1,664,667; Apr. 3.

Davis, Ernest, assignor to The Prosperity Company Inc., Syracuse, N. Y. Drying-room tumbler. 1,664,809; Apr. 3.

Davis, Marion J., Brinkley, Ark. Railway mail-bag crane. 1,665,056; Apr. 3.

Day-Brite Reflector Company. (See Biller, David J., assignor.)

Dayton-Wright Company. (See Geyer, H. D., and Clark, assignors.)

Dayton-Wright Company. (See Pettingell, F. A., and Carlson, assignors.)

Dean, Clayton C., Mundelein, Ill. Billiard cue. 1,664,971; Apr. 3.

Decceco, Inc. (See Nicholay, Paul, assignor.)

Dedman, Joseph M. (See Frakes, Frank F., assignor.)

Degler, William W., Cumberland, Md. Card holder. 1,664,668; Apr. 3.

Deitz, Howard C. (See Thompson, J. V., and Dietz.)

Delco-Remy Corporation. (See Chryst, William A., assignor.)

Delco-Remy Corporation. (See Poole, Lora E., assignor.)

Deline, Irving A., Denver, Colo. Expansible box-band holder for stripping machines. 1,664,738; Apr. 3.

Deline, Irving A., Denver, Colo. Box holder to facilitate the hand-stripping operation in the production of pasteboard boxes. 1,664,739; Apr. 3.

Denyes, Harry M., Saginaw, assignor to General Motors Corporation, Detroit, Mich. Antirattle bracelet. 1,664,669; Apr. 3.

De Reamer, William J. (See Coil, W. D., and De Reamer.)

Dester, William F., Newark, assignor to U. S. Tool Co., Inc., East Orange, N. J. Safety igniter for gas stoves. 1,664,917; Apr. 3.

Dester, William F., Newark, assignor to U. S. Tool Co., Inc., East Orange, N. J. Safety gas-stove igniter. 1,664,918; Apr. 3.

Detroit Insulated Wire Company. (See Hunter, Joseph H., assignor.)

Deuring, Fritz R., Munich-Gladbach, Germany. Feed and traversing motion for lathes. 1,665,158; Apr. 3.

Deuta-Werke vormals Deutsche Tachometerwerke G. m. b. H. (See Erfurth, Wilhelm, assignor.)

De Vries, Andrew, South Bend, Ind., assignor to Westinghouse Electric and Manufacturing Company. Post cap. Des. 74,826; Apr. 3.

Dewey, Clarence L., Elkhart, Ind. Decorating fish lures. 1,664,402; Apr. 3.

Diamond Metal Products Co. (See Brownell, Barnett M., assignor.)

Diamond Power Specialty Corporation. (See Heaton, Herman C., assignor.)
Diamond Power Specialty Corporation. (See Snow, Norman L., assignor.)
Dieckerhoff, Ewald C. (See Werder, Hans, assignor.)
Diehl, John C., Erie, Pa. Controlling the flow of fluids in connected conduits and device therefor. 1,664,596; Apr. 3.
Dietz, R. E., Company. (See Currie, Robert A., assignor.)
Dittemore, Lester P., Topeka, Kans. Cigar lighter. 1,664,597; Apr. 3.
Dittlinger, Hippolyt, New Braunfels, Tex. Plastic hydrated lime and making it. 1,664,598; Apr. 3.
Doaney, John A., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Automatic multiple-spindle milling lathe. 1,664,740; Apr. 3.
Dodge, Harold F., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmitter mouthpiece. 1,664,852; Apr. 3.
Dollins, Robert R., Marland, Okla. Air cleaner. 1,664,670; Apr. 3.
Dolphin, John L. (See Wright, W. L., and Dolphin.)
Dominick & Haff, Inc. (See Hebbard, Harrison, assignor.)
Donald, Floyd E., and C. P. Boyce, Corsicana, Tex. Planetary reversible clutch. 1,665,159; Apr. 3.
Douglas, H. A. (See Murray, Howard J., assignor.)
Douglas, Harry A. (See Watts, Felix J., assignor.)
Douglas, Harry A., Bronson, Mich. Circuit-continuing device. 1,664,403; Apr. 3.
Douglas, Harry A., Bronson, Mich. Lock. 1,664,404; Apr. 3.
Douglas, Harry A., Bronson, Mich. Electric lamp. 1,664,876; Apr. 3.
Douglass, James B., Harvey, Iowa. Glove protector. 1,664,542; Apr. 3.
Dudderar, Daniel W., Mount Airy, Md. Retort-cover clamp. 1,664,972; Apr. 3.
Duncan Electric Manufacturing Company. (See Emens, Albert L., assignor.)
Dura Company, The. (See Graff, George, assignor.)
Duratex Corporation. (See Stoddard, William O., jr., assignor.)
Durkee, James W., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Relieving attachment. 1,664,741; Apr. 3.
Dzierzenga, Frank, Brooklyn, N. Y. Safety device for windows. 1,664,599; Apr. 3.
Easterman, Lea, Brooklyn, N. Y. Joint for glass plates. 1,664,543; Apr. 3.
Eastman Kodak Company. (See Capstaff, John G., assignor.)
Eckstein, George H. (See Blalack, C. E., and Eckstein.)
Eclipse Machine Company. (See Bijur, Joseph, assignor.)
Ede.hoff, Alfred, Volkmarsen, Germany. Potato-planting machine. 1,664,773; Apr. 3.
Edmondson, E. S., Company. (See Bacon, Harry S. C., assignor.)
Edwards, Eaton G. (See Gargiulo, F., Edwards, and Oppe.)
Edwards, Isaac L., Aurora, Ill. Overalls. 1,664,774; Apr. 3.
Eickworth, Regnier, Dortmund, Germany. Gas burner. 1,664,973; Apr. 3.
Einstein, Sol. W. Peaslee, and F. S. Haas, assignors, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Automatic size-grinding machine. 1,665,160; Apr. 3.
Eisengart, William C., Pittsburgh, Pa. Lubricating device for internal-combustion engines. 1,664,671; Apr. 3.
Ek, Emil, assignor to Adde and Company, Portland, Me. Operating device. 1,664,919; Apr. 3.
Electro Dental Manufacturing Company. (See Albers, August W., assignor.)
Electrolux Servel Corporation. (See von Platen, B. C., and Munters, assignors.)
Ellington, Ferdinand W., Jamaica, N. Y. Finishing leather. 1,664,742; Apr. 3.
Elliott, Dwight A., Richmond, Ind. Ventilator. 1,665,130; Apr. 3.
Elliott, Irwin. (See Williams, Robert W. and H. R., and Elliott.)
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Amylaceous molded product and making same. 1,664,600; Apr. 3.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Cassava-starch plastic composition and molding same. 1,664,601; Apr. 3.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Making sulphur-containing plastics. 1,665,186; Apr. 3.
Ellis-Foster Company. (See Ellis, Carleton, assignor.)
Emens, Albert L., assignor to Duncan Electric Manufacturing Company, La Fayette, Ind. Induction electricity meter. 1,664,672; Apr. 3.
Emens, Albert L., assignor to Duncan Electric Manufacturing Company, La Fayette, Ind. Induction electricity meter. 1,664,673; Apr. 3.
Emerson Electric Mfg. Co., The. (See Janca, Joseph J., assignor.)
Engle, Frank G., New York, N. Y. Head lamp. 1,664,405; Apr. 3.
Epstein, Albert K., Chicago, and M. C. Reynolds, Oak Park, Ill. Mayonnaise product and producing same. 1,664,775; Apr. 3.
Eppenstein, Sidney C., assignor to Illinois Watch Case Company, Elgin, Ill. Adjustable bracelet. 1,664,504; Apr. 3.
Erfurth, Wilhelm, assignor to Deuta-Werke vormals Deutsche, Tachometerwerke G. m. b. H., Berlin, Germany. Speedometer of the eddy-current type. 1,664,406; Apr. 3.
Eshbaugh, Jesse E., Dayton, Ohio. Automatic pulse, respiration, and temperature recorder. 1,664,407; Apr. 3.
Etchells, James. (See Lyne F. C., and Etchells.)
Everett, Daniel S., Jordan, N. Y. Sash holder. 1,664,602; Apr. 3.
Everett, Edward A., New York, N. Y. Sighting device 1,664,544; Apr. 3.
Fairbanks, E. and T., and Company. (See Bousfield, Alfred, assignor.)
Fairy Brassiere Co. (See Imersheln, H., and Ginsburg, assignors.)
Farrel Foundry & Machine Co. (See Kessler, Armin G., assignor.)
Farrington, James C., La Fayette, Ind. Fence guard. 1,664,603; Apr. 3.
Fauser, Oscar W., Bellerose, N. Y., assignor to Congoleum-Nairn, Inc. Rug or similar article. Des. 74,829; Apr. 3.
Federal Steel Sash Company. (See Nesheim, Anders H., assignor.)
Fehrmann, Adolf, Hamburg, Germany. Direction signal. 1,665,087; Apr. 3.
Ferrari, Earnest R., North Bend, Oreg. Cutting or slicing machine. 1,665,131; Apr. 3.
Field, Edward I. (See Cook, Edward W., assignor.)
Field, Lloyd M., et al. (See Staples, Charles F., assignor.)
Fields, Austin. (See Kitchen, R. H., and Norris, assignors.)
Filer, Adelbert F., assignor to H. H. Bryans, trustee, Birmingham, Ala. Automobile radiator-cap ornament. Des. 74,830; Apr. 3.
Finn, Sidney J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for trimming rubber heels. 1,664,604; Apr. 3.
Firestone Tire & Rubber Company, The. (See Stevens, Horace D., assignor.)
First, Mahlon E., Lakewood, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio. Single-roll crusher. 1,664,877; Apr. 3.
Firth, Elmer W., Jamaica, assignor of one-half to H. G. Miller, New York, N. Y. Sewer catch basin. 1,664,853; Apr. 3.
Fischer, Albert C., Chicago, Ill. Expansion-joint installer. 1,664,605; Apr. 3.
Fischer, Albert C., Chicago, Ill. Flashing for roofs or the like. 1,664,606; Apr. 3.
Fisher, Sydney, Fairfield, Conn., assignor to Flash Tray Advertising, Inc., New York, N. Y. Flash change tray. 1,665,132; Apr. 3.
Flash Tray Advertising, Inc. (See Fisher, Sydney, assignor.)
Fleming, Clifford A., Huntsville, Mo. Tractor sweep rake. 1,664,974; Apr. 3.
Flintermann, Gerhard, Orange N. J. Bearing. 1,664,878; Apr. 3.
Flintermann, Gerhard, West Orange, N. J. Bearing. 1,664,879; Apr. 3.
Flintermann, Gerhard, West Orange, N. J. Journal bearing. 1,664,880; Apr. 3.
Flower, John W., Wimborne, England. Crown-corking machine. 1,664,881; Apr. 3.
Forbell, Robert C., Los Angeles, Calif. Direction signal. 1,664,810; Apr. 3.
Forman, Paris R., Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y. Rocker step connection. 1,664,811; Apr. 3.
Fort Pitt Bedding Company. (See Trimble, Charles P., assignor.)
Fowler, Harvey A. L., Valley Stream, N. Y. Automatic lighter for gas water heaters. 1,665,088; Apr. 3.
Frakes, Frank F., assignor of one-half to J. M. Dedman, Columbia, Tenn. Attachment plug. 1,664,408; Apr. 3.
Franz, Joseph, Berlin-Neutempelhof, Germany. Machine for coating objects. 1,664,505; Apr. 3.
Frazier, William T., Chase City, Va. Wheel-aligning tool. 1,665,161; Apr. 3.
Fredericksen Company. (See Schupp, Arthur A., assignor.)
Fredrick, Edgar, New Orleans, assignor of one-half to L. J. Le Blanc, Jefferson Parish, La. Resilient tire. 1,664,674; Apr. 3.
Freiberger, Moritz, and A. Holtmann, Berlin-Charlottenburg, Germany. Calico-printing color composition and process. 1,665,162; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-injection system. 1,664,607; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-injection system. 1,664,608; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-injection system. 1,664,609; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-feeding system. 1,664,610; Apr. 3.

French, Louis O., Milwaukee, Wis. Fuel-injection system. 1,664,611; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-control valve. 1,664,612; Apr. 3.
French, Louis O., Milwaukee, Wis. Electromagnetic valve. 1,664,613; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-injection system. 1,664,614; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-injection system. 1,664,615; Apr. 3.
French, Louis O., Milwaukee, Wis. Fuel-control valve. 1,664,616; Apr. 3.
Friction Power Corporation Limited. (See McPherson, Charles, assignor.)
Friedenthal, Adolph L., Portland, Oreg. Woolen spat. 1,664,617; Apr. 3.
Fried. Krupp Aktiengesellschaft. (See Bartholdy, Max, assignor.)
Fried. Krupp Germaniawerft Aktiengesellschaft. (See Herkt, Ernst, assignor.)
Friend, Berthold, Brooklyn, N. Y. Removable lining for closets and the like. 1,664,854; Apr. 3.
Fry, John W., Struthers, Ohio. Stabilizing spring. 1,664,618; Apr. 3.
Fulton Machine Co. (See Nayer, Carl F., assignor.)
G & O Manufacturing Company, The. (See Gargiulo, F., Edwards, and Oppe, assignors.)
Gaffney, John O., Arroyo Grande, Calif. Pipe cutter. 1,665,059; Apr. 3.
Gallagher, Charles R., assignor to Universal Holding Company, Los Angeles, Calif. Floating deck for oil tanks or the like. 1,665,163; Apr. 3.
Gamewell Company, The. (See King, George E., assignor.)
Gamewell Company, The. (See Suren, Nathan H., assignor.)
Ganzfried, Adolf, and W. B. Clary, Los Angeles, Calif. Smoker's mouthpiece. 1,665,023; Apr. 3.
Gard, Earle W., Long Beach, B. G. Aldridge, Los Angeles County, and H. J. Multer, Huntington Park, Calif. Apparatus for separating liquid containing a dispersed phase of another liquid. 1,665,164; Apr. 3.
Gard, John S., Los Angeles, Calif. Antisqueak device for vehicle brakes. 1,664,855; Apr. 3.
Gardner, Grandison, Luke Field, Hawaii. Bomb sight. 1,664,409; Apr. 3.
Gargiulo, Frederick, E. G. Edwards, and C. Oppe, assignors to The G & O Manufacturing Company, New Haven, Conn. Radiator. 1,664,812; Apr. 3.
Gas Research Company, The. (See Smith, Harry F., assignor.)
Gatchell, Frederick D., New York, N. Y. Oil bottle. Des. 74,828; Apr. 3.
Gates, Ernest W., Needham, Mass. Game device. 1,664,506; Apr. 3.
Gelb, Ambrose C., assignor to Gelb & Schaefer Co., Chicago, Ill. Case for musical instruments. 1,664,476; Apr. 3.
Gelb & Schaefer Co. (See Gelb, Ambrose C., assignor.)
Gem Engineering Corporation. (See Barnes, Llewellyn T., assignor.)
General Fuel Briquette Corporation, The. (See Stillman, Albert L., assignor.)
General Motors Corporation. (See Denyes, Harry M., assignor.)
General Motors Corporation. (See Schjolin, Eric O., assignor.)
General Motors Corporation. (See Strickland, William R., assignor.)
General Motors Corporation. (See Williams, Charles E., assignor.)
General Motors Research Corporation. (See Hallett, George E. A., assignor.)
General Motors Research Corporation. (See Short, Charles R., assignor.)
General Petroleum Corporation of California. (See Olsen, George F., assignor.)
General Petroleum Corporation of California. (See Roth, Ernest W., assignor.)
Genest, Lucien, Montreal, Quebec, Canada. Tickets holder. 1,665,057; Apr. 3.
Genuine Bronze Fixture Co. Inc. (See Sobel, Joseph, assignor.)
Geschickter, Charles F., Washington, D. C. Door, sash, and screen. 1,665,024; Apr. 3.
Gestetner, D., Limited. (See Gestetner, David, assignor.)
Gestetner, David, assignor to D. Gestetner Limited, London, England. Duplicating. 1,664,675; Apr. 3.
Geyer, Harvey D., assignor to The Inland Manufacturing Company, Dayton, Ohio. Ice-cream-cabinet lid. 1,664,545; Apr. 3.
Geyer, Harvey D., and V. E. Clark, assignors to Dayton-Wright Company, Dayton, Ohio. Elastic motor mounting for vehicles. 1,664,662; Apr. 3.
Gibson, Virgil L., Salem, Oreg. Drawbar shift for tractors. 1,665,133; Apr. 3.
Gilbert, Sidney C., Jackson, Ohio. Bottle-handling means. 1,665,025; Apr. 3.
Gilbertson, Ansel P., Wausau, Wis. Vending machine. 1,664,546; Apr. 3.
Gillen, George A., assignor to Gillen, Kimmey, Baker Syndicate Inc., New York, N. Y. Lock for motor vehicles. 1,664,620; Apr. 3.
Gillen, Kimmey, Baker Syndicate. (See Gillen, George A., assignor.)
Gillett, Edward H. J. C., Hampstead, London, England. Friction or adhesion gearing. 1,665,165; Apr. 3.
Gillis, Leon W., Alderwood Manor, Wash. Filament-current-reversing device. 1,664,813; Apr. 3.
Gilmore, Forrest E., Company. (See Gilmore, Forrest E., assignor.)
Gilmore, Forrest E., Los Angeles, Calif., assignor to Forrest E. Gilmore Company, Portland, Oreg. Fire still and oil treater. 1,664,920; Apr. 3.
Gilstrap, Orin. (See Lambert, William R., assignor.)
Ginsburg, Louis E. (See Imersheim, H., and Ginsburg.)
Girard, Albert, Canisteo, N. Y. Cotter-pin-spreading tool. 1,664,619; Apr. 3.
Gisholt Machine Company. (See Class, George M., assignor.)
Goetzenberger, Ralph L., Philadelphia, Pa. Fuse setter. 1,664,676; Apr. 3.
Goff, John A. (See Goff, Judson L., assignor.)
Goff, Judson L., assignor of one-half to J. A. Goff, Topeka, Kans. Deflation tool for tubes of pneumatic tires. 1,664,621; Apr. 3.
Goldman, Paul E., Pittsburgh, Pa. Washboiler. 1,664,921; Apr. 3.
Gommel, Dewey E., assignor to E. C. Atkins & Company, Indianapolis, Ind. Hack saw. 1,665,090; Apr. 3.
Goodman Manufacturing Company. (See Davis, Charles E., assignor.)
Goodman Manufacturing Company. (See Pray, Thomas E., assignor.)
Goodrich, Chauncey M., Windsor, Ontario, Canada. Support for overhead cables. 1,664,922; Apr. 3.
Gottschalk, Ernest O., Dresden, Germany. Dispensing closure for bottles and the like. 1,664,975; Apr. 3.
Gouvion, Franz, Brussels, Belgium. Liquid-distributing apparatus. 1,665,093; Apr. 3.
Goyne, William H., Tillamook, Oreg. Flying machine. 1,665,091; Apr. 3.
Graff, George, assignor to The Dura Company, Toledo, Ohio. Handle for door latches or the like. Des. 74,827; Apr. 3.
Graham Brothers. (See Milner, Nugent, assignor.)
Graham Brothers. (See Neely, William H., assignor.)
Graham, John E., London, England. Electrical connecter. 1,665,166; Apr. 3.
Grant, Albert E., New York, N. Y. Apparatus for maintaining uniform oil level. 1,665,026; Apr. 3.
Grebe, Conrad H., assignor of one-half to L. Mentrum, Portland, Oreg. Kalamein machine. 1,664,677; Apr. 3.
Green, Albert H., executor. (See Green, Walter R.)
Green, Walter R., deceased; A. H. Green, executor, assignor to International Stamping Company, Chicago, Ill. Underslung tire carrier. 1,664,856; Apr. 3.
Greenop, Norton, Leigh-on-Sea, England. Banjo and similar musical instruments. 1,664,547; Apr. 3.
Greenwald, Harold A., and J. D. Howe, assignors to Whitehead & Kales, Detroit, Mich. Oil burner. 1,664,410; Apr. 3.
Greenwood, Jasper L., North East Harbor, Nova Scotia, Canada. Wheel rim. 1,665,092; Apr. 3.
Griffin, Henry W., New York, N. Y., and L. F. Howard, Edgewood Borough, assignors to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,664 814; Apr. 3.
Grignon, Irvel J., Duluth, Minn. Cigarette case. 1,664,743; Apr. 3.
Grimes, David, Grasmere, N. Y. Radio apparatus. 1,664,548; Apr. 3.
Grimm, Hans G., Munich, Germany. Stabilizing chemical substances. 1,664,678; Apr. 3.
Griswold Manufacturing Company, The. (See Massing, Charles A., assignor.)
Groene, William F., assignor to The R. K. Le Blond Machine Tool Company, Cincinnati, Ohio. Crank-shaft lathe chuck. 1,664,622; Apr. 3.
Grofroos, Hugo, Copenhagen, Denmark. Manufacture of burnt building materials or the like of clay. 1,664,815; Apr. 3.
Gubelmann, Ivan. (See Weiland, H. J., and Gubelmann.)
Gulbenkian Seamless Rug Company. (See Smith, William E., assignor.)
Gunning, William A., assignor to American Optical Company, Southbridge, Mass. Lens-testing machinery. 1,664,923; Apr. 3.
Gustafson, Edwin A., assignor to A C Spark Plug Company, Flint, Mich. Instrument panel. 1,664,679; Apr. 3.
Gustafson, Edwin L., Fort Dodge, Iowa, assignor, by mesne assignments, to United States Gypsum Company. Wall board. 1,665,168; Apr. 3.
Haas, Fred S. (See Einstein, S., Peaslee, and Haas.)
Hadaway, William S., jr., New Rochelle, N. Y. Metal-casting machine. 1,664,882; Apr. 3.
Hale Fire Pump Co., The. (See Wendell, Evert J., assignor.)
Haley, James H., Jackson, Mich. Mold for forming concrete plant-protectors. 1,665,027; Apr. 3.
Hall, Ralph R. (See Severns, T., and Hall.)
Hallett, George E. A., assignor to General Motors Research Corporation, Dayton, Ohio. Hydraulic braking system for motor vehicles. 1,664,680; Apr. 3.
Halvorsen, Axel I. S., assignor to McCormick Brothers Company, Albany, Ind. Support for flexible doors of kitchen cabinets. 1,665,028; Apr. 3.

Halvorsen, Olaf. (See Kiesling, S. F., and Halvorsen.)
Hamilton, Charles S., Harrison, assignor to New York Mills Corporation, New York Mills, N. Y. Pile fabric. Des. 74,831; Apr. 3.
Hamilton, Francis F., Indianapolis, Ind. Box. Des. 74,832; Apr. 3.
Hammond, John H., jr., Gloucester, Mass. System of control by compressional waves. 1,664,549; Apr. 3.
Hammond, John H., jr., Goucester, Mass. Shutter-control mechanism. 1,664,550; Apr. 3.
Hammond, John H., jr., Gloucester, Mass. Thermostat control for cooking utensils. 1,664,551; Apr. 3.
Hammond, John H., jr., Gloucester, Mass. Pedal control for pipe organs. 1,664,552; Apr. 3.
Hammond, John H., jr., Gloucester, Mass. Successively-operated tone modulator. 1,664,553; Apr. 3.
Hammond, John H., jr., Gloucester, Mass. Pipe organ for producing a piano effect. 1,664,554; Apr. 3.
Hammond, John H., jr., Gloucester, Mass. Power-operated tone-control mechanism. 1,664,555; Apr. 3.
Hammond, John H., jr., Gloucester, Mass. Modulating reflectors for controlling the rate of change of sound emission. 1,664,556; Apr. 3.
Hanch, Charles C., Connersville, Ind. Lubricating piston. 1,664,507; Apr. 3.
Hancock, Harry W., Jackson, Mich. Door latch. 1,664,681; Apr. 3.
Hanff, Ferdinand, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Machine for making metallic tubing. 1,664,976; Apr. 3.
Hanna, G. Dallas, assignor to Associated Oil Company, San Francisco, Calif. Obtaining data in earth bores. 1,665,058; Apr. 3.
Hanna, Richard W., Piedmont, assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif. Distilling lubricating oils. 1,664,977; Apr. 3.
Hannan, James W., Coffeyville, Kans. Air-pump stroke and pressure indicator. 1,664,557; Apr. 3.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Broaching tool. 1,664,623; Apr. 3.
Hansen, Fred E., Lakewood, assignor to The Hansen Manufacturing Company, Cleveland, Ohio. Nozzle. 1,664,816; Apr. 3.
Hansen Manufacturing Company, The. (See Hansen, Fred E., assignor.)
Harbin, Hal H. (See White, Joseph H., assignor.)
Hardman, Albert H., Wheeling, W. Va. Push-button switch. 1,664,682; Apr. 3.
Hardman, William, Hamilton, Ontario, Canada. Evener-motion-controlled combined drive between finishing lapper and hopper feeder. 1,664,411; Apr. 3.
Harer, George W., and J. J. Burri, Chicago, Ill. Grain-car door. 1,664,978; Apr. 3.
Harkless, Meri J., Homewood, Ill. Cigarette lighter. 1,664,857; Apr. 3.
Harper, Philip S., Chicago, Ill. Gas burner. 1,664,508; Apr. 3.
Harper, Philip S., Chicago, Ill. Gar-range burner. 1,664,509; Apr. 3.
Harris, J. M., et al. (See Simpson, Arthur E., assignor.)
Hartkopf, Carl F., Georgetown, Ill. Nut locks. 1,664,744 Apr. 3.
Hartmann Trunk Company. (See Ritter, Julius, jr., assignor.)
Hartnett, Henry J., Los Angeles, Calif. Combination water faucet and sink trap. 1,665,029; Apr. 3.
Hartwig, Marcell, Los Angeles, Calif. Bunion corrector. 1,665,030; Apr. 3.
Hastings, Herbert, Brighton, N. Y. Liquid gauge. 1,664,558; Apr. 3.
Hatzel, Adolf, Selb, Germany, assignor to Mitchell, Woodbury Company, Boston, Mass. Plate or similar article. Des. 74,833; Apr. 3.
Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Suction air intake. 1,664,683; Apr. 3.
Haynes, Pierre E., Buffalo, N. Y., assignor to The Linde Air Products Company. Production of helium from natural gas. 1,664,412; Apr. 3.
Heaton, Herman C., Chicago, Ill., assignor, by mesne assignments, to Diamond Power Specialty Corporation, Detroit, Mich. Boiler cleaner. 1,664,859; Apr. 3.
Hendley, Frederick H. (See Rutherford, Richard, assignor.)
Headley, Frederick H., Northfield, near Birmingham, England. Scooter. 1,664,858; Apr. 3.
Hebbard, Harrison, East Orange, assignor to Dominck & Haff, Inc., Newark, N. J. Handle for a knife or similar article. Des. 74,834; Apr. 3.
Heer, Edward E. (See Schepman, Frederick W., assignor.)
Heichen, Morris, Brooklyn, N. Y. Electric-fixture mount. 1,664,624; Apr. 3.
Heinrichs, Berg, Chicago, Ill., assignor to Mid-West Box Company, Anderson, Ind. Cutting and perforating mechanism. 1,664,413; Apr. 3.
Heise, Otto W., Bridgeport, Conn., assignor, by mesne assignments, to Consolidated Ashcroft Hancock Company, New York, N. Y. Nonvibrating gauge. 1,664,776; Apr. 3.
Helsing, Raymond A., Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signal system. 1,664,860; Apr. 3.
Heigeby, Ralph O., assignor to A C Spark Plug Company, Flint, Mich. Dash light. 1,664,684; Apr. 3.
Helton, Peyton, Abbott, Tex. Cotton harvester. 1,664,924; Apr. 3.
Hemco Electric Manufacturing Company. (See McKinley, Benjamin P., assignor.)
Henry, Claude, Flint, Mich. Tire boot. 1,665,094; Apr. 3.
Henry, Jesse B., Connersville, Ind. Electrical plug lock. 1,665,095; Apr. 3.
Herkt, Ernst, Kiel, assignor to Fried. Krupp Germaniawerft Aktiengesellschaft, Kiel-Gaarden, Germany. Scavenging internal-combustion engine. 1,664,817; Apr. 3.
Herman, Joseph, New York, N. Y., assignor to American Telephone and Telegraph Company, Manual Morse multiplex system. 1,664,453; Apr. 3.
Herman, Karl, Chester, Pa. Window cleaner and clearer. 1,665,031; Apr. 3.
Hermance Machine Company. (See Betterley, Roland O., assignor.)
Heron, Sam D., Dayton, Ohio. Air-cooling internal-combustion engine. 1,664,414; Apr. 3.
Herzog, Eugene, Golden Valley, N. Dak. Display device for goods and prices. 1,664,415; Apr. 3.
Hewett, John R., Schenectady, N. Y. Photographic exposure calculator. 1,664,818; Apr. 3.
Heywood-Wakefield Company. (See Mathisen, Kristian M., assignor.)
Hill, Henry J., Jersey City, N. J. Mail receiving and delivering device. 1,664,819; Apr. 3.
Hill Laundry Equipment Co. (See Schrenkeisen, William C., assignor.)
Hill, Oris C., Pawtucket, R. I. Snap link. 1,665,059; Apr. 3.
Himmelein, George J. (See Daniels, S., and Himmelein.)
Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Automatic control means for electromagnetic operating devices. 1,665,060; Apr. 3.
Hitchcock, Helen S., New York, N. Y. Articulation of doll members. 1,664,979; Apr. 3.
Hoagland, Frank O., Bridgeport, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Fluid pump. 1,664,745; Apr. 3.
Hobart Manufacturing Company. (See Merseles, H. R., and Wood, assignors.)
Hoe, R., and Co. (See Sheldon, Edward P., assignor.)
Hohorst, William F., Monrovia, Calif. Liquid-level indicator. 1,664,416; Apr. 3.
Holdaway, Hall H., Long Beach, Calif. Welding bearing pins to legs of drill bits. 1,664,883; Apr. 3.
Holland, Andrew J., King City, Mo. Attachment for mowers. 1,665,032; Apr. 3.
Hollis, Otis A., Knoxville Borough, Pa. Erecting forms and apparatus for casting concrete walls. 1,664,884; Apr. 3.
Holmes, Edward C., Cincinnati, Ohio. Molding machine. 1,664,559; Apr. 3.
Holmes, Robert H., Chicago, Ill. Snap fastener. 1,665,096; Apr. 3.
Holtmann, August. (See Freiberger, M., and Holtmann.)
Holtsclaw, Oren E., assignor of one-half to G. I. Sellers & Sons Company, Elwood, Ind. Holder for electric fuses. 1,665,169; Apr. 3.
Holtz, Abraham, Bronx, assignor to Sadinoff & Wendroff Inc., New York, N. Y. Trimming and making same. 1,664,980; Apr. 3.
Horii, Shinjiro, Kanda-Ku, Tokyo, Japan. Stencil sheet. 1,664,777; Apr. 3.
Hosterman, Arthur D. (See Bowlus, Henry C., assignor.)
Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Metal can. Des. 74,835; Apr. 3.
Howard, John A., West Brighton, N. Y. Windshield-cleaning device. 1,664,746; Apr. 3.
Howard, Lemuel F. (See Griffin, H. W., and Howard.)
Howe, Donald W., E. R. Pickett, and D. M. McBean, assignors to Beech-Nut Packing Company, Canajoharie, N. Y. Cleaning chicle and similar gums. 1,664,981; Apr. 3.
Howe, John D. (See Greenwald, H. A., and Howe.)
Hudson, William L., Syracuse, N. Y. Radiocondenser. 1,664,085; Apr. 3.
Huenefeld, Walter E., Cincinnati, Ohio. Stovepipe. 1,664,885; Apr. 3.
Huffman Manufacturing Company, The. (See Hughes, Robert D., assignor.)
Hughes, Charles L., Hamilton, Ontario, Canada. Window fastener. 1,664,820; Apr. 3.
Hughes, Howard R., jr., Houston, Tex. Shock absorber. 1,664,510; Apr. 3.
Hughes, Robert D., assignor to The Huffman Manufacturing Company, Dayton, Ohio. Measuring can. 1,664,560; Apr. 3.
Huguenin, Albert, Paris, France. Circulation pump of the rotary type. 1,665,097; Apr. 3.
Hulshizer, George W., Stewartsville, assignor to Ingersoll-Rand Company, Jersey City, N. J. Rotation mechanism for rock drills. 1,664,625; Apr. 3.

Humphrey, Clayton W., Unionville, Conn. Jointed rule. 1,664,886; Apr. 3.
Hunt, Franklin L., and A. H. Mears, Washington, D. C. Combined statoscope and rate-of-climb indicator. 1,664,417; Apr. 3.
Hunt, Franklin L., and R. C. Sylvander, Washington, D. C. Aircraft ground-speed indicator. 1,664,464; Apr. 3.
Hunter, Joseph H., assignor to Detroit Insulated Wire Company, Detroit, Mich. Flexible robe rail. 1,664,418; Apr. 3.
Hunter, Joseph H., assignor to Detroit Insulated Wire Company, Detroit, Mich. Junction fitting for metallic armored electrical conductors. 1,664,686; Apr. 3.
Hunzelman, John B., Somerville, assignor to Wm. F. Schrafft & Sons Corp., Boston, Mass. Shipping case. 1,664,477; Apr. 3.
Hupp, Lonzo R., Urbana, Ohio. Planter. 1,664,925; Apr. 3.
Hutchins Car Roofing Company. (See Wilson, Alfred R., assignor.)
Hutchins, Harry H., New York, N. Y. Comb. 1,665,134; Apr. 3.
Hynes, Lee P., Albany, N. Y., assignor, by mesne assignments, to Consolidated Car-Heating Company, Inc., Albany, N. Y. Thermostat. 1,664,778; Apr. 3.
Illinois Watch Case Company. (See Bates, George T., assignor.)
Illinois Watch Case Company. (See Eppenstein, Sidney C., assignor.)
Illinois Watch Case Company. (See Wakefield, Frank E., assignor.)
Imershein, Harriet, and L. E. Ginsburg, N. Y., assignors to Fairy Brassiere Co., Inc. Brassière bust supporter. 1,664,926; Apr. 3.
Ingersoll-Rand Company. See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Hulshizer, George W., assignor.)
Ingersoll-Rand Company. (See Prellwitz, William, assignor.)
Inland Manufacturing Company, The. (See Geyer, Harvey D., assignor.)
International Combustion Engineering Corporation. (See Skelly, John S., assignor.)
International Stamping Company. (See Green, Walter R., assignor.)
International Time Recording Company of New York. (See Miles, Joseph W., assignor.)
Isbell, Elton, Los Angeles, Calif. Information display device. 1,664,511; Apr. 3.
Ito, Yei, Selma, Calif. Sanitary protector. 1,664,620; Apr. 3.
J. & C. G. Bolinders Mekaniska Verkstads Aktiebolog. (See Liffiander, J. O., and Johnson, assignors.)
Jackman, William B., Niagara Falls, N. Y. Dental acid container. 1,664,419; Apr. 3.
Janca, Joseph J., assignor to The Emerson Electric Mfg. Co., St. Louis, Mo. Short-circuiting mechanism. 1,664,561; Apr. 3.
Japy, Albert P., Berne-Seloncourt, France. Pulsometer. 1,664,927; Apr. 3.
Jeffrey Manufacturing Company, The. (See Montgomery, William J., assignor.)
Jensen, Carl C., Chicago, Ill. Clamp nail. 1,664,687; Apr. 3.
Jensen, Soren K., Wichita, Kans. Insulated container. 1,665,033; Apr. 3.
Jensen, Thorvald, St. Louis, Mo., assignor to The Winther Company, Wilmington, Del. Automotive drive. 1,664,502; Apr. 3.
Jett, George C., assignor to Runge Corn Harvester Company, Milwaukee, Wis. Gatherer. 1,665,034; Apr. 3.
Jobst, Conrad, assignor, by mesne assignments, to The Toledo Automatic Brush Machine Company, Toledo, Ohio. Brush-making machine. 1,664,420; Apr. 3.
Jobst, Conrad, assignor, by mesne assignments, to The Toledo Automatic Brush Machine Company, Toledo, Ohio. Tuft-forming mechanism. 1,664,421; Apr. 3.
Jobst, Conrad, assignor, by mesne assignments, to The Ohio. Work holder for brush machines. 1,664,422; Apr. 3.
Jobst, Conrad, assignor to The Toledo Automatic Brush Machine Company, Toledo, Ohio. Multiple work clamp for brush machines. 1,664,423; Apr. 3.
Jobst, Conrad, assignor to The Toledo Automatic Brush Machine Company, Toledo, Ohio. Tuft-separating mechanism for brush machines. 1,664,424; Apr. 3. Toledo Automatic Brush Machine Company, Toledo,
Jobst, Conrad, assignor to The Toledo Automatic Brush Machine Company, Toledo, Ohio. Continuous trimmer for brush machines. 1,664,425; Apr. 3.
Johns-Manville Corporation. (See Williams, Samuel A., assignor.)
Johnson, Alfred, Richfield, Minn. Overalls. 1,664,512; Apr. 3.
Johnson, Carl J. A. (See Liffiander, J. O., and Johnson.)
Johnson, Earl B., Hartsdale, N. Y. Antiskid chain for automobiles. 1,665,098; Apr. 3.
Johnson, Oscar W., assignor to Ward-Love Pump Corporation, Rockford, Ill. Sanitary pump. 1,664,930; Apr. 3.
Johnston, Frank E., Detroit, Mich. Radiator shield. 1,664,931; Apr. 3.
Joiner, Sylvester L., McGregor, Tex. Car-coupler-lock-lifter safety attachment. 1,664,982; Apr. 3.
Jones, George J., and E. J. Blanning, New Castle, Pa. Extractor for tuyères and tuyère coolers. 1,665,135; Apr. 3.
Jones, Lester L., Oradell, N. J. Variometer. 1,664,513; Apr. 3.
Jones, Louis W., Los Angeles, Calif. Melting pot. 1,664,779; Apr. 3.
Joseph, Frederick. (See Creamer, I. P., and Joseph.)
Judd, Richard, E. Taylor, and R. S. McNaney, assignors to Premier Warm-Air Heater Company, Dowagiac, Mich. Additional air supply for warm-air furnaces. 1,664,821; Apr. 3.
Judson, Russell V., Detroit, Mich. Adjustable sorting machine. 1,665,061; Apr. 3.
Juricinec, François, Paris, France. Monkey wrench. 1,664,932; Apr. 3.
Kaczmarski, Bronislaw, Detroit, Mich. Shade roller. 1,664,627; Apr. 3.
Kamensky, Basile, Berlin, Germany. Internal-combustion engine without carburetor. 1,664,747; Apr. 3.
Katz, Aaron S., New York, N. Y. Console table and cabinet. Des. 74,836; Apr. 3.
Kaupke, Lee H., nasignor to Rock Island Plow Company, Rock Island, Ill. Windrow hay loader. 1,664,688; Apr. 3.
Keene, Alvin D., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Tilting-hearth-tray furnace. 1,664,749; Apr. 3.
Kellogg Switchboard and Supply Company. (See Currier, H. D., and Shull, assignors.)
Kelly, William M., Westfield, N. J. Snap guide. 1,664,928; Apr. 3.
Kelly, William M., Westfield, N. J. Sheet-feeding mechanism. 1,664,929; Apr. 3.
Kennett, Richard, assignor of one-third to S. Randall, St. Louis, Mo. Shoe. 1,664,563; Apr. 3.
Kern, Ludwig, Baltimore, Md. Manufacturing chamotte materials. 1,664,689; Apr. 3.
Kessler, Armin G., assignor to Farrell Foundry and Machine Co., Buffalo, N. Y. Fluid-circulating plate. 1,664,628; Apr. 3.
Kharasch, Morris S., College Park, Md. Water-soluble metallic organic compound and making the same. Re16,921; Apr. 3.
Kielberg, Henry, Martins Ferry, Ohio, assignor to Wheeling Steel Corporation, Wheeling, W. Va. Producing tapered expanded-metal receptacles. 1,664,629; Apr. 3.
Kiesling, Samuel F., and O. Halvorsen, Chicago, Ill. Work holder for printing and embossing machines. 1,665,099; Apr. 3.
Kimmel, George C., Worcester, Mass., assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Automatic coolant-arresting mechanism. 1,664,983; Apr. 3.
King, George E., Newton, assignor to The Gamewell Company, Newton Upper Falls, Mass. Signal instrument. 1,664,933; Apr. 3.
King, Robert W., New York, N. Y., assignor to American Telephone and Telegraph Company. Electrical translating circuit. 1,664,455; Apr. 3.
Kirkham, Philip, Riverside, Conn., and G. A. Scheel, Jackson Heights, assignors to F. A. O. Schwartz, New York, N. Y. Portable outdoor swimming pool. 1,664,887; Apr. 3.
Kirschner, Felix, Vienna, Austria. Production of galvanic metal coatings. 1,664,750; Apr. 3.
Kistler, William, Chatham, Ontario, Canada. Assembling tubular-steel-spoked automobile wheels. 1,664,822; Apr. 3.
Kitchen, Robert H., and H. N. Norris, assignors of one-third to A. Fields, Grayson, Ky. Direction indicator. 1,664,751; Apr. 3.
Klaucke, Hermann, Worcester, assignor to Baldwin Chain & Mfg. Co., Auburn, Mass. Pin-retaining means for chains. 1,665,100; Apr. 3.
Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Nested control for both clamp and speeds. 1,664,888; Apr. 3.
Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Detachable gear unit. 1,664,889; Apr. 3.
Kleebauer, Charles P., Cohoes, and R. M. Lackey, Waterford, assignors to Cohoes Envelope Co., Inc., Cohoes, N. Y. Parcel bag. 1,665,035; Apr. 3.
Klinch Lath Corporation. (See Strand, Joseph, assignor.)
Knapp Electric Corporation. (See Yessler, G. Fred, assignor.)
Knowles, Carroll, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Size indicator for surface grinders. 1,664,823; Apr. 3.
Koehler, William, Cleveland, Ohio. Production of magnesium oxide. 1,664,630; Apr. 3.
Koehler, William, Cleveland, Ohio. Production of refractory magnesia compounds. 1,664,631; Apr. 3.
Koeker, Carl H., Dayton, Ohio. Mop holder. 1,664,824; Apr. 3.
König, Georg, Berlin-Dahlem, Germany. Measuring the density of gas. 1,664,752; Apr. 3.
Koppers Company, The. (See Becker, Joseph, assignor.)
Koppers Company, The. (See Parry, Nathaniel G., assignor.)

Koppers Company, The. (See Puening, Franz, assignor.)
Koppers Company, The. (See Van Ackeren, Joseph, assignor.)
Koppers Development Corporation, The. (See Koppers, Heinrich, assignor.)
Koppers, Heinrich, Essen-Ruhr, Germany, assignor to The Koppers Development Corporation, Pittsburgh, Pa. Coking retort oven. 1,664,632; Apr. 3.
Korns, Lewis F., Minneapolis, Minn. Indirect lighting system for motor vehicles. 1,664,748; Apr. 3.
Kraft, Selmer A., St. Paul, and S. T. Sheppard, Mankato, Minn. Machine for washing dishes. 1,664,690; Apr. 3.
Kramer, Eric B., Brooklyn, N. Y. Capping machine. 1,664,514; Apr. 3.
Krejci, Robert F., Cleveland, Ohio. Retaining device. 1,664,890; Apr. 3.
Kretzschmar, Walter. (See Meyer, A., and Kretzschmar.)
Kronheim, Jacob, Cleveland, Ohio. Chair or couch. 1,664,934; Apr. 3.
Kulick, Edward L., Milwaukee, Wis., assignor, by mesne assignments, to Bendix Brake Company, Chicago, Ill. Bracket and brake lever. 1,664,825; Apr. 3.
Kyle, Samuel C., New York, N. Y. Smoker's stand. Des. 74,837; Apr. 3.
Lackey, Robert M. (See Kleebauer, C. P., and Lackey.)
Laing, Bryan. (See Nielsen, Harald, assignor.)
Lakewood Engineering Company, The. (See Carr, Edward G., assignor.)
Lambert, William R., assignor of one-fifth to O. Gilstrap, Norphlet, Ark. Opening device for cans. 1,664,515; Apr. 3.
Lane, Charles F., San Jose, Calif. Elevator. 1,665,101; Apr. 3.
Lang, John D., Aulander, N. C. Automatic privy-vault cover. 1,664,426; Apr. 3.
Lange, Henry, Quincy, Ill. Gas heater. Des. 74,838; Apr. 3.
Lange, Henry, Quincy, Ill. Heating stove. Des. 74,839; Apr. 3.
Langenfeld, Herman H., Earling, Iowa. Carton rack. 1,664,753; Apr. 3.
Langewisch, John T., Sweet Springs, Mo. Watering trough. 1,664,691; Apr. 3.
Lanphere, Clive W., New York, N. Y. Lock mechanism. 1,664,984; Apr. 3.
Larsen, Ole C., Minneapolis, Minn. Vise. 1,665,170; Apr. 3.
Lauffer, Jean, Logelbach, France. Pressure and drawing cylinder for spinning machines. 1,665,136; Apr. 3.
Laukel, Arthur K., Detroit, Mich. Mold for making metal patterns by electrodeposition. 1,665,062; Apr. 3.
Le Blanc, Louis J. (See Fredrick, Edgar, assignor.)
Le Blond, R. K., Machine Tool Company, The. (See Groene, William F., assignor.)
Lederer, Fred J., Buffalo, N. Y. Marking machine. 1,665,197; Apr. 3.
Lehmer, Herman K., Rockford, Ill. Road-subgrading machine. 1,664,634; Apr. 3.
Leibing, William E., Oakland, assignor to Magnus Fruit Products Co., San Francisco, Calif. Carbonated-water cooler. 1,664,780; Apr. 3.
Leland Electric Company, The. (See Leland, George H., assignor.)
Leland, George H., assignor of one-half to The Leland Electric Company, Dayton, Ohio. Dynamo-electric machine. 1,664,781; Apr. 3.
Lenher Engineering Company. (See Barrett, George E., assignor.)
Leuthesser, Fred W., Oak Park, Ill. Coupling for battery terminals. 1,664,692; Apr. 3.
Levinson, Lawrence H., Chicago, Ill. Shade holder. 1,664,516; Apr. 3.
Lewis, Essington. (See Power, W. P., and Lewis.)
Liebl, Henry J., Buffalo, N. Y. System of transportation. 1,664,517; Apr. 3.
Liflander, Johan O., and C. J. A. Johnson, assignors to J. & C. G. Bolinders Mekaniska Verkstads Aktiebolog, Stockholm, Sweden. Machine frame. 1,665,137; Apr. 3.
Lindberg, John F., assignor to Reliance Die & Stamping Company, Chicago, Ill. Electrostatic condenser. 1,664,518; Apr. 3.
Linde Air Products Company, The. (See Haynes, Pierre E., assignor.)
Linz, John, Pittsburgh, Pa. Ventilator. 1,664,456; Apr. 3.
Lipner, Abe, Indiana Harbor, Ind. Culinary strainer. 1,664,564; Apr. 3.
Littler, James H., assignor to S. Cheney & Son, Manlius, N. Y. Rotary grinder. 1,664,693; Apr. 3.
Livingston, Edward G. et al. (See Martin, Robert E., assignor.)
Livingston, Louis L., et al. (See Martin, Robert E., assignor.)
Lloyd, Alfred, London, England, assignor to M. F. Pratt, Rochester, N. Y. Electrical hair or massage brush. 1,664,457; Apr. 3.
Locke Insulator Corporation. (See Christensen, Oscar, assignor.)
Locomotive Terminal Improvement Company, The. (See Otis, Spencer, assignor.)
Lord, Fred W., assignor to The Oakes Manufacturing Company, Tipton, Ind. Storage brooder. 1,665,102; Apr. 3.
Lovvorn, Robert L., Gadsden, Ala. Valve-stem protector. 1,664,694; Apr. 3.
Lowe, William Q., Akron, Ohio. Clothes tongs. 1,664,935; Apr. 3.
Luke, Howard J., administrator. (See Luke, James A.)
Luke, James A., deceased; H. J. Luke, administrator, Cleveland, Ohio. Spring suspension for vehicles. 1,664,478; Apr. 3.
Lundgren, Jacob, assignor to Tinius Olsen Testing Machine Company, Philadelphia, Pa. Balancing machine. 1,665,138; Apr. 3.
Lundholm, Carl O., Moiese, Mont. Measuring device for containers. 1,665,139; Apr. 3.
Lusse Brothers. (See Lusse, Joseph, assignor.)
Lusse, Joseph, assignor to the firm of Lusse Brothers, Philadelphia, Pa. Vehicle controlling apparatus. 1,665,103; Apr. 3.
Lutzner, Frank. (See Oehmig, J., jr., and Lutzner.)
Lyman, Kent E., Cleveland, Ohio. Spring-actuated lubricator. 1,664,936; Apr. 3.
Lyne, Frederick C., Westminster, London, and J. Etchells, Aston, Birmingham, assignors to Vickers Limited, Westminster, London, England. Automatic regulation in electric-lighting systems. 1,664,519; Apr. 3.
Lynn, Thomas H., Williamsport, Pa. Tire carrier. 1,664,754; Apr. 3.
Lyon, Harry, Holbrook, assignor to P. E. Barbour, Quincy, doing business as Barbour Welting Company, Brockton, Mass., Beaded welting and making the same. 1,664,891; Apr. 3.
MacKean, Emroe A., Saugus, Mass. Throttle control for automobiles. 1,664,479; Apr. 3.
Magdeburger, Edward C., Washington, D. C. Internal-combustion engine. 1,664,782; Apr. 3.
Magill, Donald G., Brooklyn, assignor to American Can Company, New York, N. Y. Milk-bottle closure and applying same. 1,664,635; Apr. 3.
Magina, Joao, New Bedford, Mass. Harness-operated stop-motion device for looms. 1,664,520; Apr. 3.
Magnus Fruit Products Co. (See Leibing, William E., assignor.)
Magrath, George H., assignor to Whitin Machine Works, Whitinsville, Mass. Thread guide for spinning and twisting machines. 1,665,063; Apr. 3.
Magrath, George H., assignor to Whitin Machine Works, Whitinsville, Mass. Tool for removing waste from spindles. 1,665,064; Apr. 3.
Malloy, William W., San Pedro, Calif. Centrifugal machine. 1,665,065; Apr. 3.
Maloney, Stephen F., assignor of one-half to E. R. Widden, Scranton, Pa. Smoker's appliance. 1,664,937; Apr. 3.
Mammen, Lawrence W., Chicago, Ill. Airship. 1,664,565; Apr. 3.
Manning, Bowman & Co. (See Savage, George E., assignor.)
March, Carl, Chicago, Ill. Compound tool. 1,664,783; Apr. 3.
Mares, Cres, Corona, N Mex. Anchor plate. 1,664,458; Apr. 3.
Mariotti, Joseph J., assignor to Daprato Statuary Company, Chicago, Ill. Safe lock. Re16,919; Apr. 3.
Markey, John J., Washington, Pa. Tinning pot. Re16,922; Apr. 3.
Marquette Tool & Mfg. Company. (See Rode, Fredrich J., assignor.)
Marshall, Charles A. (See Boynton, Jesse L., assignor.)
Marshall, William, assignor to Briggs Manufacturing Company, Detroit, Mich. Fastener. 1,664,566; Apr. 3.
Martienssen, Ernst E., Hamburg, Germany. Drainage system for playing grounds. 1,665,104; Apr. 3.
Martin, Robert E., assignor of three one-hundredths to L. L. Livingston and one-twentieth to E. G. Livingston, Sheridan County, Wyo. Spark arrester. 1,655,036; Apr. 3.
Marvel Equipment Company, The. (See Spaeth, Charles, assignor.)
Mason, Charles T., Sumter, S. C. Control mechanism. 1,664,459; Apr. 3.
Massing, Charles A., Millcreek Township, Erie county, assignor to The Griswold Manufacturing Company, Erie, Pa. Skillet. 1,665,037; Apr. 3.
Master, Shavuksha D., Bombay, India. Tide pump. 1,665,140; Apr. 3.
Masters, Edwin G., Anderson, Ind. Novelty device. 1,664,695; Apr. 3.
Mathisen, Kristian M., Menominee, Mich., assignor to Heywood-Wakefield Company, Boston, Mass. Machine for squaring spoke stock. 1,664,861; Apr. 3.
Matteson, Jesse V., jr., Santa Rosa, Calif. Ortho rotor plane. 1,665,171; Apr. 3.
Maurer, John H., Long Beach, Calif. Combination fastener. 1,664,696; Apr. 3.
Mauser, Alfons, Cologne-Marienburg, Germany. Container. 1,664,985; Apr. 3.
Mayer, Augustine, St. Augustine, Fla. Cooling device. 1,664,636; Apr. 3.
Mayer, Charles P., Elizabeth, N. J. Flow meter. 1,665,141; Apr. 3.
Mayer, Fred, Philadelphia, Pa. Pocket construction. 1,664,460; Apr. 3.
Mayette, Anne D., Cleveland, Ohio. Cushion for sink strainers. 1,664,521; Apr. 3.

McBean, Douglas M. (See Howe, D. W., Pickett, and McBean.)
McCormick Brothers Company. (See Halvorsen, Axel I. S., assignor.)
McCree, Andrew A., St. Paul, Minn. Valve-actuating mechanism for concrete mixers. 1,664,427; Apr. 3.
McDonnell, Ellen, Chicago, Ill. Surgical appliance. 1,664,938; Apr. 3.
McIntire, Allyn B., Newton Center, assignor to Pepperell Manufacturing Company, Boston, Mass. Box cover. Des. 74,840; Apr. 3.
McKinley, Benjamin P., Flushing, assignor to Hemco Electric Manufacturing Company, Inc., Long Island City, N. Y. Plug connecter. 1,664,986; Apr. 3.
McMillan, Randal, and M. R. Schall, Palo Alto, Calif. Coffeepot. 1,665,143; Apr. 3.
McMurray, Hugh. (See West, Robert, assignor.)
McNaney, Ralph S. (See Judd, R., Taylor, and McNaney.)
McPherson, Charles, assignor, by mesne assignments, to Friction Power Corporation Limited, Montreal, Quebec, Canada. Power-transmitting device. 1,664,567; Apr. 3.
McVicker, Emery M., Milwaukee, assignor to J. F. McVicker, Milwaukee County, Wis. Rail anchor. 1,665,187; Apr. 3.
McVicker, J. F. (See McVicker, Emery M., assignor.)
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Co., Philadelphia, Pa. Electric welding machine. 1,665,038; Apr. 3.
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Co., Philadelphia, Pa. Electric welding machine. 1,665,066; Apr. 3.
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Co., Philadelphia, Pa. Electric welding machine. 1,665,067; Apr. 3.
Meaker Co., The. (See Miller, C. G., and Cleveland, assignors.)
Mears, Atherton H. (See Hunt, F. L., and Mears.)
Mentrum, Leonard. (See Grebe, Conrad H., assignor.)
Mercadante, Joseph. (See Thomson, Alfred M., assignor.)
Merker, Monte C., Reading, Pa. Billboard. 1,665,142; Apr. 3.
Merritt, Mary E. A., Long Beach, Calif. Easel. 1,664,784; Apr. 3.
Merseles, Henry R., Bronxville, and P. M. Wood, New Rochelle, N. Y., assignors, by mesne assignments, to Hobart Manufacturing Company, Troy, Ohio. Washing machine. 1,664,637; Apr. 3.
Messer, Edward, Pittsburgh, Pa. Marking confectionery. 1,664,826; Apr. 3.
Metzner, Albert W., assignor to J. Q. Sherman, Dayton, Ohio. Manifolding machine. 1,664,568; Apr. 3.
Metzroth, William, Syracuse, N. Y. Controlling means for starters for internal-combustion engines. 1,664,522; Apr. 3.
Meyer, Arthur, and W. Kretzschmar, New York, N. Y.; said Kretzschmar assignor to said Meyer. Necktie holder. 1,664,892; Apr. 3.
Meyer, Robert, Gelsenkirchen, Germany. Rotary engine. 1,664,987; Apr. 3.
Meyering, Bernard, Rochester, N. Y. Joint. 1,664,893; Apr. 3.
Mezger, Robert, Stuttgart, Germany. Producing stable emulsions. 1,665,105; Apr. 3.
Micall, John, Lawrence, Mass. Shank-forming tool. 1,665,172; Apr. 3.
Micks, Henry S., Chicago, Ill. Circuit-controlling device. 1,664,697; Apr. 3.
Midway Iron Works, Inc. (See Milz, Max J., assignor.)
Mid-West Box Company. (See Heinrichs, Berg, assignor.)
Miles, Joseph W., London, England, assignor to International Time Recording Company of New York, Endicott, N. Y. In-and-out machine. 1,664,523; Apr. 3.
Miller, Constantine G., and C. F. Cleveland, Chicago, Ill., assignors to The Meaker Co. Pickling machine. 1,664,428; Apr. 3.
Miller, Hugh G. (See Firth, Elmer W., assignor.)
Mills, Ronald V., Sandy Spring, Md., assignor to P. Q. Nyce, Washington, D. C. Electrochemical method of and means for protecting buried pipe lines against corrosion. 1,664,800; Apr. 3.
Milner, Nugent, assignor to Graham Brothers, Evansville, Ind. Bus-body construction. 1,664,569; Apr. 3.
Milz, Max J., assignor to Midway Iron Works, Inc., Taft, Calif. Band-wheel counterbalance. 1,664,524; Apr. 3.
Misener, John I., Syracuse, N. Y. Hammer attachment for electric drills and the like. 1,665,173; Apr. 3.
Mitchell, Woodbury Company. (See Auvera, Hugo, assignor.)
Mitchell, Woodbury Company. (See Hatzel, Adolf, assignor.)
Mitter, Joseph H., Chicago, Ill. Floor construction. 1,664,638; Apr. 3.
Mobley, Ida E., Roslyn, Pa. Sound reproducer. 1,664,988; Apr. 3.
Monroe Calculating Machine Company. (See Chase, George C., assignor.)
Montgomery, Gustavus A., Titusville, Pa. Casing elevator. 1,664,461; Apr. 3.
Montgomery, William J., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Ventilating apparatus. 1,665,039; Apr. 3.
Montgomery, William J., Columbus, Ohio, assignor to The Jeffrey Manufacturing Company. Ventilating apparatus. 1,665,174; Apr. 3.
Moore, Harry M., Elmira, Mo. Fence-wire structure. 1,664,785; Apr. 3.
Moore, Henry A. (See Stuart, T. F., and Moore.)
Moran, Alfred P., Ridgefield Park, N. J. Gasoline-storage-tank-fitting. 1,665,106; Apr. 3.
Morris, Frank E. (See Bergner, John C., assignor.)
Morrison, Robert A., and F. L. Oswald, Portland, Oreg. Fireproof iron stand. 1,664,698; Apr. 3.
Mortimer, Lewis F., Los Angeles, Calif. Dial lock for automatic telephones. 1,664,939; Apr. 3.
Mosler Lock Company, The. (See Benham, Edgar M., assignor.)
Mosler Lock Company, The. (See Benham, E. M., and Bauer, assignors.)
Mottler, Walter F., El Camp, Tex. Hayrake. 1,664,699; Apr. 3.
Muehleisen, Gottlieb, assignor to National Soil Conservation Company, Alma, Wis. Mail box. 1,664,462; Apr. 3.
Muller, George W., Washington, D. C. Railway rail and tie holding means. 1,665,107; Apr. 3.
Muller, George W., Washington, D. C. Rail-joint bar or fishplate. 1,665,108; Apr. 3.
Multer, Hugh J. (See Gard, E. W., Aldridge, and Multer.)
Multhaup, William, Winona, Minn. Electric paint remover. 1,664,429; Apr. 3.
Multiple Electric Products Company. (See Swenson, Swen R., assignor.)
Mumovich, Spiro, Anyox, British Columbia, Canada. Dust-collecting device for rock drills. 1,664,786; Apr. 3.
Munters, Carl G. (See Von Platen, B. C., and Munters.)
Murphy, James A., assignor to United States Cartridge Co., Lowell, Mass. Manufacture of primer anvils. 1,664,480; Apr. 3.
Murray, Howard J., New York, N. Y., assignor, by mesne assignments, to H. A. Douglas, Bronson, Mich. Burglarproof induction coil. Des. 16,920; Apr. 3.
Murray, Milton, Williams Wharf, Va. Fishing-tackle attachment. 1,665,144; Apr. 3.
Murray, Thomas E. (See Rypinski, Albert B., assignor.)
Muryn, John J., Milwaukee, Wis. Metal building construction. 1,664,463; Apr. 3.
N. V. Philip's Gloeilampenfabrieken. (See Bol, Cornelis, assignor.)
National Cash Register Company, The. (See Robertson, William H., assignor.)
National Cash Register Company, The. (See Tönsmann, Henry, assignor.)
National Cash Register Company, The. (See Von Pein, Edward J., assignor.)
National Pneumatic Company. (See Forman, Paris R., assignor.)
Natural Soil Conservation Company. (See Muehleisen, Gottlieb, assignor.)
Nayer, Carl F., Chicago, Ill., assignor to Fulton Machine Co. Paper-gripping device for plate printers. 1,664,700; Apr. 3.
Nead, John H. (See Reinartz, L. F., and Nead.)
Neely, William H., assignor to Graham Brothers, Evansville, Ind. Underslung tire carrier. Re16,923; Apr. 3.
Nelson, Henry A., Bijou Hills, S. Dak. Trimmer. 1,665,109; Apr. 3.
Nesheim, Anders H., Milwaukee, assignor to Federal Steel Sash Company, Waukesha, Wis. Ventilating-skylight-operating device. 1,664,894; Apr. 3.
Nethercut, Edgar S. (See Peterson, Burt A., assignor.)
New England Spun Silk Corporation. (See Wyss, Julius, assignor.)
New Jersey Zinc Company, The. (See Breyer, F. G., Bunce, and Weikel, assignors.)
Newport Company, The. (See Weiland, H. J., and Gubelmann, assignors.)
New York Lighting Fixture Mfg. Co., The. (See Aglow, Harry, assignor.)
New York Mills Corporation. (See Hamilton, Charles S., assignor.)
Nicholay, Paul, assignor to Deceleco, Inc., Wayne, Mich. Alignment strip for electrical barriers. 1,664,827; Apr. 3.
Nickels, James, Silvis, Ill. Automobile bumper. 1,664,989; Apr. 3.
Nieberding, Anthony A., Brookpark, Ohio. Heater. Des. 74,841; Apr. 3.
Nielsen, Harald, Muswell Hill, London, assignor of one-half to B. Laing, Hatfield, England. Manufacture of catalysts. 1,665,175; Apr. 3.
Niles-Bement-Pond Company. (See Cole, Lyndon C., assignor.)
Niles-Bement-Pond Company. (See Randolph, Clifford F., assignor.)
Norris, Henry N. (See Kitchen, R. H., and Norris.)
North, Clayton O., Tallmadge Township, Summit County, and W. Scott, assignors to The Rubber Service Laboratories Co., Akron, Ohio. Rubber-vulcanization accelerator. 1,664,481; Apr. 3.
Norton, Edward L., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical network. 1,664,755; Apr. 3.
Nyce, Peter Q. (See Mills, Ronald V., assignor.)
Nydqvist, Antenor, Trollhattan, Sweden. Blade wheel. 1,664,895; Apr. 3.

Oakes Manufacturing Company, The. (See Lord, Fred W., assignor.)
Oakley, George E., assignor, by mesne assignments, to Consolidated Car-Heating Company, Inc., Albany, N. Y. Air brake. 1,664,787; Apr. 3.
Oberhammer, Ludwig, Munich, Germany. Automatic or self-loading small arm. 1,664,788; Apr. 3.
O'Connor, Arthur F., assignor to Union Railway Equipment Company, Chicago, Ill. Chain anchor for brake gears. 1,665,188; Apr. 3.
Oehmig, Paul, jr., and F. Lutzner, Chicago, Ill. Making seamless tubing. 1,664,990; Apr. 3.
Olds, Richard, Walkersville, Australia. Machine for fleshing furred skins. 1,664,991; Apr. 3.
Olmsted, Roger W. (See Browne, W. G., and Olmsted.)
Olsen, George F., Los Angeles, Calif., assignor to General Petroleum Corporation of California. Neutralizing treatment of acid oils for lubricant stocks. 1,665,110; Apr. 3.
Olsen, George F., assignor to General Petroleum Corporation of California, Los Angeles, Calif. Treatment of lubricant stocks. 1,665,111; Apr. 3.
O'Neal, Nathaniel P., Hope, Ark. Masonry-jointing tool. 1,664,701; Apr. 3.
O'Neil, Henry J., Tampico, Ill. Disk-harrow attachment. 1,664,430; Apr. 3.
Open Hearth Combustion Company. (See Danforth, George L., jr., assignor.)
Oppe, Charles. (See Gargiulo, F., Edwards, and Oppe.)
Osborn, Glenn M., Salt Lake City, Utah. Milk-can cooler. 1,664,702; Apr. 3.
Osgood, Robert C., Claremont, N. H., assignor to Sullivan Machinery Company. Hauling mechanism. 1,665,068; Apr. 3.
Osthoff, Walter, Barmen, Germany. Heating the singeing members of cylinder singeing machines. 1,664,993; Apr. 3.
Oswald, Franklin L. (See Morrison, R. A., and Oswald.)
Oswego Falls Corporation. (See Wright, W. L., and Dolphin, assignors.)
Otis, Spencer, assignor to The Locomotive Terminal Improvement Company, Chicago, Ill. Keeping up the temperature in hot-water-supply systems. 1,664,862; Apr. 3.
Owen, William, Pittsburgh, Pa., assignors to Pittsburgh Plate Glass Company. Machine for rounding the edges of glass sheets. 1,665,040; Apr. 3.
Owens, John H., Elgin, Ill. Pit cover. 1,664,525; Apr. 3.
Paecht, Hugo C., assignor to Standard Safety Manufacturing Co., New Haven, Conn. Automatic guard for the intermittently-operated rams of power machines. 1,664,790; Apr. 3
Paff, George A., Portsmouth, Ohio, assignor to Wheeling Steel Corporation, Wheeling, W. Va. Machine for twisting the eyes of wire reels. 1,665,069; Apr. 3.
Page, John W., Chicago, Ill. Excavating shovel. 1,664,940; Apr. 3.
Pain, James, & Sons Limited. (See Craig, Alfred, assignor.)
Parke, Victor E. (See Slade, R. B., and Parke.)
Parry, Nathaniel G., assignor to The Koppers Company, Pittsburgh, P. Coking retort oven. 1,664,633; Apr. 3.
Parson, Ben G., South Bend, Ind., assignor to The Bendix Brake Company. Adjustable cam for brakes. 1,664,828; Apr. 3.
Parson, Walter. (See Welmer, A. W., and Smith, assignors.)
Parsons, John H., Pontiac, Mich. Ventilator for vehicles. 1,664,829; Apr. 3.
Peaslee, Willetts. (See Einstein, S., Peaslee, and Haas.)
Peltz, Gordon M., assignor to Corning Glass Works, Corning, N. Y. Apparatus for delivery of fluid to burners. 1,665,145; Apr. 3.
Pepperell Manufacturing Company. (See McIntire, Allyn B., assignor.)
Perco Heater Corporation. (See Boynton, Charles B., assignor.)
Perdue, George E., Santa Monica, Calif. Grindstone attachment for sausage mills. 1,664,896; Apr. 3.
Perilli, Louis, Portsmouth, N. H. Propelling mechanism for vehicles. 1,664,570; Apr. 3.
Perkins, Albert G., Buffalo, N. Y. Pipe joint. 1,664,941; Apr. 3.
Perry, Wilton H., Brooklyn, N. Y. Bottle and closure therefor. 1,664,756; Apr. 3.
Peterson, Burt A., Rockford, assignor to E. S. Nethercut, Evanston, Ill. Tying weavers' knots. 1,664,571; Apr. 3.
Pettingell, Frederic A., and A. Carlson, assignors to Dayton-Wright Company, Dayton, Ohio. Back-spring construction for seats. 1,664,526; Apr. 3.
Pfanhauser, Wilhelm A. F., Leipzig, Germany. Withdrawal of vapors and gases from galvanotechnical tanks. 1,664,482; Apr. 3.
Pflager, Harry M., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Truck pedestal. 1,664,830; Apr. 3.
Pflager, Harry M., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Truck pedestal. 1,664,831; Apr. 3.
Pickett, Earle R. (See Howe, D. W., Pickett, and McBean.)
Pierce, Robert C., Belleville, N. J., assignor, by mesne assignments, to American Chain Company, Inc. Tire bead. 1,665,070; Apr. 3.
Pilbrow, Alfred G., Chicago, Ill. Pass book for banks. 1,664,897; Apr. 3.
Pilkington Brothers Limited. (See Slocombe, Frank E., assignor.)
Piron Coal Distillation Systems, Inc. (See Piron, Emil, assignor.)
Piron, Emil, assignor to Piron Coal Distallation Systems, Inc., New York, N. Y. Apparatus for absorbing fluids from gases. 1,664,483; Apr. 3.
Piron, Emil, assignor to Piron Coal Distallation Systems, Inc., New York, N. Y. Removing tar from gases. 1,664,484; Apr. 3.
Pitchford, C. E., et al. (See Simpson, Arthur E., assignor.)
Pittsburgh Plate Glass Company. (See Hitchcock, Halbert K., assignor.)
Pittsburgh Plate Glass Company. (See Owen, William, assignor.)
Planess, Maurice, Alger, France. Plow. 1,665,041; Apr. 3.
Pongo, Sigmund, New York, N. Y. Electrotherapeutical apparatus. 1,664,992; Apr. 3.
Poole, Lora E., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Commutator-riveting machine. 1,664,527; Apr. 3.
Pope, Arthur W., jr., assignor to Waukesha Motor Company, Waukesha, Wis. Engine-balancing system 1,664,942; Apr. 3.
Pope, Elmer R., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-assembling machine. 1,664,639; Apr. 3.
Post, Claude L., Chicago, Ill. Sheet feeding and driving means. 1,664,640; Apr. 3.
Poulsen, Oscar, Alameda, Calif. Centrifugal pump. 1,664,572; Apr. 3.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,664,943; Apr. 3.
Power, William P., Newcastle, New South Wales, and E. Lewis, Malvern, Victoria, Australia, assignors to The Broken Hill Proprietary Company, Limited. Blast furnace. 1,664,832; Apr. 3.
Powers, Joseph H., Mills, Wyo. Traffic signal for automobiles. 1,664,791; Apr. 3.
Pratt, Milan F. (See Lloyd, Alfred, assignor.)
Pratt & Whitney Company. (See Doane, John A., assignor.)
Pratt & Whitney Company. (See Durkee, James W., assignor.)
Pratt & Whitney Company. (See Hoagland, Frank O., assignor.)
Pratt & Whitney Company. (See Knowles, Carroll, assignor.)
Pray, Thomas E., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,664,703; Apr. 3.
Prellwitz, William, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Steel retainer. 1,665,071; Apr. 3.
Premier Warm-Air Heater Company. (See Judd, R., Taylor, and McNaney, assignors.)
Prosperity Company, Inc., The. (See Davis, Ernest, assignor.)
Puening, Franz, assignor to The Koppers Company, Pittsburgh, Pa. Still. 1,664,863; Apr. 3.
Purchas, Frederick A., McGraw, N. Y. Candy box. 1,664,464; Apr. 3.
Purchas, Frederick A., McGraw, N. Y. Partitioning device. 1,664,465; Apr. 3.
Pyle, Ellis M. (See Zimmerman, F. D., and Pyle.)
Raasch, Paul K., East Akron, Ohio. Coaster wagon. 1,664,641; Apr. 3.
Ramgren, Napoleon, Ogilvie, Minn. Cream cooler. 1,664,704; Apr. 3.
Randall, Seth. (See Kennett, Richard, assignor.)
Randle, George N., Oakland, Calif. Urinal for automobiles and the like. 1,664,642; Apr. 3.
Randolph, Clifford F., Plainfield, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Tailstock-clamping mechanism. 1,664,757; Apr. 3.
Raschick, Charles T., St. Paul, Minn. Restaurant check. 1,664,573; Apr. 3.
Rasmussen, Chester A., Long Beach, Calif. Capping device for oil wells. 1,664,643; Apr. 3.
Rea, Augustin P., Mexico, Mexico. Jewelry. 1,664,994; Apr. 3.
Reach, Milton B., Sprinfield, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Tennis racket. 1,664,466; Apr. 3.
Reed, Clarence E., Wichita, Kans. Rotary drill bit of the flat-blade type. 1,664,528; Apr. 3.
Reinartz, Leo F., and J. H. Nead, assignors to The American Rolling Mill Company, Middletown, Ohio. Making commercially-pure iron alloys. 1,665,146; Apr. 3.
Reliance Die & Stamping Company. (See Lindberg, John F., assignor.)
Reo Motor Car Company. (See Wells, Walter W., assignor.)
Reynolds, Marvin C. (See Epstein, A. K., and Reynolds.)
Reynolds, Robert O., assignor to A. Baker, Auburn, Me. Electrically-heated-sadiron stand. 1,664,758; Apr. 3.

Rice, Barton & Fales, Inc. (See Vedder, John W., assignor.)
Richards, Ernst R., Chicago, Ill., assignor to American Assembling Machine Company, Inc., New York, N. Y. Tipping machine. 1,664,898; Apr. 3.
Richards, Temple, Glace Bay, Novia Scotia, Canada. Seeder. 1,665,042; Apr. 3.
Riehle Bros. Testing Machine Co. (See Tretch, W. J., and Buckingham, assignors.)
Ries, Frederick, Compton, Calif. Explosive package and carrier. 1,664,899; Apr. 3.
Rimailho, Emile, assignor to Compagnie des Forges & Acieries de la Marine & d'Homecourt, Paris, France. Arrangement providing for the aiming of an artillery carriage in all directions. 1,665,176; Apr. 3.
Ringer, Soren, Oak Park, Ill., assignor to Ringer-Worcester Company, Worcester, Mass. Metal receptacle. 1,664,431; Apr. 3.
Ringer-Worcester Company. (See Ringer, Soren, assignor.)
Ritter, Herbert G., assignor to Waukesha Motor Company, Waukesha, Wis. Bearing-bolt structure. 1,664,944; Apr. 3.
Ritter, Julius, jr., assignor to Hartmann Trunk Company, Racine, Wis. Clamping lock. 1,664,432; Apr. 3.
Robert, Alexander C., Desdemona, Tex. Self-service store equipment. 1,664,945; Apr. 3.
Robertson, William H., assignor to The National Cash Register Company, Dayton, Ohio. Cash register. 1,664,946; Apr. 3.
Rochelle, Joseph B., Hohen Solms, La. Ice-making apparatus. 1,664,705; Apr. 3.
Rock Island Plow Company. (See Kaupke, Lee H., assignor.)
Rode, Fredrich J., assignor to Marquette Tool & Mfg. Company, Chicago, Ill. Hydraulic cushion for sheet-metal presses. 1,664,485; Apr. 3.
Rode, Frederich J., assignor to Marquette Tool & Mfg. Company, Chicago, Ill. Hydraulic cushion for sheet-metal presses. 1,664,486; Apr. 3.
Rode, Fredrich J., assignor to Marquette Tool & Mfg. Company, Chicago, Ill. Hydraulic cushion for sheet-metal presses. 1,664,487; Apr. 3.
Rodolausse, Eloi, St. Antonin, France. Speed-controlling device for railway and tramway trains. 1,665,112; Apr. 3.
Roeske, Henry O., Belfast, N. Y. Household twine reel. 1,664,467; Apr. 3.
Roller, Frank W., East Orange, N. J., assignor to Roller-Smith Company. Circuit breaker. 1,665,113; Apr. 3.
Roller-Smith Company. (See Roller, Frank W., assignor.)
Rose, William H., Jersey City, N. J. Container closure. 1,664,995; Apr. 3.
Rosenbaum, Benjamin, Bronx, N. Y. Mixing valve. 1,664,900; Apr. 3.
Rosenbaum, Benjamin, New York, N. Y. Duplex valve and mixer. 1,664,901; Apr. 3.
Roth, Ernest W., assignor to General Petroleum Corporation of California, Los Angeles, Calif. Separation of acid-sludge emulsions. 1,665,180; Apr. 3.
Roth, Ernest W., assignor to General Petroleum Corporation of California, Los Angeles, Calif. Hydrolysis of acid sludge. 1,665,190; Apr. 3.
Roxana Petroleum Corporation. (See Carney, Samuel C., assignor.)
Rubber Service Laboratories Co., The. (See North, C. O., and Scott, assignors.)
Ruffner, James E., Jeannette, Pa. Washing machine. 1,664,792; Apr. 3.
Runge Corn Harvester Company. (See Jett, George C., assignor.)
Rusch, Mathew E., St. Paul, Minn. Traffic regulator. 1,664,947; Apr. 3.
Russ, John B., Shelton, assignor to The Basset Metal Goods Company, Inc., Derby, Conn. Bag-lock escutcheon or similar article. Des. 74,842; Apr. 3.
Rutherford, Harry K., Cambridge, Mass. Data transmitter and receiver. 1,664,948; Apr. 3.
Rutherford, Richard, London, assignor to F. H. Headley, Birmingham, England. Scooter. 1,664,864; Apr. 3.
Ryan, Conrad A., Canton, Minn. Grinding machine for mill burrs or other articles. 1,665,177; Apr. 3.
Ryan, Paul, Dakota City, Nebr. Attachment for cultivators or plows. 1,665,178; Apr. 3.
Rypinski, Albert B., assignor to T. E. Murray, Brooklyn, N. Y. Electric fitting and the like. 1,664,759; Apr. 3.
Sandinoff & Wendroff Inc. (See Holtz, Abraham, assignor.)
Sann, Otto, Johnstown, Pa. Grinder. 1,664,949; Apr. 3.
Satenstein, Jesse. (See Wenver, John H., assignor.)
Saunders, Albert R. (See Brodie, Herbert, assignor.)
Savage, George E., Meriden, Conn., assignor, by mesne assignments, to Manning, Bowman & Co., Wilmington, Del. Handled nested cups. 1,665,179; Apr. 3.
Scanlin, John. (See Walton, Mark, assignor.)
Schall, Myron R. (See McMillan, R., and Schall.)
Schaper, Harry C., St. Louis, Mo. Micrometer caliper. 1,664,833; Apr. 3.
Scheel, Gustave A. (See Kirkham, P., and Scheel.)
Scheler, Edward. (See Wilks, A., and Scheler.)
Schellens, Christopher A., Marblehead, Mass., assignor, by mesne assignments, to C-S Engineering Company. Centrifugal pump. 1,664,488; Apr. 3.
Schenk, William J., Home Gardens, Calif. Manufacture of imitation-marble panels. 1,665,072; Apr. 3.
Schepman, Frederick W., Evansville, Ind., assignor to E. E. Heer, Springfield, Mo., and myself. Card holder. 1,665,180; Apr. 3.
Schjolin, Eric O., Chicago, Ill., assignor to General Motors Corporation, Detroit, Mich. Air pump for brake systems. 1,664,706; Apr. 3.
Schleininger, Henry F., New York, N. Y. Tool for restoring screw threads. 1,664,793; Apr. 3.
Schmidt, Gustav, assignor to The Cincinnati Butchers' Supply Company, Cincinnati, Ohio. Refrigerator display case. 1,664,489; Apr. 3.
Schoessler, August G., Reliance, S. Dak. Barrel rack. 1,664,707; Apr. 3.
Schrafft, Wm. F., & Sons Corp. (See Hunzelman, John B., assignor.)
Schrenkeisen, William C., Mount Vernon, assignor to Hill Laundry Equipment Co., Inc., Long Island City, N. Y. Laundry drier. 1,664,490; Apr. 3.
Schroeder, Carl, Mayville, Wis. Pea grader and cleaner. 1,665,114; Apr. 3.
Schroeder, Frank J., Altoona, Pa. Rail lock. 1,665,115; Apr. 3.
Schroeder, Frank J., Altoona, Pa., assignor to Continental Railway Supply Corporation, New York, N. Y. Tool. 1,664,529; Apr. 3.
Schupp, Arthur A., assignor to Fredericksen Company, Saginaw, Mich. Brush for generators, etc. 1,664,708; Apr. 3.
Schwanke, Ewald, Waldshut, Germany. Clock and watch with twenty-four hour figure indication. 1,665,073; Apr. 3.
Schwarz, F. A. O. (See Kirkham, P., and Scheel, assignors.)
Scott, Winfield. (See North, C. O., and Scott.)
Seabrook, Eugene, New York, N. Y. Dental device. 1,664,433; Apr. 3.
Seeley, Alfred, Rochdale, England. Slub catcher. 1,664,794; Apr. 3.
Seeley, Clark, Otisville, Mich. Combined putty knife and paint hook. 1,664,902; Apr. 3.
Sellers, G. L., & Sons Company. (See Holtsclaw, Oren E., assignor.)
Severns, Thomas, Long Beach, and R. R. Hall, Los Angeles, Calif. Polish-rod clamp. 1,664,709; Apr. 3.
Shay, Warren J., Chicago, Ill., assignor to The Columbus McKinnon Chain Company, Columbus, Ohio. Display stand. 1,664,530; Apr. 3.
Sheldon, Edward P., Brooklyn, assignor, by mesne assignments, to R. Hoe and Co., Inc., New York, N. Y. Stapling mechanism. 1,664,434; Apr. 3.
Shepard, Joseph, Schenectady, N. Y. Combination advertising handkerchief and radioscope. 1,665,074; Apr. 3.
Sheppard, Samuel T. (See Kraft, S. A., and Sheppard.)
Sherman, John Q. (See Metzner, Albert W., assignor.)
Shevlin, George F., assignor to George F. Shevlin & Son, Glen Falls, N. Y. Centrifugal pulp screen. 1,664,996; Apr. 3.
Shevlin, George F., & Son. (See Shevlin, George F., assignor.)
Short, Charles R., Dayton, Ohio, assignor to General Motors Research Corporation, Detroit, Mich. Valve-lash-compensating device. 1,664,710; Apr. 3.
Shull, William G. (See Currier, H. D., and Shull.)
Siebert, O. W., Company. (See Siebert, Otto W., assignor.)
Siebert, Otto W., assignor to O. W. Siebert Company, Gardner, Mass. Carriage-hood window. 1,665,116; Apr. 3.
Siegel, Samuel, New York, N. Y. Combined shower cabinet and tub. 1,664,491; Apr. 3.
Siemens & Halske Aktiengesellschaft. (See Arndt, Hermann, assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Hanff, Ferdinand, assignor.)
Sievert, Ernest G., and H. Svensson, Sundbyberg, near Stockholm, Sweden. High-tension cable to prevent a breaking down of the insulation. 1,665,191; Apr. 3.
Silkwood, T. M., et al. (See Simpson, Arthur E., assignor.)
Silver, James W., Ogden, Utah. Beet dump. 1,665,181; Apr. 3.
Simpson, Arthur E., assignor of one-seventh to H. L. Webb, one-seventh to J. M. Harris, one-seventh to B. H. Webb, one-seventh to T. M. Silkwood, one-seventh to R. P. Blake, and one-seventh to C. E. Pitchford, West Frankfort, Ill. Rotary pump. 1,664,644; Apr. 3.
Sisson, Vinton E., assignor to Union Metal Products Company, Chicago, Ill. Sheet-metal end for railway cars. 1,664,711; Apr. 3.
Skelly, John S., Monongahela, Pa., assignor to International Combustion Engineering Corporation. Automatic stoker. 1,664,903; Apr. 3.
Slade, Roland E., Billingham-on-the-Tees, and V. E. Parke, Runcorn, England, assignors to Atmospheric Nitrogen Corporation, Solvay, N. Y. Drying gases. 1,664,997; Apr. 3.
Sleeman, William C., Birmingham, Ala. Railroad-car truck. 1,664,795; Apr. 3.
Sloan, Sebern J., Warren, Ohio. Sandpaper holder. 1,664,950; Apr. 3.

Slocombe, Frank E., Kirk Sandall, assignor to Pilkington Brothers Limited, Liverpool, England. Process and apparatus for grinding and polishing glass. 1,665,117; Apr. 3.
Smith, E. Payson. (See Brown, Lloyd J., assignor.)
Smith, Frederick R., and S. M. Viale, Coventry, England. Internal-combustion engine. 1,664,492; Apr. 3.
Smith, George L., Manchester, N. H. Evening and grading machine. 1,664,645; Apr. 3.
Smith, Harry F., assignor to The Gas Research Company, Dayton, Ohio. Valve. 1,664,493; Apr. 3.
Smith, Harry F., assignor to The Gas Research Company, Dayton, Ohio. Radio apparatus. 1,664,494; Apr. 3.
Smith, Howard N., Oak Park, Ill. Water softener. 1,664,435; Apr. 3.
Smith, Jacob F. (See Weimer, A. W., and Smith.)
Smith, Sherman, assignor to Standard Sanitary Manufacturing Company, Pittsburgh, Pa. Lavatory. Des. 74,844; Apr. 3.
Smith, Sherman, assignor to Standard Sanitary Manufacturing Company, Pittsburgh, Pa. Lavatory. Des. 74,845; Apr. 3.
Smith, William E., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,664,834; Apr. 3.
Smith, William E., Milltown, assignor to Gulbenkian Seamless Rug Company, New Brunswick, N. J. Wire-carriage-release dog for pile-wire-controlling mechanism for looms. 1,665,147; Apr. 3.
Snow, Norman L., assignor to Diamond Power Specialty Corporation, Detroit, Mich. Boiler cleaner. 1,664,865; Apr. 3.
Sobel, Joseph, assignor to Genuine Bronze Fixture Co. Inc., Brooklyn, N. Y. Display stand. Des. 74,843; Apr. 3.
Sommers, Robert E., New York, N. Y. Hand-bag frame. Des. 74,846; Apr. 3.
Southwell, James, North Chelmsford, Mass. Circular-combing machine. 1,664,951; Apr. 3.
Spaeth, Charles, assignor to The Marvel Equipment Company, Cleveland, Ohio. Dispensing pump. 1,664,574; Apr. 3.
Spalding, A. G., & Bros. (See Reach, Milton B., assignor.)
Spangle, William E., Fairoaks, Calif. Wooden-pipe tap. 1,664,796; Apr. 3.
Spence, Earle T. (See Spence, Morton, assignor.)
Spence, Morton, assignor of one-half to E. T. Spence, Springfield, Ill. Internal-combustion engine. 1,665,192; Apr. 3.
Spokane Concrete Flower Pot Machine Company et al. (See Bewley, Claude G., assignor.)
Square D Company. (See Ball, Albert P., assignor.)
Stahl, Ottilie C., New York, N. Y. Sanitary belt and buckle. 1,665,075; Apr. 3.
Standard Oil Company. (See Atwell, Harold V., assignor.)
Standard Oil Company of California. (See Hanna, Richard W., assignor.)
Standard Safety Manufacturing Co. (See Paecht, Hugo C., assignor.)
Standard Sanitary Manufacturing Company. (See Smith, Sherman, assignor.)
Stanek, Edward J., Milwaukee, Wis. Apparatus for straightening tubular castings. 1,664,904; Apr. 3.
Stanley, Grover B., Palmdale, Calif. Tank-truck faucet. 1,664,712; Apr. 3.
Staples, Charles F., Detroit, Mich., assignor of one-half to L. M. Field, Alameda, Calif., and one-half to A. A. Wiedemaier, Detroit, Mich. Transmission mechanism. 1,664,575; Apr. 3.
Staples, Henry W., assignor to Winchester Repeating Arms Company, New Haven, Conn. Battery hand lamp. 1,664,905; Apr. 3.
Star Chandelier Co. (See Boehringer, John A., assignor.)
Stark, Walter E., New York, N. Y. Convertible toy. 1,665,043; Apr. 3.
Sterling Jewelry Company, The. (See Cramer, Harry I., assignor.)
Stevens, Clarence E., assignor to White Sewing Machine Corporation, Cleveland, Ohio. Seat construction. 1,664,835; Apr. 3.
Stevens, Horace D., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Tread-removing machine. 1,665,193; Apr. 3.
Stevens, Horace D., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Band-building machine. 1,665,194; Apr. 3.
Stillman, Albert L., Plainfield, N. J., assignor to The General Fuel Briquette Corporation, New York, N. Y. Manufacturing fuel briquettes. 1,664,998; Apr. 3.
Stoddard, William O., jr., Detroit, Mich., assignor to Duratex Corporation, Newark, N. J. Coated fabric and making same. 1,664,866; Apr. 3.
Stone, Charles B., assignor to Continuous Train Control Corporation, Detroit, Mich. Valve. 1,664,836; Apr. 3.
Stone, Philip W., Boston, Mass. Brush. 1,664,797; Apr. 3.
Strand, Joseph, Los Angeles, Calif., assignor to Klinch Lath Corporation. Plaster board. 1,664,837; Apr. 3.
Strand, Joseph, assignor to Klinch Lath Corporation, Los Angeles, Calif. Hollow tile. 1,664,867; Apr. 3.
Strickland, William R., assignor to General Motors Corporation, Detroit, Mich. Propeller shaft. 1,664,713; Apr. 3.
Strieby, Maurice E., Millburn, N. J., assignor to American Telephone and Telegraph Company. Program-selecting circuits. 1,664,468; Apr. 3.
Stromberg-Carlson Telephone Manufacturing Company, The. (See Powell, Winfred T., assignor.)
Struensee, Louis C., Oshkosh, Wis. Hayrack. 1,664,838; Apr. 3.
Stuart, Thomas F., and H. A. Moore, Los Angeles, Calif. Push catch for doors. 1,664,576; Apr. 3.
Sulik, Stephen, New Britain, Conn. Handsaw. 1,664,906; Apr. 3.
Sullivan Machinery Company. (See Osgood, Robert C., assignor.)
Sundstrand Corporation. (See Sundstrand, Oscar J., assignor.)
Sundstrand, Oscar J., Rockford, Ill., assignor, by mesne assignments, to Sundstrand Corporation, Wilmington, Del. Attaching coiled springs. 1,664,647; Apr. 3.
Suren, Nathan H., Needham, assignor to The Gamewell Company, Newton Upper Falls, Mass. Signaling apparatus. 1,664,952; Apr. 3.
Sutthery, Frank B. C., London, England. Device converting pipe wrenches into pipe vises. 1,665,182; Apr. 3.
Svensson, Henning. (See Sievert, E. G., and Svensson.)
Sweeney, James A., Providence, R. I., assignor, by mesne assignments, to Bausch and Lomb Optical Company, Rochester, N. Y. Ophthalmic mounting. 1,664,577; Apr. 3.
Sweet, Frederick A., Salt Lake City, Utah. Portable overcast. 1,664,646; Apr. 3.
Swenson, Swen R., South Orange, N. J., assignors to Multiple Electric Products Company, Inc., New York, N. Y. Sound-reproducing device and adjusting means therefor. 1,665,044; Apr. 3.
Swenson, Swen R., South Orange, N. J., assignor to Multiple Electric Products Company, Inc., New York, N. Y. Telephone receiver. 1,665,045; Apr. 3.
Sworaski, Michael, Philadelphia, Pa. Automatic train control. 1,664,868; Apr. 3.
Sylvander, Roy C. (See Hunt, F. L., and Sylvander.)
Sylwan, Per O. T., Forshaga, Sweden. Condensation exhaust for drying cylinders and such like. 1,664,907; Apr. 3.
Tabulating Machine Company, The. (See Bryce, James W., assignor.)
Tabulating Machine Company, The. (See Weinlich, Hermann A., assignor.)
Taylor, Ernest. (See Judd, R., Taylor, and McNaney.)
Terpenning, Garret, Jersey City, N. J. Surface-cleaning implements. 1,664,908; Apr. 3.
Tessky, Karl, Esslingen-on-the-Neckar, Germany. Friction disk clutch. 1,665,076; Apr. 3.
Thompson, Halbert E., Minneapolis, Minn. Wheel for automobiles. 1,664,531; Apr. 3.
Thompson, Howard A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,664,469; Apr. 3.
Thompson, Howard A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,664,532; Apr. 3.
Thompson, James V., and H. C. Deitz, Spencer, W. Va. Clothes washer. 1,665,118; Apr. 3.
Thompson, Loren B., Virginia, Ill. Chain fastener. 1,664,760; Apr. 3.
Thomson, Alfred M., Newark, N. J., assignor to J. Mercadante, New York, N. Y. Valve manifold. 1,664,909; Apr. 3.
Thornberry, Charles L., Lincoln, Nebr. Sash frame. 1,664,578; Apr. 3.
Thrower, Alvin H., assignor to Clifton Manufacturing Company, Waco, Tex. Receptacle. 1,665,184; Apr. 3.
Tichota, Rudolph V., Dodge, Nebr. Antifrosting device. 1,664,761; Apr. 3.
Tillyer, Edgar D., assignor to American Optical Company, Southbridge, Mass. Diagnostic instrument for throwing a beam of light into the eye. 1,664,953; Apr. 3.
Tinius Olsen Testing Machine Company. (See Lundgren, Jacob, assignor.)
Tobin, Clarke W., East Orange, N. J. Stocking. Des. 74,847; Apr. 3.
Toledo Automatic Brush Machine Company, The. (See Jobst, Conrad, assignor.)
Tonnesen, Beatrice S., Chicago, Ill. Holder for long-stem flowers. 1,664,436; Apr. 3.
Tönsmann, Henry, Sao Paulo, Brazil, assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,664,910; Apr. 3.
Trachsel, Franz, and J. Wiedmer, Bern, and P. Zigerli, Zurich, Switzerland. Production of artificial stone and artificial wood. 1,665,148; Apr. 3.
Trans-Lux Daylight Picture Screen Corporation. (See Daine, Robert L., assignor.)
Tretch, William J., Philadelphia, Pa., and F. Buckingham, Franklinville, N. J., assignors to Riehle Bros. Testing Machine Co., Philadelphia, Pa. Recording apparatus for testing machines. 1,664,999; Apr. 3.
Trigonis, George J., San Francisco, Calif. Window seat 1,664,470; Apr. 3.
Trimble, Charles P., assignor to Fort Pitt Bedding Company, Pittsburgh, Pa. Cushion seat and the like. 1,665,119; Apr. 3.

Trist, Arthur R., London, England. Mercurial printing surface. 1,665,000; Apr. 3.
Tucker, Ralph H., Los Angeles, Calif. Pneumatic hammer. 1,665,046; Apr. 3.
Turner, Charles H., Statesville, N. C. Sawmill. 1,665,001 Apr. 3.
Twyman, B Wickliffe, Marysville, Mich. Lifting jack. 1,664,579; Apr. 3.
Tydeman, Clarence W., Denver, Colo. Constant-capacity automatic clutch. 1,664,954; Apr. 3.
Tyden, Emil, Evanston, Ill. Valve for fire-extinguishing sprinkler systems. 1,664,648; Apr. 3.
Tytus, John B., assignor to The American Rolling Mill Company, Middletown, Ohio. Rolling metal strip. 1,664,580; Apr. 3.
Uhl, George R., Kansas City, Kans. Faucet. 1,664,714; Apr. 3.
Union Metal Products Company. (See Sisson, Vinton E., assignor.)
Union Switch & Signal Company, The. (See Griffin, H. W., and Howard, assignors.)
Union Switch & Signal Company, The. (See Smith, William E., assignor.)
Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)
Union Switch & Signal Company, The. (See Young, Henry S., assignor.)
Union Railway Equipment Company. (See O'Connor, Arthur F., assignor.)
United Shoe Machinery Corporation. (See Bertrand, Frederic E., assignor.)
United Shoe Machinery Corporation. (See Finn, Sidney J., assignor.)
United Shoe Machinery Corporation. (See Pope, Elmer R., assignor.)
United States Cartridge Co. (See Murphy, James A., assignor.)
United States Envelope Company. (See Cather, Charles E., assignor.)
United States Gypsum Company. (See Gustafson, Edwin L., assignor.)
U. S. Tool Co. (See Dester, William F., assignor.)
Universal Holding Company. (See Gallagher, Charles R., assignor.)
Upham, Burt F., et al. (See Brunell, Leo W., assignor.)
Urban, Emil, Comstock, Nebr. Combined hoe and rake. 1,665,183; Apr. 3.
V. V. Fittings Company. (See Burns, James F., assignor.)
Vadersen, Herbert, Elizabeth, N. J., assignor to Western Electric Company, New York, N. Y. Variable-inductance apparatus. 1,664,495; Apr. 3.
Valensi, Georges, Paris, France. Receiving device for distant-vision installation. 1,664,798; Apr. 3.
Valléey Gumá, Antonio, Habana, Cuba. Clarifying liquids. 1,665,167; Apr. 3.
Van Ackeren, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,664,649; Apr. 3.
Van Alphen, Rudolf P., The Hague, Netherlands. Apparatus for onward movement in swimming attitude in the water. 1,664,799; Apr. 3.
Vanderlip, Louis C., Elkhart, Ind. Hood clamp for automobiles. 1,664,581; Apr. 3.
Van Korlaar, Wynand, Grand Rapids, Mich. Check-sorting rack. 1,664,650; Apr. 3.
Van Wienen, Pieter H., Hamburg, Germany. Convertible skimming boat or like water craft. 1,665,149; Apr. 3.
Vaszin, Aurel, Dayton, Ohio. Vehicle. 1,664,437; Apr. 3.
Vedder, John W., assignor to Rice, Barton & Fales, Inc., Worcester, Mass. Suction box. 1,664,801; Apr. 3.
Vetter, Julius W., Milwaukee, Wis. Truck body for delivering ice cream. 1,664,438; Apr. 3.
Viale, Spirito M. (See Smith, F. R., and Viale.)
Vickers Limited. (See Lyne, F. C., and Etchells, assignors.)
Viehmann, Nickolas, Newark, N. J. Clutch. 1,664,439; Apr. 3.
Vironda, Italo, Battle Creek, Mich. Tappet for internal-combustion engines. 1,664,651; Apr. 3.
Von Gruber, Otto, Stuttgart, assignor to the firm Carl Zeiss, Jena, Germany. Device for tracing cross sections. 1,665,002; Apr. 3.
Von Meyenburg, Konrad, Basel, Switzerland. Motor tilling machine. 1,664,789; Apr. 3.
Von Pein, Edward J., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,664,955; Apr. 3.
Von Pein, Edward J., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,664,956; Apr. 3.
Von Platen, Baltzar C. Ystad, and C. C. Munters, Dala-Jarna, Sweden, assignors, by mesne assignments, to Electrolux Servel Corporation. Refrigeration. 1,664,471; Apr. 3.
Von Platen, Baltzar C., and C. G. Munters, Stockholm, Sweden, assignors to Electrolux Servel Corporation, New York, N. Y. Refrigerating apparatus. 1,664,472;
Vosler, Lee L. (See Crum, Leo J., assignor.)
Voss, Herman E., Yuhsien, China. Insect destroyer. 1,664,762; Apr. 3.
Wacker, Frederick G., assignor to Automotive Maintenance Machinery Co., Chicago, Ill. Tool for turning crank pins and the like. 1,664,440; Apr. 3.
Wadsworth Watch Case Company, The. (See Conant, Arthur P., assignor.)
Waid, Calvin R., assignor to W. C. Appleby, Birmingham, Ala. Grate bar. 1,664,496; Apr. 3.
Waite, Philip C., Oshkosh, Wis. Rug and strand therefor. 1,664,497; Apr. 3.
Wakefield, Frank E., assignor to Illinois Watch Case Company, Elgin, Ill. Cigarette case. 1,664,498; Apr. 3.
Waldes, Jindrich, Prague, Czechoslovakia. Fastener. 1,664,582; Apr. 3.
Walker, Avery W., Gasport, N. Y. Dispensing mechanism for spraying machines. 1,664,802; Apr. 3.
Wallace, R., & Sons Mfg. Co. (See Wilkes, Samuel G., assignor.)
Walton, Mark, assignor of one-half to J. Scanlin, Ullin, Ill. Pump drain. 1,664,715; Apr. 3.
Wands, Washington I., Fairbury, Nebr. Switch-operating mechanism. 1,665,047; Apr. 3.
Ward-Love Pump Corporation. (See Johnson, Oscar W., assignor.)
Watson, Edward F., Larchmont, and A. Weaver, Brooklyn, N. Y., assignors to American Telephone and Telegraph Company. Picture-transmitting system. 1,664,652; Apr. 3.
Watson, Leonard E., St. Marys, W. Va. Brake-band tool. 1,665,150; Apr. 3.
Watts, Felix J., assignor to H. A. Douglas, Bronson, Mich. Automotive-vehicle ignition system. 1,664,911; Apr. 3.
Waukesha Motor Company. (See Pope, Arthur W., jr., assignor.)
Waukesha Motor Company. (See Ritter, Herbert G., assignor.)
Waybrant, Edward L., New Bedford, Mass. Distributing explosive mixtures to internal-combustion engines. 1,664,869; Apr. 3.
Weaver, Allan. (See Watson, E. F., and Weaver.)
Weaver, John H., assignor to J. Satenstein, Camden, N. J. Case-forming attachment. 1,665,003; Apr. 3.
Webb, B. H., et al. (See Simpson, Arthur E., assignor.)
Webb, H. L., et al. (See Simpson, Arthur E., assignor.)
Webb, Jervis B., Detroit, Mich. Conveyer. 1,664,763; Apr. 3.
Wees, Elijah F., Kenova, W. Va. Rudder. 1,664,957; Apr. 3.
Wehler, Russell S., York, Pa. Cigarette-case attachment. 1,664,441; Apr. 3.
Weikel, John H. (See Breyer, F. G., Bunce, and Weikel.)
Weil, Charles F. (See Weil, Louis A. and C. F.)
Weil, Louis A. and C. F., Detroit, Mich. Mechanical stud-driving device. 1,664,442; Apr. 3.
Weiland, Henry J., and I. Gubelmann, South Milwaukee, assignors to The Newport Company, Carrollville, Wis. Separation of m-dinitrobenzene from its isomers. 1,665,005; Apr. 3.
Weimer, Albert W., and J. F. Smith; said Weimer assignor to W. Parson, Geneseo, Ill. Battery terminal. 1,665,048; Apr. 3.
Weinlich, Hermann A., Berlin, Germany, assignor to The Tabulating Machine Company, Endicott, N. Y. Machine for comparing punched cards. 1,664,533; Apr. 3.
Welder, Edward J., San Antonio, Tex. Signal lantern. 1,664,653; Apr. 3.
Weldy, Arthur S., Canton, Ohio. Pump. 1,664,764; Apr. 3.
Wells, Walter W., assignor to Reo Motor Car Company, Lansing, Mich. Transmission mechanism. 1,664,870; Apr. 3.
Wendell, Evert J., Wayne, assignor to The Hale Fire Pump Co., Inc., Conshohocken, Pa. Rotary fluid pump and motor. 1,665,120; Apr. 3.
Werder, Hans, Vevey, Switzerland, assignor to E. C. Dieckerhoff, New York, N. Y. Signal. 1,664,871; Apr. 3.
Wermine, Hugo H., Villa Park, assignor to Belden Manufacturing Company, Chicago, Ill. Fluidity-control system. 1,664,839; Apr. 3.
Wermine, Hugo H., Villa Park, assignor to Belden Manufacturing Company, Chicago, Ill. Apparatus for standardizing solutions. 1,664,840; Apr. 3.
West, Frank R., Newark, N. J. Internal-combustion engine. 1,665,121; Apr. 3.
West, Robert, assignor of one-half to H. McMurray, New York, N. Y. Liquid-cooling device. 1,664,872; Apr. 3.
Western Electric Company. (See Dodge, Harold F., assignor.)
Western Electric Company. (See Heising, Raymond A., assignor.)
Western Electric Company. (See Norton, Edward L., assignor.)
Western Electric Company. (See Vadersen, Herbert, assignor.)
Westerschulte, F. H. (See Arnolds, Werner, assignor.)
Westinghouse Electric & Manufacturing Company. (See Bryant, Ozro N., assignor.)
Westinghouse Electric and Manufacturing Company. (See De Vries, Andrew, assignor.)
Westinghouse Electric & Manufacturing Company. (See Keene, Alvin D., assignor.)
Whelan, James F., Philadelphia, Pa. Portable electric lamp. Des. 74,848; Apr. 3.
Wheeling Steel Corporation. (See Kielberg, Henry, assignor.)
Wheeling Steel Corporation. (See Paff, George A., assignor.)

Wheelock, Ernest O., Rockford, Ill. Snap gauge. 1,664,583; Apr. 3.
White, John F., assignor to White Products Company, Chicago, Ill. Automobile radiator cap. 1,665,004; Apr. 3.
White, Joseph H., assignor of one-half to H. H. Harbin, Florence, S. C. Combined bumper and safety appliance. 1,664,654; Apr. 3.
White Products Company. (See White, John F., assignor.)
White Sewing Machine Corporation. (See Stevens, Clarence E., assignor.)
White, William H., Copeland, Kans. Tractor lighting device. 1,665,122; Apr. 3.
Whitehead & Kales. (See Greenwald, H. A., and Howe, assignors.)
Whitin Machine Works. (See Magrath, George H., assignor.)
Wiberg, Peter E., East Orange, assignor to Art Wire and Stamping Company, Newark, N. J. Lingerie clasp. 1,664,716; Apr. 3.
Wiberg, Peter E., East Orange, assignor to Art Wire and stamping Company, Newark, N. J. Wire feeding and cutting machine. 1,664,717; Apr. 3.
Widden, Evan R. (See Maloney, Stephen F., assignor.)
Wiedemaier, Arthur A., et al. (See Staples, Charles F., assignor.)
Wiedmer, Jakob. (See Trachsel, F., Wiedmer, and Zigerli.)
Wilcox, Roy F., & Co., et al. (See Bewley, Claude G., assignor.)
Wildman Mfg. Co. (See Ballard, George L., assignor.)
Wilhelm, Wilson A., Vernon, Tex. Oil grate and mat. 1,665,123; Apr. 3.
Wilkes, Samuel G., assignor to R. Wallace & Sons Mfg. Co., Wallingford, Conn. Coffeepot or similar article. Des. 74,849; Apr. 3.
Wilks, Anna, and E. Scheier, New York, N. Y. Container for cosmetics. 1,665,077; Apr. 3.
Williams, Charles E., assignor to General Motors Corporation, Detroit, Mich. Carburetor. 1,664,718; Apr. 3.
Williams, Harry R. (See Williams, Robert W. and H. R., and Elliott.)
Williams, Jessie E., Perry, Okla. Basket cart. 1,665,151; Apr. 3.
Williams, John H., Westwood, Calif. Knife. Des. 74,850; Apr. 3.
Williams, John H., Toronto, Ontario, Canada. Electric cooking and heating apparatus. 1,664,584; Apr. 3.
Williams Oven Manufacturing Company. (See Williams, Robert W. and H. R., and Elliott, assignors.)
Williams, Robert W. and H. R., Brooklyn, and I. Elliott, New York, N. Y., assignors to Williams Oven Manufacturing Company. Oven. 1,664,443; Apr. 3.
Williams, Ruskin, Woodstock, N. Y. Bench. Des. 74,851; Apr. 3.
Williams, Samuel A., Waukegan, Ill., assignor to Johns-Manville Corporation, New York, N. Y. Smoke jack. 1,664,473; Apr. 3.
Wilson, Alfred R., assignor, by mesne assignments, to Hutchins Car Roofing Company, Detroit, Mich. Saddle and center joint cap. 1,664,444; Apr. 3.
Wilson, James M., Newark, N. Y., assignor to Amplitone Company, Inc., New York, N. Y. Telephone receiver. 1,665,078; Apr. 3.
Winchester Repeating Arms Company. (See Staples, Henry W., assignor.)
Wine, William E., Toledo, Ohio. Side bearing. 1,664,445; Apr. 3.
Winther Company, The. (See Jensen, Thorvald, assignor.)
Withycombe, Robert M., Sydney, New South Wales, Australia. Manufacturing brushes. 1,665,152; Apr. 3.
Withycombe, Robert M., Sydney, New South Wales, Australia. Fountain brush for automobiles. 1,665,153; Apr. 3.
Withycombe, Robert M., Sydney, New South Wales, Australia. Support for yieldable dentures. 1,665,154; Apr. 3.
Wood, Peirce M. (See Merseles, H. R., and Wood.)
Woodford, Joe C., Oskaloosa, Iowa. Apparatus for supplying air under pressure. 1,664,719; Apr. 3.
Woodruff, Charles W., Columbus, Ohio. Thermoelectric generator. 1,664,720; Apr. 3.
Woodward, Herbert S., Carbondale, Pa. Sifter. 1,664,841; Apr. 3.
Worthington, Charles C., Dunfield, N. J. Lawn mower. 1,664,721; Apr. 3.
Wright, Ernest, Arch Creek, Fla. Propagating box. 1,665,124; Apr. 3.
Wright, Wilbur L., Fulton, and J. L. Dolphin, Syracuse, assignors to Oswego Falls Corporation, Fulton, N. Y. Capping machine. 1,665,079; Apr. 3.
Wyss, Julius, Watertown, Mass., assignor to New England Spun Silk Corporation, New York, N. Y. Stop motion for yarn-twisting machines. 1,665,006; Apr. 3.
Yerger, Will. West Philadelphia, Pa. Trimmer. 1,665,155; Apr. 3.
Yessler, G. Fred, assignor, by mesne assignments, to Knapp Electric Corporation, Port Chester, N. Y. Educational appliance. 1,664,842; Apr. 3.
Yoder, Arthur T., Mosinee, Wis. Cylinder paper-making machine. 1,664,722; Apr. 3.
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-track circuit apparatus. 1,664,446; Apr. 3.
Young, Niels, Frankfort-on-the-Main, Germany. Degasification of coal. 1,664,723; Apr. 3.
Younghusband, James L., Chicago, Ill. Dorine for loose powder. 1,665,007; Apr. 3.
Zaun, George F., San Bernardino, Calif. Stairs. 1,664,724; Apr. 3.
Zeiser, Earl A., Cincinnati, Ohio. Infant's auto carrier. 1,664,958; Apr. 3.
Zeiss, Firm Carl. (See von Gruber, Otto, assignor.)
Ziemmerman, Henry, assignor to Chicago Cardboard Company, Chicago, Ill. Folding display card. 1,664,585; Apr. 3.
Zigerli, Paul. (See Trachsel, F., Wiedmer, and Zigerli.)
Zimmerman, Frank D., and E. M. Pyle, Jerome, Pa. Circuit controller. 1,664,534; Apr. 3.
Zworikin, Jean, Paris, France. Spinning and twisting frame. 1,664,959; Apr. 3.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 3D DAY OF APRIL, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acid oils for lubricant stocks, Neutralizing treatment of. G. F. Olsen. 1,665,110; Apr. 3.
Acid-sludge emulsions, Separation of. E. W. Roth. 1,665,189; Apr. 3.
Acid sludge, Hydrolysis of. E. W. Roth. 1,665,190; Apr. 3.
Advertising device. H. S. C. Bacon. 1,665,009; Apr. 3.
Advertising handkerchief and radioscope, Combination. J. Shepard. 1,665,074; Apr. 3.
Aeroplanes, Safety landing and take-off device for. J. B. Anderson. 1,664,844; Apr. 3.
Air brake. G. E. Oakley. 1,664,787; Apr. 3.
Air cleaner. R. R. Dollins. 1,664,670; Apr. 3.
Air intake, Suction. C. G. Hawley. 1,664,683; Apr. 3.
Airship. L. W. Mammen. 1,664,565; Apr. 3.
Air under pressure, Apparatus for supplying. J. C. Woodford. 1,664,710; Apr. 3.
Alloys, Making commercially-pure iron. L. F. Reinartz and J. H. Nead. 1,665,146; Apr. 3.
Amusement device. J. E. Craddock. 1,665,129; Apr. 3.
Amylaceous molded product and making same. C. Ellis. 1,664,600; Apr. 3.
Anchor plate. G. Mares. 1,664,458; Apr. 3.
Anchor, Rail. E. M. McVicker. 1,665,187; Apr. 3.
Animal trap. W. Catlin. 1,665,020; Apr. 3.
Antifrosting device. R. V. Tichota. 1,664,761; Apr. 3.
Anvils, Manufacture of primer. J. A. Murphy. 1,664,480; Apr. 3.
Arm, Automatic or self-loading small. L. Oberhammer. 1,664,788; Apr. 3.
Articulation of doll members. N. S. Hitchcock. 1,664,979; Apr. 3.
Artillery carriage in all directions, Arrangement providing for the aiming of an. E. Bimailho. 1,665,176; Apr. 3.
Auto carrier, Infant's. E. A. Zeiser. 1,664,958; Apr. 3.
Automobile hood clamp. L. C. Vanderlip. 1,664,581; Apr. 3.
Automobile wheel. H. E. Thompson. 1,664,531; Apr. 3.
Automobiles, Roller guard for. D. J. Cunningham. 1,665,085; Apr. 3.
Automobiles, Throttle control for. E. A. MacKean. 1,664,479; Apr. 3.
Automotive drive. T. Jensen. 1,664,562; Apr. 3.
Bag: *See*—
Hat bag.
Parcel bag.
Tea bag.
Bag holder, Jelly-. C. P. Blazer. 1,664,658; Apr. 3.
Ball-attaching means for lanterns and the like. R. A. Currie. 1,665,055; Apr. 3.
Balancing machine. J. Lundgren. 1,665,138; Apr. 3.
Balancing system, Engine-. A. W. Pope, Jr. 1,664,942; Apr. 3.
Band-building machine. H. D. Stevens. 1,665,194; Apr. 3.
Band-wheel counterbalance. M. J. Mils. 1,664,524; Apr. 3.
Banjo and similar musical instrument. N. Greenop. 1,664,547; Apr. 3.
Bar: *See*—
Crate bar.
Barrel rack. A. G. Schoessler. 1,664,707; Apr. 3.
Bat, Reenforced safety. E. Cohn. 1,665,195; Apr. 3.
Battery terminal. A. W. Welmer and J. F. Smith. 1,665,048; Apr. 3.
Battery-terminal coupling. F. W. Leuthesser. 1,664,692; Apr. 3.
Beam hanger. H. J. Baker. 1,664,499; Apr. 3.
Bearing. G. Flintermann. 1,664,878-9; Apr. 3.
Bearing-bolt structure. H. C. Ritter. 1,664,944; Apr. 3.
Bearing, Journal. G. Flintermann. 1,664,880; Apr. 3.
Bearing pins to legs of drill bits, Welding. H. H. Holdaway. 1,664,883; Apr. 3.
Bearing, Side. A. and C. Christianson. 1,664,915; Apr. 3.
Bearing, Side. W. E. Wine. 1,664,445; Apr. 3.
Beet dump. J. W. Silver. 1,665,181; Apr. 3.
Bench. R. Williams. Des. 74,851; Apr. 3.
Billboard. M. C. Merker. 1,665,142; Apr. 3.
Billiard cue. C. C. Bean. 1,664,971; Apr. 3.
Blade wheel. A. Nydqvist. 1,664,895; Apr. 3.
Blast furnace. W. P. Power. 1,664,832; Apr. 3.
Block: *See*—
Surface block.
Board: *See*—
Plaster board.
Wall board.
Boat or like water craft, Convertible skimming. P. H. van Wienen. 1,665,149; Apr. 3.
Boats, Propelling mechanism for. C. Carpio. 1,665,053; Apr. 3.
Boiler: *See*—
Wash boiler.
Boiler. C. B. Boynton. 1,664,914; Apr. 3.
Boiler cleaner. H. C. Heaton. 1,664,859; Apr. 3.
Boiler cleaner. N. L. Snow. 1,664,865; Apr. 3.
Bomb sight. G. Gardner. 1,664,406; Apr. 3.
Bookbinding and producing the same. R. C. Baker. 1,665,049; Apr. 3.
Bottle and closure therefor. W. H. Perry. 1,664,756; Apr. 3.
Bottle closure and applying same, Milk-. D. G. Magill. 1,664,635; Apr. 3.
Bottle-handling means. S. C. Gilbert. 1,665,025; Apr. 3.
Bottle, Oil. F. D. Gatchell. Des. 74,828; Apr. 3.
Box: *See*—
Candy box.
Mail box.
Propagating box.
Soap box.
Suction box.
Box. F. F. Hamilton. Des. 74,832; Apr. 3.
Box cover. A. B. McIntire. Des. 74,840; Apr. 3.
Boxes, Box holder to facilitate the hand-stripping operation in the production of pasteboard. I. A. Deline. 1,664,739; Apr. 3.
Bracelet, Adjustable. S. C. Eppenstein. 1,664,504; Apr. 3.
Bracelet, Antirattle. H. M. Denyes. 1,664,669; Apr. 3.
Bracket and brake lever. E. L. Kulick. 1,664,825; Apr. 3.
Brake: *See*—
Air brake.
Duplex brake.
Brake beams, Safety device for. L. J. Brown. 1,664,538; Apr. 3.
Brake-operating means. H. Brodie. 1,664,732; Apr. 3.
Brakes, Adjustable cam for. B. G. Parsons. 1,664,828; Apr. 3.
Brassière bust supporter. H. Imersheln and L. E. Ginsburg. 1,664,926; Apr. 3.
Bridgework, Removable. H. A. Adler. 1,664,726; Apr. 3.
Brooder, Storage. F. W. Lord. 1,665,102; Apr. 3.
Brush. P. W. Stone. 1,664,797; Apr. 3.
Brush, Electrical hair or massage. A. Lloyd. 1,664,457; Apr. 3.
Brush for automobiles, Fountain. R. M. Withycombe. 1,665,153; Apr. 3.
Brush for generators, etc. A. A. Schupp. 1,664,708; Apr. 3.
Brush machines, Continuous trimmer for. C. Jobst. 1,664,425; Apr. 3.
Brush machines, Multiple work clamp for. C. Jobst. 1,664,423; Apr. 3.
Brush machines, Tuft-separating mechanism for. C. Jobst. 1,664,424; Apr. 3.
Brush machines, Work holder for. C. Jobst. 1,664,422; Apr. 3.
Brush-making machine. C. Jobst. 1,664,420; Apr. 3.
Brush reading device for combinational hole records. J. W. Bryce. 1,664,539; Apr. 3.
Brushes, Manufacturing. R. M. Withycombe. 1,665,152; Apr. 3.
Building construction, Metal. J. J. Muryn. 1,664,463; Apr. 3.
Building materials or the like of clay, Manufacture of burnt. H. Gronroos. 1,664,815; Apr. 3.
Bulkhead wall for culverts. C. M. Cornell. 1,664,503; Apr. 3.
Bumper and safety appliance, Combined. J. H. White. 1,664,654; Apr. 3.
Bumper, Automobile. J. Nickels. 1,664,989; Apr. 3.
Bunion corrector. M. Hartwig. 1,665,030; Apr. 3.
Burner: *See*—
Gas burner.
Gas-range burner.
Oil burner.
Bus-body construction. N. Milner. 1,664,569; Apr. 3.
Cabinet and tub, Combined shower. S. Siegel. 1,664,491; Apr. 3.
Cabinet lid, Ice-cream-. H. D. Geyer. 1,664,545; Apr. 3.
Cable, Support for overhead. C. H. Goodrich. 1,664,922; Apr. 3.
Cable to prevent a breaking down of the insulation, High-tension. E. G. Sievert and H. Svensson. 1,665,191; Apr. 3.
Calico-printing color composition and process. M. Freiberger and A. Holtmann. 1,665,162; Apr. 3.
Camera, Circuit. A. V. Cassal. 1,664,590; Apr. 3.
Can: *See*—
Measuring can.

Cans, Opening device for. W. R. Lambert. 1,664,515; Apr. 3.
Candy box. F. Purchas. 1,664,464; Apr. 3.
Cap opener, Crimped-. F. L. Darling. 1,664,595; Apr. 3.
Capping machine. E. B. Kramer. 1,664,514; Apr. 3.
Capping machine. W. L. Wright and J. L. Dolphin. 1,665,079; Apr. 3.
Car-coupler-lock-lifter safety attachment. S. L. Joiner. 1,664,982; Apr. 3.
Cars, Sheet-metal end for railway. V. E. Sisson. 1,664,711; Apr. 3.
Carburetor. C. E. Williams. 1,664,718; Apr. 3.
Card, Folding display. H. Ziemmerman. 1,664,585; Apr. 3.
Card holder. W. W. Degler. 1,664,668; Apr. 3.
Card holder. F. W. Schepman. 1,665,180; Apr. 3.
Carrier: *See*—
Auto carrier. Tire carrier.
Cart, Basket. J. E. Williams. 1,665,151; Apr. 3.
Carton rack. H. H. Langenfeld. 1,664,753; Apr. 3.
Case: *See*—
Cigarette case. Shipping case.
Display case.
Case-forming attachment. J. H. Weaver. 1,665,003; Apr. 3.
Cash register. W. H. Robertson. 1,664,946; Apr. 3.
Cash register. H. Tönsmann. 1,664,910; Apr. 3.
Cash register. E. J. Von Pein. 1,664,955–6; Apr. 3.
Casing elevator. G. A. Montgomery. 1,664,461; Apr. 3.
Casing, Perforated. D. N. Brundy. 1,664,733; Apr. 3.
Cassava-starch plastic composition and molding same. C. Ellis. 1,664,601; Apr. 3.
Castings, Apparatus for straightening tubular. E. J. Stanek. 1,664,904; Apr. 3.
Catalysts, Manufacture of. H. Nielsen. 1,665,175; Apr. 3.
Catch for cases and the like. G. T. Bates. 1,664,500; Apr. 3.
Cattle yoke. N. J. Boor. 1,664,394; Apr. 3.
Centrifugal machine. W. W. Malloy. 1,665,065; Apr. 3.
Chain for automobiles, Antiskid. E. B. Johnson. 1,665,098; Apr. 3.
Chains, Pin-retaining means for. H. Klaucke. 1,665,100; Apr. 3.
Chair or couch. J. Kronheim. 1,664,934; Apr. 3.
Chamotte materials, Manufacturing. L. Kern. 1,664,689; Apr. 3.
Chandelier or similar article. J. A. Boehringer. Des. 74,821; Apr. 3.
Check, Restaurant. C. T. Raschick. 1,664,573; Apr. 3.
Check-sorting rack. W. Van Korlaar. 1,664,650; Apr. 3.
Chemical substances, Stabilizing. H. G. Grimm. 1,664,678; Apr. 3.
Cigarette case. I. J. Grignon. 1,664,743; Apr. 3.
Cigarette case. F. E. Wakefield. 1,664,498; Apr. 3.
Cigarette-case attachment. R. S. Wehler. 1,664,441; Apr. 3.
Circuit breaker. F. W. Roller. 1,665,113; Apr. 3.
Circuit-continuing device. H. A. Douglas. 1,664,403; Apr. 3.
Circuit controller. F. D. Zimmerman and E. M. Pyle. 1,664,534; Apr. 3.
Circuit-controlling device. H. S. Micks. 1,664,697; Apr. 3.
Circuits. Method and apparatus for timing the use of electrical. J. L. Boynton. 1,664,873; Apr. 3.
Clamp: *See*—
Automobile hood clamp. Retort-cover clamp.
Rod clamp.
Clamp and speeds, Nested control for both. D. C. Klausmeyer. 1,664,888; Apr. 3.
Clamping lock. J. Ritter, jr. 1,664,432; Apr. 3.
Clamping mechanism, Tailstock-. C. F. Randolph. 1,664,757; Apr. 3.
Clasp: *See*—
Lingerie clasp.
Cleaner: *See*—
Air cleaner. Boiler cleaner.
Cleaner and clearer, Window. K. Herman. 1,665,031; Apr. 3.
Cleaning chicle and similar gums. D. W. Howe, E. R. Pickett, and D. M. McBean. 1,664,981; Apr. 3.
Cleaning implement, Surface-. G. Terpenning. 1,664,903; Apr. 3.
Clock and watch with twenty-four hour figure indication. E. Schwanke. 1,665,073; Apr. 3.
Closets and the like, Removable lining for. B. Friend. 1,664,854; Apr. 3.
Closure for bottles and the like, Dispensing. E. Gottschalk. 1,664,975; Apr. 3.
Clothes washer. J. V. Thompson and H. C. Dietz. 1,665,118; Apr. 3.
Clutch. N. Vichmann. 1,664,439; Apr. 3.
Clutch, Constant-capacity automatic. C. W. Tydeman. 1,664,954; Apr. 3.
Clutch, Planetary reversible. F. E. Donald and C. P. Boyce. 1,665,159; Apr. 3.
Coal, Degasification of. N. Young. 1,664,723; Apr. 3.
Coat shield. W. Blumenthal. 1,664,449; Apr. 3.
Coffeepot. R. McMillan and M. R. Schall. 1,665,143; Apr. 3.
Coffeepot or similar article. S. G. Wilkes. Des. 74,849; Apr. 3.
Comb. H. H. Hutchings. 1,665,134; Apr. 3.
Combing machine, Circular. J. Southwell. 1,664,951; Apr. 3.
Commutator Riveting machine. L. E. Poole. 1,664,527; Apr. 3.
Compressor. J. Braun. 1,664,733; Apr. 3.
Concrete mixers, Valve-actuating mechanism for. A. A. McCrec. 1,664,427; Apr. 3.
Concrete-mixing and similar machines, water, power, and speed control mechanism for. C. F. Ball. 1,665,050; Apr. 3.
Concrete plant-protectors, Mold for forming. J. H. Haley. 1,665,027; Apr. 3.
Condenser, Electrostatic. J. F. Lindberg. 1,664,518; Apr. 3.
Conduits and device therefor, Controlling the flow of fluids in connected. J. C. Diehl. 1,664,596; Apr. 3.
Connecter Electrical. J. E. Graham. 1,665,166; Apr. 3.
Connecter, Plug. B. P. McKinley. 1,664,986; Apr. 3.
Container. A. Mauser. 1,664,985; Apr. 3.
Container closure. W. H. Rose. 1,664,995; Apr. 3.
Container, Dental acid. W. B., Jackman. 1,664,419; Apr. 3.
Container for cosmetics. A. Wilks and E. Scheler. 1,665,077; Apr. 3.
Container, Insulated. S. K. Jensen. 1,665,033; Apr. 3.
Control by compressional waves, System of. J. M. Hammond, jr. 1,664,549; Apr. 3.
Control mechanism. C. T. Mason. 1,664,459; Apr. 3.
Conveyer. J. B. Webb. 1,664,763; Apr. 3.
Conveyer systems, Pick off for. W. L. and L. B. H. Bixler. 1,664,393; Apr. 3.
Conveying devices, Turning mechanism for. W. D. Coil and W. J. De Reamer. 1,664,663; Apr. 3.
Cooking and heating apparatus, Electric. J. H. Williams. 1,664,584; Apr. 3.
Cooking apparatus. J. C. Bergner. 1,665,017; Apr. 3.
Coolant-arresting mechanism, Automatic. G. C. Kimmel, 1,664,983; Apr. 3.
Cooler: *See*—
Cream cooler. Water cooler.
Milk-can cooler.
Coolers, Extractor for tuyères and tuyère. G. J. Jones and E. J. Blanning. 1,665,135; Apr. 3.
Cooling device. A. Mayer. 1,664,636; Apr. 3.
Cooling tower. E. W. Cook. 1,665,022; Apr. 3.
Corking machine, Crown-. J. W. Flower. 1,664,881; Apr. 3.
Coupling: *See*—
Battery-terminal coupling. Pipe coupling.
Cream cooler. N. Ramgren. 1,664,704; Apr. 3.
Crusher: *See*—
Roll crusher.
Cultivators or plows, Attachment for. P. Ryan. 1,665,178; Apr. 3.
Cups, Handled nested. G. E. Savage. 1,665,179; Apr. 3.
Cushion seat and the like. C. P. Trimble. 1,665,119; Apr. 3.
Cutter: *See*—
Pipe cutter.
Cutter head, Rotating. L. C. Cole. 1,664,807; Apr. 3.
Cutting and perforating mechanism. B. Heinrichs. 1,664,418; Apr. 3.
Cutting or slicing machine. E. R. Ferrari. 1,665,131; Apr. 3.
Cylinder for spinning machines, Pressure and drawing. J. Lauffer. 1,665,136; Apr. 3.
Dash light. R. O. Helgeby. 1,664,684; Apr. 3.
Data in earth bores, Obtaining. G. D. Hanna. 1,665,058; Apr. 3.
Deck for oil tanks or the like, Floating. C. R. Gallagher. 1,665,163; Apr. 3.
Decorating fish lures. C. L. Dewey. 1,664,402; Apr. 3.
Dental device. E. Seabrook. 1,664,433; Apr. 3.
Diagnostic instrument for throwing a beam of light into the eye. E. D. Tillyer. 1,664,953; Apr. 3.
Direction indicator. R. H. Kitchen and H. N. Norris. 1,664,751; Apr. 3.
Direction signal. A. Fehrmann. 1,665,087; Apr. 3.
Direction signal. R. C. Forbell. 1,664,810; Apr. 3.
Dishwashing machine. S. A. Kraft and S. T. Sheppard. 1,664,690; Apr. 3.
Disk clutch, Friction. K. Tessky. 1,665,076; Apr. 3.
Display device for goods and prices. E. Herzog. 1,664,415; Apr. 3.
Display stand. W. J. Shay. 1,664,530; Apr. 3.
Display stand. J. Sobel. Des. 74,843; Apr. 3.
Distilling lubricating oils. R. W. Hanna. 1,664,977; Apr. 3.
Door, Grain-car. G. W. Harer and J. J. Burri. 1,664,978; Apr. 3.
Door, sash, and screen. C. F. Geshickter. 1,665,024; Apr. 3.
Doors of kitchen cabinets, Support for flexible. A. I. S. Halvorsen. 1,665,028; Apr. 3.
Doors, Push catch for. T. F. Stuart and H. A. Moore. 1,664,576; Apr. 3.
Dorine for loose powder. J. L. Younghusband. 1,665,007; Apr. 3.
Drainage system for playing grounds. E. E. Martienssen. 1,665,104; Apr. 3.
Drier: *See*—
Laundry drier.
Drier construction. E. E. Berry. 1,664,656; Apr. 3.
Drill bit of the flat-blade type, Rotary. C. E. Reed. 1,664,528; Apr. 3.

Drills, Dust-collecting device for rock. S. Mumovich. 1,664,786; Apr. 3.
Drills, Rotation mechanism for rock. G. W. Hulshizer. 1,664,625; Apr. 3.
Driving device, Unidirectional. G. Constantinesco. 1,664,874; Apr. 3.
Drying gases. R. E. Slade and V. E. Parke. 1,664,997; Apr. 3.
Drying-room tumbler. E. Davis. 1,664,800; Apr. 3.
Duplex brake. N. A. Christensen. 1,664,451; Apr. 3.
Duplicating. D. Gestetner. 1,664,675; Apr. 3.
Dynamo frame. W. A. Chryst. 1,664,540; Apr. 3.
Easel. M. E. A. Merritt. 1,664,784; Apr. 3.
Educational appliance. G. F. Yessler. 1,664,842; Apr. 3.
Electric fitting and the like. A. B. Rypinski. 1,664,759; Apr. 3.
Electric-fixture mount. M. Heichen. 1,664,624; Apr. 3.
Electric machine, Dynamo-. G. H. Leland. 1,664,781; Apr. 3.
Electric wall-bracket plate or similar article. J. A. Boehringer. Des. 74,819; Apr. 3.
Electric wall-bracket plate or similar article, Arm. J. A. Boehringer. Des. 74,820; Apr. 3.
Electrical barriers, Alignment strip for. P. Nicholay. 1,664,827; Apr. 3.
Electrical conductors, Junction fitting for metallic armored. J. H. Hunter. 1,664,686; Apr. 3.
Electrical dough-imprinting machine. M. Collis. 1,665,196; Apr. 3.
Electrical network. E. L. Norton. 1,664,755; Apr. 3.
Electrical translating circuit. R. W. King. 1,664,455; Apr. 3.
Electricity meter, Induction. A. L. Emens. 1,664,672–3; Apr. 3.
Electromagnetic operating devices, Automatic control means for. H. K. Hitchcock. 1,665,060; Apr. 3.
Electrotherapeutical apparatus. S. Pongo. 1,664,992; Apr. 3.
Elevator: *See*—
Casing elevator. Package elevator.
Elevator. C. F. Lane. 1,665,101; Apr. 3.
Emergency seat, Pivoting. A. Boulogne. 1,664,766; Apr. 3.
Emulsions, Producing stable. R. Merger. 1,665,105; Apr. 3.
Engine: *See*—
Internal-combustion engine. Rotary engine.
Engine-starting apparatus. J. Bijur. 1,664,847; Apr. 3.
Engine without carburetor, Internal-combustion. B. Kamensky. 1,664,747; Apr. 3.
Engines, Controlling means for starters for internal-combustion. W. Metzroth. 1,664,522; Apr. 3.
Engines, Lubricating device for internal-combustion. W. C. Eisengart. 1,664,671; Apr. 3.
Engines, Tappet for internal-combustion. I. Vironda. 1,664,651; Apr. 3.
Evening and grading machine. G. L. Smith. 1,664,645; Apr. 3.
Excavating shovel. J. W. Page. 1,664,940; Apr. 3.
Exercising device. L. J. Crum. 1,664,664; Apr. 3.
Exhaust for drying cylinders and such like, Condensation. P. O. T. Sylwan. 1,664,907; Apr. 3.
Exhibitor, Changeable. L. V. Aronson. 1,664,962; Apr. 3.
Explosive mixtures to internal-combustion engines, Distributing. E. L. Waybrant. 1,664,869; Apr. 3.
Explosive package and carrier. F. Ries. 1,664,899; Apr. 3.
Fabric and making same, Coated. W. O. Stoddard, jr. 1,664,866; Apr. 3.
Fastener. W. Marshall. 1,664,566; Apr. 3.
Fastener. J. Waldes. 1,664,582; Apr. 3.
Fastener, Chain. L. B. Thompson. 1,664,760; Apr. 3.
Fastener, Combination. J. H. Maurer. 1,664,696; Apr. 3.
Fastener, Side-clamp hood. N. W. Cummins. 1,664,771; Apr. 3.
Fastener, Snap. R. H. Holmes. 1,665,096; Apr. 3.
Fastener, Window. C. L. Hughes. 1,664,820; Apr. 3.
Faucet. G. R. Uhl. 1,664,714; Apr. 3.
Faucet and sink trap, Combination water. H. J. Hartnett. 1,665,029; Apr. 3.
Faucet, Tank-truck. G. B. Stanley. 1,664,712; Apr. 3.
Feeder, Convertible oscillating rotary. L. K. Aldrich. 1,664,960–1; Apr. 3.
Feeder, Evener-motion-controlled combined drive between finishing lapper and hopper. W. Hardman. 1,664,411; Apr. 3.
Fence guard. J. C. Farrington. 1,664,603; Apr. 3.
Fence-wire structure. H. M. Moore. 1,664,785; Apr. 3.
Filament-current-reversing device. L. W. Gillis. 1,664,813; Apr. 3.
Film developer, Coil-. G. C. Beidler. 1,664,731; Apr. 3.
Film-roll box and mounting. G. C. Beidler. 1,664,730; Apr. 3.
Film-treating apparatus. J. G. Capstaff. 1,664,735; Apr. 3.
Finishing machine. E. G. Carr. 1,665,054; Apr. 3.
Fire extinguisher. G. W. Burke, jr. 1,664,450; Apr. 3.
Fire-extinguishing sprinkler systems, Valve for. E. Tyden. 1,664,648; Apr. 3.
Fire still and oil treater. F. E. Gilmore. 1,664,920; Apr. 3.
Fishing-tackle attachment. M. Murray. 1,665,144; Apr. 3.
Floor construction. J. H. Mitter. 1,664,638; Apr. 3.
Floor covering. N. L. Campbell. 1,664,589; Apr. 3.
Flow meter. C. P. Mayer. 1,665,141; Apr. 3.
Fluid-circulating plate. A. G. Kessler. 1,664,628; Apr. 3.
Fluids from gases, Apparatus for absorbing. E. Piron. 1,664,483; Apr. 3.
Fluids to burners, Apparatus for delivery of. G. M. Peltz. 1,665,145; Apr. 3.
Fluidity-control system. H. H. Werminc. 1,664,839; Apr. 3.
Flushing and ventilating apparatus for closets. H. C. Bowlus. 1,664,588; Apr. 3.
Flying machine. W. H. Goyne. 1,665,091; Apr. 3.
Folder or file holders, Reenforced. C. E. Cather. 1,665,128; Apr. 3.
Forms and apparatus for casting concrete walls, Erecting. O. A. Hollis. 1,664,884; Apr. 3.
Frame: *See*—
Dynamo frame. Sash frame.
Machine frame. Spinning and twisting frame.
Fuel briquettes, Manufacturing. A. L. Stillman. 1,664,998; Apr. 3.
Fuel-feeding system. L. O. French. 1,664,610; Apr. 3.
Fuel-injection system. L. O. French. 1,664,607–9; Apr. 3.
Fuel-injecting system. L. O. French. 1,664,611; Apr. 3.
Fuel-injection system. L. O. French. 1,664,614-15; Apr. 3.
Furnace: *See*—
Blast furnace. Open-hearth furnace.
Hearth-tray furnace.

Temperature control, Apparatus for. A. Bonds. 1,664,965; Apr. 3.
Tennis racket. M. B. Reach. 1,664,466; Apr. 3.
Testing taper holes. M. Bartholdy. 1,664,535; Apr. 3.
Thermoelectric generator. C. W. Woodruff. 1,664,720; Apr. 3.
Thermostat. L. P. Hynes. 1,664,778; Apr. 3.
Thermostat control for cooking utensils. J. H. Hammond, jr. 1,664,551; Apr. 3.
Thermostatic current control. O. Q. Beckworth. 1,665,014; Apr. 3.
Tickets holder. L. Genest. 1,665,057; Apr. 3.

Tile, Hollow. J. Strand. 1,664,867; Apr. 3.
Tiling, Sheet wall. G. L. Bennett. 1,664,396; Apr. 3.
Tinning pot. J. J. Markey. Re16,922; Apr. 3.
Tipping machine. E. R. Richards. 1,664,898; Apr. 3.
Tire bead. R. C. Pierce. 1,665,070; Apr. 3.
Tire boot. C. Henry. 1,665,094; Apr. 3.
Tire carrier. T. H. Lynn. 1,664,754; Apr. 3.
Tire carrier, Underslung. W. R. Green. 1,664,856; Apr. 3.
Tire carrier, Underslung. W. H. Neely. Re16,923; Apr. 3.
Tire-inflating mechanism. W. G. Cumming. 1,664,970; Apr. 3.
Tire, Resilient. E. Fredrick. 1,664,674; Apr. 3.
Tone-control mechanism, Power-operated. J. H. Hammond, jr. 1,664,555; Apr. 3.
Tone modulator, Successively-operated. J. H. Hammond, jr. 1,664,553; Apr. 3.
Tongs, Clothes. W. O. Lowe. 1,664,935; Apr. 3.
Tool. F. J. Schroeder. 1,664,529; Apr. 3.
Tool, Brake-band. L. E. Watson. 1,665,150; Apr. 3.
Tool, Broaching. C. C. Hansen. 1,664,623; Apr. 3.
Tool, Compound. C. March. 1,664,783; Apr. 3.
Tool, Cotton-pin-spreading. A. Girard. 1,664,619; Apr. 3.
Tool for removing waste from spindles. G. H. Magrath. 1,665,064; Apr. 3.
Tool for restoring screw threads. H. F. Schleininger. 1,664,793; Apr. 3.
Tool for tubes of pneumatic tires, Deflation. J. L. Goff. 1,664,621; Apr. 3.
Tool for turning crank pins and the like. F. G. Wacker. 1,664,440; Apr. 3.
Tool guard. G. E. Allen. 1,664,804; Apr. 3.
Tool, Masonry-jointing. N. P. O'Neal. 1,664,701; Apr. 3.
Tool post. G. M. Class. 1,664,851; Apr. 3.
Tool, Shank-forming. J. Micali. 1,665,172; Apr. 3.
Tool, Wheel-aligning. W. T. Frazier. 1,665,161; Apr. 3.
Toy bomb or projector. A. Craig. 1,664,401; Apr. 3.
Toy, Convertible. W. E. Stark. 1,665,043; Apr. 3.
Tracing cross sections, Device for. O. von Bruber. 1,665,002; Apr. 3.
Track pedestal. H. M. Pfiager. 1,664,830–1; Apr. 3.
Tractor sweep rake. C. A. Fleming. 1,664,974; Apr. 3.
Tractors, Drawbar shift for. V. L. Gibson. 1,665,133; Apr. 3.
Traffic-controlling apparatus, Railway-. H. W. Griffin and L. F. Howard. 1,664,814; Apr. 3.
Traffic-controlling apparatus, Railway-. W. E. Smith. 1,664,834; Apr. 3.
Traffic-controlling apparatus, Railway-. H. A. Thompson. 1,664,469; Apr. 3.
Traffic-controlling apparatus, Railway-. H. A. Thompson. 1,664,532; Apr. 3.
Traffic-controlling device. G. H. Dahnke. 1,665,157; Apr. 3.
Traffic light. N. S. Bement. 1,664,536; Apr. 3.
Traffic regulator. M. E. Rusch. 1,664,947; Apr. 3.
Traffic signal for, Automobile. J. H. Powers. 1,664,791; Apr. 3.
Train control, Automatic. M. Sworaski. 1,664,868; Apr. 3.
Transformer, Tuned. G. H. Cooper. 1,664,541; Apr. 3.
Transmission mechanism. C. F. Staples. 1,664,575; Apr. 3.
Transmission mechanism. W. W. Wells. 1,664,870; Apr. 3.
Transmitter and receiver, Data. H. K. Rutherford. 1,664,948; Apr. 3.
Transmitter mouthpiece. H. F. Dodge. 1,664,852; Apr. 3.
Transportation system. H. J. Liebl. 1,664,517; Apr. 3.
Trap: *See*—
Animal trap.
Tray, Flash change. S. Fisher. 1,665,132; Apr. 3.
Tread-removing machine. H. D. Stevens. 1,665,193; Apr. 3.
Treating sheet material with heat. L. W. Brunell. 1,665,185; Apr. 3.
Trimmer. H. A. Nelson. 1,665,109; Apr. 3.
Trimmer. W. Yerger. 1,665,155; Apr. 3.
Trimming and making same. A. Holtz. 1,664,980; Apr. 3.
Trough, Watering. J. T. Langewisch. 1,664,691; Apr. 3.
Truck body for delivering ice cream. J. W. Vetter. 1,664,488; Apr. 3.
Truck, Railroad-car. W. C. Sleeman. 1,664,795; Apr. 3.
Tube cap, Oil-. J. W. Coffman. 1,664,593; Apr. 3.
Tubing, Making seamless. P. Oehmig, jr., and F. Lutzner. 1,664,990; Apr. 3.
Tuft-forming mechanism. Conrad Jobst. 1,664,421; Apr. 3.
Twine holder. E. A. Carlson. 1,665,127; Apr. 3.
Twine reel, Household. H. O. Roeske. 1,664,467; Apr. 3.
Twisting machines and the like, Spool support for. G. L. Brownell. 1,665,083; Apr. 3.
Tying weavers' knots. B. A. Peterson. 1,664,571; Apr. 3.
Urinal for automobiles and the like. G. N. Randle. 1,664,642; Apr. 3.
Valve. H. F. Smith. 1,664,493; Apr. 3.
Valve. C. B. Stone. 1,664,836; Apr. 3.
Valve and mixer, Duplex. B. Rosenbaum. 1,664,901; Apr. 3.
Valve, Electromagnetic. L. O. French. 1,664,613; Apr. 3.
Valve, Fuel-control. L. O. French. 1,664,612; Apr. 3.
Valve, Fuel-control. L. O. French. 1,664,616; Apr. 3.
Valve-lash-compensating device. C. R. Short. 1,664,710; Apr. 3.
Valve mechanism for controlling the discharge of powdered material and sand from tanks or other receptacles. L. Andrews. 1,665,081; Apr. 3.
Valve, Mixing. B. Rosenbaum. 1,664,900; Apr. 3.
Valve, Radiator. W. H. Cadwell. 1,665,052; Apr. 3.
Valve-stem protector. R. L. Lovvorn. 1,664,694; Apr. 3.
Vapors and gases from galvano-technical tanks, Withdrawal of. W. A. F. Pfanhauser. 1,664,482; Apr. 3.
Variometer. L. L. Jones. 1,664,513; Apr. 3.
Vehicle. A. Vaszin. 1,664,437; Apr. 3.
Vehicle brakes, Antisqueak device for. J. S. Gard. 1,664,855; Apr. 3.
Vehicle controlling apparatus. J. Lusse. 1,665,103; Apr. 3.
Vehicle spring. W. Arnolds. 1,664,655; Apr. 3.
Vehicle supporting device for soft roads. R. M. Cooley. 1,664,502; Apr. 3.
Vehicle ventilator. J. H. Parsons. 1,664,829; Apr. 3.
Vehicles, Elastic motor mounting for. V. E. Clark and H. D. Geyer. 1,664,662; Apr. 3.
Vehicles, Hydraulic braking system for motor. G. E. A. Hallett. 1,664,680; Apr. 3.
Vehicles, Propelling mechanism for. L. Perilli. 1,664,570; Apr. 3.
Vehicles, Spring suspension for. J. A. Luke. 1,664,478; Apr. 3.
Vending machine. A. P. Gilbertson. 1,664,546; Apr. 3.
Veneer, Stone. G. B. Bergen, sr. 1,664,964; Apr. 3.
Ventilating apparatus. W. J. Montgomery. 1,665,039; Apr. 3.
Ventilating apparatus. W. J. Montgomery. 1,665,174; Apr. 3.
Ventilator: *See*—
Vehicle ventilator.
Ventilator. D. A. Elliott. 1,665,130; Apr. 3.
Ventilator. J. Linz. 1,664,456; Apr. 3.
Vise. O. C. Larsen. 1,665,170; Apr. 3.
Vises, Device converting pipe wrenches into pipe. F. B. C. Suttery. 1,665,182; Apr. 3.
Wagon, Coaster. P. K. Raasch. 1,664,641; Apr. 3.
Wall board. E. L. Gustafson. 1,665,168; Apr. 3.
Wash boiler. P. E. Goldman. 1,664,921; Apr. 3.
Washer: *See*—
Clothes washer.
Washing machine. H. R. Merseles and P. M. Wood. 1,664,637; Apr. 3.
Washing machine. J. E. Ruffner. 1,664,792; Apr. 3.
Watch, Wrist. H. I. Cramer. Des. 74,825; Apr. 3.
Watchcase. A. P. Conant. Des. 74,823; Apr. 3.
Water cooler, Carbonated-. W. E. Leibing. 1,664,780; Apr. 3.
Water softener. H. N. Smith. 1,664,435; Apr. 3.
Weigh beam. A. Bousfield. 1,664,502; Apr. 3.
Welding machine, Electric. J. W. Meadowcroft. 1,665,038; Apr. 3.
Welding machine, Electric. J. W. Meadowcroft. 1,665,066–7; Apr. 3.
Welting and making the same, Beaded. H. Lyon. 1,664,891; Apr. 3.
Wheel: *See*—
Automobile wheel. Blade wheel.
Wheel rim. J. L. Greenwood. 1,665,092; Apr. 3.
Wheel structure. C. S. Ash. 1,664,765; Apr. 3.
Wheels, Assembling tubular-steel-spoked automobile. W. Kistler. 1,664,822; Apr. 3.
Window, Carriage-hood. O. W. Siebert. 1,665,116; Apr. 3.
Window protector, Locomotive-cab-. J. C. Boyle. 1,665,019; Apr. 3.
Window safety device. F. Dzierzenga. 1,664,599; Apr. 3.
Window seat. G. J. Trigonis. 1,664,470; Apr. 3.
Windshield-cleaning device. J. A. Howard. 1,664,746; Apr. 3.
Wire feeding and cutting machine. P. E. Wiberg. 1,664,717; Apr. 3.
Woodworking machines, Cutter head for. R. O. Betterley. 1,664,806; Apr. 3.
Wrench: *See*—
Monkey wrench.
Wrench. R. E. Ashcroft. 1,664,391; Apr. 3.
Yarn-twisting machines, Stop motion for. J. Wyss. 1,665,006; Apr. 3.
Zinc oxide. F. G. Breyer, E. H. Bunce, and J. H. Welkel. 1,664,767; Apr. 3.

CLASSIFICATION OF PATENTS

ISSUED APRIL 3, 1928.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 7: 1,664,434
56: 1,665,051
2— 11: 1,664,804
42: 1,664,926
79: 1,664,512
1,664,774
93: 1,664,449
161: 1,664,542
247: 1,664,460
4— 21: 1,664,588
110: 1,664,642
144: 1,664,426
146: 1,664,491
177: 1,664,887
5— 342: 1,664,537
7— 1: 1,664,902
8: 1,664,594
13: 1,664,906
8— 5: 1,664,678
6: 1,665,162
18: 1,664,475
9— 18: 1,664,799
10— 1: 1,664,793
154: 1,664,740
11— 2: 1,665,003
12— 34: 1,665,172
50: 1,664,639
123: 1,664,657
15— 128: 1,665,153
147: 1,664,824
150: 1,664,908
201: 1,664,797
16— 149: 1,665,024
18— 17: 1,664,628
48.8: 1,665,072
49: 1,664,981
53: 1,664,481
55: 1,664,601
19— 68: 1,664,411
122: 1,664,951
141: 1,665,136
20— 1.11: 1,664,854
11: 1,664,578
27: 1,664,978
40: 1,665,019
40.5: 1,664,746
1,664,761
1,665,031
75: 1,664,737
22— 14: 1,664,559
134: 1,664,452
23— 3: 1,664,484
1,665,013
7: 1,664,907
173: 1,665,189
1,665,190
186: 1,664,598
201: 1,664,630
237: 1,665,175
253: 1,664,839
1,664,840
24— 3: 1,665,074
68: 1,664,760
73: 1,664,415
95: 1,664,552
206: 1,664,504
233: 1,665,096
236: 1,665,059
237: 1,665,098
259: 1,664,716
25— 124: 1,665,027
131: 1,664,884
156: 1,664,689
1,664,815
26— 6: 1,664,993
28— 1: 1,664,497
19: 1,665,064
64: 1,664,794
29— 34: 1,664,480
39: 1,665,188
49: 1,664,851
73: 1,665,090
87: 1,665,150
88.2: 1,665,135
174: 1,664,822
30— 11: 1,665,155
25: 1,665,125

CLASSIFIED LIST OF TRADE-MARKS REGISTERED.

CLASS 1.

Coal. Campbell Coal Company. 240,763; Apr. 10; Serial No. 244,541; published Jan. 3, 1928.

CLASS 2.

Case, Shipping. Scott-Kidwell Jacket Company. 240,830; Apr. 10; Serial No. 257,816; published Feb. 7, 1928.
Receptacle, Metallic. Metal Package Corporation of New York. 240,793; Apr. 10; Serial No. 259,010; published Feb. 7, 1928.
Receptacles, Wooden. Richards Shook Corporation. 240,909; Apr. 10; Serial No. 235,426; published Feb. 7, 1928.

CLASS 3.

Bags and suitcases, Traveling. Lyons & Kennelly Co. Inc. 240,836; Apr. 10; Serial No. 257,087; published Jan. 31, 1928.

CLASS 4.

Cleaner. Absorene Manufacturing Company. 240,892; Apr. 10; Serial No. 258,011; published Feb. 7, 1928.
Cleaners, Household and institution and factory. C. I. Robinson. 240,890; Apr. 10; Serial No. 258,043; published Jan. 31, 1928.
Detergent composition resembling soap. H and H Cleaner Company. 240,841; Apr. 10; Serial No. 257,625; published Jan. 31, 1928.
Dressing, Automobile top. F. C. Tarpley. 241,009; Apr. 10.
Leather restorative, cleaner, etc. S. G. Lizzadro. 240,859; Apr. 10; Serial No. 256,127; published Jan. 31, 1928.
Preparation in liquid form for cleaning glass, etc. Gold Dust Corporation. 240,844; Apr. 10; Serial No. 253,940; published Feb. 7, 1928.
Soap. Insto Company. 240,833; Apr. 10; Serial No. 257,679; published Jan. 17, 1928.
Soap. H. A. Sperry. 240,928; Apr. 10; Serial No. 249,302; published Jan. 31, 1928.
Soap for cleaning hands, etc., Canned. R. H. Schwartz. 240,875 Apr. 10; Serial No. 257,317; published Jan. 31, 1928.
Soaps, soap flakes, metal polishes, etc. Alfred H. Smith Co. 240,893; Apr. 10; Serial No. 258,240; published Jan. 31, 1928.

CLASS 5.

Adhesive tape, Transparent. Package Binder Company. 240,851; Apr. 10; Serial No. 255,127; published Jan. 31, 1928.

CLASS 6.

Antiseptic. P. V. Chemical Co. 240,803; Apr. 10; Serial No. 258,648; published Feb. 7, 1928.
Antiseptic and germicide. Acme Chemical Company. 240,788; Apr. 10; Serial No. 259,092; published Feb. 7, 1928.
Antiseptics. F. S. Dilger. 240,884; Apr. 10; Serial No. 257,970; published Jan. 31, 1928.
Astringents, astringent cerates, etc. Alfred H. Smith Co. 240,901; Apr. 10; Serial No. 258,239; published Jan. 31, 1928.
Baking powder. Sprague, Warner & Company. 31,312; renewed Feb. 22, 1928.
Carbon black, etc. Peerless Carbon Black Company. 240,885; Apr. 10; Serial No. 257,995; published Jan. 31, 1928.
Chemical, Liquid. American Chemical Paint Company. 240,809; Apr. 10; Serial No. 258,562; published Jan. 31, 1928.
Composition to prevent runs in silk, etc. F. B. Karseboom. 240,749; Apr. 10; Serial No. 256,781; published Jan. 24, 1928.
Compound for stopping leaks in radiators. F. Swain. 240,818; Apr. 10; Serial No. 258,362; published Jan. 31, 1928.
Cream of tartar, oxalic acid, etc. W. A. Greenberg. 240,858; Apr. 10; Serial No. 255,847; published Feb. 7, 1928.
Disinfectants, deodorants, etc. J. C. P. Helm. 240,729; Apr. 10; Serial No. 258,871; published Jan. 24, 1928.
Extract of malt and hops. Anheuser-Busch Brewing Association. 69,002; renewed May 19, 1928.
Ferment, Desiccated amylolytic. G. Peplow. 240,832; Apr. 10; Serial No. 257,701; published Feb. 7, 1928.
Glycerin substitute. H. Bennett. 240,743; Apr. 10; Serial No. 257,272 published Jan. 24, 1928.
Hair dressing and tonic. J. S. Cutrona. 240,995; Apr. 10.
Hepatic stimulant. First Texas Chemical Manufacturing Co. 240,731; Apr. 10; Serial No. 258,862; published Jan. 24, 1928.
Hypnotic and sedative. First Texas Chemical Manufacturing Co. 240,730; Apr. 10; Serial No. 258,864; published Jan. 24, 1928.
Inhalant. United Drug Company. 240,728; Apr. 10; Serial No. 258,891; published Jan. 24, 1928.
Inhalants put up in capsules. Sharp & Dohme. 69,567; renewed June 23, 1928.

Insecticide. J. W. Shepherd. 240,906; Apr. 10; Serial No. 241,641; published Jan. 31, 1928.
Insecticide, Liquid. G. Potaris. 240,745; Apr. 10; Serial No. 257,029; published Jan. 24, 1928.
Insecticides and fungicides. Sherwin-Williams Company. 240,802; Apr. 10; Serial No. 258,657; published Feb. 7, 1928.
Laxative candy. Sherwood Products Co. 240,737; Apr. 10; Serial No. 257,941; published Jan. 24, 1928.
Laxative mint. Maybric Company. 240,747; Apr. 10; Serial No. 256,828; published Jan. 24, 1928.
Liniments and general tonics. Solomon's Drug Stores and Montford Pharmacy. 240,994; Apr. 10.
Medicinal paste. Duborel Corporation. 240,988; Apr. 10.
Medicinal preparation. J. Mincarelli. 240,813; Apr. 10; Serial No. 258,478; published Jan. 31, 1928.
Medicinal preparation. Sharp & Dohme. 69,738; renewed June 30, 1928.
Medicinal preparations. W. F. Wilson. 240,989; Apr. 10.
Medicine for poultry. O. P. Luse. 240,923; Apr. 10; Serial No. 251,193; published Feb. 7, 1928.
Medicines. P. L. Mavrelis. 240,821–2; Apr. 10; Serial Nos. 258,340–1; published Feb. 7, 1928.
Medicines. J. J. McAllister. 65,641; renewed Oct. 15, 1927.
Nitro-oxidizing agent. Nitrox Chemical Company. 68,113; renewed Mar. 10, 1928.
Oil emulsion, Castor-. Navic Chemical Co. 241,000; Apr. 10.
Ointment for colds, coughs, etc. F. M. Stipe. 240,765; Apr. 10; Serial No. 243,671; published Mar. 29, 1927.
Paste for destroying rats, mice, and roaches. A. W. Roseman. 67,877; renewed Feb. 25, 1928.
Paste, Tooth. Klewe & Co. 69,946; renewed July 21, 1928.
Perfume. Bullock's, Inc. 240,810; Apr. 10; Serial No. 258,548; published Feb. 7, 1928.
Perfumery. J. L. Demoville. 240,850; Apr. 10; Serial No. 255,056; published Jan. 31, 1928.
Powders. Tokalon Chemical Corporation. 240,908; Apr. 10; Serial No. 235,983; published Feb. 7, 1928.
Preparation for killing moths. L. S. Berkoff. 240,772; Apr. 10; Serial No. 233,758; published Jan. 24, 1928.
Preparation for the treatment of skin diseases. J. E. Wilkinson, jr. 240,812; Apr. 10; Serial No. 258,510; published Jan. 31, 1928.
Preparation for use in sterilizing. Goodwin Laboratories, Incorporated. 240,796; Apr. 10; Serial No. 258,906; published Feb. 7, 1928.
Preparation, Hog-Cholera. Yozoi Company. 240,748; Apr. 10; Serial No. 256,802; published Jan. 24, 1928.
Preparations, After-shaving. J. B. Williams Company. 240,746; Apr. 10; Serial No. 256,849; published Dec. 27, 1927.
Preparations, Theatrical make-up. M. Factor. 240,856; Apr. 10; Serial No. 255,648; published Feb. 7, 1928.
Remedy for certain diseases, Liquid. Olephen Chemical Company. 70,401; renewed Aug. 25, 1928.
Salt. Ohio Salt Company. 240,820; Apr. 10; Serial No. 258,351; published Jan. 31, 1928.
Salve. C. Andersen. 240,786; Apr. 10; Serial No. 259,094; published Feb. 7, 1928.
Salve. E. Griffith. 240,800; Apr. 10; Serial No. 258,686; published Feb. 7, 1928.
Salve. National Ointment Company. 240,831; Apr. 10; Serial No. 257,760; published Jan. 31, 1928.
Salves and ointments. Commerce Drug Co. 240,826; Apr. 10; Serial No. 257,920; published Feb. 7, 1928.
Soda and baking powder. Jones-Thierbach Co. 240,878; Apr. 10; Serial No. 257,478; published Jan. 31, 1928.
Starch, chlorinated lime, and lye, Laundry. George W. Simmons Corporation. 240,889; Apr. 10; Serial No. 258,296; published Jan. 31, 1928.
Toilet preparations. Western Products Co. 240,757; Apr. 10; Serial No. 250,005; published Jan. 24, 1928.
Tonic. Heintz, Merkle & Co. Inc. 240,795; Apr. 10; Serial No. 258,909; published Feb. 7, 1928.
Tonic alterative compound. Sharp & Dohme. 31,715; renewed June 21, 1928.
Tonic, Poultry. J. W. Murdock. 240,873; Apr. 10; Serial No. 257,185; published Feb. 7, 1928.
Tonic, Poultry. W. S. Swank. 240,817; Apr. 10; Serial No. 258,364; published Feb. 7, 1928.
Vermifuges. Sydney Ross Co. 240,799; Apr. 10; Serial No. 258,843; published Jan. 31, 1928.

CLASS 7.

Wire cable, Twisted-. Graybar Electric Company. 240,919–21; Apr. 10; Serial Nos. 251,746–8; published Jan. 31, 1928.

CLASS 9.

Ammunition. Montgomery Ward & Co. Incorporated. 240,827; Apr. 10; Serial No. 257,887; published Feb. 7, 1928.
Firecrackers. J. Halpern. 240,783; Apr. 10; Serial No. 259,169; published Feb. 7, 1928.
Matches. P. Kohloff. 240,888; Apr. 10; Serial No. 258,084; published Jan. 31, 1928.

CLASS 10.

Fertilizer. Synthetic Nitrogen Products Corporation. 240,823–4; Apr. 10; Serial Nos. 257,942–3; published Jan. 31, 1928.
Fertilizer. Synthetic Nitrogen Products Corporation. 240,882–3; Apr. 10; Serial No. 257,944–5; published Jan. 31, 1928.
Fertilizers. Virginia-Carolina Chemical Corporation. 240,880–1; Apr. 10; Serial Nos. 257,491–2; published Feb. 7, 1928.
Fertilizers. Virginia-Carolina Chemical Corporation. 240,899; Apr. 10; Serial No. 258,202; published Feb. 7, 1928.
Fertilizers, Mixed. Cudahy Packing Company. 240,815; Apr. 10; Serial No. 258,461; published Jan. 31, 1928.

CLASS 11.

Carbon paper. Smith Premier Typewriter Company. 241,004; Apr. 10.
Ink. Cardinet Chemical Company. 241,011; Apr. 11.
Ink, Writing. L. E. Waterman Company. 240,886–7; Apr. 10; Serial Nos. 258,153–4; published Jan. 31, 1928.

CLASS 12.

Brick, Building. Joseph Mayone, Inc. 240,987; Apr. 10.
Pipe, wall coping, and flue lining, Vitrified sewer. Brockway Clay Company. 241,010; Apr. 10.
Roofing, Zinc-coated. Wheeling Corrugating Company. 241,005; Apr. 10.
Sashes and frames, Window. J. Elovson. 241,008; Apr. 10.
Wall boards and sheathing, Asbestos-cement. Asbestile (Société Anonyme). 240,981; Apr. 10; Serial No. 247,882; published Jan. 17, 1928.

CLASS 13.

Aluminum cooking utensils. American Aluminum Ware Company. 240,986; Apr. 10.
Chains, Forged metal. Reid, Leahy and Lutts. 240,848; Apr. 10; Serial No. 254,683; published Feb. 7, 1928.
Fill boxes, strainers, etc., Gasoline and oil tank. Holtson Manufacturing Corporation. 240,912; Apr. 10; Serial No. 226,002; published Jan. 31, 1928.
Metal tubes. Pittsburgh Steel Products Company. 240,871; Apr. 10; Serial No. 257,025; published Jan. 31, 1928.
Pipe, pipe fittings, bolts, nuts, etc., Metal. Mueller Brass Co. 240,849; Apr. 10; Serial No. 255,020; published Jan. 31, 1928.
Shower curtains for shower baths, Waterproofed. J. W. Johnson Company. 240,837–9; Apr. 10; Serial Nos. 257,680–2; published Jan. 31, 1928.
Transom lifters. Payson Manufacturing Company. 70,375; renewed Aug. 25, 1928.
Tubes, Speaking. California Cap Company. 240,925; Apr. 10; Serial No. 250,160; published Jan. 31, 1928.
Valves, tank connections, water seals, etc. Smith Welding Equipment Corporation. 240,927; Apr. 10; Serial No. 250,101; published Jan. 31, 1928.

CLASS 14.

Castings, Railway-car. National Malleable Castings Company. 69,187; renewed May 26, 1928.
Steel and iron. Samuel Osborn & Co. Limited. 67,875; renewed Feb. 25, 1928.

CLASS 16.

Decorations, Mural. Benjamin Moore & Co. 31,906; renewed Aug. 30, 1928.
Kalsomine in dry form. West Coast Kalsomine Co. 240,985; Apr. 10.
Paint, enamel, undercoat, varnish, etc. Sunflower Auto Paint & Polish Company. 240,771; Apr. 10; Serial No. 235,179; published Jan. 24, 1928.
Paints. Borden & Remington Co. 240,744; Apr. 10; Serial No. 257,144; published Jan. 24, 1928.
Paints and varnishes. Billings, King & Co. 60,504; renewed Feb. 12, 1927.
Paints, stains, primers, etc. Elco Paint Products, Inc. 240,738–40; Apr. 10; Serial Nos. 257,668–70; published Jan. 24, 1928.
Polish. K. O. Products Co. 240,741; Apr. 10; Serial No. 257,419; published Jan. 24, 1928.

CLASS 17.

Cigarettes. Lambert Pharmacal Company. 240,953; Apr. 10; Serial No. 258,750; published Feb. 7, 1928.
Tobacco, Plug, twist, and smoking. Taylor Brothers, Incorporated. 240,956; Apr. 10; Serial No. 258,966; published Feb. 7, 1928.

CLASS 19.

Automobiles and constructional parts thereof and aeroplanes and constructive parts thereof. Société Anonyme des Usines Renault. 240,774; Apr. 10; Serial No. 222,961; published Aug. 9, 1927.
Truck bodies. Hughes-Keenan Company. 240,898; Apr. 10; Serial No. 258,183; published Jan. 31, 1928.
Trucks, wheelbarrows, etc., Hand. Casey Foster Company. 240,847; Apr. 10; Serial No. 254,348; published Feb. 7, 1928.
Windshield wipers, Automatic. Stewart-Warner Speedometer Corporation. 240,857; Apr. 10; Serial No. 255,685; published Jan. 31, 1928.

CLASS 21.

Wire, Resistance. Driver-Harris Wire Company. 70,205; renewed Aug. 11, 1928.

CLASS 22.

Golf clubs. Vulcan Last Company. 240,733; Apr. 10; Serial No. 258,383; published Jan. 24, 1928.
Golf clubs. Wilson-Western Sporting Goods Company. 240,742; Apr. 10; Serial No. 257,394; published Jan. 24, 1928.
Golf clubs and bags. Vulcan Last Company. 240,732; Apr. 10; Serial No. 258,386; published Jan. 24, 1928.
Spoon baits, Fluted-. M. E. Skinner. 69,003; renewed May 12, 1928.
Toy vehicles. Red Arrow Manufacturing Corporation. 240,761; Apr. 10; Serial No. 246,122; published Jan. 24, 1928.
Toys, dolls, and games. F. A. O. Schwarz. 31,839; renewed Aug. 2, 1928.
Toys, games, novelties. Transogram Co. Inc. 241,002; Apr. 10.
Toys, Stuffed. J. Swedlin, Inc. 240,990; Apr. 10.

CLASS 23.

Bits, drill sharpeners, etc., Drill. Gardner-Denver Company. 240,974; Apr. 10; Serial No. 258,177; published Feb. 7, 1928.
Compressed air, Device for separating oil and water from. Gast Manufacturing Corporation. 240,983; Apr. 10.
Compresses. Philadelphia Drying Machinery Company. 67,853; renewed Feb. 25, 1928.
Cutlery and other hand tools having a cutting edge. Samuel Osborn & Co. Limited. 67,874; renewed Feb. 25, 1928.
Drilling machines, tapping machines, etc., Metal. National Automatic Tool Company. 240,949; Apr. 10; Serial No. 256,789; published Jan. 17, 1928.
Gravel-screening machines and conveyors. Simplicity Engineering Company. 240,943; Apr. 10; Serial No. 252,400; published Jan. 31, 1928.
Jack, Hydraulic lifting. Standard Lift Company. 240,980; Apr. 10; Serial No. 256,890; published Jan. 31, 1928.
Machetes and axes. Collins Company. 240,958; Apr. 10; Serial No. 259,200; published Feb. 7, 1928.
Machine or apparatus made for the purpose of reclaiming lubricating oil. Hilliard Corporation. 240,935; Apr. 10; Serial No. 256,295; published Feb. 7, 1928.
Machines for removing grease, dirt, paint, varnish, or any other deleterious accumulations from the surface of any article or structure. Tridex Equipment Co. 240,973; Apr. 10; Serial No. 258,303; published Feb. 7, 1928.
Machinery. Philadelphia Drying Machinery Company. 67,855; renewed Feb. 25, 1928.
Machinery, Drying. Philadelphia Drying Machinery Company. 69,615; renewed June 23, 1928.
Machinery for drying, cooling, ordering, or treating tobacco. Philadelphia Drying Machinery Company. 67,854; renewed Feb. 25, 1928.
Machinery, Shoe. Progressive Machinery Company. 240,976; Apr. 10; Serial No. 257,811; published Jan. 31, 1928.
Mechanical painting equipment and accessories. W. N. Matthews Corporation. 240,932; Apr. 10; Serial No. 247,195; published Feb. 7, 1928.

We Propose—For Dessert—My-T-Fine. For Dessert Preparations. D & C Co. Inc. 10,772; Apr. 10.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 10TH DAY OF APRIL, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A-B Stove Company. (See Reedy, Alfred J., assignor.)
A C Spark Plug Company. (See Nutt, Frank N., assignor.)
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Wall-bracket lighting fixture. Des. 74,853; Apr. 10.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Company, Reading, Pa. Candle cup for lighting fixtures. Des. 74,854; Apr. 10.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Wall-bracket lighting fixture. Des. 74,855; Apr. 10.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Plate for lighting fixtures. Des. 74,856; Apr. 10.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Company, Reading, Pa. Loop for lighting fixtures. Des. 74,857; Apr. 10.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Wall-bracket lighting fixture. Des. 74,858; Apr. 10.
Abramson, Mono, et al. (See Levy, Henri G., assignor.)
Ackley, Charles S., New York, N. Y. Apparatus for waving hair; 1,665,619; Apr. 10.
Adams, Arthur J., Huntington Park, Calif. Wave motor. 1,665,198; Apr. 10.
Adams Elsworth Bivalve Co. (See Adams, Ralph C. and J. T., assignors.)
Adams, Jonathan T. (See Adams, Ralph C. and J. T.)
Adams, Ralph C. and J. T., Somers Point, assignors to Adams Elsworth Bivalve Co., Montclair, N. J. Device for propagation of clams. 1,665,996; Apr. 10.
Addressograph Company. (See Duncan, J. S., and Hubbard, assignors.)
Aebli, Henry, Enright, Oreg. Combination faucet and vent. 1,665,490; Apr. 10.
Aeby, Elizabeth, Indiana Harbor, Ind., assignor to L. Aeby, East Chicago, Ind. Automobile heater. 1,665,725; Apr. 10.
Aeby, Louis. (See Aeby, Elizabeth, assignor.)
Ajax Time Stamp Company. (See Marks, Albert J., assignor.)
Akers, Milton K. (See Johnston, H. L., and Akers.)
Albertini, Albert and A., Staunton, Ill. Wrench. 1,665,944; Apr. 10.
Albertini, Andrew. (See Albertini, Albert and A.)
Alderfer, Sterling W., Akron, Ohio. Method and apparatus for the manufacture of tire beads. 1,666,038; Apr. 10.
Aldrich, Herbert H. (See Norris, P. E., and Aldrich.)
Alexander, Irving, New York, N. Y. Signal lamp. Des. 74,859; Apr. 10.
Alexander, John D. (See Shearon, C. E., Alexander, and Pearcey.)
Allan, Archibald, North Shields, and H. Clothier, Wallsend-on-Tyne, assignors to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Operating gear of electric switches. 1,665,291; Apr. 10.
Allen, Charles A., Tucson, Ariz. Rail joint. 1,665,652; Apr. 10.
Allen, Edward R., and W. E. Kaufmann, East Orange, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Dispersing powder and making. 1,665,945; Apr. 10.
Allen, Grosvenor N., assignor to Oneida Community, Limited, Oneida, N. Y. Spoon or similar article. Des. 74,860; Apr. 10.
Allis, Louis, Company, The. (See Barr, John M., assignor.)
Allison, Harriet O., Charlotte, N. C. Post-base trimmer. 1,665,726; Apr. 10.
Allmänna Svenska Elektriska Aktiebolaget. (See Dreyfus, Ludwig, assignor.)
Amatel, Harold, East Orange, N. J., assignor to Westinghouse Lamp Company. Shipping and display carton. 1,665,620; Apr. 10.
American Arch Company. (See Anthony, James T., assignor.)
American Bank Note Company. (See Smith, W. H., and Webster, assignors.)
American Can Company. (See Young, John M., assignor.)
American Car and Foundry Company. (See Clade, R., and Ensign, assignors.)
American Car and Foundry Company. (See Dayes, Frederick E., assignor.)
American Car and Foundry Company. (See Gibbs, Frederick H., assignor.)
American Car and Foundry Company. (See Johnson, W. S., and Sheffer, assignors.)
American Car and Foundry Company. (See Joy, Robert W., assignor.)
American Car and Foundry Company. (See Joy, R. W., and Willoughby, assignors.)
American Car and Foundry Company. (See MacChesney, Harold S., assignor.)
American Car and Foundry Company. (See Willoughby, Victor, assignor.)
American Car and Foundry Motors Company. (See Hall, E. J., and Hawkes, assignors.)
American Car and Foundry Motors Company. (See Walker, Hubert, assignor.)
American Engineering Company. (See Weingartner, Anthony E., assignor.)
American Laundry Machinery Company, The. (See Warcam, Charles E., assignor.)
American Lithographic Company. (See Brunings, Henry H., assignor.)
American Multigraph Company, The. (See Osborne, John C., assignor.)
American Piano Company. (See Stoddard, Charles F., assignor.)
American Steam Pump Company. (See Barton, Ben D., assignor.)
American Telephone and Telegraph Company. (See Cory, Samuel I., assignor.)
American Telephone and Telegraph Company. (See Singer, Fred J., assignor.)
Anaconda Sales Company. (See Robinson, Thomas, assignor.)
Anchor Cap and Closure Corporation. (See Scofield, Edgar, assignor.)
Anderson, Frank S. (See Randle, C. I., and Anderson.)
Anderson, Hazen S., Rochester, and J. B. Brown, Flint, Mich., assignors to General Motors Corporation, Detroit, Mich. Buffer. 1,665,292; Apr. 10.
Anderson, John, Milwaukee, Wis., assignor to Combustion Engineering Corporation. Pulverized-fuel-burning furnace. 1,665,399; Apr. 10.
Anderson, John A. (See Holmes, H. N., and Anderson.)
Anderson, William S., Atlanta, Ga. Switch mechanism. 1,665,429; Apr. 10.
Ansco Photoproducts, Inc. (See Slocum, Benjamin A., assignor.)
Anthony, James T., East Orange, N. J., assignor to American Arch Company. Boiler fire box. 1,665,339; Apr. 10.
Applegate, Robert, Cleveland, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Welding. 1,666,026; Apr. 10.
Archer, Alfred, Caldwell, N. J., assignor to Mergenthaler Linotype Company. Quad block for slug-casting machines. 1,665,248; Apr. 10.
Arms, Ray W., assignor to Roberts and Shaefer Company, Chicago, Ill. Dry separating table. 1,665,249; Apr. 10.
Arnstein, Karl, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Assemblage-point device. 1,665,872; Apr. 10.
Artcraft Metal Stamping Corporation. (See Shapiro, Theodore, assignor.)
Arzt, Frederick W., Homestead, Fla. Floor jointing or tightening device. 1,665,430; Apr. 10.
Ashbaugh, John H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Speed-regulator system. 1,665,901; Apr. 10.
Atkins, Earl F., Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Spring collet chuck. 1,665,250; Apr. 10.
Atlas Powder Company. (See Taylor, A. M., and Buote, assignors.)
Austin, James G., Price, Utah. Automobile turntable. 1,665,997; Apr. 10.
Automatic Electric Inc. (See Lomax, Clarence E., assignor.)
Automatic Electric Inc. (See Middleton, Donald R., assignor.)
Automatic Electric Inc. (See Nelson, Martin L., assignor.)
Automatic Electric Inc. (See Schwartz, Michael, assignor.)

Automatic Electric Inc. (See Wicks, John, assignor.)
Avery, W. & T., Limited. (See Timson, William, assignor.)
Ayer, William T., assignor to Hercules Powder Company, Wilmington, Del. Mechanism for cutting paper shell blanks from continuous rolls of paper. 1,665,834; Apr. 10.
Babcock-Davis Corporation. (See Davis, William A., assignor.)
Bachelder, Elmer N., Portland, Me. Apparatus for infusing and filtering coffee, tea, and the like. 1,665,199; Apr. 10.
Bagby, Ralph B., assignor to J. G. Cherry Company, Cedar Rapids, Iowa. Power-transmitting mechanism. 1,665,835; Apr. 10.
Bagley and Sewall Company, The. (See Valentine, Charles W., assignor.)
Baker, Lea W., Pomona, Calif. Razor-blade holder. 1,665,836; Apr. 10.
Baratt, David, Roxbury, Mass. Sectional impression tray. 1,665,293; Apr. 10.
Barclay, Gustaf I., assignor to Detroit Steel Products Company, Detroit, Mich. Window. 1,665,431; Apr. 10.
Barclay, Gustaf I., assignor to Detroit Steel Products Company, Detroit, Mich. Window. 1,665,432; Apr. 10.
Bardello, Antonio, assignor to Ainsworth Buck, Incorporated, New York, N. Y. Safety anchor mounting. 1,665,837; Apr. 10.
Barenchi, Louis P. (See Wellington, George S., assignor.)
Barr, John M., assignor to The Louis Allis Company, Milwaukee, Wis. Rolling machine. 1,665,522; Apr. 10.
Barrett Company, The. (See Mortimer, Charles W., assignor.)
Barrett, H. M. (See Bohannan, Robert S., assignor.)
Barton, Ben D., assignor to American Steam Pump Company, Battle Creek, Mich. Pump attachment for motor vehicles. 1,665,765; Apr. 10.
Bastian, Arthur J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Molded article. 1,665,902; Apr. 10.
Batchell, George W. (See Fisher, Elbert E., assignor.)
Bates, Carl S. (See Myers, L. E., Carlson, and Bates.)
Battner, Stephen, assignor to The Rudolph Wurlitzer Manufacturing Company, North Tonawanda, N. Y. Piano fall board. 1,665,653; Apr. 10.
Bausch & Lomb Optical Company. (See Day, George H., assignor.)
Bausch & Lomb Optical Company. (See Foster, Leon V., assignor.)
Bausch & Lomb Optical Company. (See Sweeney, James A., assignor.)
Baynard, William H., assignor to H. H. Beckwith, Brookline, Mass. Adhesive-applying device. 1,666,039; Apr. 10.
Beaumont, R. H., Company. (See Beaumont, Robert H., assignor.)
Beaumont, Robert H., Radnor, assignor to R. H. Beaumont Company, Philadelphia, Pa. Automatic fuel-supply means for boilers. 1,666,027; Apr. 10.
Bechthold, John, assignor of one-eighth to A. A. Foote and one-eighth to J. L. Paine, Elma, Wash. Strawberry top and runner cutter. 1,665,998; Apr. 10.
Becker, Edmund, deceased, Washington, D. C. C. Hindmarsh and M. L. Wallis, executrices. Aerial signaling method and means. 1,665,838; Apr. 10.
Becker, John J., Brooklyn, N. Y. Mechanical toy. 1,665,578; Apr. 10.
Becket, Alan L., East Orange, N. J. Card game. 1,665,903; Apr. 10.
Beckwith, Harry H. (See Baynard, William H., assignor.)
Beech-Nut Packing Company. (See Esworthy, Joseph W., assignor.)
Bell & Howell Company, The. (See Howell, Albert S., assignor.)
Bell, John E., Brooklyn, N. Y., assignor to Foster Wheeler Corporation, New York, N. Y. Fluid heating. 1,666,028; Apr. 10.
Bell Telephone Laboratories. (See Hoch, Ellery T., assignor.)
Bell Telephone Laboratories, Incorporated. (See Whitney, Wiley, assignor.)
Bendix Brake Company. (See Dodge, Adiel Y., assignor.)
Bendixen, George. (See Whitescarver, C. T., and Bendixen.)
Benedict, Edward L., assignor to Pittsburgh Steel Company, Pittsburgh, Pa. Fabric structure. 1,665,433; Apr. 10.
Benjamin Eastwood Company. (See Wells, William S., assignor.)
Benoit, Edmond V., Montreal, Quebec, Canada. Cap extractor. 1,665,524; Apr. 10.
Bennett, Ashley C., Minneapolis, Minn. Air cleaner for carburetors. 1,665,434; Apr. 10.
Benson, Walter F. (See Kristofek, F. J., and Benson.)
Berger Manufacturing Company, The. (See Haldeman, Walter S., assignor.)
Beringer, Roscoe, assignor to General Motors Corporation, Detroit, Mich. Convertible body. 1,665,294; Apr. 10.
Bernstein, Jacob, Philadelphia, Pa. Inverted-edge hat carrier. 1,665,839; Apr. 10.
Bing, Julius, Eisenach, assignor to the firm Magnet-Werk G. m. b. H. Eisenach Spezial-Fabrik für Elektromagnet-Apparate, Eisenach, Thuringia, Germany. Method of and apparatus for disintegrating bulky scrap metal. 1,665,806; Apr. 10.
Binger, Louis, Norton, Kans. Planter attachment for plows. 1,665,873; Apr. 10.
Binger, Nickolaus, Pittsburgh, Pa. Floor scraper. 1,665,766; Apr. 10.
Binney Castings Company, The. (See Binney, Ralph L., assignor.)
Binney, Ralph L., assignor to The Binney Castings Company, Toledo, Ohio. Nonferrous casting. 1,665,435; Apr. 10.
Birney, William N., Willoughby, assignor of one-half to M. H. McKenna, Cleveland, Ohio. Autotruck mechanical dump hoist. 1,665,340; Apr. 10.
Bittner, Fredwill, Los Angeles, Calif. Marking tool. 1,665,400; Apr. 10.
Blecke, Fred, Luckey, Ohio. Ensilage harvester. 1,665,401; Apr. 10.
Bliss, Elmer J., Boston, assignor to Regal Shoe Company, Whitman, Mass. Foot-measuring device for fitting shoes. 1,666,040; Apr. 10.
Bloch, Leon, assignor to The Republic Brass Company, Cleveland, Ohio. Valve construction. 1,665,436; Apr. 10.
Boddie, Clarence A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Carrier-wave telephone system. 1,665,904; Apr. 10.
Boehm, Albert J., Princeton, Minn. Wire splicer. 1,665,525; Apr. 10.
Boehme, Otto F., Dover, N. J. Stocking. 1,665,946; Apr. 10.
Boeing Airplane Company. (See Haberlin, John F., assignor.)
Bohannan, Robert S., assignor to H. M. Barrett, Birmingham, Ala. Easer joint. 1,665,906; Apr. 10.
Boker, Vitus A., Minneapolis, Minn. Thermostat. 1,665,341; Apr. 10.
Bookmyer, Frank T., Marion, Ohio. Swinging carrier for corn shockers. 1,665,767; Apr. 10.
Booth, David N., New York, N. Y. Vehicle tire. 1,665,840; Apr. 10.
Booth, William N., Detroit, Mich. Vehicle wheel. 1,665,437; Apr. 10.
Borsenberger, Emil E., assignor to The Whitacre-Greer Fireproofing Company, Waynesburg, Ohio. Die for hollow tile. 1,665,342; Apr. 10.
Boston Machine Works Company. (See Johnson, Lawrence E., assignor.)
Bothwell, Glenn D., Springport, assignor of one-third to G. J. Bothwell, London, Ontario, Canada. Horn-resonator violin. 1,665,402; Apr. 10.
Bothwell, Guy J. (See Bothwell, Glenn D., assignor.)
Boyce, Edward C., New York, N. Y. Golf club. 1,665,523; Apr. 10.
Boyle, Clete L. (See Klinger, J. D., and Boyle.)
Brady, Thomas, East Orange, N. J., assignor to Otis Elevator Company, New York, N. Y. Electromechanical interlock. 1,665,526; Apr. 10.
Brandt Automatic Cashier Co. (See Brandt, Edward J., assignor.)
Brandt, Edward J., assignor to Brandt Automatic Cashier Co., Watertown, Wis. Coin-paying machine. 1,665,343; Apr. 10.
Braun, Philip N., and S. T. Hart, assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y. Pad for pressing machines. 1,665,654; Apr. 10.
Brautigam, George W. (See Koenig, E. O., and Brautigam.)
Brennan, Thomas H., Chicago, Ill. Inductance coil. 1,665,947; Apr. 10.
Brett, Edward H. (See Kehrer, B. F., and Brett.)
Briggs, Howard O., Minneapolis, Minn. Cord holder for vacuum cleaners, lamps, and the like. 1,665,200; Apr. 10.
Brinkman, Lewis A., Chicago, Ill. Pelorus. 1,665,527; Apr. 10.
Broadhurst, Herbert F., London, England. Apparatus for filling bottles, tins, or other containers. 1,665,948; Apr. 10.
Brower, William C., Gloversville, N. Y. Piston construction. 1,665,438; Apr. 10.
Brown & Bigelow. (See Kristofek, F. J., and Benson, assignors.)
Brown Company. (See Schur, Milton O., assignor.)
Brown, George R., Bridgeport, Conn., assignor to General Electric Company. Electric cut-out. 1,66,841; Apr. 10.
Brown, Jesse B. (See Anderson, H. S., and Brown.)
Brown, Millard D., assignor to Continental Mills, Inc., Philadelphia, Pa. Knitted fabric. Des. 74,861; Apr. 10.
Brown, William J., Savanna, Ill. Adjustable blocking for cars. 1,665,439; Apr. 10.
Browning, George, Wilmette, assignor to Chicago Flexible Shaft Company, Chicago, Ill. Electric iron. 1,665,768; Apr. 10.
Brubaker, William A., Akron, Ohio. Vulcanization. 1,665,440; Apr. 10.
Bruce, Malvern L. (See York, Allen B., assignor.)

Brunings, Henry H., Brooklyn, assignor to American Lithographic Company, New York, N. Y. Making etched printing plates. 1,665,842; Apr. 10.
Brunswick-Balke-Collender Company, The. (See Nystrom, Martin, assignor.)
Brusch, Helmuth, Chicago, Ill. Safety fender. 1,665,251; Apr. 10.
Brusch, Helmuth, Chicago, Ill. Automobile. 1,665,441; Apr. 10.
Bryant Electric Refrigerator Corporation. (See Bryant, Forrest, L., assignor.)
Bryant, Forrest L., Johnson City, N. Y., assignor to Bryant Electric Refrigerator Corporation, Wilmington, Del. Quick-make and quick-break switch. 1,665,529; Apr. 10.
Buchanan, Frank, assignor to Crouse-Hinds Company, Syracuse, N. Y. Traffic signal. 1,666,041; Apr. 10.
Buck, Ainsworth, Incorporated. (See Bardello, Antonio, assignor.)
Buckert, Homer A., St. Louis, and E. K. Hall, University City, Mo. Misalignment indicator for wheels. 1,665,252; Apr. 10.
Buckeye Steel Castings Company, The. (See Johnson, George T., assignor.)
Buckeye Steel Castings Company, The. (See Larsen, Jacob C., assignor.)
Buckeye Steel Castings Company, The. (See Larsen, J. C., and Orr, assignors.)
Buckingham & Hecht. (See Wiel, Eli H., assignor.)
Budd Wheel Company. (See Nelson, Emil A., assignor.)
Budd Wheel Company. (See Smith, John W., assignor.)
Buerger, Charles B., assignor to Gulf Refining Company, Pittsburgh, Pa. Apparatus for and process of distilling oils. 1,666,042; Apr. 10.
Buie, Norman, Stayner, Ontario, Canada. Aeroplane. 1,665,769; Apr. 10.
Builders Iron Foundry. (See Connet, Frederick N., assignor.)
Buist, Lyman O., Toronto, Ontario, Canada. Liquid container. 1,665,770; Apr. 10.
Bullard Machine Tool Company, The. (See Kolb, George F., assignor.)
Buote, Frank A. (See Taylor, A. M., and Buote.)
Burger, Frederick W. (See Stockfleth, B., and Burger.)
Burger, Frederick W., Niles, and Berger Stockfleth, Berrien Springs, assignors to Clark Tructractor Company, Buchanan, Mich. Shop tractor. 1,665,684; Apr. 10.
Burleson, Ambrose L., Berkeley, and N. P. Samantas, San Francisco, Calif. Permanent-wave apparatus. 1,665,253; Apr. 10.
Burton, Paul C. (See Galloway, R. M., and Burton.)
Bussmann, Henry T., St. Louis, Mo. Electric fuse. 1,665,528; Apr. 10.
Byerlein, Arthur A., Detroit, Mich. Clutch. 1,665,999; Apr. 10.
Byrnes, Irving F., Schenectady, N. Y., assignor to General Electric Company. Amplifier. 1,665,843; Apr. 10.
Cadden, Charles C. (See Gammeter, J. R., and Cadden.)
Cadwell, Edwin B., Saugerties, N. Y. Snow-removal apparatus. 1,665,685; Apr. 10.
Cady, George B. (See Walter, Frank J., assignor.)
Cady, George B., Canastota, N. Y. Machine for counterboring brake linings and the like. 1,665,771; Apr. 10.
Campbell, Earl E., Gillette, Wyo. Well-cleaning device. 1,666,000; Apr. 10.
Campbell, Elliott D., San Francisco, Calif. Flatiron. 1,665,295; Apr. 10.
Campbell, Harry E., assignor to Campbell Metal Window Corporation, Baltimore, Md. Sealing mechanism for window frames and sashes. 1,666,043; Apr. 10.
Campbell, John S., Pittsburgh, Pa. Cleaning apparatus. 1,665,727; Apr. 10.
Campbell, Leon J., Buchanan, Mich. Building block. 1,665,442; Apr. 10.
Campbell Metal Window Corporation. (See Campbell, Harry E., assignor.)
Cannon, John W., Providence, R. I. Oil-burning system. 1,665,443; Apr. 10.
Canright, Bruce W., St. Paul, assignor of one-half to I. E. Mcagher, Minneapolis, Minn. Coffee-making apparatus. 1,665,728; Apr. 10.
Caps, Arthur W., Kansas City, Mo., assignor, by mesne assignments, to Rhotostat Corporation, Providence, R. I. Drying press. 1,665,403; Apr. 10.
Caracristi, Virginius Z., Bronxville, N. Y., assignor to Locomotive Pulverized Fuel Company. Combustion method and apparatus. 1,665,344; Apr. 10.
Carey, Philip, Manufacturing Company, The. (See Pater, Carl J., assignor.)
Carlson, Artie C. (See Myers, L. E., Carlson, and Bates.)
Carlson, Artie C., Valparaiso, Ind., assignor, by mesne assignments, to The Northern Trust Company and H. H. Rockwell, as trustees. Coaster-wagon steering gear. 1,665,729; Apr. 10.
Carlson, Oscar, et al. (See Johnson, Matts, assignor.)
Carmona, Frederick A., and A. M. Sands, Berkeley, assignors to Carmona-Sands Corporation, San Francisco, Calif. Liquid-level indicator. 1,665,530; Apr. 10.
Carmona-Sands Corporation. (See Carmona, F. A., and Sands, assignors.)
Carpender, Guy E. (See Lucas, Z. R., and Carpender.)
Carpenter, Campbell C., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Storage-battery construction. 1,665,772; Apr. 10.
Carter-Mayhew Manufacturing Co. (See Ingraham, Charles C., assignor.)
Case & Marshall, Incorporated. (See Sponsel, Charles W., assignor.)
Casler, Herman, assignor, by mesne assignments, to Rex-Watson Corporation, Canastota, N. Y. Skate wheel. 1,665,874; Apr. 10.
Catala, Tiburce, Englewood Cliffs, N. J. Jewelry case. 1,666,001; Apr. 10.
Central Alloy Steel Corporation. (See Trembour, Max R., assignor.)
Chadillon, Joseph, Montreal, Quebec, Canada. Game board. Des. 74,862; Apr. 10.
Chain Belt Company. (See Longenecker, Charles I., assignor.)
Chamberlin, Benjamin D., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic-printing machine. 1,666,052; Apr. 10.
Chamberlin Metal Weather Strip Co. (See Glaser, J. P., Julien, and Whitten, assignors.)
Chambers, James G., and B. C. Salamis, Montreal, Quebec, Canada. Water heater. 1,665,949; Apr. 10.
Chandler, Edward F., Brooklyn, N. Y. Balanced motor fuel. 1,665,621; Apr. 10.
Chapman, Albert K., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic-printing machine. 1,666,053; Apr. 10.
Chapman, George H., Chicago, Ill. Electropneumatic combination stop action for organs. 1,665,254; Apr. 10.
Chapman, Samuel E., Ontario, Oreg. Paper feed and cutting mechanism. 1,665,444; Apr. 10.
Chase, Frank W., Melrose, assignor to Weldfast System, Inc., Salem, Mass. Machine for bundling paper currency. 1,665,730; Apr. 10.
Chase, Frank W., Melrose, assignor to Weldfast System, Inc., Salem, Mass. Machine for bundling currency. 1,665,731; Apr. 10.
Chase, Frank W., Melrose, assignor to Weldfast System, Inc., Salem, Mass. Package. 1,665,732; Apr. 10.
Chauveau, Louis L. E., Paris, France. Calling device. 1,665,622; Apr. 10.
Chauveau, Louis L. E., Paris, France. Automatic switchboard telephone system. 1,665,773; Apr. 10.
Cheek, Tolbert F., assignor, by mesne assignments, to Welte Company, Inc., New York, N. Y. Automatic musical instrument. 1,665,905; Apr. 10.
Cherry, J. G. Company. (See Bagby, Ralph B., assignor.)
Chicago Electric Manufacturing Co. (See Gough, James J., assignor.)
Chicago Flexible Shaft Company. (See Browning, George, assignor.)
Chriswell, Frederick W., Seattle, Wash. High-stake car bunk. 1,665,623; Apr. 10.
Circle F. Mfg. Co., (See Freeman, Edgar H., assignor.)
Clade, Robert, Newark, N. J., and H. B. Ensign, St. Louis, Mo., assignor to American Car and Foundry Company, New York, N. Y. Filter. 1,665,345; Apr. 10.
Clark, Clarence W., Ashland, Wis. Snowplow. 1,665,733; Apr. 10.
Clark, Herbert, Wylde Green, England. Universal joint or coupling. 1,665,734; Apr. 10.
Clark Tructractor Company. (See Burger, F. W., and Stockfleth, assignors.)
Clark Tructractor Company. (See Stockfleth, B., and Burger, assignors.)
Clark, William D., Washington, D. C. Clock mounting. 1,665,491; Apr. 10.
Clarke, Harry W., Longview, Wash. Pipe connection. 1,665,346; Apr. 10.
Cleveland Trust Company, Trustee, The. (See Jeffries, Zay, assignor.)
Climax Hosiery Mills. (See Epps, Carl, assignor.)
Cline Electric Manufacturing Company. (See O'Brien, William C., assignor.)
Clipper Belt Lacer Company. (See Diamond, James K., assignor.)
Clisson, Albert B., Geddes, N. Y., assignor to The Prosperity Company, Inc. Flexible joint. 1,665,655; Apr. 10.
Clothier, Henry W. (See Allan, A., and Clothier.)
Coda, Christopher F., Detroit, Mich. Upholstery-filling device. 1,665,907; Apr. 10.
Coffren, Richard H. (See Slye, J. Q., and Coffren.)
Cole, Elmer K., Winteraet, Iowa. Cable clamp. 1,665,531; Apr. 10.
Cole, Martin P., Goodland, Kans. Tire boot. 1,666,002; Apr. 10.
Colonial Brass Company. (See McCarthy, John J., assignor.)
Columbia Phonograph Company. (See Vasselli, Anthony J., assignor.)
Combustion Engineering Corporation. (See Anderson, John, assignor.)
Comeau, Melburn A., Haverhill, Mass. Bolt. 1,665,875; Apr. 10.

Commercial Shearing and Stamping Company, The. (See Cushwa, Charles B., assignor.)
Compton, William H. (See Wallace, F. H., and Compton.)
Condenser Corporation of America. (See Danziger, Harold I., assignor.)
Congoleum-Nairn Inc. (See Sloate, A. C., and Whyte, assignors.)
Conley, John E. (See Marden, J. W., and Conley.)
Conlin, John J., Schenectady, N. Y., assignor to General Electric Company. Purifying metals. 1,665,844; Apr. 10.
Conlon, Thomas A., Silver Spring, Md. Azimuth scale with micrometer mechanism. 1,665,656; Apr. 10.
Connet, Frederick N., assignor to Builders Iron Foundry, Providence, R. I. Thermostatic brake. 1,665,201; Apr. 10.
Conrad, Nicholas J., assignor to Schweitzer & Conrad, Chicago, Ill. Fuse. 1,665,445; Apr. 10.
Conrad, Nicholas J., Wilmette, assignor to Schweitzer & Conrad, Chicago, Ill. Fuse clip. 1,665,446; Apr. 10.
Conrad William L., Boston, Mass. Processing apparatus. 1,665,624; Apr. 10.
Consolidated Lamp and Glass Company. (See Haley, Reuben, assignor.)
Continental Mills, Inc. (See Brown, Millard D., assignor.)
Conway, George E., Cresskill, N. J. Shingle and shingle construction. 1,665,774; Apr. 10.
Cook, Ancel R., Sacramento, Calif. Rotary type of plow. 1,665,532; Apr. 10.
Cooper, Wellesley B. (See Coyle, J. A., and Cooper.)
Cornell, Elwood N., Hempstead, N. Y., assignor to The Middletown Silver Company, Middletown, Conn. Spoon or similar article. Des. 74,863; Apr. 10.
Cory, Samuel I., Towaco, N. J., assignor to American Telephone and Telegraph Company. Grounded duplex telegraph system. 1,665,296; Apr. 10.
Cory, Samuel I., Towaco, N. J., assignor to American Telephone and Telegraph Company. Grounded duplex telegraph system. 1,665,297; Apr. 10.
Costello, Frank J., assignor to Federal Tin Company, Incorporated. Baltimore, Md. Can and closure. 1,665,908; Apr. 10.
Courtaulds Limited. (See Glover, W. H., and Topham, assignors.)
Coyle, Joseph A., and W. B. Cooper, assignors to Stephen Sanford & Sons, Inc., Amsterdam, N. Y. Loom tube frame and spool. 1,665,447; Apr. 10.
Cox, David C., Soldier Summit, Utah, assignor to General Electric Company. Antisludging means for oil. 1,665,846; Apr. 10.
Crabill, John F., La Harpe, Ill. Corn-shucking machine. 1,665,404; Apr. 10.
Crafts, Otis T., assignor to Crafts Process, Inc., Manchester, N. H. Making horseshoe rands. 1,665,579; Apr. 10.
Crafts Process, Inc. (See Crafts, Otis T., assignor.)
Craig, Alvin M., New Haven, Conn., assignor to Universal Gear Shift Corporation, New York, N. Y. Gear shift. 1,665,909; Apr. 10.
Craig, Robert, Dayton, Ohio. Screw press. 1,665,202; Apr. 10.
Crane, Henry M., New York, N. Y., assignor to General Motors Corporation, Detroit, Mich. Engine. 1,665,298; Apr. 10.
Crawford, James O., Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y. Curtain-pole bracket or similar article. Des. 74,864; Apr. 10.
Crescent Brass Mfg. Co. (See Abrams, Herman, assignor.)
Crouse-Hinds Company. (See Buchanan, Frank, assignor.)
Crystler, Frank M., Belding, Mich. Signal. 1,666,003; Apr. 10.
Culp, Arthur J., Clanton, Ala. Exhaust trap. 1,666,005; Apr. 10.
Cummer, Frederick H., Los Angeles, Calif. Portable asphalt-mixing plant. 1,665,405; Apr. 10.
Cushwa, Charles B., assignor to The Commercial Shearing and Stamping Company, Youngstown, Ohio. Pallet and making the same. 1,665,290; Apr. 10.
Dake, Charles W., Chicago, Ill. Gun-cleaning rod. 1,665,257; Apr. 10.
Dake, Charles W., Chicago, Ill. Ball bearing. 1,665,448; Apr. 10.
Dally, Ovid L., Cleveland, Ohio. Aerial vessel. 1,665,533; Apr. 10.
Danckwardt, Paul, La Junta, Colo. Recovering aluminum chloride from sludge. 1,665,406; Apr. 10.
Dane, Ralph H., Portland, Me. Fender-guard plate. 1,665,492; Apr. 10.
Danziger, Harold I., assignor to Condenser Corporation of America, New York, N. Y. Condenser rack. 1,666,044; Apr. 10.
D'Arcy, Frank P., Kalamazoo, Mich. Border-wire construction and attaching clip for same. 1,665,534; Apr. 10.
Davidson, Charles L., New York, N. Y. Soot and sifting ejector for boilers. 1,665,625; Apr. 10.
Davis, Alex B., Cincinnati, Ohio, assignor to A. B. Dick Company, Chicago, Ill. Manufacture of stencil sheets. 1,665,580; Apr. 10.
Davis, Hamilton L., Martinsburg, W. Va., assignor to The Interwoven Mills, Inc., New Brunswick, N. J. Circular-knitting machine. 1,665,255; Apr. 10.
Davis, Patrick H., Leonia, N. J. Pump. 1,665,686; Apr. 10.
Davis, William A., Malden, assignor to Babcock-Davis Corporation, Boston, Mass. Staff and mounting therefor. 1,665,535; Apr. 10.
Davol, George., deceased, San Francisco, Calif., P. C. Katz, administrator. Locomotive. 1,665,910; Apr. 10.
Day, George H., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Ophthalmic mounting. 1,665,911; Apr. 10.
Day, Thomas, Company. (See Symmes, Whitman, assignor.)
Dayes, Frederick E., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Throttle control for carburetors. 1,665,407; Apr. 10.
Dayton Irrigation Company, The. (See Keys, John H., assignor.)
Dayton Steel Foundry Company, The. (See Walther, George, assignor.)
Dean, Arthur L. (See Dean, Winton A. and A. L.)
Dean, Winton A., and A. L., Long Beach, Calif. Milk and cream separator. 1,665,657; Apr. 10.
De Brey, Heinrich W. K., The Hague, Netherlands. Portable cabinet talking machine. 1,666,054; Apr. 10.
Decker, Josef B., Elkton, Md. Firecracker machine. 1,665,300; Apr. 10.
Deems, Edward M., Forest Hills, N. Y. Rail bond. 1,665,347; Apr. 10.
Deere & Company. (See Strandlund, Carl G., assignor.)
De la Haba, Albert, and E. Garcia, Ansonia, Conn. Roll for cane mills, crushers, and the like. 1,666,055; Apr. 10.
Delf, George A., assignor to J. Pavelka, St. Louis, Mo. Die. 1,665,203; Apr. 10.
Denni, Harry, Kansas City, Mo. Grating. 1,665,846; Apr. 10.
Deny, Henry F., Marydel, Md. Motor. 1,665,581; Apr. 10.
Deppé, William P., Brightwaters, and L. L. Summers, deceased, New York, N. Y.; L. L. B. Sommers and A. Young, administrators. Distilling hydrocarbon oils. 1,666,051; Apr. 10.
Derk, Joseph, assignor to The Derk Manufacturing Company, Doylestown, Pa. Pillowcase. Des. 74,865; Apr. 10.
Derk Manufacturing Company, The. (See Derk, Joseph, assignor.)
De Roos, Frank, Springfield, S. Dak. Loading chute. 1,665,493; Apr. 10.
Derrick, William I., assignor to Westco-Chippewa Pump Company, Davenport, Iowa. Pump. 1,665,687; Apr. 10.
Derrick, William I., assignor to Westco-Chippewa Pump Company, Davenport, Iowa. Pump. 1,665,688; Apr. 10.
Derrick, William I., assignor to Westco-Chippewa Pump Company, Davenport, Iowa. Pump. 1,665,689; Apr. 10.
Design Laboratories, Incorporated. (See Wilson, Edwin B., assignor.)
Detroit Steel Products Company. (See Barclay, Gustaf I., assignor.)
De Vries, Andrew, South Bend, Ind., assignor to Westinghouse Electric and Manufacturing Company. Head for lighting standards. Des. 74,866; Apr. 10.
Diamond, James K., assignor to Clipper Belt Lacer Company, Grand Rapids, Mich. Machine for setting or applying belt fasteners and the like. Re16,925; Apr. 10.
Dick, A. B., Company. (See Davis, Alex B., assignor.)
Dick, John G., Chinook, Mont. Razor-strop-dressing tool. 1,665,658; Apr. 10.
Dickey, Charles O., et al. (See Hartsock, Frank R., assignor.)
Dickey, Leonard E., et al. (See Hartsock, Frank R., assignor.)
Dierker, William A., Brooklyn, N. Y. Motor-vehicle bumper. 1,665,536; Apr. 10.
Dieter, Paul W., New York, N. Y. Lock nut. 1,665,807; Apr. 10.
Dietz, Charles H., assignor to United States Tent & Awning Company, Chicago, Ill. Awning arm. Des. 74,867; Apr. 10.
Dietz, Charles H., assignor to United States Tent & Awning Company, Chicago, Ill. Awning arm. Des. 74,868; Apr. 10.
Dietz, Charles H., assignor to United States Tent & Awning Company, Chicago, Ill. Awning arm. Des. 74,869; Apr. 10.
Dietz, Charles H., assignor to United States Tent & Awning Company, Chicago, Ill. Awning arm. Des. 74,870; Apr. 10.
Dietz, Charles H., assignor to United States Tent & Awning Company, Chicago, Ill. Awning arm. Des. 74,871; Apr. 10.
Dillon, Wallace M., Washington, D. C. Strainer. 1,665,494; Apr. 10.
Dineson, Hans E., assignor, by mesne assignments, to M. Scholman, Bridgeport, Conn. Electrical water heater. 1,665,348; Apr. 10.
Dinkelspiel, Lawrence, West New York, N. J. Lace trimming for doily or the like. Des. 74,872; Apr. 10.

Dinkelspiel, Lawrence, West New York, N. J. Lace trimming for doily or the like. Des. 74,873; Apr. 10.
Dixson, Harry, assignor to Rolscreen Company, Pella, Iowa. Guide construction for screens. 1,665,775; Apr. 10.
Dodge, Adiel Y., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake shoe. 1,665,690; Apr. 10.
Dodge, Milton L., Newburyport, Mass. Method of and machine for attaching counters to turn shoes. 1,665,582; Apr 10.
Dolan, Bernard A., Brookline, assignor to Tuttle Silver Company, Boston, Mass. Fork or similar article. Des. 74,874; Apr. 10.
Dominick & Haff, Inc. (See Hebbard, Harrison, assignor.)
Donaldson Manufacturing Company Limited. (See Hadden, William J., assignor.)
Donisthorpe, Horace S. de A., London, England, assignor to Radio Corporation of America. Thermionic valve. 1,665,626; Apr. 10.
Doran Brothers. (See Kauffmann, Ferdinand E., assignor.)
Dossert, John J., and E. E. Greaves, Syracuse, N. Y., assignors, by mesne assignments, to Westinghouse Electric & Manufacturing Company. Cabinet wringer. 1,665,912; Apr. 10.
Dow, Alexander, assignor to Dow Transmission Corporation, New York, N. Y. Variable-speed power transmission. 1,665,408; Apr. 10.
Dow, Alexander, assignor to Dow Transmission Corporation, New York, N. Y. Clutch mechanism. 1,665,409; Apr. 10.
Dow, Richard F., assignor to The Whitney Mfg. Co., Hartford, Conn. Drive chain and links therefor. 1,665,808; Apr. 10.
Dow Transmission Corporation. (See Dow, Alexander, assignor.)
Drake, Harry A., West Nyack, N. Y. Wooden boat or drag. 1,665,449; Apr. 10.
Dreyfus, Ludwig, assignor to Allmänna Svenska Elektriska Aktiebolaget, Vasteras, Sweden. Two-voltage direct-current generator. 1,665,691; Apr. 10.
Droitcour, Michael A., Providence, R. I. Sheet-printing press. 1,666,004; Apr. 10.
Dumais, Cleophas, Limoilou, Quebec, Canada. Ski attachment. 1,665,537; Apr. 10.
Duncan, Hartvig H. A., Garden City, N. Y. Ticket holder. 1,666,006; Apr. 10.
Duncan, Joseph S., and H. E. Hubbard, assignors, by mesne assignments, to Addressograph Company, Chicago, Ill. Hand addressing machine. 1,665,583; Apr. 10.
Dunhill, Alfred of London, Inc. (See Wise, F. C., and Greenwood, assignors.)
Dunn Manufacturing Co. (See Dunn, William H., assignor.)
Dunn, William H., assignor to Dunn Manufacturing Co., Chicago, Ill. Cleansing machine. 1,665,809; Apr. 10.
Du Pont, E. I. de Nemours & Company. (See Allen, E. R., and Kaufmann, assignors.)
Durst, Ray O., Richmond, Ind. Air-brake-release valve. 1,665,913; Apr. 10.
Du-Wel Steel Products Co. (See Wescott, Jay V., assignor.)
Dwyer, Edward C., Clymer, and W. O. Dwyer, Berlin, Pa. Electrical heating attachment. 1,665,950; Apr. 10.
Dwyer, William O. (See Dwyer, Edward C. and W. O.)
Eagle Lites, Inc. (See Horowitz, Julius, assignor.)
Eastman Kodak Company. (See Chamberlin, Benjamin D., assignor.)
Eastman Kodak Company. (See Chapman, Albert K., assignor.)
Eastman Kodak Company. (See Jones, L. A., and Richardson, assignors.)
Eastman Kodak Company. (See Mees, Charles E. K., assignor.)
Eastman Kodak Company. (See Tozier, George H., assignor.)
Eastman Kodak Company. (See Ward, Erwin J., assignor.)
Ebel, Frank J., New Orleans, La. Combination mouse and rat trap. 1,665,951; Apr. 10.
Eck, Earl, Minneapolis, Minn. Fish-pole holder and oarlock. 1,665,914; Apr. 10.
Economy Products Corporation. (See Voight, George F., assignor.)
Eddy, Charles F. A., New London, Conn. Signal system and direction indicator for automobiles. 1,665,584; Apr. 10.
Edelman, Philip E., Chicago, Ill. Radio receiving system. 1,665,847; Apr. 10.
Eggers, William H., Brooklyn, N. Y. Radio tube socket. 1,665,876; Apr. 10.
Ekman, Albert C., Minneapolis, Minn. Pipe-swaging device. 1,665,915; Apr. 10.
Ekstein, Joseph, New York, N. Y. Wheeled toy. Des. 74,875; Apr. 10.
Electric Manufacturing Company. (See Levy, Henri G.)
Elliott-Fisher Company. (See Lentz, Lawrence E., assignor.)
Ellis, Raymond G., Snoqualmie, Wash. Vehicle brake. 1,665,538; Apr. 10.
Ensign Carburetor Company. (See Ensign, Orville H., assignor.)
Ensign, Henry B. (See Clade, R., and Ensign.)
Ensign, Orville H., Pasadena, assignor to Ensign Carburetor Company, Los Angeles, Calif. Variable-discharge pump. 1,665,692; Apr. 10.
Epps, Carl, assignor to Climax Hosiery Mills, Athens, Ga. Reverse-plaiting knitting machine. 1,666,056; Apr. 10.
Erhard, Gustave F., assignor to The Scranton Lace Company, Scranton, Pa. Textile fabric. Des. 74,876; Apr. 10.
Esch, Max W., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for making laminated annular articles. 1,665,585; Apr. 10.
Eschholz, Otto H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Overhead welding. 1,665,916; Apr. 10.
Escole, Paul J. M., Jeumont, France. Smoothing and polishing glass or the like. 1,665,776; Apr. 10.
Esworthy, Joseph W., Binghamton, assignor to Beech-Nut Company, Canajoharie, N. Y. Vending-machine casing. Des. 74,877; Apr. 10.
Evans, Robert D., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulator system. 1,665,917; Apr. 10.
Evans, Robert D., and H. K. Sels, Pittsburgh, Pa., assignors to Westinghouse Electric & Manufacturing Company. Compensated voltage-regulator system. 1,665,918; Apr. 10.
Evans, Samuel J., Princeton, W. Va. Air-brake valve. 1,665,586; Apr. 10.
Evans, William, Piedmont, Calif. Incense burner. 1,665,659; Apr. 10.
Evershed & Vignoles Limited. (See Needham, John C., assignor.)
Fabian, Charles, assignor to Ross Gould Limited, Auckland, New Zealand. Finishing system. 1,665,777; Apr. 10.
Falls, William A., assignor to L. A. Young Industries, Inc., Detroit, Mich. Spring structure. 1,665,539; Apr. 10.
Federal Manufacturing Company. (See Olinger, Thomas, assignor.)
Federal Tin Company. (See Costello, Frank J., assignor.)
Feeney, George, and T. O'Connor, assignors of one-tenth to T. O'Brien, Columbus, Ohio. Automatic lock. 1,665,952; Apr. 10.
Feigelman, Herman A., Paterson, N. J. Desk accessory. Des. 74,878; Apr. 10.
Fernald, Charles H., Malden, Mass. Clamp. 1,665,877; Apr. 10.
Finkelstein, Max. (See Rose, Frederick A., assignor.)
Fisher, Elbert E., assignor of one-half to G. W. Batchell, Toledo, Ohio. Glass and its manufacture. 1,665,693; Apr. 10.
Fisher, Elbert E., assignor of one-half to G. W. Batchell, Toledo, Ohio. Glass and its manufacture. 1,665,694; Apr. 10.
Flintkote Company, The. (See Heppes, Otto A., assignor.)
Folberth, Frederick G., and W. M. Folberth, Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,665,204; Apr. 10.
Folberth, William M. (See Folberth, F. G. and W. M.)
Foote, Austin A., et al. (See Bechthold, John, assignor.)
Forbes, Thomas C., Hopkins, assignor to Waters-Genter Co., Minneapolis, Minn. Bread toaster. 1,665,735; Apr. 10.
Ford, Henry, Dearborn, Mich. Brake equalizer. 1,665,258; Apr. 10.
Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Curling iron. 1,665,919; Apr. 10.
Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Combination coal and electric range. 1,665,920; Apr. 10.
Forward, Walter L. (See Hollander, A., and Forward.)
Foster, Leon V., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Projection apparatus. 1,665,660; Apr. 10.
Foster, Thomas J., Ridgewood, N. J. Floor construction. 1,666,061; Apr. 10.
Foster Wheeler Corporation. (See Bell, John E., assignor.)
Foster, William J., Jersey City, N. J. Shade-cord holder. 1,665,953; Apr. 10.
Fox, Cecil M., Toledo, Ohio, assignor to The Rollaway Motor Company. Projection apparatus. 1,665,410; Apr. 10.
Fox, Tom, Spalding, Nebr. Harrow-disk sharpener. 1,665,954; Apr. 10.
Franklin Railway Supply Company. (See Peters, Frank R., assignor.)
Franklin Railway Supply Company. (See Vincent, Harry S., assignor.)

Frease, Hurxthal F., Canton, Ohio. Tubular frame structure. 1,665,921; Apr. 10.
Fredrickson, Axel E., Ferndale, Mich. Combination roaster and mixer. 1,665,778; Apr. 10.
Freeman, Edgar H., assignor to Circle F Mfg. Co., Trenton, N. J. Electric socket. 1,665,495; Apr. 10.
Freeman, Edgar H., Trenton, assignor, by mesne assignments, to Circle F Mfg. Co., Trenton, N. J. Adjustable candelabrum socket. 1,665,779; Apr. 10.
Fried. Krupp Germaniawerft Aktiengesellschaft. (See Hopf, Wilhelm, assignor.)
Galloway, Robert M., and P. C. Burton, assignors to The National Automatic Tool Company, Richmond, Ind. Drilling machine. 1,665,411; Apr. 10.
Gammeter, John R. (See Hosterman, Harry L., assignor.)
Gammeter, John R. (See Young, Harvey L., assignor.)
Gammeter, John R., and C. C. Cadden, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Precision adjustment device. 1,665,848; Apr. 10.
Ganny, Louis C., and H. Goldberg, assignors of one-sixth to T. J. Mayock, and one-sixth to J. M. Stack, Wilkes-Barre, and one-sixth to M. Mayock, Miners Mills, Pa. Holding device. 1,666,045; Apr. 10.
Garber, Harvey A., Milwaukee, Wis. Composition shingle. 1,665,450; Apr. 10.
Garcia, Arasmo. (See de la Haba, A., and Garcia.)
Garnsey, Leigh G., Redlands, Calif. Radiator shutter. 1,665,695; Apr. 10.
Gaspari, Joseph, New York, N. Y. Eyeglasses. Des. 74,879; Apr. 10.
Gates, Leroy G., Bakersfield, assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif. Apparatus for lubricating wire cables. 1,665,451; Apr. 10.
Gatewood, Ando Z., Temple, Okla. Knife structure. 1,665,955; Apr. 10.
Gem Clay Forming Company, The. (See Greene, Raymond J., assignor.)
General Electric Company. (See Brown, George R., assignor.)
General Electric Company. (See Byrnes, Irving F., assignor.)
General Electric Company. (See Conlin, John J., assignor.)
General Electric Company. (See Cox, David C., assignor.)
General Electric Company. (See Herklotz, Max, assignor.)
General Electric Company. (See Kellogg, Edward W., assignor.)
General Electric Company. (See Prince, David C., assignor.)
General Electric Company. (See Ruggles, William A., assignor.)
General Electric Company. (See Standerwick, Reginald G., assignor.)
General Electric Company. (See Weed, James M., assignor.)
General Electric Company. (See Wood, James J., assignor.)
General Motors Corporation. (See Anderson, H. S., and Brown, assignors.)
General Motors Corporation. (See Beringer, Roscoe, assignor.)
General Motors Corporation. (See Crane, Henry, M., assignor.)
General Motors Corporation. (See Taylor, Paul B., assignor.)
General Motors Research Corporation. (See Kettering, Charles F., assignor.)
General Motors Research Corporation. (See Short, Charles R., assignor.)
Gersman, Harvey M., Buffalo, and W. H. Klocks, New York, N. Y., assignors to Kalman Steel Company, Inc., Chicago, Ill. Slitting roll of machines for forming expanded metal. 1,665,349; Apr. 10.
Gerth, Felix, assignor to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. Modulating system. 1,665,350; Apr. 10.
Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches. (See Lock, Michael, assignor.)
Gesellschaft für Drahtlose Telegraphie m. b. H. (See von Korshenewski, Nicolai, assignor.)
Getz, Alphie E., Peoria, Ill. Cooling brickwork of furnaces. 1,665,205; Apr. 10.
Getz, Benjamin E., Morton, assignor, by mesne assignments, of one-half to Getz Power Washer Co., Morton, Ill., and one-half to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Washing machine. 1,665,922; Apr. 10.
Getz Power Washer Co. et al. (See Getz, Benjamin E., assignor.)
Giangrasso, Salvatore, Portland, Me. Fire alarm. 1,665,956; Apr. 10.
Gibbs, Benjamin. (See Morton, Joseph A., assignor.)
Gibbs, Frederick H., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Seat frame. 1,665,351; Apr. 10.
Gibbs, Frederick H., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Seat back. 1,665,352; Apr. 10.
Gilbert, A. C., Company. (See Noble, Kenneth B., assignor.)
Gilchrist, William A., New York, N. Y. Steam-boiler furnace. 1,665,923; Apr. 10.
Gill, Hargraves. (See Richard, E. C., and Gill.)
Gillick, Lawrence H., St. Paul, Minn., assignor to Vapor Car Heating Company, Inc., Chicago, Ill. Flexible joint. 1,665,810; Apr. 10.
Gillmor, Horatio G., Washington, D. C. Anticreeper. 1,665,696; Apr. 10.
Glaser, Joseph P., L. F. Julien, and H. W. Whitten, assignors to Chamberlin Metal Weather Strip Co., Detroit, Mich. Sash stop and pulley guard. 1,665,697; Apr. 10.
Glässel, Karl, Cannstatt, Germany. Regulating device for refrigerating machines. 1,665,878; Apr. 10.
Glessale, Albert E., Syracuse, N. Y. Fish grapple. 1,665,661; Apr. 10.
Glisky, Frank J., Pontiac, Mich. Colter-wheel structure. 1,665,957; Apr. 10.
Glove Corporation, The. (See Sturm, Frank X., assignor.)
Glover, Walter H., Leamington, and C. F. Topham, Coventry, assignors to Courtaulds Limited, London, England. Production of artificial silk. 1,665,958; Apr. 10.
Godkin, Cecil E., Hayward, Calif. Electromagnetic detecting device. 1,665,662; Apr. 10.
Goertz, August, & Co. (See Goertz, F., and Rothe, assignors.)
Goertz, Frederick, and W. C. Rothe, Newark, N. J., assignors to August Goertz & Co. Combination holder and guard for tools. 1,665,256; Apr. 10.
Going, George G., Middletown, Conn., assignor, by mesne assignments, to Remington Typewriter Company. Typewriting machine. 1,665,736; Apr. 10.
Goldberg, Harry. (See Ganny, L. C., and Goldberg.)
Goldberg, Max W., assignor to Modern Pouring Device Co., Port Washington, Wis. Pouring and lifting device. 1,665,452; Apr. 10.
Goodrich, B. F., Company, The. (See Esch, Max W., assignor.)
Goodrich, B. F., Company, The. (See Gammeter, J. R., and Cadden, assignors.)
Goodrich, B. F., Company, The. (See Legullion, Charles W., assignor.)
Goodyear Tire & Rubber Company, The. (See Hale, James E., assignor.)
Goodyear Tire & Rubber Company, The. (See Lind, Frederick A., assignor.)
Goodyear Tire & Rubber Company, The. (See Maas, Elov F., assignor.)
Goodyear Tire & Rubber Company, The. (See Templeton, Edwin G., assignor.)
Goodyear Tire & Rubber Company, The. (See Templin, Ellis W., assignor.)
Goodyear Tire & Rubber Company, The. (See Wetmore, Laurence, assignor.)
Goodyear Tire & Rubber Company, The. (See Williams, Dayton L., assignor.)
Gorton, William S., London, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Electric-current transmission. 1,665,698; Apr. 10.
Gough, James J., assignor to Chicago Electric Manufacturing Co., Chicago, Ill. Automatic switching-cord reel. 1,665,737; Apr. 10.
Gould & Eberhardt. (See Zimmermann, William F., assignor.)
Gould Storage Battery Company. (See Gould, W. S., and Osborne, assignors.)
Gould, William S., New York, and W. B. Osborne, Elma, assignors to Gould Storage Battery Company, Inc., New York, N. Y. Separator and making the same. 1,666,007; Apr. 10.
Graef, Ernest W., Caldwell, N. J. Amplifier. 1,665,699; Apr. 10.
Graffenberger, Friedrich, assignor to Milwaukee Lace Paper Company, Milwaukee, Wis. Cup-dispensing machine. 1,666,008; Apr. 10.
Graham, George C., Watertown, and R. S. Robe, Boston, Mass. Washing machine. 1,665,959; Apr. 10.
Grasselli Chemical Company, The. (See Tanner, Wellington L., assignor.)
Graves, Scott S., San Diego, Calif. Egg beater. 1,665,879; Apr. 10.
Greaves, Edwin E. (See Dossert, J. J., and Greaves.)
Green, Henry M., deceased, Los Angeles, Calif.; Pacific Southwest Trust & Savings Bank, administrator, assignor to C. M. O'Leary. Gas extractor for pumps. 1,665,540. Apr. 10.
Greenberg, Morris, Jersey City, N. J. Trunk handle. 1,665,353; Apr. 10.
Greene, Raymond J., assignor to The Gem Clay Forming Company, Sebring, Ohio. Ornamented surface and forming the same. 1,665,354; Apr. 10.
Greenwood, Willey. (See Wise, F. C., and Greenwood.)
Greve, Edgar E., Bellevue, Pa. Sucker-rod elevator. 1,665,259; Apr. 10.
Griffin, Joseph F., Teaneck, N. J., assignor to The Superheater Company, New York, N. Y. Exhaust-steam injector. 1,665,587; Apr. 10.
Griffis, John C., assignor to Pacific Pipe and Supply Company, Los Angeles, Calif. Lavatory. Des. 74,880; Apr. 10.
Grip Bow Tie Company. (See Miller, George R., assignor.)

Grissinger, Elwood, Buffalo, N. Y. Sound-projecting apparatus. 1,666,057; Apr. 10.
Grissinger, Elwood, Buffalo, N. Y. Sound projector. 1,666,058; Apr. 10.
Grissinger, Elwood, Buffalo, N. Y. Sound projector. 1,666,059; Apr. 10.
Grunert, Kurt, Turin, Italy. Producing artificial-silk filaments by drawing. 1,665,453; Apr. 10.
Grunn, Albert P., Chicago, Ill. Mixing apparatus. 1,665,260; Apr. 10.
Gschwindt, Adam, assignor to Roseland Can & Wire Goods Co., Rockford, Ill. Flour sifter. 1,665,454; Apr. 10.
Gubelmann, Ivan, H. J. Weiland, and O. Stallmann, South Milwaukee, assignors to The Newport Company, Carrollville, Wis. Preparing alkyl ethers of 3'-nitro 4'-hydroxy ortho-benzoyl benzoic acid. 1,665,541; Apr. 10.
Guest, Alfred W. F., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical machine. 1,665,261; Apr. 10.
Gulf Refining Company. (See Buerger, Charles B., assignor.)
Gustafson, Axel T., Gottenborg, Sweden. Producing articles from rubber and other thermoplastic substances. 1,665,355; Apr. 10.
Guy, Henry L., Manchester, England, assignor to Westinghouse Electric & Manufacturing Company. Heater. 1,665,356; Apr. 10.
Gysi, Alfred, Zurich, Switzerland. Artificial molar tooth and making same. 1,665,357; Apr. 10.
Haas, Ferdinand G., St. Paul, Minn. Berry box. 1,665,359; Apr. 10.
Haberlin, John F., assignor to Boeing Airplane Company, Seattle, Wash. Tail-skid shoe for airplanes. 1,665,849; Apr. 10.
Hadden, William J., assignor to Donaldson Manufacturing Company Limited, Glasgow, Scotland. Golf club. 1,665,811; Apr. 10.
Hake, Elmer C., Cincinnati, Ohio, assignor to The Ludlow Manufacturing Company, Ludlow, Ky. Moistener for cigar boxes. 1,665,663; Apr. 10.
Haldeman, Walter S., Chicago, Ill., assignor, by mesne assignments, to The Berger Manufacturing Company, Canton, Ohio. Concrete-floor core. 1,665,542; Apr. 10.
Hale, James E., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Vehicle wheel. 1,665,880; Apr. 10.
Haley, Reuben, Beaver, assignor to Consolidated Lamp and Glass Company, Coraopolis, Pa. Plate. Des. 74,881; Apr. 10.
Haley, Reuben, Beaver, assignor to Consolidated Lamp and Glass Company, Coraopolis, Pa. Vase. Des. 74,882; Apr. 10.
Haley, Reuben, Beaver, assignor to Consolidated Lamp and Glass Company, Coraopolis, Pa. Bottle. Des. 74,883; Apr. 10.
Hall, Earl K. (See Buckert, H. A., and Hall.)
Hall, Elbert J., and A. G. Hawkes, Detroit, Mich., assignors to American Car and Foundry Motors Company, New York, N. Y. Baggage rack for motor vehicles. 1,665,358; Apr. 10.
Hall, Frederick J. T., Akron, Ohio. Combined alarm clock and lamp. 1,665,412; Apr. 10.
Hamburger, Herman, Santa Paula, Calif. Attachment for bumpers. 1,665,780; Apr. 10.
Hamilton, Cliff S., Lincoln, Nebr., assignor, by mesne assignments, to Parke, Davis & Company, Detroit, Mich. Arsenical compound. 1,665,781; Apr. 10.
Hamilton, E. A. (See Spidel, Arthur S., assignor.)
Handelan, Daniel, Minneapolis, Minn. Humidifying device. 1,665,455; Apr. 10.
Haney, Martin O., Iola, Kans. Tire boot. 1,666,009; Apr. 10.
Hanna, Henry C., Marietta, Ohio. Combination metal bracket. 1,665,782; Apr. 10.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Guide for broaching tools. 1,665,496; Apr. 10.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Air-line oiler. 1,665,497; Apr. 10.
Hansson, Andrew, Brooklyn, N. Y. Ice tray. 1,665,456; Apr. 10.
Hargreaves, William, West Didsbury, Manchester, assignor of one-half to R. L. Ross and Company Limited, Stockport, England. Safety valve. 1,665,850; Apr. 10.
Harris, Joseph W., Washington, D. C. Electric butt-welded tubing and making the same. 1,665,851; Apr. 10.
Harshaw, Fuller & Goodwin Company, The. (See Harshaw, W. J., and Parke, assignors.)
Harshaw, William J., Shaker Heights Village, and C. S. Parke, assignors to The Harshaw Fuller & Goodwin Company, Cleveland Ohio. Making hydrofluoric acid. 1,665,588; Apr. 10.
Hart, Simeon T. (See Braun, P. N., and Hart.)
Hartmann, Otto H., assignor to Schmidt'sche Heissdampf Gesellschaft m. b. H., Cassel-Wilhelmshohe, Germany. Traveling plant for the generation of high-pressure steam. 1,665,543; Apr. 10.
Hartmann Trunk Company. (See Ritter, J., jr., and Rasmussen, assignors.)
Hartsock Frank R., assignor of one-third to C. O. Dickey and one-third to L. E. Dickey, Warsaw, Ind. Wheel-pitch gauge. 1,665,544; Apr. 10.
Hartwell, Leslie L., Winchester, Mass. Sanding, scouring, and buffing machine. 1,665,589; Apr. 10.
Haseman, Charles T., Mill City, Oreg. Pulley block and method of operating pulley blocks in sky-line systems. 1,665,545; Apr. 10.
Hasler A.-G. vormals Telegraphenwerkstätte von G. Hasler. (See Kohler, Ulrich, assignor.)
Hatch, Francis E., Denver, Colo. Electric furnace for treating ores, shales, etc. 1,665,546; Apr. 10.
Hawadler, Jacques A. M., Paris, France. Valve for wireless telegraphy or telephony. 1,666,010; Apr. 10.
Hawkes, Arthur G. (See Hall, E. J., and Hawkes.)
Hawley, Charles G., Cleveland, Ohio. Reenforcement for welded seams. 1,665,360; Apr. 10.
Hazel, Clayton E., and H. C. Montgomery, Joplin, Mo.; said Montgomery assignor to said Hazel. Attachment for well-drilling apparatus. 1,665,547; Apr. 10.
Head, Percy H., Attenborough, England. Manufacture of strengthened glass. 1,665,413; Apr. 10.
Hebbard, Harrison, East Orange, assignor to Dominick & Haff, Inc., Newark, N. J. Spoon or similar article. Des. 74,884; Apr. 10.
Heidephain, Heinrich, Wenatchee, Wash. Drying fruits. 1,665,627; Apr. 10.
Heilmann, Carl A., Skjelskor, Denmark. Boll-weevil destroyer. 1,665,960; Apr. 10.
Hencken, John K., Brooklyn, N. Y. Centrifugal casting machine. 1,665,700; Apr. 10.
Hendee, Lem E., Milwaukee, assignor to Line Material Company, South Milwaukee, Wis. Dead-end bracket. 1,665,498; Apr. 10.
Henry, Robert E., Pittsburgh, Pa. Protective covering for bathtubs and utilizing the same. 1,665,206; Apr. 10.
Heppes, Otto A., La Grange, Ill., assignor to The Flintkote Company, Boston, Mass. Roofing. 1,666,046; Apr. 10.
Hercules Powder Company. (See Ayer, William T., assignor.)
Herklotz, Max, Berlin, Germany, assignor to General Electric Company. Regulating system. 1,665,852; Apr. 10.
Hicks, John, Somerville, N. J. Heater. 1,665,924; Apr. 10.
Hillyard, Newton S., St. Joseph, Mo. Liquid-dispensing device. 1,665,925; Apr. 10.
Hindmarsh, Camille, et al., executrices. (See Becker, Edmund.)
Hirschy Company, The. (See Hirschy, Herman C., assignor.)
Hirschy Company, The. (See Hirschy, H. C., and Hitchcock, assignors.)
Hirschy, Herman C., assignor to The Hirschy Company, Duluth, Minn. Washing machine. 1,665,262; Apr. 10.
Hirschy, Herman C., Duluth, and R. C. Hitchcock, Minneapolis, assignors to The Hirschy Company, Duluth, Minn. Wringer-control mechanism. 1,665,263; Apr. 10.
Hirtz, Isidore, and V. Oliveri, New York, N. Y. Umbrella and cane rack. 1,665,590; Apr. 10.
Hitchcock, Ralph C. (See Hirschy, H. C., and Hitchcock.)
Hoague-Sprague Corporation. (See Smith, Harry B., assignor.)
Hobart Manufacturing Company, The. (See Johnston, H. L., and Akers, assignors.)
Hobbs Manufacturing Company. (See Lenston, Charles S., assignor.)
Hoch, Ellery T., Bloomfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. System of grouping units. 1,665,499; Apr. 10.
Hodge, George O., Bristol, Conn. Machine for forming balls. 1,665,361; Apr. 10.
Hoegger, Joseph A., Jersey City, N. J. Holder for paper rolls. 1,665,788; Apr. 10.
Hoegger, Joseph A., Jersey City, N. J. Paper holder. 1,665,739; Apr. 10.
Hoevel, Herman F. (See Menne, Fritz, assignor.)
Hoff, Edward A., and W. C. Sanford, La Oroya, Peru. Wardrobe trunk. 1,666,011; Apr. 10.
Hoffman, Benjamin P., assignor to The Pierce Development Company, Tulsa, Okla. Passing or back-up tongs. 1,665,301; Apr. 10.
Hofmann, Victor E., and L. D. Soubier, assignors to The Owens Bottle Company, Toledo, Ohio. Glass feeder. 1,665,362; Apr. 10.
Holcomb, Alpheus E., assignor to Koehring Company, Milwaukee, Wis. Multiplane traction device. 1,665,802; Apr. 10.
Holdaway, Hall H., Sawtelle, Calif. Rotary disk drill. 1,665,457; Apr. 10.
Holdener, Simon, Wolfhausen, assignor to B. Kienast, Schlossberg, Switzerland. Transmission gear. 1,665,701; Apr. 10.
Hollander, Aladar, assignor to Byron Jackson Pump Mfg. Co., Berkeley, Calif. Acid pump. 1,665,458; Apr. 10.
Hollander, Aladar, Berkeley, and W. L. Forward, Oakland, assignors to Byron Jackson Pump Mfg. Co., Berkeley, Calif. Pump-packing means. 1,665,459; Apr. 10.

Hollander, Aladar, Berkeley, and W. L. Forward, Oakland, assignors to Byron Jackson Pump Mfg. Co., Berkeley, Calif. Priming means. 1,665,460; Apr. 10.

Holmes Electric Protective Company. (See Roe, William C., assignor.)

Holmes, Harry N., and J. A. Anderson, Oberlin, Ohio. Silica gels and making the same. 1,665,264; Apr. 10.

Holmes, Henry S., New York, assignor to T. E. Murray, Brooklyn, N. Y. Welding tubes to plates or cylinders. 1,665,461; Apr. 10.

Hombrecher, Albert, Barmen-Langerfeld, Germany. Spool carrier for plaiting, knot-work, bobbin, and lace-making machines. 1,665,783; Apr 10.

Hooker, Duncan C., Farmington, Conn. Device for cleaning firearms. 1,665,961; Apr. 10.

Hopf, Wilhelm, Kiel, assignor to Fried. Krupp Germaniawerft Aktiengesellschaft, Kiel-Gaarden, Germany. Water-tube boiler. 1,665,664; Apr. 10.

Hopkins, Arthur C., assignor to National Standard Company, Niles, Mich. Lifting jack. 1,665,363; Apr. 10.

Horihata, Kenji, New York, N. Y. Window cleaner. 1,666,060; Apr. 10.

Hornauer, Willy, Neukolln, assignor to Vox Maschinen-Aktiengesellschaft, Berlin, Germany. Electromagnetic talking machine. 1,665,784; Apr. 10.

Horowitz, Julius, assignor to Eagle Lites, Inc., New York, N. Y. Bracket plate for lighting fixtures or analogous articles. Des. 74,885; Apr. 10.

Hosterman, Harry L., assignor to John R. Gammeter, Akron, Ohio. Ignition timer and distributor. 1,665,265; Apr. 10.

Howard, Marshall, assignor to Woods Brothers Construction Co., Lincoln, Nebr. Piling. 1,665,462; Apr. 10.

Howard, Stanley R., East Milton, assignor to Pneumatic Scale Corporation, Limited, Quincy, Mass. Driving mechanism. 1,665,463; Apr. 10.

Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Photographic-film reel and manufacturing the same. 1,665,207; Apr. 10.

Hubbard, Henry E. (See Duncan, J. S., and Hubbard.)

Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Pipe joint. 1,665,208; Apr. 10.

Hull, John E., Providence, R. I. Wrench for vertical twister travelers. 1,665,926; Apr. 10.

Humphrey, Clen S., Brooklyn, N. Y. Cooking, freezing, and storing receptacles. 1,666,012; Apr. 10.

Hunt, Francis H., and F. N. Ropp, assignors, by mesne assignments, to Raymond Concrete Pile Company, Los Angeles, Calif. Apparatus for forming molds for columns with bases. 1,665,365; Apr. 10.

Hunt, John O., assignor to Independent Paper Mills, Inc., Brooklyn, N. Y. Towel dispenser. 1,665,628; Apr. 10.

Hunter, William N., Blanchester, Ohio. Fastener. 1,665,303; Apr. 10.

Hurster, William, Richmond Hill, N. Y., assignor to The Ovalite Company, Incorporated. Lamp base or article of similar nature. Des. 74,886; Apr. 10.

Huston, Charles L., Coatesville, Pa. Transfer system for heavy metal plates. 1,665,209; Apr. 10.

Huston, Thomas S., Denver, Colo. Collapsible crate. 1,665,266; Apr. 10.

Huth, Milo E., Alliance, Ohio. Amusement device. 1,665,364; Apr. 10.

Hutzenlaub, Eugen, Stuttgart-Gaisburg, assignor to the firm Paul Lechler, Stuttgart, Germany. Bituminous product and making same. 1,665,881; Apr. 10.

Ilich, Amson G., New York, N. Y. Mechanism for attaching window fixtures. 1,665,785; Apr. 10.

Independent Paper Mills, Inc. (See Hunt, John O., assignor.)

Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)

Ingersoll-Rand Company. (See Lear, Earl B., assignor.)

Ingersoll-Rand Company. (See Redfield, Snowden B., assignor.)

Ingraham, Charles C., assignor to Carter-Mayhew Manufacturing Co., Minneapolis, Minn. Disk separator. 1,665,548; Apr. 10.

Ingraham, Charles C., assignor to Carter-Mayhew Manufacturing Co., Minneapolis, Minn. Pocketed separating disk. 1,665,549; Apr. 10.

International Motor Company. (See Atkins, Earl F., assignor.)

Interwoven Mills, Inc., The. (See Davis, Hamilton L., assignor.)

Irish, David J. (See Strachan, C., and Irish.)

Irish, David J., West New Brighton, assignor to Morse Dry Dock & Repair Co., New York, N. Y. Furnace front. 1,665,786; Apr. 10.

Iwadare, Toru, Tokyo, Japan. Manufacturing a new syphilis remedy from dihydroxy-diamino-arseno-benzene-monomethylene sulphonic acid. 1,665,787; Apr. 10.

Jackson, Byron, Pump Mfg. Co. (See Hollander, Aladar, assignor.)

Jackson, Byron, Pump Mfg. Co. (See Hollander, A., and Forward, assignors.)

Jackson, William H., Douglaston, N. Y. Sterilizing bearings for shafting. 1,666,013; Apr. 10.

Jacobsohn, Isadore M., Chicago, Ill., and S. Truscott, Birmingham, Ohio. Aircraft covering. 1,665,500; Apr. 10.

Jahnke, Kurt, Ludwigsburg, Germany. Producing a hard low-temperature coke. 1,665,665; Apr. 10.

James, Sidney V., Niagara Falls, N. Y., assignor to Sheets-Rockford Silver Company, Rockford, Ill. Spoon or similar article. Des. 74,887; Apr. 10.

Jammer, Jacob S., assignor to Western Electric Company, Incorporated, New York, N. Y. Amplifying repeater. 1,665,501; Apr. 10.

Jannette, John T., Chicago, Ill. Contact holder. 1,665,550; Apr. 10.

Jarvis, Frank J. (See Jarvis, Nelson L. and F. J.)

Jarvis & Jarvis, Inc. (See Jarvis, Nelson L. and F. J., assignors.)

Jarvis, Nelson L. and F. J., assignors to Jarvis & Jarvis, Inc., Palmer, Mass. Caster. 1,665,882; Apr. 10.

Jeffrey Manufacturing Company, The. (See Liggett, William K., assignor.)

Jeffries, Zay, Shaker Heights, assignor to The Cleveland Trust Company, trustee, Cleveland, Ohio. Magnetic sound-reproducing device. 1,665,740; Apr. 10.

Jehle, Ferdinand, Cleveland Heights, assignor to The White Motor Company, Cleveland, Ohio. Lubrication system for internal-combustion engines. 1,665,366; Apr. 10.

Jenner, Charles W., New Westminster, British Columbia, Canada. Storage-battery plate and producing same. 1,665,962; Apr. 10.

Jernberg, Axel V., Tidaholm, Sweden. Producing artificial fogs. 1,665,267; Apr. 10.

Johnson, George T., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Six-wheel car-truck construction. 1,665,414; Apr. 10.

Johnson, Lawrence E., Melrose, assignor of one-half to Boston Machine Works Company, Lynn, Mass. Water heater. 1,665,210; Apr. 10.

Johnson, Matts, assignor of one-fourth to N. P. Nelson, and one-fourth to O. Carlson, Spokane, Wash. Baking oven. 1,665,551; Apr. 10.

Johnson, William S., and J. W. Sheffer, Berwick, Pa., assignors to American Car and Foundry Company, New York, N. Y. Electric heater. 1,665,367; Apr. 10.

Johnston, Herbert L., and M. K. Akers, assignors to The Hobart Manufacturing Company, Troy, Ohio. Short-circuiting device for electric motors. 1,665,304; Apr. 10.

Jones, John, Wilkes-Barre, Pa. Arch-supporting shoe. 1,665,741; Apr. 10.

Jones, John J., Ridley Park, Pa. Hose or pipe coupling. 1,665,812; Apr. 10.

Jones & Laughlin Steel Corporation. (See Rendleman, Norman C., assignor.)

Jones, Loyd A., and E. E. Richardson, assignors to Eastman Kodak Company, Rochester, N. Y. Projection system. 1,666,047; Apr. 10.

Joseph, Fred C., New York, N. Y. Jewelry setting. Des. 74,888; Apr. 10.

Joy, Robert W., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Tank-car-dome closure. 1,665,368; Apr. 10.

Joy, Robert W., Brooklyn, N. Y., and V. Willoughby, Ridgewood, N. J., assignors to American Car and Foundry Company, New York, N. Y. Car-tank closure. 1,665,369; Apr. 10.

Julien, Louis F. (See Glaser, J. P., Julien, and Whitten.)

Junghans, Oskar, deceased, Schramberg, Germany; S. Junghans, administrator. Percussion fuse. 1,665,666; Apr. 10.

Junghans, Siegfried, administrator. (See Junghans, Oskar.)

Kalman Steel Company. (See Gersman, H. M., and Klocke, assignors.)

Kane Boiler Works. (See Kane, Joseph J., assignor.)

Kane, Joseph J., assignor to Kane Boiler Works, Galveston, Tex. Land-dredging pipe and manufacture thereof. 1,665,591; Apr. 10.

Karmazin, John, Detroit, Mich. Positive stock-feed stop. 1,665,813; Apr. 10.

Katz, Phil C., administrator. (See Kavol, George K.)

Kauffmann, Ferdinand E., Rahway, N. J., assignor to Doran Brothers, Danbury, Conn. Hat-clipping machine. Re16,928; Apr. 10.

Kaufmann, Wilford E. (See Allen, E. R., and Kaufmann.)

Kawneer Company, The. (See Plym, Francis J., assignor.)

Keboe, Michael, Tucson, Ariz. Parking-brake attachment for motor vehicles. 1,665,415; Apr. 10.

Kehrer, Bertram F., and E. H. Brett, Seattle, Wash. Window-frame construction. 1,665,702; Apr. 10.

Kell, George, Louisville, Ohio. Wheel puller. 1,665,552; Apr. 10.

Kellogg Corset Company. (See Kellogg, Douglas C., assignor.)

Kellogg, Douglas C., assignor to Kellogg Corset Company, Jackson, Mich. Abdominal support. 1,665,502; Apr. 10.

Kellogg, Edward W., Schenectady, N. Y., assignor to General Electric Company. Power-amplifying system. 1,665,883; Apr. 10.

Kellogg Switchboard and Supply Company. (See Stazak, Michael B., assignor.)

Kelly, William M., Westfield, N. J. Drop guide. 1,665,305; Apr. 10.

Kendall, Ira H., assignor to The Kendall Patents, Inc., Potsdam, N. Y. Can-washing machine. 1,665,927; Apr. 10.

Kendall Patents, Inc., The. (See Kendall, Ira H., assignor.)

Kennedy, Aubrey M., New York, N. Y. Sound-neutralizing ventilator. 1,665,211; Apr. 10.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Germany. Typographical machine. 1,665,268; Apr. 10.

Kennedy, James W., Canton, Ohio. Crossing signal. 1,665,592; Apr. 10.

Kennington, William O., London, England. Brake mechanism operated by suction. 1,665,306; Apr. 10.

Kernes, James, assignor to Kernes Manufacturing Co., Chicago, Ill. Portable electric lamp. 1,665,703; Apr. 10.

Kernes, James, assignor to Kernes Manufacturing Co., Chicago, Ill. Rod for curtains, draperies, and the like. 1,665,704; Apr. 10.

Kernes Manufacturing Co. (See Kernes, James, assignor.)

Kershner, John H., Norton, Kans. Grinder cutter. 1,666,014; Apr. 10.

Kettering, Charles F., assignor to General Motors Research Corporation, Dayton, Ohio. Cooling system for internal-combustion engines. 1,665,307; Apr. 10.

Key, Claude L., Milton, Oreg. Weeder. 1,665,464; Apr. 10.

Keyes, Frederick G., Cambridge, assignor, by mesne assignments, to National Refrigerating Company, Boston, Mass. Refrigerating apparatus. 1,665,370; Apr. 10.

Keys, John H., assignor to The Dayton Irrigation Company, Dayton, Ohio. Sprinkler. 1,665,371; Apr. 10.

Kienast, Benjamin. (See Holdener, Simon, assignor.)

Kiernan, John. (See Thomas, Edwin E., assignor.)

Kingston, Frederick S., assignor to The Sunlight Electrical Manufacturing Company, Warren, Ohio. Induction motor. 1,665,742; Apr. 10.

Klages, George W. (See Stroh, W. Y., and Klages.)

Klein, Joseph W., Los Angeles, Calif. Chromatic scale and solo-note-selecting device for organs and pianos. 1,665,593; Apr. 10.

Kline, Fred J., New York, N. Y. Paper-filing device. 1,665,705; Apr. 10.

Klinger, James D., and C. L. Boyle, Detroit, Mich. Preparation for cleaning metal preparatory to painting. 1,665,465; Apr. 10.

Klocke, William H. (See Gersman, H. M., and Klocke.)

Knapp, Charles N. F., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Air-brake mechanism. 1,665,928; Apr. 10.

Knapp, Merritt A., Rosalia, Wash. Hydraulic transmission mechanism. 1,665,743; Apr. 10.

Knappe, Paul A., Santa Rosa, Calif. Hammock. 1,665,553; Apr. 10.

Knight Company, The. (See Ramazzotti, Daniel V., assignor.)

Koch, William F., Camden, N. J. Music-roll tab. 1,665,963; Apr. 10.

Koehler, Marcel, Paris, France. Lubricating system. 1,665,964; Apr. 10.

Koehring Company. (See Holcomb, Alpheus E., assignor.)

Koehring Company. (See Lichtenberg, E. H., and Webb, assignors.)

Koehring Company. (See Robb, John F., assignor.)

Koehring Company. (See Webb, George E., assignor.)

Koenig, Elwin O., and G. W. Brautigam, Philadelphia, Pa. Air pump. 1,665,965; Apr. 10.

Kohler, Ulrich, assignor to Hasler A.-G. vormals Telegraphenwerkstätte von G. Hasler, Bern, Switzerland. Inking mechanism of machines for franking postal matter and the like. 1,665,884; Apr. 10.

Kolb, George F., Fairfield, assignor to The Bullard Machine Tool Company, Bridgeport, Conn. Clutch. 1,665,554; Apr. 10.

Kolmeier, Walter. (See Pfeil, W., and Kolmeier.)

Koufman, Abraham. (See Lichten, A. S., Koufman, and Shulik.)

Kretschmer, Henry A., La Grange Park, Ill. Combination container and picture frame. Des. 74,889; Apr. 10.

Kristofek, Frank J., and W. F. Benson, assignors to Brown & Bigelow, St. Paul, Minn. Engine-turning machine. 1,665,372; Apr. 10.

Kroder, John, and Henry Reubal Company, The. (See Crawford, James O., assignor.)

Krum, Howard L., assignor, by mesne assignments, to Morkum-Kleinschmidt Corporation, Chicago, Ill. Telegraph printer. 1,665,594; Apr. 10.

Kupka, Johann, Vienna, Austria. Locomotive-valve gear. 1,665,966; Apr. 10.

Küsters, Wilhelm, Aachen, Germany. Liquid-level indicator. 1,665,667; Apr. 10.

Lamb, Frank H., Hoquiam, Wash. Conveyer flight. 1,665,373; Apr. 10.

La Mont, Charles T., Milwaukee, Wis. Stocking marker. 1,665,706; Apr. 10.

Lamotke, Frederick, Teaneck, assignor of one-half to W. H. Wettlaufer, Englewood, N. J. Fuel economizer. 1,665,630; Apr. 10.

La Motte, Charles H., Sound Porcupine, Ontario, Canada. Pipe cutter. 1,665,212; Apr. 10.

Land, George W., Vancouver, Wash. Tank-cleaning apparatus. 1,666,015; Apr. 10.

Landberg, Margot, assignor of one-half to J. P. Seeburg, Chicago, Ill. Face-spraying device. 1,665,744; Apr. 10.

Landis Machine Company. (See Newman, Samuel F., assignor.)

Lang, Albion S., Jamaica Plain, Mass. Saxophone cord. 1,665,745; Apr. 10.

Lang, Maxwell C., Indianapolis, Ind. Finger ring. Des. 74,890; Apr. 10.

Larsen, Jacob C., and C. L. Orr, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Six-wheel car-truck constructions. 1,665,416; Apr. 10.

Larsen, Jacob C., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Car-truck construction. 1,665,417; Apr. 10.

Laschenski, Charles W., Trenton, N. J., assignor to New Castle Refractories Company, New Castle, Pa. Kiln-car-deck support. 1,665,631; Apr. 10.

Lasker, William W., Brooklyn, N. Y., and J. Mueller, North Bergen, N. J., assignors, by mesne assignments, to Remington Rand Inc., New York, N. Y. Sorting machine. 1,665,595; Apr. 10.

Laursen, Laurits A., Eau Claire, Wis., assignor of one-fourth to P. F. Laursen, Akron, Ohio. Vulcanizing rubber tubes and rubber tube produced thereby. 1,665,308; Apr. 10.

Laursen, Laurits A., Eau Claire, Wis., assignor of one-fourth to P. F. Laursen, Akron, Ohio. Vulcanizing rubber. 1,665,309; Apr. 10.

Laursen, Laurits A., Eau Claire, Wis., assignor of one-fourth to P. F. Laursen, Akron, Ohio. Process and apparatus for vulcanizing rubber articles. 1,665,310; Apr. 10.

Laursen, Laurits A., Eau Claire, Wis., assignor of one-fourth to P. F. Laursen, Akron, Ohio. Vulcanizing method and apparatus for rubber. 1,665,311; Apr. 10.

Laursen, Laurits A., assignor of one-fourth to P. F. Laursen, Akron, Ohio. Method of and apparatus for vulcanizing rubber articles. 1,665,312; Apr. 10.

Laursen, Pearl F. (See Laursen, Laurits A., assignor.)

Lavarack, Frederick C., Montclair, and W. H. B. Lavarack, Norwood Borough, N. J. Bootlet. 1,665,629; Apr. 10.

Lavarack, William H. B. (See Lavarack, Frederick C. and W. H. B.)

Lavarack, William H. B., Pine Bush, and B. A. Lundy, Larchmont, N. Y. Railway sign. 1,665,374; Apr. 10.

Lear, Earl B., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Mounting for rock drills. 1,665,209; Apr. 10.

Le Bus, George F., Electra, Tex. Sand-tester pump. 1,665,967; Apr. 10.

Lechler, Firm Paul. (See Hutzenlaub, Eugen, assignor.)

Leeds & Northrup Company. (See Wunsch, Felix, assignor.)

Legullon, Charles W., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Apparatus for making grommets. 1,665,853; Apr. 10.

Le Mesurier, Henry E., London, England. Internal-combustion engine. 1,665,885; Apr. 10.

Lempertz, Eberhard, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Gas-inflated airship. 1,665,886; Apr. 10.

Lenehan, Bernard E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Alternating-current device. 1,665,854; Apr. 10.

Lenoir, Milton C., Lombard, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,665,814; Apr. 10.

Lenston, Charles S., assignor to Hobbs Manufacturing Company, Worcester, Mass. Feed-roller support. 1,665,596; Apr. 10.

Lentz, Lawrence E., Harrisburg, Pa., assignor to Elliott-Fisher Company. Cutting machine. 1,665,213; Apr. 10.

Leon, Lewicki J., West Chicago, Ill. Bird cage. Des. 74,891; Apr. 10.

Levy, Henri G., et al. (See Levy, Henri G., assignor.)

Levy, Henri G., assignor to M. Abramson and H. G. Levy, doing business under the firm name and style of Electric Manufacturing Company, San Francisco, Calif. Curling-iron heater. 1,665,746; Apr. 10.

Levy, Jacob, Boston, Mass. Device for cutting pipe. 1,665,707; Apr. 10.

Lewis, Jacob D., Yonkers, N. Y., assignor to Otis Elevator Company, Jersey City, N. J. Protective device for three-phase alternating-current units. 1,665,313; Apr. 10.

Libbey Glass Manufacturing Company, The. (See Parker, Alvah C., assignor.)

Lichten, Arthur S., A. Koufman, and W. Shulik, Philadelphia, Pa. Trousers. 1,665,855; Apr. 10.

Lichten, Arthur S., A. Koufman, and W. Shulik, Philadelphia, Pa. Trousers. 1,665,856; Apr. 10.

Lichtenberg, Erich H., and G. E. Webb, assignor to Koehring Company, Milwaukee, Wis. Water-introducing means for concrete mixers. 1,665,314; Apr. 10.

Liedtke, Hans, Hamburg, Germany. Mending fabric articles. 1,665,968; Apr. 10.

Liggett, William K., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Roller support. 1,665,418; Apr. 10.

Lind, Frederick A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Holder for tires. 1,665,887; Apr. 10.

Line Material Company. (See Hendee, Lem E., assignor.)

Lininger, Bertha B., Versailles, Mo. Stocking protector. 1,666,017; Apr. 10.

Lippard, Herman I., Upper Darby, Pa. Sewing needle. Re16,926; Apr. 10.

Liptak, Michael, Minneapolis, Minn. Fire-tile door-frame. 1,665,555; Apr. 10.

Liptak, Michael, St. Paul, Minn. Fire wall. 1,665,556; Apr. 10.

Litty, John R., Philadelphia, Pa. Cake-splitting machine. 1,665,888; Apr. 10.

Livermore, Kenneth C., Ithaca, N. Y. Two-way plow. 1,666,016; Apr. 10.

Lock, Michael, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany. Radio signaling system. 1,665,632; Apr. 10.

Locomotive Pulverized Fuel Company. (See Caracristi, Virginius Z., assignor.)

Locomotive Stoker Company. (See Lower, N. M., and Turner, assignors.)

Loederer, Richard A., New York, N. Y. Moving-picture book. 1,665,747; Apr. 10.

Lofman, Charles, assignor to Roberti Bros., Los Angeles, Calif. Portable folding bed. 1,665,668; Apr. 10.

Lomax, Clarence E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Telephone system. 1,665,708; Apr. 10.

Long, Herbert J. (See Schneider, F. D., and Long.)

Longenecker, Charles I., Wauwatosa, assignor to Chain Belt Company, Milwaukee, Wis. Diaphragm pump. 1,665,709; Apr. 10.

Lorenz, C., Aktiengesellschaft. (See Gerth, Felix, assignor.)

Lower, Nathan M., and E. A. Turner, assignors to Locomotive Stoker Company, Pittsburgh, Pa. Locomotive stoker. 1,665,748; Apr. 10.

Lubbers & Bell Manufacturing Co. (See Lubbers, John A., assignor.)

Lubbers, John A., assignor to Lubbers & Bell Manufacturing Co., Clinton, Iowa. Fly swatter. 1,665,270; Apr. 10.

Lubbers, John A., assignor to Lubbers & Bell Manufacturing Company, Clinton, Iowa. Display stand. 1,665,271; Apr. 10.

Lucas, Zana R., and G. E. Carpender, West Chicago, Ill.; said Carpender assignor to said Lucas. Manicuring buffer. 1,665,710; Apr. 10.

Ludlow Manufacturing Company, The. (See Hake, Elmer C., assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Arnstein, Karl, assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Lempertz, Eberhard, assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Rieger, Leonz, assignor.)

Lundy, Beverly A. (See Lavnrack, W. H. B., and Lundy.)

Lux, Leo A., Rocky River, Ohio. Container. 1,665,711; Apr. 10.

M S Co. (See Nittel, Frederick W., assignor.)

Maas, Elov F., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Chafing-strip applier. 1,665,889; Apr. 10.

Maatschappij tot Beheer en Exploitatie van Octrooien. (See von Reis, Lambert, assignor.)

MacChesney, Harold S., assignor to American Car and Foundry Company, New York, N. Y. Producing clutch drums. 1,665,375; Apr. 10.

Madden, Daniel D., Portland, Oreg. Imprinting device. 1,666,029; Apr. 10.

Madden, Daniel D., Portland, Oreg. Imprinted paper. 1,666,030; Apr. 10.

Madden, Daniel D., assignor to Pacific Northwest Paper Mills, Inc., Portland, Oreg. Producing imprinted paper. 1,666,031; Apr. 10.

Magnet-Werk G. m. b. H. Eisenach Spezial-fabrik für Elektromagnet-Apparate. (See Bing, Julius, assignor.)

Malouf, Edward F., Marysville, Calif. Nail setter. 1,665,669; Apr. 10.

Manzel, Charles W., Buffalo, N. Y. Combined low and high pressure oil pump. 1,665,670; Apr. 10.

Marden, John W., East Orange, N. J., assignor to Westinghouse Lamp Company. Preparation of metal halides. 1,665,634; Apr. 10.

Marden, John W., East Orange, N. J., assignor to Westinghouse Lamp Company. Purification of metal powders. 1,665,635; Apr. 10.

Marden, John W., East Orange, and J. E. Conley, Bloomfield, N. J., assignors to Westinghouse Lamp Company. Activation of electron-emission material. 1,665,636; Apr. 10.

Marden, John W., East Orange, N. J., assignor to Westinghouse Lamp Company. X-ray tube. 1,665,637; Apr. 10.

Marks, Albert J., assignor to Ajax Time Stamp Company, Boston, Mass. Stamping device. 1,665,597; Apr. 10.

Massey, Alexander J., Los Angeles, Calif. Vehicle signal. 1,665,315; Apr. 10.

Matthews, Blanche E., Los Angeles, Calif. Electric iron-cord control. 1,665,316; Apr. 10.

Mattison, Carl L., assignor to Mattison Machine Works, Rockford, Ill. Double-belt sander. 1,665,749; Apr. 10.

Mattison Machine Works. (See Mattison, Carl L., assignor.)

Mauro, Benoit, Brooklyn, N. Y. Organ. 1,666,032; Apr. 10.

Mauser, Alfons, Cologne-Marienburg, Germany. Welding machine. 1,665,815; Apr. 10.

Mautner, Charles, Brooklyn, N. Y. Frame-joint construction. 1,665,816; Apr. 10.

Maxson, Frank P., Chicago, Ill. Coping saw. 1,665,317; Apr. 10.

May, Heinz, Hannover, Germany. Restretchable tennis racket. 1,665,598; Apr. 10.

Mayette, Edgar, Canisteo, N. Y. Amusement apparatus. 1,666,018; Apr. 10.

Mayock, Michael, et al. (See Ganny, L. C., and Goldberg, assignors.)

Mayock, Thomas J., et al. (See Ganny, L. C., and Goldberg, assignors.)

McCarthy, John J., Middleboro, Mass., assignor to Colonial Brass Company, Middleboro, Mass. Potato-chip machine. 1,666,019; Apr. 10.

McClave, Roscoe P. and S. W., jr., Cliffside, N. J. Apparatus for the removal of snow. 1,665,503; Apr. 10.

McClave, Stephen W., jr. (See McClave, Roscoe P. and S. W., jr.)

McCord Radiator & Mfg. Co. (See Wallace, William G., assignor.)

McCulloch, Alfred H., Boston, Mass. Furnace-regulator unit. 1,665,599; Apr. 10.

McDonnell, Allan J., Vancouver, British Columbia, Canada. Hydraulic jack. 1,665,633; Apr. 10.

McElroy, Robert L. (See Nolen, James G., assignor.)

McGraw, Edward J., Saginaw, Mich. Receptacle for golf-players' accessories. 1,665,214; Apr. 10.

McKee, Marie, Garden Home, and C. A. Roach, assignors of one-third to F. E. Walling, Portland, Oreg. Cap attachment for visors. 1,665,750; Apr. 10.

McKenna, Michael H. (See Birney, William N., assignor.)

McLemore, John M. (See Nixon, C. C., and McLemore.)

McManus, John A. (See Thomson, Elihu, assignor.)

McNamara, Denis, New York, N. Y. Punching bag. 1,665,969; Apr. 10.

Mead, Edward D., Caldwell, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electromagnetic device. 1,665,318; Apr. 10.

Meagher, Ira E. (See Canright, Bruce W., assignor.)

Mees, Charles E. K., assignor to Eastman Kodak Company, Rochester, N. Y. Making multicolor screens. 1,666,048; Apr. 10.

Menne, Fritz, Weidenau-on-the-Sieg, Germany, assignor to H. F. Hoevel, New York, N. Y. Press. 1,666,020; Apr. 10.

Mergenthaler Linotype Company. (See Archer, Alfred, assignor.)

Mergenthaler Linotype Company. (See Guest, Alfred W. F., assignor.)

Mergenthaler Linotype Company. (See Kennedy, David S., assignor.)

Mettler, Anton, Reichenburg, Switzerland. Device for singeing threads. 1,665,970; Apr. 10.

Meyer, William, Chicago, Ill. Holder for manicure preparations and the like. 1,665,788; Apr. 10.

Michl, Robert, Kosice, Czechoslovakia. Synchronous motor specially for driving clocks. 1,665,890; Apr. 10.

Michotte, Felicien, Paris, France, assignor, by mesne assignments, to Ramie Corporation of America, Inc., New Orleans, La. Decorticating machine. 1,665,971; Apr. 10.

Middleton, Donald R., Detroit, Mich. assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,665,466; Apr. 10.

Middletown Silver Company, The. (See Cornell, Elwood N., assignor.)

Midgley, William, Berkeley, Calif. Leveling square. 1,665,504; Apr. 10.

Mid-States Gummed Paper Co. (See Mittendorf, Theodor H., assignor.)

Miller, David B., Greenfield, Mass. Stamping device. 1,665,467; Apr. 10.

Miller, George R., assignor to Grip Bow Tie Company, Omaha, Nebr. Bow tie and making the same. 1,665,712; Apr. 10.

Miller, James F., Minden, La. Nut cracker. 1,665,557; Apr. 10.

Miller, John W. (See Spiegel, Edward R., assignor.)

Mills Novelty Company. (See Peterson, Oscar, assignor.)

Milwaukee Lace Paper Company. (See Graffenberger, Friedrich, assignor.)

Miner, Carl S. (See Trickey, J. P., and Miner.)

Minneapolis Heat Regulator Co. (See Sweatt, Harold W., assignor.)

Mirfield, George E., Youngstown, Ohio. Shearing metal sheets. 1,665,319; Apr. 10.

Mittendorf, Theodor H., assignor to Mid-States Gummed Paper Co., Chicago, Ill. Protecting porcelain and enameled ware. 1,665,215; Apr. 10.

Modern Pouring Device Co. (See Goldberg, Max W., assignor.)

Montgomery, Fred W., North St. Paul, Minn. Spring wheel. 1,665,558; Apr. 10.

Montgomery, Harris C. (See Hazel, C. E., and Montgomery.)

Montgomery, John L., Stoneham, Mass. Shade-supporting bracket. 1,665,929; Apr. 10.

Moore, Marguerite E., New York, N. Y. Stake retainer or the like. Des. 74,892; Apr. 10.

Moore, Thomas A., Eldon, Iowa. Cultivator. 1,665,559; Apr. 10.

Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Motor-vehicle brake. 1,665,376; Apr. 10.

Morehouse, Ralph C., Mason City, Iowa. Locomotive whistle. 1,665,671; Apr. 10.

Morkum-Kleinschmidt Corporation. (See Krum, Howard L., assignor.)

Morris, John T., Glen Morrison, W. Va. Mine and railway tie plate. 1,665,419; Apr. 10.

Morrison, Montford, Chicago, Ill. X-ray tube. 1,665,638; Apr. 10.

Morse Dry Dock & Repair Co. (See Irish, David J., assignor.)

More Dry Dock & Repair Co. (See Strachan, C., and Irish, assignors.)

Mortimer, Charles W., Upper Montclair, N. J., assignor to The Barrett Company. Cutting shingles. 1,665,600; Apr. 10.

Mortimer, Charles W., Upper Montclair, N. J., assignor to The Barrett Company. Self-spacing shingle. 1,665,601; Apr. 10.

Morton, Harry D., and M. Parker, New York, N. Y. Making needle-and-suture assembly. 1,665,216; Apr. 10.

Morton, Joseph A., Brooklyn, N. Y., assignor to B. Gibbs, Ardmore, Pa. Union undergarment. 1,665,505; Apr. 10.

Morton, Rolla A., Long Beach, Calif., assignor to Western Wheeled Scraper Company, Aurora, Ill. Draft appliance. 1,665,817; Apr. 10.

Mueller, John. (See Lasker, W. W., and Mueller.)

Murphy, George F., Philadelphia, Pa. Packing. 1,665,377; Apr. 10.

Murray, Thomas E. (See Holmes, Henry S., assignor.)

Murray, Thomas E., jr., New York, N. Y. Internal-combustion engine. 1,665,468; Apr. 10.

Myers, Lewis E., Valparaiso, Ind., assignor, by mesne assignments, to The Northern Trust Company, and H. H. Rockwell, as trustees. Detachable scroll support. 1,665,272; Apr. 10.

Myers, Lewis E., and A. C. Carlson, Valparaiso, Ind., and C. S. Bates, Chicago, Ill., assignors, by mesne assignments, to The Northern Trust Company and H. H. Rockwell as trustees. Wheeled toy. 1,665,469; Apr. 10.

National Advertising Corporation. (See Wilkes, William H., assignor.)

National Automatic Tool Company, The. (See Galloway, R. M., and Burton, assignors.)

National Refrigerating Company. (See Keyes, Frederick G., assignor.)

National Standard Company. (See Hopkins, Arthur C., assignor.)

Nebel, Ernst O., Philadelphia, Pa. Manufacturing full-fashioned hosiery. 1,665,972; Apr. 10.

Needham, John C., assignor to Eversbed & Vignoles Limited and himself, London, England. Electrical transmission system. 1,665,857; Apr. 10.

Neil, Bertram, Borger, Tex. Rivet-finishing tool. 1,665,751; Apr. 10.

Neisler, Charles E., jr., Kings Mountain, N. C. Attachment for looms. 1,665,274; Apr. 10.

Nelson, Emil A., Abington, assignor to Budd Wheel Company, Philadelphia, Pa. Machine for rolling metallic disks. 1,665,818; Apr. 10.

Nelson, Martin L., Park Ridge, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Multioffice telephone system. 1,665,273; Apr. 10.

Nelson, Nels P., et al. (See Johnson, Matts, assignor.)

Nelson, Robert O., Portland, Oreg. Variable traffic signal. 1,665,560; Apr. 10.

Nero, Arthur A., Abrams, Wis. Aeroplane. 1,665,718; Apr. 10.

Netherland, Nita G., Ballsville, Va. Jar top. 1,665,602; Apr. 10.

New Castle Refractories Company. (See Laschenski, Charles W., assignor.)

New Haven Clock Co., The. (See Porter, Wilson E., assignor.)

New Jersey Fire Alarm Company. (See Siddall, Joseph and W. H., assignors.)

Newman, Morris S., Middletown. Fur-shearing machine. 1,665,217; Apr. 10.

Newman, Samuel F., assignor to Landis Machine Company, Waynesboro, Pa. Die head. 1,665,973; Apr. 10.

Newmeyer, William L., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit interrupter. 1,665,858; Apr. 10.

Newport Company, The. (See Gubelmann, I., Welland, and Stallmann, assignors.)

Nichols, Edgar B., Rochester, assignor to The Pfaudler Co., Rochester, N. Y. Agitator. 1,665,789; Apr. 10.

Nittel, Frederick W., Attleboro Falls, assignor to M S Co., Attleboro, Mass. Expansible bracelet. 1,666,033; Apr. 10.

Nixon, Cecil C., and J. M. McLemore, Talladega, Ala. Metallic bobbin base. 1,665,930; Apr. 10.

Noah, Leroy H., Ogallah, Kans. Piston and connecting rod construction. 1,665,672; Apr. 10.

Noble, Kenneth B., Hartford, assignor to The A. C. Gilbert Company, New Haven, Conn. Governor for motors. 1,665,714; Apr. 10.

Noeggerath, Jacob E., The Hague, Netherlands. Distribution of liquids. 1,665,931; Apr. 10.

Nolsom, Ole P., South Bend, Ind. Compass indicator for automobiles, etc. 1,665,715; Apr. 10.

Nolen, James G., New York, N. Y., assignor to R. L. McElroy, Charlottesville, Va. Signal-alarm device for sprinkler systems. 1,665,561; Apr. 10.

Norelius, Emil F., Davenport, Iowa. Rear-end assembly for power-driven vehicles. 1,665,470; Apr. 10.

Norris, Paul E. Wilkinsburg, assignor to Westinghouse Union Battery Company, Swissvale, Pa. Storage battery. 1,665,603; Apr. 10.

Norris, Paul E., and H. H. Aldrich, Wilkinsburg, assignors to Westinghouse Union Battery Company, Swissvale, Pa. Storage-battery separator. 1,665,604; Apr. 10.

Northern Trust Company, The, et al., trustees. (See Carlson, Artie C., assignor.)

Northern Trust Company, The, et al., trustees. (See Myers, Lewis E., assignor.)

Northern Trust Company, The, et al., trustees. (See Myers, L. E., Carlson, and Bates, assignors.)

Northwood, Charles O., Dormont, assignor to United States Glass Company, Pittsburgh, Pa. Goblet or similar article. Des. 74,893; Apr. 10.

Nottingham, Wayne B., Philadelphia, Pa., assignor to Western Electric Company, Incorporated, New York, N. Y. Arrangement of carrier channels in multiplex algaling systems. 1,665,673; Apr. 10.

Novack, William, Brooklyn, N. Y. Sanitary douche nozzle. 1,665,790; Apr. 10.

Novak Club Inc., The. (See Novak, Joseph A., assignor.)

Novak, Joseph A., assignor to The Novak Club Inc., San Francisco, Calif. Golf-club grip. 1,665,791; Apr. 10.

Nutt, Frank N., assignor to A C Spark Plug Company, Flint, Mich. Bumper. 1,665,320; Apr. 10.

Nycz, Louis, Binghamton, N. Y. Automobile. 1,665,974; Apr. 10.

Nystrom, Martin, assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Station-selector dial for radio receiving sets. 1,665,891; Apr. 10.

O'Brien, Timothy. (See Feeney, G., and O'Connor, assignor.)

O'Brien, William C., Baltimore, Md., assignor to Cline Electric Manufacturing Company, Chicago, Ill. Starter for electric motors. 1,665,562; Apr. 10.

O'Connor, Thomas. (See Feeney, G., and O'Connor.)

O'Dea, Mark, St. Paul, Minn. Automobile luggage carrier. 1,665,892; Apr. 10.

Oesch, Johann, Glockenthal, near Steffisburg, Switzerland. Painting urinals. 1,665,859; Apr. 10.

Ohio Brass Company, The. (See Applegate, Robert, assignor.)

Ohio Drilling Company, The. (See Von Gunten, Jacob, assignor.)

O'Leary, C. M. (See Green, Henry, M., assignor.)

Olinger, Thomas, assignor to Federal Manufacturing Company, Holland, Mich. Damper. 1,665,716; Apr. 10.

Oliveri, Vincenzo. (See Hirtz, I., and Oliveri.)

Olsen, Robert E., Forest Hills, N. Y. Photographic button. 1,665,605; Apr. 10.

Olson, Nels L., Highland Park, Mich., assignor to Swedish Crucible Steel Company. Vehicle wheel. 1,665,471; Apr. 10.

Oneida Community Limited. (See Allen, Grosvenor N., assignor.)

Onthank, Charles F., Newton, Mass. Oval jar. Des. 74,894; Apr. 10.

Opperman, August H., Indianapolis, Ind. Electrical hair curler. 1,665,472; Apr. 10.

Orr, Clarence H., Providence, R. I. Sign plate. Des. 74,895; Apr. 10.

Orr, Claude L. (See Larsen, J. C., and Orr.)

Osborne John C., Berlin, Germany, assignor to The American Multigraph Company, Cleveland, Ohio. Changeable printing device. 1,665,717; Apr. 10.

Osborne, Willard B. (See Gould, W. S., and Osborne.)

Oscher, Nathan A., Brooklyn, N. Y. Stress breaker. 1,665,975; Apr. 10.

Oswald, Arthur A., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. System including space discharge device. 1,665,674; Apr. 10.

Otis Elevator Company. (See Brady, Thomas, assignor.)

Otis Elevator Company. (See Lewis, Jacob D., assignor.)

Otto, Albert T., & Sons. (See Spalding, John, assignor.)

Ovalite Company, The. (See Hurster, William, assignor.)

Owens Bottle Company, The. (See Hofmann, V. E., and Soubier, assignors.)

P & M Company, The. (See Lenoir, Milton C., assignor.)

Pacific Northwest Paper Mills, Inc. (See Madden, Daniel D., assignor.)

Pacific Pipe and Supply Company. (See Griffs, John C., assignor.)

Pacific Southwest Trust & Savings Bank, administrator. (See Green, Henry M.)

Packard Motor Car Company. (See Moorhouse, Alfred, assignor.)
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Packers' Supply Company Limited. (See Payne, Arthur C., assignor.)
Padmore, Bertram R., Montrose Heights, Blawnox, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,665,860; Apr. 10.
Paige, Arthur E., Philadelphia, Pa. Pump. 1,665,675; Apr. 10.
Paine, Jesse L., et al. (See Beckthold, John, assignor.)
Parke, Charles S. (See Harshaw, W. J., and Parke.)
Parke, Davis & Company. (See Hamilton, Cliff S., assignor.)
Parker, Alvah C., assignor to The Libbey Glass Manufacturing Company, Toledo, Ohio. Decorating apparatus. 1,665,321; Apr. 10.
Parker, George, Meriden, Conn. Electric cigar lighter. 1,665,792; Apr. 10.
Parker, Morgan. (See Morton, H. D., and Parker.)
Parsons, John, Newton Center, Mass. Cigarette case. 1,665,752; Apr. 10.
Pater, Carl J., Wyoming, Ohio, assignor to The Philip Carey Manufacturing Company, Expansion-joint material. 1,665,718; Apr. 10.
Patrick, Joshua, Detroit, Mich. Temperature-compensating spring. 1,665,322; Apr. 10.
Patterson, Edgar W., Los Angeles, Calif. Pressure-packed pump. 1,665,473; Apr. 10.
Patterson, Edgar W., Long Beach, Calif. Tandem single-acting pump. 1,665,639; Apr. 10.
Pavelka, Joseph. (See Delf, George A., assignor.)
Payne, Arthur C., assignor to Packers' Supply Company Limited, London, England. Apparatus for tensioning and sealing metal bands around packing cases and other packages. 1,665,323; Apr. 10.
Pearcey, Leslie M. (See Shearon, C. E., Alexander, and Pearcey.)
Pechin, Norman R., Philadelphia, Pa. Knitting machine. 1,665,976; Apr. 10.
Pellow, Charles E., Detroit, Mich. Burr cutter. 1,665,474; Apr. 10.
Perry, John E., Sharon, assignor to Valley Mould & Iron Corporation, Sharpsville, Pa. Ingot mold and stool. 1,665,275; Apr. 10.
Peters, Frank R., New York, N. Y., assignor to Franklin Railway Supply Company. Locomotive booster apparatus. 1,665,324; Apr. 10.
Peters, William G., Peoria, Ill., assignor to Westinghouse Electric and Manufacturing Company. Inclosable or folding wringer. 1,665,932; Apr. 10.
Peterson, Ernest E., Carson Lake, Minn. Power shovel. 1,665,378; Apr. 10.
Peterson, Eugene, assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical network and its operation. 1,665,325; Apr. 10.
Peterson, Oscar, assignor to Mills Novelty Company, Chicago, Ill. Brake device. 1,665,753; Apr. 10.
Pfaudler Co., The. (See Nichols, Edgar B., assignor.)
Pfeifer, Bryan B., Chicago, Ill. License-plate lamp. 1,665,276; Apr. 10.
Pfeil, Walter, and W. Kolmeier, Fredericksburg, Tex. Water heater. 1,665,506; Apr. 10.
Pierce Development Company, The. (See Hoffman, Benjamin P., assignor.)
Pinkerton, Edward E., assignor to M. A. Pinkerton, Chicago, Ill. Egg holder. 1,665,420; Apr. 10.
Pinkerton, Mary A. (See Pinkerton, Edward E., assignor.)
Pittsburgh Steel Company. (See Benedict, Edward L., assignor.)
Phillips, George P., Boston, Mass. Articulator. 1,666,021; Apr. 10.
Phillips, George P., Boston, Mass. Articulator. 1,666,022; Apr. 10.
Photostat Corporation. (See Caps, Arthur W., assignor.)
Planell, Fernando C., Sabadell, Spain. Scouring machine for washing fabrics of wool and their mixtures. 1,665,977; Apr. 10.
Plummer, Horace, Lawrence Township, Marion County, Ind. Engraving block. 1,665,819; Apr. 10.
Plym, Francis J., assignor to The Kawneer Company, Niles, Mich. Screen. 1,665,475; Apr. 10.
Pneumatic Scale Corporation, Limited. (See Howard, Stanley R., assignor.)
Pollak, Julius, Houston, Tex. Garment. 1,665,507; Apr. 10.
Porter, Wilson E., assignor to The New Haven Clock Co., New Haven, Conn. Clock with rotary operating members. 1,665,476; Apr. 10.
Powers, James, Los Angeles, Calif., assignor, by mesne assignments, to Remington Rand Inc., New York, N. Y. Feeding mechanism for tabulating machines. 1,665,218; Apr. 10.
Primeaux, Ely, New Orleans, La. Sandpapering and buffing machine. 1,665,676; Apr. 10.
Prince, David C., Schenectady, N. Y., assignor to General Electric Company. System of distribution. 1,665,893; Apr. 10.
Pritchard, Carl B., Scottdale, Pa. Combination band or tube corrugating and flanging machine. Re16,931; Apr. 10.
Pritchard, Percy Moseley, Birmingham, England. Spark arrester for cupolas or the like. 1,665,754; Apr. 10.
Promenschenkel, Joseph W. (See Wine, W. E., and Promenschenkel.)
Prosperity Company, The. (See Braun, P. N., and Hart, assignor.)
Prosperity Company, The. (See Clisson, Albert B., assignor.)
Purdy, Martin K., Stroudsburg, and W. H. Reagle, Tobyhanna, Pa. Electric heater. 1,665,861; Apr. 10.
Quaker Oats Company, The. (See Trickey, J. P., and Miner, assignors.)
Raab, Alexander, Evanston, Ill. Foldable pocket piano keyboard. 1,665,563; Apr. 10.
Radford, Albert E., New Castle, Pa. Pottery-making method. 1,665,978; Apr. 10.
Radio Corporation of America. (See Donisthorpe, Horace, S. de A., assignor.)
Radio Corporation of America. (See Trump, Edward H., assignor.)
Ramazzotti, Daniel V., assignor to The Knight Company, Sutter Creek, Calif. Road scarifier. 1,665,277; Apr. 10.
Ramie Corporation of America, Inc. (See Michotte, Felicien, assignor.)
Ramsey, George, Brooklyn, N. Y. Optical speedometer. 1,665,278; Apr. 10.
Randle, Clyde I., and F. S. Anderson; said Anderson assignor to G. Sutherland, Eureka, Calif. Automatic automobile light indicator. 1,665,640; Apr. 10.
Rankin, William A., Rochester, N. Y. Heating element for electric irons. 1,665,219; Apr. 10.
Rasey, Albert L., Milwaukee, Wis. Clarifying device for liquids. Re16,932; Apr. 10.
Rasmussen, Martin. (See Ritter, J., jr., and Rasmussen.)
Rawlings, William E., near San Jose, Calif. Jack. 1,665,979; Apr. 10.
Rawlings, William E., Santa Clara County, Calif. Bed canopy. 1,665,980; Apr. 10.
Rayburn, Edmund F., Findlay, Ohio. Hot plate. Des. 74,896; Apr. 10.
Raymond Concrete Pile Company. (See Hunt, F. H., and Ropp, assignors.)
Raymond Concrete Pile Company. (See Smith, Herman R., assignor.)
Reagle, William H. (See Purdy, M. K., and Reagle.)
Reboul, Annie W. (See Wilson, Frank, sr., assignor.)
Redfield, Snowden B., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Multipressure regulator. 1,665,279; Apr. 10.
Reedy, Alfred J., assignor to A-B Stove Company, Battle Creek, Mich. Gas stove. Des. 74,897; Apr. 10.
Reese, Berthold J., New York, N. Y. Supplemental leaf-attaching device for books. 1,665,641; Apr. 10.
Regal Shoe Company. (See Bliss, Elmer J., assignor.)
Reichard, Russell L., Allentown, Pa. Advertising device. 1,665,894; Apr. 10.
Reitz, Albert F., Kansas City, Mo. Combination dilator and applicator appliance. 1,665,564; Apr. 10.
Remington Rand Inc. (See Lasker, W. W., and Mueller, assignors.)
Remington Rand Inc. (See Powers, James, assignor.)
Remington Typewriter Company. (See Going, George G., assignor.)
Rendleman, Norman C., Dortmont, assignor to Jones & Laughlin Steel Corporation, Pittsburgh, Pa. Manipulator cable for rolling mills. 1,665,606; Apr. 10.
Republic Brass Company, The. (See Bloch, Leon, assignor.)
Rettmer, Jacob J., Lufkin, Tex. Lumber, stamping device. 1,665,220; Apr. 10.
Rex-Watson Corporation. (See Casler, Herman, assignor.)
Reyburn, Charles E., Peru, Ind. Weather strip. 1,665,326; Apr. 10.
Reyolle, A., & Company Limited. (See Allan, A., and Clothier, assignors.)
Richard, Edward C., and H. Gill, Westboro, Mass., assignors to Westboro Weaving Company, New York, N. Y. Shuttle. 1,665,221; Apr. 10.
Richardson, Earle E. (See Jones, L. A., and Richardson.)
Richardson Grain Separator Co. (See Thorbus, Clarence T., assignor.)
Ridgeway, Ralph H., Springfield, Mass. Tie holder. 1,665,477; Apr. 10.
Ridgway, Herbert N., Winthrop, Mass. Amusement apparatus. 1,665,981; Apr. 10.
Rieger, Leonz, assignor to the firm Luftschiffbau Zeppelin Gesellschaft mit beschrinkter Haftung, Friedrichshafen, Germany. Shaft coupling. 1,665,895; Apr. 10.
Rissinger, Thomas T., Compton, Calif. Curling instrument. 1,665,327; Apr. 10.
Ritter, Julius, jr., and M. Rasmussen, assignors to Hartmann Trunk Company, Racine, Wis. Trunk lock. 1,665,379; Apr. 10.
Roach, Charles A. (See McKee, M., and Roach.)
Robb, John F., Cleveland Heights, Ohio, assignor to Koehring Company, Milwaukee, Wis. Cement loading, controlling, measuring, and counting apparatus for concrete mixers. 1,665,565; Apr. 10.
Robe, Robert S. (See Graham, G. C., and Robe.)
Roberti Bros. (See Lofman, Charles, assignor.)
Roberts and Shaefer Company. (See Arms, Ray W., assignor.)

Robinson, Thomas, Babylon, N. Y., assignor to Anaconda Sales Company. Roofing element and making same. 1,665,222; Apr. 10.
Rocha, Ezekiel M., Tulare, Calif. Robber trap. 1,665,982; Apr. 10.
Rockwell, Harold H., et al., trustees. (See Carlson, Artie C., assignor.)
Rockwell, Harold H., et al., trustees. (See Myers, Lewis E., assignor.)
Rockwell, Harold H., et al., trustees. (See Myers, L. E., Carlson, and Bates, assignors.)
Rodman, Clarence J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Glissometer. 1,665,933; Apr. 10.
Roe, William C., assignor to Holmes Electric Protective Company, New York, N. Y. Alarm device. 1,665,677; Apr. 10.
Rollaway Motor Company, The. (See Fox, Cecil M., assignor.)
Roller, Frank W., East Orange, N. J., assignor to Roller-Smith Company. Circuit breaker. 1,665,223; Apr. 10.
Roller-Smith Company. (See Roller, Frank W., assignor.)
Rolscreen Company. (See Dixson, Harry, assignor.)
Roose, Garland H., Chicago, Ill. Internal-combustion engine. 1,665,421; Apr. 10.
Ropp, Frank N. (See Hunt, F. H., and Ropp.)
Rose, Frederick A., Memphis, Tenn., assignor, by mesne assignments, to M. Finkelstein, Chicago, Ill. Pants holder. 1,665,983; Apr. 10.
Roseland Can & Wire Goods Co. (See Gschwindt, Adam, assignor.)
Rosencrans, John H., assignor of one-half to J. W. Smith, Detroit, Mich. Securing device for vehicles. Re16,927; Apr. 10.
Ross Gould Limited. (See Fabian, Charles, assignor.)
Ross, R. L. and Company Limited. (See Hargreaves, William, assignor.)
Rothe, William C. (See Goertz, F., and Rothe.)
Royal Railway Improvements Corporation. (See Sauvage, William H., assignor.)
Ruffo, Louis, New York, N. Y. Woman's headdress. 1,665,380; Apr. 10.
Ruggles, William A., Schenectady, N. Y., assignor to General Electric Company. Electron-discharge device. 1,665,896; Apr. 10.
Russell, William H., New Haven, Conn. Coin-changing machine. 1,665,566; Apr. 10.
Rzeppa, Alfred H., Detroit, Mich. Universal joint. 1,665,280; Apr. 10.
Salamis, Basil C. (See Chambers, J. G., and Salamis.)
Samantas, Nicholas P. (See Burleson, A. L., and Samantas.)
Sandborgh, Olof A., Stockholm, Sweden. Automatic electric steam boiler. 1,665,793; Apr. 10.
Sandford, Stephen & Sons. (See Coyle, J. A., and Cooper, assignors.)
Sandford, William C. (See Hoff, E. A., and Sandford.)
Sands, Alfred M. (See Carmona, F. A., and Sands.)
Sankey, Harold B., Albrighton, England. Tool holder and other receptacles for use on motor vehicles. 1,665,642; Apr. 10.
Sargent, Charles E., Lakeland, Fla. Internal-combustion engine. 1,665,607; Apr. 10.
Sauvage, William H., assignor, by mesne assignments, to Royal Railway Improvements Corporation, New York, N. Y. Hand brake. 1,665,862; Apr. 10.
Sawyer, John A. (See Walmer, I. G., and Sawyer.)
Scaggs, Luther E., Corsicana, Tex. Transmission. 1,665,984; Apr. 10.
Scaizo, Vincent, Pittston, Pa. Windshield cleaner. 1,665,794; Apr. 10.
Schaefer, Edward C. F., York, Pa. Manure spreader. Re16,929; Apr. 10.
Schieber, Robert E., Detroit, Mich. Valve. 1,665,934; Apr. 10.
Schlaupitz, Oswald, assignor to The Timken Roller Bearing Company, Canton, Ohio. Punch press. 1,665,820; Apr. 10.
Schmidt'sche Heissdampf Gesellschaft m. b. H. (See Hartmann, Otto H., assignor.)
Schmitt, Hugo R., assignor to Western Electric Company, Incorporated, New York, N. Y. Carrier-wave transmission. 1,665,328; Apr. 10.
Schmitt, Robert A., San Diego, Calif. Nipple chuck ond pipe bender. 1,665,643; Apr. 10.
Schneider, Frederick D., Hillside, and H. J. Long, New Brunswick, N. J. Boiler construction. 1,665,608; Apr. 10.
Schnepp, Louis W., San Bernardino, Calif. Thermostat. 1,665,719; Apr. 10.
Scholman, Maurice. (See Dineson, Hans E., assignor.)
Scholz, Samuel G., Hutchinson, Kans. Traction device. 1,665,478; Apr. 10.
Schumacher, Earle E., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electron-discharge device and circuit therefor. 1,665,508; Apr. 10.
Schur, Milton O., assignor to Brown Company, Berlin, N. H. Indicator for automatic slowness testers. 1,666,034; Apr. 10.
Schwartz, Michael, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Intercepting trunk system. 1,665,479; Apr. 10.
Schweitzer & Conrad. (See Conrad, Nicholas J., assignor.)
Scofield, Edgar, New York, assignor to Anchor Cap and Closure Corporation, Long Island City, N. Y. Friction closure cap. 1,665,821; Apr. 10.
Scott, David C., assignor, by mesne assignments, to Henry L. Scott Company, Providence, R. I. Abrasive roll. 1,665,609; Apr. 10.
Scott, Henry L., Company. (See Scott, David C., assignor.)
Scott, Howard, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Bimetallic element. 1,665,935; Apr. 10.
Scott, Raymond D., Chicago, Ill. Pneumatic jack. 1,665,985; Apr. 10.
Scranton Lace Company, The. (See Erhard, Gustave F., assignor.)
Seeburg, Justus P. (See Landberg, Margot, assignor.)
Sels, Hollis K. (See Evans, R. D., and Sels.)
Setzer, Rudolf, Munich-Trudering, Germany. Device relating to ring spinning and twisting. 1,665,422; Apr. 10.
Shapiro, Theodore, assignor to Artcraft Metal Stamping Corporation, Brooklyn, N. Y. Lighting-fixture wall bracket. Des. 74,898; Apr. 10.
Shaw, James, San Francisco, Calif. Motor-vehicle chassis. 1,665,610; Apr. 10.
Shearon, Charles E., J. D. Alexander, and L. M. Pearcey, Hattiesburg, Miss. Safety auto control. 1,665,281; Apr. 10.
Sheet-Rockford Silver Company. (See James, Sidney V., assignor.)
Sheffer, John W. (See Johnson, W. S., and Sheffer.)
Sheldon, Lovell D. (See Viers, C. O., and Sheldon.)
Shersmith, Frank, Oconomowoc, Wis. Automatic weather strip. 1,665,678; Apr. 10.
Shields, Clarence G., Floreffe, Pa. Spraying apparatus. 1,665,224; Apr. 10.
Shimizu, Seizo, Tokyo, Japan. Torsion meter. 1,665,822; Apr. 10.
Short, Charles R., Dayton, Ohio, assignor to General Motors Research Corporation, Detroit, Mich. Steering mechanism. 1,665,282; Apr. 10.
Shulik, William. (See Lichten, A. S., Koufman, and Shulik.)
Siddall, Joseph, Arlington, and W. H. Siddall, Kearny, N. J., assignors to New Jersey Fire Alarm Company. Automatic fire alarm. 1,665,381; Apr. 10.
Siddall, William H. (See Siddall, Joseph and W. H.)
Side, Sarah R., Brooklyn, N. Y. Article cabinet. 1,665,986; Apr. 10.
Siemens & Halske Aktiengesellschaft. (See Zuschlag, Theodor, assignor.)
Simek, Wendel, Guttenberg, N. J. Corn roaster. 1,665,225; Apr. 10.
Simmons, Frank L., assignor to The Taft-Pierce Manufacturing Company, Woonsocket, R. I. Magnetic chuck. 1,665,226; Apr. 10.
Simon, Leopold, New York, N. Y. Light screen and ventilator. 1,665,679; Apr. 10.
Singer, Fred J., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Signaling system. 1,665,283; Apr. 10.
Sipe, George B., Shreveport, La. Producing subaqueous foundations, piers, breakwaters, etc. 1,665,795; Apr. 10.
Sipe, George B., Shreveport, La. Providing and placing piers. 1,665,796; Apr. 10.
Sipe, George B., Shreveport, La. Excavating and producing foundations. 1,665,797; Apr. 10.
Sipe, George B., Shreveport, La. Producing and placing piles in interlocked relation. 1,665,798; Apr. 10.
Skelton, Prentice E., Indianapolis, Ind. Dishwasher. 1,665,423; Apr. 10.
Sleeper, Ned M., Upper Lake, Calif. Airplane. 1,665,480; Apr. 10.
Slepian, Joseph, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Radiodetector. 1,665,936; Apr. 10.
Slifer, Wilmer J., Easton, Pa. Ignition tester. 1,665,567; Apr. 10.
Sloate, Alfred C., Wynnewood, Pa., and J. C. Whyte, Wenonah, N. J., assignors to Congoleum-Nairn Inc., Philadelphia, Pa. Linoleum floor mat. Des. 74,899; Apr. 10.
Slocum, Benjamin A., assignor to Ansco Photoproducts, Inc., Binghamton, N. Y. Photographic-film cartridge. 1,665,481; Apr. 10.
Slye, John Q., and R. H. Coffren, Washington, D. C. Acoustic diaphragm. 1,665,284; Apr. 10.
Smith, Arthur B., South Brownsville, Pa. Incandescent lamp. 1,665,799; Apr. 10.
Smith, Charles E. B., assignor, by mesne assignments, to J. H. Weidemiller, Buffalo, N. Y. Electric brake-operating mechanism. 1,665,227; Apr. 10.
Smith, Harry B., Brooklyn, N. Y., assignor, by mesne assignments, to Hoague-Sprague Corporation, Lynn, Mass. Card-feed mechanism and method. 1,665,927; Apr. 10.
Smith, Herman R., Douglaston, assignor to Raymond Concrete Pile Company, New York, N. Y. Driving composite piles. 1,665,228; Apr. 10.
Smith, James W. (See Rosencrans, John H., assignor.)

Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,665,285; Apr. 10.
Smith, John T., San Francisco, Calif. Pilot light. 1,665,987; Apr. 10.
Smith, John W., assignor to Budd Wheel Company, Philadelphia, Pa. Method and apparatus for feeding rotating disk-forming machines. 1,665,823; Apr. 10.
Smith, Leonard F., Thompson Falls, Mont. Cleaning rod and extracting device. 1,665,988; Apr. 10.
Smith, Will F., Brooklyn, N. Y. Bow-necktie frame. 1,655,509; Apr. 10.
Smith, Willard P., Newark, N. J. Vending machine. 1,665,989; Apr. 10.
Smith, William H., and A. S. Webster, Ottawa, Canada, assignors to American Bank Note Company, New York, N. Y. Method of and apparatus for making gummed paper. 1,665,611; Apr. 10.
Söderberg, Carl R., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Balancing machine. 1,665,938; Apr. 10.
Sohm, Alfred L., Chicago, Ill. Automobile radiator ornament. Des. 74,900; Apr. 10.
Soley, Frank, Philadelphia, Pa., assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn. Combination lock. 1,665,990; Apr. 10.
Soubier, Leonard D. (See Hofmann, V. E., and Soubier.)
Spalding, John, Stamford, Conn., assignor to Albert T. Otto & Sons, New York, N. Y. Lace web and making the same. 1,665,230; Apr. 10.
Speer Calendar Bank Company. (See Speer, Zeno M., assignor.)
Speer, Zeno M., assignor to Speer Calendar Bank Company, Milwaukee, Wis. Savings bank. 1,665,824; Apr. 10.
Spidel, Arthur S., Brewster, assignor of one-half to E. A. Hamilton, Navarre, Ohio. Cord guide. 1,665,510; Apr. 10.
Spiegel, Edward R., assignor of one-half to J. M. Miller, Dallas, Tex. Report board. 1,665,568; Apr. 10.
Sponsel, Charles W., Wethersfield, assignor to Case & Marshall, Incorporated, Hartford, Conn. Cutting mechanism for pulp and like machines. 1,665,644; Apr. 10.
Stack, James M., et al. (See Ganny, L. C., and Goldberg, assignors.)
Staege, Stephen A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulator system. 1,665,939; Apr. 10.
Stafford, Terrence W., San Francisco, Calif. Washboiler. 1,665,755; Apr. 10.
Stallmann, Otto. (See Gubelmann, I., Welland, and Stallmann.)
Standard Oil Company of California. (See Gates, Leroy G., assignor.)
Standerwick, Reginald G., Marblehead, Mass., assignor to General Electric Company. Elastic connection. 1,665,897; Apr. 10.
Stapp, John H., San Francisco, Calif. Coin bank. Des. 74,901; Apr. 10.
Stazak, Michael B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,665,231; Apr. 10.
Stell, Alfred, Ingrow, J. Stell, Brownfield, and H. Welch, Keighley, England. Doffing mechanism for cap spinning, doubling, and like machines. 1,665,720; Apr. 10.
Stell, John. (See Stell, Alfred and J., and Welch.)
Stern, Joseph, New York, N. Y. Cigar holder and ash receiver. 1,665,612; Apr. 10.
Stevens, William C., Milwaukee, Wis., assignor, by mesne assignments, to Vulcan Motor Devices Company. Power-transmission system. 1,665,825; Apr. 10.
Stockfleth, Berger. (See Burger, F. W., and Stockfleth.)
Stockfleth, Berger, Berrien Springs, and F. W. Burger, Niles, assignors to Clark Tructractor Company, Buchanan, Mich. Tiering machine. 1,665,680; Apr. 10.
Stockton, Richard A., Beverly, Mass. Profile gauge. 1,665,721; Apr. 10.
Stoddard, Charles F., assignor to American Piano Company, New York, N. Y. Automatic musical instrument. 1,665,863; Apr. 10.
Storbacka, Arne, Vancouver, British Columbia, Canada. Water turbine. 1,665,329; Apr. 10.
Storey, Leonidas P., St. Paul, Minn., assignor of one-half to Waterous Fire Engine Works. Relief mechanism for pumps. 1,665,382; Apr. 10.
Strachan, Christopher, South Orange, N. J., and D. J. Irish, St. George, assignors to Morse Dry Dock & Repair Co., New York, N. Y. Air register. 1,665,800; Apr. 10.
Strahm, Frederick, Lawrence, Kans. Car seal. 1,665,424; Apr. 10.
Stramaglia, Nicola, Chicago, Ill. Window scaffold. 1,665,991; Apr. 10.
Strandlund, Carl G., assignor to Deere & Company, Moline, Ill. Lateral-swing control for tractor-drawn plows. 1,665,330; Apr. 10.
Stratton, William D., Farwell, Mich. Heating apparatus. 1,665,992; Apr. 10.
Strayer, Catherine. (See Stroh, W. Y., and Klages, assignors.)
Strickland, Louis G., Huntington, N. Y. Drafting instrument. 1,665,898; Apr. 10.
Stripling, Luke S., Amarillo, Tex. Windmill. 1,665,645; Apr. 10.
Stroh, William Y., and G. W. Klages, assignors to C. Strayer, Pittsburgh, Pa. Method and machine for finishing circular castings. 1,665,286; Apr. 10.
Strong, Robert M., Los Angeles, Calif. Spray nozzle. 1,665,482; Apr. 10.
Sturm, Frank X., Alexandria, Ind., assignor to The Glove Corporation, Alexandria, Ind. Glove. 1,666,023; Apr. 10.
Summers, Leland L. (See Deppé, W. P., and Summers.)
Summers, Llewelyn L. B., et al., administrators. (See Deppé, W. P., and Summers.)
Sunlight Electrical Manufacturing Company, The. (See Kingston, Frederick S., assignor.)
Superheater Company, The. (See Griffin, Joseph F., assignor.)
Sutherland, Gilbert. (See Randle, C. I., and Anderson, assignors.)
Swanson, Ernest R., Cranston, R. I., assignor to Universal Winding Company, Boston, Mass. Slub catcher or yarn cleaner. 1,665,287; Apr. 10.
Sweatt, Harold W., assignor to Minneapolis Heat Regulator Co., Minneapolis, Minn. Unit-heater control. 1,665,801; Apr. 10.
Swedish Crucible Steel Company. (See Olson, Nels L., assignor.)
Sweeney, James A., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Spectacle temple. 1,665,940; Apr. 10.
Symmes, Whitman, assignor to Thomas Day Company, San Francisco, Calif. Detachable electric fixture. 1,665,802; Apr. 10.
Taft-Pierce Manufacturing Company, The. (See Simmons, Frank L., assignor.)
Tanner, Harry L., Brooklyn, N. Y. Coupling device for rotatable elements. 1,665,613; Apr. 10.
Tanner, Wellington L., El Molino, Sonora, Mexico, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Making arsenates of manganese and product thereof. Re16,933; Apr. 10.
Tauman, Bernard, Chicago, Ill. Stand for aquarium or the like. Des. 74,902; Apr. 10.
Taylor, Arnold M., and F. A. Buote, Stamford, Conn., assignors to Atlas Powder Company, Wilmington, Del. Floor filler with pyroxylin base. 1,665,383; Apr. 10.
Taylor, George A., Boston, Mass. Piston. 1,665,229; Apr. 10, 1928.
Taylor, Herman E., Detroit, Mich. Transportation system. 1,665,483; Apr. 10.
Taylor, Lee J., New Bern, N. C. Apparatus and method for cooling carbonated water. 1,665,615; Apr. 10.
Taylor, Paul B., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Hydrocarbon engine. 1,665,288; Apr. 10.
Telling, Charles B., Cleveland, Ohio. Ice-cream-brick container. 1,665,681; Apr. 10.
Templeton, Edwin G., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Disengaging device. 1,665,864; Apr. 10.
Templin, Ellis W., Philadelphia, Pa., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Motor-vehicle-driving mechanism. 1,665,865; Apr. 10.
Tettens, Oscar, Oerlinghausen Lippe, Germany. Production of unsintered binding means of oil shale and limestone and the like. 1,665,993; Apr. 10.
Thermo Path Company Limited. (See Van der Meersch, André E. M., assignor.)
Thomas, Edwin E., assignor to J. Kiernan, Portland, Oreg. Wrench. 1,666,511; Apr. 10.
Thomas, Edwin E., assignor to J. Kiernan, Portland, Oreg. Hand fire extinguisher. 1,665,512; Apr. 10.
Thomas, Edwin E., assignor to J. Kiernan, Portland, Oreg. Visor attachment for hats and caps. 1,665,513; Apr. 10.
Thompson, Ralph D., Toledo, Ohio. Device for application to the openings of outlet boxes and the like. 1,665,484. Apr. 10.
Thomson, Elihu, Swampscott, assignor of one-half to J. A. McManus, Lynn, Mass. Producing and reproducing sound records. 1,665,331; Apr. 10.
Thorbus, Clarence T., assignor to Richardson Grain Separator Co., Minneapolis, Minn. Grain separator. 1,665,756; Apr. 10.
Tillman, Richard, Mannheim, Germany. Packing device for pressure vessels. 1,665,827; Apr. 10.
Timken, Henry H., assignor to The Timken Roller Bearing Company, Canton, Ohio. Axle construction. 1,665,332; Apr. 10.
Timken Roller Bearing Company, The. (See Schlaupitz, Oswald, assignor.)
Timken Roller Bearing Company, The. (See Timken, Henry H., assignor.)
Timson, William, Soho Foundry, Birmingham, assignor to W. & T. Avery, Limited, Birmingham, England. Automatic or semiautomatic weighing apparatus. 1,665,722; Apr. 10.
Tinnerman, Albert H., Cleveland, Ohio. Stove construction. 1,665,757; Apr. 10.
Todd, George M., Snoqualmie, Wash. Automatic lighter for stoves. 1,665,333; Apr. 10.
Topham, Charles F. (See Glover, W. H., and Topham.)
Toyoda, Kiichiro, Nagoya, Japan. Buffer for the picking arms in weaving looms. 1,665,514; Apr. 10.

Tozier, George H., assignor to Eastman Kodak Company, Rochester, N. Y. Lowering the viscosity of nitrocellulose in solutions by mechanical action. 1,666,049; Apr. 10.
Tractor Grip Wheel Company, The. (See Wine, William E., assignor.)
Traver, Lillian F., Sand Lake, N. Y. Garment. 1,665,232; Apr. 10.
Trembour, Max R., Canton, Ohio, assignor to Central Alloy Steel Corporation, New York, N. Y. Sink-head top. 1,665,515; Apr. 10.
Tremper, Charles W., assignor to The Tremper-Shields Co., New Haven, Conn. Air-control device for air-operated sheet-feeding mechanisms. 1,665,723; Apr. 10.
Tremper-Shields Co., The. (See Tremper, Charles W., assignor.)
Trickey, John P., Evanston, and C. S. Miner, assignors to The Quaker Oats Company, Chicago, Ill. Making furfural resins. 1,665,233. Apr. 10.
Trickey, John P., Evanston, and C. S. Miner, assignors to The Quaker Oats Company, Chicago, Ill. Making furfural resins. 1,665,234; Apr. 10.
Trickey, John P., Evanston, and C. S. Miner, assignors to The Quaker Oats Company, Chicago, Ill. Furfuralcohol resins. 1,665,235; Apr. 10.
Trickey, John P., Evanston, and C. S. Miner, assignors to the Quaker Oats Company, Chicago, Ill. Obtaining furane derivatives. 1,665,236; Apr. 10.
Trickey, John P., Evanston, and C. S. Miner, assignors to The Quaker Oats Company, Chicago, Ill. Compound resinous substance and making same. 1,665,237; Apr. 10.
Trico Products Corporation. (See Folberth, F. G. and W. M., assignors.)
Trump, Edward H., Merton Park, London, England, assignors to Radio Corporation of America. Electrical condenser. 1,665,616; Apr. 10.
Trumpler, William E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Balancing machine. 1,665,866; Apr. 10.
Truscott, Starr. (See Jacobsohn, I. M., and Truscott.)
Turan, Louis, Brooklyn, N. Y. Container. 1,665,238; Apr. 10.
Turner, Edwin A. (See Lower, N. M., and Turner.)
Turner, Ivan, London, England. Rotary engines and the like. 1,665,994; Apr. 10.
Tuttle, Julius O. and R. C., Sioux City, Iowa. Drummer's game. 1,665,516; Apr. 10.
Tuttle, Roy C. (See Tuttle, Julius O. and R. C.)
Tuttle Silver Company. (See Dolan, Bernard A., assignor.)
Underwood Elliott Fisher Company. (See Smith, Jesse A. B., assignor.)
Union Switch & Signal Company, The. (See Padmore, Bertham R., assignor.)
Union Switch & Signal Company, The. (See Waterman, Frank N., assignor.)
United States Glass Company. (See Northwood, Charles O., assignor.)
U. S. Light & Heat Corporation. (See Carpenter, Campbell C., assignor.)
United States Tent & Awning Company. (See Dietz, Charles H., assignor.)
Universal Gear Shift Corporation. (See Craig, Alvin M., assignor.)
Universal Oil Products Company. (See Huff, Lyman C., assignor.)
Universal Winding Company. (See Swanson, Ernest R., assignor.)
Upham, Franklin S., Des Moines, Iowa. Toy train coupling. 1,665,758; Apr. 10.
Valentine, Charles W., assignor to The Bagley and Sewall Company, Watertown, N. Y. Paper-making machine. 1,665,614; Apr. 10.
Valleau, James H., Reno, Nev. Vehicle support. 1,665,646; Apr. 10.
Valley Mould & Iron Corporation. (See Perry, John E., assignor.)
Van de Carr, Charles R., jr., Quebec, Quebec, Canada. Method and apparatus for regulating the consistency of pulp stock and the like. 1,665,425; Apr. 10.
Van der Meersch, A. E. M., Chelsea, London, assignor to Thermo Path Company Limited, London England. Electric heater. 1,665,941; Apr. 10.
Van Dorn Iron Works Company, The. (See Whitehouse, John T., assignor.)
Vapor Car Heating Company. (See Gillick, Lawrence H., assignor.)
Varaud, André, Geneva, Switzerland. Mechanical fuse for artillery projectiles. 1,665,899; Apr. 10.
Vasselli, Anthony J., Newark, N. J., assignor, by mesne assignments, to Columbia Phonograph Company, Bridgeport, Conn. Phonograph record and making the same. 1,665,759; Apr. 10.
Vaughan, Olivia E., Newark, N. J. Tennis-racket carrier. 1,665,900; Apr. 10.
Vaught, Keith J., San Diego, Calif. Fence tool. 1,665,760; Apr. 10.
Veenschoten, Vincent V., Erie, Pa. Portable searchlight and mounting therefor. 1,665,803; Apr. 10.
Verdich, Hana P., Ellendale, N. Dak. Advertising light. 1,665,426; Apr. 10.
Versaw, Ernest M., Benton Harbor, Mich. Machine for applying handles to baskets and the like. 1,665,334; Apr. 10.
Victor X-Ray Corporation. (See Wantz, Julius B., assignor.)
Viers, Charles O., and L. D. Sheldon, Toledo, Ohio. Door mounting. 1,665,384; Apr. 10.
Viersen, Ipe A., Okmulgee, Okla. Automobile signal. Des. 74,903; Apr. 10.
Vincent, Harry S., Ridgewood, N. J., assignor to Franklin Railway Supply Company, New York, N. Y. Booster motor-truck construction. 1,665,335; Apr. 10.
Voight, George F., Oakland, Calif., assignor to Economy Products Corporation. Wire fastener. 1,665,761; Apr. 10.
Von Gunten, Jacob, assignor to The Ohio Drilling Company, Massillon, Ohio. Well-casing shoe. 1,665,569; Apr. 10.
Von Korshenewski, Nicolai, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Arrangement for multiplex directional receiving. 1,666,024; Apr. 10.
Von Reis, Lambert, Herzogenrath, Germany, assignor to Maatschappij tot Beheer en Exploitatie van Octrooien, Amsterdam, Netherlands. Manufacture of raw plate glass on multiroller glass-rolling machines. 1,665,427; Apr. 10.
Vox Maschinen-Aktiengesellschaft. (See Hornauer, Willy, assignor.)
Vulcan Motor Devices Company. (See Stevens, William C., assignor.)
Wachtel, Charles, New Hyde Park, N. Y. Electric boudoir lamp. 1,665,867; Apr. 10.
Wagner, Carl, Fort Morgan, Colo. Ditcher. 1,665,428; Apr. 10.
Walker, Hubert, Royal Oak, Mich., assignor to American Car and Foundry Motors Company, New York, N. Y. Motor-vehicle bumper and mounting therefor. 1,665,336; Apr. 10.
Wallace, Charles F., Westfield, assignor to Wallace & Tiernan Co., Inc., Belleville, N. J. Carburetor. 1,665,239; Apr. 10.
Wallace, Frank H., and W. H. Compton, Newry, S. C. Rocker-shaft bearing. 1,665,942; Apr. 10.
Wallace & Tiernan Co. (See Wallace, Charles F., assignor.)
Wallace, William G., assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Radiator. 1,665,385; Apr. 10.
Walling, Frank E. (See McKee, M., and Roach, assignors.)
Wallis, Marie L., et al., executrices. (See Becker, Edmund.)
Walmer, Irving G., and J. A. Sawyer, Albany, N. Y. Face guard or mask. 1,665,386; Apr. 10.
Walsh, Philip J., San Francisco, Calif. Timing apparatus. 1,665,804; Apr. 10.
Walter, Frank J., assignor of one-half to G. B. Cady, Canastota, N. Y. Hollow punch. 1,665,805; Apr. 10.
Walters, Edward A., Youngstown, Ohio. Tire carrier. 1,665,647; Apr. 10.
Walther, George, Montgomery County, near Dayton, assignor to The Dayton Steel Foundry Company, Dayton, Ohio. Metal wheel. 1,665,485; Apr. 10.
Wantz, Julius B., Oak Park, assignor to Victor X-ray Corporation, Chicago, Ill. X-ray cooling system. 1,665,486; Apr. 10.
Ward, Erwin J., assignor to Eastman Kodak Company, Rochester, N. Y. Paster band for roll films. 1,666,050; Apr. 10.
Waream, Charles E., assignor to The American Laundry Machinery Company, Norwood, Ohio. Welded spring pad and making the same. 1,665,762; Apr. 10.
Warmington, Arthur L., Oakland, Calif. Steering wheel. 1,665,337; Apr. 10.
Washburn & Granger, Inc. (See Washburn, Montross, assignor.)
Washburn, Montross, Ossining, assignor to Washburn & Granger, Inc., New York, N. Y. Incinerator. 1,665,487; Apr. 10.
Waterman, Frank N., Summit, N. J., assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical translating apparatus. 1,665,571; Apr. 10.
Waterous Fire Engine Works. (See Storey, Leonidas P., assignor.)
Waters-Genter Co. (See Forbes, Thomas C., assignor.)
Waters, Harry F., St. Louis, Mo. Valve action for pipe organs. 1,665,868; Apr. 10.
Waters, Lawrence W., Los Angeles, Calif. Electric windshield wiper. 1,665,570; Apr. 10.
Way, William P., Richmond Hill, N. Y. Bag holder and spreader. 1,665,724; Apr. 10.
Weaver, Marvin S., Aberdeen, N. C. Serving food and drink. 1,665,289; Apr. 10.
Weaver, William D., Hillsville, Pa. Screw driver. 1,665,240; Apr. 10.
Webb, George E. (See Lichtenberg, E. H., and Webb.)
Webb, George E., assignor to Koehring Company, Milwaukee, Wis. Discharge mechanism for concrete mixers. 1,665,517; Apr. 10.
Webb, George E., assignor to Koehring Company, Milwaukee, Wis. Rotary discharge chute. 1,665,518; Apr. 10.

Webb, George E., assignor to Koehring Company, Milwaukee, Wis. Concrete-mixing machine. 1,665,519; Apr. 10.
Webster, Albert S. (See Smith, W. H., and Webster.)
Weed, James M., Scotia, N. Y., assignor to General Electric Company. Electric welding. 1,665,869; Apr. 10.
Weidemiller, John H. (See Smith, Charles E. B., assignor.)
Weiland, Henry J. (See Gubelmann, I., Weiland, and Stallmann.)
Weingartner, Anthony E., assignor to American Engineering Company, Philadelphia, Pa. Stoker mechanism. 1,665,943; Apr. 10.
Weiss, Carl W., Brooklyn, N. Y. Universal joint. 1,665,241; Apr. 10.
Welch, Henry. (See Stell, Alfred and J., and Welch.)
Weldfast System, Inc. (See Chase, Frank W., assignor.)
Wellington, George S., assignor of one-half to L. P. Barenchi, Los Angeles, Calif. Automobile signal. 1,665,648; Apr. 10.
Wells, Joel B., Philadelphia, Pa. Garment gauge. 1,665,682; Apr. 10.
Wells, William S., Bethlehem, Pa., assignor to Benjamin Eastwood Company, Paterson, N. J. Shuttle box. 1,665,572; Apr. 10.
Welte Company. (See Cheek, Tolbert F., assignor.)
Wertzberger, Dallas D., Tulsa, Okla. Well-drilling derrick. 1,665,488; Apr. 10.
Wescott, Jay V., assignor to Du-Wel Steel Producta Co., Chicago, Ill. Track guard rail. 1,665,242; Apr. 10.
Westboro Weaving Company. (See Richard, E. C., and Gill, assignors.)
Westco-Chippewa Pump Company. (See Derrick, William I., assignor.)
Western Electric Company. (See Gorton, William S., assignor.)
Western Electric Company. (See Jammer, Jacob S., assignor.)
Western Electric Company. (See Mead, Edward D., assignor.)
Western Electric Company. (See Nottingham, Wayne B., assignor.)
Western Electric Company. (See Oswald, Arthur A., assignor.)
Western Electric Company. (See Peterson, Eugene, assignor.)
Western Electric Company. (See Schmitt, Hugo R., assignor.)
Western Electric Company. (See Schumacher, Earle E., assignor.)
Western Wheeled Scraper Company. (See Morton, Rolla A., assignor.)
Westin, Chester J., Rockaway, N. J., assignor to Wirebounds Patents Company. Machine for use in making boxes. 1,666,035; Apr. 10.
Westinghouse Electric & Manufacturing Company. (See Ashbaugh, John H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Bastian, Arthur J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Boddie, Clarence A., assignor.)
Westinghouse Electric and Manufacturing Company. (See De Vries, Andrew, assignor.)
Westinghouse Electric & Manufacturing Company. (See Dossert, J. J., and Greaves, assignors.)
Westinghouse Electric & Manufacturing Company. (See Eschholz, Otto H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Evans, Robert D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Evans, R. D., and Sels, assignors.)
Westinghouse Electric & Manufacturing Company. (See Forshee, Frank F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Getz, Benjamin E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Guy, Henry L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Knapp, Charles N. F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Lenehan, Bernard E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Newmeyer, William L., assignor.)
Westinghouse Electric and Manufacturing Company. (See Peters, William G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Rodman, Clarence J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Scott, Howard, assignor.)
Westinghouse Electric & Manufacturing Company. (See Slepian, Joseph, assignor.)
Westinghouse Electric and Manufacturing Company. (See Söderberg, Carl R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Staege, Stephen A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Trumpler, William E., assignor.)
Westinghouse Lamp Company. (See Amatel, Harold, assignor.)
Westinghouse Lamp Company. (See Marden, John W., assignor.)
Westinghouse Lamp Company. (See Marden, J. W., and Conley, assignors.)
Westinghouse Union Battery Company. (See Norris, Paul E., assignor.)
Westinghouse Union Battery Company. (See Norris, P. E., and Aldrich, assignors.)
Wetmore, Laurence, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Shaping device. 1,665,870; Apr. 10.
Wettlaufer, William H. (See Lamotke, Frederick, assignor.)
Wheelan, Robert B., Brooklyn, N. Y. Loud speaker. 1,665,826; Apr. 10.
Wheeler, Bradley P., jr., Buffalo, N. Y. Core for hollow-wall construction. 1,665,573; Apr. 10.
Whitacre-Greer Fireproofing Company, The. (See Borsenberger, Emil E., assignor.)
White, Ira C., Brownsville, Ark. Poultry roost. 1,665,290; Apr. 10.
White, J. J., Manufacturing Company. (See White, Joseph J., assignor.)
White, Joseph J., assignor to J. J. White Manufacturing Company, Providence, R. I. Ring or similar article of manufacture. Des. 74,904; Apr. 10.
White, Joseph J., assignor to J. J. White Manufacturing Company, Providence, R. I. Ring or similar article of manufacture. Des. 74,905; Apr. 10.
White, Joseph J., assignor to J. J. White Manufacturing Company, Providence, R. I. Ring or similar article of manufacture. Des. 74,906; Apr. 10.
White, Joseph J., assignor to J. J. White Manufacturing Company, Providence, R. I. Ring or similar article of manufacture. Des. 74,907; Apr. 10.
White, Joseph J., assignor to J. J. White Manufacturing Company, Providence, R. I. Ring or similar article of manufacture. Des. 74,908; Apr. 10.
White, Joseph J., assignor to J. J. White Manufacturing Company, Providence, R. I. Ring or similar article of manufacture. Des. 74,909; Apr. 10.
White Motor Company, The. (See Jehle, Ferdinand, assignor.)
White, Richard P., Chicago, Ill. Ball ear. 1,665,828; Apr. 10.
White, Richard P., Chicago, Ill. Ball ear for vessels. 1,665,829; Apr. 10.
Whitehouse, John T., assignor to The Van Dorn Iron Works Company, Cleveland, Ohio. Jail-door-locking mechanism. 1,665,243; Apr. 10.
Whitescarver, Charles T., and G. Bendixen, New York, N. Y. Spreader tie for concrete wall forms. 1,665,649; Apr. 10.
Whitney Mfg. Co., The. (See Dow, Richard F., assignor.)
Whitney, Wiley, East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,665,338; Apr. 10.
Whitten, Herbert W. (See Glaser, J. P., Julien, and Whitten.)
Whyte, James C. (See Sloate, A. C., and Whyte.)
Wicks, John, assignor, by mesne assignments, to Automatic Electric Inc., Oak Park, Ill. Telephone system. 1,665,489; Apr. 10.
Wiel, Eli H., assignor to Buckingham & Hecht, San Francisco, Calif. Shoe or boot. 1,665,763; Apr. 10.
Wiley, Andrew J., Boise, Idaho. Metal base for timber poles. 1,665,995; Apr. 10.
Wiley, William R., Mount Clemens, Mich. Built-up piston. 1,665,830; Apr. 10.
Wilkes, William H., New York, N. Y., assignor to National Advertising Corporation, St. Louis, Mo. Coupon bank deposit book. 1,665,574; Apr. 10.
Williams, Dayton L., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Breaker,applying device. 1,665,831; Apr. 10.
Williams, James E., Denver, Colo. Whiffletree. 1,665,244; Apr. 10.
Willoughby, Victor. (See Joy, R. W., and Willoughby.)
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Refrigerator car. 1,665,387; Apr. 10.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Hopper car. 1,665,388; Apr. 10.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Brake-rod jaw. 1,665,389; Apr. 10.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Mine car. 1,665,390; Apr. 10.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Safety valve. 1,665,391; Apr. 10.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Car roof. 1,665,392; Apr. 10.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Brake mechanism. 1,665,393; Apr. 10.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Safety valve. 1,665,394; Apr. 10.
Wilson, Edwin B., Forest Hills, assignor to Design Laboratories, Incorporated, New York, N. Y. Lamp shade. 1,665,617; Apr. 10.
Wilson, Edwin B., Forest Hills, N. Y. Ornamental object. 1,665,618; Apr. 10.

Wilson, Frank, sr., assignor to A. W. Reboul, Los Angeles, Calif. Rail and tie clamp. 1,665,575; Apr. 10.
Wine, William E., assignor to The Tractor Grip Wheel Company, Toledo, Ohio. Traction wheel. 1,666,036; Apr. 10.
Wine, William E., and J. W. Promenschenkel, assignors to The Tractor Grip Wheel Company, Toledo, Ohio. Traction wheel. 1,666,037; Apr. 10.
Wirebounds Patents Company. (See Westin, Charles J., assignor.)
Wise, Frederick, C., and W. Greenwood, London, England, assignors to Alfred Dunhill of London, Inc., New York, N. Y. Flint lighter. Re16,930; Apr. 10.
Witham, Carl A., Minneapolis, Minn. Bag of paper or other flexible material. 1,665,576; Apr. 10.
Wood, Franz J., Des Moines, Iowa. Water-heater attachment for furnaces. 1,665,520; Apr. 10.
Wood, James J., Fort Wayne, Ind., assignor to General Electric Company. Refrigerating machine. 1,665,871; Apr. 10.
Wood, John P. N., East Winterhaven, Fla. Fire-pot mold. 1,665,650; Apr. 10.
Woods Brothers Construction Co. (See Howard, Marshall, assignor.)
Woolsey, Charles A., Minneapolis, Minn. Crate. 1,665,245; Apr. 10.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Carburetor. 1,665,395; Apr. 10.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Internal-combustion engine. 1,665,396; Apr. 10.
Wrentmore, Ernest L., deceased, Warren, Ohio; (Mrs.) M. V. Wrentmore, administratrix. Internal-combustion engine. 1,665,521; Apr. 10.
Wrentmore, Maude V., administratrix. (See Wrentmore, Ernest L.)
Wright, Warren C., Chicago, Ill. Flush valve. 1,665,832; Apr. 10.
Wunsch, Felix, assignor to Leeds & Northrup Company, Philadelphia, Pa. Electrical measuring apparatus. 1,665,397; Apr. 10.
Wurlitzer, Rudolph, Manufacturing Company, The. (See Battner, Stephen, assignor.)
Yale & Towne Manufacturing Company, The. (See Soley, Frank, assignor.)
York, Allen B., assignor to M. L. Bruce, Sandpoint, Idaho. Puncturing machine. 1,665,764; Apr. 10.
Young, Arthur, et al., administrators. (See Deppé, W. P., and Summers.)
Young, Harvey L., assignor to J. R. Gammeter, Akron, Ohio. Electrical connection and making the same. 1,665,246; Apr. 10.
Young, Hugh, Mirando City, Tex. Leverage vise. 1,665,247; Apr. 10.
Young, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Container. 1,665,577; Apr. 10.
Young, L. A., Industries. (See Falls, William A., assignor.)
Youngblood, David F., San Antonio, Tex. Pneumatic cage for prisons, vaults, and the like. 1,665,651; Apr. 10.
Zell, David H., Brooklyn, N. Y. Coin bank. Des. 74,910; Apr. 10.
Zimmermann, William F., Maplewood, assignor to Gould & Eberhardt, Newark, N. J. Shaping machine having constant power traverse. 1,665,398; Apr. 10.
Zork, David, Chicago, Ill. Extension table. 1,665,833; Apr. 10.
Zumbühl, Jules, Basel, Switzerland. Transposing device for keyed instruments. 1,666,025; Apr. 10.
Zuschlag, Theodor, New York, N. Y., assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Telephone system. 1,665,683; Apr. 10.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 10TH DAY OF APRIL, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abdominal support. D. C. Kellogg. 1,665,502; Apr. 10.
Abrasive roll. D. C. Scott. 1,665,609; Apr. 10.
Acid, Making hydrofluoric. W. J. Harshaw and C. S. Parke. 1,665,588; Apr. 10.
Acoustic diaphragm. J. Q. Slye and R. H. Coffren. 1,665,284; Apr. 10.
Addressing machine, Hand. J. S. Duncan and H. E. Hubbard. 1,665,583; Apr. 10.
Adhesive-applying device. W. H. Baynard. 1,666,039; Apr. 10.
Adjustment device, Precision. J. B. Gammeter and C. C. Cadden. 1,665,848; Apr. 10.
Advertising device. R. L. Reichard. 1,665,894; Apr. 10.
Advertising light. H. P. Verdich. 1,665,426; Apr. 10.
Aerial signaling. E. Becker. 1,665,838; Apr. 10.
Aeroplane. N. Bule. 1,665,769; Apr. 10.
Aeroplane. A. A. Nero. 1,665,713; Apr. 10.
Agitator. E. B. Nichols. 1,665,780; Apr. 10.
Air-brake mechanism. C. N. F. Knapp. 1,665,928; Apr. 10.
Aircraft covering. I. M. Jacobsohn and S. Truscott. 1,665,500; Apr. 10.
Airplane. N. M. Sleeper. 1,665,480; Apr. 10.
Airplanes, Tail-skid shoe for. J. F. Haberlin. 1,665,849; Apr. 10.
Air register. C. Strachan and D. J. Irish. 1,665,800; Apr. 10.
Airship, Gas inflated. E. Lempertz. 1,665,886; Apr. 10.
Alarm: *See*—
  Fire alarm.
Alarm device. W. C. Roe. 1,665,677; Apr. 10.
Alkyl ethers of 3'-nitro 4'-hydroxy ortho-benzoyl benzoic acid, Preparing. I. Gubelmann, H. J. Welland, and O. Stallmann. 1,665,541; Apr. 10.
Amplifier. I. F. Byrnes. 1,665,843; Apr. 10.
Amplifier. E. W. Graef. 1,665,699; Apr. 10.
Amplifying repeater. J. S. Jammer. 1,665,501; Apr. 10.
Amusement apparatus. E. Mayette. 1,666,018; Apr. 10.
Amusement apparatus. H. N. Ridgway. 1,665,981; Apr. 10.
Amusement device. M. E. Huth. 1,665,364; Apr. 10.
Anchor mounting, Safety. A. Bardello. 1,665,837; Apr. 10.
Anchor, Rail. M. C. Lenoir. 1,665,814; Apr. 10.
Anticreeper. H. G. Gillmor. 1,665,696; Apr. 10.
Arsenical compound. C. S. Hamilton. 1,665,781; Apr. 10.
Articulator. G. P. Phillips. 1,666,021–2; Apr. 10.
Artificial fogs, Producing. A. V. Jernberg. 1,665,267; Apr. 10.
Asphalt-mixing plant, Portable. E. H. Cummer. 1,665,405; Apr. 10.
Assemblage-point device. H. Arnstein. 1,665,872; Apr. 10.
Auto control, Safety. C. E. Shearon, J. D. Alexander, and L. M. Pearcey. 1,665,281; Apr. 10.
Automatic lock. G. Feeney and T. O'Connor. 1,665,952; Apr. 10.
Automobile. H. Brusch. 1,665,441; Apr. 10.
Automobile. L. Nycz. 1,665,974; Apr. 10.
Automobile heater. E. Aeby. 1,665,725; Apr. 10.
Automobile luggage carrier. M. O'Dea. 1,665,892; Apr. 10.
Automobile signal. I. A. Viersen. Des. 74,903; Apr. 10.
Automobile signal. G. S. Wellington. 1,665,648; Apr. 10.
Automobile turntable. J. G. Austin. 1,665,997; Apr. 10.
Automobiles, Signal system and direction indicator for. C. F. A. Eddy. 1,665,584; Apr. 10.
Awning arm. C. H. Dietz. Des. 74,867–71; Apr. 10.
Axle construction. H. H. Timken. 1,665,332; Apr. 10.
Bag: *See*—
  Punching bag.
Bag holder and spreader. W. P. Way. 1,665,724; Apr. 10.
Bail ear. R. P. White. 1,665,828; Apr. 10.
Balancing machine. C. R. Soderberg. 1,665,938; Apr. 10.
Balancing machine. W. E. Trumpler. 1,665,866; Apr. 10.
Band or tube corrugating and flanging machine, Combination. C. B. Pritchard. Re16,931; Apr. 10.
Bank, Coin. J. H. Stapp. Des. 74,901; Apr. 10.
Bank, Coin. D. H. Zell. Des. 74,910; Apr. 10.
Bank, Savings. Z. M. Speer. 1,665,824; Apr. 10.
Bathtubs and utilizing same, Protecting covering for. R. E. Henry. 1,665,206; Apr. 10.
Battery: *See*—
  Storage battery.
Battery construction, Storage-. C. C. Carpenter. 1,665,772; Apr. 10.
Battery plate and producing same, Storage-. C. W. Jenner. 1,665,962; Apr. 10.
Battery separator, Storage-. P. E. Norris and H. H. Aldrich. 1,665,604; Apr. 10.
Bearing, Ball. C. W. Dake. 1,665,448; Apr. 10.
Bearing, Rocker-shaft. F. H. Wallace and W. H. Compton. 1,665,942; Apr. 10.
Bed, Portable folding. C. Lofman. 1,665,668; Apr. 10.
Belt sander, Double-. C. L. Mattison. 1,665,740; Apr. 10.
Berry box. F. G. Haas. 1,665,359; Apr. 10.
Bimetallic element. H. Scott. 1,665,935; Apr. 10.
Bituminous product and making same. E. Hutzenlaub. 1,665,881; Apr. 10.
Block: *See*—
  Building block. Engraving block.
Board: *See*—
  Piano fall board. Report board.
Boat or drag, Wooden. H. A. Drake. 1,665,449; Apr. 10.
Boiler: *See*—
  Steam boiler. Water-tube boiler.
Boiler construction. F. D. Schneider and H. J. Long. 1,665,608; Apr. 10.
Boiler fire box. J. T. Anthony. 1,665,339; Apr. 10.
Boll-weevil destroyer. C. A. Hellmann. 1,665,960; Apr. 10.
Bolt. M. A. Comeau. 1,665,875; Apr. 10.
Books, Supplemental leaf-attaching device for. B. J. Reese. 1,665,641; Apr. 10.
Bootleg. F. C. and H. B. Lavarack. 1,665,629; Apr. 10.
Bottle. R. Haley. Des. 74,883; Apr. 10.
Bottles, tins, or other containers, Apparatus for filling. H. F. Broadhurst. 1,665,948; Apr. 10.
Bow tie and making the same. G. R. Miller. 1,665,712; Apr. 10.
Box: *See*—
  Berry box. Shuttle box.
  Boiler fire box.
Bracelet, Expansible. F. W. Nittel. 1,666,033; Apr. 10.
Bracket: *See*—
  Dead-end bracket. Shade-supporting bracket.
  Metal bracket.
Bracket or similar article, Curtain pole. J. O. Crawford. Des. 74,864; Apr. 10.
Brake: *See*—
  Hand brake. Vehicle brake.
  Thermostatic brake.
Brake device. O. Peterson. 1,665,753; Apr. 10.
Brake equalizer. H. Ford. 1,665,258; Apr. 10.
Brake mechanism. V. R. Willoughby. 1,665,393; Apr. 10.
Brake mechanism operated by suction. W. O. Kennington. 1,665,306; Apr. 10.
Brake-operating mechanism, Electric. C. E. B. Smith. 1,665,227; Apr. 10.
Brake-rod jaw. V. R. Willoughby. 1,665,389; Apr. 10.
Brake shoe. A. Y. Dodge. 1,665,690; Apr. 10.
Breaker-applying device. D. L. Williams. 1,665,831; Apr. 10.
Buffer. H. S. Anderson and J. B. Brown. 1,665,292; Apr. 10.
Buffer, Manicuring. Z. R. Lucas and G. E. Carpender. 1,665,710; Apr. 10.
Building block. L. J. Campbell. 1,665,442; Apr. 10.
Bumper. F. N. Nutt. 1,665,320; Apr. 10.
Bumper and mounting therefor, Motor-vehicle. H. Walker. 1,665,336; Apr. 10.
Bumper, Motor-vehicle. W. A. Dierker. 1,665,536; Apr. 10.
Bumpers, Attachment for. H. Hamburger. 1,665,780; Apr. 10.
Burner: *See*—
  Incense burner.
Burr cutter. C. E. Pellow. 1,665,474; Apr. 10.
Cabinet, Article. S. R. Side. 1,665,986; Apr. 10.
Cabinet wringer. J. J. Dossert and E. E. Greaves. 1,665,912; Apr. 10.
Cable clamp. E. K. Cole. 1,665,531; Apr. 10.
Cables, Apparatus for lubricating wire. L. G. Gates. 1,665,451; Apr. 10.

Cage, Bird. L. J. Leon. Des. 74,891; Apr. 10.
Cage for prisons, vaults, and the like, Pneumatic. D. F. Youngblood. 1,665,651; Apr. 10.
Cake-splitting machine. J. R. Litty. 1,665,888; Apr. 10.
Calling device. L. L. E. Chauveau. 1,665,622; Apr. 10.
Can and closure. F. J. Costello. 1,665,908; Apr. 10.
Canopy, Bed. W. E. Rawlins. 1,665,980; Apr. 10.
Cap attachment for visors. M. McKee and C. A. Roach. 1,665,750; Apr. 10.
Cap extractor. E. V. Benoit. 1,665,524; Apr. 10.
Car bunk, High-stake. F. W. Chriswell. 1,665,623; Apr. 10.
Car-deck support, Kiln-. C. W. Laachenski. 1,665,631; Apr. 10.
Car, Hopper. V. Willoughby. 1,665,388; Apr. 10.
Car, Mine. V. Willoughby. 1,665,390; Apr. 10.
Car, Refrigerator. V. Willoughby. 1,665,387; Apr. 10.
Car roof. V. Willoughby. 1,665,392; Apr. 10.
Car seal. F. Strahm. 1,665,424; Apr. 10.
Car-tank closure. R. W. Joy and V. Willoughby. 1,665,369; Apr. 10.
Cars, Adjustable blocking for. W. J. Brown. 1,665,439; Apr. 10.
Carbonated water. Method and apparatus for cooling. L. J. Taylor. 1,665,615; Apr. 10.
Carburetor. C. F. Wallace. 1,665,239; Apr. 10.
Carburetor. L. M. Woolson. 1,665,395; Apr. 10.
Carburetors, Air cleaner for. A. C. Bennett. 1,665,434; Apr. 10.
Carburetors, Throttle control for. F. E. Dayes. 1,665,407; Apr. 10.
Card-feed mechanism and method. H. B. Smith. 1,665,937; Apr. 10.
Carrier: *See*—
  Automobile luggage carrier. Tennis-racket carrier.
  Hat carrier. Tire carrier.
Carrier-wave transmission. H. R. Schmitt. 1,665,328; Apr. 10.
Carton, Shipping and display. H. Amatel. 1,665,620; Apr. 10.
Case: *See*—
  Cigarette case. Jewelry case.
Caster. N. L. and F. J. Jarvis. 1,665,882; Apr. 10.
Casting machine, Centrifugal. J. K. Hencken. 1,665,700; Apr. 10.
Casting, Nonferrous. R. L. Binney. 1,665,435; Apr. 10.
Castings, Method and machine for finishing circular. W. Y. Stroh and G. W. Klages. 1,665,286; Apr. 10.
Chafing-strip applier. E. F. Maas. 1,665,889; Apr. 10.
Chain and links therefor, Drive. R. F. Dow. 1,665,808; Apr. 10.
Chassis, Motor-vehicle. J. Shaw. 1,665,610; Apr. 10.
Chloride from sludge, Recovering aluminum. P. Danckwardt. 1,665,406; Apr. 10.
Chute, Leading. F. De Roos. 1,665,493; Apr. 10.
Chute, Rotary discharge. G. E. Webb. 1,665,518; Apr. 10.
Cigar holder and ash receiver. J. Stern. 1,665,612; Apr. 10.
Cigarette case. J. Parsons. 1,665,752; Apr. 10.
Circuit breaker. F. W. Roller. 1,665,223; Apr. 10.
Circuit interrupter. W. L. Newmeyer. 1,665,858; Apr. 10.
Clamp: *See*—
  Cable clamp. Rail and tie clamp.
Clamp. C. H. Fernald. 1,665,877; Apr. 10.
Clams, Device for propagation of. R. C. Adams and J. T. Adams. 1,665,996; Apr. 10.
Cleaner: *See*—
  Window cleaner. Windshield cleaner.
Cleaning apparatus, J. S. Campbell. 1,665,727; Apr. 10.
Cleaning apparatus, Tank-. G. W. Land. 1,666,015; Apr. 10.
Cleaning rod and extracting device. L. F. Smith. 1,665,988; Apr. 10.
Cleansing machine. W. H. Dunn. 1,665,809; Apr. 10.
Clip: *See*—
  Fuse clip.
Clock and lamp, Combined alarm. F. J. T. Hall. 1,665,412; Apr. 10.
Clock mounting. W. D. Clark. 1,665,491; Apr. 10.
Clock with rotary operating members. W. E. Porter. 1,665,476; Apr. 10.
Closure cap, Friction. E. Scofield. 1,665,821; Apr. 10.
Clutch. A. A. Byerlein. 1,665,999; Apr. 10.
Clutch. G. F. Kolb. 1,665,554; Apr. 10.
Clutch drums, Producing. H. S. MacChesney. 1,665,875; Apr. 10.
Clutch mechanism. A. Dow. 1,665,409; Apr. 10.
Coffee-making apparatus. B. W. Canright. 1,665,728; Apr. 10.
Coil, Inductance. T. H. Brennan. 1,665,947; Apr. 10.
Coin-changing machine. W. H. Russell. 1,665,566; Apr. 10.
Coin-paying machine. E. J. Brandt. 1,665,343; Apr. 10.
Coke, Producing a hard low-temperature. K. Jahnke. 1,665,665; Apr. 10.
Combination lock. F. Soley. 1,665,990; Apr. 10.
Combustion method and apparatus. V. Z. Caracristi. 1,665,344; Apr. 10.
Compass indicator for automobiles, etc. O. P. Nolsom. 1,665,715; Apr. 10.
Concrete-floor core. W. S. Haldeman. 1,665,542; Apr. 10.
Concrete mixers, Cement loading, controlling, measuring, and mounting apparatus for. J. F. Robb. 1,665,565; Apr. 10.
Concrete mixers, Discharge mechanism for. G. E. Webb. 1,665,517; Apr. 10.
Concrete mixers, Water-introducing means for. E. H. Lichtenberg and G. E. Webb. 1,665,314; Apr. 10.
Concrete-mixing machine. G. E. Webb. 1,665,519; Apr. 10.
Concrete wall forms, spreader tie for. C. T. Whitescarver and G. Bendixen. 1,665,649; April 10.
Condenser, Electrical. E. H. Trump. 1,665,616; Apr. 10.
Condenser rack. H. I. Danziger. 1,666,044; Apr. 10.
Container. L. A. Lux. 1,665,711; Apr. 10.
Container. L. Turan. 1,665,238; Apr. 10.
Container. J. M. Young. 1,665,577; Apr. 10.
Container and picture frame. Combination. H. A. Kretschmer. Des. 74,889; Apr. 10.
Container, Ice-cream-brick. C. B. Telling. 1,665,681; Apr. 10.
Container, Liquid. L. O. Buist. 1,665,770; Apr. 10.
Convertible body. R. Beringer. 1,665,294; Apr. 10.

Locomotive. G. K. Davol. 1,665,910; Apr. 10.
Locomotive booster apparatus. F. R. Peters. 1,665,324; Apr. 10.
Locomotive stoker. N. M. Lower and E. A. Turner. 1,665,748; Apr. 10.
Locomotive whistle. R. C. Morehouse. 1,665,671; Apr. 10.
Loom tube frame and spool. J. A. Coyle and W. B. Cooper. 1,665,447; Apr. 10.
Looms, Attachment for. C. E. Neisler, jr. 1,665,274; Apr. 10.
Looms, Buffer for the picking arms in weaving. K. Toyoda. 1,665,514; Apr. 10.
Loud speaker. R. B. Wheelan. 1,665,820; Apr. 10.
Lubricating system. M. Koehler. 1,665,964; Apr. 10.
Lumber-stamping device. J. J. Rettmer. 1,665,220; Apr. 10.
Machine for applying handles to baskets and the like. E. M. Versaw. 1,665,334; Apr. 10.
Machine for bundling-currency. F. W. Chase. 1,665,731; Apr. 10.
Machine for bundling paper currency. F. W. Chase. 1,665,730; Apr. 10.
Machine for counterboring brake linings and the like. G. R. Cady. 1,665,771; Apr. 10.
Machine for forming balls. G. O. Hodge. 1,665,361; Apr. 10.
Machine for rolling metallic disks. E. A. Nelson. 1,665,818; Apr. 10.
Machine for setting or applying belt fasteners and the like. J. K. Diamond. Re16,925; Apr. 10.
Machine for use in making boxes. C. J. Westin. 1,666,035; Apr. 10.
Magnetic chuck. F. L. Simmons. 1,665,226; Apr. 10.
Manganese and product thereof, Making arsenates of. W. L. Tanner. Re16,933; Apr. 10.
Manipulator table for rolling mills. N. C. Rendleman. 1,665,606; Apr. 10.
Manure spreader. E. C. F. Schaefer. Re16,929; Apr. 10.
Marker, Stocking. C. T. La Mont. 1,665,706; Apr. 10.
Measuring apparatus, Electrical. F. Wunsch. 1,665,397; Apr. 10.
Measuring device for fitting shoes, Foot-. E. J. Bliss. 1,666,040; Apr. 10.
Mending fabric articles. H. Liedtke. 1,665,968; Apr. 10.
Metal bands around packing cases and other packages, Apparatus for tensioning and sealing. A. C. Payne. 1,665,323; Apr. 10.
Metal bracket, Combination. H. C. Hanna. 1,665,782; Apr. 10.
Metal halides, Preparation of. J. W. Marden. 1,665,634; Apr. 10.
Metal, Method of and apparatus for disintegrating bulky scrap. J. E. Bing. 1,665,806; Apr. 10.
Metal powders, Purification of. J. W. Marden. 1,665,635; Apr. 10.
Metal sheets, Shearing. G. E. Mirfield. 1,665,319; Apr. 10.
Metal wheel. G. Walther. 1,665,485; Apr. 10.
Metals, Purifying. J. J. Conlin. 1,665,844; Apr. 10.
Metallic bobbin base. C. C. Nixon and J. M. McLemore. 1,665,930; Apr. 10.
Meter: *See*—
Torsion meter.
Milk and cream separator. W. A. and A. L. Dean. 1,665,657; Apr. 10.
Mine and railway tie plate. J. T. Morris. 1,665,419; Apr. 10.
Mixing apparatus. A. P. Grunn. 1,665,260; Apr. 10.
Modulation system. F. Gerth. 1,665,350; Apr. 10.

Molstener for cigar boxes. E. C. Hake. 1,665,663; Apr. 10.
Mold: *See*—
Fire-pot mold.
Molded article. A. J. Bastian. 1,665,902; Apr. 10.
Molds for columns with bases, Apparatus for forming. F. H. Hunt and F. N. Ropp. 1,665,365; Apr. 10.
Motor: *See*—
Induction motor. Wave motor.
Motor. H. F. Deny. 1,665,581; Apr. 10.
Motor especially for driving clocks, Synchronous. R. Michl. 1,665,890; Apr. 10.
Motors, Short-circuiting device for electric. H. L. Johnston and M. K. Akers. 1,665,304; Apr. 10.
Mouse and rat trap, Combination. F. J. Ebel. 1,665,951; Apr. 10.
Multicolor screens, Making. C. E. K. Mees. 1,666,048; Apr. 10.
Multiplane traction device. A. E. Holcomb. 1,665,302; Apr. 10.
Multiplex directional receiving. Arrangement for. N. von Korshenewski. 1,666,024; Apr. 10.
Multipressure regulator. S. B. Redfield. 1,665,279; Apr. 10.
Music-roll tab. W. F. Koch. 1,665,963; Apr. 10.
Musical instrument, Automatic. T. F. Cheek. 1,665,905; Apr. 10.
Musical instrument, Automatic. C. F. Stoddard. 1,665,863; Apr. 10.
Nail setter. E. F. Malouf. 1,665,669; Apr. 10.
Necktie frame, Bow-. W. F. Smith. 1,665,509; Apr. 10.
Needle-and-suture assembly, Making. H. D. Morton and M. Parker. 1,665,216; Apr. 10.
Needle, Sewing. H. I. Lippard. Re16,926; Apr. 10.
Nipple chuck and pipe bender. R. A. Schmitt. 1,665,643; Apr. 10.
Nitrocellulose in solutions by mechanical action, Lowering the viscosity of. G. H. Tozier. 1,666,049; Apr. 10.
Nozzle, Sanitary douche. W. Novack. 1,665,790; Apr. 10.
Nozzle, Spray. R. M. Strong. 1,665,482; Apr. 10.
Nut cracker. J. F. Miller. 1,665,557; Apr. 10.
Nut, Lock. P. W. Dieter. 1,665,807; Apr. 10.
Oil, Antisludging means for. D. C. Cox. 1,665,845; Apr. 10.
Oil-burning system. J. W. Cannon. 1,665,443; Apr. 10.
Oil shale and limestone and the like, Production of unsintered binding means of. O. Tettens. 1,665,993; Apr. 10.
Oiler, Air-line. C. C. Hansen. 1,665,497; Apr. 10.
Oils, Apparatus for and process of distilling. C. B. Buerger. 1,666,042; Apr. 10.
Oils, Distilling hydrocarbon. W. P. Deppé and L. L. Summers. 1,666,051; Apr. 10.
Ophthalmic mounting. G. H. Day. 1,665,911; Apr. 10.
Optical speedometer. G. Ramsey. 1,665,278; Apr. 10.
Organ. B. Mauro. 1,666,032; Apr. 10.
Organ, Valve action for pipe. H. F. Waters. 1,665,868; Apr. 10.
Organs and pianos, Chromatic scale and solo-note-selecting device for. J. W. Klein. 1,665,593; Apr. 10.
Organs, Electro-pneumatic combination stop action for. G. H. Chapman. 1,665,254; Apr. 10.
Ornamental object. E. B. Wilson. 1,665,618; Apr. 10.
Ornamental surface and forming the same. R. J. Greene. 1,665,354; Apr. 10.
Outlet boxes and the like, Device for application to the openings of. R. D. Thompson. 1,665,484; Apr. 10.
Oval jar. C. F. Onthank. Des. 74,894; Apr. 10.
Oven, Baking. M. Johnson. 1,665,551; Apr. 10.
Package. F. W. Chase. 1,665,732; Apr. 10.
Packing. G. F. Murphy. 1,665,377; Apr. 10.
Packing device for pressure vessels. R. Tillmann. 1,665,827; Apr. 10.
Pad for pressing machines. P. N. Braun and S. T. Hart. 1,665,654; Apr. 10.
Pallet and making the same. C. B. Cushwa. 1,665,299; Apr. 10.
Pants holder. F. A. Rose. 1,665,983; Apr. 10.
Paper feed and cutting mechanism. S. E. Chapman. 1,665,444; Apr. 10.
Paper, Imprinted. D. D. Madden. 1,666,030; Apr. 10.
Paper-making machine. C. W. Valentine. 1,665,614; Apr. 10.
Paper, Method of and apparatus for making gummed. W. H. Smith, and A. S. Webster. 1,665,611; Apr. 10.
Paper or other flexible material, Bag of. C. A. Witham. 1,665,576; Apr. 10.
Paper, Producing imprinted. D. D. Madden. 1,666,031; Apr. 10.
Papering and buffing machine, Sand. E. Primeaux. 1,665,676; Apr. 10.
Pelorus. L. A. Brinkman. 1,665,527; Apr. 10.
Permanent-wave apparatus. A. L. Burleson, and N. P. Samantas. 1,665,253; Apr. 10.
Phonograph record and making the same. A. J. Vasselli. 1,665,759; Apr. 10.
Photographic button. R. E. Olsen. 1,665,605; Apr. 10.
Photographic-film cartridge. B. A. Slocum. 1,665,481; Apr. 10.
Photographic-film reel and manufacturing the same. A. S. Howell. 1,665,207; Apr. 10.
Photographic-printing machine. B. D. Chamberlin. 1,666,052; Apr. 10.
Photographic-printing machine. A. K. Chapman. 1,666,053; Apr. 10.
Piano fall board. S. Battner. 1,665,653; Apr. 10.
Piano keyboard, Foldable pocket. A. Raab. 1,665,563; Apr. 10.
Picture book, Moving-. R. A. Loederer. 1,665,747; Apr. 10.
Piers, breakwaters, etc., Producing subaqueous foundation. G. B. Sipe. 1,665,795; Apr. 10.
Piers, Providing and placing. G. B. Sipe. 1,665,796; Apr. 10.
Piles in interlocked relation, Producing and placing. G. B. Sipe. 1,665,798; Apr. 10.
Piling. M. Howard. 1,665,462; Apr. 10.
Pillowcase. J. Derk. Des. 74,865; Apr. 10.
Pilot light. J. T. Smith. 1,665,987; Apr. 10.
Pipe connection. H. W. Clarke. 1,665,346; Apr. 10.
Pipe cutter. C. H. Lamotte. 1,665,212; Apr. 10.
Pipe, Device for cutting. J. Levy. 1,665,707; Apr. 10.
Pipe joint. L. C. Huff. 1,665,208; Apr. 10.
Pipe-swaging device. A. C. Ekman. 1,665,915; Apr. 10.
Piston. G. A. Taylor. 1,665,229; Apr. 10.
Piston and connecting rod construction. L. H. Noah. 1,665,672; Apr. 10.
Piston, Built-up. W. R. Wiley. 1,665,830; Apr. 10.
Piston construction. W. C. Brower. 1,665,438; Apr. 10.
Plant for the generation of high-pressure steam, Traveling. O. H. Hartmann. 1,665,543; Apr. 10.
Plate. R. Haley. Des. 74,881; Apr. 10.
Plate, Hot. E. R. Rayburn. Des. 74,896; Apr. 10.
Plow, Rotary type of. A. R. Cook. 1,665,532; Apr. 10.
Plow, Two-way. K. C. Livermore. 1,666,016; Apr. 10.
Plows, Lateral-swing control for tractor-drawn. C. G. Strandlund. 1,665,330; Apr. 10.
Plows, Planter attachment for. L. Binger. 1,665,873; Apr. 10.
Pneumatic jack. R. D. Scott. 1,665,985; Apr. 10.
Pole holder and oarlock, Fish-. E. Eck. 1,665,914; Apr. 10.
Poles, Metal base for timber. A. J. Wiley. 1,665,995; Apr. 10.
Porcelain and enameled ware, Protecting. T. H. Mittendorf. 1,665,215; Apr. 10.
Post-base trimmer. H. O. Allison. 1,665,726; Apr. 10.
Potato-chip machine. J. J. McCarthy. 1,666,019; Apr. 10.
Pottery-making method. A. E. Radford. 1,665,978; Apr. 10.
Pouring and lifting device. M. W. Goldberg. 1,665,452; Apr. 10.
Powder and making, Dispersing. E. R. Allen and W. E. Kaufmann. 1,665,945; Apr. 10.
Power-amplifying system. E. W. Kellogg. 1,665,883; Apr. 10.
Power shovel. E. E. Peterson. 1,665,378; Apr. 10.
Power-transmission system. W. C. Stevens. 1,665,825; Apr. 10.
Power transmission, Variable-speed. A. Dow. 1,665,408; Apr. 10.
Power-transmitting mechanism. R. B. Bagby. 1,665,835; Apr. 10.
Preparation for cleaning metal preparatory to painting. J. D. Klinger and C. L. Boyle. 1,665,465; Apr. 10.
Press: *See*—
Drying press. Punch press.
Printing press. Screw press.
Press. F. Menne. 1,666,020; Apr. 10.
Priming means. A. Hollander and W. L. Forward. 1,665,460; Apr. 10.
Printing device, Changeable. J. C. Osborne. 1,665,717; Apr. 10.
Printing plates, Making etched. H. H. Brunings. 1,665,842; Apr. 10.
Printing press, Sheet-. M. A. Droitcour. 1,666,004; Apr. 10.
Processing apparatus. W. L. Conrad. 1,665,624; Apr. 10.
Profile gauge. R. A. Stockton. 1,665,721; Apr. 10.
Projection apparatus. L. V. Foster. 1,665,660; Apr. 10.
Projection apparatus. C. M. Fox. 1,665,410; Apr. 10.
Projection system. L. A. Jones and E. E. Richardson. 1,666,047; Apr. 10.
Puller: *See*—
Wheel puller.
Pulley block and operating pulley blocks in sky-line system. C. T. Haseman. 1,665,545; Apr. 10.
Pulp stock and the like, Method and apparatus for regulating the consistency of. C. R. Van de Carr, jr. 1,665,425; Apr. 10.
Pump. P. H. Davis. 1,665,686; Apr. 10.
Pump. W. I. Derrick. 1,665,687–9; Apr. 10.
Pump. A. E. Paige. 1,665,675; Apr. 10.
Pump, Acid. A. Hollander. 1,665,458; Apr. 10.
Pump, Air. E. O. Koenig and G. W. Brautigam. 1,665,965; Apr. 10.
Pump attachment for motor vehicles. B. D. Barton. 1,665,765; Apr. 10.
Pump, Combined low and high pressure oil. C. W. Manzel. 1,665,670; Apr. 10.
Pump, Diaphragm. C. I. Longenecker. 1,665,709; Apr. 10.
Pump-packing means. A. Hollander and W. L. Forward. 1,665,459; Apr. 10.

Pump, Pressure-packed. E. W. Patterson. 1,665,473; Apr. 10.
Pump, Sand-tester. G. F. Le Bus. 1,665,967; Apr. 10.
Pump, Tandem single-acting. E. W. Patterson. 1,665,639; Apr. 10.
Pump, Variable-discharge. O. H. Ensign. 1,665,692; Apr. 10.
Pumps, Gas extractor for. H. M. Green. 1,665,540; Apr. 10.
Pumps, Relief mechanism for. L. P. Storey. 1,665,382; Apr. 10.
Punch, Hollow. F. J. Walter. 1,665,805; Apr. 10.
Punch press. O. Schlaupitz. 1,665,820; Apr. 10.
Punching bag. D. McNamara. 1,665,969; Apr. 10.
Puncturing machine. A. B. York. 1,665,764; Apr. 10.
Quick-make and quick-break switch. F. L. Bryant. 1,665,529; Apr. 10.
Rack: *See*—
Condenser rack. Umbrella and cane rack.
Rack for motor vehicles, Baggage. E. J. Hall and A. G. Hawkes. 1,665,358; Apr. 10.
Radiator. W. G. Wallace. 1,665,385; Apr. 10.
Radiator ornament, Automobile. A. L. Sohm. Des. 74,900; Apr. 10.
Radiator shutter. L. G. Garnsey. 1,665,695; Apr. 10.
Radiodetector. J. Sieplan. 1,665,936; Apr. 10.
Radio receiving sets, Station-selector dial. N. Nystrom. 1,665,891; Apr. 10.
Radio receiving system. P. E. Edelman. 1,665,847; Apr. 10.
Radio signaling system. M. Lock. 1,665,632; Apr. 10.
Radio tube socket. W. H. Eggers. 1,665,876; Apr. 10.
Rail and tie clamp. F. Wilson, sr. 1,665,575; Apr. 10.
Rail bond. E. M. Deems. 1,665,347; Apr. 10.
Rail joint. C. A. Allen. 1,665,652; Apr. 10.
Railway sign. W. H. B. Lavarack and B. A. Lundy. 1,665,374; Apr. 10.
Range, Combination coal and electric. F. F. Forshee. 1,665,920; Apr. 10.
Razor-blade holder. L. W. Baker. 1,665,836; Apr. 10.
Receptacle, Cooking, freezing, and storing. C. S. Humphrey. 1,666,012; Apr. 10.
Receptacle for golf players' accessories. E. J. McGraw. 1,665,214; Apr. 10.
Records, Producing and reproducing sound. E. S. Thomson. 1,665,331; Apr. 10.
Reel: *See*—
Switching-cord reel.
Refrigerating apparatus. F. G. Keyes. 1,665,870; Apr. 10.
Refrigerating machine. J. J. Wood. 1,665,871; Apr. 10.
Refrigerating machines, Regulating device for. K. Glüssel. 1,665,878; Apr. 10.
Register: *See*—
Air register.
Regulating system. M. Herklotz. 1,665,852; Apr. 10.
Regulator: *See*—
Multipressure regulator.
Regulator system. R. D. Evans. 1,665,917; Apr. 10.
Regulator system. S. A. Staege. 1,665,939; Apr. 10.
Remedy from dihydroxy-diamino-arseno-benzene-monomethylene sulphonic acid, Manufacturing a new syphilis. T. Iwadare. 1,665,787; Apr. 10.
Report board. E. R. Spiegel. 1,665,568; Apr. 10.
Resinous substance and making same, Compound. J. P. Trickey and C. S. Miner. 1,665,237; Apr. 10.
Resins, Furfuralcohol. J. P. Trickey and C. S. Miner. 1,665,235; Apr. 10.
Resins, Making furfural. J. P. Trickey and C. S. Miner. 1,665,233–4; Apr. 10.
Ring or similar article of manufacture. J. J. White. Des. 74,904–9; Apr. 10.
Road scarifier. D. V. Ramazzotti. 1,665,277; Apr. 10.
Roaster: *See*—
Corn roaster.
Roaster and mixer, Combination. A. E. Fredrickson. 1,665,778; Apr. 10.
Robber trap. E. M. Rocha. 1,665,982; Apr. 10.
Rod: *See*—
Gun-cleaning rod.
Roll for cane mills, crushers, and the like. A. de la Hisba and E. Garcia. 1,666,055; Apr. 10.
Roller support. W. K. Liggett. 1,665,418; Apr. 10.
Rolling machine. J. M. Barr. 1,665,522; Apr. 10.
Roofing. O. A. Heppes. 1,666,046; Apr. 10.

Roost, Poultry. I. C. White. 1,665,290; Apr. 10.
Rubber and other thermoplastic substances, Producing articles from. A. T. Gustafson. 1,665,855; Apr. 10.
Rubber articles, Method of and apparatus for vulcanizing. L. A. Laursen. 1,665,312; Apr. 10.
Rubber articles, Vulcanizing method and apparatus for. L. A. Laursen. 1,665,311; Apr. 10.
Sanding, scouring, and buffing machine. L. L. Hartwell. 1,665,589; Apr. 10.
Sash stop and pulley guard. J. P. Glaser, L. F. Julien, and H. W. Whitten. 1,665,697; Apr. 10.
Saw, Coping. F. P. Maxson. 1,665,817; Apr. 10.
Saxophone cord. A. S. Lang. 1,665,745; Apr. 10.
Scaffold, Window. N. Stramaglia. 1,665,991; Apr. 10.
Scale with micrometer mechanism, Azimuth. T. A. Conlon. 1,665,656; Apr. 10.
Scouring machine for washing fabrics of wool and their mixtures. F. C. Planell. 1,665,977; Apr. 10.
Screen. F. J. Plym. 1,665,475; Apr. 10.
Screens, Guide construction for. H. Dixson. 1,665,775; Apr. 10.
Screw driver. W. D. Weaver. 1,665,240; Apr. 10.
Screw press. R. Craig. 1,665,202; Apr. 10.
Scroll support, Detachable. L. E. Myers. 1,665,272; Apr. 10.
Sealing mechanism for window frames and sashes. H. E. Campbell. 1,666,043; Apr. 10.
Searchlight and mounting therefor, Portable. V. V. Veenschoten. 1,665,803; Apr. 10.
Seat back. F. H. Gibbs. 1,665,352; Apr. 10.
Seat frame. F. H. Gibbs. 1,665,351; Apr. 10.
Separator: *See*—
Battery separator. Grain separator.
Disk separator. Milk and cream separator.
Separator and making the same. W. S. Gould and W. B. Osborne. 1,666,007; Apr. 10.
Serving food and drink. M. S. Weaver. 1,665,289; Apr. 10.
Shade-cord holder. W. J. Foster. 1,665,953; Apr. 10.
Shade, Lamp. E. B. Wilson. 1,665,617; Apr. 10.
Shade-supporting bracket. J. L. Montgomery. 1,665,929; Apr. 10.
Shaft coupling. L. Rieger. 1,665,895; Apr. 10.
Shaping device. L. Wetmore. 1,665,870; Apr. 10.
Shaping machine having constant power traverse. W. F. Zimmermann. 1,665,398; Apr. 10.
Sharpener, Harrow-disk. T. Fox. 1,665,954; Apr. 10.
Shearing machine, Fur-. M. S. Newman. 1,665,217; Apr. 10.
Sheet-feeding mechanisms, Air-control device for air-operated. C. W. Tremper. 1,665,723; Apr. 10.
Shingle and shingle construction. G. E. Conway. 1,665,774; Apr. 10.
Shingle, Composition. H. A. Garber. 1,665,450; Apr. 10.
Shingle, Self-spacing. C. W. Mortimer. 1,665,601; Apr. 10.
Shingles, Cutting. C. W. Mortimer. 1,665,600; Apr. 10.
Shockers, Swinging carrier for corn. F. T. Bookmyer. 1,665,767; Apr. 10.
Shoe, Arch-supporting. J. Jones. 1,665,741; Apr. 10.
Shoe or boot. E. H. Wiel. 1,665,763; Apr. 10.
Shoes, Method of and machine for attaching counters to turn. M. L. Dodge. 1,665,582; Apr. 10.
Shovel: *See*—
Power shovel.
Shuttle. E. C. Richard and H. Gill. 1,665,221; Apr. 10.
Shuttle box. W. S. Wells. 1,665,572; Apr. 10.
Sifter, Flour. A. Gschwindt. 1,665,454; Apr. 10.
Sign plate. C. H. Orr. Des. 74,895; Apr. 10.
Signal: *See*—
Automobile signal. Traffic signal.
Crossing signal. Vehicle signal.
Signal. F. M. Crystler. 1,666,003; Apr. 10.
Signaling system. F. J. Singer. 1,665,283; Apr. 10.
Signaling systems, Arrangement of carrier channels in multiplex. W. B. Nottingham. 1,665,673; Apr. 10.
Silk filaments by drawing, Producing artificial-. K. Grunert. 1,665,453; Apr. 10.
Silk, Production of artificial. W. H. Glover and C. F. Topham. 1,665,958; Apr. 10.
Silica gels and making the same. H. N. Holmes and J. A. Anderson. 1,665,264; Apr. 10.
Sink-head top. M. P. Trembour. 1,665,515; Apr. 10.
Skate wheel. H. Casler. 1,665,874; Apr. 10.
Ski attachment. C. Dumais. 1,665,537; Apr. 10.
Slitting roll of machines for forming expanded metal. H. M. Gersman and W. H. Klocke. 1,665,349; Apr. 10.
Slub catcher or yarn cleaner. E. R. Swanson. 1,665,287; Apr. 10.
Slug-casting machines, Quad block for. A. Archer. 1,665,248; Apr. 10.
Snow, Apparatus for the removal of. R. P. and S. W. McClave. 1,665,503; Apr. 10.
Snowplow. C. W. Clark. 1,665,733; Apr. 10.
Snow removal apparatus. E. B. Cadwell. 1,665,685; Apr. 10.
Socket, Adjustable candelabrum. E. H. Freeman. 1,665,779; Apr. 10.
Socket, Electric. E. H. Freeman. 1,665,495; Apr. 10.
Sorting machine. W. W. Lasker and J. Mueller. 1,665,595; Apr. 10.
Sound-neutralizing ventilator. A. M. Kennedy. 1,665,211; Apr. 10.
Sound-projecting apparatus. E. Grissinger. 1,666,057; Apr. 10.
Sound projector. E. Grissinger. 1,665,058–9; Apr. 10.
Sound-reproducing device, Magnetic. Z. Jeffries. 1,665,740; Apr. 10.
Spark arrester for cupolas or the like. P. Pritchard. 1,665,754; Apr. 10.
Spectacle temple. J. A. Sweeney. 1,665,940; Apr. 10.
Speed-regulator system. J. H. Ashbaugh. 1,665,901; Apr. 10.
Spinning and twisting frames, Device relating to ring. R. Setzer. 1,665,422; Apr. 10.
Spinning, doubling, and like machines, Doffing mechanism for cap. A. and J. Stell and H. Welch. 1,665,720; Apr. 10.

Spool carrier for plaiting, knotwork, bobbin, and lace-making machines. A. Hombrecher. 1,665,783; Apr. 10.
Spoon or similar article. G. N. Allen. Des. 74,860; Apr. 10.
Spoon or similar article. E. N. Cornell. Des. 74,863; Apr. 10.
Spoon or similar article. H. Hebbard. Des. 74,884; Apr. 10.
Spoon or similar article. S. V. James. Des. 74,887; Apr. 10.
Spraying apparatus. C. G. Shields. 1,665,224; Apr. 10.
Spring: *See*—
Temperature-compensating spring.
Spring collet chuck. E. F. Atkins. 1,665,250; Apr. 10.
Spring pad and making the same, Welded. C. E. Waream. 1,665,762; Apr. 10.
Spring structure. W. A. Falla. 1,665,539; Apr. 10.
Spring wheel. F. W. Montgomery. 1,665,558; Apr. 10.
Sprinkler. J. H. Keys. 1,665,371; Apr. 10.
Sprinkler systems, Signal-alarm device for. J. G. Nolen. 1,665,561; Apr. 10.
Square, Leveling. W. Midgley. 1,665,504; Apr. 10.
Staff and mounting therefor. W. A. Davis. 1,665,535; Apr. 10.
Stake retainer or the like. M. E. Moore. Des. 74,892; Apr. 10.
Stamping device. A. J. Marks. 1,665,597; Apr. 10.
Stamping device. D. B. Miller. 1,665,467; Apr. 10.
Stand: *See*—
Display stand.
Stand for aquarium or the like. B. Tauman. Des. 74,902; Apr. 10.
Starter for electric motors. W. C. O'Brien. 1,665,562; Apr. 10.
Steam boiler, Automatic electric. O. A. Sandborgh. 1,665,793; Apr. 10.
Steam-boiler furnace. W. A. Gilchrist. 1,665,923; Apr. 10.
Steering mechanism. C. R. Short. 1,665,282; Apr. 10.
Steering wheel. A. L. Warmington. 1,665,337; Apr. 10.
Stencil sheets, Manufacture of. A. B. Davis. 1,665,580; Apr. 10.
Sterilizing bearings for shafting. W. H. Jackson. 1,666,013; Apr. 10.
Stock-feed stop, Positive. J. Karmazin. 1,665,813; Apr. 10.
Stocking. O. F. Boehme. 1,665,946; Apr. 10.
Stocking protector. B. B. Lininger. 1,666,017; Apr. 10.
Stoker mechanism. A. E. Weingartner. 1,665,043; Apr. 10.
Storage battery. P. E. Norris. 1,665,603; Apr. 10.
Stove construction. A. H. Tinnerman. 1,665,757; Apr. 10.
Stove, Gas. A. J. Reedy. Des. 74,897; Apr. 10.
Strainer. W. M. Dillon. 1,665,494; Apr. 10.
Strawberry top and runner cutter. J. Bechthold. 1,665,998; Apr. 10.
Stress breaker. N. A. Oscher. 1,665,975; Apr. 10.
Structure, Fabric. E. L. Benedict. 1,665,433; Apr. 10.
Sucker-rod elevator. E. E. Greve. 1,665,259; Apr. 10.
Switch: *See*—
Quick-make and quick-break switch.
Switch mechanism. W. S. Anderson. 1,665,429; Apr. 10.
Switching-cord reel, Automatic. J. J. Gough. 1,665,737; Apr. 10.
System of distribution. D. C. Prince. 1,665,893; Apr. 10.
Table: *See*—
Dry separating table. Extension table.
Tabulating machines, Feeding mechanism for. J. Powers. 1,665,218; Apr. 10.
Talking machine, Electromagnetic. W. Hornauer. 1,665,784; Apr. 10.
Talking machine, Portable cabinet. H. W. K. de Brey. 1,666,054; Apr. 10.
Tank-car-dome closure. R. W. Joy. 1,665,368; Apr. 10.
Telegraph printer. H. L. Krum. 1,665,594; Apr. 10.
Telegraph system, Grounded duplex. S. I. Cory. 1,665,296–7; Apr. 10.
Telephone system. C. E. Lomax. 1,665,708; Apr. 10.
Telephone system. M. B. Stazak. 1,665,231; Apr. 10.
Telephone system. W. Whitney, Incorporated. 1,665,338; Apr. 10.
Telephone system. J. Wicks. 1,665,489; Apr. 10.
Telephone system. T. Zuschlag. 1,665,683; Apr. 10.
Telephone system, Automatic. D. R. Middleton. 1,665,466; Apr. 10.
Telephone system, Automatic switchboard. L. L. E. Chauveau. 1,665,773; Apr. 10.
Telephone system, Carrier-wave. C. A. Boddie. 1,665,904; Apr. 10.
Telephone system, Multioffice. M. L. Nelson. 1,665,273; Apr. 10.
Temperature-compensating spring. J. Patrick. 1,665,322; Apr. 10.
Tennis-racket carrier. O. E. Vaughan. 1,665,900; Apr. 10.
Tennis racket, Restretchable. H. May. 1,665,598; Apr. 10.
Textile fabric. G. F. Erhard. Des. 74,876; Apr. 10.
Thermostat. V. A. Boker. 1,665,341; Apr. 10.
Thermostat. L. W. Schnepp. 1,665,719; Apr. 10.
Thermostatic brake. F. N. Connet. 1,665,201; Apr. 10.
Threads, Device for singeing. A. Mettler. 1,665,970; Apr. 10.
Ticket holder. M. H. A. Duncan. 1,666,006; Apr. 10.
Tie holder. R. H. Ridgeway. 1,665,477; Apr. 10.
Tiering machine. B. Stockfleth and F. W. Burger. 1,665,680; Apr. 10.
Timing apparatus. P. J. Walsh. 1,665,804; Apr. 10.
Tire beads, Method and apparatus for the manufacture of. S. W. Alderfer. 1,666,038; Apr. 10.
Tire boot. M. P. Cole. 1,666,002; Apr. 10.
Tire boot. M. O. Haney. 1,666,009; Apr. 10.
Tire carrier. E. A. Walters. 1,665,647; Apr. 10.
Tire, Vehicle. D. N. Booth. 1,665,840; Apr. 10.
Tires, Holder for. F. A. Lind. 1,665,887; Apr. 10.
Toaster, Bread. T. C. Forbes. 1,665,735; Apr. 10.
Tongs, Passing or back-up. B. P. Hoffman. 1,665,301; Apr. 10.
Tool, Fence. K. J. Vaught. 1,665,760; Apr. 10.
Tool holder and other receptacle for use on motor vehicles. H. B. Sankey. 1,665,642; Apr. 10.
Tool, Marking. F. Bittner. 1,665,400; Apr. 10.
Tool, Razor-strop-dressing. J. G. Dick. 1,665,658; Apr. 10.
Tool, Rivet-finishing. B. Neill. 1,665,751; Apr. 10.
Tools, Combination holder and guard for. F. Goertz and W. C. Rothe. 1,665,256; Apr. 10.
Tools, Guide for broaching. C. C. Hansen. 1,665,496; Apr. 10.
Tooth and making same, Artificial molar. A. Gysi. 1,665,357; Apr. 10.
Torsion meter. S. Shimizu. 1,665,822; Apr. 10.
Towel dispenser. J. O. Hunt. 1,665,628; Apr. 10.
Toy, Mechanical. J. J. Becker. 1,665,578; Apr. 10.
Toy train coupling. F. S. Upham. 1,665,758; Apr. 10.
Toy, Wheeled. J. Ekstein. Des. 74,875; Apr. 10.
Toy, Wheeled. L. E. Myers, A. C. Carlson, and C. S. Bates. 1,665,469; Apr. 10.
Track guard rail. J. V. Wescott. 1,665,242; Apr. 10.
Traction device. S. G. Scholz. 1,665,478; Apr. 10.
Traction wheel. W. E. Wine. 1,666,036; Apr. 10.
Traction wheel. W. E. Wine and J. W. Promenschenkel. 1,666,037; Apr. 10.
Tractor, Shop. F. W. Burger and B. Stockfleth. 1,665,684; Apr. 10.
Traffic-controlling apparatus, Railway-. B. R. Padmore. 1,665,860; Apr. 10.
Traffic signal. F. Buchanan. 1,666,051; Apr. 10.
Traffic signal, Variable. R. O. Nelson. 1,665,560; Apr. 10.
Transfer system for heavy metal plates. C. L. Huston. 1,665,209; Apr. 10.
Translating apparatus, Electrical. F. N. Waterman. 1,665,571; Apr. 10.
Transmission. L. E. Scaggs. 1,665,984; Apr. 16.
Transmission mechanism, Hydraulic. M. A. Knapp. 1,665,743; Apr. 10.
Transmission system, Electrical. J. C. Needham. 1,665,857; Apr. 10.
Transportation system. H. E. Taylor. 1,665,483; Apr. 10.
Transporting device for keyed instruments. J. Zumbühl. 1,666,025; Apr. 10.
Trap: *See*—
Exhaust trap. Robber trap.
Mouse and rat trap.
Tray, Ice. A. Hansson. 1,665,456; Apr. 10.
Tray, Sectional impression. D. Baratt. 1,665,293; Apr. 10.
Trimmer: *See*—
Post-base trimmer.
Trousers. A. S. Lichten, A. Koufman, and W. Shulik. 1,665,855–6; Apr. 10.
Truck construction. Booster motor-. H. S. Vincent. 1,665,335; Apr. 10.
Truck construction, Car-. J. C. Larsen. 1,665,417; Apr. 10.
Truck construction, Six-wheel car-. G. T. Johnson. 1,665,414; Apr. 10.
Truck construction, Six-Wheel car-. J. C. Larsen and G. L. Orr. 1,665,416; Apr. 10.
Trunk handle. M. Greenberg. 1,665,353; Apr. 10.
Trunk lock. J. Ritter, jr., and M. Rasmussen. 1,665,379; Apr. 10.
Trunk system, Intercepting. M. Schwartz. 1,665,479; Apr. 10.
Trunk, Wardrobe. E. A. Hoff and W. C. Sanford. 1,666,011; Apr. 10.
Tube: *See*—
X-ray tube.
Tubing and making the same, Electric butt-welded. J. W. Harris. 1,665,851; Apr. 10.
Tubular frame structure. H. F. Frease. 1,665,921; Apr. 10.
Turbine, Water. A. Storbacka. 1,665,329; Apr. 10.
Typewriting machine. G. G. Going. 1,665,736; Apr. 10.
Typewriting machine. J. A. B. Smith. 1,665,285; Apr. 10.
Typographical machine. A. W. F. Guest. 1,665,261; Apr. 10.
Typographical machine. D. S. Kennedy. 1,665,268; Apr. 10.
Umbrella and cane rack. I. Hirtz and V. Oliveri. 1,665,590; Apr. 10.

Undergarment, Union. J. A. Morton. 1,665,505; Apr. 10.
Universal joint. A. H. Rzeppa. 1,665,280; Apr. 10.
Universal joint. C. W. Weiss. 1,665,241; Apr. 10.
Upholstery-filling device. C. F. Codn. 1,665,907; Apr. 10.
Urinals, Painting. J. Oesch. 1,665,859; Apr. 10.
Vacuum cleaners, lamps, and the like, Cord holder for. H. O. Briggs. 1,665,200; Apr. 10.
Valve. R. E. Schieber. 1,665,934; Apr. 10.
Valve, Air-brake. S. J. Evans. 1,665,586; Apr. 10.
Valve, Air-brake-release. R. O. Durst. 1,665,913; Apr. 10.
Valve construction. L. Bloch. 1,665,436; Apr. 10.
Valve, Flush. W. C. Wright. 1,665,832; Apr. 10.
Valve for wireless telegraphy or telephony. J. A. M. Hawadler. 1,666,010; Apr. 10.
Valve, Locomotive gear. J. Kupka. 1,665,966; Apr. 10.
Valve, Safety. W. Hargreaves. 1,665,850; Apr. 10.
Valve, Safety. V. Willoughby. 1,665,391; Apr. 10.
Valve, Safety. V. Willoughby. 1,665,394; Apr. 10.
Valve, Thermionic. H. S. de A. Donisthorpe. 1,665,626; Apr. 10.
Vase. R. Haley. Des. 74,882; Apr. 10.
Vehicle brake. R. G. Ellis. 1,665,538; Apr. 10.
Vehicle brake, Motor-. A. Moorhouse. 1,665,376; Apr. 10.
Vehicle-driving mechanism, Motor-. E. W. Templin. 1,665,865; Apr. 10.
Vehicle signal. A. J. Massey. 1,665,315; Apr. 10.
Vehicle support. J. H. Valicau. 1,665,646; Apr. 10.
Vehicle wheel. W. N. Booth. 1,665,437; Apr. 10.
Vehicle wheel. J. E. Hale. 1,665,880; Apr. 10.
Vehicle wheel. N. L. Olson. 1,665,471; Apr. 10.
Vehicles, Parking-brake attachment for motor. 1,665,415; Apr. 10.
Vehicles, Rear-end assembly for power-driven. E. F. Norelius. 1,665,470; Apr. 10.
Vehicles, Securing device for. J. H. Rosencrans. Re16,927; Apr. 10.
Vending machine. W. P. Smith. 1,665,989; Apr. 10.
Vending machine casing. J. W. Esworthy. Des. 74,877; Apr. 10.
Vessel, Aerial. O. L. Daily. 1,665,533; Apr. 10.
Vessels, Bail ear for. R. P. White. 1,665,829; Apr. 10.
Violin, Horn-resonator. G. D. Bothwell. 1,665,402; Apr. 10.
Visor attachment for hats and caps. E. E. Thomas. 1,665,513; Apr. 10.
Voltage-regulator system, Compensated. R. D. Evans and H. K. Seis. 1,665,918; Apr. 10.
Vulcanization. W. A. Brubaker. 1,665,440; Apr. 10.
Vulcanizing rubber. L. A. Laursen. 1,665,309; Apr. 10.
Vulcanizing rubber articles. Process and apparatus for. L. A. Laursen. 1,665,310; Apr. 10.
Vulcanizing rubber tubes and rubber tube produced thereby. L. A. Laursen. 1,665,308; Apr. 10.
Washboiler. T. W. Stafford. 1,665,755; Apr. 10.
Washing machine. B. E. Getz. 1,665,922; Apr. 10.
Washing machine. G. C. Graham and R. S. Robe. 1,665,959; Apr. 10.
Washing machine. H. C. Hirschy. 1,665,262; Apr. 10.
Washing machine, Can-. I. H. Kendall. 1,665,927; Apr. 10.
Water heater. J. G. Chambers and B. C. Salamis. 1,665,949; Apr. 10.
Water heater. L. E. Johnson. 1,665,210; Apr. 10.
Water heater. W. Pfeil and W. Kolmeier. 1,665,506; Apr. 10.
Water heater, Electrical. H. E. Dineson. 1,665,348; Apr. 10.
Water-tube boiler. W. K. Hopf. 1,656,664; Apr. 10.
Wave motor. A. J. Adams. 1,665,198; Apr. 10.
Waving hair, Apparatus for. C. S. Ackley. 1,665,619; Apr. 10.
Weather strip. C. E. Reyburn. 1,665,326; Apr. 10.
Weather strip, Automatic. F. Shersmith. 1,665,678; Apr. 10.
Weeder. C. L. Key. 1,665,464; Apr. 10.
Weighing apparatus. Automatic or semiautomatic. W. Timson. 1,665,722; Apr. 10.
Welded seams, Reenforcement for. C. G. Hawley. 1,665,360; Apr. 10.
Welding. R. Applegate. 1,666,026; Apr. 10.
Welding, Electric. J. M. Weed. 1,665,869; Apr. 10.
Welding machine. A. Mauser. 1,665,815; Apr. 10.
Welding, Overhead. O. H. Eschholz. 1,665,916; Apr. 10.
Welding tubes to plates or cylinders. H. S. Holmes. 1,665,461; Apr. 10.
Well-casing shoe. J. Von Gunten. 1,665,569; Apr. 10.
Well-cleaning device. E. E. Campbell. 1,666,000; Apr. 10.
Wheel: *See*—
Metal wheel. Steering wheel.
Skate wheel. Traction wheel.
Spring wheel. Vehicle wheel.
Wheel-pitch gauge. F. R. Hartsock. 1,665,544; Apr. 10.
Wheel puller. G. Keil. 1,665,552; Apr. 10.
Wheel structure, Colter-. F. J. Glisky. 1,665,957; Apr. 10.
Wheels, Misalignment indicator for. H. A. Buckert and E. K. Hall. 1,665,252; Apr. 10.
Whiffletree. J. E. Williams. 1,665,244; Apr. 10.
Windmill. L. S. Stripling. 1,665,645; Apr. 10.
Window. G. I. Barclay. 1,665,431–2; Apr. 10.
Window cleaner. K. Horibata. 1,666,060; Apr. 10.
Window fixtures, Mechanism for attaching. A. G. Ilich. 1,665,785; Apr. 10.
Window-frame construction. B. F. Kehrer and E. H. Brett. 1,665,702; Apr. 10.
Windshield cleaner. F. G. and W. M. Folberth. 1,665,204; Apr. 10.
Windshield cleaner. V. Scalzo. 1,665,794; Apr. 10.
Windshield wiper, Electric. L. W. Waters. 1,665,570; Apr. 10.
Wire-construction and attaching clip for same, Border. F. P. D'Arcy. 1,665,534; Apr. 10.
Wire splicer. A. J. Boehm. 1,665,525; Apr. 10.
Wrench. A. and A. Albertini. 1,665,944; Apr. 10.
Wrench. E. E. Thomas. 1,665,511; Apr. 10.
Wrench for vertical twister travelers. J. E. Hull. 1,665,926; Apr. 10.
Wringer: *See*—
Cabinet wringer. Enclosable or folding wringer.
Wringer-control mechanism. H. C. Hirschy and R. C. Hitchcock. 1,665,263; Apr. 10.
X-ray cooling system. J. B. Wantz. 1,665,486; Apr. 10.
X-ray tube. J. W. Marden. 1,665,637; Apr. 10.
X-ray tube. M. Morrison. 1,665,638; Apr. 10.

CLASSIFICATION OF PATENTS

ISSUED APRIL 10, 1928.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 8. 2: 1,666,035
19: 1,665,582
47: 1,665,669
49. 4: R. 16,925
2— 9: 1,665,386
10: 1,665,513
41: 1,665,502
62: 1,665,507
78: 1,665,232
1,665,505
146: 1,665,712
154: 1,665,509
169: 1,666,023
176: 1,665,750
234: 1,665,855
1,665,856
243: 1,665,968
4— 53: 1,665,777
173: 1,665,215
5— 168: 1,665,668
8— 5: 1,666,031
19: 1,665,624
1,665,977
1,666,029
9— 26: 1,665,914
10— 72: 1,665,474
90: 1,665,707
100: 1,665,973
13— 209: 1,665,727

Flour, Wheat. Bay City Milling Co. 241,150; Apr. 17; Serial No. 256,041; published Feb. 7, 1928.
Flour, Wheat. L. Blaustein. 241,089; Apr. 17; Serial No. 258,715; published Feb. 7, 1928.
Flour, Wheat. Blish Milling Company. 241,159; Apr. 17; Serial No. 250,963; published Feb. 7, 1928.
Flour, Wheat. Durst Milling Company. 70,342; renewed Aug. 25, 1928.
Flour, Wheat. Meyerson Brothers. 241,147; Apr. 17; Serial No. 256,531; published Feb. 7, 1928.
Flour, Wheat. Moore-Lowry Flour Mills Company. 241,120; Apr. 17; Serial No. 232,094; published Nov. 9, 1926.
Flour, Wheat. J. O. Norris. 68,917; renewed May 5, 1928.
Flours made from wheat. Western Flour Mill Company. 69,474; renewed June 16, 1928.
Food, Prepared dietary. Livermeal Corporation. 241,078; Apr. 17; Serial No. 257,737; published Feb. 7, 1928.
Food product. Trahanas Co. 241,114; Apr. 17; Serial No. 240,575; published Feb. 7, 1928.
Food product in powdered form, Vegetable. J. J. Dunn. 241,188; Apr. 17; Serial No. 257,791; published Feb. 7, 1928.
Foods, Ultra-violet-ray-processed. V. Steves. 241,146; Apr. 17; Serial No. 256,549; published Feb. 7, 1928.
Fruits and vegetables, tapioca, cornstarch, extract of vanilla, Canned. H. Kussy. 70,415; renewed Aug. 25, 1928.
Hams, shoulders, boneless butts, etc. John Morrell & Co. 241,193; Apr. 17; Serial No. 257,584; published Feb. 7, 1928.
Meats and compounds. Swift and Company. 31,578; renewed May 24, 1928.
Mincemeat. Whipple Co-Operative Company. 57,618; renewed Nov. 13, 1926.
Mushrooms, mushroom spawn, and preserved mushrooms, Fresh. L. F. Lambert. 241,247; Apr. 17.
Mustard. Stickney & Poor Spice Co. 241,117; Apr. 17; Serial No. 238,817; published Feb. 7, 1928.
Olives, salad dressing, rice, macaroni, etc. Scoville, Brown & Company. 241,059; Apr. 17; Serial No. 249,931; published Jan. 24, 1928.
Pears, Fresh. G. C. Payne. 241,049; Apr. 17; Serial No. 258,589; published Jan. 31, 1928.
Pies. M. D. Turner. 241,084; Apr. 17; Serial No. 258,243; published Feb. 7, 1928.
Pickles. Maconochie Bros. Ltd. 69,026; renewed May 12, 1928.
Pickles, noodles, fruit preserves, cake, and pastries. Regnatz Inc. 241,104; Apr. 17; Serial No. 250,712; published Feb. 7, 1928.
Raisins and dried fruit. W. Pike. 68,785; renewed Apr. 28, 1928.
Syrup and extract, Malt. S. B. Perloff. 241,111; Apr. 17; Serial No. 245,579; published Jan. 31, 1928.
Syrup for food purposes, Malt. Fidelity Hop & Malt Corporation. 241,143; Apr. 17; Serial No. 258,808; published Feb. 7, 1928.
Syrup, Malt. American Malt Company. 241,088; Apr. 17; Serial No. 258,712; published Feb. 7, 1928.
Syrup, Malt and hop. Frank C. Weber & Company. 241,036; Apr. 17; Serial No. 256,025; published Jan. 31, 1928.
Vegetables, Compounds for use in pickling. H. D. Kuhn. 241,110; Apr. 17; Serial No. 245,846; published Feb. 7, 1928.

CLASS 47.

Wine, Port. J. R. Parkington & Co. 241,056; Apr. 17; Serial No. 247,387; published Feb. 7, 1928.
Wines, Claret, Burgundy, and sauterne. J. Calvet & Cie. S. A. R. L. 241,027; Apr. 17; Serial No. 258,064; published Feb. 7, 1928.
Wines, Port and cherry. J. R. Parkington & Co. 241,055; Apr. 17; Serial No. 247,386; published Feb 7, 1928.

CLASS 48.

Beer, Lager. Aktienbrauerei zum Löwenbräu in München. 30,527; renewed Aug. 31, 1927.

CLASS 49.

Vermuth. Noilly Prat & Cie. 241,048; Apr. 17; Serial No. 258,535; published Jan 31, 1928.
Whisky. Bernard & Co. 31,559; renewed May 17, 1928.

CLASS 50.

Textile material with flexible waterproof coating. Keratol Company. 31,907; renewed Aug. 30, 1928.

ALPHABETICAL LIST OF LABELS.

All O. K. For Vegetables. A. O. Kolberg. 33,847; Apr. 17.
Aunt Edna's Chateau Chocolates. For Candy. Milwaukee Paper Box Co. 33,854; Apr. 17.
Aunt Edna's Gay Paree Chocolates. For Candy. Milwaukee Paper Box Co. 33,855; Apr. 17.
Aunt Edna's Seaside Chocolates. For Candy. Milwaukee Paper Box Co. 33,856; Apr. 17.
Carnation 'From Contented Cows.' For Evaporated Milk. Carnation Milk Products Co. 33,840; Apr. 17.
Cough-Nix. For Cough Medicine. M. Reisner. 33,863; Apr. 17.
Heide's Candies of Quality 10-G-3. For Candy. Henry Heide, Inc. 33,845; Apr. 17.
Hind's Royal. For Canned Figs. Land Owners Packing Co. 33,848; Apr. 17.
Jacobs Remedy. For Remedy for Coughs and Colds. W. W. Jacobs. 33,846; Apr. 17.
Junoy, Fragrant Depilatory. For Depilatory. H. M. Noyes. 33,858; Apr. 17.
Korn Kure. For Compounds for Treating Corns. Stevens-Wiley Mfg., Co. 33,866; Apr. 17.
Lax-Kaps. For Laxative Capsules. D. B. Long. 33,852; Apr. 17.
Lewis' Single Binder, Straight 5¢ Cigar. For Cigars. Frank P. Lewis Cigar Co. 33,849; Apr. 17.
Mi-Own. For Coffee. S. L. Pfefferkorn. 33,859; Apr. 17.
Miss America Human Hair Net. For Hair Nets. H. A. Loeb & Co. 33,850; Apr. 17.
Mur-Cop. For Paint. Westcott, Slade & Balcom Company. 33,872; Apr. 17.
Orientals. For Candy. Beckett Candy Co. 33,839; Apr. 17.
Radio Questionaire. For an Educational and Amusement Device. Radio Questionaire Corp. 33,860; Apr. 17.
Rath's Black Hawk Pork Dainties. For Smoked Butts. Rath Packing Company. 33,861; Apr. 17.

Romance. For Cigarettes. Delux Tobacco Company. 33,841; Apr. 17.
Sackett Smoking Tobacco De-Nicotined. For Tobacco Products for Smoking. H. Sackett. 33,864; Apr. 17.
Shultz Animal Compound. For Lure for Foxes, Wolves, and Coyotes. National Fox & Wolf Scent Supply Co. 33,857; Apr. 17.
Silva-Bros. For Grape Syrup. Silva Bros. 33,865; Apr. 17.
Super Service. For Powdered Graphite. Super Service Corporation. 33,867; Apr. 17.
Super Service. For Tire Talc. Super Service Corporation. 33,868; Apr. 17.
Super Service. For Flake Graphite. Super Service Corporation. 33,869; Apr. 17.

Super Service. For Touch-Up Enamel. Super Service Corporation. 33,870; Apr. 17.
Super Service. For Tire Plaster Patches. Super Service Corporation. 33,871; Apr. 17.
Thunderbolt. For Tire Patches. F. J. Hagerling. 33,842–4; Apr. 17.
Toni-Kaps. For Tonic Capsules. D. B. Long. 33,851; Apr. 17.
White Cap Marshmallows. For Candy. Alberta Candy Company. 33,838; Apr. 17.
Zion Ocean-Flyer Pops. For Candy. Milwaukee Paper Box Co. 33,853; Apr. 17.

ALPHABETICAL LIST OF PRINTS.

Dixie King. For Mattresses. Cotton Belt Manufacturing Company. 10,779; Apr. 17.
First Pictures of the New Ford Car. For Automobiles. Ford Motor Company. 10,785; Apr. 17.
Greater Even Than Its Beauty is the Performance of the New Ford Car. For Automobiles. Ford Motor Company. 10,780; Apr. 17.
Important Facts About the New Ford Car. For Automobiles. Ford Motor Company. 10,782; Apr. 17.
In All History Never Before Such Good Bread. For Bread. R. L. Whipple. 10,787; Apr. 17.
More Than a New Automobile More Than a New Model. For Automobiles. Ford Motor Company. 10,784; Apr. 17.
New Ford Car Exceeds All Expectations. For Automobiles. Ford Motor Company. 10,783; Apr. 17.
Strength. For Vehicle Bumpers. C. G. Spring & Bumper Company. 10,777; Apr. 17.
Suggestions. For Soda-Fountain Supplies. J. Hungerford Smith Co. 10,786; Apr. 17.
The Day You Discover You Have A Square Face. For Venetian Toilet Preparations. Arden Chemical Co. 10,776; Apr. 17.
The New Ford Car—An Announcement of Unusual Importance to Every Automobile Owner. For Automobiles. Ford Motor Company. 10,781; Apr. 17.
They Always Hold. For Clamp Nails. Clamp Nail Company. 10,778; Apr. 17.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 17TH DAY OF APRIL, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Adam, Matthew A. (See Baillie, R., and Adam.)
Affel, Herman A., Maplewood, N. J., assignor to American Telephone and Telegraph Company. System for binaural transmission of signals. 1,666,158; Apr. 17.
Airship Guarantee Company, Limited. (See Wallis, Barnes N., assignor.)
Aldrich, Alonzo, and E. E. Berry, assignors to Beloit Iron Works, Beloit, Wis. Steam fitting. 1,666,637; Apr. 17.
Alexander, Earl C., assignor to Massey Concrete Products Corporation, Chicago, Ill. Cribbing. 1,666,250; Apr. 17.
Alexander, Harry, Allentown, Pa. Cigarette. 1,666,062; Apr. 17.
Alexanian, Mihran H., Coytesville, N. J. Platen roller for typewriters. 1,666,403; Apr. 17.
Allen, Robert C., Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thrust bearing. 1,666,521; Apr. 17.
Allison, Murrell G. (See Roos, C. K., and Allison.)
Alspaugh, James S., Columbus, Ohio. Speed-equalizing means for motor-vehicle transmission shafts. 1,666,766; Apr. 17.
Ament, Lucy C., New York, N. Y. Liquid-dispensing pump. 1,666,064; Apr. 17.
American Aluminum Ware Company. (See Brucker, Henry, assignor.)
American Cyanamid Company. (See Buchanan, G. H., and Osborne, assignors.)
American Meter Company. (See Stockton, Wholston V., jr., assignor.)
American Mine Door Co., The. (See Gurney, Albert J., assignor.)
American Optical Company. (See Hill, Harry W., assignor.)
American Optical Company. (See Maynard, Albert E., assignor.)
American Pulverizer Company. (See Elzemeyer, Ernst H., assignor.)
American Sales Book Company. (See Phillips, Arthur H., assignor.)
American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)
American Telephone and Telegraph Company. (See Toomey, John F., assignor.)
Anderson, Adolph B. (See Gallet, M., and Anderson.)
Anderson, Arthur N. (See Anderson, Edward P. and A. N.)
Anderson, Edward P. and A. N., Tumwater, Wash. Combined ironing board and table. 1,666,548; Apr. 17.
Anderson, James, Elizabeth, N. J. Clamp. 1,666,079; Apr. 17.
Anderson, Olaf R., Pasadena, Calif. Magnetic motor. 1,666,065; Apr. 17.
Andis, Mathew, Racine, Wis. Electric motor. 1,666,588; Apr. 17.
Andrews, Chester E., Carnegie, assignor to The Selden Company, Pittsburgh, Pa. Temperature-regulating system. 1,666,251; Apr. 17.
Andrews, Edward F., Chicago, Ill. Volume-control system for radioreceivers. 1,666,522; Apr. 17.
Andrews, George M., 2d. (See Peirce, J. R., 3d, and Andrews.)
Annen, James E., assignor to The National Paper Can Company, Milwaukee, Wis. Method and apparatus for making fibrous containers. 1,666,767; Apr. 17.
Appel, Venie W. (See Wood, Alexander P., assignor.)
Arca Regulators, Incorporated. (See Carlstedt, Ragnar, assignor.)
Arca Regulators, Inc. (See Söderberg, Sten E. B., assignor.)
Arlington Mills. (See Harding, Frank E., assignor.)
Armstrong, Ulysses S., New Kensington, assignor to Armstrong & White, Pittsburgh, Pa. Filing device. 1,666,229; Apr. 17.
Armstrong & White. (See Armstrong, Ulysses S., assignor.)
Arnt, Herald P., Lakewood, assignor of one-fourth to C. B. Muller, Cleveland, Ohio. Hollow-spoke end connection. 1,666,615; Apr. 17.
Ashbridge, Noel, Wanstead, England, assignor to Radio Corporation of America. Resistance coil. 1,666,066; Apr. 17.
Atlas Manufacturing Corporation. (See Witt, Murray, assignor.)
Aubrey, Andrew W., Los Angeles, Calif. Towel rack. 1,666,063; Apr. 17.
Auspitzer, Alfred J., Hamburg, Germany, assignor to Research Corporation, New York, N. Y. Agricultural implement. 1,666,841; Apr. 17.
Auto Pneumatic Action Company. (See La Joie, H. J., Urquhart, and Pokorny, assignors.)
Babbitt, Edwin V., Fairhaven, Mass. Doll. Des. 74,911; Apr. 17.
Bacon, Raymond F., et al. (See Frieden, Alexander, assignor.)
Bacso, Peter, Astoria, N. Y. Window regulator for vehicles. 1,666,481; Apr. 17.
Bailey, Richard W., Altrincham, England, assignor to Westinghouse Electric & Manufacturing Company. Treatment of steam to reduce or prevent corrosion. 1,666,523; Apr. 17.
Baillie, Robert, and M. A. Adam, London, England, said Baillie assignor to said Adam. Machine for making dry-cell elements. 1,666,067; Apr. 17.
Baker, Joseph, Sons & Perkins Company. (See Harber, Laurence S., assignor.)
Baker, Phillip, Mattapan, Mass., assignor to Paramount Bedding Machine Co., of Boston. Mattress-filling machine. 1,666,549; Apr. 17.
Baldwin, Clarence D., Bellingham, Wash. Embroidery-hoop holder. 1,666,323; Apr. 17.
Bandur, Adolph F., Berwyn, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Treating magnetizable materials. 1,666,191; Apr. 17.
Bankers Savings & Credit System Company, The. (See Baughman, O. F., and Habart, assignors.)
Bankoff, Abraham. (See Rhodes, W. A., and Bankoff.)
Bany, Herman, Scotia, N. Y., assignor to General Electric Company. System of electric distribution. 1,666,435; Apr. 17.
Barber-Colman Company. (See Colman, Howard D., assignor.)
Baril, Joseph R. (See Bohnhardt, Charles F. H., assignor.)
Barkelj, Jean A. H., Los Angeles, Calif. Internal-combustion engine. 1,666,159; Apr. 17.
Barkelj, Jean A. H., Los Angeles, Calif. Sleeve-valve internal-combustion engine. 1,666,160; Apr. 17.
Barney, Edwin E., New Rochelle, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting machine. 1,666,230; Apr. 17.
Barron, Bernard M. (See Clement, H., and Barron.)
Bartelstone, Louis, Flatbush, N. Y. Splice-laminating glass. 1,666,252; Apr. 17.
Bartlett Hayward Company, The. (See Fast, Gustave, assignor.)
Bartling, Friedrich. (See Honigmann, L., and Bartling.)
Barton, Vincent, Cadillac, Mich. Wrench. 1,666,879; Apr. 17.
Bassett, Cyrus W., Montclair, assignor to Elevator Supplies Company, Inc., Hoboken, N. J. Elevator signal system. 1,666,589; Apr. 17.
Bassick Company, The. (See Johnson, John A., assignor.)
Bauert, William H., Roseville, near Sydney, New South Wales, Australia. Foot mat and luggage and like carrier device for motor road vehicles. 1,666,364; Apr. 17.
Baughman, Orland F., and J. Habart, Lakewood, assignors to The Bankers Savings & Credit System Company, Cleveland, Ohio. Coin bank or receptacle. 1,666,524; Apr. 17.
Baum, Erich, H. Deutsch, W. O. Herrmann, and M. Mugdan, Munich, Germany, assignors to Consortium für elektrochemische Industrie G. m. b. H., Munich, Bavaria. Production of vinylacetate. 1,666,482; Apr. 17.
Bayer, Leo J., St. Louis, Mo. Soot blower for boilers. 1,666,080; Apr. 17.
Beaumont Manufacturing Company. (See Beaumont, Robert H., assignor.)
Beaumont, Robert H., Radnor, assignor to Beaumont Manufacturing Company, Philadelphia, Pa. Ash hopper for boilers. 1,666,768; Apr. 17.
Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Stereotype-plate-molding apparatus. 1,666,616; Apr. 17.
Beck, Stephen E., St. Louis, Mo. Ironing or pressing machine pad. 1,666,870; Apr. 17.
Becker, Morris. (See Goldstein, Isidore M., assignor.)
Beisel, Rex B., Garden City, and W. L. Gilmore, Mineola, N. Y., assignors to Curtiss Aeroplane & Motor Company, Inc. Airplane. 1,666,769; Apr. 17.

Bell, John E., deceased, Brooklyn; L. R. Bell, executrix, Jackson Heights, assignor to Foster Wheeler Corporation, New York, N. Y. Sectional water back. 1,666,483; Apr. 17.
Bell, Lola R., executrix. (See Bell, John E.)
Bell Telephone Laboratories, Incorporated. (See Clokey, Allison A., assignor.)
Bellar, David. (See Rhodes, W. A., and Bellar.)
Belluzzo, Giuseppe, assignor to Società Italiana Ernesto Breda, Milan, Italy. Steam turbine locomotive. 1,666,590; Apr. 17.
Beloit Iron Works. (See Aldrich, A., and Berry, assignors.)
Bendix Brake Company. (See Dodge, Adiel Y., assignor.)
Bennett, Alonzo W., New Haven, Conn. Steam turbine. 1,666,068; Apr. 17.
Bennett, Earl J., Stittville, N. Y., assignor to H. R. Tobey. Warp-knitted fabric and making same. 1,666,638; Apr. 17.
Bernhard, Richard, assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa. Thrust roller. 1,666,436; Apr. 17.
Berry, Earl E. (See Aldrich, A., and Berry.)
Bethlehem Shipbuilding Corporation, Ltd. (See Scott, George N., assignor.)
Betts, Benjamin B., St. Louis, Mo. Rail anchor. 1,666,114; Apr. 17.
Blax Flexible Shaft Co. (See Schmid, R., and Wezel, assignors.)
Biederman, William, Sesekinika, Ontario, Canada. Projecting spring trap for trapping fur-bearing animals. 1,666,728; Apr. 17.
Biek, William G., and G. D. Rice, Dowagiac, Mich. Electric fixture. 1,666,729; Apr. 17.
Bilhartz, Charles, Strasburg, France. Machine for the production of textile fabrics. 1,666,591; Apr. 17.
Birdsey, Charles R., Hinsdale, assignor to United States Gypsum Company, Chicago, Ill. Delivery guide. 1,666,161; Apr. 17.
Bixby, Walter. (See Hathaway, E. F., and Bixby.)
Björnson, Björn G., assignor to Western Electric Company, Incorporated, New York, N. Y. Repeater circuits. 1,666,676; Apr. 17.
Black, T. C. (See Splering, Charles W., assignor.)
Blake, James E., Co. (See Blake, William H., assignor.)
Blake, William H., assignor to James E. Blake Co., Attleboro, Mass. Hairbrush. 1,666,081; Apr. 17.
Blincoe, Felix H., Long Beach, assignor of one-fourth to G. M. Peterson, Los Angeles, Calif. Stem-gripping pruning shears. 1,666,253; Apr. 17.
Bliss, E. W., Company. (See Gueritey, Charles, assignor.)
Bloxham, Arthur, Montreal, Quebec, Canada. Roof flashing. 1,666,231; Apr. 17.
Boatright, Lenore, Sausalito, Calif. Radiator cap. Des. 74,912; Apr. 17.
Bodmer, Albert, Wattwil, Switzerland, assignor to Heberlein Patent Corporation, New York, N. Y. Permanent-finish vegetable material and producing same. 1,666,082; Apr. 17.
Bodmer, Albert, Wattwil, Switzerland, assignor to Heberlein Patent Corporation, New York, N. Y. Vegetable yarn and fabric with woollike effects. 1,666,083; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Body frame for lighting fixtures or similar articles. Des. 74,913; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Canopy for electric-lighting fixtures or similar articles. Des. 74,914; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Chandelier or similar article. Des. 74,915; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall bracket plate or similar article. Des. 74,916; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Chandelier or similar article. Des. 74,917; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall bracket plate or similar article. Des. 74,918; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Chandelier or similar article. Des. 74,919; Apr. 17.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall bracket plate or similar article. Des. 74,920; Apr. 17.
Bohnhardt, Charles F. H., assignor of one-half to J. R. Baril, Long Beach, Calif. Floating roof and sealing means therefor. 1,666,525; Apr. 17.
Bolens, Harry W. (See Strite, George T., assignor.)
Bolles, William B., Milwaukee, Wis. Fastening device for emergency-exit doors. 1,666,677; Apr. 17.
Bolling, John E., assignor to Drying Systems, Inc., Chicago, Ill. Thermostat. 1,666,192; Apr. 17.
Boltersdorf, Josef. (See Seybold, C., and Boltersdorf.)
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Car roof. 1,666,115;
Borkowicz, John. (See Borkowicz, William, assignor.)
Borkowicz, William, assignor of one-fourth to J. Borkowicz, Baltimore, Md. Oil burner. 1,666,069; Apr. 17.
Bostaph, Harvey P., Detroit, Mich. Thread cutter. 1,666,162; Apr. 17.
Bouillon, Constant, assignor to The Hendry Machine Company, Torrington, Conn. Clamping mechanism for machine tools. 1,666,484; Apr. 17.
Box Patents Corporation. (See Shafer, Carl R., assignor.)
Boykin, Robert O., assignor to N. R. Vail, Los Angeles, Calif. Cake former for continuous rotary filters. 1,666,279; Apr. 17.
Boynton, Sidney H., Los Angeles, Calif. Making mosaic. 1,666,232; Apr. 17.
Bradbury, Clifford C., Glencoe, Ill., assignor to Hydraulic Brake Company, Detroit, Mich. Nonexpansive hose. 1,666,365; Apr. 17.
Bradford, Charles W., Southgate, Calif. Oil radiator. 1,666,485; Apr. 17.
Bradley, William T., Linn, Mo. Sharpening apparatus. 1,666,678; Apr. 17.
Brainard, George C., J. A. Fitch, and E. E. Wolters, assignors to The General Fireproofing Company, Youngstown, Ohio. Fireproof safe construction. 1,666,486; Apr. 17.
Brandes Laboratories, Inc. (See Ray, John N., assignor.)
Brandwein, Henry G., Chicago, Ill. Mattress. 1,666,280; Apr. 17.
Brasseur, Ernest J., assignor to A. B. Dick Company, Chicago, Ill. Stencil duplicating machine. 1,666,193; Apr. 17.
Breeze, Fred, jr., Wyoming, Ohio, assignor, by mesne assignments, to The Flintkote Company, Boston, Mass. Packing asphalt. 1,666,730; Apr. 17.
Brennan, Michael J., St. Paul, Minn. Axle-generator belt remover. 1,666,592; Apr. 17.
Bridge & Beach Manufacturing Company. (See Bridge, George L., assignor.)
Bridge, George L., Clayton, assignor to Bridge & Beach Manufacturing Company, St. Louis, Mo. Combined radiating and circulating gas heater. 1,666,679; Apr. 17.
Briggs Manufacturing Company. (See Kennedy, Elmer M., assignor.)
Bright, Maurice S., Houston, Tex. Adjustable tray support. 1,666,084; Apr. 17.
Bright Star Battery Company. (See Koretzky, Harry M., assignor.)
Brockway, Carl P., assignor to Industrial Research Corporation, Toledo, Ohio. Air-cooled internal-combustion engine. 1,666,194; Apr. 17.
Brookins Manufacturing Company. (See Brookins, Walter R., assignor.)
Brookins, Walter R., assignor to Brookins Manufacturing Company, Dayton, Ohio. Liquid measure. 1,666,085; Apr. 17.
Broomhall, Harley, assignor to The Shelby Metal Products Company, Shelby, Ohio. Knob mounting. 1,666,731; Apr. 17.
Brophy, John P., Cleveland Heights, assignor to The Cleveland Automatic Machine Company, Cleveland, Ohio. Automatic stay-bolt-threading machine. 1,666,732; Apr. 17.
Brown, Francis N., jr., assignor of one-half to F. N. Brown, sr., El Paso, Tex. Casting machine. 1,666,843; Apr. 17.
Brown, Frank N., sr. (See Brown, Francis N., jr., assignor.)
Brucker, Henry, Newark, N. J., assignor to American Aluminum Ware Company. Spool. 1,666,404; Apr. 17.
Buben, William, St. Louis, Mo. Camera-holding stand. 1,666,770; Apr. 17.
Buchanan, Guy H., Westfield, and J. L. Osborne, Elizabeth, N. J., assignors to American Cyanamid Company, New York, N. Y. Manufacturing formic acid. 1,666,437; Apr. 17.
Buchheit, Albert J., et al. (See Fullenlove, McClellan C., assignor.)
Buchheit, William, et al. (See Fullenlove, McClellan C., assignor.)
Büchner, Oswald, Hongg, near Zurich, Switzerland. Daylight projecting screen. 1,666,808; Apr. 17.
Buckley, Oliver E., Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Dynamometer. 1,666,680; Apr. 17.
Budd, Edward G., Manufacturing Company. (See Kleinsmith, Frederick, assignor.)
Budd Wheel Company. (See Hunt, J. Harold, assignor.)
Budd Wheel Company. (See Tarbox, John P., assignor.)
Buhrle, Joseph H., Ruffs Dale, Pa. Toy gun. 1,666,771; Apr. 17.
Bunnell, Earl C., Stratford, Conn. Eyelash applicator. 1,666,116; Apr. 17.
Burgess, Frank, Wollaston, Mass. Adjustable self-aligning bearing. 1,666,593; Apr. 17.
Burgess, Harry A., assignor to Western Electric Company, Incorporated, New York, N. Y. Mechanical wave filter. 1,666,681; Apr. 17.
Burn, John F., London, and J. S. Lancaster, Warwick, England. Rotary mixing machine. 1,666,824; Apr. 17.
Burnham Chemical Company. (See Burnham, George B., assignor.)
Burnham, George B., assignor to Burnham Chemical Company, Reno, Nev. Washing salts. 1,666,733; Apr. 17.

Burrell, Ellis B., Baltimore, Md. Case for licenses, etc. 1,666,117; Apr. 17.
Busse, Harry H., Cleveland, Minn. Condenser assembly control. 1,666,682; Apr. 17.
Butler, Emanuel L., Detroit, Mich. Street indicator. 1,666,550; Apr. 17.
Butler, James B., and J. J. Drumm, Dublin, Irish Free State. Treating vegetable produce. 1,666,551; Apr. 17.
Butler, William J., Cranston, assignor to Henry Lederer & Bro., Inc., Providence, R. I. Cigar lighter. 1,666,809; Apr. 17.
C. G. Spring & Bumper Company, The. (See Jandus, H. S., and Van Husen, assignors.)
Cadieux, Joseph O., assignor to The Connecticut Telephone & Electric Company, Incorporated, Meriden, Conn. Hospital signal switch. 1,666,639; Apr. 17.
Caldwell, Louis P., Kansas City, Mo. Vegetable-matter drier. 1,666,617; Apr. 17.
Caldwell, Myron H., and I. Green, New York; said Green assignor to Arthur C. E. Hamilton, Mount Vernon, N. Y. Magazine pencil. 1,666,405; Apr. 17.
California Cyanide Company. (See Neuls, Joseph D., assignor.)
Calkins, William G., Detroit, assignor to Chrysler Corporation, Highland Park, Mich. Hydraulic-brake solution. 1,666,871; Apr. 17.
Campbell, Henry C. (See Lane, James H., assignor.)
Campbell, James H., Cambridge, assignor of one-half to J. D. Moore, Boston, Mass. Heater. 1,666,233; Apr. 17.
Campbell, Samuel J., assignor to Hudson & Sharp Machine Company, Green Bay, Wis. Article forming and folding machine. 1,666,086; Apr. 17.
Campobasso, Gerard. (See Campobasso, Thomas and G.)
Campobasso, Thomas and G., Barre, Vt. Nipple. 1,666,772; Apr. 17.
Campodonico, John J., Stockton, Calif. Traction wheel. 1,666,526; Apr. 17.
Carhart, Elizabeth M., Jewell, Va. Closure means for bottles. 1,666,683; Apr. 17.
Carlson, Albin, Degerhamn, Sweden. Briquetting. 1,666,618; Apr. 17.
Carlson, Elnar C., Two Harbors, Minn. Crowbar attachment. 1,666,842; Apr. 17.
Carlstedt, Ragnar, Stockholm, Sweden, assignor to Arca Regulators, Incorporated, New York, N. Y. Electric power regulation. 1,666,438; Apr. 17.
Carr, Arthur J., et al. (See Foster, Clarence B., assignor.)
Carroll, J. B., Company. (See Des Enfants, Ernest C., assignor.)
Carstens, H., Mfg. Co. (See Carstens, Herbert H., assignor.)
Carstens, Herbert H., Oak Park, assignor to H. Carstens Mfg. Co., Chicago, Ill. Vaginal douche. 1,666,684; Apr. 17.
Carter, Richard H. (See Perl, A. H. F., and Carter.)
Centeno V., Melchor, Caracas, Venezuela. Nail straightener. 1,666,844; Apr. 17.
Central Scientific Company. (See Hornberger, Carl S., assignor.)
Central Scientific Company. (See Klopsteg, Paul E., assignor.)
Central Scientific Company. (See Sherrill, Richard M., assignor.)
Cereghino, Joseph, Los Angeles, Calif. Can opener. 1,666,366; Apr. 17.
Chamberlain, Paul A., assignor to Mohawk Corporation of Illinois, Chicago, Ill. Radiocondenser. 1,666,163; Apr. 17.
Chappell, Fred B., assignor of one-half to Glens Falls Machine Works, Glens Falls, N. Y. Apparatus for aerating and screening liquid. 1,666,164; Apr. 17.
Checconi, Eligio, Pueblo, Colo. Perambulator. 1,666,439; Apr. 17.
Chevalier, John F. (See Griswold, A. A., and Goddard, assignors.)
Chicago Mica Company. (See Frederick, Louis T., assignor.)
Chicago Pump Company. (See Durdin, Augustus C., jr., assignor.)
Chicago, Pump Company. (See Lindemann, Clarence W., assignor.)
Chicago Railway Signal & Supply Company. (See McCarthy, Daniel J., assignor.)
Chilman, Ivar, Hoquiam, Wash. Gurdy. 1,666,552; Apr. 17.
Chisholm, Lester B., Melrose, assignor to Everlastik, Inc., Chelsea, Mass. Woven elastic fabric. 1,666,325; Apr. 17.
Chisholm, Lester B., Melrose, assignor to Everlastik, Inc., Chelsea, Mass. Fabric. 1,666,686; Apr. 17.
Christman, Peter J., Green Bay, Wis. Interfolding machine. 1,666,553; Apr. 17.
Christophel, Carl E., Penri River, assignor to Dexter Folder Company, New York, N. Y. Sheet-feeding machine. 1,666,165; Apr. 17.
Christy, Joseph E. and J. F. Sloan, Barton, Ohio. Crosstie. 1,666,810; Apr. 17.
Chrysler Corporation. (See Calkins, William G., assignor.)
Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)
Cincinnati Butchers' Supply Company, The. (See Schmidt, Oscar C., assignor.)
Clark, Harry A., Wichita Falls, Tex. Chain-reversing mechanism. 1,666,845; Apr. 17.
Clark, Paul L., Brooklyn, N. Y. Apparatus for the electrical transmission of visual images. 1,666,594; Apr. 17.
Clark Thread Company, The. (See Hart, Joseph J., assignor.)
Clark Thread Company, The. (See Mowat, James R., assignor.)
Clark, Walter B., Lincoln Park, assignor of one-half to I. D. Lawrence, Detroit, Mich. Window shield. 1,666,773; Apr. 17.
Clausing, Louis F., Burlingame, assignor to Royal Metal Works, San Francisco, Calif. Heating device. 1,666,367; Apr. 17.
Clement, Hans, New York, and B. M. Barron, Mount Vernon, N. Y., assignors to General Optical Company, Inc. Optical instrument. 1,666,406; Apr. 17.
Clements, Thomas H., assignor of one-half to F. C. Millard Engineering Company, Los Angeles, Calif. Controlling and measuring gas supply. 1,666,487; Apr. 17.
Cleveland Automatic Machine Company, The. (See Brophy, John P., assignor.)
Clinton, Otto M. (See Craft, W. J., and Clinton.)
Clisson, Albert B., assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y. Press. 1,666,734; Apr. 17.
Clokey, Allison A., Rutherford, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Duplex telegraph system. 1,666,195; Apr. 17.
Clough, Newsome H., Chelmsford, England, assignor to Radio Corporation of America. Tuning system. 1,666,685; Apr. 17.
Coberly, Clarence J., assignor to Kobe, Inc., Los Angeles, Calif. Cutting slots in metal. 1,666,166; Apr. 17.
Coddington, Edwin D., North Milwaukee, Wis. Wall construction and method of and apparatus for building same. 1,666,554; Apr. 17.
Colgrove, Charles E., Toronto, Ontario, Canada. Paperboard-cutting machine. 1,666,687; Apr. 17.
Colgrove, Joseph P., Buffalo, N. Y. Razor-blade holder. 1,666,118; Apr. 17.
Collier, Freeman E., assignor to Foley Saw Tool Company, Incorporated, Minneapolis, Minn. Tilting saw guide. 1,666,087; Apr. 17.
Collins, Thomas A., et al. (See Foster, Clarence B., assignor.)
Colloidal Equipment Corporation. (See Cunniff, Bernard, assignor.)
Colman, Howard D., assignor, by mesne assignments, to Barber-Colman Company, Rockford, Ill. Textile apparatus. 1,666,735; Apr. 17.
Colomb, Henri, Tavannes, Switzerland. Stem winding mechanism for watches. 1,666,774; Apr. 17.
Compagnie d'Applications Mecaniques. (See Rouanet, Louis, assignor.)
Congoleum-Nairn, Inc. (See Fauser, Oscar W., assignor.)
Connecticut Telephone & Electric Company, The. (See Cadieux, Joseph O., assignor.)
Connolly, John L., New York, N. Y. Railway rail, wheel, and brake shoe. 1,666,167; Apr. 17.
Conrad, Frank A., St. Paul, Minn. Hot-air furnace. 1,666,736; Apr. 17.
Consolidated Machine Tool Corporation of America. (See Trosch, Alfred, assignor.)
Consolidated Steel Strapping Company. (See Leslie, John W., assignor.)
Consortium für Elektrochemische Industrie G. m. b. H. (See Baum, E., Deutsch, Herrmann, and Mugdan, assignors.)
Continental Can Company. (See Hodgson, William W., assignor.)
Continental Can Company. (See Kronquest, Alfred L., assignor.)
Cook, Thomas R., assignor to The Hudson Coal Company, Scranton, Pa. Journal box, bearing, wheel, and axle assembly. 1,666,368; Apr. 17.
Cook, William N., New York, N. Y., assignor to E. B. Meyrowitz, Inc. Goggle nose bridge. 1,666,407; Apr. 17.
Cooper, Dennis S., Abilene, Tex. Knee pad. 1,666,846; Apr. 17.
Cooper, Harold M., Marshalltown, Iowa. Gasoline reserve. 1,666,254; Apr. 17.
Copeland, Eugene A., assignor to The Samuel Winslow Skate Manufacturing Company, Worcester, Mass. Skate roller. 1,666,168; Apr. 17.
Copp, Benjamin F., Albuquerque, N. Mex. Key holder. 1,666,776; Apr. 17.
Corey, William G., San Francisco, and C. A. Trow, Conlinga, Calif. Hydraulic pumping power. 1,666,255; Apr. 17.
Coster, Dirk, Haarlem, Netherlands, and G. von Hevesy, Copenhagen, Denmark, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven. Separation of hafnium and zirconium. 1,666,446; Apr. 17.
Cottier, Robert G., Bradford, Ontario, Canada. Machine for laying bricks. 1,666,555; Apr. 17.
Côte, Albert B., Philadelphia, Pa. Battery-element extractor. 1,666,847; Apr. 17.
Craft, William J., Los Angeles, and O. M. Clinton, Glendale, Calif. Automobile speed-warning signaling device. 1,666,441; Apr. 17.

Craig, Milton A., R. P. Steen, and S. A. Logsdon, Lima, Ohio. Fluid-pressure locking means for car doors. 1,666,775; Apr. 17.
Crankless Engines Limited. (See Michell, Anthony G. M., assignor.)
Cravin, Austin O., Chicago, Ill. Gauge. 1,666,556; Apr. 17.
Crawshaw, Richard, Drumright, Okla. Apparatus for extracting oil from shale. 1,666,488; Apr. 17.
Cross, Walter M., Kansas City, Mo. Converting petroleum hydrocarbons. 1,666,119; Apr. 17.
Crown Fuel Saver Company. (See Harter, Lloyd E., assignor.)
Crystal Refrigerating Co. (See Hammond, Earl R., assignor.)
Cullen, Julien F., Portland, Oreg. Manufacture of cushion-tired wheels. 1,666,234; Apr. 17.
Culp, John W., Johnstown, Pa. Mechanical toy. 1,666,527; Apr. 17.
Cummer, Robert L., Toronto, Ontario, Canada. Dental floss holder. 1,666,877; Apr. 17.
Cunniff, Bernard, assignor to Colloidal Equipment Corporation, New York, N. Y. Disintegrator. 1,666,640; Apr. 17.
Cuno Engineering Corporation, The. (See Wolfson, Sidney L., assignor.)
Cuntz, Herman F., Hartford, Conn. Vertical beacon. 1,666,196; Apr. 17.
Currier, Hiram D., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Coil. 1,666,120; Apr. 17.
Curtiss Aeroplane & Motor Company. (See Beisel, R. B., and Gilmore, assignors.)
Curtiss Aeroplane & Motor Company. (See Wait, William, jr., assignor.)
Cutler-Hammer Mfg. Co., The. (See Meuer, George J., assignor.)
Dahlgren, Charles J., East Orange, N. J. Buckle. 1,666,528; Apr. 17.
Dahlgren, Charles J., East Orange, N. J. Buckle. 1,666,529; Apr. 17.
Dallas, Charles D., Chicago, Ill. Lightning rod. 1,666,326; Apr. 17.
Dalton, Hubert, Stamford, Conn. Curtain holder. 1,666,408; Apr. 17.
Dalton, Hubert, Stamford, Conn. Curtain holder. 1,666,409; Apr. 17.
Dalton, Hubert, Stamford, Conn. Curtain holder. 1,666,410; Apr. 17.
Dalton, William, Glenville, N. Y. Railroad-track structure. 1,666,688; Apr. 17.
Davis, Freeman and L., Centerville, Iowa. Amalgamator. 1,666,121; Apr. 17.
Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Let-off for terry looms. 1,666,872; Apr. 17.
Davis, Loyd. (See Davis, Freeman and L.)
Dayton Pump & Mfg. Company, The. (See Eickmeyer, Earl E., assignor.)
De Boer, Jan H. (See Van Arkel, A. E., and de Boer.)
De Boer, Jan H., assignor to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Separation of hafnium and zirconium. 1,666,811; Apr. 17.
Debrie, André L. V. C., Paris, France. Stand for cinematographic and photographic view taking apparatus. 1,666,848; Apr. 17.
Deckel, Friedrich, and M. Geiger, assignors to the firm: Friedrich Deckel, Präzisionsmechanik und Maschinenbau, Munich, Bavaria, Germany. Camera shutter. 1,666,557; Apr. 17.
Deckel, Friedrich, Präzisionsmechanik und Maschinenbau. (See Deckel, F., and Geiger, assignors.)
Dehling, Mary R., Wausau, Wis. Dust-laying broom. 1,666,369; Apr. 17.
Deibert, Ambrose E., Seattle, Wash. Mail box. 1,666,281; Apr. 17.
De Leeuw, Adolph L., Plainfield, N. J., assignor of one-half to A. F. Nathan, New York, N. Y. Gear grinder. 1,666,737; Apr. 17.
De Mattia Brothers, Inc. (See De Mattia, Peter, assignor.)
De Mattia, Peter, Passaic, assignor to De Mattia Brothers, Inc., Garfield, N. J. Collapsible core. 1,666,689; Apr. 17.
Dennis, William J., Chicago, Ill. Weather strip. 1,666,327; Apr. 17.
Dennis, William J., Chicago, Ill. Weather strip. 1,666,328; Apr. 17.
Denniston, Jonathan W., Bedford, Ind. Circuit closer. 1,666,122; Apr. 17.
De Rose, Albert, Gilroy, Calif. Mop. 1,666,371; Apr. 17.
Des Enfants, Ernest C., assignor to J. B. Carroll Company, Chicago, Ill. Toy computing device and number-revealing game. 1,666,641; Apr. 17.
Detwiler, Daniel W., Rosebud, Alberta, Canada. Grain cleaner. 1,666,370; Apr. 17.
Deutsch, Hans. (See Baum, E., Deutsch, Herrmann, and Mugdan.)
Dexter Folder Company. (See Christophel, Carl E., assignor.)
Diamond Match Company, The. (See Zomnir, J. E., and Pfersch, assignors.)
Dick, A. B., Company. (See Brasseur, Ernest J., assignor.)
Dillingham, Frederick A., assignor to The Toy Sunshade Company, Troy, Ohio. Windshield. 1,666,642; Apr. 17.
Dispenza, Andrew J. (See Noll, Theobald H., assignor.)
Dobson & Barlow Limited. (See Hartley, Walter, assignor.)
Dodd, Alphonse M., Warwick, assignor to Phenix Lace Mills, Phenix, R. I. Lace. Des. 74,921; Apr. 17.
Dodge, Adiel Y., assignor to Bendix Brake Company, South Bend, Ind. Brake-operating means. 1,666,558; Apr. 17.
Doherty, Henry L. (See Laird, Wilbur, G., assignor.)
Doherty Research Company. (See Skillman, Edward, assignor.)
D'Olier, Henry, jr., Bridgeport, Conn. Electric connecter socket. 1,666,411; Apr. 17.
Dolmatch, Aaron, Bayonne, N. J. Expandible vaginal syringe. 1,666,197; Apr. 17.
Donle Electrical Products Corporation. (See Donle, Harold P., assignor.)
Donle, Harold P., assignor to Donle Electrical Products Corporation, Meriden, Conn. Audiofrequency amplifier. 1,666,412; Apr. 17.
Dorange, Louis V., Kansas City, Mo. Cooling attachment for permanent-waving apparatus. 1,666,160; Apr. 17.
Dorgan, Ralph O., Mobile, Ala. Automatic electric railroad-crossing gate. 1,666,559; Apr. 17.
Dormer, John A., and J. G. Malone, Detroit, Mich. Crushing machine. 1,666,530; Apr. 17.
Douglas, Harry A. (See Watts, Felix J., assignor.)
Downes-Martin, Lelia. Christchurch, England. Match box, ash tray, and other boxes and trays. 1,666,294; Apr. 17.
Draper, Clare H., assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass. Shuttle-feeler thread cutter. 1,666,442; Apr. 17.
Draper, Clare H., assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass. Shuttle-tension-controlling mechanism for looms. 1,666,443; Apr. 17.
Draper Corporation. (See Davis, Harry A., assignor.)
Draper Corporation. (See Draper, Clare H., assignor.)
Draper Corporation. (See Merrill, Charles F., assignor.)
Draper Corporation. (See Northrop, Jonas, assignor.)
Dressel, Henry M., Chicago, Ill. Loud speaker. 1,666,198; Apr. 17.
Drevitson, Carl B., Somerville, Mass. Skate. 1,666,690; Apr. 17.
Droitcour, Michael A., Edgewood, R. I. Sheet-delivery apparatus. 1,666,489; Apr. 17.
Drumm, James J. (See Butler, J. B., and Drumm.)
Dryer, William P., Schenectady, N. Y., assignor to General Electric Company. Emergency governor mechanism for prime movers. 1,666,490; Apr. 17.
Drying Systems, Inc. (See Bolling, John E., assignor.)
Duplex Electric Company. (See Williams, John P., assignor.)
Duplex Printing Press Company. (See Bechman, Henry F., assignor.)
Durdin, Augustus C., jr., assignor to Chicago Pump Company, Chicago, Ill. Duplex pumping apparatus. 1,666,873; Apr. 17.
Durupt, Jean B., Jeuxey, by Epinal, assignor to Societe Pellaumail-Moutel & Cie., Cholet, France. Machine for drawing out the yarn from textile fabrics for the production of openwork. 1,666,812; Apr. 17.
Eaton, Doris M., Springfield, Mass. Ash tray or similar article. Des. 74,922; Apr. 17.
Eberhardt, Edward L., Edwardsville, Ill. Manicuring implement. 1,666,619; Apr. 17.
Ebihara, Keikichi. (See Okochi, M., and Ebihara.)
Economy Products Corporation. (See Voight, George E., assignor.)
Eddy, Lawrence R., Manasquan, N. J. Kite. 1,666,813; Apr. 17.
Edeleanu, Lazar, K. Pfeiffer, K. Gress, and P. Jodeck, Berlin, Germany. Refining heavy mineral oils by means of sulphur dioxide in a continuous operation. 1,666,560; Apr. 17.
Edelman, Max., assignor to E. M. Shapiro, Sellersville, Pa. Cutting machine. 1,666,643; Apr. 17.
Egan, John J., and E. Gregor, assignors to McCallum Hosiery Company, Northampton, Mass. Plating attachment. 1,666,123; Apr. 17.
Eickmeyer, Earl E., assignor to The Dayton Pump & Mfg. Company, Dayton, Ohio. Gasoline pump. 1,666,644; Apr. 17.
Eisele, Julius. (See Griesbach, R., and Eisele.)
Ekstrom, Gustaf H., Rockford, assignor to C. P. Parker, trustee, Evanston, Ill. Rubbing machine. 1,666,256; Apr. 17.
Electric Storage Battery Company, The. (See Stone, Walter B., assignor.)
Electrolux Servel Corporation. (See Von Platen, B. C., and Munters, assignors.)
Elevator Supplies Company. (See Bassett, Cyrus W., assignor.)
Elliott-Fisher Company. (See Julihn, Louis G., assignor.)
Elzemeyer, Ernst H., assignor to American Pulverizer Company, St. Louis, Mo. Pulverizing machine. 1,666,124; Apr. 17.
Emerson, Dean A., assignor to The Star Pin Company, Derby, Conn. Display carton. 1,666,691; Apr. 17.

England, Eric C. G., London, England. Motor vehicle. 1,666,814; Apr. 17.
England, Eric C. G., London, England. Motor vehicle. 1,666,815; Apr. 17.
Engström, Dag A., Stockholm, Sweden. Card register. 1,666,125; Apr. 17.
Epstein, Harris, Rockaway Beach, N. Y. Folding umbrella. 1,666,692; Apr. 17.
Essex, Frank C., and J. E. Maxson, assignors of one-third to D. S. McNeil, Picher, Okla. Sectional mold liner for type-setting machines. 1,666,595; Apr. 17.
Evans, Israel, San Bernardino, Calif. Hose-coupling tool. 1,666,491; Apr. 17.
Everlastik, Inc. (See Chisholm, Lester B., assignor.)
Fagan, Ray C., Spangler, Pa. Pressure-fluctuating alarm for mines. 1,666,282; Apr. 17.
Falk, Pierre R., New York, N. Y. Air circulating and heating apparatus. 1,666,816; Apr. 17.
Fallon, William J., jr., Boston, Mass. Welting and making same. 1,666,444; Apr. 17.
Farley, George E., assignor to Service Equipment Co., Southgate, Calif. Combined tire-inflating valve and gauge. 1,666,283; Apr. 17.
Farr, Joseph W., Oak Park, Ill. Roofing. 1,666,088; Apr. 17.
Farver, Warner E., et al. (See Kaser, Walter I., assignor.)
Fast, Gustave, Annapolis, assignor to The Bartlett Hayward Company, Baltimore, Md. Flexible shaft coupling. 1,666,445; Apr. 17.
Fauser, Oscar W., Bellerose, N. Y., assignor to Congoleum-Nairn, Inc. Rug or similar article. Des. 74,823; Apr. 17.
Federal Pressed Steel Company. (See Tinker, Herbert W., assignor.)
Feisthamel, Frederick L., et al. (See Foster, Clarence B., assignor.)
Fejes, Jenö, Budapest, Hungary. Vehicle brake. 1,666,372; Apr. 17.
Feldheim, Felix S., Evanston, assignor of one-half to V. Karbowski, Chicago, Ill. Spring steel tire. 1,666,373; Apr. 17.
Feldman, David A. (See Will, A. J., and Feldman.)
Fereday, Horace, Spanish Fork, Utah. Vehicle brake. 1,666,817; Apr. 17.
Ferree, Marvin, New York, N. Y., and J. Wissmar, Cleveland, Ohio, assignors, by mesne assignments, to Telepix Corporation of America. Receiving paper and receiving solution for telautography. 1,666,329; Apr. 17.
Ferree, Marvin, New York, N. Y., and J. Wissmar, Cleveland, Ohio, assignors to Telepix Corporation of America. Needle holder for telautographic apparatus. 1,666,330; Apr. 17.
Fidelity Machine Company. (See Larkin, Walter, assignor.)
Findlay, Robert, Manufacturing Company. (See Schwartz, Frederick, assignor.)
Finkelstein, Mendel. (See Saunders, L. E., and Finkelstein.)
First Trust & Savings Bank of Pasadena, trustee. (See Key, James, F., assignor.)
Fischer, Frank, Larchmont, N. Y., and A. F. Van Pelt, Interlaken, N. J., assignor to Grant Oil Burner Corporation, Wilmington, Del. Electrical safety control circuit for automatic burner equipment. 1,666,331; Apr. 17.
Fisher, Alfred J., assignor to General Motors Corporation, Detroit, Mich. Door stile for automobile bodies. 1,666,446; Apr. 17.
Fisher, James, New Orleans, La. Cane harvester. 1,666,818; Apr. 17.
Fitch, Jason A. (See Brainard, G. C., Fitch, and Wolters.)
Fitzpatrick, Francis W., Evanston, Ill. Building unit and construction. 1,666,199; Apr. 17.
Fitzpatrick, James R., New York, N. Y. Vehicle side and window washing machine. 1,666,170; Apr. 17.
Flauder, Alfred J., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn. Combined salt and pepper shaker. Des. 74,924; Apr. 17.
Flintkote Company, The. (See Breeze, Fred, jr., assignor.)
Flintkote Company, The. (See Stolp, Charles, jr., assignor.)
Folberth, Frederick G. and W. M., Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Automatic windshield cleaner. 1,666,126; Apr. 17.
Folberth, Frederick G. and W. M., Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,666,127; Apr. 17.
Folberth, William M. (See Folberth, Frederick G. and W. M.)
Foley Saw Tool Company. (See Collier, Freeman E., assignor.)
Foltz, Ira W., Chicago, Ill. Furnace. 1,666,200; Apr. 17.
Forbes, John S., Philadelphia, Pa. Method of and apparatus for evaporating and distilling. 1,666,777; Apr. 17.
Ford, Edward, Plate Glass Company, The. (See Platt, Archie W., assignor.)
Formica Insulation Company, The. (See Lytle, Robert W., assignor.)
Forrester, Charles H., sr., et al. (See Kamedish, Peter B., assignor.)
Foss, William A. (See Schlipp, Charles P., assignor.)
Foster, Clarence B., Glendale, assignor of one-sixth to F. L. Feisthamel, one-sixth to A. J. Carr, and one-sixth to T. A. Collins, Los Angeles, Calif. Fabricated-derrick construction. 1,666,413; Apr. 17.
Foster, Clarence B., Glendale, assignor of one-sixth to F. L. Feisthamel, one-sixth to A. J. Carr, and one-sixth to T. A. Collins, Los Angeles, Calif. Fabricated derrick construction. 1,666,413; Apr. 17.
Foster, Harry C., assignor to Indiana Lamp Corporation, Connersville, Ind. Connecter for electric circuits. 1,666,089; Apr. 17.
Foster, Theodore W., & Brother Company. (See Noble, Arthur H., assignor.)
Foster Wheeler Corporation. (See Bell, John E., assignor.)
Franco, Attilio, Milan, Italy. Steam generator. 1,666,128; Apr. 17.
Franson, Fritz H., Denver, Colo. Building construction. 1,666,235; Apr. 17.
Frantz, Walter A., Cleveland, Ohio. Time switch. 1,666,129; Apr. 17.
Frederick, Louis T., assignor to Chicago Mica Company, Valparaiso, Ind. Mica-separating machine. 1,666,130; Apr. 17.
Freeman, Ella M. (See Weeden, Arthur W., assignor.)
Frieden, Alexander, Mount Vernon, assignor of one-third to R. F. Bacon and one-third to A. Hirsch, New York, N. Y. Recovery of camphor. 1,666,645; Apr. 17.
Fry, Benjamin L., assignor to National Sales Machine Company, St. Louis, Mo. Coin-controlled vending machine. 1,666,596; Apr. 17.
Fry, Benjamin L., assignor to National Sales Machine Company, St. Louis, Mo. Vending machine. 1,666,849; Apr. 17.
Fuerth, Sydney W., Maplewood, N. J. Sight instrument for automobiles. 1,666,236; Apr. 17.
Fullenlove, McClellan C., Toledo, Ohio, assignor of thirty per cent to A. J. Buchheit and twenty-five per cent to W. V. Ghislin, Park Ridge, Ill., and twenty per cent to W. Buchheit, Asbury Park, N. J. Motion-picture-projection apparatus. 1,666,131; Apr. 17.
Fuller, Albert M., Pittsburgh, Pa. Automatically-adjustable grinding wheel. 1,666,237; Apr. 17.
Furnivall, William H. G., D. B. McLaren, and E. J. Laschinger, Johannesburg, Transvaal, South Africa. Exhaust silencer. 1,666,257; Apr. 17.
G. & G. Atlas Systems. (See Stoetzel, Joseph J., assignor.)
Gahlert, Franz J., Dresden-Lischwitz, Germany. After-treatment of freshly-spun artificial silk. 1,666,090; Apr. 17.
Galbreath, William W., assignor to The Youngstown Pressed Steel Company, Warren, Ohio. Lath-spacing nail. 1,666,561; Apr. 17.
Gallagher, Charles R., Fullerton, assignor to Universal Holding Company, Los Angeles, Calif. Floating deck or cover for oil tanks. 1,666,415; Apr. 17.
Gallet, Maurice, and A. B. Anderson, Poughkeepsie, N. Y. Aeroplane. 1,666,132; Apr. 17.
Gatti, Tony C., Pascagoula, Miss. Garden tool. 1,666,374; Apr. 17.
Gaus, Wilhelm, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-Main, Germany. Composition to be used in connection with antiknock compounds. 1,666,693; Apr. 17.
Gaus, Wilhelm, and W. Wild, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengessischaft, Frankfort-on-Main, Germany. Producing mixtures of nitrogen and hydrogen. 1,666,694; Apr. 17.
Gavaza, George V., Quincy, Mass. Siphon pump. 1,666,850; Apr. 17.
Geiger, Martin. (See Deckel, F., and Geiger.)
General Electric Company. (See Bany, Herman, assignor.)
General Electric Company. (See Dryer, William P., assignor.)
General Electric Company. (See Seeley, Harold T., assignor.)
General Electric Company. (See Weinfield, Benjamin S., assignor.)
General Fireproofing Company, The. (See Brainard, G. C., Fitch, and Wolters, assignors.)
General Motors Corporation. (See Fisher, Alfred J., assignor.)
General Motors Corporation. (See Hinger, J. A., Mayer, and Wilson, assignors.)
General Optical Company. (See Clement, H., and Barron, assignors.)
Gentile, Domenico, Rome, N. Y. Automotive appliance. 1,666,492; Apr. 17.
Geoghegan, George E., Lawrence, Mass. Shuttle-checking mechanism for looms. 1,666,620; Apr. 17.
Gerstenberger, Albin. (See Möller, F., Moritz, and Gerstenberger.)
Ghislin, Walter V., et al. (See Fullenlove, McClellan C., assignor.)
Gibson, Clark A., assignor to Sta-Rite Hair Pin Company, Shelbyville, Ill. Hair clasp and producing the same. 1,666,133; Apr. 17.
Gilchrist, William A., Chicago, Ill. Construction of furnace walls and arches. 1,666,284; Apr. 17.
Giles, Julian A., Derby, Conn. Wrench. 1,666,091; Apr. 17.
Gilmer, L. H., Co. (See Lewis, C. W., assignor.)

Gilmore, William L. (See Beisel, R. B., and Gilmore.)
Gisholt Machine Company. (See Lundberg, Nils I., assignor.)
Gits, Jules P., Chicago, Ill. Pneumatic-tire valve. 1,666,562; Apr. 17.
Glauber, Myron J., Los Angeles, Calif. Diverter valve. 1,666,531; Apr 17.
Glenco Products Company. (See Jackson, Royal W., assignor.)
Glens Falls Machine Works. (See Chappell, Fred B., assignor.)
Goddard, Alvin C. (See Griswold, A. A., and Goddard.)
Goetze, Albin F., assignor to Morgan Knitting Mills, Inc., Newark, N. J. Knit scarf. 1,666,819; Apr. 17.
Goldschmidt, Stefan, Karlsruhe, Germany. Oxidation of alcohol. 1,666,447; Apr. 17.
Goldstein, Isidore M., assignor to Morris Becker, Brooklyn, N. Y. Jumping rope. 1,666,201; Apr. 17.
Gollnick, Paul A., assignor to Spiegel, May, Stern Co., Chicago, Ill. Sheet-handling mechanism. 1,666,171; Apr. 17.
Gollnick, Paul A., assignor to Spiegel, May Stern Company, Chicago, Ill. Tray. 1,666,172; Apr. 17.
Gomme, Ebenezer, High Wycombe, England. Furniture fitment. 1,666,646; Apr. 17.
Gong Bell Manufacturing Company. (See Watrous, Clifford M., assignor.)
Good, John F., Knoxville, Tenn. Display-tray construction for show cases. 1,666,851; Apr. 17.
Government and the People of the United States of America, The. (See Nelson, Elnathan K., assignor.)
Grant Oil Burner Corporation. (See Fischer, F., and Van Pelt, assignors.)
Grasselli Dyestuff Corporation. (See Metzger, Richard, assignor.)
Graydon, Alexander, Buffalo, N. Y. Washing machine. 1,666,238; Apr. 17.
Grebehem, Hugo, Herbsleben, Germany. Safety device for preventing railway accidents. 1,666,695; Apr. 17.
Green, Ida. (See Caldwell, M. H., and Green.)
Greenwood, Dolphice H., Los Angeles, Calif. Combination sucker-rod elevator and spider. 1,666,621; Apr. 17.
Gregor, Eugene. (See Egan, J. J., and Gregor.)
Gress, Karl. (See Edeleanu, L., Pfeiffer, Gress, and Jodeck.)
Griessbach, Robert, and J. Eisele Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Utilization of lignin. 1,666,696; Apr. 17.
Griffin, Alvah M., assignor to Universal Holding Company, Los Angeles, Calif. Floating deck. 1,666,416; Apr. 17.
Grigsby-Grunow-Hinds Co. (See Osborn, Jesse C., assignor.)
Grimm, George E., assignor to The Willys-Overland Company, Toledo, Ohio. Cowl ventilator. 1,666,874; Apr. 17.
Griswold, Albert A., Povidence, R. I., and A. C. Goddard, Richmond Hill, N. Y.; said Goddard assignor, by mesne assignments, to J. F. Chevalier, Brookline, Mass. Wire-cutting mechanism. 1,666,134; Apr. 17.
Griswold, Frank W., Minneapolis, Minn. Traffic signal. Des. 74,925; Apr. 17.
Gross, Benjamin & Edward J., Co. (See Gross, Benjamin, assignor.)
Gross, Benjamin, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring or article of similar nature. Des. 74,926; Apr. 17.
Grosse, Friedrich, Jena, Germany. Slot-shutter mechanism for photographic cameras. 1,666,852; Apr. 17.
Grossmann, Gustav, Berlin, Germany. Diathermic apparatus. 1,666,697; Apr. 17.
Gueritey, Charles, Passaic, N. J., assignor to E. W. Bliss Company, Brooklyn, N. Y. Can-heading machine. 1,666,239; Apr. 17.
Guethler, William, Philadelphia, Pa. Dough mixer. 1,666,698; Apr. 17.
Guiducci, Igino, Tivoli, Rome, Italy. Lock nut. 1,666,375; Apr. 17.
Gurney, Albert J., assignor to The American Mine Door Co., Canton, Ohio. Wire anchor. 1,666,493; Apr. 17.
Habart, Joseph. (See Baughman, O. F., and Habart.)
Hackstedde, Herbert H., Cincinnati, Ohio. Mixing machine. 1,666,285; Apr. 17.
Hagen, Sigurd, Drammen, Norway. Instrument for setting up profiles. 1,666,563; Apr. 17.
Hagen, Walter, assignor to L. A. Young Company, Detroit, Mich. Golf ball. 1,666,699; Apr. 17.
Hahn, Elmer L., McAllen, Tex. Toilet-article holder. 1,666,564; Apr. 17.
Haines, Winfield S., assignor to P. G. Seigle, Dunmore, Pa. Exhaust nozzle. 1,666,376; Apr. 17.
Hall, Elbert J., Piedmont, Calif. Flexible coupling. 1,666,494; Apr. 17.
Hall, Frank J., et al. (See Iserman, S., Vernet, and Moses, assignors.)
Hall, Leslie S., assignor to Williams Tool Corporation, Erie, Pa. Belt-tensioning device for threading machines and the like. 1,666,135; Apr. 17.
Halleck, Frank A., Oak Park, Ill., assignor to Sullivan Machinery Company. Forging machine. 1,666,287; Apr. 17.
Hamilton, Arthur C. E. (See Caldwell, M. H., and Green, assignors.)
Hamm, Karl, Hartford, Conn. Steam boiler. 1,666,202; Apr. 17.
Hammond, Earl R., assignor to Crystal Refrigerating Co., Fremont, Nebr. Refrigerator door. 1,666,258; Apr. 17.
Hands, Henry J., Chiswick, London, assignor to Spicers, Limited, London, England. Cellulose-derivative film and making the same. 1,666,377; Apr. 17.
Harber, Laurence S., assignor to Joseph Baker Sons & Perkins Company, Inc., White Plains, N. Y. Dough treating. 1,666,647; Apr. 17.
Hardenstein, Hellon D., Oklahoma City, Okla. Game. 1,666,448; Apr. 17.
Harding, Frank E., assignor to Arlington Mills, Lawrence, Mass. Slub catcher and tension for doubling machines. 1,666,565; Apr. 17.
Harlan, James M., Dayton, Wash. Harrow attachment. 1,666,778; Apr. 17.
Harner, John E., Dodge City, Kans. Child's toy. 1,666,378; Apr. 17.
Harnsberger, Audley E., Columbus, Ohio, assignor to The Pure Oil Company, Chicago, Ill. Distilling oils. 1,666,597; Apr. 17.
Harrington, Elmore H., New Smyrna, Fla. Tobacco stick. 1,666,648; Apr. 17.
Harris, Archer H., Akron, Ohio. Vulcanizer. 1,666,649; Apr. 17.
Harris, Isaac, Detroit, Mich. Spark plug. 1,666,853; Apr. 17.
Harris, Leland D., Salt Lake City, Utah. Loud speaker. 1,666,854; Apr. 17.
Harris, William W. New York, N. Y. Gravity-operated figure toy. 1,666,417; Apr. 17.
Harrison, Cecil B., assignor to R. West and K. P. West, San Francisco, Calif. Record tray. 1,666,700; Apr. 17.
Harshberger, Norman P., Chicago, Ill. Shingle machine. 1,666,203; Apr. 17.
Harshberger, Norman P., Chicago, Ill. Shingle. 1,666,204; Apr. 17.
Hart, Joseph J., assignor to The Clark Thread Company, Newark, N. J. Bundling machine. 1,666,205; Apr. 17.
Harter, Lloyd E., assignor to Crown Fuel Saver Company, Richmond, Ind. Steam-actuated air injector. 1,666,136; Apr. 17.
Hartley, Ralph V. L., South Orange, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Modulation system. 1,666,206; Apr. 17.
Hartley, Ralph V. L., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission circuit. 1,666,738; Apr. 17.
Hartley, Walter, assignor to Dobson & Barlow Limited, Bolton, England. Waste-collecting device for combing and like machines. 1,666,379; Apr. 17.
Hathaway, Edgar F., Wellesley, and W. Bixby, assignors to Shawmut Engineering Company, Dorchester, Mass. Mechanism for and method of handling yarns or the like. 1,666,650; Apr. 17.
Hawley, Charles G., Chicago, Ill. Steepled radiant-heat steam boiler. 1,666,532; Apr. 17.
Hawley, Charles G., Chicago, Ill. Steam-boiler header. 1,666,566; Apr. 17.
Hawley, Charles G., Chicago, Ill. Radiant-heat steam boiler and setting. 1,666,567; Apr. 17.
Healy, James H. (See Ruff, D. C., 2d, and Healy.)
Healy, James H., et al. (See Ruff, D. C., 2d, and Healy, assignors.)
Healy, John A., et al. (See Ruff, D. C., 2d, and Healy, assignors.)
Heberlein Patent Corporation. (See Bodmer, Albert, assignor.)
Heck, Clarence P., and J. R. Sater, Hope, Ind. Envelope opener. 1,666,533; Apr. 17.
Hegerland, Mike, Woodville, Wis. Hay-loading device. 1,666,092; Apr. 17.
Heide, Henry, New York, N. Y. Pipe chain vise. 1,666,173; Apr. 17.
Heinle, Albert G., Crafton, assignor of three-eighths to T. A. McQuaide, Pittsburgh, Pa. Apparatus for making chains. 1,666,380; Apr. 17.
Heinrich Lanz Aktiengesellschaft. (See Huber, Fritz, assignor.)
Heising, Raymond A., Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Plural-channel secrecy system. 1,666,651; Apr. 17.
Hele-Shaw, Henry S., R. C. B. Stillman, and J. A. Pickard, London, England. Rotary filter. 1,666,381; Apr. 17.
Helmrich, Carl, New York, N. Y. Combined towel service and advertising device. 1,666,288; Apr. 17.
Henceroth, George C., Independence, Kans. Flowing gas wells. 1,666,779; Apr. 17.
Henderson, James W., and G. H. Wilson, Dunmore, Pa. Check holder. 1,666,820; Apr. 17.
Hendry Machine Company, The. (See Bouillon, Constant, assignor.)
Herrmann, Willy O. (See Baum, E., Deutsch, Herrmann, and Mugdan.)
Herzog, Robert. (See Pungs, L., and Herzog.)
Hess, Frank W., Freeport, Ill. Curtain stretcher. 1,666,622; Apr. 17.

Heuer, Henry, Cobb, Wis. Harvester. 1,666,137; Apr. 17.
Hickey, Daniel W., et al. (See Ruff, D. C., 2d, and Healy, assignors.)
Hickok Manufacturing Company. (See Houghtaling, Guy R., assignor.)
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Toilet-accessory cabinet. 1,666,652; Apr. 17.
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Metal box and cover. 1,666,653; Apr. 17.
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Bag and like lock. 1,666,654; Apr. 17.
Hiester, Fay, Bremen, Ind. Merchandise-display unit. 1,666,821; Apr. 17.
Hill, Harry W., assignor to American Optical Company, Southbridge, Mass. Lens polisher. 1,666,701; Apr. 17.
Hinger, John A., D. B. Mayer, and J. Wilson, Cleveland, Ohio, assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich. Fluid-pressure control for presses. 1,666,449; Apr. 17.
Hinkle, Andy, Atlanta, Ga. Picker-stick check. 1,666,822; Apr. 17.
Hirsch, Alcan, et al. (See Frieden, Alexander, assignor.)
Hirsch, Edwin W., Chicago, Ill. Bladder-pressure-testing apparatus. 1,666,332; Apr. 17.
Hitt, Thomas G., Seattle, Wash. Revolving rocket. 1,666,534; Apr. 17.
Hitt, Thomas G., Seattle, Wash. Rocket. 1,666,598; Apr. 17.
Hochriem, Gustav F., assignor to Rhodes-Hochriem Manufacturing Co., Chicago, Ill. Weight-adjusting mechanism for weighting scales. 1,666,655; Apr. 17.
Hodges, James A. (See McFarland, Ernest H., assignor.)
Hodgkinson, Francis, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Expansible pipe joint. 1,666,495; Apr. 17.
Hodgson, William W., Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y. Metal container. 1,666,702; Apr. 17.
Hoffman, Louis, Duluth, Minn., assignor, by mesne assignments, to Steam Pressing Iron Company. Pressing implement. 1,666,599; Apr. 17.
Hoffmeister, Halesia D., Los Angeles, Calif. Music chart. 1,666,382; Apr. 17.
Holden, Arthur P., and P. Morgan, Toronto, Ontario, Canada. Burning oil. 1,666,207; Apr. 17.
Holland, Elmer R., San Francisco, Calif. Golf putter. 1,666,174; Apr. 17.
Holley, Marion S., Enterprise, Kans. Self-locking chicken coop. 1,666,855; Apr. 17.
Holliday Life Saving Headlight Co. (See Holliday, Thomas C., assignor.)
Holliday, Thomas C., Canton, assignor to Holliday Life Saving Headlight Co., Jackson, Miss. Tiltable and dirigible headlight. 1,666,856; Apr. 17.
Hollowell, Everet, Kansas City, Kans. Piston kicker. 1,666,286; Apr. 17.
Holman, Arthur T., and P. M., Camborne, assignors to Holman Brothers Limited, Camborne, Cornwall, England. Rock drill and like tool. 1,666,383; Apr. 17.
Holman Brothers Limited. (See Holman, Arthur T. and P. M., assignors.)
Holman, Percy M. (See Holman, Arthur T. and P. M.)
Holweck, Fernand, Paris, France. Thermionic apparatus. 1,666,450; Apr. 17.
Honigmann, Ludwig, Bad Tolz, and F. Bartling, Munich, Germany. Ring oven with revolving hearth. 1,666,656; Apr. 17.
Hoover, Edgar B., Spokane, Wash. Tying device. 1,666,623; Apr. 17.
Hopkins, William R., St. Louis, Mo. Collapsible metal awning. 1,666,657; Apr. 17.
Hopkins, William W. (See McMurtrie, John F., assignor.)
Hornberger, Carl S., assignor to Central Scientific Company, Chicago, Ill. McLeod-type pressure gauge. 1,666,739; Apr. 17.
Horstkotte, Frederick W., Portland, Oreg. Stack shaper. 1,666,451; Apr. 17.
Houghtaling, Guy R., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Ornamented article and making the same. 1,666,138; Apr. 17.
Hoyt Heater Company. (See Hoyt, Robert C., assignor.)
Hoyt, Robert C., Oakland, assignor to Hoyt Heater Company, Los Angeles, Calif. Water-heater base. 1,666,093; Apr. 17.
Hoyt, Robert C., Oakland, assignor to Hoyt Heater Company, Los Angeles, Calif. Water-heater gas burner. 1,666,094; Apr. 17.
Huber, Charles J., Baltimore, Md. Furnace. 1,666,418; Apr. 17.
Huber, Fritz, assignor to Heinrich Lanz Aktiengesellschaft, Mannheim, Germany. Motor vehicle with horizontal engine. 1,666,208; Apr. 17.
Hubert, Barney A., Pine Lawn, Mo. Flower and plant box. 1,666,240; Apr. 17.
Hudson Coal Company, The. (See Cook, Thomas R., assignor.)
Hudson & Sharp Machine Company. (See Campbell, Samuel J., assignor.)
Hughes, Merrill H. (See Unglesby, Lewis H., assignor.)
Hughes Tool Company. (See MacDonald, Archie A., assignor.)
Hughes Tool Company. (See Wellensiek, Louis H., assignor.)
Hult, Oscar W., Stockholm, Sweden. Operating explosive engines. 1,666,384; Apr. 17.
Hunt, Fay, New York, N. Y. Derrick. 1,666,857; Apr. 17.
Hunt, J. Harold, assignor to Budd Wheel Company, Philadelphia, Pa. Heavy-duty disk-wheel structure. 1,666,703; Apr. 17.
Hunt, William F., New Brighton, N. Y., assignor to The Oxweld Railroad Service Company. Outdoor lamp. 1,666,209; Apr. 17.
Hunter, William N., Blanchester, Ohio. Combined hand bag and grip. 1,666,704; Apr. 17.
Hydraulic Brake Company. (See Bradbury, Clifford C., assignor.)
Hyrup, Hans K., Los Angeles, Calif. Wrench. 1,666,740; Apr. 17.
I. G. Farbenindustrie Aktiengesellschaft. (See Gaus, Wilhelm, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Gaus, W., and Wild, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Griessbach, R., and Eisele, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Kuss, Ernst, assignor.)
Iceless Automatic Refrigerator Company. (See Jankus, Jack C., assignor.)
Indiana Lamp Corporation. (See Foster, Harry C., assignor.)
Industrial Research Corporation. (See Brockway, Carl P., assignor.)
Ingersoll-Rand Company. (See Lear, Earl B., assignor.)
Ingersoll-Rand Company. (See Mock, John F., assignor.)
Ingersoll-Rand Company. (See Smith, William A., Jr., assignor.)
International Motor Company. (See Masury, Alfred F., assignor.)
Irvine, Malcolm M., Glasgow, Scotland. Generator for electric-arc welding. 1,666,452; Apr. 17.
Irving Iron Works Company. (See Voskamp, John A., assignor.)
Irwin, James B., Denver, Colo. Locomotive mover. 1,666,780; Apr. 17.
Iserman, Samuel, Summit, N. J., W. Vernet, and E. G. Moses, New York, N. Y., assignors, by mesne assignments, to F. J. Hull and L. B. Rattermann, Cincinnati, Ohio. Fuel for use in internal-combustion engines. Re16,937; Apr. 17.
Isoyama, Naokichi, Los Angeles, Calif. Collapsible tray for egg crates. 1,666,333; Apr. 17.
Israel, Elias, New York, N. Y. Apparatus for cutting hat sweat leathers. 1,666,658; Apr. 17.
Iversen, Trygve, Chicago, Ill. Milk-bottle container. 1,666,289; Apr. 17.
Jackson, Alvin L., Logan, Okla. Gum-stick holder. 1,666,095; Apr. 17.
Jackson, Avis, East St. Louis, Ill. Glare or light shield. 1,666,568; Apr. 17.
Jackson, Royal W., assignor to Glenco Products Company, Quincy, Ill. Hand duster. 1,666,096; Apr. 17.
Jacobs, Daniel B., Salt Lake City, Utah. Garter. 1,666,823; Apr. 17.
Jahn, Augustus H., Pittsburgh, Pa. Vacuum tube. 1,666,858; Apr. 17.
Jakopets, Gyruro E. B., assignor to J. Salley, Chicago, Ill. Permutation padlock. 1,666,453; Apr. 17.
Jandus, Herbert S., and N. Van Husen, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate. Des. 74,927; Apr. 17.
Jankus, Jack C., Scranton, Pa., assignor, by mesne assignments, to Iceless Automatic Refrigerator Company. Turning plug. 1,666,496; Apr. 17.
Jensen, Louis, assignor to United Autographic Register Company, Chicago, Ill. Autographic-register cash drawer. 1,666,385; Apr. 17.
Jett, George C., assignor of two-fifths to W. H. Stiemke, Milwaukee, Wis. Tractor steering mechanism. 1,666,210; Apr. 17.
Jodeck, Paul. (See Edeleanu, L., Pfeiffer, Gress, and Jodeck.)
Johnson, Alfred H., assignor to National Standard Company, Niles, Mich. Lifting jack. 1,666,741; Apr. 17.
Johnson, Alfred H., assignor to National Standard Company, Niles, Mich. Lifting jack. 1,666,742; Apr. 17.
Johnson, Allan R. P., Toronto, Ontario, Canada. Signal faceplate. 74,928; Apr. 17.
Johnson, Charles A., Sacramento, Calif. Automobile steering master. 1,666,386; Apr. 17.
Johnson, Hjalmar F., Bismarck, N. Dak. Fence-post puller. 1,666,454; Apr. 17.
Johnson, John A., Meriden, assignor to The Bassick Company, Bridgeport, Conn. Truck for stoves or the like. 1,666,139; Apr. 17.
Johnson, Otto W., assignor, by mesne assignments, to Krimpwire Company, Oakland, Calif. Self-furring plaster netting. 1,666,535; Apr. 17.
Johnson, Titian W., Potomac Beach, Va. Brief bag. 1,666,878; Apr. 17.
Johnson, Warren B., Lubbock, Tex. Short-stem milo-maize header. 1,666,824; Apr. 17.
Johnston, Andrew L., jr., assignor to Off'N'On Chain Corporation, Newark, N. J. Antiskid chain. 1,666,497; Apr. 17.
Johnston, Harry L., Indianola, Iowa. Ankle brace. 1,666,290; Apr. 17.

Jones, George I., Buffalo, N. Y., assignor to Oxweld Acetylene Company. Torch tip. 1,666,387; Apr. 17.
Jones, Rolland R., Minneapolis, Minn. Impression tray. 1,666,097; Apr. 17.
Jorden, John, Oakley, Kans. Power-operated wrench. 1,666,600; Apr. 17.
Julian, Evelyn. (See Tomasulo, Nestor N., assignor.)
Julihn, Louis G., Washington, D. C., assignor to Elliott-Fisher Company. Form-locating means. 1,666,140; Apr. 17.
Kadernaschka, William. (See Pruett, C. D., and Kadernaschka.)
Kamedish, Peter B., assignor of one-third to S. T. Starr and one-third to C. H. Forrester, ar., Winnipeg, Manitoba, Canada. Attachment to locomotive. 1,666,388; Apr. 17.
Kanowitz, Lena, New York, N. Y. Protective covering device. 1,666,601; Apr. 17.
Kaplan, Morris L., Hazelton, Pa. Shirt-making system. 1,666,291; Apr. 17.
Karbowiski, Victor. (See Feldheim, Felix S., assignor.)
Kaser, Walter I., assignor of one-third to T. G. Macpherson and one-third to W. E. Farver, Baltic, Ohio. Transmission. 1,666,781; Apr. 17.
Kaufman, Joseph S. (See Mackey, J. C., and Kaufman.)
Kaul, George P., Detroit, Mich. Bathing cap. 1,666,098; Apr. 17.
Keaton, Robert H., San Francisco, Calif. Tire. Des. 74,929; Apr. 17.
Kelch, James W., and J. J. Sunday, Detroit, Mich; said Sunday assignor to said Kelch. Register. 1,666,569; Apr. 17.
Kellogg, Homer G., assignor to Motor Products Corporation, Detroit, Mich. Windshield hinge. 1,666,211; Apr. 17.
Kellogg Switchboard and Supply Company. (See Currier, Hiram D., assignor.)
Kellogg Switchboard and Supply Company. (See Yanochowski, George A., assignor.)
Kempf, Henry, and A. Kiefer, Cincinnati, Ohio. Fishing-rod holder. 1,666,705; Apr. 17.
Kendall, William G., Newark, N. J. Powder press. 1,666,212; Apr. 17.
Kennedy, Elmer M., assignor to Briggs Manufacturing Company, Detroit, Mich. Window guide. 1,666,175; Apr. 17.
Kenkyujo, Zaidan H. R. (See Okochi, M., and Ebihara, assignors.)
Kersten, Jacob, Allegan, Mich. Sound-amplifying construction. 1,666,570; Apr. 17.
Kersten, Jacob, Kalamazoo, Mich. Sound-amplifying horn. 1,666,571; Apr. 17.
Key, James F., Sierra Madre, assignor to First Trust & Savings Bank of Pasadena, trustee, Pasadena, Calif. Piston-pressure gauge. 1,666,419; Apr. 17.
Kiefer, Albert. (See Kempf, H., and Kiefer.)
Kilbride, John J., Scotch Plains, N. J. Window cleaner. 1,666,782; Apr. 17.
King, Edwin D., jr., Valdosta, Ga. Sterilizer. 1,666,825; Apr. 17.
Kingman, Russell B., Orange, assignor to Metal Textile Corporation, West Orange, N. J. Decorative ornament. 1,666,099; Apr. 17.
Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Master radial-drill speed box. 1,666,422; Apr. 17.
Klee Josef, and A. Schneider, Munich, Germany. Lifting jack for vehicles. 1,666,455; Apr. 17.
Klein, Juan, St. Louis, Mo. Piston-cleaning tool. 1,666,572; Apr. 17.
Kleinhammer, William H. (See Morehouse, F. B., and Kleinhammer.)
Kleinsmith, Frederick, Indianapolis, Ind., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Operating means for automobile door latches. Re16,938; Apr. 17.
Klopsteg, Paul E., assignor to Central Scientific Company, Chicago, Ill. McLeod-type pressure gauge. 1,666,743; Apr. 17.
Knudsen, Carl H., Brooklyn, N. Y., assignor to The Knudsen Motor Corporation, Wilmington, Del. Work-piece-supporting fixture for turning machines. 1,666,292; Apr. 17.
Knudsen Motor Corporation, The. (See Knudsen, Carl H., assignor.)
Kobe, Inc. (See Coberly, Clarence J., assignor.)
Koretzky, Harry M., assignor to Bright Star Battery Company Inc., Hoboken, N. J. Flash light. 1,666,420; Apr. 17.
Kothny, Gottdank L., Strafford, assignor to C. H. Wheeler Manufacturing Company, Philadelphia, Pa. Ejector control. 1,666,141; Apr. 17.
Kraft, Abraham, Farmington, Minn. Grain-harvester attachment. 1,666,706; Apr. 17.
Krantz, Hubert, Aachen, Germany. Device for returning water of condensation to boilers. 1,666,573; Apr. 17.
Krause, Joseph W., Brooklyn, N. Y. Brassière. 1,666,421; Apr. 17.
Kraut, Max, assignor to New England Panama Hat Company Inc., New York, N. Y. Flexible straw hat. 1,666,875; Apr. 17.
Kravitt, Irwin H., Philadelphia, Pa. Lamp stand. Des. 74,930; Apr. 17.
Krenke, Otto A., assignor of one-half to E. L. Powers, Port Huron, Mich. Shock absorber. 1,662,259; Apr. 17.
Kries, John, Brooklyn, N. Y. Locking device. 1,666,783; Apr. 17.
Krimpwire Company. (See Johnson, Otto W., assignor.)
Kronquest, Alfred L., Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y. Soldering machine. 1,666,707; Apr. 17.
Kunin, Paul, Minneapolis, Minn. Hair-curling apparatus. 1,666,574; Apr. 17.
Kuss, Ernst, Mannheim, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of paraformaldehyde. 1,666,708; Apr. 17.
Kvare, Olea, McIntosh, Minn. Clothes carrier. 1,666,536; Apr. 17.
Ladd, George T., Pittsburgh, Pa., assignor to Ladd Water Tube Boiler Company, New York, N. Y. Boiler. 1,666,659; Apr. 17.
Ladd Water Tube Boiler Company. (See Ladd, George T., assignor.)
Laird, Wilbur G., assignor to H. L. Doherty, New York, N. Y. Gas-absorption apparatus. 1,666,744; Apr. 17.
La Joie, Hubert J., East Orange, N. J., Urquhart and F. Pokorny, assignors to Auto Pneumatic Action Company, New York, N. Y. Expression-controlling mechanism for pneumatically-operated musical instruments. 1,666,602; Apr. 17.
Lake, James, jr., Brooklyn, N. Y. Crossbar for motor-cycle handlebars. Des. 74,931; Apr. 17.
Lake, James, jr., Brooklyn, N. Y. Stabilizer for motor-cycle front forks. Des. 74,932; Apr. 17.
Lambert, Edmond H. (See Skinner, R. L., and Lambert.)
Lambert, Helen H., executrix. (See Lambert, Henry M.)
Lambert, Henry M., deceased, Portland, Oreg.; H. H. Lambert, executrix. Making pneumatic tires. 1,666,883; Apr. 17.
Lammens, Robert B., Los Angeles, Calif. Staining and hardening concrete and the like. 1,666,423; Apr. 17.
Lampre, Celestin, Cleveland, Ohio. Equalizing mechanism for four-wheel brakes. 1,666,881; Apr. 17.
Lancaster, John S. (See Burn, J. F., and Lancaster.)
Lane, James H., assignor of one-half to H. C. Campbell, Benton Harbor, Mich. Rotatable tool and feeding mechanism therefor. 1,666,624; Apr. 17.
Lansingh, Van R. (See Mackey, J. C., and Kaufman, assignors.)
Lantz, Robert, Paris, and A. Wahl, Enghien, assignors of one-half to Societe Anonyme des Matieres Colorantes & Produits Chimiques de Saint-Denis, Paris, France. Manufacture of new derivatives of naphthoquinones. 1,666,241; Apr. 17.
La Porte, Joseph, Lomita, Calif. Parachute container and ejector for aeroplanes. 1,666,456; Apr. 17.
Larkin, Walter, Norristown, Pa., assignor to Fidelity Machine Company, Wilmington, Del. Vertical striper for wire-circular-rib-knitting machines. 1,666,784; Apr. 17.
Larrowe Milling Company. (See Wertenbruch, Antony, assignor.)
Larson, Charles, Chicago, Ill. Scraper. 1,666,334; Apr. 17.
Laschinger, Edgar J. (See Furnivall, W. H. G., McLaren, and Laschinger.)
Lauer, Frederick W., Chicago, Ill. Flask. Des. 74,933; Apr. 17.
Laurence, I. D. (See Clark, Walter B., assignor.)
Lavick, Samuel B., Chicago, Ill. Combined display stand and case. Des. 74,934; Apr. 17.
League, Robert A., Greenville, S. C. Price-tag holder and attaching device. 1,666,859; Apr. 17.
Lear, Earl B., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Steel retainer for rock drills. 1,666,176; Apr. 17.
Lederer, Henry, & Bro., Inc. (See Butler, William J., assignor.)
Lee, Robert E., Cincinnati, Ohio. Gravity-feed bottle cooling and dispensing cabinet. 1,666,575; Apr. 17.
Leet, Lynn T., Montreal, Quebec, Canada. Coin-controlled mechanism for use with vending machines. 1,666,242; Apr. 17.
Leiper, John, assignor to New York Mills Corporation, New York Mills, N. Y. Pile fabric. Des. 74,935; Apr. 17.
Leitch, William B., et al. (See Ruhren, John J., assignor.)
Leland, George H., Dayton, Ohio. Brush lifter for electric motors or the like. 1,666,457; Apr. 17.
Leland, George H., Dayton, Ohio. Centrifugal device. 1,666,458; Apr. 17.
Leland, George H., Dayton, Ohio. Brush-lifting mechanism for electric motors or the like. 1,666,459; Apr. 17.
Lemay, Arthur, Brooklyn, N. Y. Eyeglasses. 1,666,826; Apr. 17.
Lentz, Richard, Los Angeles, Calif. Automatic slicing, toasting, and buttering machine. 1,666,335; Apr. 17.
Leslie, John W., Evanston, assignor to Consolidated Steel Strapping Company, Chicago, Ill. Loading freight cars. 1,666,213; Apr. 17.
Letchford, Percy H., Winnipeg, Manitoba, Canada. Heel for boots or shoes. 1,666,603; Apr. 17.
Leventhal, Mitchell, Brooklyn, N. Y. Lock frame or similar article. Des. 74,936; Apr. 17.

Lewis, C. W., Glenside, assignor to L. H. Gilmer Co., Philadelphia, Pa. Portable merchandising case. 1,666,537; Apr. 17.
Lindemann, Clarence W., assignor to Chicago Pump Company, Chicago, Ill. Float-operated electric-switch-actuating mechanism. 1,666,498; Apr. 17.
Ling, Stephen G., Spokane, Wash. Piston-ring tool. 1,666,460; Apr. 17.
Little, John S., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Coating cores. 1,666,214; Apr. 17.
Logsdon, Sanford A. (See Craig, M. A., Steen, and Logsdon.)
Lord, Charles A., Los Angeles, Calif. Apparatus for sinking oil wells. 1,666,461; Apr. 17.
Lorenz, C., Aktiengesellschaft. (See Pungs, L., and Herzog, assignors.)
Lorton, Frank D., St. Louis, Mo., assignor to E. Nathan, trustee. Camp-fire outfit. 1,666,293; Apr. 17.
Lösel, Franz, Brunn, Czechoslovakia. Elastic-fluid multistage disk-wheel turbine. 1,666,625; Apr. 17.
Lösel, Franz, Brunn, Czechoslovakia. Elastic-fluid turbine. 1,666,626; Apr. 17.
Lösel, Franz, Brunn, Czechoslovakia. High-pressure-turbine casing or housing. 1,666,627; Apr. 17.
Lösel, Franz, Brunn, Czechoslovakia. Method and device for determining the expansion line of steam turbines. 1,666,628; Apr. 17.
Loud, George A., assignor to Loud Slide Valve Engine Co., Fitchburg, Mass. Cam mechanism for actuating valves. 1,666,709; Apr. 17.
Loud, George A., Brookline, assignor to Loud Slide Valve Engine Co., Fitchburg, Mass. Internal-combustion engine. 1,666,710; Apr. 17.
Loud Slide Valve Engine Co. (See Loud, George A., assignor.)
Lovis, William. (See Tully, E. E., and Lovis.)
Lucas, Francis F., East Orange, N. J. Photomicrographic camera. 1,666,499; Apr. 17.
Lumb, Louis N., Astoria, N. Y. Bed lock. 1,666,424; Apr. 17.
Lumley, Frank E., Omaha, Nebr. Valve. 1,666,629; Apr. 17.
Lummis, Charles W., assignor to Morgan Construction Company, Worcester, Mass. Gas producer. 1,666,604; Apr. 17.
Lundberg, Nils I., assignor to Gisholt Machine Company, Madison, Wis. Metal-working tool. 1,666,500; Apr. 17.
Lynds, Fred H., North Attleboro, Mass., assignor to Whiting & Davis Company. Mesh machine. 1,666,745; Apr. 17.
Lyon, Claude A., Chicago, Ill., assignor to The Regan Safety Devices Company, Inc., New York, N. Y. Train-control system. 1,666,260; Apr. 17.
Lytle, Robert W., assignor to The Formica Insulation Company, Cincinnati, Ohio. Silent gear and method of manufacture. 1,666,576; Apr. 17.
M S Co. (See Nitel, Frederick W., assignor.)
Maag, August, Company, The. (See Will, A. J., and Feldman, assignors.)
MacDonald, Archie A., Los Angeles, Calif., assignor to Hughes Tool Company, Houston, Tex. Rolling milling tool. 1,666,711; Apr. 17.
Mackey, James C., Paterson, N. J., and J. S. Kaufman, New York, assignors of one-third to V. Lansingh, Pelham, N. Y. Treating silk. 1,666,501; Apr. 17.
Macpherson, Thomas G., et al. (See Kaser, Walter I., assignor.)
Maier, George, Evansville, Ind. Combination desk and dressing table. Des. 74,937; Apr. 17.
Makin, John S., Philadelphia, Pa. Auxiliary water heater. 1,666,660; Apr. 17.
Mallard, Logan L., Norfolk, Va. Toy target game. 1,666,336; Apr. 17.
Mallory, Bonnie L., Cleveland Heights, Ohio. Shock absorber. 1,666,261; Apr. 17.
Malone, James G. (See Donner, J. A., and Malone.)
Mancos, George E., Richmond, Va. Inner-tube tester. 1,666,712; Apr. 17.
Mander, James L., Winnipeg, Manitoba, Canada. Cup and saucer. 1,666,389; Apr. 17.
Mann, Frederick E., Cherrydale, Va. Crystal detector. 1,666,462; Apr. 17.
Mann, Regina, New London, Conn. Citrus-fruit-serving dish. Des. 74,938; Apr. 17.
Manning, Edward, assignor to Manning Manufacturing Company, Rutland, Vt. Drip valve. 1,666,243; Apr. 17.
Manning Manufacturing Company. (See Manning, Edward, assignor.)
Maranda, Vincent, Montreal, Quebec, Canada. Tooth extractor. 1,666,860; Apr. 17.
March, Carl, Chicago, Ill. Flycatcher. 1,666,785; Apr. 17.
Marden, William L., assignor to Neptune Meter Company, New York, N. Y. Dial indicator for gasoline pumps, etc. 1,666,100; Apr. 17.
Marley, Donald, Los Angeles, Calif. Vehicle brake system. 1,666,390; Apr. 17.
Martin, Ida K., Minneapolis, Minn. Flag stand. Des. 74,939; Apr. 17.
Marvel Carbureter Company, The. (See Redmond, Albert G., assignor.)
Marvin, Ward W., Royal Oak, Mich. Internal-combustion engine. 1,666,295; Apr. 17.
Massey Concrete Products Corporation. (See Alexander, Earl C., assignor.)
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Seat. 1,666,391; Apr. 17.
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Seat. 1,666,392; Apr. 17.
Mattes, Leo A., Berkeley, Calif. Insect-poison feeder. 1,666,538; Apr. 17.
Maxson, Joe E. (See Essex, F. C., and Maxson.)
May, Otto A., Albuquerque, N. Mex. Lock. 1,666,786; Apr. 17.
Mayer, David B. (See Hinger, J. A., Mayer, and Wilson.)
Mayhood, Reginald G. W., San Leandro, Calif. Combination ventilator and canopy. 1,666,101; Apr. 17.
Maynard, Albert E., assignor to American Optical Company, Southbridge, Mass. Fluid-abradant-supplying means. 1,666,713; Apr. 17.
Maynard, Albert E., assignor to American Optical Company, Southbridge, Mass. Bevel-edging machine. 1,666,746; Apr. 17.
McCabe, Frank E., Chagrin Falls, assignor to The Rathbone Machine Company, Cleveland, Ohio. Molding machine. 1,666,577; Apr. 17.
McCabe, Frank E., Chagrin Falls, assignor to The Rathbone Machine Company, Cleveland, Ohio. Automatic control for the ramming heads of molding machines. 1,666,578; Apr. 17.
McCallum Hosiery Company. (See Egan, J. J., and Gregor, assignors.)
McCarthy, Daniel J., Elgin, assignor to Chicago Railway Signal & Supply Company, Carpentersville, Ill. Signal-light-supporting structure. 1,666,102; Apr. 17.
McCormick Bros. Company. (See Ostler, Clarence M., assignor.)
McCrink, Patrick J., Detroit, Mich. Rim spreader. 1,666,142; Apr. 17.
McDade, James E., Chicago, Ill. Memorization device. 1,666,337; Apr. 17.
McDonald, James, assignor to White Fuel Oil Engineering Corporation, New York, N. Y. Liquid-fuel-burning furnace. 1,666,747; Apr. 17.
McEldowney, Robert E., assignor to New Martinsville Glass Mfg. Co., New Martinsville, W. Va. Sandwich tray or similar article. Des. 74,940; Apr. 17.
McFarlan, Kenneth S., Pewee Valley, Ky. Scooter. 1,666,827; Apr. 17.
McFarland, Ernest H., assignor of one-half to J. A. Hodges, Louisburg, N. C. Air testing and inflating means. 1,666,861; Apr. 17.
McGilvray, Bernard, Quincy, Mass. Wrench. 1,666,103; Apr. 17.
McGogy, Donald H., McMinnville, Oreg. Pump. 1,666,463; Apr. 17.
McHenry, Nell E., Denison, Iowa. Road signal. 1,666,862; Apr. 17.
McLaren, David B. (See Furnivall, W. H. G., McLaren, and Laschinger.)
McLaughlin, Bernard E., Melrose Park, Ill. Adjustable straightedge. 1,666,244; Apr. 17.
McLellan, Joseph R., Wichita, Kans. Money till. 1,666,605; Apr. 17.
McMurtrie, John F., assignor of one-half to W. W. Hopkins, Springfield, Mass. Steering gear for motor vehicles. 1,666,104; Apr. 17.
McNiel, D. S. (See Essex, F. C., and Maxson, assignors.)
McQuaide, Thomas A. (See Heinle, Albert G., assignor.)
Mecklenburg, John C., Hancock, Minn. Cultivator shovel. 1,666,393; Apr. 17.
Mellor, Joseph W., Stoke-on-Trent, England. Manufacture of pottery or the like. 1,666,828; Apr. 17.
Mergott, J. E., Co. (See Hiering, William C., assignor.)
Merrick, Frank W., Boston, Mass. Sewing machine. 1,666,177; Apr. 17.
Merrill, Charles F., assignor to Draper Corporation, Hopedale, Mass. Spinning-ring traveler. 1,666,714; Apr. 17.
Metal Textile Corporation. (See Kingman, Russell B., assignor.)
Metzger, Richard, Heidelberg, Germany, assignor, by mesne assignments, to Grasselli Dyestuff Corporation, New York, N. Y. Dyeing preparation for cellulose esters. 1,666,715; Apr. 17.
Meuer, George J., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electric switch. 1,666,338; Apr. 17.
Meyer, Percy B., London, England. Rail anchor or anti-creep device for railway rails. 1,666,716; Apr. 17.
Meyrowitz, E. B., Inc. (See Cook, William N., assignor.)
Michelin, André J., Paris, assignor to Michelin et Cie., Clermont-Ferrand, France. Pneumatic-pressure gauge. 1,666,787; Apr. 17.
Michelin et Cie. (See Michelin, André J., assignor.)
Michell, Anthony G. M., assignor to Crankless Engines Limited, Melbourne, Victoria, Australia. Swash plate or slant-type reciproco-rotary mechanism. 1,666,539; Apr. 17.
Mickley, Joseph K., Western Springs, Ill., assignor to The Union Switch & Signal Company, Swissvale, Pa. Motor-controlling apparatus. 1,666,748; Apr. 17.
Miglin, Ben E., Archbald, Pa. Roaster. 1,666,394; Apr. 17.

Milliard, F. C., Engineering Company. (See Clements, Thomas H., assignor.)
Miller, Henry J., San Francisco, Calif. Sanitary receptacle for cigar, cigarette, and match stubs. 1,666,215; Apr. 17.
Miller, Louallen F., Minneapolis, Minn. Luminescent fuse plug. 1,666,339; Apr. 17.
Miller, Louis S., Los Angeles, Calif. Apparatus for sharpening handsaws. 1,666,395; Apr. 17.
Miller, S. E., trustee. (See Shiek, Daniel W., assignor.)
Miller, Tillie, Cheyenne, Wyo. Composition of matter for use in edging fabrics. 1,666,143; Apr. 17.
Miller, Wesley H. (See Young, J. H., and Miller.)
Mills, Harry A., and W. D. Pyle, Denver, Colo. Sound transmitter. 1,666,262; Apr. 17.
Mills Novelty Company. (See Peterson, Oscar, assignor.)
Mitchell, Robert B., assignor to Union Steel Products Company, Albion, Mich. Anchoring element for concrete construction. 1,666,340; Apr. 17.
Mock, John F., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Steel retainer. 1,666,425; Apr. 17.
Moffett, Patrick F., Worcester, Mass. Implement for teaching fingering. 1,666,464; Apr. 17.
Mohawk Corporation of Illinois. (See Chamberlain, Paul A., assignor.)
Möller, Franz, Zella-Mehlis, M. Moritz, and A. Gerstenberger, Chemnitz, Germany. Scaring pistol. 1,666,579; Apr. 17.
Monosmith, Clayton E. and D. J., Spencer, and O. B. Monosmith, Lorain, assignors of one-fourth to G. W. Saywell, Cleveland, Ohio. Carburetor. 1,666,296; Apr. 17.
Monosmith, David J. (See Monosmith, Clayton E., D. J., and O. B.)
Monosmith, Olney B. (See Monosmith, Clayton E., D. J., and O. B.)
Moore, George L., Chicago, Ill. Pumping lubricating cup. 1,666,502; Apr. 17.
Moore, James D. (See Campbell, James H., assignor.)
Morehouse, Frank B., and W. H. Kleinhammer, San Francisco, Calif., assignors to Trayway Mfg. Co. Wringer. 1,666,749; Apr. 17.
Morgan Construction Company. (See Lummis, Charles W., assignor.)
Morgan Knitting Mills. (See Goetze, Albin F., assignor.)
Morgan, Philip. (See Holden, A. P., and Morgan.)
Moritz, Martin. (See Möller, F., Moritz, and Gerstenberger.)
Morton, Edmund R., assignor to Western Electric Company, Incorporated, New York, N. Y. Inductance coil. 1,666,661; Apr. 17.
Morton Manufacturing Company. (See Smouse, John B., assignor.)
Moses, Edmund Q. (See Iserman, S., Vernet, and Moses.)
Mosler, Arthur R., New York, N. Y. Box. 1,666,105; Apr. 17.
Motor Products Corporation. (See Kellogg, Homer G., assignor.)
Mowat, James R., Kearny, assignor to The Clark Thread Company, Newark, N. J. Support for thread cops. 1,666,216; Apr. 17.
Mugdan, Martin. (See Baum, E., Deutsch, Herrmann, and Mugdan.)
Muller, Curt B. (See Arnt, Herald P., assignor.)
Munters, Carl G. (See Von Platen, B. C., and Munters.)
Murphy, P. H., Company. (See Bonsall, Charles D., assignor.)
Music Master Corporation. (See Zilger, Arno, assignor.)
Myers, Lewis E., Valparaiso, Ind., assignor, by mesne assignments, to The Northern Trust Company and H. H. Rockwell, trustees. Portable combination desk. 1,666,263; Apr. 17.
Myers, Marion C., Tenino, Wash. Tire boot or patch. 1,666,863; Apr. 17.
N. V. Philips' Gloeilampenfabrieken. (See de Boer, Jan H., assignor.)
N. V. Philips' Gloeilampenfabrieken. (See Coster, D., and von Heveesy, assignors.)
N. V. Philips' Gloeilampenfabrieken. (See Van Arkel, A. E., and de Boer, assignors.)
Nadel, Harry, New York, N. Y. Holding device. 1,666,662; Apr. 17.
Nagel, Theodore, Brooklyn, N. Y. Fuel material. 1,666,663; Apr. 17.
Nagin, Harry, assignor to The Tri-Lok Company, Pittsburgh, Pa. Trend carrier. 1,666,341; Apr. 17.
Nancolas, William L., Modesto, Calif. Hair-waving implement. 1,666,217; Apr. 17.
Nathan, Albert F. (See De Leeuw, Adolph L., assignor.)
Nathan, Emil, trustee. (See Lorton, Frank D., assignor.)
National Paper Can Company, The. (See Annen, James E., assignor.)
National Sales Machine Company. (See Fry, Benjamin L., assignor.)
National Standard Company. (See Johnson, Alfred H., assignor.)
National Tube Company. (See Weller, George L., assignor.)
Nelson, Elnathan K., Takoma Park, Md., assignor to The Government and the People of the United States of America. Manufacture of thymal from umbelluione. 1,666,342; Apr. 17.
Neptune Meter Company. (See Marden, William L., assignor.)
Neuls, Joseph D., Los Angeles, Calif., assignor to California Cyanide Company, Inc., New York, N. Y. Dispensing apparatus. 1,666,178; Apr. 17.
Neuvert, David, Herington, Kans. Concrete-tile-manufacturing machine. 1,666,606; Apr. 17.
New England Panama Hat Company Inc. See Kraut, Max, assignor.)
Newlin, James C., jr., Bryn Mawr, Pa. Watch holder. 1,666,664; Apr. 17.
New Martinsville Glass Mfg. Co. (See McEldowney, Robert E., assignor.)
New York Mills Corporation. (See Leiper, John, assignor.)
News Projection Corporation. (See Proctor, Barton A., assignor.)
Nieberding, Anthony A., Brookpark, Ohio. Heater. Des. 74,941; Apr. 17.
Niethamer, Edward, Bay City, Mich. Street indicating and announciating device. 1,666,503; Apr. 17.
Nittel, Frederick W., Attleboro Falls, assignor to M S Co., Attleboro, Mass. Watch bracelet end hook. 1,666,864; Apr. 17.
Noble, Arthur H., Pawtucket, R. I., assignor to Theodore W. Foster & Brother Company, Providence, R. I. Vanity case. Des. 74,942; Apr. 17.
Noll, Theobald H., Bronx, N. Y., assignor to A. J. Dispenza. Electrical steam generation. Re16,935; Apr. 17.
Norman, Max, Brooklyn, N. Y. Spoon. 1,666,106; Apr. 17.
Normandale, Clarence L., Yeovil, England. Top for motor vehicles. 1,666,297; Apr. 17.
Norris, Arthur J., Greenwich, Conn. Curtain ring. 1,666,298; Apr. 17.
Norris, Charles C., Riverside, Calif. Ventilating seat for toilet bowls. 1,66,465; Apr. 17.
Northern Trust Company, The, et al. (See Myers, Lewis E., assignor.)
Northrop, Jonas, assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass. Clutch mechanism for looms. 1,666,717; Apr. 17.
Norton, Stuart E. (See Shevlin, J. P., and Norton.)
Nystrom, Karl F., Chicago, Ill. Car construction. 1,666,299; Apr. 17.
Off'N'On Chain Corporation. (See Johnston, Andrew L., jr., assignor.)
Okochi, Masatosi, and K. Ebihara, assignors to Z. H. R. Kenkyujo, Tokyo, Japan. Manufacturing piston rings. 1,666,343; Apr. 17.
Olaneta, Harold, Brooklyn, N. Y. Flash light. 1,666,264; Apr. 17.
Olson, Jens, Lewiston, Idaho. Wheel tightener. 1,666,829; Apr. 17.
Oneida Community, Limited. (See Purchas, Frederick A., assignor.)
Orange Lighting Fixture Manufacturing Co. (See Seidell, Alfred P., assignor.)
Orsett, Coy, Boston, Mass. Combined automobile body and hood. Des. 74,943; Apr. 17.
Osborn, Jesse C., assignor to Grigsby-Grunow-Hinds Co., Chicago, Ill. Connection for timing devices for automobiles. 1,666,665; Apr. 17.
Osborne, John L. (See Buchanan, G. H., and Osborne.)
Ostler, Clarence M., Fort Wayne, assignor to McCormick Bros. Company, Albany, Ind. Sifter. 1,666,830; Apr. 17.
Overbury, Frederick C. (See Rahr, C. E., and Overbury.)
Ovestrud, Melvin, assignor of one-half to Twin City Forge & Foundry Company, Stillwater, Minn. Tie-plate punching and shearing press. 1,666,344; Apr. 17.
Ovestrud, Melvin, assignor of one-half to Twin City Forge & Foundry Company, Stillwater, Minn. Bending press for tie-plate flanges. 1,666,345; Apr. 17.
Oxweld Acetylene Company. (See Jones, George I., assignor.)
Oxweld Railroad Service Company, The. (See Hunt, William F., assignor.)
Packer, Eldredge H., San Francisco, Calif. Piston ring. 1,666,750; Apr. 17.
Page, Albert E. (See Scott, R. W., and Page.)
Page, Charles E., Los Angeles, Calif. Coffee maker. 1,666,070; Apr. 17.
Pagendarm, John F. (See Shannon, J. W., and Pagendarm.)
Palumbo, Joseph J., Astoria, N. Y. Game device. 1,666,788; Apr. 17.
Pandolfo, Carmelo, Montevideo, Uruguay. Electric heater. 1,666,831; Apr. 17.
Paramount Bedding Machine Co., of Boston. (See Baker, Phillip, assignor.)
Park, John H., Harrisburg, Pa. Screen. 1,666,580; Apr. 17.
Parker, C. Paul, trustee. (See Ekstrom, Gustaf H., assignor.)
Parsons, Stuart W., assignor to The Stanley Works, New Britain, Conn. Bolt guide. 1,666,751; Apr. 17.
Paul, Jennie H. (See Paul, William R. and J. H.)

Paul, William R. and J. H., Amarillo, Tex. Combined mop and wringer. 1,666,346; Apr. 17.
Pavia, Luigi, Allentown, Pa. Shuttle. 1,666,540; Apr. 17.
Peerless Machine Corporation. (See Scovill, James P., assignor.)
Peets, Elbert, Cleveland, Ohio. Closing cavities in trees. 1,666,245; Apr. 17.
Peirce, John R., 3d, and G. M. Andrews, 2d, Phoenixville, Pa. Flower sconce or similar article. Des. 74,944; Apr. 17.
Pelton, Louis, Chicago, Ill. Bathing suit. 1,666,504; Apr. 17.
Pender, Harold, Philadelphia, Pa. Engine-starting apparatus. 1,666,396; Apr. 17.
Perl, Albert H. F., and R. H. Carter, Ladbroke Grove, London, England. Hand-operated shearing device. 1,666,832; Apr. 17.
Perryman Electric Company. (See Perryman, George H., assignor.)
Perryman, George H., assignor to Perryman Electric Company, Inc., New York, N. Y. Grid for vacuum tubes. 1,666,071; Apr. 17.
Pescara, Raul P., Paris, France, assignor to The Pescara & Raymond Corporation, Dover, Del. Motor-compressor apparatus. 1,666,630; Apr. 17.
Pescara & Raymond Corporation, The. (See Pescara, Raul P., assignor.)
Peters, Edward C., Detroit, Mich. Rotary pump. 1,666,466; Apr. 17.
Peterson, Alfred T., Crooked Rivers, Saskatchewan, Canada. Vehicle braking mechanism. 1,666,349; Apr. 17.
Peterson, Glenn M. (See Blincoe, Felix H., assignor.)
Peterson, John M., Milwaukee, Wis. Radio appliance. 1,666,505; Apr. 17.
Peterson, Joseph A., College Station, Tex. Pliers. 1,666,467; Apr. 17.
Peterson, Oscar, assignor to Mills Novelty Company, Chicago, Ill. Brake device. 1,666,144; Apr. 17.
Petri, Gunther H., Boston, Mass. Forming machine. 1,666,752; Apr. 17.
Pew, Arthur E., jr., Bryn Mawr, and H. Thomas, Ridley Park, assignors to Sun Oil Company, Philadelphia, Pa. Process and apparatus for separating gasoline from crude oil. 1,666,300; Apr. 17.
Pew, Arthur E., jr., Bryn Mawr, and H. Thomas, Ridley Park, assignors to Sun Oil Company, Philadelphia, Pa. Process and apparatus for distilling mineral oil. 1,666,301; Apr. 17.
Pew, Arthur E., jr., Bryn Mawr, and H. Thomas, Ridley Park, assignors to Sun Oil Company, Philadelphia, Pa. Process and apparatus for distilling mineral oil. 1,666,302; Apr. 17.
Pew, Joseph N., jr., Ardmore, assignor to Sun Oil Company, Philadelphia, Pa. Oil tank. 1,666,666; Apr. 17.
Pew, Joseph N., jr., Ardmore, assignor to Sun Oil Company, Philadelphia, Pa. Oil tank. 1,666,667; Apr. 17.
Pfeiffer, Karl. (See Edeleanu, L., Pfeiffer, Gress, and Jodeck.)
Pfersch, Clarence L. (See Zomnir, J. E., and Pfersch.)
Phelix, Otto E., Tully, N. Y. Globe manipulator. 1,666,468; Apr. 17.
Phenix Lace Mills. (See Dodd, Alphonse M., assignor.)
Phillips, Arthur H., Hempstead, N. Y., assignor to American Sales Book Company, Limited, Toronto, Canada. Manifolding sales book. 1,666,506; Apr. 17.
Phillips, John X., jr., Washington, D. C., assignor, by mesne assignments, to Trico Products Corporation, Buffalo, N. Y. Windshield clearner. 1,666,107; Apr. 17.
Phillips, John X., jr., Washington, D. C., assignor, by mesne assignments, to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,666,108; Apr. 17.
Platt, James L., assignor to P. S. Warriner, Wilkes-Barre, Pa. Tire-chain clip. 1,666,397; Apr. 17.
Pickard, Joseph A. (See Hele-Shaw, H. S., Stillman, and Pickard.)
Pierce, George W., Lincoln, Nebr. Visible toaster. 1,666,398; Apr. 17.
Pitt, William L., Cleveland, Ohio. Dusting apparatus. 1,666,350; Apr. 17.
Platt, Archie W., Toledo, assignor to The Edward Ford Plate Glass Company, Rossford, Ohio. Continuous glass-polishing means. 1,666,347; Apr. 17.
Platt, Joseph, Detroit, Mich. Amplifier. 1,666,303; Apr. 17.
Playfoot, Edward J., Galeton, Pa. Game. 1,666,718; Apr. 17.
Pobanz, George W., Geneseo, Ill. Belt-applying tool. 1,666,789; Apr. 17.
Pokorny, Frank. (See La Joie, H. J., Urquhart, and Pokorny.)
Powers, Ernest L. (See Krenke, Otto A., assignor.)
Price, Sidney L., London, England. Lamp for use on motor vehicles and for other purposes. 1,666,876; Apr. 17.
Privott, John H., and B. C. Williams, Norfolk, Va. Grate. 1,666,790; Apr. 17.
Proctor, Barton A., assignor, by mesne assignments, to News Projection Corporation, New York, N. Y. Projecting machine. 1,666,304; Apr. 17.
Proctor, Barton A., assignor to News Projection Corporation, New York, N. Y. News-projection machine. 1,666,305; Apr. 17.
Proctor, Barton A., assignor to News Projection Corporation, New York, N. Y. Tension control for ticker tape. 1,666,306; Apr. 17.
Proctor, Barton A., assignor to News Projection Corporation, New York, N. Y. Jump-absorbing mechanism. 1,666,307; Apr. 17.
Proctor, Barton A., assignor to News Projection Corporation, New York, N. Y. Mechanism for controlling the tension of ticker tape. 1,666,308; Apr. 17.
Prosperity Company, The. (See Clisson, Albert B., assignor.)
Pruett, Curtis D., Dallas, and W. Kadernaschka, Troup, Tex. Railway cattle guard. 1,666,348; Apr. 17.
Pudaloff, Joseph. (See Zica, John, assignor.)
Puffe, Henry D., Seattle, Wash. Auto carrier rack 1,666,507; Apr. 17.
Pungs, Leo, and R. Herzog, Berlin, assignors to C. Lorenz Aktiengeselischaft, Berlin-Tempelhof, Germany. High-frequency telegraphing apparatus. 1,666,753; Apr. 17.
Purchas, Frederick A., McGraw, assignor to Oneida Community, Limited, Oneida, N. Y. Tray or the like. 1,666,668; Apr. 17.
Pure Oil Company, The. (See Harnsberger, Audley E., assignor.)
Pyle, William D. (See Mills, H. A., and Pyle.)
Quinn, James A., Montreal, Quebec, Canada. Curling iron. 1,666,469; Apr. 17.
Radel, John J., Newark, N. J. Telephone instrument. 1,666,399; Apr. 17.
Radio Corporation of America. (See Ashbridge, Noel, assignor.)
Radio Corporation of America. (See Clough, Newsome H., assignor.)
Radio Patents Corporation. (See Schmierer, Johannes M., assignor.)
Rahe, William, Cincinnati, Ohio. Automobile bumper. 1,666,754; Apr. 17.
Rahr, Chester E., Brookline, Mass., and F. C. Overbury, Hillsdale, N. J. Roofing. 1,666,755; Apr. 17.
Rainaud, Henry E., Meriden, Conn. Process and apparatus for spinning metal tubes. 1,666,581; Apr. 17.
Ranger, Arthur W., London, England. Sheet-delivery apparatus for use on printing machines. 1,666,246; Apr. 17.
Rassmann, F., Manufacturing Company. (See Rassmann, Hugo C., assignor.)
Rassmann, Hugo C., assignor to F. Rassmann Manufacturing Company, Beaver Dam, Wis. Water-bowl construction for cattle. 1,666,791; Apr. 17.
Rathbone Machine Company, The. (See McCabe, Frank E., assignor.)
Rattermann, L. B., et al. (See Iserman, S., Vernet, and Moses, assignors.)
Ray, John N., assignor, by mesne assignments, to Brandes Laboratories, Inc., Newark, N. J. Magnometer. 1,666,309; Apr. 17.
Raymond, Achille F., Grenoble, France. Fastening button. 1,666,582; Apr. 17.
Reaves, William P., Greensboro, N. C. Reflecting and refracting device for stereoscopes. 1,666,145; Apr. 17.
Reaves, William P., Greensboro, N. C. Reflecting and refracting device for stereoscopes. 1,666,146; Apr. 17.
Redmond, Albert G., Indianapolis, Ind., assignor to The Marvel Carbureter Company, Flint, Mich. Air heater for charge-forming devices. 1,666,147; Apr. 17.
Reeves, Dache M., Lee Hall, Va. Precision altimeter. 1,666,179; Apr. 17.
Regan Safety Devices Company, The. (See Lyon, Claude A., assignor.)
Remington Typewriter Company. (See Barney, Edwin E., assignor.)
Remondy, Léon E., Paris, France. Percussion fuse. 1,666,792; Apr. 17.
Research Corporation. (See Auspitzer, Alfred J., assignor.)
Reutter, Philip A., assignor to Scovill Manufacturing Company, Waterbury, Conn. Perfume bottle and cap. 1,666,541; Apr. 17.
Rhodes-Hochriem Manufacturing Co. (See Hochriem, Gustav E., assignor.)
Rhodes, William A., and A. Bankoff, Brooklyn, N. Y. Radiant-energy collector for aerials. 1,666,834; Apr. 17.
Rhodes, William A., and D. Bellar, Brooklyn, N. Y. Vacuum tube. 1,666,883; Apr. 17.
Rice, George D. (See Biek, W. G., and Rice.)
Rice, Mary E. (See Snyder, Harry F., assignor.)
Rick, Herbert R., Kent, Ohio. Grave vault. 1,666,148; Apr. 17.
Riker, Andrew L., Fairfield, Conn. Ventilator. 1,666,218; Apr. 17.
Robbins, Leroy V., Baton Rouge, La., assignor to Standard Oil Development Company. Apparatus for removing coke from stills. 1,666,865; Apr. 17.
Robertson, H. H., Company. (See Young, J. H., and Miller, assignors.)
Robinson, Joseph, New York, N. Y. Automatic trainpipe coupling. 1,666,310; Apr. 17.
Robles, Charles, Brooklyn, N. Y. Amusement device. 1,666,219; Apr. 17.
Rockwell, Harold H., et al. (See Myers, Lewis E., assignor.)
Rogers, Wardneigh T., Bird City, Kans. Ironing board. 1,666,607; Apr. 17.

Rollin, Simon, Tulle, assignor to Societe Anonyme des Anciens Etablissements Hatot, Paris, France. Electric striking mechanism. 1,666,351; Apr. 17.

Roos, Carlisle K., and M. G. Allison, Fort Dodge, Iowa, assignors to United States Gypsum Company, Chicago, Ill. Light-weight gypsum products. 1,666,180; Apr. 17.

Rose, Harry M., Philadelphia, Pa. Place-card support. 1,666,400; Apr. 17.

Rosenfeld, Joseph E., Battle Creek, Mich. Tongue-blade holder. 1,666,265; Apr. 17.

Rosenzweig, Siegfried, New York, N. Y. Mounting for machinery. 1,666,149; Apr. 17.

Rosenzweig, Siegfried, New York, N. Y. Insulating unit for deadening vibration and sound. 1,666,311; Apr. 17.

Rost, Friedrich, Kusnacht, near Zurich, Switzerland. Valve. 1,666,583; Apr. 17.

Rouanet, Louis, assignor to Compagnie d'Applications Mecaniques, Ivry-Port, France. Split pulley. 1,666,352; Apr. 17.

Royal Metal Works. (See Clausing, Louis F., assignor.)

Ruff, De Witt C., 2d, St. Paul, and J. H. Healy, Mahtomedi, assignors to J. A. and J. H. Healy and D. W. Hickey, St. Paul, Minn. Radiator hanger. 1,666,866; Apr. 17.

Ruhren, John J., Guttenberg, N. J., assignor to H. S. Vipond, and W. B. Leitch, Montreal, Canada. Warp tension and let-off. 1,666,835; Apr. 17.

Runyan, William B., Dayton, Ohio. Metallurgical briquette and using it. 1,666,312; Apr. 17.

Ruths, Johannes, Djursholm, Sweden. Steam plant. 1,666,426; Apr. 17.

Salley, Jack. (See Jakopets, Gyuro E. B., assignor.)

Salterini, John B., New York, N. Y. Bridge lamp. Des. 74,945; Apr. 17.

Salterini, John B., New York, N. Y. Bridge lamp. Des. 74,946; Apr. 17.

Sanford, Don A., deceased; G. L. Sanford, administratrix, Washington, D. C. Electric switch. 1,666,470; Apr. 17.

Sanford, Grata L., administratrix. (See Sanford, Don A.)

Sanguinetti, Adolphus, Stockport, England. Controlling means of variable-speed gearing for motor vehicles having handle bars. 1,666,793; Apr. 17.

Sann, Otto, Johnstown, Pa. Grinding machine. 1,666,313; Apr. 17.

Santee, Elmer V., Williamson, N. Y. Stone gatherer. 1,666,836; Apr. 17.

Sarazin, Frank L., Wabash, Minn. Combined bolt and nut lock. 1,666,608; Apr. 17.

Sass, Carl, Hamburg-Harvestehude, Germany. Cleansing box for use in sewerage pipes. 1,666,756; Apr. 17.

Saunders, Lewis E., Enstwood, South Australia, and M. Finkelstein, Sydney, New South Wales, Australia. Disinfecting device for water-closets and the like. 1,666,669; Apr. 17.

Sater, John R. (See Heck, C. P., and Sater.)

Sawyer, Emerson D., Chicago, Ill. Yieldable barrier. 1,666,508; Apr. 17.

Saywell, George W. (See Monosmith, Clayton E., D. J., and O. B., assignors.)

Scally, George, Chicago, Ill. Safety device for locks. 1,666,542; Apr. 17.

Schaper, Harry C., St. Louis, Mo., assignor, by mesne assignments, to Schaper Scale Company. Even-balance-indicating scale. 1,666,314; Apr. 17.

Schaper Scale Company. (See Schaper, Harry C., assignor.)

Scharf, Joachim B., Chicago, Ill. Storage-battery flushing and refilling device. 1,666,837; Apr. 17.

Schelf, Adolph C., Colp, Ill. Wrench. 1,666,353; Apr. 17.

Schilpp, Charles P., Cleveland Heights, assignor to W. A. Foss, Cleveland, Ohio. Spinner. 1,666,072; Apr. 17.

Schindler, Linus P., Hamburg, Germany. Safety device for printing machines. 1,666,584; Apr. 17.

Schlossareck, Hugo G. A., Yonkers, N. Y. Flytrap. 1,666,509; Apr. 17.

Schmid, Richard, and W. Wezel, Stuttgart, Germany, assignors to Biax Flexible Shaft Co., Incorporated. Portable polishing tool. 1,666,181; Apr. 17.

Schmidt, Henry F., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Stoker-blower control mechanism. 1,666,510; Apr. 17.

Schmidt, Oscar C., assignor to The Cincinnati Butchers' Supply Company, Cincinnati, Ohio. Stuffing machine. 1,666,631; Apr. 17.

Schmidt, William R., Beemer, Nebr. Firewood-splitting machine. 1,666,795; Apr. 17.

Schmierer, Johannes M., Gross-Lichterfelde, near Berlin, Germany, assignor to Radio Patents Corporation, New York, N. Y. Electrical operating apparatus. 1,666,182; Apr. 17.

Schneider, Alfons. (See Klee, J., and Schneider.)

Schnoebelen, Clement A., Cedar Rapids, Iowa. Lightning-rod air terminal bracket. 1,666,670; Apr. 17.

Schuldt, Clarence, Des Plaines, Ill. Electric cord swivel connecter. 1,666,247; Apr. 17.

Schuldt, Clarence, Des Plaines, Ill. Three-way lamp socket. 1,666,248; Apr. 17.

Schultz, Ferdinand H., Council Bluffs, Iowa. Bottle opener. 1,666,249; Apr. 17.

Schultz, George W., Bowers, Pa. Telephone muffler. 1,666,220; Apr. 17.

Schwartz, Frederick, assignor to Robert Findlay Manufacturing Company, Inc., Brooklyn, N. Y. Table for radio receiving sets and the like. Des. 74,947; Apr. 17.

Schwartz, Frederick, assignor to Robert Findlay Manufacturing Company, Inc., Brooklyn, N. Y. Table for radio receiving sets and the like. Des. 74,948; Apr. 17.

Schwerdtfeger, Frederick W., New York, N. Y. Airship landing station. 1,666,354; Apr. 17.

Schwendner, Anthony F., Essington, Pa., assignor to Westinghouse Electric & Manufacturing Company. Underfeed stoker. 1,666,512; Apr. 17.

Scott, George N., West New Brighton, N. Y., assignor to Bethlehem Shipbuilding Corporation, Ltd. Oil-burning attachment for furnace fronts. 1,666,511; Apr. 17.

Scott, Robert W., Babylon, and A. E. Page, Brooklyn, assignors to Scott & Williams Inc., New York, N. Y. Apparatus for and method of knitting. 1,666,794; Apr. 17.

Scott & Williams Inc. (See Scott, R. W., and Page, assignors.)

Scovill, James P., Troy, assignor, by mesne assignments, to Peerless Machine Corporation, New York, N. Y. Tobacco-stemming machine. 1,666,719; Apr. 17.

Scovill, James P., Troy, assignor to Peerless Machine Corporation, New York, N. Y. Tobacco-stripping machine. 1,666,720; Apr. 17.

Scovill Manufacturing Company. (See Reutter, Philip A., assignor.)

Sebell, Harry, Boston, Mass. Container. 1,666,221; Apr. 17.

Seeley, Harold T., Schenectady, N. Y., assignor to General Electric Company. System of electric distribution. 1,666,471; Apr. 17.

Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture backplate or article of analogous nature. Des. 74,949; Apr. 17.

Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture backplate or article of analogous nature. Des. 74,950; Apr. 17.

Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture backplate or article of analogous nature. Des. 74,951; Apr. 17.

Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture backplate or article of analogous nature. Des. 74,952; Apr. 17.

Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture backplate or article of analogous nature. Des. 74,953; Apr. 17.

Seigle, Peter G. (See Haines, Winfield S., assignor.)

Selden Company, The. (See Andrews, Chester E., assignor.)

Sether, Alvin, Chippewa Falls, Wis. Rack or holder for paper bags. 1,666,355; Apr. 17.

Service Equipment Co. (See Farley, George E., assignor.)

Seybold, Christian, Duren, and J. Boltersdorf, Kreuzau, near Duren, Germany. Paper-making machine. 1,666,472; Apr. 17.

Shafer, Carl R., Detroit, Mich., assignor to Box Patents Corporation, Bordentown, N. J. Box construction. Re16,936; Apr. 17.

Shannon, John W., San Rafael, and J. F. Pagendarm, Oakland, assignors to Shannon Rotary Valve Motor Company, San Francisco, Calif. Rotary valve mechanism. 1,666,513; Apr. 17.

Shannon Rotary Valve Motor Company. (See Shannon, J. W., and Pagendarm, assignors.)

Shapiro, Esther M. (See Edelman, Max, assignor.)

Shapiro, Lazarus, New York, N. Y. Electromagnetic translating device. 1,666,183; Apr. 17.

Shawmut Engineering Company. (See Hathaway, E. F., and Bixby, assignors.)

Sheberashenko, Andrey, Detroit, Mich. Radius tool. 1,666,109; Apr. 17.

Shelby Metal Products Company, The. (See Broomhall, Harley, assignor.)

Shelton, William G., St. Louis, Mo. Hair-waving apparatus. 1,666,266; Apr. 17.

Sherrill, Richard M., Evanston, Ill., assignor to Central Scientific Company. Advertising device. 1,666,721; Apr. 17.

Shevlin, Joseph P., and S. E. Norton, Denver, Colo. Tire-casing spreader. 1,666,150; Apr. 17.

Shick, David W., assignor to S. E. Miller, trustee, Aurora, Ill. Writing machine. 1,666,267; Apr. 17.

Shuler, Harry V., Spencer, Nebr. Corn-husking machine. 1,666,796; Apr. 17.

Shuman, Henry A., Fairbury, Nebr. Helicopter. 1,666,315; Apr. 17.

Sigler, Carlton C., Cleveland, Ohio. Paper clip. 1,666,514; Apr. 17.

Skillman, Edward, Bartlesville, Okla., assignor to Doherty Research Company, New York, N. Y. Oil burner. 1,666,268; Apr. 17.

Skinner Automotive Device Co. (See Skinner, R. L., and Lambert, assignors.)

Skinner, Ralph L., and E. H. Lambert, assignors to Skinner Automotive Device Co., Inc., Detroit, Mich. Sleeve type of internal-combustion-engine lubrication. 1,666,184; Apr. 17.

Slepian, Joseph, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. High-voltage direct-current system. 1,666,473; Apr. 17.

Sloan, John F. (See Christy, J. E., and Sloan.)

Smickle, Raymond H., Belvidere, N. J. Paper fastener. 1,666,356; Apr. 17.

Smidt, Lulah M., Los Angeles, Calif. Hair curler. 1,666,269; Apr. 17.

Smith, A. L., Iron Works, The. (See Smith, Arthur L., assignor.)

Smith, Arthur L., Portland, Oreg. Electric tester. 1,666,273; Apr. 17.

Smith, Arthur L., Melrose, Mass., assignor to The A. L. Smith Iron Works, Chelsea, Mass. Stair-landing construction. 1,666,222; Apr. 17.

Smith, William A., jr., New York, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Valve for rock drills. 1,666,427; Apr. 17.

Smouse, John B., Chicago, Ill., assignor to Morton Manufacturing Company. Relensable vestibule-curtain handle. 1,666,073; Apr. 17.

Snyder, Harry F., Los Angeles, Calif., assignor of one-half to M. E. Rice. Collapsible tent. 1,666,757; Apr. 17.

Snyder, Jacob R., assignor to The Star Rebound Controller Company, Cleveland, Ohio. Shock absorber. 1,666,357; Apr. 17.

Snyder, Simon, assignor to Sprout, Waldron and Company, Muncy, Pa. Grain-cracking machine. 1,666,797; Apr. 17.

Societa Italiana Ernesto Breda. (See Belluzzo, Giuseppe, assignor.)

Societe Anonyme des Anciens Etablissements Hatot. (See Rollin, Simon, assignor.)

Societe Anonyme des Matieres Colorantes & Produits Chimiques de Saint-Denis. (See Lantz, R., and Wahl, assignors.)

Societe Pellaumail-Moutel & Cie. (See Durupt, Jean B., assignor.)

Söderberg, Sten E. B., assignor to Arca Regulators, Inc., New York, N. Y. Compensation for regulation. 1,666,270; Apr. 17.

Söffge, Herman, Bochum, Germany. Pressure regulator. 1,666,609; Apr. 17.

Soref, Harry E., Milwaukee, Wis. Lock. 1,666,880; Apr. 17.

Sorell, Otto D., Los Angeles, Calif. Game board for game pieces and surface. 1,666,474; Apr. 17.

Souhigian, Marsop, Lawrence, Mass. Snow-removing machine. 1,666,358; Apr. 17.

Sparks, Manley A., Atlanta, Ga. Dental apparatus. 1,666,316; Apr. 17.

Speer, Reid C., Pittsburgh, Pa. Apparatus for washing glasses and the like. 1,666,671; Apr. 17.

Spicers, Limited. (See Hands, Henry J., assignor.)

Spiegel, May, Stern Co. (See Golinick, Paul A., assignor.)

Spielman, Adolph, Philadelphia, Pa. Cutting machine. 1,666,271; Apr. 17.

Spiering, Charles W., assignor of one-fourth to T. C. Black, Cathlamet, Wash. Logging hook. 1,666,272; Apr. 17.

Sprout, Waldron and Company. (See Snyder, Simon, assignor.)

Sprout, Waldron and Company. (See Taggart, Daniel B., assignor.)

Standard Oil Development Company. (See Robbins, Leroy V., assignor.)

Stanley Works, The. (See Parsons, Stuart W., assignor.)

Star Chandelier Co. (See Boehringer, John A., assignor.)

Sta-Rite Hair Pin Company. (See Gibson, Clark A., assignor.)

Star Pin Company, The. (See Emerson, Dean A., assignor.)

Star Rebound Controller Company, The. (See Snyder, Jacob R., assignor.)

Starr, Samuel T., et al. (See Kamedish, Peter B., assignor.)

Statham, Noel, Irvington-upon-Hudson, N. Y. Fastening means and operating member therefor. 1,666,110; Apr. 17.

Steam Pressing Iron Company. (See Hoffman, Louis, assignor.)

Stebbins, Albert H., Los Angeles, Calif. Dust extractor. 1,666,475; Apr. 17.

Stebbins, Albert H., Los Angeles, Calif. Air classifier. 1,666,476; Apr. 17.

Stebbins, Albert H., Los Angeles, Calif. Air classifier. 1,666,477; Apr. 17.

Steel & Tubes, Inc. (See Sussman, Julius L., assignor.)

Steen, Rapha P. (See Craig, M. A., Steen, and Logsdon.)

Stelhilber, Adolf A., Rock Island, Ill. Stock-storage apparatus. 1,666,074; Apr. 17.

Steves, Herbert J. A., New York, N. Y. Game board. 1,666,359; Apr. 17.

Stewart-Warner Speedometer Corporation. (See Sussin, Victor, assignor.)

Stiemke, Walter H. (See Jett, George C., assignor.)

Stiert, Ralph B., Sapulpa, Okla. Automatic headlight. 1,666,151; Apr. 17.

Stillman, Reginald C. B. (See Hele-Shaw, H. S., Stillman, and Pickard.)

Stobrawa, Karl, Gleiwitz, Germany. Preparing pig iron in highly-heated mixers. 1,666,428; Apr. 17.

Stockton, Wholston V., jr., Albany, assignor to American Meter Company, Incorporated, New York, N. Y. Meter. 1,666,075; Apr. 17.

Stoetzel, Joseph J., New York, N. Y., assignor to G. & G. Atlas Systems, Inc. Self-regulating gravity-discharge terminal. 1,666,758; Apr. 17.

Stolp, Charles, jr., Chicago, Ill., assignor to The Flintkote Company, Boston, Mass. Roofing. 1,666,429; Apr. 17.

Stone, Walter B., Webster, Mass., assignor to The Electric Storage Battery Company, Philadelphia, Pa. Sawing machine. 1,666,632; Apr. 17.

Stover, Clinton W. (See Woodhead, H., and Stover.)

Stribling, Paul O., jr., Atlanta, Ga. Internal-combustion engine. 1,666,838; Apr. 17.

Strigl, Karl J., New York, N. Y. Transmission mechanism. 1,666,152; Apr. 17.

Strite, George T., assignor of two-thirds to H. W. Bolens, Port Washington, Wis. Garden tractor. 1,666,185; Apr. 17.

Sullivan Machinery Company. (See Halleck, Frank A., assignor.)

Sun Oil Company. (See Pew, Joseph N., jr., assignor.)

Sun Oil Company. (See Pew, A. E., jr., and Thomas, assignors.)

Sunday, James J. (See Kelch, J. W., and Sunday.)

Supplee, Russell R., Bridgeport, Pa. Automatic safety angle cock. 1,666,478; Apr. 17.

Sussin, Victor, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Automobile bumper. 1,666,111; Apr. 17.

Sussman, Julius L., Kew Gardens, N. Y., assignor to Steel & Tubes, Inc., Cleveland, Ohio. Metal tube. 1,666,401; Apr. 17.

Sweet, Willis M., Niles, Mich. Dirigible headlight. 1,666,867; Apr. 17.

Sweetland, Ernest J., Montclair, N. J. Filter. 1,666,515; Apr. 17.

Swimmer, Robert, New York, N. Y. Combined electric-lamp holder and reflector. Des. 74,954; Apr. 17.

Symmes, Whitman, San Francisco, Calif. Electric-fixture support. 1,666,223; Apr. 17.

Taggart, Daniel B., assignor to Sprout, Waldron and Company, Muncy, Pa. Grain-cracking machine. 1,666,798; Apr. 17.

Tancetti, Guglielmo, Genoa, Italy. Cleaning device. 1,666,360; Apr. 17.

Tarbox, John P., assignor to Budd Wheel Company, Philadelphia, Pa. Demountable disk wheel. 1,666,722; Apr. 17.

Telepix Corporation of America. (See Ferree, M., and Wissmar, assignors.)

Thomas, Henry. (See Pew, A. E., jr., and Thomas.)

Thomson, Charles J., assignor to Westcott & Thomson, Inc., Philadelphia, Pa. Ruling machine. 1,666,634; Apr. 17.

Thompson, Laurence, Warren, Manitoba, Canada. Windmill. 1,666,361; Apr. 17.

Thompson, Livingston A., Waukesha, Wis. Malted-milk product. 1,666,633; Apr. 17.

Tinker, Herbert W., assignor to Federal Pressed Steel Company, Milwaukee, Wis. Bumper device for vehicles. 1,666,317; Apr. 17.

Tizzani, Felix, Lyon, France. Instrument for measuring the perimeter of teeth. 1,666,430; Apr. 17.

Tobey, H. R. (See Bennett, Earl J., assignor.)

Tomasulo, Nestor N., assignor to E. Julian, Philadelphia, Pa. Hair clipper. 1,666,224; Apr. 17.

Tong, Woo, Cleveland, Ohio. Device for cleaning fountain pens. 1,666,186; Apr. 17.

Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Program-selecting circuits. 1,666,153; Apr. 17.

Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Distribution of programs over wires. 1,666,154; Apr. 17.

Trammell, Jefferson D., Fort Worth, Tex. Reenforced-concete pipe. 1,666,790; Apr. 17.

Traylor Engineering & Manufacturing Company. (See Bernhard, Richard, assignor.)

Trayway Mfg. Co. (See Morehouse, F. B., and Kleinhammer, assignors.)

Trico Products Corporation. (See Folberth, Frederick G. and W. M., assignors.)

Trico Products Corporation. (See Phillips, John X., jr., assignor.)

Tri-Lok Company, The. (See Nagin, Harry, assignor.)

Trosch, Alfred, assignor to Consolidated Machine Tool Corporation of America, Rochester, N. Y. Cross-rail-clamping mechanism for machine tools. 1,666,431; Apr. 17.

Trow, Charles A. (See Corey, W. G., and Trow.)

Troy Sunshade Company, The. (See Dillingham, Frederick A., assignor.)

Trumbo, Stacy D., Columbus, Ohio. Electrical roach trap. 1,666,723; Apr. 17.

Tschudy, William, Yonkers, N. Y. Vapor rectifier. 1,666,516; Apr. 17.

Tully, Edward E., Birkenhead, and W. Lovis, London, England. Propelling device for ships. 1,666,517; Apr. 17.

Turner, Ernest J., Pittsburgh, Pa. Hot top. 1,666,759; Apr. 17.

Twin City Forge & Foundry Company. (See Ovestrud, Melvin, assignor.)

Ufer, Alfred, Boghum, Germany. 1,666,076; Apr. 17.

Unglesby, Lewis H., assignor of one-half to M. H. Hughes, Baton Rouge, La. Pneumatic-tire signal. 1,666,155; Apr. 17.

Union Steel Products Company. (See Mitchell, Robert B., assignor.)

Union Switch & Signal Company, The. (See Mickley, Joseph K., assignor.)

United Autographic Register Company. (See Jensen, Louis, assignor.)

United States Gypsum Company. (See Birdsey, Charles R., assignor.)

United States Gypsum Company. (See Roos, C. K., and Allison, assignors.)

Universal Holding Company. (See Gallagher, Charles R., assignor.)

Universal Holding Company. (See Griffin, Alvah M., assignor.)

Urquhart, Ubert. (See La Joie, H. J., Urquhart, and Pokorny.)

Vail, N. R. (See Boykin, Robert O., assignor.)

Van Arkel, A. E., and J. H. de Boer, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Separating hafnium and zirconium. 1,666,800; Apr. 17.

Van Hamersveld, John J. N., assignor to The Warner and Swasey Company, Cleveland, Ohio. Turret mechanism for machine tools. 1,666,187; Apr. 17.

Van Husen, Norman. (See Jandus, H. S., and Van Husen.)

Van Pelt, Arnold F. (See Fischer, F., and Van Pelt.)

Varaud, André, Geneva, Switzerland. Percussion fuse for projectiles subjected to a rotary movement around their axis during their trajectory. 1,666,672; Apr. 17.

Varney, Ernest B., Pueblo, Colo. Wire-bending pliers. 1,666,801; Apr. 17.

Vartanian, Frank D., Portland, Me. Lighting apparatus for gas burners. 1,666,610; Apr. 17.

Ventrella, Michael V., New York, N. Y. Automatic rotary book-display device. 1,666,274; Apr. 17.

Venzie, Frederick M., Philadelphia, Pa. Building element. 1,666,318; Apr. 17.

Vernet, Waldemar. (See Iserman, S., Vernet, and Moses.)

Victor, Alexander F., Davenport, Iowa. Film container. 1,666,077; Apr. 17.

Vincent, Walter P., Portland, Me. Wind-actuated novelty. 1,666,543; Apr. 17.

Viney, William D., Saltfork, Okla. Automobile engine-cranking apparatus. 1,666,432; Apr. 17.

Vlpond, Herbert S., et al. (See Ruhren, John J., assignor.)

Voight, George F., Oakland, Calif., assignor to Economy Products Corporation. Plasterer's grille. 1,666,544; Apr. 17.

Von Allmen, Emil, Louisville, Ky. Detachable union. 1,666,802; Apr. 17.

Von Hevesy, Georg. (See Coster, D., and von Hevesy.)

Von Platen, Baltzar C., and C. G. Munters, Stockholm, Sweden, assignors to Electrolux Servel Corporation, New York, N. Y. Refrigerator. 1,666,760; Apr. 17.

Voskamp, John A., New York, N. Y., assignor to Irving Iron Works Company. Armored reenforced-concrete slab. 1,666,156; Apr. 17.

Voskamp, John A., New York, N. Y., assignor to Irving Iron Works Company. Armored reenforced-concrete slab. 1,666,157; Apr. 17.

Vreeland Corporation. (See Vreeland, Frederick K., assignor.)

Vreeland, Frederick K., Montclair, assignor to Vreeland Corporation, Hoboken, N. J. Radiofrequency amplifier. 1,666,518; Apr. 17.

Waddy, George M., Buffalo, N. Y. Safety brake-beam support. 1,666,585; Apr. 17.

Wadsworth, David T., Cold Springs, assignor to The Wadsworth Electric Manufacturing Company, Covington, Ky. Inclosed electric switch. 1,666,724; Apr. 17.

Wadsworth Electric Manufacturing Company, The. (See Wadsworth, David T., assignor.)

Wahl, André. (See Lantz, R., and Wahl.)

Wait, Wesley, Newburgh, N. Y. Bridge. 1,666,586; Apr. 17.

Wait, William, jr., Garden City, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc. Combination seat and control mechanism for aircraft. 1,666,761; Apr. 17.

Walker, Joseph D., Whitesburg, Tenn. Book holder. 1,666,803; Apr. 17.

Wallis, Barnes N., Westminster, assignor to Airship Guarantee Company, Limited, London, England. Airship. 1,666,112; Apr. 17.

Walsh, Harry C. H., Chicago, Ill. Power press. 1,666,275; Apr. 17.

Ward, Frederick K., Seattle, Wash. Clutch-operating device. 1,666,225; Apr. 17.

Warner and Swasey Company, The. (See Van Hamersveld, John J. N., assignor.)

Warriner, Paul S. (See Platt, James L., assignor.)

Watrous, Clifford M., assignor to Gong Bell Manufacturing Company, East Hampton, Conn. Wheel for toys. 1,666,611; Apr. 17.

Watts, Felix J., assignor to H. A. Douglas, Bronson, Mich. Lock. 1,666,319; Apr. 17.

Watts, Felix J., assignor to H. A. Douglas, Bronson, Mich. Lock-controlled electric switch. 1,666,320; Apr. 17.

Weaver, Edwin M., Reading, Pa. Musical instrument. 1,666,226; Apr. 17.

Webb, Purcell T., Christchurch, New Zealand. Safety device for railways and the like. 1,666,362; Apr. 17.

Weeden, Arthur W., assignor of three-fifths to E. M. Freeman, Quincy, Mass. Rotary motor or pump. 1,666,321; Apr. 17.

Weidlich Bros. Mfg. Co., The. (See Flauder, Alfred J., assignor.)

Weinfield, Benjamin S., Schenectady, N. Y., assignor to General Electric Company. System of electric distribution. 1,666,433; Apr. 17.

Weinhelm, Emil, New York, N. Y. Terminal strainer for dope systems. 1,666,725; Apr. 17.

Wellensiek, Louis H., assignor to Hughes Tool Company, Houston, Tex. Soft-formation core drill. 1,666,726; Apr. 17.

Weller, George L., Elyria, Ohio, assignor to National Tube Company, Boiler. 1,666,276; Apr. 17.

Weller, John, Great Bookham, England. Tensioning device for transmission chains and the like. 1,666,882; Apr. 17.

Wellfare, Frederick E., Dallas, Tex. Mechanism for opening and closing gates, windows, and similar structures. 1,666,113; Apr. 17.

Wendel, Reinhold M., Stockholm, Sweden. Beating engine. 1,666,587; Apr. 17.

Werbe, Walter F., Martinsville, Ind. Gate. 1,666,727; Apr. 17.

Wertenbruch, Antony, assignor to Larrowe Milling Company, Detroit, Mich. Bag-filling machine. Re16,934; Apr. 17.

West, Elmer S., Mayslick, Ky. Poultry feeder. 1,666,322; Apr. 17.

West, Kirby P., et al. (See Harrison, Cecil B., assignor.)

West, Ross, et al. (See Harrison, Cecil B., assignor.)

West, Ross R., San Francisco, Calif. Vault ventilator. 1,666,519; Apr. 17.

Westcott & Thomson, Inc. (See Thomson, Charles J., assignor.)

Western Electric Company. (See Bandur, Adolph F., assignor.)

Western Electric Company. (See Björnson, Björn G., assignor.)

Western Electric Company. (See Buckley, Oliver E., assignor.)

Western Electric Company. (See Burgess, Harry A., assignor.)

Western Electric Company. (See Hartley, Ralph V. L., assignor.)

Western Electric Company. (See Heising, Raymond A., assignor.)

Western Electric Company. (See Little, John S., assignor.)

Western Electric Company. (See Morton, Edmund R., assignor.)

Westinghouse Electric & Manufacturing Company. (See Allen, Robert C., assignor.)

Westinghouse Electric & Manufacturing Company. (See Bailey, Rochard W., assignor.)

Westinghouse Electric & Manufacturing Company. (See Hodgkinson, Francis, assignor.)

Westinghouse Electric and Manufacturing Company. (See Schmidt, Henry F., assignor.)

Westinghouse Electric & Manufacturing Company. (See Schwendner, Anthony F., assignor.)

Westinghouse Electric & Manufacturing Company. (See Slepian, Joseph, assignor.)

Westman, Francis C., Toronto, Ontario, Canada. Ice-scoring machine. 1,666,868; Apr. 17.

Westrich, Alphons L., Hawthorne, Calif. Wall construction. 1,666,635; Apr. 17.

Wezel, Walter. (See Schmid, R., and Wezel.)

Wheeler, C. H., Manufacturing Company. (See Kothny, Gottlank L., assignor.)

White Fuel Oil Engineering Corporation. (See McDonald, James, assignor.)

White, Jessee M., Philadelphia, Pa. Wire-stripping machine. 1,666,277; Apr. 17.

Whiting & Davis Company. (See Lynds, Fred H., assignor.)

Whitlock, Ralph G., Los Angeles, Calif. Printing press. 1,666,188; Apr. 17.

Whitney, George W., New York, N. Y. Cigarette case. 1,666,520; Apr. 17.

Wild, Wilhelm. (See Gaus, W., and Wild.)

Will, Anthony J., and D. A. Feldman, assignors to The August Maag Company of Baltimore, Baltimore, Md. Bake pan. 1,666,363; Apr. 17.

Williams, Bill C. (See Privott, J. H., and Williams.)

Williams, Harry, Detroit, Mich. Lock. 1,666,078; Apr. 17.

Williams, John P., Bayside, assignor to Duplex Electric Company, New York, N. Y. Air-vent means for vaults. 1,666,673; Apr. 17.

Williams, Leonard P., Newark, N. J. Anchor. 1,666,805; Apr. 17.

Williams Tool Corporation. (See Hall, Leslie S., assignor.)

Willmann, Joseph, Derby, Conn. Freezing ice cream. 1,666,804; Apr. 17.

Willrich, Edgar G., Los Angeles, Calif. Pump-operating mechanism. 1,666,227; Apr. 17.

Willys-Overland Company, The. (See Grimm, George E., assignor.)

Wilson, Albert, Chicago, Ill. Type-composition-binding frame. 1,666,674; Apr. 17.

Wilson, George H. (See Henderson, J. W., and Wilson.)

Wilson, James. (See Hinger, J. A., Mayer, and Wilson.)

Winslow, Samuel, Skate Manufacturing Company, The. (See Copeland, Eugene A., assignor.)

Winton, John T., Odessa, Tex. Metallic window sash. 1,666,839; Apr. 17.

Wissmar, Joseph. (See Ferree, M., and Wissmar.)

Witt, Murray, Brooklyn, assignor, by mesne assignments, to Atlas Manufacturing Corporation, New York, N. Y. Sign for automobiles. 1,666,545; Apr. 17.

Wolf, Franz, New York, N. Y. Marking or cutting device. 1,666,479; Apr. 17.

Wolf, Philippe, Paris, France. Washing apparatus for coals. 1,666,189; Apr. 17.

Wolfe, William, Ebensburg, Pa. Mouthpiece for horns. 1,666,228; Apr. 17.

Wolfson, Sidney L., assignor to The Cuno Engineering Corporation, Meriden, Conn. Electric lighter for cigars, cigarettes, etc. 1,666,546; Apr. 17.

Wolters, Eric E. (See Brainard, G. C., Fitch, and Wolters.)

Wood, Alexander P., Schenectady, assignor of two-sevenths to V. W. Appel, New York, N. Y. Collapsible tube. 1,666,402; Apr. 17.

Wood, Charles N. and W. E., Sacramento, Calif. Beet topper. 1,666,636; Apr. 17.

Wood, William E. (See Wood, Charles N. and W. E.)

Woodbridge, Joseph L., Philadelphia, Pa. Separator for the electrodes of electrolytic cells. 1,666,762; Apr. 17.

Woodhead, Harry, and C. W. Stover, Cleveland, Ohio. Hollow bracing unit. 1,666,278; Apr. 17.

Woods, Leonard G., Pittsburgh, Pa. Road strip. 1,666,612; Apr. 17.

Woods, Leonard G., Pittsburgh, Pa. Road strip. 1,666,613; Apr. 17.

Woods, Leonard G., Pittsburgh, Pa. Junction for metal bars. 1,666,614; Apr. 17.

Woodward, Thomas S., Leetonia, Ohio. Book end or similar article. Des. 74,955; Apr. 17.

Wordingham, George, Milwaukee, Wis. Garment container. 1,666,434; Apr. 17.

Wright, Norman L., Mount Vernon, N. Y. Radiator ornament. 1,666,806; Apr. 17.

Yanochowski, George A., La Grange, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Switch. 1,666,763; Apr. 17.

Yonehiro, Hatsuzuchi, Honolulu, Hawaii. Burner. 1,666,807; Apr. 17.

Young, James H., Pittsburgh, and W. H. Miller, Wilkinsburg, assignors to H. H. Robertson Company, Pittsburgh, Pa. Glazing construction. 1,666,764; Apr. 17.

Young, L. A., Company. (See Hagen, Walter, assignor.)

Youngstown Pressed Steel Company, The. (See Galbreath, William W., assignor.)

Zica, John, Lackawanna, assignor of one-half to J. Pudaloff, Niagara Falls, N. Y. Digging, lifting, and conveying apparatus. 1,666,869; Apr. 17.

Ziebarth, Frederick A., Delano, Minn. Fence construction. 1,666,765; Apr. 17.

Zilliger, Arno, Narberth, assignor to Music Master Corporation, Philadelphia, Pa. Adjusting the antenna of radio apparatus. 1,666,480; Apr. 17.

Zlock, Edward J., Rockford, Ill. Device for holding stockings on forms. 1,666,840; Apr. 17.

Zomnir, Joseph E., and C. L. Piersch, Springfield, Mass., assignors to The Diamond Match Company, Chicago, Ill. Match-making machine. 1,666,547; Apr. 17.

Zook, John E., Kansas City, Mo. Window washer. 1,666,190; Apr. 17.

Zweigbergk, Thorsten, London, England. Circuit making and breaking device. 1,666,675; Apr. 17.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 17TH DAY OF APRIL, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Absorbing mechanism, Jump-. B. A. Proctor. 1,666,307; Apr. 17.
Acid, Manufacturing formic. G. H. Buchanan and J. L. Osborne. 1,666,437; Apr. 17.
Advertising device. R. M. Sherrill. 1,666,721; Apr. 17.
Aerating and screening liquid, Apparatus for. F. B. Chappell. 1,666,164; Apr. 17.
Aerials, Radiant-energy collector for. W. A. Rhodes and A. Bankoff. 1,666,834; Apr. 17.
Aeroplane. M. Gallet and A. B. Anderson. 1,666,132; Apr. 17.
Agricultural implement. A. J. Auspitzer. 1,666,841; Apr. 17.
Air circulating and heating apparatus. P. R. Falk. 1,666,816; Apr. 17.
Air classifier. A. H. Stebbins. 1,666,476–7; Apr. 17.
Aircraft, Combination seat and control mechanism for. W. Walt, jr. 1,666,761; Apr. 17.
Air injector, Steam-actuated. L. E. Harter. 1,666,136; Apr. 17.
Airplane. R. B. Beisel and W. L. Gilmore. 1,666,769; Apr. 17.
Airship. B. N. Wallis. 1,666,112; Apr. 17.
Airship landing station. F. W. Schwerdtfeger. 1,666,354; Apr. 17.
Air testing and inflating means. E. H. McFarland. 1,666,861; Apr. 17.
Alarm for mines, Pressure-fluctuating. R. C. Fagan. 1,666,282; Apr. 17.
Altimeter, Precision. D. M. Reeves. 1,666,179; Apr. 17.
Amalgamator. F. and L. Davis. 1,666,121; Apr. 17.
Amplifier. J. Platt. 1,666,303; Apr. 17.
Amplifier, Audiofrequency. H. P. Donle. 1,666,412; Apr. 17.
Amplifier, Radiofrequency. F. K. Freeland. 1,666,518; Apr. 17.
Amusement device. C. Robles. 1,666,219; Apr. 17.
Anchor. L. P. Williams. 1,666,805; Apr. 17.
Anchor, Rail. B. B. Betts. 1,666,114; Apr. 17.
Anchor, Wire. A. J. Gurney. 1,666,493; Apr. 17.
Ankle brace. H. L. Johnston. 1,666,290; Apr. 17.
Article forming and folding machine. S. J. Campbell. 1,666,086; Apr. 17.
Ash tray or similar article. D. M. Eaton. Des. 74,922; Apr. 17.
Asphalt, Packing. F. Breeze, jr. 1,666,730; Apr. 17.
Auto carrier rack. H. D. Puffe. 1,666,507; Apr. 17.
Automobile bodies, Door stile for. A. J. Fisher. 1,666,446; Apr. 17.
Automobile body and hood, Combined. C. Orsett. Des. 74,943; Apr. 17.
Automobile engine-cranking apparatus. W. D. Viney. 1,666,432; Apr. 17.
Automobile steering master. C. A. Johnson. 1,666,386; Apr. 17.
Automobiles, Connection for timing devices for. J. C. Osborn. 1,666,665; Apr. 17.
Automobiles, Sight instrument for. S. W. Fuerth. 1,666,236; Apr. 17.
Automotive appliance. D. Gentile. 1,666,492; Apr. 17.
Awning, Collapsible metal. W. R. Hopkins. 1,666,657; Apr. 17.
Bag: *See*—
Brief bag.
Bag and grip, Combined hand. W. N. Hunter. 1,666,704; Apr. 17.
Bag and like lock. W. C. Hiering. 1,666,654; Apr. 17.
Bag-filling machine. A. Wertenbruch. Re16,934; Apr. 17.
Bake 'pan. A. J. Will and D. A. Feldman. 1,666,363; Apr. 17.
Ball: *See*—
Golf ball.
Bank or receptacle, Coin. O. F. Baughman and J. Hobart. 1,666,524; Apr. 17.
Barrier, Yieldable. E. D. Sawyer. 1,666,508; Apr. 17.
Bars, Junction for metal. L. G. Woods. 1,666,614; Apr. 17.
Bathing suit. L. Pelton. 1,666,504; Apr. 17.
Battery-element extractor. A. B. Côte. 1,666,847; Apr. 17.
Battery flushing and refilling device, Storage-. J. E. Scharf. 1,666,837; Apr. 17.
Beacon, Vertical. H. F. Cuntz. 1,666,196; Apr. 17.
Bearing, Adjustable self-aligning. F. Burgess. 1,666,593; Apr. 17.
Bearing, Thrust. R. C. Allen. 1,666,521; Apr. 17.
Beating engine. R. M. Wendel. 1,666,587; Apr. 17.
Bed lock. L. N. Lumb. 1,666,424; Apr. 17.
Beet topper. C. N. and W. E. Wood. 1,666,636; Apr. 17.
Belt remover, Axle-generator. M. J. Brennan. 1,666,592; Apr. 17.
Belt-tensioning device for threading machines and the like. L. S. Hall. 1,666,135; Apr. 17.
Bevel-edging machine. A. E. Maynard. 1,666,746; Apr. 17.
Binding frame, Type-composition-. A. Wilson. 1,666,674; Apr. 17.
Blower for boilers, Soot. L. J. Bayer. 1,666,080; Apr. 17.
Board: *See*—
Game board. Ironing board.
Boiler: *See*—
Steam boiler.
Boiler. G. T. Ladd. 1,666,659; Apr. 17.
Boiler. G. L. Weller. 1,666,276; Apr. 17.
Boilers, Ash hopper for. R. H. Beaumont. 1,666,768; Apr. 17.
Bolt and nut lock, Combined. F. L. Sarazin. 1,666,608; Apr. 17.
Bolt guide. S. W. Parsons. 1,666,751; Apr. 17.
Book-display device, Automatic rotary. M. V. Ventrella. 1,666,274; Apr. 17.
Book end or similar article. T. S. Woodward. Des. 74,955; Apr. 17.
Book holder. J. D. Walker. 1,666,803; Apr. 17.
Bottle and cap, Perfume. P. A. Reutter. 1,666,541; Apr. 17.
Bottle opener. F. H. Schultz. 1,666,249; Apr. 17.
Bottles, Closure means for. E. M. Carhart. 1,666,683; Apr. 17.
Box: *See*—
Drill speed box. Mail box.
Box. A. R. Mosler. 1,666,105; Apr. 17.
Box and cover, Metal. W. C. Hiering. 1,666,653; Apr. 17.
Box construction. C. R. Shafer. Re16,936; Apr. 17.
Box for use in sewerage pipes, Cleansing. C. Sass. 1,666,756; Apr. 17.
Brace: *See*—
Ankle brace.
Bracket: *See*—
Terminal bracket.
Brake: *See*—
Vehicle brake.
Brake-beam support, Safety. G. M. Waddy. 1,666,585; Apr. 17.
Brake device. O. Peterson. 1,666,144; Apr. 17.
Brake-operating means. A. Y. Dodge. 1,666,558; Apr. 17.
Brake solution, Hydraulic-. W. G. Calkins. 1,666,871; Apr. 17.
Brassière. J. W. Krause. 1,666,421; Apr. 17.
Bridge. W. Walt. 1,666,586; Apr. 17.
Brief bag. T. W. Johnson. 1,666,878; Apr. 17.
Briquette and using it, Metallurgical. W. B. Runyan. 1,666,312; Apr. 17.
Briquetting. A. Carlson. 1,666,618; Apr. 17.
Broom, Dust-laying. M. R. Behling. 1,666,369; Apr. 17.
Brush, Hair. W. H. Blake. 1,666,081; Apr. 17.
Brush-lifting mechanism for electric motor or the like. G. H. Leland. 1,666,459; Apr. 17.
Buckle. C. J. Dahlgren. 1,666,528–9; Apr. 17.
Building construction. F. H. Franson. 1,666,235; Apr. 17.
Building element. F. M. Venzie. 1,666,818; Apr. 17.
Building unit and construction. F. W. Fitzpatrick. 1,666,199; Apr. 17.
Bumper, Automobile. W. Rabe. 1,666,754; Apr. 17.
Bumper, Automobile. V. Sussin. 1,666,111; Apr. 17.
Bundling machine. J. J. Hart. 1,666,205; Apr. 17.
Burner: *See*—
Gas burner. Oil burner.
Burner. H. Yonehiro. 1,666,807; Apr. 17.
Burning oil. A. P. Holden and P. Morgan. 1,666,207; Apr. 17.
Button, Fastening. A. F. Raymond. 1,666,582; Apr. 17.
Cabinet, Gravity-feed bottle cooling and dispensing. R. E. Lee. 1,666,575; Apr. 17.
Cabinet, Toilet-accessory. W. C. Hiering. 1,666,652; Apr. 17.
Camera-holding stand. W. Buben. 1,666,770; Apr. 17.
Camera, Photomicrographic. F. F. Lucas. 1,666,499; Apr. 17.
Camera shutter. F. Deckel and M. Geiger. 1,666,557; Apr. 17.
Cameras, Slot-shutter mechanism for photographic. F. Grosse. 1,666,852; Apr. 17.
Camp-fire outfit. F. D. Lorton. 1,666,293; Apr. 17.
Camphor, Recovery of. A. Frieden. 1,666,845; Apr. 17.
Can-heading machine. C. Gueritey. 1,666,239; Apr. 17.
Can opener. J. Cereghino. 1,666,366; Apr. 17.
Cap, Bathing. G. P. Kaul. 1,666,098; Apr. 17.
Car construction. K. F. Nystrom. 1,666,299; Apr. 17.
Car roof. C. D. Bonsall. 1,666,115; Apr. 17.

Carburetor. C. E., D. J., and O. B. Monosmith. 1,666,296; Apr. 17.
Card register. D. A. Engström. 1,666,125; Apr. 17.
Card support, Place-. H. M. Rose. 1,666,400; Apr. 17.
Carrier: *See*—
Clothes carrier. Tread carrier.
Carton, Display. D. A. Emerson. 1,666,691; Apr. 17.
Case: *See*—
Cigarette case. Merchandising case.
Case for licenses, etc. E. B. Burrell. 1,666,117; Apr. 17.
Cash drawer, Autographic-register. L. Jensen. 1,666,385; Apr. 17.
Casting machine. F. N. Brown, jr. 1,666,843; Apr. 17.
Centrifugal device. G. H. Leland. 1,666,458; Apr. 17.
Chain, Antiskid. A. L. Johnston, jr. 1,666,497; Apr. 17.
Chain-reversing mechanism. H. A. Clark. 1,666,845; Apr. 17.
Chains, Apparatus for making. A. G. Heinle. 1,666,380; Apr. 17.
Chandelier or similar article. J. A. Boehringer. Des. 74,916; Apr. 17.
Chandelier or similar article. J. A. Boehringer. Des. 74,917; Apr. 17.
Chandelier or similar article. J. A. Boehringer. Des. 74,919; Apr. 17.
Check holder. J. W. Henderson and G. H. Wilson. 1,666,820; Apr. 17.
Cigarette. H. Alexander. 1,666,062; Apr. 17.
Cigarette case. G. W. Whitney. 1,666,520; Apr. 17.
Circuit closer. J. W. Denniston. 1,666,122; Apr. 17.
Circuit making and breaking device. T. Zwelgbergk. 1,666,675; Apr. 17.
Circuits, Repeater. B. G. Björnson. 1,666,676; Apr. 17.
Clamp. J. Anderson. 1,666,079; Apr. 17.
Clamp plate. H. S. Jandus and N. Van Husen. Des. 74,927; Apr. 17.
Clamping mechanism for machine tools. C. Bouillon. 1,666,484; Apr. 17.
Clamping mechanism for machine tools, Cross-rail-. A. Trosch. 1,666,431; Apr. 17.
Clasp and producing the same, Hair. C. A. Gibson. 1,666,138; Apr. 17.
Cleaner: *See*—
Grain cleaner. Windshield cleaner.
Window cleaner.
Cleaning device. G. Tancetti. 1,666,360; Apr. 17.
Clip: *See*—
Paper clip. Tire-chain clip.
Clipper, Hair. N. N. Tomasulo. 1,666,224; Apr. 17.
Clothes carrier. O. Kvare. 1,666,536; Apr. 17.
Clutch-operating device. F. K. Ward. 1,666,225; Apr. 17.
Coating cores. J. S. Little. 1,666,214; Apr. 17.
Cock, Automatic safety angle. R. R. Supplee. 1,666,478; Apr. 17.
Coffee maker. C. E. Page. 1,666,070; Apr. 17.
Coil. H. D. Currier. 1,666,120; Apr. 17.
Coil, Inductance. E. R. Morton. 1,666,661; Apr. 17.
Coke from stills, Apparatus for removing. L. V. Robbins. 1,666,865; Apr. 17.
Collapsible tube. A. P. Wood. 1,666,402; Apr. 17.
Combing and like machines, Waste-collecting device for. W. Hartley. 1,666,379; Apr. 17.
Compensation for regulation. S. E. B. Söderberg. 1,666,270; Apr. 17.
Composition of matter for use in edging fabrics. T. Miller. 1,666,148; Apr. 17.
Composition to be used with antiknock compounds. W. Gaus. 1,666,693; Apr. 17.
Concrete and the like, Staining and hardening. R. B. Lammens. 1,666,423; Apr. 17.
Concrete construction, Anchoring element for. R. B. Mitchell. 1,666,340; Apr. 17.
Concrete pipe, Reenforced-. J. D. Trammell. 1,666,799; Apr. 17.
Concrete slab, Armored reenforced-. J. A. Voskamp. 1,666,156; Apr. 17.
Concrete slab, Armored reenforced-. J. A. Voskamp. 1,666,157; Apr. 17.
Concrete-tile-manufacturing machine. D. Neuvert. 1,666,606; Apr. 17.
Condenser assembly control. H. H. Busse. 1,666,682; Apr. 17.
Connecter for electric circuits. H. C. Foster. 1,666,089; Apr. 17.
Container. H. Sebell. 1,666,221; Apr. 17.
Container, Garment. G. Wordingham. 1,666,434; Apr. 17.

Flower and plant box. B. A. Hubert. 1,666,240; Apr. 17.
Flower sconce or similar article. J. R. Peirce, 3d, and G. M. Andrews, 2d. Des. 74,944; Apr. 17.
Fluid-abradant-supplying means. A. E. Maynard. 1,666,713; Apr. 17.
Flycatcher. C. March. 1,666,785; Apr. 17.
Flytrap. H. G. A. Schlossareck. 1,666,509; Apr 17.
Forging machine. F. A. Halleck. 1,666,287; Apr. 17.
Form-locating means. L. G. Julihn. 1,666,140; Apr. 17.
Forming machine. G. H. Petri. 1,666,752; Apr. 17.
Frame: *See*—
Binding frame.
Fuel for use in internal-combustion engines. S. Iserman, W. Vernet, and E. Q. Moses. Re16,937; Apr. 17.
Fuel material. T. Nagel. 1,666,663; Apr. 17.
Furnace: *See*—
Hot-air furnace.
Furnace. I. W. Foltz. 1,666,200; Apr. 17.
Furnace. C. J. Huber. 1,666,418; Apr. 17.
Furnace fronts, Oil-burning attachment for. G. N. Scott. 1,666,511; Apr. 17.
Furnace walls and arches, Construction of. W. A. Gilchrist. 1,666,284; Apr. 17.
Furniture fitment. E. Gomme. 1,666,646; Apr. 17.
Fuse for projectiles subjected to a rotary movement around their axes during their trajectory, Percussion. A. Varaud. 1,666,672; Apr. 17.
Fuse, Percussion. L. E. Rémondy. 1,666,792; Apr. 17.
Fuse plug, Luminescent. L. F. Miller. 1,666,339; Apr. 17.
Game. H. D. Hardenstein. 1,666,448; Apr. 17.
Game. E. J. Playfoot. 1,666,718; Apr. 17.
Game board. H. J. A. Steves. 1,666,859; Apr. 17.
Game board for game pieces and surface projectiles. O. D. Sorrell. 1,666,474; Apr. 17.
Game device. J. J. Palumbo. 1,666,788; Apr. 17.
Garter. D. B. Jacobs. 1,666,823; Apr. 17.
Gas-absorption apparatus. W. G. Laird. 1,666,744; Apr. 17.
Gas burner, Water-heater. R. C. Hoyt. 1,666,094; Apr. 17.
Gas heater, Combined radiating and circulating. G. L. Bridge. 1,666,679; Apr. 17.
Gas producer. C. W. Lummis. 1,666,604; Apr. 17.
Gas wells, Method of flowing. G. C. Henceroth. 1,666,779; Apr. 17.
Gasoline from crude oil, Process and apparatus for separating. A. E. Pew, jr., and H. Thomas. 1,666,300; Apr. 17.
Gasoline reserve. H. M. Cooper. 1,666,254; Apr. 17.
Gate: *See*—
Railroad-crossing gate.
Gate. W. F. Werbe. 1,666,727; Apr. 17.
Gauge: *See*—
Pressure gauge.
Gauge. A. O. Cravin. 1,666,556; Apr. 17.
Gauge, Piston-pressure. J. F. Key. 1,666,419; Apr. 17.
Gear and manufacture, Silent. R. W. Lytle. 1,666,576; Apr. 17.
Generator: *See*—
Steam generator.
Generator for electric-arc welding. M. M. Irvine. 1,666,452; Apr. 17.
Glass: *See*—
Splice-laminating glass.
Glass-polishing means, Continuous. A. W. Platt 1,666,847; Apr. 17.
Glazing construction. J. H. Young and W. H. Miller. 1,666,764; Apr. 17.
Globe manipulator. O. E. Phelix. 1,666,468; Apr. 17.
Goggle nose bridge. W. N. Cook. 1,666,407; Apr. 17.
Golf ball. W. Hagen. 1,666,699; Apr. 17.
Golf putter. E. R. Holland. 1,666,174; Apr. 17.
Governor mechanism for prime movers, Emergency. W. P. Dryer. 1,666,490; Apr. 17.
Grain cleaner. D. W. Detwiler. 1,666,370; Apr. 17.
Grain-cracking machine. S. Snyder. 1,666,797; Apr. 17.
Grain-cracking machine. D. B. Taggart. 1,666,798; Apr. 17.
Grate. J. H. Privott and B. C. Williams. 1,666,790; Apr. 17.
Grid for vacuum tubes. G. N. Perryman. 1,666,071; Apr. 17.
Grille, Plaster's. G. F. Voight. 1,666,544; Apr. 17.
Grinder, Gear. A. L. De Leeuw. 1,666,737; Apr. 17.
Grinding machine. O. Sann. 1,666,313; Apr. 17.
Grinding wheel, Automatically-adjustable. A. M. Fuller. 1,666,237; Apr. 17.
Guide, Delivery. C. R. Birdsey. 1,666,161; Apr. 17.
Gurdy. I. Chilman. 1,666,552; Apr. 17.
Gypsum products, Light weight. C. K. Roos and M. G. Allison. 1,666,180; Apr. 17.
Hafnium and zirconium, Separating. A. E. Van Arkle and J. H. de Boer. 1,666,800; Apr. 17.
Hafnium and zirconium, Separation of. D. Coster and G. von Hevesy. 1,666,440; Apr. 17.
Hafnium and zirconium, Separation of. J. H. de Boer. 1,666,811; Apr. 17.
Hair-waving apparatus. W. G. Shelton. 1,666,266; Apr. 17.
Hair-waving implement. W. L. Nancolas. 1,666,217; Apr. 17.
Handle: *See*—
Releasable vestibule-curtain handle.
Handsaws, Apparatus for sharpening. L. S. Miller. 1,666,395; Apr. 17.
Hanger: *See*—
Radiator hanger.
Harrow attachment. J. M. Harlan. 1,666,778; Apr. 17.
Harvester. H. Heuer. 1,666,137; Apr. 17.
Harvester attachment, Grain-. A. Kraft. 1,666,706; Apr. 17.
Harvester, Cane. J. Fisher. 1,666,818; Apr. 17.
Hat, Flexible straw. M. Kraut. 1,666,875; Apr. 17.
Hay-loading device. M. Hegerland. 1,666,092; Apr. 17.
Header, Short-stem milo-maize. W. B. Johnson. 1,666,824; Apr. 17.
Headlight, Automobile. R. B. Stiert. 1,666,151; Apr. 17.
Headlight, Dirigible. W. M. Sweet. 1,666,867; Apr. 17.
Headlight, Tiltable and dirigible. T. C. Holliday. 1,666,856; Apr. 17.
Heater: *See*—
Electric heater. Water heater.
Gas heater.
Heater. J. H. Campbell. 1,666,233; Apr. 17.
Heater. A. A. Nieberding Des. 74,941; Apr. 17.
Heater for charge-forming devices, Air. A. G. Redmond. 1,666,147; Apr. 17.
Heating device. L. F. Clausing. 1,666,867; Apr. 17.
Heel for boots or shoes. P. H. Letchford. 1,666,603; Apr. 17.

Helicopter. H. A. Shuman. 1,666,315; Apr. 17.
Hinge, Windshield. H. G. Kellogg. 1,666,211; Apr. 17.
Holder, Gum-stick. A. L. Jackson. 1,666,095; Apr. 17.
Holding device. H. Nadel. 1,666,662; Apr. 17.
Hollow bracing unit. H. Woodhead and C. W. Stover. 1,666,278; Apr. 17.
Hook: *See*—
Logging hook. Watch bracket end hook.
Horn, Sound-amplifying. J. Kersten. 1,666,571; Apr. 17.
Hose, Nonexpansive. C. C. Bradbury. 1,666,365; Apr. 17.
Hot-air furnace. F. A. Conrad. 1,666,736; Apr. 17.
Hot top. E. J. Turner. 1,666,759; Apr. 17.
Ice cream, Freezing J. Willmann. 1,666,804; Apr. 17.
Ice-scoring machine. F. C. Westman. 1,666,868; Apr. 17.
Indicating and annunciating device, Street. E. Nietham-er. 1,666,503; Apr. 17.
Indicator: *See*—
Street indicator.
Inner-tube tester. G. E. Mancos. 1,666,712; Apr. 17.
Insect-poison feeder. L. A. Mattes. 1,666,538; Apr. 17.
Instrument for setting up profiles. S. Hagen. 1,666,563; Apr. 17.
Insulating unit for deadening vibration and sound. S. Rosenzweig. 1,666,311; Apr. 17.

Presses, Fluid-pressure control for. J. A. Hinger, D. B. Mayer, and J. Wilson. 1,666,449; Apr. 17.
Pressing implement. L. Hoffman. 1,666,599; Apr. 17.
Pressure gauge, McLeod-type. C. S. Hornberger. 1,666,739; Apr. 17.
Pressure gauge, McLeod-type. P. E. Klopsteg. 1,666,743; Apr. 17.
Pressure gauge, Pneumatic-. A. J. Michelin. 1,666,787; Apr. 17.
Pressure regulator. H. Söffge. 1,666,609; Apr. 17.
Price-tag holder and attaching device. R. A. League. 1,666,859; Apr. 17.
Printing machines, Safety device for. L. P. Schlindler. 1,666,584; Apr. 17.
Printing machines, Sheet-delivery apparatus for use on. A. W. Ranger. 1,666,246; Apr. 17.
Printing press. R. G. Whitlock. 1,666,188; Apr. 17.
Projecting machine. B. A. Proctor. 1,666,304; Apr. 17.
Projecting screen, Daylight. O. Büchner. 1,666,808; Apr. 17.
Projection machine, News-. B. A. Proctor. 1,666,305; Apr. 17.
Program-selecting circuits. J. P. Toomey. 1,666,153; Apr. 17.
Programs over wires, Distribution of. J. F. Toomey. 1,666,154; Apr. 17.
Pruning shears, Stem-gripping. F. H. Blincoe. 1,666,253; Apr. 17.
Puller: *See*—
Fence-post puller.
Pulley, Split. L. Rouanet. 1,666,352; Apr. 17.
Pulverizing machine. E. H. Elzemeyer. 1,666,124; Apr. 17.
Pump. D. H. McGogy. 1,666,463; Apr. 17.
Pump, Gasoline. E. E. Eickmeyer. 1,666,644; Apr. 17.
Pump, Liquid-dispensing. L. C. Ament. 1,666,064; Apr. 17.
Pump-operating mechanism. E. G. Willrich. 1,666,227; Apr. 17.
Pump, Rotary. E. C. Peters. 1,666,466; Apr. 17.
Pump, Siphon. G. V. Gavaza. 1,666,850; Apr. 17.
Pumping apparatus, Duplex. A. C. Durdin, jr. 1,666,873; Apr. 17.
Pumping lubricating cup. G. L. Moore. 1,666,502; Apr. 17.
Pumping power, Hydraulic. W. G. Corey and C. A. Trow. 1,666,255; Apr. 17.
Punching and shearing press, Tie-plate. M. Ovestrud. 1,666,344; Apr. 17.
Rack: *See*—
Auto carrier rack. Towel rack.
Rack or holder for paper bags. A. Sether. 1,666,355; Apr. 17.
Radiator cap. L. Boatright. Des. 74,912; Apr. 17.
Radiator hanger. D. C. Ruff and J. H. Healy. 1,666,866; Apr. 17.
Radiator, Oil. C. W. Bradford. 1,666,485; Apr. 17.
Radiator ornament. N. L. Wright. 1,666,806; Apr. 17.
Radio apparatus, Adjusting the antenna of. A. Zilliger. 1,666,480; Apr. 17.
Radio appliance. J. M. Peterson. 1,666,505; Apr. 17.
Radiocondenser. P. A. Chamberlain. 1,666,163; Apr. 17.
Radioreceivers, Volume-control system for. E. F. Andrews. 1,666,522; Apr. 17.
Razor-blade holder. J. P. Colgrove. 1,666,118; Apr. 17.
Railroad-crossing gate, Automatic electric. R. O. Dorgan. 1,666,559; Apr. 17.
Railroad-track structure. W. Dalton. 1,666,688; Apr. 17.
Railway accidents, Safety device for preventing. H. Grebehem. 1,666,695; Apr. 17.
Railway cattle guard. C. D. Pruett and W. Kadernaschka. 1,666,348; Apr. 17.
Railway rail, wheel, and brake shoe. J. L. Connelly. 1,666,167; Apr. 17.
Railway rails, Rail anchor or anticreep for. P. B. Meyer. 1,666,716; Apr. 17.
Railways and the like, Safety device for. P. T. Webb. 1,666,362; Apr. 17.
Receptacle for cigar, cigarette, and match stubs, Sanitary. H. J. Miller. 1,666,215; Apr. 17.
Refining heavy mineral oils by means of sulphur dioxide in a continuous operation. L. Edeleanu, K. Pfeiffer, K. Gross, and P. Jodeck. 1,666,560; Apr. 17.
Refrigerator. B. C. von Platen and C. G. Munters. 1,666,760; Apr. 17.
Register: *See*—
Cash register.
Register. J. W. Kelch and J. J. Sunday. 1,666,569; Apr. 17.
Regulator: *See*—
Pressure regulator.
Resistance coil. N. Ashbridge. 1,666,066; Apr. 17.
Rim spreader. P. J. McCrink. 1,666,142; Apr. 17.
Ring: *See*—
Curtain ring. Piston ring.
Ring or article of similar nature, Finger. B. Gross. Des. 74,926; Apr. 17.
Roach trap, Electrical. S. D. Trumbo. 1,666,723; Apr. 17.
Road signal. N. E. McHenry. 1,666,862; Apr. 17.
Road strip. L. G. Woods. 1,666,612–13; Apr. 17.
Roaster. B. E. Miglin. 1,666,394; Apr. 17.
Rocket. T. G. Hitt. 1,666,598; Apr. 17.
Rocket, Revolving. T. G. Hitt. 1,666,534; Apr. 17.
Rod: *See*—
Lightning rod.
Rod elevator and spider, Combination sucker-. D. H. Greenwood. 1,666,621; Apr. 17.
Roller: *See*—
Skate roller.
Roller for typewriters, Platen. M. H. Alexanian. 1,666,403; Apr. 17.
Roller, Thrust. R. Bernhard. 1,666,436; Apr. 17.
Roof and sealing means therefor, Floating. C. F. H. Bohnhardt. 1,666,525; Apr. 17.
Roof flashing. A. Bloxham. 1,666,231; Apr. 17.
Roofing. C. E. Rahr and F. C. Overbury. 1,666,755; Apr. 17.
Roofing. C. E. Rahr. 1,666,755; Apr. 17.
Roofing. C. Stolp, jr. 1,666,429; Apr. 17.
Rope, Jumping. I. M. Goldstein. 1,666,201; Apr. 17.
Rubbing machine. G. H. Ekstrom. 1,666,256; Apr. 17.
Rug or similar article. O. W. Fauser. Des. 74,923; Apr. 17.
Ruling machine. C. J. Thomson. 1,666,634; Apr. 17.
Sash, Metallic window. J. T. Winton. 1,666,839; Apr. 17.
Sawing machine. W. B. Stone. 1,666,632; Apr. 17.

Scales, Weight-adjusting mechanism for weighing. G. F. Hochriem. 1,666,655; Apr. 17.
Screen: *See*—
Projecting screen.
Screen. J. H. Park. 1,666,580; Apr. 17.
Secrecy system, Plural-channel. R. A. Heising. 1,666,651; Apr. 17.
Separator for the electrodes of electrolytic cells. J. L. Woodbridge. 1,666,762; Apr. 17.
Shield, Glare or light. A. Jackson. 1,666,568; Apr. 17.
Shuttle. L. Pavia. 1,666,540; Apr. 17.
Signal switch, Hospital. J. O. Cadieux. 1,666,689; Apr. 17.
Skate. C. B. Drevitson. 1,666,690; Apr. 17.
Sound-amplifying construction. J. Kersten. 1,666,570; Apr. 17.
Spinning-ring traveler. C. F. Merrill. 1,666,714; Apr. 17.
Spoke end connection, Hollow-. H. P. Arnt. 1,666,615; Apr. 17.
Sales book, Manifolding. A. H. Phillips. 1,666,506; Apr. 17.
Saw guide, Tilting. F. E. Collier. 1,666,087; Apr. 17.
Scale, Even-balance-indicating. H. C. Schaper. 1,666,314; Apr. 17.
Scarf, Knit. A. F. Goetze. 1,666,819; Apr. 17.
Scooter. K. S. McFarlan. 1,666,827; Apr. 17.
Scraper. C. Larson. 1,666,334; Apr. 17.
Seat. A. F. Masury. 1,666,391–2; Apr. 17.
Seat for toilet bowls, Ventilating. C. C. Norris. 1,666,465; Apr. 17.
Sewing machine. F. W. Merrick. 1,666,177; Apr. 17.
Shaft coupling, Flexible. G. Fast. 1,666,445; Apr. 17.
Shaker, Combined salt and pepper. A. J. Flauder. Des. 74,924; Apr. 17.
Sharpening apparatus. W. T. Bradley. 1,666,678; Apr. 17.
Shearing device, Hand-operated. A. H. F. Perl and R. H. Carter. 1,666,832; Apr. 17.
Shears: *See*—
Pruning shears.
Sheet-feeding machine. C. E. Christophel. 1,666,165; Apr. 17.
Sheet-handling mechanism. P. A. Golinick. 1,666,171; Apr. 17.
Shingle. N. P. Harshberger. 1,666,204; Apr. 17.
Shingle machine. N. P. Harshberger. 1,666,203; Apr. 17.
Ships, Propelling device for. E. E. Tully, B. and W. Lovis. 1,666,517; Apr. 17.
Shirt-making system. M. L. Kaplan. 1,666,291; Apr. 17.
Shock absorber. O. A. Krenke. 1,666,259; Apr. 17.
Shock absorber. B. L. Mallory. 1,666,261; Apr. 17.
Shock absorber. J. R. Snyder. 1,666,357; Apr. 17.
Shovel: *See*—
Cultivator shovel.
Sifter. C. M. Ostler. 1,666,830; Apr. 17.
Sign for automobiles. M. Witt. 1,666,545; Apr. 17.
Signal: *See*—
Pneumatic-tire signal. Road signal.
Signal faceplate. A. R. P. Johnson. Des. 74,928; Apr. 17.
Signaling device, Automobile speed-warning. W. J. Craft and O. M. Clinton. 1,666,441; Apr. 17.
Silk, Process for the after treatment of freshly-spun artificial. F. J. Gahlert. 1,666,090; Apr. 17.
Silk, Treating. J. C. Mackey and J. S. Kaufman. 1,666,501; Apr. 17.
Skate roller. E. A. Copeland. 1,666,168; Apr. 17.
Slicing, toasting, and buttering machine, Automatic. R. Lentz. 1,666,335; Apr. 17.
Snow-removing machine. M. Souhigian. 1,666,358; Apr. 17.
Socket, Electric connecter. H. D'Olier, jr. 1,666,411; Apr. 17.
Socket, Three-way lamp. C. Schuldt. 1,666,248; Apr. 17.
Soldering machine. A. L. Kronquest. 1,666,707; Apr. 17.
Sound transmitter. H. A. Mills and W. D. Pyle. 1,666,262; Apr. 17.
Spark plug. I. Harris. 1,666,853; Apr. 17.

Valve. F. E. Lumley. 1,666,629; Apr. 17.
Valve. F. Rost. 1,666,583; Apr. 17.
Valve, Diverter. M. J. Glauber. 1,666,531; Apr. 17.
Valve, Drip. E. Manning. 1,666,243; Apr. 17.
Valve for rock drills. W. A. Smith, jr. 1,666,427; Apr. 17.
Valve mechanism, Rotary. J. W. Shannon and J. F. Pagendarm. 1,666,513; Apr. 17.
Valve, Pneumatic-tire. J. P. Gits. 1,666,562; Apr. 17.
Valves, Can mechanism for actuating. G. A. Loud. 1,666,709; Apr. 17.
Vanity case. A. H. Noble. Des. 74,942; Apr. 17.
Vapor rectifier. W. Tschudy. 1,666,516; Apr. 17.
Vault, Grave. H. R. Rick. 1,666,148; Apr. 17.
Vault ventilator. R. R. West. 1,666,519; Apr. 17.
Vaults, Air-vent means for. J. P. Williams. 1,666,673; Apr. 17.
Vegetable material and producing same, Permanent-finish. A. Bodmer. 1,666,082; Apr. 17.
Vegetable-matter drier. L. P. Caldwell. 1,666,617; Apr. 17.
Vehicle brake. J. Fejes. 1,666,372; Apr. 17.
Vehicle brake. H. Fereday. 1,666,817; Apr. 17.
Vehicle brake system. D. Marley. 1,666,390; Apr. 17.
Vehicle braking mechanism. A. T. Peterson. 1,666,349; Apr. 17.
Vehicle, Motor. E. C. G. England. 1,666,814–15; Apr. 17.
Vehicle side and window washing machine. J. R. Fitzpatrick. 1,666,170; Apr. 17.
Vehicle transmission shafts, Speed-equalizing means for motor-. J. S. Alspaugh. 1,666,766; Apr. 17.
Vehicle with horizontal engine, Motor. F. Huber. 1,666,208; Apr. 17.
Vehicles, Bumper device for. H. W. Tinker. 1,666,317; Apr. 17.
Vehicles, Foot mat and luggage and like carrier device for motor road. W. H. Bauert. 1,666,364; Apr. 17.
Vehicles having handle bars, Controlling means of variable-speed gearing for motor. A. Sanguinetl. 1,666,793; Apr. 17.
Vehicles, Top for motor. C. L. Normandale. 1,666,297; Apr. 17.
Vehicles, Window regulator for. P. Bacso. 1,666,481; Apr. 17.
Vending machine. B. L. Fry. 1,666,849; Apr. 17.
Vending machine, Coin-controlled. B. L. Fry. 1,666,596; Apr. 17.
Vending machines, Coin-controlled mechanism for use with. L. T. Leet. 1,666,242; Apr. 17.
Ventilator: *See*—
Cowl ventilator. Vault ventilator.
Ventilator. A. L. Riker. 1,666,218; Apr. 17.
Ventilator and canopy, Combination. R. G. W. Mayhood. 1,666,101; Apr. 17.
Vinylacetate, Production of. E. Baum, H. Deutsch, W. O. Herrmann, and M. Mugdan. 1,666,482; Apr. 17.
Vise, Pipe chain. H. Heide. 1,666,173; Apr. 17.
Voltage direct-current system, High-. J. Slepian. 1,666,473; Apr. 17.
Vulcanizer. A. H. Harris. 1,666,649; Apr. 17.
Wall bracket plate or similar article, Electric. J. A. Boehringer. Des. 74,916; Apr. 17.
Wall bracket plate or similar article, Electric. J. A. Boehringer. Des. 74,918; Apr. 17.
Wall bracket plate or similar article, Electric. J. A. Boehringer. Des. 74,920; Apr. 17.
Wall construction. A. L. Westrich. 1,666,635; Apr. 17.
Wall construction and method of and apparatus for building same. E. D. Coddington. 1,666,554; Apr. 17.
Warp tension and let-off. J. J. Ruhren, H. S. Vipond, and W. B. Leitch. 1,666,835; Apr. 17.
Washer: *See*—
Window washer.
Washing apparatus for coals. P. Wolf. 1,666,189; Apr. 17.
Washing glasses and the like, Apparatus for. R. C. Speer. 1,666,671; Apr. 17.
Washing machine. A. Graydon. 1,666,238; Apr. 17.
Washing salts. G. B. Burnham. 1,666,733; Apr. 17.
Watch-bracelet end hook. F. W. Nittel. 1,666,864; Apr. 17.
Watch holder. J. C. Newlin, jr. 1,666,664; Apr. 17.
Watches, Stem winding mechanism for. H. Colomb. 1,666,774; Apr. 17.
Water back, Sectional. J. E. Bell. 1,666,483; Apr. 17.
Water-bowl construction for cattle. H. C. Bassmann. 1,666,791; Apr. 17.
Water heater, Auxiliary. J. S. Makin. 1,666,660; Apr. 17.
Water-heater base. R. C. Hoyt. 1,666,093; Apr. 17.
Water of condensation to boilers, Device for returning. H. Krantz. 1,666,573; Apr. 17.
Weather strip. W. J. Dennis. 1,666,327–8; Apr. 17.
Welting and making same. W. J. Fallon, jr. 1,666,444; Apr. 17.
Wheel: *See*—
Disk wheel. Traction wheel.
Grinding wheel.
Wheel tightener. J. Olson. 1,666,829; Apr. 17.
Wheels, Manufacture of cushion-tired. J. F. Cullen. 1,666,234; Apr. 17.
Windmill. L. Thompson. 1,666,361; Apr. 17.
Window cleaner. J. J. Kilbride. 1,666,782; Apr. 17.
Window guide. E. M. Kennedy. 1,666,175; Apr. 17.
Window shield W. B. Clark. 1,666,773; Apr. 17.
Window washer. J. E. Zook. 1,666,190; Apr. 17.
Windshield. F. A. Dillingham. 1,666,642; Apr. 17.
Windshield cleaner. F. G. and W. M. Folberth. 1,666,127; Apr. 17.
Windshield cleaner. J X. Phillips, jr. 1,666,107–8; Apr. 17.
Windshield cleaner, Automatic. F. G. and W. M. Folberth. 1,666,126; Apr. 17.
Wire-cutting mechanism. A. A. Griswold and A. C. Goddard. 1,666,134; Apr. 17.
Wire-stripping machine. J. M. White. 1,666,277; Apr. 17.
Wrench: *See*—
Power-operated wrench.
Wrench. V. Barton. 1,666,879; Apr. 17.
Wrench. J. A. Giles. 1,666,091; Apr. 17.
Wrench. H. K. Hyrup. 1,666,740; Apr. 17.
Wrench. B. McGilvray. 1,666,103; Apr. 17.
Wrench. A. C. Schelf. 1,666,353; Apr. 17.
Wringer. F. B. Morehouse and W. H. Kleinhammer. 1,666,749; Apr. 17.
Writing machine. D. W. Shiek. 1,666,267; Apr. 17.
Yarns and fabrics with woollike effects, Vegetable. A. Bodmer. 1,666,083; Apr. 17.
Yarns or the like, Mechanism for and method of handling. E. F. Hathaway and W. Bixby. 1,666,650; Apr. 17.

CLASSIFICATION OF PATENTS

ISSUED APRIL 17, 1928.

NOTE.—First number—class, second number—subclass, third number—patent number.

2—	24: 1,666,846	33—	32: 1,666,634	64—	96: 1,666,494	84—	471: 1,666,382	119—	52: 1,666,322	139—	421: 1,666,325
	42: 1,666,421		75: 1,666,244	65—	18: 1,666,389	85—	2.4: 1,666,805		75: 1,666,791	140—	3: 1,666,745
	67: 1,666,504		179: 1,666,430		47: 1,666,249	87—	27: 1,666,523	120—	17: 1,666,405		106: 1,666,801
	68: 1,666,098	34—	23: 1,666,617	66—	86: 1,666,638	88—	1: 1,666,236	121—	22: 1,666,353		140: 1,666,134
	193: 1,666,875	35—	2: 1,666,337		135: 1,666,784		16.8: 1,666,131		26: 1,666,427	141—	1: 1,666,186
	243: 1,666,291		5: 1,666,398		137: 1,666,123		22: 1,666,406		32: 1,666,176		3: 1,666,671
4—	198: 1,666,583	36—	35: 1,666,603		1,666,794		24: 1,666,304		137: 1,666,388	144—	51: 1,666,547

Soap, Toilet. Ho-Ro-Co Manufacturing Company. 241,396; Apr. 24; Serial No. 259,005; published Feb. 14, 1928.
Soaps. D'Orsay Perfumeries Corporation. 241,433; Apr. 24..

CLASS 5.

Paste, Dry. Miner Hillard Milling Co. 241,312; Apr. 24; Serial No. 244,710; published Feb. 14, 1928.
Paste, Liquid. Scriptex Ink and Paste Co. 241,355; Apr. 24; Serial No. 258,979; published Feb. 7, 1928.

CLASS 6.

Antacids. Hynson, Westcott & Dunning. 241,399; Apr. 24; Serial No. 251,670; published Aug. 30, 1927.
Antifreeze solution. Vacu-Tite Company. 241,368; Apr. 24; Serial No. 258,437; published Feb. 14, 1928.
Antiseptic powder. A. C. Thorpe. 241,348; Apr. 24; Serial No. 259,146; published Feb. 14, 1928.
Baking powder. L. H. Parke Company. 241,374; Apr. 24; Serial No. 258,277; published Feb. 14, 1928.
Chemical compound. Batex Laboratory, Inc. 241,278; Apr. 24; Serial No. 254,989; published Feb. 14 1928.
Chemical preparations. Max Elb Gesellschaft mit beschränkter Haftung. 68,587; renewed Apr. 21. 1928.
Chemical used in dyeing. Philip A. Hunt Company. 241,346; Apr. 24; Serial No. 259,176; published Feb. 14, 1928.
Chewing gum for coughs and colds. Schick and Son. 241,331; Apr. 24; Serial No. 259,596; published Feb. 14, 1928.
Cod-liver-oil emulsion. C. T Clark. 241,339; Apr. 24; Serial No. 259,483; published Feb. 14, 1928.
Compound for protecting metal against rust and oxidation. Pyroxylin Art Co. 241,428; Apr. 24.
Conditioner for fibres for weaving. John Campbell & Co. 241,352; Apr. 24; Serial No. 259,006; published Feb. 14, 1928.
Cream, bath salts, perfume, toilet water, etc., Cold. Richard Hudnut. 241,333; Apr. 24; Serial No. 259,563; published Feb. 14, 1928.
Cream, bath salts, perfume, toilet water, etc., Cold. Richard Hudnut. 241,334; Apr. 24; Serial No. 259,560; published Feb. 14, 1928.
Dentifrices. H. J. S., W. H., and M. M. Hall, and I. Hawley. 65,031; renewed Oct. 15, 1927.
Deodorants. Western Chemical Company. 241,356; Apr. 24; Serial No. 258,925; published Feb. 14, 1928.
Disinfectants. Chemische Fabriks Werke Gesellschaft mit beschränkter Haftung. 68,546; renewed Apr. 14, 1928.
Germicidal inhalants for nose, mouth, and throat affections. E. E. Beadle. 241,343; Apr. 24; Serial No. 259,347; published Feb. 14, 1928.
Ginseng compound. N. B. Mattle. 70,418; renewed Aug 25, 1928.
Ink eradicator. Scriptex Ink and Paste Co. 241,354; Apr. 24; Serial No. 258,981; published Feb. 14, 1928.
Insecticide. Kossman Chemical Co. 241,357; Apr. 24; Serial No. 258,873; published Feb. 14, 1928.
Laxative digestant tablets. G. Peplow. 241,388; Apr. 24; Serial No. 257,702; published Feb. 14, 1928.
Laxative, Infant. C. T. Richardson. 241,283; Apr. 24; Serial No. 249,376; published Feb. 14, 1928.
Laxative tablets. Lanman & Kemp, Inc. 241,369; Apr. 24; Serial No. 258,416; published Feb. 14, 1928.
Liniment. J. Trillis. 241,347; Apr. 24; Serial No. 259,147; published Feb. 14, 1928.
Liniment for the relief of pain. R. W. Kern. 241,353; Apr. 24; Serial No. 258,984; published Feb. 14, 1928.
Liquid for the treatment of pyorrhea. F. J. Abbott. 241,305; Apr. 24; Serial No. 257,134; published Feb. 14, 1928.
Liquid fuel. Liquo-Gas Company. 241,299; Apr. 24; Serial No. 256,413; published Feb. 14, 1928.
Medicinal bath preparations. E. Hammel. 241,377; Apr. 24; Serial No. 258,209; published Feb. 14, 1928.
Medicinal preparation. S. O. Bronstein. 241,300; Apr. 24; Serial No. 256,446; published Feb. 14, 1928.
Medicinal preparation. S. W. Worthington. 241,366; Apr. 24; Serial No. 258,608; published Feb. 14, 1928.
Medicine. Williams Manufacturing Co. 241,413; Apr. 24; Serial No. 258,104; published Jan. 24, 1928.
Medicine for animals, Mange and gall. J. R. Lyons. 241,286; Apr. 24; Serial No. 250,128; published Feb. 14, 1928.
Oil-emulsion spray solution. Winchester Fruit Exchange, Inc. 241,372; Apr. 24; Serial No. 258,387; published Feb. 14, 1928.
Perfume, Incense. Iwata Trading Co. 241,341; Apr. 24; Serial No. 259,447; published Feb. 14, 1928.
Perfumes and toilet waters. Coty, Inc. 241,384; Apr. 24; Serial No. 257,861; published Feb. 14, 1928.
Pills, medicines, etc. Edmanson, Bates & Company. 241,435; Apr. 24.
Preparation for the treatment of bronchial disorders. First Texas Chemical Manufacturing Co. 241,359; Apr. 24; Serial No. 258,861; published Feb. 14, 1928.
Preparation for the treatment of pyorrhea. L. H. Smith. 241,437; Apr. 24.
Preparation for the treatment of tuberculosis, asthma, etc. W. D. Stokes. 241,324; Apr. 24; Serial No. 231,641; published Feb. 14, 1928.
Preparation for use in the treatment of diseases and disorders of the stomach and intestines. Les Laboratoires Duret & Remy. 241,345; Apr. 24; Serial No. 259,180; published Feb. 14, 1928.
Purgative, Effervescent. R. L. Irizarry. 241,296; Apr. 24; Serial No. 256,192; published Feb. 14, 1928.
Remedy for inflammation. Parke, Davis & Co. 241,382; Apr. 24; Serial No. 257,894; published Feb. 14, 1928.
Remedy for the removal of corns, callouses, bunions, etc. L. J. Smith. 31,397; renewed Mar. 8, 1928.
Rouges, creams, and toilet powders. Millington Company. 241,313; Apr. 24; Serial No. 244,311; published Feb. 14, 1928.
Salve, External. J. E. McBrady. 241,340; Apr. 24; Serial No. 259,452; published Feb. 14, 1928.
Tablets for use as an analgesic, etc. First Texas Chemical Manufacturing Co. 241,358; Apr. 24; Serial No. 258,863; published Feb. 14, 1928.
Tablets, vaginal douche tablets, etc., Antiseptic. H. L. De Bar. 241,302; Apr. 24; Serial No. 256,614; published Feb. 14, 1928.
Tonic, Herb. F. J. Hoffmann. 241,275; Apr. 24; Serial No. 253,374; published Feb. 14, 1928.

CLASS 7.

Twines. Overman & Schrader Cordage Co. 68,893; renewed May 5, 1928.

CLASS 9.

Firearms and parts thereof. Birmingham Small Arms Company Limited. 68,285; renewed Mar. 24, 1928.
Fireworks. J. Halpern. 241,397; Apr. 24; Serial No. 259 168; published Feb. 14, 1928.
Shotguns. Norvell-Shapleigh Hardware Company. 68,123; renewed Mar. 10, 1928.

CLASS 11.

Ink ribbons and carbon paper. F. S. Webster Company. 68,382; renewed Apr. 7. 1928.

CLASS 12.

Brick and tile. Acme Brick Company. 241,432; Apr. 24.
Cabinets, Medicine. Hoegger Inc. 241,303; Apr. 24; Serial No. 256,672; published Jan. 10. 1928.
Cement, Portland. Sandusky Portland Cement Company. 70,272; renewed Aug. 18, 1928.

CLASS 13.

Nuts for woodwork, Screw anchor. Scru Tite Corporation. 241,438; Apr. 24.
Roasters, Metal. Republic Metalware Co. 68,099; renewed Mar. 10. 1928.
Vehicles and parts thereof. Birmingham Small Arms Company Limited. 69,725; renewed June 30, 1928.

CLASS 14.

Locomotive and car replacer. G. T. Chambers. 241,395; Apr. 24; Serial No. 259 199; published Feb. 14, 1928.
Solder. David Metzger Inc. 241,392; Apr. 24; Serial No. 258,695; published Feb. 14, 1928.

CLASS 15.

Lubricant and cooling-oil compound. White & Bagley Company. 241,273; Apr. 24; Serial No. 243,794; published Jan. 31, 1928.

CLASS 16.

Calcimines, varnishes, varnish, stains, etc. Thybony & Bengtson. 241,361; Apr. 24; Serial No. 257,821; published Feb. 14, 1028.

Aronson, Louis V., Newark, N. J., assignor to Voices Incorporated. Sound device. 1,667,095; Apr. 24.

Aronson, Louis V., Newark, N. J., assignor to Voices Incorporated. Sound device. 1,667,096; Apr. 24.

Arrow Electric Company, The. (See Nero, Arvid H., assignor.)

Arthur, Richard S., New York, N. Y., assignor to Kalyptol Products Inc. Vending machine. 1,666,884; Apr. 24.

Asbridge, Harry H., Ashton-on-Mersey, assignor to The Churchill Machine Tool Company Limited, Broadheath, near Manchester, England. Grinding of gear-wheel teeth. 1,666,955; Apr. 24.

Ashkenas, Abraham, Brooklyn, N. Y. Screen. Des. 74,958; Apr. 24.

Assiter, Stephen H., Floydada, Tex. Cotton-cleaning machine. 1,667,505; Apr. 24.

Atkinson, William B., deceased, Bowling Green, Ky.; Bowling Green Trust Company, executor, assignor to A. G. Schwab & Sons, Cincinnati, Ohio. Clock attachment. 1,667,685; Apr. 24.

Atlantic Refining Company, The. (See Hill, Joseph B., assignor.)

Austin, Arthur O., Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Cable clamp. 1,666,885; Apr. 24.

Autocar Company, The. (See Ward, Arthur C., assignor.)

Auto-Carburetor Corporation. (See Sorensen, Einar N., assignor.)

Automatic Electric Company. (See Obergfell, Herbert F., assignor.)

Automatic Electric Inc. (See Jones, Edwin E., assignor.)

Automatic Electric Inc. (See Wicks, John, assignor.)

Ayotte, Willard W., Midale, Saskatchewan, Canada. Latch. 1,666,985; Apr. 24.

B. B. Laboratories, Inc. (See Brown, Ben E., assignor.)

Babcock & Wilcox Company, The. (See Norton, Frederick H., assignor.)

Bach, Oscar B., New York, N. Y. Spindle for furniture pieces. Des. 74,959; Apr. 24.

Bachelder, Frank H., Orange, Mass. Dispensing cabinet. 1,667,528; Apr. 24.

Baddiley, James, P. Chorley, and C. Butler, assignors to British Dyestuffs Corporation Limited, Manchester, England. Dyeing artificial silk. 1,667,524; Apr. 24.

Bailey, Ernest M. Woodsdale, N. C. Battery-terminal clip. 1,667,581; Apr. 24.

Bailey, Leon J. (See Ryder, H. M., and Bailey.)

Bailey Meter Company. (See Thompson, Louis W., assignor.)

Bakelite Corporation. (See Swan, Hylton, assignor.)

Baker, Linnaeus E., and C. L. Merriman, assignors to Wayne Company, Fort Wayne, Ind. Liquid measuring and dispensing apparatus. 1,667,137; Apr. 24.

Bakker, Pieter J., Amsterdam, Netherlands. Apparatus for automatically igniting flashlight powder. 1,667,368; Apr. 24.

Ballard, Milton H., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cutting machine. 1,667,184; Apr. 24.

Ballou, Howard M., assignor to R. Blackinton & Co., North Attleboro, Mass. Belt strap. 1,667,696; Apr. 24.

Bankrat, John S., Hempstead, N. Y. Propeller. 1,667,506; Apr. 24.

Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Sheet-folding mechanism. 1,667,369; Apr. 24.

Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Sheet-folding mechanism. 1,667,370; Apr. 24.

Barke, Frank S., St. Louis, Mo. Valve mechanism. 1,667,188; Apr. 24.

Barnard, Russell E., assignor to The R. Hardesty Manufacturing Company, Denver, Colo. Flume construction. 1,667,234; Apr. 24.

Barnes, George, assignor of one-third to J. G. Applegath and one-third to G. W. Jenkins, Princeton, Ind. Fish-plate bond. 1,667,452; Apr. 24.

Barr, Daniel R., Grand Rapids, Ohio, assignor to Taylor Instrument Company, Rochester, N. Y. Anatomical sleeve. 1,667,409; Apr. 24.

Barr and Stroud, Limited. (See Stroud, William, assignor.)

Barrett Company, The. (See Downs, C. R., and Welsberg, assignors.

Barrows, Allan S., Los Angeles, assignor to The Youngstown Steel Door Company, Cleveland, Ohio. Metallic car door. 1,667,341; Apr. 24.

Barrows, Donald S., Rochester, assignor to The Symington Company, New York, N. Y. Adjustable pedestal way liner. 1,667,453; Apr. 24.

Bartels, Walter E., Cincinnati, Ohio. Roofing single. 1,667,185; Apr. 24.

Bashcongi, Gabriel, Brooklyn, N. Y. Safety valve. 1,667,525; Apr. 24.

Bass, Aaron T., Eaton, Colo. Adjustable road drag. 1,667,301; Apr. 24.

Bastian Blessing Company, The. (See Evleth, Earl M., assignor.)

Bates, Adelmer M., assignor, by mesne assignments, to Bates Valve Bag Corporation, Chicago, Ill. Making and filling bags. 1,666,886; Apr. 24.

Bates Valve Bag Corporation. (See Bates, Adelmer M., assignor.)

Bäuml, Maximilian, Vienna, Austria, assignor to the firm Jagenberg-Werke Akt.-Ges., Dusseldorf, Germany. Cigarette-packing machine. 1,666,986; Apr. 24.

Baxter, William M., assignor to Ideal Removable Body Company, Chicago, Ill. Removable-body truck. 1,667,023; Apr. 24.

Beall, Charles R., assignor to The Union Switch & Signal Company, Swissvale, Pa. Speed-responsive system. 1,667,410; Apr. 24.

Beardsley, Elmer O., and W. F. Piper, assignors to The Beardsley & Piper Company, Chicago, Ill. Machine for filling molds. 1,667,097; Apr. 24.

Beardsley & Piper Company, The. (See Beardsley, E. O., and Piper, assignors.)

Beattie, Robert, assignor to Texas Pacific Coal and Oil Company, Fort Worth, Tex. Apparatus for mixing sludge. 1,667,235; Apr. 24.

Beaumont Manufacturing Company. (See Burnett, William J., assignor.)

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Metal bowl or similar article. Des. 74,960; Apr. 24.

Bellocchio, John, New York, N. Y. Extension table. 1,667,411; Apr. 24.

Bendix Brake Company. (See Dodge, Adiel Y., assignor.)

Bendix Brake Company. (See Sanford, Roy S., assignor.)

Benedict, T. N., Mfg. Co. (See Saunders, Albert F., assignor.)

Benien, William, and J. I. Flaherty, Lincoln, Kans. Anti-skid device for automobile wheels. 1,667,686; Apr. 24.

Benjamin, Bert R., Oak Park, and C. R. Raney, assignors to International Harvester Company, Chicago, Ill. Tractor cultivator. 1,667,371; Apr. 24.

Benjamin Electric Mfg. Co. (See Benjamin, R. B., and Warner, assignors.)

Benjamin, Reuben B., Chicago, and C. E. Warner, Berwyn, assignors to Benjamin Electric Mfg. Co., Chicago, Ill. Switch construction. 1,666,925; Apr. 24.

Bergeron, Ovila J., Manchester, N. H. Collar button. 1,667,098; Apr. 24.

Bergmoser, George O. (See Kilgus, C. A., Burton, and Bergmoser.)

Bergquist, Charles H., assignor of one-half to E. A. Locke, Okmulgee, Okla. Anvil for bit-dressing hammers. 1,667,236; Apr. 24.

Bernhard, Robert A., Rochester, N. Y. Dispensing receptacle. 1,667,302; Apr. 24.

Bernhardt, M. E., Company. (See Raeburn, William, assignor.)

Betz, Charles F., St. Louis, Mo., assignor to American Cone & Pretzel Company, Philadelphia, Pa. Ice-cream cone. Des. 74,961; Apr. 24.

Beyl, Emil A., Minneapolis, Minn. Friction clutch. 1,666,956; Apr. 24.

Bezzenberger, Fred K., Cleveland Heights, Ohio, assignor, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Flexible metal wall and making same. 1,667,303; Apr. 24.

Bieberstein, Frank A., Milwaukee, Wis. Vest. 1,667,526; Apr. 24.

Biggs, Noah B., assignor to F. J. Anthony, Wichita, Kans. Derrick. 1,667,582; Apr. 24.

Billingsley, Percy L., assignor of one-fourth to M. O. Overstreet, Orlando, Fla. Saw tooth. 1,666,987; Apr. 24.

Binz, Arthur, Berlin, and C. Räth, Rangsdorf, Germany. Preparation of organic arsenic compounds. 1,667,237; Apr. 24.

Binz, Arthur, Berlin, and C. Räth, Rangsdorf, Germany. Reduction of arsonic acids. 1,667,238; Apr. 24.

Bircher Co., The. (See Keiser, Arthur J., assignor.)

Black, Austin L., Colorado Springs, Colo. Sleeve holder. 1,667,583; Apr. 24.

Blackinton, R., & Co. (See Ballou, Howard M., assignor.)

Blanding, Forrest H., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Detachable handle for drills. 1,667,280; Apr. 24.

Blankart, André, Basel, Switzerland, assignor to The Hoffmann-La Roche Chemical Works, New York, N. Y. Alkyl derivatives of diphenolisatine and making same. 1,667,239; Apr. 24.

Blauvelt, William G., New York, N. Y., assignor to American Telephone and Telegraph Company. Trunking system. 1,666,988; Apr. 24.

Blaw, Jacob B., deceased, Atlantic City, N. J.; S. H. Blaw, executrix. Portable fire-nozzle support. 1,667,342; Apr. 24.

Blaw, Sadie H., executrix. (See Blaw, Jacob B.)

Blecker, William M., assignor to E. A. Langenbach, Canton, Ohio. Continuous-sheet-rolling apparatus. 1,667,412; Apr. 24.

Blecker, William M., assignor to E. A. Langenbach, Canton, Ohio. Continuous-sheet-rolling method. 1,667,413; Apr. 24.

Bliss Brothers Company. (See Wendelstein, Carl M., assignor.)

Bluehdorn, William R., Hartford, Conn. Muzzle attachment for guns. 1,667,186; Apr. 24.

Bohne, William A. (See Peirson, C. H., and Bohne.)

Boldt, Richard, San Francisco, Calif. Seat for girders and beams. 1,667,619; Apr. 24.

Bonge, Charles E., Creighton, assignor of one-third to E. A. Houston and one-third to E. T. Houston, Niobrara, Nebr. Jar-handling tool. 1,667,620; Apr. 24.

Booth, William N., Detroit, Mich. Vehicle wheel. 1,667,024; Apr. 24.

Borden, John F., Alameda, assignor to Oliver Continuous Filter Company, Oakland, Calif. Gas separator. 1,667,139; Apr. 24.

Borgwardt, Erich. (See Schoeller, W., Feldt, Gehrke, and Borgwardt.)

Borsig, A., G. m. b. H. (See Kindermann, Erich, assignor.)

Bostwick, William W., et al. (See Tipton, Edward F., assignor.)

Bowen, Ernest W., London, England. Manufacture of fuel briquettes. 1,667,304; Apr. 24.

Bowers, Claude E., Los Angeles, Calif. Outlet-box hanger. 1,667,025; Apr. 24.

Bowling Green Trust Company, executor. (See Atkinson, William B.)

Bowman, George W., Seymour, Tex. Nut lock. 1,667,305; Apr. 24.

Boxer, Maurice, San Francisco, Calif. Hair curler. 1,667,188; Apr. 24.

Boyce, Harrison H., Jericho, N. Y. Indicating instrument for automobile radiator caps and the like. 1,667,026; Apr. 24.

Boyce, Harrison H., Jericho, N. Y. Temperature-indicating apparatus for vehicle propelling motors. 1,667,027; Apr. 24.

Boynton, Alexander, San Antonio, Tex. Polished-rod rotator. 1,667,240; Apr. 24.

Boynton, Alexander, San Antonio, Tex. Device for cementing wells. 1,667,649; Apr. 24.

Boynton, Stanley E., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material-working apparatus. 1,667,028; Apr. 24.

Bradley, James P., and O. A. Prough, Weed, Calif. Theft signal switch. 1,667,650; Apr. 24.

Brady, William A., Ohiopyle, Pa. Hammer attachment for paintbrushes. 1,667,651; Apr. 24.

Bragonier, Reginald. (See Meyers, F. B., and Darney, assignors.)

Brandes Laboratories Inc. (See Vansickle, Melvin E., assignor.)

Breitenbach, James M., Battle Creek, Mich. Side-wall register rack. 1,667,099; Apr. 24.

Bremer, Frederick G., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Automobile bumper. 1,667,528; Apr. 24.

Bremer, Frederick G., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Automobile bumper. 1,667,529; Apr. 24.

Bremer, Frederick G., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Bumper structure. 1,667,530; Apr. 24.

Breninger, Clyde W., Canton, Ohio. Life preserver. 1,667,414; Apr. 24.

Brewer, Oscar Z., Spokane, Wash., assignor of one-half to H. H. McNeill, New York, N. Y. Carboy-shipping container. 1,667,029; Apr. 24.

Brewer, Robert E. (See Fay, R. D., and Brewer.)

Brinkman, Sebastian G., Perth Amboy, N. J. Refrigerator. 1,667,281; Apr. 24.

Bristol Company, The. (See Koester, Herman, assignor.)

British Drug Houses, Limited, The. (See Ellis, Henry A., assignor.)

British Dyestuffs Corporation Limited. (See Baddiley, J., Chorley, and Butler, assignors.)

Brix, Harold, assignor to Sharp & Smith, Chicago, Ill. Syringe. 1,667,454; Apr. 24.

Broadmeyer, Albert, assignor to W. O. Hickok Manufacturing Company, Harrisburg, Pa. Ruling machine. 1,666,989; Apr. 24.

Bronson, Edmond B., Blue Island, Ill. Lantern. 1,667,848; Apr. 24.

Bronson, Edmond B., Blue Island, Ill. Electric lantern. 1,667,706; Apr. 24.

Brooks, J. B., and Company Limited. (See Snell, George C. S., assignor.)

Brooks, John C., Paterson, N. J., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Loom. 1,667,306; Apr. 24.

Brosius, Edward E., Spokane, Wash. Cigarette-holder case. 1,667,065; Apr. 24.

Brown, Ben E., Mountain Lakes, assignor to B. B. Laboratories, Inc., East Orange, N. J. Sound-reproducing apparatus. 1,667,581; Apr. 24.

Brown, Charles H., Flushing, N. Y. Foot-measuring apparatus. 1,667,100; Apr. 24.

Brown, George L., Huntingdon Valley, Pa. Handling capsules for filling. 1,667,066; Apr. 24.

Browning, John, administrator. (See Browning, John M.)

Browning, John M., Ogden, Utah; J. Browning, administrator. Barrel-cooling device for firearms. 1,666,887; Apr. 24.

Buckingham, William H., assignor of one-half to S. Salzburg, Mayfield, Pa. Guard for hand straps. 1,667,307; Apr. 24.

Buckwalter, Tracy V., assignor to The Timken Roller Bearing Company, Canton, Ohio. Closure for bearings. 1,667,507; Apr. 24.

Budd Wheel Company. (See Kelley, George L., assignor.)

Budny, Maciej, Garfield Heights, Ohio. Paper-marker fastener. 1,667,241; Apr. 24.

Buffalo Foundry & Machine Co. (See Lavett, Charles O., assignor.)

Bunker, Samuel F., Chicago, Ill. Key fastener. 1,667,508; Apr. 24.

Burd & Fletcher Company. (See Fehrenkamp, Emil W., assignor.)

Burgess, William A. A. (See Clothier, H. W., and Burgess.)

Burke, Charles E., and H. H. Hopkins, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Synthetic resin. 1,667,189; Apr. 24.

Burnett, William J., Glenside, assignor to Beaumont Manufacturing Company, Philadelphia, Pa. Mechanism for actuating the gates of gravity-discharge hoppers. 1,667,468; Apr. 24.

Burnham, Locke H., Pittsfield, Mass., assignor to General Electric Company. Pressure-relief pipe for electrical-apparatus casings. 1,667,621; Apr. 24.

Burns, Elmer G., Los Angeles, Calif. Universal joint. 1,667,455; Apr. 24.

Burton, Chester A. (See Kilgus, C. A., Burton, and Bergmoser.)

Butler, Carlton. (See Braddiley, J., Chorley, and Butler.)

C. G. Spring & Bumper Company, The. (See Jandus, H. S., and Van Husen, assignors.)

Cady, Sherman W., Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, Chicago, Ill. Four-hourse hitch. 1,667,372; Apr. 24.

Caldwell, William L., Indianapolis, Ind. Order blank. 1,667,622; Apr. 24.

Callum, Preston D., Baltimore, Md. Guard for knife-sharpening steels. 1,667,282; Apr. 24.

Calverley, John E., Preston, and W. E. Highfield, assignors to The English Electric Company Limited, London, England. Electric converting apparatus. 1,667,242; Apr. 24.

Cameron, Angus, Sommerstown, assignor of fifty-two one-hundredths to W. D. Knight, Cornwall, Ontario, Canada. Wheel-rim locking and contracting appliance. 1,667,243; Apr. 24.

Campbell, John. (See Pickering, C. H., and Campbell.)

Campbell, Sterling H., assignor to Western Railway Equipment Company, St. Louis, Mo. Draft gear. 1,667,030; Apr. 24.

Campbell, Stewart L., Berkeley, assignor to J. Grant, Los Angeles, Calif. Rotary underreamer. 1,667,190; Apr. 24.

Cappellia, Charles J., et al. (See Trimble, William O., assignor.)

Cappellia, Frank, et al. (See Trimble, William O., assignor.)

Carey, Arthur G., Bluefield, W. Va. Lamp shade for reading lights. 1,667,623; Apr. 24.

Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Concrete hanger block. 1,667,532; Apr. 24.

Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Concrete hanger block. 1,667,533; Apr. 24.

Carpenter, Robert F., and T. F. Anderson, assignors to The Sanymetal Products Company, Cleveland, Ohio. Partition structure. 1,667,534; Apr. 24.

Carroll, Wells W., and S. W. Nicholson, assignors to The Dura Company, Toledo, Ohio. Roller for window-control mechanism. 1,667,031; Apr. 24.

Carter, Paul E., Bronxville, assignor to General Railway Signal Company, Gates, N. Y. Light signal. 1,667,469; Apr. 24.

Case, Frank E., Schenectady, N. Y., assignor to General Electric Company. Contact fingers. 1,667,652; Apr. 24.

Casner, Thaddeus S., Plainfield, N. J., assignor to Radio Electric Clock Corporation, New York, N. Y. Silent secondary clock. 1,667,308; Apr. 24.

Cather, Charles E., Worcester, assignor to United States Envelope Company, Springfield, Mass. Duplex envelope. 1,666,957; Apr. 24.

Catlin, Thomas S., Waveland, assignor to Catlin-Tompkins Corporation of Indiana, Indianapolis, Ind. Window-shade apparatus. 1,666,990; Apr. 24.

Catlin-Tompkins Corporation of Indiana. (See Catlin, Thomas S., assignor.)

Cederberg, Ivar W., Steglitz, near Berlin, Germany. Catalytic combustion of ammonia-oxygen mixtures. 1,666,958; Apr. 24.

Celestin, William E., New York, N. Y. Section tire for vehicles. 1,667,535; Apr. 24.

Chaffee, Edward F., assignor to The O. M. Edwards Company Inc., Syracuse, N. Y. Combined sash holder and starter. 1,667,288; Apr. 24.

Chamberlain, Alfred J., Lakewood, Ohio. Metal container. 1,667,284; Apr. 24.

Chambersburg Engineering Company. (See Clarke, Eugene C., assignor.)

Chandler, Carl B., Havana, Ill. Metal-wheel-tire expander. 1,667,509; Apr. 24.

Chanier, Gaston L., Jersey City, N. J., assignor to Pathe Exchange, Inc., New York, N. Y. Preventing premature uncoiling of film bobbins. 1,667,536; Apr. 24.

Chapin, Samuel A., Seattle, Wash. Marine protractor. 1,667,191; Apr. 24.

Chaplin, Manley J., Berkeley, Calif. Locking device for automobiles. 1,667,584; Apr. 24.

Chapman, Verni J., Schenectady, N. Y., assignor to General Electric Company. Automatic arc welding. 1,667,585; Apr. 24.

Chapman, Verni J., Schenectady, N. Y., assignor to General Electric Company. Apparatus for fusion welding. 1,667,586; Apr. 24.

Chapman, Verni J., Schenectady, N. Y., assignor to General Electric Company. Welding machine. 1,667,587; Apr. 24.

Chase, Elroy A., Northfield, Vt. Ornamenting stone. 1,667,309; Apr. 24.

Chemical Construction Company. (See Hechenbleikner, Ingenuin, assignor.)

Chemische Fabrik auf Actien (vorm. E. Schering). (See Schoeller, W., Feldt, Gehrke, and Borgwardt, assignors.)

Chemische Fabrik auf Actien (vorm. E. Schering). (See Schotte, Herbert, assignor.)

Cherniak, Nicholas, Bronx, N. Y. Garter hosiery. 1,667,707; Apr. 24.

Chesley, Frank, Louisville, Ky. Moistening device. 1,667,067; Apr. 24.

Chicago Pneumatic Tool Company. (See Blanding, Forrest H., assignor.)

Chicago Pneumatic Tool Company. (See Seaver, Samuel, assignor.)

Chorley, Percy. (See Badiley, J., Chorley, and Butler.)

Christoph, Edward A., Chicago, Ill. Amusement device. 1,667,101; Apr. 24.

Chrysler Corporation. (See Couture, Allan B., assignor.)

Churchill Machine Tool Company Limited. (See Asbridge, Harry H., assignor.)

Churchward, Alexander, New York, N. Y., assignor to Wilson Welder & Metals Company, Inc., Hoboken, N. J. Electric welding apparatus. 1,667,244; Apr. 24.

Cizek, Robert, Francis Creek, Wis. Signaling device for vehicles. 1,667,653; Apr. 24.

Clarinda Manufacturing Company. (See Criner, Harry J., assignor.)

Clark, Ephraim J., Seattle, Wash. Feathering paddle wheel. 1,667,140; Apr. 24.

Clark, Omar E., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Lubricator. 1,666,959; Apr. 24.

Clarke, Eugene C., assignor to Chambersburg Engineering Company, Chambersburg, Pa. Trimming press. 1,667,654; Apr. 24.

Claytor, Spry O., Newark, Ohio. Hairpin. 1,667,310; Apr. 24.

Cleary, Herbert J., Topeka, Kans. Sulky plow. 1,667,192; Apr. 24.

Cleveland Twist Drill Company, The. (See Githens, Thomas F., assignor.)

Clisson, Albert B., Geddes, assignor, by mesne assignments, to The Prosperity Company, Incorporated, Syracuse, N. Y. Worm-oiling means. 1,667,285; Apr. 24.

Clisson, Albert B., assignor to The Prosperity Company Inc., Syracuse, N. Y. Neckband clamp for shirt-pressing machines. 1,667,286; Apr. 24.

Clothier, Henry W., Wallsend-on-Tyne, and W. A. A. Burgess, Monkseaton, assignors to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Controlling or tripping apparatus for alternating-current electric circuits. 1,667,655; Apr. 24.

Coburn, James M., and B. Knapp, assignors to Plane Speaker Corporation, Kansas City, Mo. Sound-projecting horn on wing structure of aircraft. 1,667,287; Apr. 24.

Coe, James R., Watertown, assignor to The American Brass Company, Waterbury, Conn. Electric conductor. 1,667,510; Apr. 24.

Coffelder, Thomas N., Pittsburgh, Pa. Automatic railway-crossing gate. 1,667,537; Apr. 24.
Cohen, Sidney, Neponsit, N. Y. Electrical connecter. 1,666,991; Apr. 24.
Coleman, Edward, Oakland, Calif. Telephone attachment. 1,667,193; Apr. 24.
Collier, Henry D., assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif. Apparatus for forcing lubricant from motor-vehicle lubricant-containing cases. 1,666,992; Apr. 24.
Collins, William L. (See Egan, John J., assignor.)
Commonwealth Steel Company. (See Frede, Charles F., assignor.)
Cooper Hewitt Electric Company. (See Malley, Roy D., assignor.)
Coover, Harry S. (See Walsh, T., Coover, and Abronski.)
Corke, Richard D., Yonkers, N. Y. Sharpening block for racing skates. 1,666,993; Apr. 24.
Cornell, Samuel V., et al. (See Cross, George H., assignor.)
Corson, Almon J., and S. C. Hoare, Lynn, Mass., assignors to General Electric Company, Electrical measuring instrument. 1,667,624; Apr. 24.
Coste, Jean F. P., Billancourt, France. Elastic element for resilient wheels. 1,667,373; Apr. 24.
Cotton, Walter H., assignor to Union Draft Gear Company, Chicago, Ill. Draft gear. 1,666,888; Apr. 24.
Cottrell, C. B., & Sons Company. (See Barber, Howard M., assignor.)
Cottrell, Holland D., Detroit, Mich. Loose-leaf binder. 1,667,511; Apr. 24.
Cotswold Comfortable Company. (See Trout, Harry W., assignor.)
Couture, Allan B., assignor to Chrysler Corporation, Detroit, Mich. Automobile wheel. 1,667,344; Apr. 24.
Cox, Oscar, and O. C. Willis, Cotton Valley, La. Wrist pin. 1,667,588; Apr. 24.
Cozette, René J. P. E., Neuilly-sur-Seine, France. Rotary pump and compressor. 1,667,456; Apr. 24.
Craig, Thomas J., and A. L. Scofield, Merced, Calif. Screen for separating almonds and hulls. 1,667,194; Apr. 24.
Crampton, Basil R., assignor to Winters, Stryker & Crampton, Grand Rapids, Mich. Hinge. 1,667,102; Apr. 24.
Crawford, James O., Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y. Curtain-pole end or similar article. Des. 74,962; Apr. 24.
Crawford, James O., Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y. Curtain-pole end or similar article. Des. 74,963; Apr. 24.
Crawford, James O., Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y. Curtain-pole end or similar article. Des. 74,964; Apr. 24.
Crawford, James O., Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y. Curtain-pole bracket or similar article. Des. 74,965; Apr. 24.
Crawford, James O., Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y. Curtain tassel or similar article. Des. 74,966; Apr. 24.
Crawford, James O., Oakland, Calif., assignor to The John Kroder and Henry Reubel Company, New York, N. Y. Curtain-pole end or similar article. Des. 74,967; Apr. 24.
Creamery Package Mfg. Company, The. (See Heitz, Leonard F., assignor.)
Criner, Harry J., assignor to Clarinda Manufacturing Company, Clarinda, Iowa. Agitator for washing machines. 1,667,195; Apr. 24.
Crompton & Knowles Loom Works. (See Brooks, John C., assignor.)
Cross, George H., Merced, Calif., assignor of one-fifth to S. V. Cornell and two-fifths to C. C. Hale. Marking system. 1,666,994; Apr. 24.
Crouse, Emory, Wichita, Kans. Dispensing reservoir. 1,667,245; Apr. 24.
Crowley, Joseph P., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Valve. 1,667,141; Apr. 24.
Cruikshank, George O., Lelpsic, Ohio. Device for curing tobacco and the like. 1,667,512; Apr. 24.
Crump, John W. (See Potter, H. V., and Crump.)
Cummins, Thomas K., assignor to Northern Malleable Iron Company, St. Paul, Minn. Wire clamp. 1,667,345; Apr. 24.
Cunniff, Edward A., Waltham, assignor to Draper Corporation, Hopedale, Mass. Selvage-relieving mechanism for looms. 1,666,960; Apr. 24.
Curtis & Marble Machine Company. (See Marble, Edwin H., assignor.)
Daley, Daniel M., assignor of one-half to J. H. Sheo, Lackawanna, N. Y. Automatic train-stopping apparatus. 1,667,457; Apr. 24.
Dalheimer, Walther. (See Shepherd, R., and Dalheimer.)
Damard Lacquer Company Limited, The. (See Potter, H. V., and Crump, assignors.)
Danielson, Edna, Berkeley, Calif. Powder puff. Des. 74,968; Apr. 24.
Darby, John, Philadelphia, Pa., and C. W. Old, Montclair, assignors, by mesne assignments, to Shur Loc Elevator Safety Corporation, Newark, N. J. Elevator. 1,667,068; Apr. 24.
Darby, John, Summit, assignor, by mesne assignments, to Shur Loc Elevator Safety Corporation, Newark, N. J. Elevator. 1,667,069; Apr. 24.
Darling, Jay, Williamsport, Ind. Machine for cutting openings for fasteners in metal sheets to be used as forms for making concrete fenceposts. 1,667,196; Apr. 24.
Darney, Harry W. (See Meyers, F. B., and Darney.)
Darrah, William A., Chicago, Ill. Thermocouple. 1,667,142; Apr. 24.
Davidson, Margaret, Philadelphia, Pa. Lady's hat. 1,667,415; Apr. 24.
Davis, Bemiss N., New Orleans, La. Machine for loading and unloading ships. 1,666,995; Apr. 24.
Davis, Robert R., assignor, by mesne assignments, of one-half to G. C. Albers and one-half to J. D. Young, St. Louis Mo. Reaming tool. 1,666,926; Apr. 24.
Day, William H., East Haven, Conn., assignor, by mesne assignments, to Remington Rand Inc., Tonawanda, N. Y. Index or file leaf. 1,667,538; Apr. 24.
Day, William H., East Haven, Conn., assignor, by mesne assignments, to Remington Rand Inc., Tonawanda, N. Y. Index or file. 1,667,539; Apr. 24.
De Cesare, Matteo, Newark, N. J., assignor, by mesne assignments, to Voices Incorporated. Sound-reproducing device. 1,667,103; Apr. 24.
De Cesare, Matteo, Newark, N. J., assignor, by mesne assignments, to Voices Incorporated. Sound-producing device. 1,667,104; Apr. 24.
Deere & Company. (See Paul, William L., assignor.)
De Jong, Hendrik. (See Reufel, H. M. H., de Jong, and Wentink.)
Delaney, Joseph R., Cincinnati, Ohio. Meter-window frame. 1,666,927; Apr. 24.
Delco-Remy Corporation. (See Jones, R. G., and Zwiebel, assignors.)
De Luiz, Edward R., and H. L. Mitchell, assignors to Wayne Company, Fort Wayne, Ind. Discharge valve for ice-machine compressors. 1,667,143; Apr. 24.
Delvin, Hart E., Evanston, Ill. Combined tent and swing frame. 1,666,961; Apr. 24.
Dennies, Douglas B., and C. Wilson, Taft, Calif. Fluid elevator. 1,666,962; Apr. 24.
Dennis, Samuel K., assignor to International Harvester Company, Chicago, Ill. Cultivator. 1,667,374; Apr. 24.
Dennis, William J., Chicago, Ill. Weather strip. 1,667,144; Apr. 24.
Dent Hardware Co. (See Schrader, Thomas O., assignor.)
Denver Rock Drill Manufacturing Company, The. (See Clark, Omar E., assignor.)
De Sherbinin, Eric M. (See Kehoe, J. J., jr., Morson, and De Sherbinin.)
Desloge, Joseph, assignor to Killark Electric Manufacturing Company, St. Louis, Mo. Transformer. 1,666,889; Apr. 24.
Deutsche Werke Kiel Aktiengesellschaft. (See Kade, Friedrich, assignor.)
Diamond Power Specialty Corporation. (See Mattsson, Alfred G., assignor.)
Diamond Ray Light Company, The. (See Wolfe, Arthur W., assignor.)
Dickinson, Harry E., Houston, Tex. Gas floor furnace. 1,667,625; Apr. 24.
Diederichs, Hugo N., Charleston, W. Va., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Drawing sheet glass. 1,667,145; Apr. 24.
Dieterle, Walter, and O. Matthies, Dessau, and J. Reitstötter, Berlin-Friedenau, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacturing photographic silver halid emulsions. 1,667,580; Apr. 24.
Dilzell, Walter A., New Orleans, La. Antitheft attachment for meters. 1,667,656; Apr. 24.
Dinwiddie, Joseph G., Penns Grove, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Vat dyestuff and making same. Re16,989; Apr. 24.
Dobert, Frank C., Rutherford, assignor to A. Kretzmer, Clifton, N. J. Wall table, shelf, or rack. 1,667,657; Apr. 24.
Dodge, Adiel Y., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Making brake shoes. 1,667,375; Apr. 24.
Donaldson, John S., New York, N. Y. Dressing tool. 1,666,890; Apr. 24.
Donnelly, Edward F., Malden, Mass. Relief valve. 1,667,590; Apr. 24.
Donner, Carl H., Summit, N. J. Machine for cleaning hair and other filamentary material. 1,666,891; Apr. 24.
Dorsey, Herbert G., Gloucester, assignor to Submarine Signal Corporation, Boston, Mass. Method and apparatus for measuring distance. 1,667,540; Apr. 24.
Douglas, Hazen, Dundalk, Md. Educational card game. 1,666,996; Apr. 24.
Downs, Charles R., Cliffside, and L. Weisberg, Grantwood, N. J., assignors to The Barrett Company. Water-resistant polyhydric alcohol-carboxylic acid resin and making same. 1,667,197; Apr. 24.

Downs, Charles R., Cliffside, and L. Weisberg, Grantwood, N. J., assignors to The Barrett Company. Water-resistant carboxylic acid-polyhydric alcohol resins. 1,667,198; Apr. 24.
Downs, Charles R., Cliffside, and L. Weisberg, Grantwood, N. J., assignors to The Barrett Company. Water-resistant carboxylic acid-polyhydric alcohol resin. 1,667,199; Apr. 24.
Downs, Charles R., Cliffside, and L. Weisberg, Grantwood, N. J., assignors to The Barrett Company. Water-resistant carboxylic acid-polyhydric alcohol resin. 1,667,200; Apr. 24.
Drake, John L., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet of glass and producing the same. 1,667,146; Apr. 24.
Draper, Charles T., assignor to The Draper Manufacturing Company, Cleveland, Ohio. Closure for sheet-metal containers. 1,667,607; Apr. 24.
Draper Corporation. (See Cunniff, Edward A., assignor.)
Draper Corporation. (See Willard, George H., assignor.)
Draper Manufacturing Company, The. (See Draper, Charles T., assignor.)
Dreyer, Hans, Munich-Harlaching, Germany. Railway-track inspection apparatus. 1,667,246; Apr. 24.
Driscoll, William H., Jersey City, N. J. Temperature-regulating means for liquid-cooled engines. 1,667,458; Apr. 24.
Du Bois-Reymond, Alard. (See Hahnemann, W., and du Bois-Reymond.)
Dunbar, Noel S., New York, N. Y., assignor, by mesne assignments, to Splitdorf Radio Corporation, Newark, N. J. Radiocabinet. Des. 74,969; Apr. 24.
Dunbar, Noel S., New York, N. Y., assignor, by mesne assignments, to Splitdorf Radio Corporation, Newark, N. J. Radiocabinet. Des. 74,970; Apr. 24.
Dunbar, Noel S., New York, N. Y., assignor, by mesne assignments, to Splitdorf Radio Corporation, Newark, N. J. Radiocabinet. Des. 74,971; Apr. 24.
Dunford & Elliott (Sheffield) Limited. (See Pehrson, Adam H., assignor.)
Du Pont, E. I., de Nemours & Company. (See Burke, C. E., and Hopkins, assignors.)
Du Pont, E. I., de Nemours & Company. (See Dinwiddie, Joseph G., assignor.)
Dura Company, The. (See Carroll, W. W., and Nicholson, assignors.)
Durand & Huguenin S. A. (See Voltz, Théodore, assignor.)
Duratex Corporation. (See Allen, Ralph S., assignor.)
Eaton, George, assignor to M. C. Eaton, Cleveland, Ohio. Electric toaster. Des. 74,972; Apr. 24.
Eaton, May C. (See Eaton, George, assignor.)
Economy Products Corporation. (See Voight, George F., assignor.)
Edeburn, Alfred N. (See Edeburn, Tod S., assignor.)
Edeburn, Tod S., assignor to A. N. Edeburn, Cleveland, Ohio. Coupling member or link. 1,667,541; Apr. 24.
Eden, Edward H., St. Louis, Mo. Snow shovel. 1,667,591; Apr. 24.
Edison Electric Appliance Company. (See Halle, Simon, assignor.)
Edwards, O. M., Company Inc., The. (See Chaffee, Edward F., assignor.)
Egan, John J., assignor to W. L. Collins, Boston, Mass. Electric switch. 1,667,247; Apr. 24.
Eggleston, Lewis W., Clarence Township, Erie County, assignor to American Radiator Company, New York, N. Y. Valve. 1,667,698; Apr. 24.
Egley, Harry G., Morris Plains, N. J. Glare shield. 1,667,658; Apr. 24.
Eisele & Company. (See Stewart, William E., assignor.)
Eisele, Logan, Nashville, Tenn. Clinical thermometer and sterilizing case. 1,667,248; Apr. 24.
Electric Water Sterilizer and Ozone Company. (See Hartman, Harry B. and F. E., assignors.)
Electrical Research Laboratories. (See Wiggins, Edward J., assignor.)
Elliott, W. H. (See Howell, Harry H., assignor.)
Ellis, Henry A., assignor to The British Drug Houses, Limited, London, England. Apparatus for comparing the color of liquids by reflected and transmitted light. 1,667,249; Apr. 24.
Enamel Products Company, The. (See Allen, Floyd P., assignor.)
Ender, Lewis W., Fountain City, Wis. Envelope opener. 1,667,659; Apr. 24.
English Electric Company Limited, The. (See Calverley, J. E., and Highfield, assignors.)
Ensdorf, Walter, New York, N. Y., and J. Sandberg, Elizabeth, N. J. Electric soldering iron. 1,667,250; Apr. 24.
Epstein, Max, New York, N. Y. Spine support. 1,667,626; Apr. 24.
Ernst, Wilhelm E., Berlin-Schoeneberg, Germany. Apparatus for regulating mixture formation in carburetor systems. 1,666,892; Apr. 24.
Ertz, George L. (See Stokes, Charles L., assignor.)
Eskilson, Sven A., and K. A. B. Holm, Stockholm, Sweden, assignor to American Gasaccumulator Company, Elizabeth, N. J. Pilot burner. 1,666,997; Apr. 24.
Eustice, Charles. (See Sands, O., and Eustice.)
Evans, Fred, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated. Voice mechanism. 1,667,105; Apr. 24.
Evans, Fred, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated. Talking toy mechanism. 1,667,106; Apr. 24.
Evans, Fred, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated. Talking toy mechanism. 1,667,107; Apr. 24.
Evans, Fred, Summit, N. J., assignor, by mesne assignments, to Voices Incorporated. Talking toy mechanism. 1,667,108; Apr. 24.
Evans, Martin E., Kankakee, Ill. Attenuation of materials. 1,666,928; Apr. 24.
Evens, Henry, Duluth, Minn. Combination holder and cigarette-extinguishing ash tray. 1,667,592; Apr. 24.
Evleth, Earl M., Grand Haven, Mich., assignor to The Bastian Blessing Company, Chicago, Ill. Acetylene generator. 1,667,346; Apr. 24.
Faber, firm: A. W. (See Wömpner, Fritz, assignor.)
Faber, Merle E., Waupun, Wis., assignor, by mesne assignments, to The Shaler Company, Wilmington, Del. Repair vulcanizing apparatus. 1,666,998; Apr. 24.
Fain, John A. (See Ogletree, William D., assignor.)
Fairchild, Charles B., assignor of one-half to L. A. M. Fairchild, Chicago, Ill. Automobile headlight. 1,667,288; Apr. 24.
Fairchild, Louise A. M. (See Fairchild, Charles B., assignor.)
Farber, Simon W., Brooklyn, N. Y. Holder for glasses. Des. 74,973; Apr. 24.
Farrell, Sydney T., Newton, Mass. Game. 1,667,147; Apr. 24.
Farrell, Sydney T., Newton, Mass. Football game. 1,667,148; Apr. 24.
Fauser, Oscar W., Bellerose, N. Y. Linoleum or similar hard-surfaced floor covering. Des. 74,974; Apr. 24.
Fay, Richard D., Cambridge, and R. E. Brewer, Boston, Mass. Sound-radiating device. 1,667,251; Apr. 24.
Fehrenkamp, Emil W., assignor to Burd & Fletcher Company, Kansas City, Mo. Display container. 1,667,376; Apr. 24.
Feldman, J. M., Co. Inc., The. (See Holdeman, Harry R., assignor.)
Feldt, Adolf. (See Schoeller, W., Feldt, Gehrke, and Borgwardt.)
Field, Lee C., Cincinnati, Ohio. Chain saw. 1,667,347; Apr. 24.
Finley, Dozier, Berkeley, assignor to The Paraffine Companies, Inc., San Francisco, Calif. Weatherproof and decayproof material. 1,667,201; Apr. 24.
Firm Signal Gesellschaft m. b. H. (See Hahnemann, W., and du Bois-Raymond, assignors.)
Firm Society of Chemical Industry in Basle, The. (See Mayer, B., and Grimmer, assignors.)
Firm Society of Chemical Industry in Basle, The. (See Straub, F., and Schneider, assignors.)
Fisher, Eugene S., and E. R. Mendrop, Hollandale, Miss. Guard finger for mowing machines. 1,667,627; Apr. 24.
Fisk Rubber Company, The. (See Mather, George L., assignor.)
Fisk Rubber Company, The. (See Mead, George J., assignor.)
Fisk Rubber Company, The. (See Midgley, Thomas, assignor.)
Fitch, Clyde J., Brooklyn, assignor to Radio Corporation of America, New York, N. Y. Radio receiving apparatus. 1,667,513; Apr. 24.
Fitzgerald, John D., San Diego, Calif. Rod coupler. 1,667,311; Apr. 24.
Flanagan, James L., Sacramento, Calif. Identification blotter. 1,667,542; Apr. 24.
Flaherty, James I. (See Benien, W., and Flaherty.)
Fleiter, Andrew J., and T. A. Miller, assignors to The Akron Standard Mold Company, Akron, Ohio. Mold-engraving mac ine. 1,667,687; Apr. 24.
Fletcher Works, Incorporated. (See Schaum, Carl, assignor.)
Flor, Konrad. (See Lichtenberger, T., and Flor.)
Ford, Henry, Dearborn, Mich. Manufacturing pistons. 1,667,202; Apr. 24.
Ford Motor Company. (See Kersten, Otto, assignor.)
Ford Motor Company. (See Smith, Charles J., assignor.)
Foley, John W., Chicago, Ill. Roller bearing. 1,667,348; Apr. 24.
Fónagy, Frank, Flagtown, N. J. Safety closet. 1,667,543; Apr. 24.
Föttinger, Herman, Zoppot, near Danzig, Germany. Direct-reading torsion meter. 1,667,628; Apr. 24.
Frame, August J. (See Gilmore, J. G., and Frame.)
Franklin, Chester and C., Willard, Ohio. Milk-bottle support. 1,667,032; Apr. 24.
Franklin, Christine. (See Franklin, Chester and C.)
Frede, Charles F., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Car underframe. 1,666,929; Apr. 24.
Friederich, Ernst, Berlin-Charlottenburg, Germany, assignor to Radio Corporation of America. Glow cathode and electron tube containing same. 1,667,471; Apr. 24.
Friedman, Henry, Brooklyn, N. Y. Slipper. 1,667,629; Apr. 24.
Friedrich, Gebhardt A., Columbus, Ohio. Automobile signal. 1,667,470; Apr. 24.
Fritzsche, Hermann, E. Krummenacher, H. Gubler, and O. Kaiser, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Azodyestuffs and making same. 1,667,812; Apr. 24.

Frost Steel Products, Inc. (See Rose, Benjamin K., assignor.)
Fruehauf Trailer Company. (See Reid, Frederick M., assignor.)
Frye, Richard T., Newburgh, N. Y. Water-closet support. 1,667,593; Apr. 24.
Frye, Whitney M., Wilton, N. H. Waterproof cattle card. 1,667,544; Apr. 24.
Fulton Syphon Company, The. (See Bezzenberger, Fred K., assignor.)
Fulton Syphon Company, The. (See Kinnard, James A., assignor.)
Fynn, Valère A., St. Louis, Mo. Synchronous motor. 1,667,514; Apr. 24.
Gair, Robert, Company. (See Tinsley, Edward O., assignor.)
Galassi, Pasquale, New York, N. Y. Floor-laying device. 1,667,313; Apr. 24.
Garbutt, Frank E., and L. M. Griffith, Los Angeles, Calif., assignors to Paramount Famous Lasky Corporation, New York, N. Y. Film-developing machine. 1,666,909; Apr. 24.
Garland, Clarence H., assignor to American Tool and Machine Company, Boston, Mass. Safety guard for centrifugal machines. 1,667,416; Apr. 24.
Garlent, Perce E., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Lead-testing machine. 1,667,109; Apr. 24.
Garrard, Charles G., assignor to G. S. Walpole, London, England. Mechanism for producing camlike or similar irregular motions. 1,666,893; Apr. 24.
Gartin, Elmer G., Claremont, N. H. Motor. 1,667,699; Apr. 24.
Gathmann, Emil, Baltimore, Md. Ingot mold. 1,667,289; Apr. 24.
Gayer, Ernest C., London, England. Variable-power transmission mechanism. 1,667,290; Apr. 24.
Gehm, Eugene H., Stockton, Calif. Liquid contact connecter. 1,667,660; Apr. 24.
Gehrke, Max. (See Schoeller, W., Feldt, Gehrke, and Borgwardt.)
Geist, William J. (See Van Ee, W., and Geist.)
General Electric Company. (See Abbott, Charles C., assignor.)
General Electric Company. (See Alexanderson, Ernst F. W., assignor.)
General Electric Company. (See Burnham, Locke H., assignor.)
General Electric Company. (See Case, Frank E., assignor.)
General Electric Company. (See Chapman, Verni J., assignor.)
General Electric Company. (See Corson, A. J., and Hoare, assignors.)
General Electric Company. (See Holbrook, Henry S., assignor.)
General Electric Company. (See Macmillan, Campbell, assignor.)
General Electric Company. (See Maurer, Louis A., assignor.)
General Electric Company. (See Nixdorff, Samuel P., assignor.)
General Electric Company. (See Pollok, Othmar, assignor.)
General Electric Company. (See Reufel, H. M. H., de Jong, and Wentink, assignors.)
General Electric Company. (See Rex, Harold B., assignor.)
General Electric Company. (See Riecke, Ernst, assignor.)
General Electric Company. (See Shepherd, R., and Dalheimer, assignors.)
General Electric Company. (See Valentine, Irving R., assignor.)
General Electric Company. (See Zelt, Elmer J., assignor.)
General Fire Extinguisher Company. (See Loepsinger, Albert J., assignor.)
General Motors Research Corporation. (See Wallace, Hugh, assignor.)
General Norit Company, Limited. (See Lourens, Cornelis, assignor.)
General Railway Signal Company. (See Carter, Paul E., assignor.)
General Railway Signal Company. (See Howe, Winthrop K., assignor.)
General Railway Signal Company. (See Prescott, Charles W., assignor.)
Gerlach, Erwin, Berlin-Siemensstadt, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Acoustic device. 1,667,149; Apr. 24.
Germer, Edward G., E. G. Walbridge, and J. M. Wysocki, Erie, Pa.; said Walbridge and Wysocki assignors to said Germer. Molding machine. 1,666,963; Apr. 24.
Germond, Henry S., jr. (See Green, Harold, assignor.)
Gibbons, Forrest H., Russell, N. Y. Valve-stem attachment. 1,667,594; Apr. 24.
Gilmore, Jackson G., and A. J. Frame, Columbus, Ohio. Flow regulator for oil burners. 1,667,814; Apr. 24.
Githens, Thomas F., Cleveland Heights, assignor to The Cleveland Twist Drill Company, Cleveland, Ohio. Tool and making same. 1,667,417; Apr. 24.
Gleason Works. (See Wildhaber, Ernest, assignor.)
Gminder, Emil, Reutlingen, Germany. Spinning. 1,666,894; Apr. 24.
Goddard, John W. (See Gouldbourn, J., and Goddard.)
Goddard, Wilfred B., Burlingame, Calif. Illuminating mirror. 1,667,545; Apr. 24.
Godsey, Robert D., and M. P. Litton, Bristol, Va., assignors of three-fourths to said Godsey and one-fourth to said Litton. Milk distributor and bottle collector. 1,667,000; Apr. 24.
Goetzelman, William, Chicago, Ill., assignor to Appleton Electric Company. Clamp for connection boxes. 1,667,688; Apr. 24.
Goldberg, Emanuel, and M. Nowicki, assignors to the firm: Zeiss-Ikon Aktiengesellschaft, Dresden, Germany. Film box. 1,667,110; Apr. 24.
Goldschmidt, Rudolf, Charlottenburg, Germany. Mechanical hammer. 1,667,546; Apr. 24.
Gollomb, Herman, Brooklyn, N. Y. Photographic-film hanger. 1,666,895; Apr. 24.
Gooch, T. D., et al. (See Sherrod, Robert L., assignor.)
Goodrich, B. F., Company, The. (See Bodle, Virgil H., assignor.)
Goodrich, B. F., Company, The. (See Matthias, Gilbert L., assignor.)
Gouldbourn, Joseph, and J. W. Goddard, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Lining-trimming machine. 1,666,964; Apr. 24.
Government and the People of the United States of America, The. (See Reed, Jesse O., assignor.)
Grammes, L. F., & Sons, Inc. (See Price, C. S., and Weindel, assignors.)
Grant, John. (See Campbell, Stewart L., assignor.)
Grasley, Jacob F., Zanesville, Ohio. Socket wrench. 1,667,661; Apr. 24.
Grasselli Dyestuff Corporation. (See Thauss, A., Mauthe, and Günther, assignors.)
Gray & Murdock Mfg. Co. (See Gray, O. H., and Murdock, assignors.)
Gray, Owen H., and C. E. Murdock, assignors to Gray & Murdock Mfg. Co., Salt Lake City, Utah. Furnace. 1,6667,001; Apr. 24.
Green, Fred P., assignor to The Lustre Co., St. Louis, Mo. Plating apparatus. 1,667,515; Apr. 24.
Green, Harold, Yonkers, N. Y., assignor to H. S. Germond, jr., Bayonne, N. J. Portable elevator. 1,667,547; Apr. 24.
Griffith, Leigh M. (See Garbutt, F. E., and Griffith.)
Griffith, Minnie Almira, Wash. Dressmaker's gauge and creaser. 1,667,150; Apr. 24.
Grimmer, Josef. (See Mayer, B., and Grimmer.)
Groen, Christopher, Algonquin, Ill. Driving mechanism for ironing machines. 1,667,151; Apr. 24.
Gruber, Morris M., East Orange, N. J., assignor, by mesne assignments, to Sonora Phonograph Company, Inc. Locking device. 1,667,377; Apr. 24.
Grupe, William F., Lyndhurst, N. J., assignor to Peerless Roll Leaf Co., Inc., New York, N. Y. Transfer media. 1,667,689; Apr. 24.
Gubler, Hans. (See Fritzsche, H., Krummenacher, Gubler, and Kaiser.)
Guenther, Charles J., Boston, Mass., assignor to Stickle Steam Specialties Company, Indianapolis, Ind. Recording device for paper machines. 1,667,516; Apr. 24.
Gueritey, Charles, assignor to Passaic Metal Ware Co., Passaic, N. J. Conveying mechanism. 1,667,349; Apr. 24.
Gulbenkian Seamless Rug Company. (See Smith, William E., assignor.)
Günther, Alfred. (See Thauss A., Mauthe, and Günther.)
Habenicht, Frederick K., assignor to Railway Devices Company, St. Louis, Mo. Angle-cock holder. 1,666,896; Apr. 24.
Hahnemann, Walter, Kitzeberg, near Kiel, and A. du Bois-Reymond, Plon, near Kiel, assignors to the firm Signal Gesellschaft m. b. H., Kiel, Germany. Subaqueous sound-signaling apparatus. 1,667,418; Apr. 24.
Halcolite Company. (See Lipsky, Norman, assignor.)
Hale, Charles C., et al. (See Cross, George H., assignor.)
Hall Airways Corporation. (See Hall, Charles S., assignor.)
Hall, Charles S., Los Angeles, Calif., assignor to Hall Airways Corporation, Dover, Del. Aircraft. 1,667,002; Apr. 24.
Halle, Simon, Colorado Springs, Colo., assignor to Edison Electric Appliance Company, Inc. Temperature-control means. 1,667,595; Apr. 24.
Hamilton Beach Mfg. Co. (See Robinson, Patrick H., assignor.)
Hamm, Rollie, assignor to Indiana Gravel Company, Indianapolis, Ind. Sand gate. 1,667,690; Apr. 24.
Hammond, John H., jr., Gloucester, Mass. Ship-guidance system. 1,666,897; Apr. 24.
Hanch, Charles C., Indianapolis, Ind. Piston. 1,667,548; Apr. 24.
Handlan, Alexander H. (See Rolfes, George H., assignor.)
Handlan, Alexander H., St. Louis, Mo. Hand lantern. 1,667,378; Apr. 24.
Handlan, Alexander H., St. Louis, Mo. Lantern. 1,667,379; Apr. 24.
Handlan, Alexander H., St. Louis, Mo. Light-source support. 1,667,380; Apr. 24.
Hanken, Louis, Seattle, Wash. Pot seine. 1,667,700; Apr. 24.

Hansen Canning Machinery Corporation. (See Hansen, Oswald H., assignor.)
Hansen, Oswald H., assignor to Hansen Canning Machinery Corporation, Port Washington, Wis. Can-filling machine. 1,666,930; Apr. 24.
Hansen, Oswald H., Port Washington, assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis. Can-filling machine. 1,666,931; Apr. 24.
Hansen, Oswald H., Port Washington, assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis. Apparatus for facilitating the treatment of corn. 1,666,932; Apr. 24.
Hansen, Oswald H., Milwaukee, assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis. Corn sliker. 1,666,933; Apr. 24.
Hanson, Carl H., Hudson Heights, N. J. Drill bit. 1,666,898; Apr. 24.
Harder Refrigerator Corporation. (See Kilbourne, Charles E., assignor.)
Hardesty, R., Manufacturing Company, The. (See Barnard, Russell E., assignor.)
Hardiman, James S., assignor to Anchor Cap & Closure Corporation, Long Island City, N. Y. Screw-cap closure. 1,667,003; Apr. 24.
Harrell, Arthur C., Pensacola, Fla. Automatic train-pipe coupling. 1,667,033; Apr. 24.
Harris, Ernest C., Denver, Colo. Valve. 1,667,208; Apr. 24.
Harris, Gordon D., Freeport, N. Y., assignor to The Industrial Dryer Corporation, Stamford, Conn. Conditioning shoes and analogous products. 1,667,315; Apr. 24.
Hartman, Frank E. (See Hartman, Harry B. and F. E.)
Hartman, Harry B. and F. E., assignors to Electric Water Sterilizer and Ozone Company, Scottdale, Pa. Dehydrator. 1,667,316; Apr. 24.
Hatton, Hugh B., jr., Glendale, Calif. Sealing valve for gas lines. 1,667,034; Apr. 24.
Hausleiter, Fritz H., Munich, Germany. Metal-framed half-tone screen and forming the metal frame thereon. 1,667,517; Apr. 24.
Hawley, Charles G., Cleveland, Ohio, assignor to Locomotive Firebox Company, Chicago, Ill. Locomotive boiler. 1,667,111; Apr. 24.
Hawley, Charles G., Cleveland, Ohio, assignor to Locomotive Firebox Company, Chicago, Ill. Locomotive boiler. 1,667,112; Apr. 24.
Hawley, John B., jr., Minneapolis, Minn. Tie rod. 1,667,252; Apr. 24.
Hawley, John B., jr., Minneapolis, Minn. Tie rod for concrete forms. 1,667,253; Apr. 24.
Hayes, Fred B., assignor to Western Gas Construction Company, Fort Wayne, Ind. Making carbureted water gas. 1,667,518; Apr. 24.
Haywood, Albert E., Coventry, England. Instrument for drawing, marking out, and measuring or like purposes. 1,666,934; Apr. 24.
Hechenbleikner, Ingenuin, Charlotte, N. C., assignor to Chemical Construction Company, New York, N. Y. Phosphoric-acid manufacture. 1,667,540; Apr. 24.
Hechler, Frederick W., Darby, Pa. Handle for coffeepots or the like. 1,667,519; Apr. 24.
Hedrich, Herman, Brooklyn, N. Y. Padlock. 1,667,254; Apr. 24.
Hegge, Martin, Los Angeles, Calif. Wave motor. 1,667,152; Apr. 24.
Heidbrink, Jay A., Minneapolis, Minn. Anæsthetising apparatus. 1,667,113; Apr. 24.
Heise, George W., Bayside, and H. H. Thompson, Flushing, N. Y., assignors to National Carbon Company, Inc. Dry cell. 1,667,317; Apr. 24.
Heitz, Leonard F., Lake Mills, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill. Gudgeon structure for churns and butterworkers. 1,667,004; Apr. 24.
Helmer, Louis, New York, N. Y. Refrigerating apparatus. 1,667,350; Apr. 24.
Henkel, Louis C. (See Steurer, John H., assignor.)
Henricson, Edwin A., assignor to Motor Products Corporation, Detroit, Mich. Windshield pivot. 1,666,899; Apr. 24.
Henry, James N., Providence, R. I. Curtain support. 1,667,520; Apr. 24.
Hercules Powder Company. (See Smith, R. B., and Symmes, assignors.)
Herman, Joseph, New York, N. Y., assignor to American Telephone and Telegraph Company. Differential duplex telegraph repeater. 1,666,965; Apr. 24.
Hermanson, Oscar, New York, N. Y. Ocean stage. 1,667,255; Apr. 24.
Herrschaft, William, New York, N. Y. Toy construction set. 1,667,256; Apr. 24.
Hetlesater, Elisabeth, executrix. (See Hetlesater, Olaf.)
Hetlesater, Olaf, deceased, Seattle, Wash.; E. Hetlesater, executrix. Excavating machine. 1,667,381; Apr. 24.
Heymann, Bruno, San Francisco, Calif. Machine for producing irregular surfaces. 1,667,153; Apr. 24.
Heywood, Charles F., Detroit, Mich. Safety valve. 1,667,154; Apr. 24.
Hickok, W. O., Manufacturing Company. (See Broadmeyer, Albert, assignor.)
Hicks, William W., San Francisco, and A. J. Kercher, Berkeley, Calif. Electric heater. 1,667,257; Apr. 24.
Higdon, Zalmon B., Ponca City, Okla. Drilling bit. 1,667,155; Apr. 24.
Highfield, William E. (See Calverley, J. E., and Highfield.)
Hill, Joseph B., assignor to The Atlantic Refining Company, Philadelphia, Pa. Conversion of lead sludge. 1,667,550; Apr. 24.
Hill, Roscoe G., assignor of one-half to F. X. Knobel, River Falls, Wis. Piston and piston-ring construction. 1,666,966; Apr. 24.
Hinds, Robert L. (See Lewellyn, John A., assignor.)
Hinshaw, John B., Topeka, Kans. Antifriction agitator. 1,667,551; Apr. 24.
Hoare, Stephen C. (See Corson, A. J., and Hoare.)
Hodgson, Walter W., assignor to Walter W. Hodgson, Inc., Philadelphia, Pa. Selecting machine for dictating the punching of holes in jacquard cards. 1,666,900; Apr. 24.
Hodgson, Walter W., Inc. (See Hodgson, Walter W., assignor.)
Hoerr, Louis A., St. Louis, Mo., assignor to Railway Devices Company. Angle-cock and pipe holder. 1,667,005; Apr. 24.
Hofeller, Robert. (See Pieper, Albert G. L., assignor.)
Hoffmann-La Roche Chemical Works, The. (See Blankart, André, assignor.)
Hofstetter, Robert, Berwyn, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Lapping machine. 1,667,006; Apr. 24.
Hokanson, Otto A., assignor to Woodstock Typewriter Company, Woodstock, Ill. Back-spacing mechanism for typewriters. 1,667,007; Apr. 24.
Holbrook, Henry S., Rugby, England, assignor to General Electric Company. Protective arrangement. 1,667,662; Apr. 24.
Holcomb, William C., Carrizozo, N. Mex. Ballast tow-line marker and shoulder cleaner. 1,667,459; Apr. 24.
Holdeman, Harry R., assignor to The J. M. Feldman Co. Inc., Los Angeles, Calif. Italian-effect grille for lighting fixtures or similar articles. Des. 74,975; Apr. 24.
Holdeman, Harry R., assignor to The J. M. Feldman Co. Inc., Los Angeles, Calif. Wall plate for lighting fixtures. Des. 74,976; Apr. 24.
Hollar, William H., jr., Drexel Hill, Pa. Envelope. 1,667,258; Apr. 24.
Holm, Karl A. B. (See Eskilson, S. A., and Holm.)
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Drilling tool. 1,667,156; Apr. 24.
Hooker, Duncan C., Farmington, Conn. Refrigerating cabinet. 1,667,114; Apr. 24.
Hoos, Bernard J., Baltimore, Md. Ash tray. 1,667,663; Apr. 24.
Hopkins, Horace H. (See Burke, C. E., and Hopkins, assignors.)
Hough, Edward B., Providence, R. I. Cigarette case. 1,666,902; Apr. 24.
Hough, Herbert D., Cranston, assignor to Wightman and Hough Company, Providence, R. I. Vanity case. 1,666,901; Apr. 24.
Houghton, E. F., & Company. (See Peirson, C. H., and Bohne, assignors.)
Houston, Everett T., et al. (See Bonge, Charles E., assignor.)
Howcott, Harley A. W., New Orleans, La. Igniter for internal-combustion engines. 1,666,967; Apr. 24.
Howe, Winthrop K., assignor, by mesne assignments, to General Railway Signal Company, Rochester, N. Y. Power-operated wringer. 1,667,472; Apr. 24.
Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Railway-switch-selector-operating means. 1,667,473; Apr. 24.
Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Railway-switch-selector-operating means. 1,667,474; Apr. 24.
Howell, Harry H., Kansas City, Mo., assignor of one-half to W. H. Elliott, Tulsa, Okla. Combination pressure-vacuum valve and thief hatch. 1,666,935; Apr. 24.
Hubbs, Henry E., and L. D. Malone, assignors to The Shelby Spring Hinge Company, Shelby, Ohio. Double-acting hinge and check. 1,666,903; Apr. 24.
Hughes, Charles B., Cherrydale, Va. Truck-body mounting. 1,667,204; Apr. 24.
Hughes, Thomas J., Pottsville, Pa. Sprocket chain. 1,667,259; Apr. 24.
Hull, Lewis M., assignor to Radio Frequency Laboratories, Incorporated, Boonton, N. J. Electrical amplifier circuit. 1,667,710; Apr. 24.
Hünermann, Peter A., assignor to the firm Jaroslaw's Erste Glimmerwarenfabrik in Berlin, Berlin-Weissensee, Germany. Insulating tube. 1,667,035; Apr. 24.
Huntoon, Harry A., La Grange, Ill., assignor to International Harvester Company. Load lifting and transporting device. 1,667,382; Apr. 24.
Hurley, Edward F. (See Kyle, E. M., and Hurley.)
Hussey, James W., Martinsville, Ind. Keg. 1,667,460; Apr. 24.
Hutto, Marsden C., Detroit, Mich. Cylinder grinder. 1,667,157; Apr. 24.
Hyde Engineering Company. (See Hyde, Henry W., assignor.)
Hyde, Henry W., North Cohasset, assignor to Hyde Engineering Company, Boston, Mass. Spring suspension for vehicles. 1,667,115; Apr. 24.

Hyde, Henry W., North Cohasset, assignor to Hyde Engineering Company, Boston, Mass. Spring suspension for vehicles. 1,667,116; Apr. 24.

I. G. Farbenindustrie Aktiengesellschaft. (See Dieterle, W., Matthies, and Reitstötter, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Laska, A. L., and Zitscher, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Michel, Richard, assignor.)

Ideal Removable Body Company. (See Baxter, William M., assignor.)

Igou, Dennis T., Springfield, Ohio. Valve-grinding tool. 1,667,552; Apr. 24.

Illinois Tool Works. (See Olson, Carl G., assignor.)

Indiana Gravel Company. (See Hamm, Rellie, assignor.)

Industrial Dryer Corporation, The. (See Harris, Gordon D., assignor.)

Ingwersen, Gustav F., Denver, Colo. Artificial jaws. 1,667,205; Apr. 24.

International Harvester Company. (See Anthony, John E., assignor.)

International Harvester Company. (See Benjamin, B. R., and Raney, assignors.)

International Harvester Company. (See Cady, Sherman W., assignor.)

International Harvester Company. (See Dennis, Samuel K., assignor.)

International Harvester Company. (See Huntoon, Harry A., assignor.)

International Harvester Company. (See Raney, C. R., and Johnson, assignors.)

International Harvester Company. (See Robinson, Charles W., assignor.)

International Harvester Company. (See Van Der Vliet, Menno, assignor.)

International Silver Co. (See Beck, Ernest T., assignor.)

Ireland, Ward S., assignor to National Refrigeration Corporation, Beloit, Wis. Belt-tightening idler mount. 1,667,117; Apr. 24.

Isler, Max, and L. von Mechel, assignors to the firm: Society of Chemical Industry in Basle, Basel, Switzerland. Azodyestuff derived from 1:8-naphthalene dicarboxylic acid and making the same. 1,667,328; Apr. 24.

Ives, Clifford E., Chicago, Ill. Electric switch. 1,667,158; Apr. 24.

Jackson, Ernest W., Sausalito, assignor to Perfecto Gear Differential Co., Oakland, Calif. Transmission clutch. 1,667,260; Apr. 24.

Jagenberg-Werke Akt.-Ges. (See Bäuml, Maximilian, assignor.)

Jahant, Augustus P., assignor to The Akron Standard Mold Company, Akron, Ohio. Mold-engraving machine. 1,667,036; Apr. 24.

James, Henry N., Miami, Fla. Scissors and shears. 1,666,968; Apr. 24.

James, Henry N., Miami, Fla. Cloth cutter. 1,666,969; Apr. 24.

James, Joseph H., Pittsburgh, Pa. Oxidizing mineral hydrocarbons. 1,667,419; Apr. 24.

Jandus, Herbert S., and N. Van Husen, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Vehicle bumper. Des. 74,977; Apr. 24.

Jandus, Herbert S. and N. Van Husen, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Vehicle bumper. Des. 74,978; Apr. 24.

Jaroslaw's Erst Glimmerwarenfabrik in Berlin. (See Hünermann, Peter A., assignor.)

Jauss, Carlos L., Mexico, Mex. Electromagnet. 1,666,970; Apr. 24.

Jenkins, Charles F., Washington, D. C. Grid-coupled cell circuit. 1,667,383; Apr. 24.

Jenkins, Charles F., Washington, D. C. Grid-leak cell circuit. 1,667,384; Apr. 24.

Jenkins, George W., et al. (See Barnes, George, assignor.)

Johnson, Arnold E. W. (See Raney, C. R., and Johnson.)

Johnson-Williamson Laboratories, Incorporated. (See Williamson, Henry M., assignor.)

Johnston, George M., Clinton, Mass., assignor to Wickwire Spencer Steel Company, New York, N. Y. Fish flake. 1,667,553; Apr. 24.

Jones, David B., and F. C. Swartz, Cleveland, Ohio. Regenerative furnace. 1,667,319; Apr. 24.

Jones, Edwin E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,667,385; Apr. 24.

Jones, George A., assignor to Shoe Products, Inc., Lynn, Mass. Shoe. 1,667,159; Apr. 24.

Jones, Russell G., London, England, and C. Zwiebel, assignors, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Armature-winding machine. 1,667,070; Apr. 24.

Jorgensen, Christian A. (See Martin, Thomas, assignor.)

Joy, Frank. (See Laterra, J., and Joy.)

Judd, Ralph P., Cleveland, Ohio. Lubricating compound. Re16,943; Apr. 24.

Kade, Friedrich, assignor to Deutsche Werke Kiel Aktiengesellschaft, Kiel, Germany. Compensated induction motor for single or polyphase alternating current. 1,667,664; Apr. 24.

Kadel, Nicholas, Glendale, Calif. Underground antenna. 1,667,008; Apr. 24.

Kaiser, Otto. (See Fritzsche, H., Krummenacher, Gubler, and Kaiser.)

Kaisha, Saibi M. K. (See Kakuda, Saibei, assignor.)

Kakuda, Saibei, assignor to S. M. K. Kaisha, Fukuyama-Shi, Japan. Apparatus for arranging edges of net fabrics in net-making machines. 1,667,461; Apr. 24.

Kalyptol Products Inc. (See Arthur, Richard S., assignor.)

Kapota, Hyman, New York, N. Y. Fruit peeler. 1,667,596; Apr. 24.

Kasley, Alexander T., Moore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Marine power installation. 1,667,475; Apr. 24.

Keck, George S., Pasadena, Calif. Ejecting holder. 1,667,118; Apr. 24.

Kehoe, James J., jr., W. C. T. Morson, and E. M. De Sherbinin, Toronto, Ontario, Canada, assignors, by mesne assignments, to Paragon Dishwasher Syndicate, Incorporated. Splashproof cabinet for dishwashing and similar purposes. 1,667,119; Apr. 24.

Kehoe, William E., San Francisco, Calif. Base for display stands. Des. 74,997; Apr. 24.

Kelser, Arthur J., assignor to The Bircher Co., Inc., Rochester, N. Y. Feeding or displacing belt. 1,667,120; Apr. 24.

Kelley, George L., assignor to Budd Wheel Company, Philadelphia, Pa. Increasing the elasticity of metal articles. 1,667,476; Apr. 24.

Kelley, William V. D., Brooklyn, N. Y., assignor, by mesne assignments, to Prizma, Incorporated. Producing color pictures. 1,667,477; Apr. 24.

Kellogg Switchboard & Supply Co. (See Stazak, Michael B., assignor.)

Kelso, William, assignor to The McConway & Torley Company, Pittsburgh, Pa. Car coupler. 1,667,071; Apr. 24.

Kenilworth Manufacturing Co. Inc. (See Kosofsky, Morris, assignor.)

Kent, William J., Brooklyn, N. Y., assignor to The Mechanical Rubber Company, Chicago, Ill. Testing machine. 1,667,420; Apr. 24.

Kercher, Arthur J. (See Hicks, W. W., and Kercher.)

Kern, Ludwig, Baltimore, Md. Manufacturing ceramic products. 1,666,936; Apr. 24.

Kersten, Otto, Highland Park, assignor to Ford Motor Company, Detroit, Mich. Signaling device. 1,667,206; Apr. 24.

Ketcham, Milton B., Ridgewood, N. J. Composite leather heel. 1,667,386; Apr. 24.

Ketterman, Charles W., assignor to Ohmer Fare Register Company, Dayton, Ohio. Registering mechanism. 1,667,121; Apr. 24.

Kilbourne, Charles E., Worcester, Mass., assignor to Harder Refrigerator Corporation. Refrigerator drain trap. 1,666,937; Apr. 24.

Kilgus, Carl A., C. A. Burton, and G. O. Bergmoser, Detroit, Mich. Fuel-oil burner. 1,667,122; Apr. 24.

Killark Electric Manufacturing Company. (See Desloge, Joseph, assignor.)

Kindermann, Erich, Berlin-Reinickendorf, assignor to A. Borsig G. m. b. H., Berlin-Tegel, Germany. Refrigerating system. 1,667,038; Apr. 24.

King, Vincent P., et al. (See Tipton, Edward F., assignor.)

Kinnard, James A., Detroit, Mich., assignor to The Fulton Syphon Company, Knoxville, Tenn. Cooling system for internal-combustion engines. 1,667,207; Apr. 24.

Kinnear, Delamar C., assignor, by mesne assignments, to The American Brass Company, Waterbury, Conn. Metal-drawing apparatus. 1,667,387; Apr. 24.

Kinsey, Edwin M., Riverside, N. J. Sample and sample container. 1,667,320; Apr. 24.

Kintzele, Julius H., St. Louis, Mo., assignor to Potato Waffles, Inc., New York, N. Y. Vegetable-slicing machine. 1,667,321; Apr. 24.

Kirzner, Samuel, Malden, Mass. Ash tray. Des. 74,979; Apr. 24.

Kleinfeldt, Edward H., New York, N. Y. Wall construction. 1,667,160; Apr. 24.

Klett Manufacturing Company. (See Klett, Robert E., assignor.)

Klett, Robert E., Teaneck, N. J., assignor to Klett Manufacturing Company, Inc., New York, N. Y. Colorimeter. 1,667,478; Apr. 24.

Klingensmith, Harvey W., Reynoldsville, Pa. Combined ironing board and table. 1,667,665; Apr. 24.

Kluppel, John L., assignor to Portable Rotary Rig Company, Houston, Tex. Proportional gas and air mixing device. 1,667,072; Apr. 24.

Knapp, Bernard. (See Adair, S. E., and Knapp.)

Knapp, Bernard. (See Coburn, J. M., and Knapp.)

Knight, Albert B., Fairmont, W. Va. Charge-forming device. 1,667,074; Apr. 24.

Knight, Edward R., Carson City, Nev., assignor, by mesne assignments, to Mitchell Specialty Company, Philadelphia, Pa. Automobile theft lock. Re16,945; Apr. 24.

Knight, William D. (See Cameron, Angus, assignor.)

Knobel, Frederic X. (See Hill, Roscoe, G., assignor.)

Koester, Herman, assignor to The Bristol Company, Waterbury, Conn. Chart drive roll for strip-recording apparatus. 1,667,479; Apr. 24.

Kokatnur, Vaman R., New York, N. Y. Alkali fusion. 1,667,480; Apr. 24.

Koller, Karl, Los Angeles, Calif. Toy. 1,667,123; Apr. 24.

Kolodziej, Edward J., Buffalo, N. Y. Shock absorber. 1,667,039; Apr. 24.

Konings, John P. (See Lauwagie, P. F., and Konings.)

Koon, Arthur W., Schriever, La. Process and apparatus for drying hay, grain, and the like. 1,667,666; Apr. 24.

Kosofsky, Morris, assignor to Kenilworth Manufacturing Co. Inc., New York, N. Y. Garment. 1,667,161; Apr. 24.

Kreismann, Paul, Chicago, Ill. Glue and making same. 1,667,073; Apr. 24.

Kretschmer, Henry A., La Grange Park, Ill. Combined desk set and picture frame. Des. 74,980; Apr. 24.

Kretzmer, Amelia. (See Dobert, Frank C., assignor.)

Kreutzer, Michael J., Dayton, Ohio. Bottle-washing apparatus. 1,667,597; Apr. 24.

Kroder, John, and Henry Reubel Company, The. (See Crawford, James O., assignor.)

Krug, Rica, Gardner, Ill. Electric clothesbrush. 1,667,554; Apr. 24.

Krummenacher, Eduard. (See Fritzsche, H., Krummenacher, Gubler, and Kaiser.)

Kselimann, Fred, Akron, Ohio. Bowling-alley mat. 1,666,938; Apr. 24.

Kuhns, John P., assignor to National Tag Manufacturing Corporation, Dayton, Ohio. Size marker for hats. 1,667,162; Apr. 24.

Künzer, Marcel, La Chaux-de-Fonds, assignor to Societe Anonyme pour l'Exploitation des Brevets Künzer, Basel, Switzerland. Apparatus for safely sending mail bags, luggage, and similar objects from aerial crafts to the ground. 1,667,421; Apr. 24.

Kyle, Edward M., and E. F. Hurley, Lakeport, N. H. Electric circuit closer. 1,667,037; Apr. 24.

Laher, Frank J., Portland, Oreg. Pivoted luggage carrier. 1,667,208; Apr. 24.

Lamar, Ralph F., Garden City, Kans. Merry-go-round. 1,667,163; Apr. 24.

Landon, Archer A., Buffalo, N. Y. Heating apparatus. 1,667,164; Apr. 24.

Langdon, Jesse D., Los Angeles, Calif., assignor to Petroleum Machinery Development Corporation, Reno, Nev. Truss rod. 1,667,209; Apr. 24.

Lange, Carvel H., and E. W. Vollert, Brooklyn, N. Y., assignors to Playmor Golf, Inc. Game. 1,667,481; Apr. 24.

Langenbach, Edward A. (See Blecker, William M., assignor.)

Larkin, Dennis F., San Francisco, Calif. Perambulator. 1,667,041; Apr. 24.

Larkin, Dennis F., assignor to The Larkin Specialty Manufacturing Co., San Francisco, Calif. Step protector. 1,667,040; Apr. 24.

Larkin Specialty Manufacturing Co., The. (See Larkin, Dennis F., assignor.)

Larson, Alfred T., assignor to Lazote, Incorporated, Wilmington, Del. Ammonia synthesis process and catalyst. 1,667,322; Apr. 24.

Larson, Alfred T., assignor to Lazote, Incorporated, Wilmington, Del. Ammonia synthesis process and catalyst. 1,667,323; Apr. 24.

Laska, August L., and A. Zitscher, Offenbach-on-the-Main, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort, Germany. Azodyestuff and making same. 1,667,667; Apr. 24.

Laterra, John, and F. Joy, Paterson, N. J. Banjo hand rest. 1,667,324; Apr. 24.

Lauwagie, Peter F., and J. P. Konings, Dell Rapids, S. Dak. Veterinary implement. 1,667,325; Apr. 24.

Lavarack, William H. B., Pinebush, N. Y., and D. W. Richards, Roanoke, Va. Parkway cable terminal. 1,667,555; Apr. 24.

Lavett, Charles O., assignor, by mesne assignments, to Buffalo Foundry & Machine Co., Buffalo, N. Y. Apparatus for spraying and treating liquids. 1,667,291; Apr. 24.

Lazote, Incorporated. (See Larson, Alfred T., assignor.)

Ledger, Letcher G. (See Ahern, J. L., and Ledger.)

Lee, Edwin A., Philadelphia, Pa. Container and display device. 1,667,482; Apr. 24.

Lee, K. O., & Son Company, The. (See Purnis, Theodore S., assignor.)

Lemieux, David, Lewiston, Me. Cutting mechanism for automatic looms. 1,667,261; Apr. 24.

Lenz, Jacob M., assignor to Bunsel-Lenz Electric Manufacturing Company, Chicago, Ill. Insulated terminal. 1,667,598; Apr. 24.

Leof, Charles, Detroit, Mich. Liquid dispenser. 1,667,483; Apr. 24.

Leon, Karl O., Lidkoping, Sweden. Advertising device. 1,667,210; Apr. 24.

Levitt, Samuel L., Chicago, Ill. Tire remover. 1,667,351; Apr. 24.

Lewellyn, John A., assignor, by mesne assignments, to R. L. Hinds, Toledo, Ohio. Demagnetizer. 1,667,422; Apr. 24.

Lewis, A., (Finsbury) Limited. (See Widmer, Harry A., assignor.)

Lewis, Saul. (See Ruck, P., and Schutz, assignors.)

Lewis, Wilbur S., Cleveland, Ohio. Crimper. 1,667,556; Apr. 24.

Libbey-Owens Sheet Glass Company, The. (See Crowley, Joseph P., assignor.)

Libbey-Owens Sheet Glass Company, The. (See Diederichs, Hugo N., assignor.)

Libbey-Owens Sheet Glass Company, The. (See Drake, John L., assignor.)

Lichten, Harold, Philadelphia, Pa. Stocking top. 1,667,352; Apr. 24.

Lichtenberger, Theodor, Heilbronn, and K. Flor, Buckeburg, Germany. Obtaining alkaline-earth-metal sulphides from alkaline-earth-metal sulphates. 1,667,423; Apr. 24.

Liese, Paul, Berlin-Tempelhof, Germany. Translucent wall, ceiling, and floor structure. 1,667,484; Apr. 24.

Lietz, John F., Buffalo, N. Y. Roofing construction. 1,666,939; Apr. 24.

Light, Floyd F., Beckley, W. Va. Bucket hanger. 1,667,211; Apr. 24.

Lindensmith, Harry, Walkerton, Ontario, Canada. Fence post. 1,667,424; Apr. 24.

Liniger, George, Fort Wayne, Ind. Pipe support. 1,667,124; Apr. 24.

Lippold, Adolph J., assignor to Milwaukee Dairy Supply Mfg. Co., Milwaukee, Wis. Milk-bottle-draining device. 1,667,075; Apr. 24.

Lipsky, Norman, New York, N. Y., assignor to Halcolite Company, Inc. Lighting-fixture wall bracket or analogous article. Des. 74,981; Apr. 24.

Litton, Moses P. (See Godsey, R. D., and Litton.)

Lloyd, Burt E., Woodcliff, N. J. Toy. 1,667,353; Apr. 24.

Locke, Emery A. (See Bergquist, Charles H., assignor.)

Lockwood, Alvin M., et al. (See Malone, Adolph W., assignor.)

Locomotive Firebox Company. (See Hawley, Charles G., assignor.)

Loeck, Günther, assignor to the firm: Georg Wolf G. m. b. H., Berlin, Germany. Optical tube for cystoscopes, gastroscopes, and the like. 1,667,630; Apr. 24.

Loepsinger, Albert J., assignor, by mesne assignments, to General Fire Extinguisher Company, Providence, R. I. Heat-responsive apparatus. 1,667,425; Apr. 24.

Logan, George A., New York, N. Y. Combination tool. 1,667,462; Apr. 24.

Logan, James W., Chicago, Ill., assignor to The Vulcan Oil Burner Corporation, New York, N. Y. Oil-burning apparatus. 1,667,042; Apr. 24.

Lorenz, William A., West Hartford, assignor to The Otaka Fabric Company, Hartford, Conn. Machine for making elastic paper. 1,667,202; Apr. 24.

Lourens, Cornelis, assignor to General Norit Company, Limited, Amsterdam, Netherlands. Gas-treating process. 1,667,426; Apr. 24.

Luce, Charles R., New York, N. Y. Stick-candy wrapper. Des. 74,982; Apr. 24.

Lueck, Roger H., Oak Park, Ill., assignor, by mesne assignments, to the Public of the United States of America. Enamel for coating cans. 1,667,212; Apr. 24.

Luedke, August J., assignor to Milwaukee Corrugating Company, Milwaukee, Wis. Support for plaster bases. 1,667,701; Apr. 24.

Luft, Hans, Providence, R. I. Coupler. 1,667,557; Apr. 24.

Lupien, Louis A., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Container or box. 1,667,354; Apr. 24.

Lustre Co., The. (See Green, Fred P., assignor.)

Lutschg, Arnold, Great Bend, Kans. Shoe-stitcher attachment. 1,667,427; Apr. 24.

Lynds, Fred H., North Attleboro, Mass., assignor to Whiting & Davis Company. Mesh machine. 1,666,940; Apr. 24.

Macdonald, Rob R., New York, assignor of one-half to L. O. Smith, Brooklyn, N. Y. Connecter. 1,667,485; Apr. 24.

MacGregor, Peter G., Pequannock, assignor to Pyrene Manufacturing Company, Newark, N. J. Relief valve for fire-extinguisher pumps. 1,667,262; Apr. 24.

Mach, Frank C., Dillonvale, Ohio. Fountain comb. 1,667,631; Apr. 24.

Mackie, William, Glasgow, Scotland. Roll for sugar cane and like mills. 1,667,682; Apr. 24.

Macmillan, Campbell, Schenectady, N. Y., assignor to General Electric Company. Power system. 1,667,633; Apr. 24.

Malley, Roy D., East Orange, N. J., assignor to Cooper Hewitt Electric Company. Time switch. 1,666,904; Apr. 24.

Majewicz, Constantly, Detroit, Mich. Sounding device for toy animal figures. 1,667,125; Apr. 24.

Malone, Adolph W., Fillmore, Utah, assignor of one-third to A. H. Vestal, Anderson, Ind., and one-third to A. M. Lockwood, San Antonio, Tex. Cross-arm clamp. 1,667,558; Apr. 24.

Malone, Levi D. (See Hubbs, H. E., and Malone.)

Marble, Edwin H., assignor to Curtis & Marble Machine Company, Worcester, Mass. Sewing machine. 1,667,326; Apr. 24.

Marchetti Motor Patents, Incorporated. (See Marchetti, Paul, assignor.)

Marchetti, Paul, Stockton, Calif., assignor to Marchetti Motor Patents, Incorporated. Internal-combustion motor. 1,667,213; Apr. 24.

Mariotti, Tony, Lorain, Ohio. Surveying instrument. 1,667,599; Apr. 24.
Marshall, John R., McKean, Pa. Electric switch. 1,667,293; Apr. 24.
Martin, Bruno, Saginaw, Mich. Blowtorch. 1,667,429; Apr. 24.
Martin, Morris, Curl Curl, near Sydney, and W. R. Werner, Nymagee, New South Wales, Australia. Internal-combustion engine. 1,666,941; Apr. 24.
Martin, Ted, et al. (See Sherrod, Robert L., assignor.)
Martin, Thomas, assignor of one-half to C. A. Jorgensen, Piedmont, Calif. Combination license plate and tail light. 1,667,126; Apr. 24.
Martinek, Michael, Lyons, assignor to Western Wire & Iron Works, Inc., Chicago, Ill. Sliding-door lock. 1,667,600; Apr. 24.
Martino, Letterio, Everett, Mass. Automobile signal. 1,667,165; Apr. 24.
Mason Alfalfa Process Company. (See Mason, Arthur J., assignor.)
Mason, Arthur J., Homewood, Ill., assignor to Mason Alfalfa Process Company. Agriculture. 1,667,428; Apr. 24.
Massa, Robert F., New York, N. Y., assignor by mesne assignments, to R. and A. Penn, Des Moines, Iowa. Thermostat. Re16,940; Apr. 24.
Mather, George L., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Tire-building apparatus. 1,667,263; Apr. 24.
Matthias, Gilbert L., Cuyahoga Falls, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for making laminated strips. 1,667,009; Apr. 24.
Matthies, Otto. (See Dieterle, W., Matthies, and Reitstötter.)
Mattison, Carl L., assignor to Mattison Machine Works, Rockford, Ill. Wood-turning machine. 1,666,906; Apr. 24.
Mattison Machine Works. (See Mattison, Carl L., assignor.)
Mattsson, Alfred G., assignor to Diamond Power Specialty Corporation, Detroit, Mich. Boiler cleaner. 1,666,905; Apr. 24.
Mauck, Victor, Merion, Pa. Apparatus for exchange of heat. 1,667,430; Apr. 24.
Maurer, Louis A., Irvington, N. J., assignor to General Electric Company. Exhaust-tube remover. 1,667,601; Apr. 24.
Mauthe, Gustav. (See Thauss, A., Mauthe, and Günther.)
Mayer, Bertram, Basel, and J. Grimmer, Neuewelt, near Basel, assignors to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Trisazo dyes derived from deydbro-thio-p-toluidine-sulphonic acid and resorcinol and making same. 1,667,327; Apr. 24.
McCaleb, Albert G., Chicago, Ill., assignor, by mesne assignments, to Trico Products Corporation, Buffalo, N. Y. Windshield-cleaner motor. 1,667,559; Apr. 24.
McCarty, Eugene J., Clinton, Mass. Automobile jack. 1,666,971; Apr. 24.
McConway & Torley Company, The. (See Kelso, William, assignor.)
McCord, Frank P., Mexico, Mo. Arch supporter. 1,667,328; Apr. 24.
McDonald, Charles D., assignor to McDonald Machine Co., Chicago, Ill. Automatic die-press-stopping mechanism. 1,666,942; Apr. 24.
McDonald Machine Co. (See McDonald, Charles D., assignor.)
McGovern, Daniel F., Montpelier, Vt. Polishing wheel. 1,667,076; Apr. 24.
McGrath, John T., Bloomington, Ill. Flue cleaning, cutting, and handling machine. 1,667,388; Apr. 24.
McJannett, John H. (See Strickler, R., and McJannett.)
McLaughlin, Clarke R., Longville, La. Apparatus for manufacturing matched flooring. 1,667,668; Apr. 24.
McMullen, John, Buffalo, N. Y. Device for taking up brake-chain slack. 1,667,560; Apr. 24.
McNeill, Herbert H. (See Brewer, Oscar Z., assignor.)
Mead, George J., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Vulcanization of tire casings. 1,667,127; Apr. 24.
Meads, Walter, assignor to Acme Lace Works, Inc., Hightstown, N. J. Lace medallion. Des. 74,983; Apr. 24.
Mechanical Rubber Company, The. (See Kent, William J., assignor.)
Mecom, Harvey, Liberty, Tex. Drill. 1,667,077; Apr. 24.
Medlavilla, Leopoldo, New York, N. Y. Die-cast boat construction. 1,667,561; Apr. 24.
Meekins, Jesse R., Marshalltown, Iowa. Current motor. 1,667,634; Apr. 24.
Megee, Joseph W., Tulsa, Okla. Display stand. 1,667,669; Apr. 24.
Mendrop, Eldon R. (See Fisher, E. S., and Mendrop.)
Menzel, Max M., Kenosha, Wis. Meat-block scraper and dresser. 1,667,329; Apr. 24.
Mergenthaler Linotype Company. (See Muehleisen, Carl, assignor.)
Merriman, Carroll L. (See Baker, L. E., and Merriman.)
Mettler, Lee B., Los Angeles, Calif. Radiator overflow. 1,667,128; Apr. 24.
Meyer, Fred H., Oakland, assignor to Non-Pressure Glazing Company, San Francisco, Calif. Corner cap for sash structures. 1,667,043; Apr. 24.
Meyers, Frederick B., and H. W. Darney, assignors of one-half to R. Bragonier, Baltimore, Md. Eraser cleaner. 1,667,431; Apr. 24.
Michel, Richard, Uerdingen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Condensation product from olefines and hydrocarbons of the naphthalene series and making the same. 1,667,214; Apr. 24.
Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Mold-aligning means. 1,667,129; Apr. 24.
Miles, Frederick J., and D. C. Thompson, Newark, N. J., assignors, by mesne assignments, to E. Sullivan, New York, N. Y. Double-contact socket for electric lamps. 1,666,973; Apr. 24.
Miles, Frederick J., and D. C. Thompson, Newark, N. J., assignors, by mesne assignments, to E. Sullivan, New York, N. Y. Socket for electric lamps. 1,666,974; Apr. 24.
Miller, Gustaf E. and O. E., Stratton, Nebr. Motor power take-off. 1,666,972; Apr. 24.
Miller, Oscar E. (See Miller, Gustaf E. and O. E.)
Miller, Theodore A. (See Fleiter, A. J., and Miller.)
Milwaukee Corrugating Company. (See Luedke, August J., assignor.)
Milwaukee Dairy Supply Mfg. Co. (See Lippold, Adolph J., assignor.)
Minerals Separation North American Corporation. (See Smith, Harold H., assignor.)
Minerals Separation North American Corporation. (See Wilkinson, Eltoft W., assignor.)
Minnick, Howard B., Chicago, Ill. Combination tie press and rack. 1,667,264; Apr. 24.
Mitchell, Harry L. (See De Luiz, E. R., and Mitchell.)
Mitchell Specialty Company. (See Knight, Edward R., assignor.)
Modine, Arthur B., Racine, Wis. Heating unit. 1,666,907; Apr. 24.
Moore, George C., Westerly, R. I. Garment supporter. 1,667,432; Apr. 24.
Moore, Ralph S., El Paso, Tex., assignor to American Smelting and Refining Company, New York, N. Y. Bin gate. 1,666,908; Apr. 24.
Moore, Roy S., et al. (See Sherrod, Robert L., assignor.)
Moore, T. F., Company, The. (See Vergeer, Albert W. P., assignor.)
Monahan, Joseph H., Worcester, Mass. Belt attachment. 1,666,975; Apr. 24.
Morrison, Simon, New York, N. Y. Vanity case. 1,667,486; Apr. 24.
Morson, William C. T. (See Kehoe, J. J., jr., Morson, and De Sherbinin.)
Motor Products Corporation. (See Henricson, Edwin A., assignor.)
Motor Products Corp. (See Pritchard, William S., assignor.)
Mouton, Willem A., assignor to N. V. Nederlandsche Instrumenten Compagnie, Haag, Netherlands. Range finder. 1,666,943; Apr. 24.
Moyer, Paul S. (See Adams, Alfred S. and W. B., and Moyer.)
Muehleisen, Carl, Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y. Escapement-actuating mechanism of typographical composing machines. 1,666,944; Apr. 24.
Mulherron, G. G., et al. (See Sherrod, Robert L., assignor.)
Mullen, Albert E., New York, N. Y. Container. 1,667,215; Apr. 24.
Murdock, Charles E. (See Gray, O. H., and Murdock.)
Murnane, Daniel J., San Mateo, assignor to Murnane Universal Twin Mirror Company, San Francisco, Calif. Wall-cabinet hinge. 1,667,010; Apr. 24.
Murnane Universal Twin Mirror Company. (See Murnane, Daniel J., assignor.)
Murray, Thomas E., jr., Brooklyn, N. Y. Butt welding. 1,667,487; Apr. 24.
Myers, August G., Cleveland, Ohio. Bracket for lighting fixtures. Des. 74,984; Apr. 24.
Myers, Stanley D., Roseland, N. J. Belt fastening and riveting apparatus. 1,667,294; Apr. 24.
N. V. Nederlandsche Instrumenten Compagnie. (See Mouton, Willem A., assignor.)
National Brake & Electric Company. (See Aikman, Burton S., assignor.)
National Carbon Company. (See Heise, G. W., and Thompson, assignors.)
National Pneumatic Company. (See Rowntree, Harold, assignor.)
National Pole & Treating Company. (See Valentine, Robert D., assignor.)
National Refrigeration Corporation. (See Ireland, Ward S., assignor.)
National Tag Manufacturing Corporation. (See Kuhns, John P., assignor.)
Nauss, Friedrich, Vienna, Austria. Knife-edge bearing for weighing apparatus. 1,667,635; Apr. 24.
Neal, Enoch E., Malden, Mass. Ventilating apparatus for toilet bowls. 1,667,265; Apr. 24.
Neeley Chemical Company. (See Neeley, William M., assignor.)
Neeley, William M., assignor to Neeley Chemical Company, Amarillo, Tex. Boiler compound. 1,667,670; Apr. 24.

Neider, F. A., Company. (See Yates, Nathaniel, jr., assignor.)
Nero, Arvid H., New Britain, assignor to The Arrow Electric Company, Hartford, Conn. Cable grip. 1,667,636; Apr. 24.
Neubauer, Ferdinand, Brooklyn, Ohio. Micrometer. 1,667,562; Apr. 24.
Neuendorff, John B., San Antonio Tex. Gasoline substitute and process of making. 1,666,976; Apr. 24.
Newhall, Henry B., Corporation. (See Pleister, Henry W., assignor.)
Nicholson, Stanley W. (See Carroll, W. W., and Nicholson.)
Nies, Frederick R., Lynn, Mass. Truck. 1,667,671; Apr. 24.
Nigra, Ferdinand, San Antonio, Tex. Record cabinet. 1,667,216; Apr. 24.
Nixdorff, Samuel P., Schenectady, N. Y., assignor to General Electric Company. Frequency changer. 1,667,672; Apr. 24.
Non-Pressure Glazing Company. (See Meyer, Ferd H., assignor.)
Northern Malleable Iron Company. (See Cummins, Thomas K., assignor.)
Norton, Charles L., Boston, Mass. Method and apparatus for making building units. 1,667,434; Apr. 24.
Norton, Frederick H., Newell, W. Va., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Device for holding pyrometers. 1,667,355; Apr. 24.
Nowicki, Martin. (See Goldberg, E., and Nowicki.)
Obergfell, Herbert F., River Forest, assignor to Automatic Electric Company, Chicago, Ill. Combined switch box and support for a hand telephone. Des. 74,985; Apr. 24.
Oddo, Charles A., Buffalo, N. Y. Brush kit. 1,667,044; Apr. 24.
Odlin, Susan I., Dayton, Ohio. Hand loom. 1,667,330; Apr. 24.
O'Donnell, Edward P., Kiefer, Okla. Valve-grinding machine. 1,667,602; Apr. 24.
Ogden, Blanchard, San Diego, Calif. Shaving-soap cake and holder therefor. 1,667,045; Apr. 24.
Ogletree, William D., Mexia, Tex., assignor of one-fourth to J. A. Fain, Oklahoma City, Okla. Oil-well pump. 1,667,433; Apr. 24.
Ohio Brass Company, The. (See Austin, Arthur O., assignor.)
Ohmer Fare Register Company. (See Ketterman, Charles W., assignor.)
Ohmer Fare Register Company. (See Sawyer, Frank, assignor.)
Old, Clayton W. (See Darby, J., and Old.)
Oliver Continuous Filter Company. (See Borden, John F., assignor.)
Oliver, John R., Medfield, assignor to Reece Shoe Machinery Company, Boston, Mass. Welt-sewing machine. 1,667,046; Apr. 24.
Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Hob grinder. 1,667,488; Apr. 24.
Oppenheim, René, assignor to Société Anonyme le Carbone, Levallois-Perrett, France. Lead accumulator. 1,667,435; Apr. 24.
Orr, Francis L., Denver, Colo. Variable-speed transmission. 1,667,166; Apr. 24.
Orth, William H., Philadelphia, Pa. Sliding clothespin bag. 1,667,389; Apr. 24.
Osburn, Robert A., assignor of one-third to J. F. Williams, Birmingham, Ala. Antiglare lens for automobile headlights. 1,667,489; Apr. 24.
Osgood, Charles F., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,667,167; Apr. 24.
Otaka Fabric Company, The. (See Lorenz, William A., assignor.)
O'Toole, Edward, Gary, W. Va. Cleaning and sizing apparatus. 1,667,331; Apr. 24.
Ottenheimer Bros., Inc. (See Ottenheimer, Reuben E., assignor.)
Ottenheimer, Reuben E., assignor to Ottenheimer Bros., Inc., Baltimore, Md. Refrigerating case. Re16,941; Apr. 24.
Overstreet, M. O. (See Billingsley, Percy L., assignor.)
Oxford Varnish Corporation. (See von Webern, Guido, assignor.)
Papp, Bertalan, Bethlehem, Pa. Pan-lid holder. 1,667,266; Apr. 24.
Paraffine Companies, The. (See Finley, Doxier, assignor.)
Paragon Dishwasher Syndicate Incorporated. (See Kehoe, J. J., jr., Morson, and De Sherbinin, assignors.)
Paramount Famous Lasky Corporation. (See Garbutt, F. E., and Griffith, assignors.)
Paramount Paper Products Company. (See Simmons, Paul R., assignor.)
Passaic Metal Ware Co. (See Gueritey, Charles, assignor.)
Pathe Exchange, Inc. (See Chanier, Gaston L., assignor.)
Pathe Exchange, Inc. (See Warner, Sterling W., assignor.)
Patten, George M., Detroit, Mich. Toy piano and operating same. 1,667,073; Apr. 24.
Paul, Andrew, Philadelphia, Pa. Candle-holding bracket. Des. 74,986; Apr. 24.
Paul, William L., Berkeley, Calif., assignor to Deere & Company, Moline, Ill. Tripping device for power-lift plows. 1,667,130; Apr. 24.
Paxon, James. (See Varkas, Aris, N., and J. B., and Paxon.)
Peacock, Charles M., Oak Park, Ill. Time-controlled apparatus. 1,667,356; Apr. 24.
Peacock, Elisha L., assignor to G. A. Peacock, San Francisco, Calif. Shock absorber. 1,667,011; Apr. 24.
Peacock, George A. (See Peacock, Elisha L., assignor.)
Peacock, George A., Oakland, Calif. Shock absorber. 1,667,047; Apr. 24.
Pearson, Olaf S., Kansas City, Kans. Toilet cabinet. 1,667,564; Apr. 24.
Peccaud, Charles, Morbier, France. Automatic balance. 1,667,603; Apr. 24.
Pedrazzo, Emil, Guttenberg, and M. Tua, Union City, N. J. Printing machine. 1,667,390; Apr. 24.
Peerless Roll Leaf Co. (See Grupe, William F., assignor.)
Pehrson, Adam H., Stockholm, Sweden, assignor to Dunford & Elliott (Sheffield) Limited, Sheffield, England. Obtaining valuable products from combustible materials. 1,667,217; Apr. 24.
Peirson, Charles H., and W. A. Bohne, assignors to E. F. Houghton & Company, Philadelphia, Pa. Molding machine. 1,667,673; Apr. 24.
Penn, Albert, et al. (See Massa, Robert F., assignor.)
Penn, Ralph, et al. (See Massa, Robert F., assignor.)
Pennoyer, Edward A., Greenville, S. C. Loom attachment. 1,667,037; Apr. 24.
Pennsylvania Gasoline Drill Company. (See Somervell, Charles S., assignor.)
Perfecto Gear Differential Co. (See Jackson, Ernest W., assignor.)
Perrin, Francis, Paris, France. Sealing device. 1,667,563; Apr. 24.
Peters, Robert B., Brooklyn, N. Y. Bracket. 1,667,604; Apr. 24.
Petroleum Machinery Development Corporation. (See Langden, Jesse D., assignor.)
Petroleum Reclamation Corporation. (See Ryder, H. M., and Bailey, assignors.)
Philippi, Theodore F., East St. Louis, Ill. Bending machine. 1,666,909; Apr. 24.
Pickering, Clarence H., and J. Campbell, Seattle, assignors to Swan Heating Company, Seattle, Wash. Sheet-metal radiator. 1,667,357; Apr. 24.
Pieper, Albert G. L., assignor of one-half to R. Hofeller, Chicago, Ill. Punching and cutting tool. 1,667,012; Apr. 24.
Pietrusiak, Frank, St. Paul, Minn. Core-making machine. 1,667,079; Apr. 24.
Pinard, Joseph L., Sherbrooke, Quebec, Canada. Ash tray. Des. 74,998; Apr. 24.
Piper, Walter F. (See Beardsley, E. O., and Piper.)
Pitcher, Elbridge S., Auburn, Me. Combination piano jack and truck. 1,667,267; Apr. 24.
Piver, William C., Hillside, N. J. Making calcium arsenate. 1,667,490; Apr. 24.
Piver, William C., Hillside, N. J. Making commercial calcium arsenate. 1,667,491; Apr. 24.
Plane-Speaker Corporation. (See Adair, S. E., and Knapp, assignors.)
Plane-Speaker Corporation. (See Coburn, J. M., and Knapp, assignors.)
Playmor Golf, Inc. (See Lange, C. H., and Vollert, assignors.)
Pleister, Henry W., Westfield, assignor, by mesne assignments, to Henry B. Newhall Corporation, Garwood, N. J. Drivescrew expansion and method. 1,667,268; Apr. 24.
Pollok, Othmar, Berlin-Halensee, Germany, assignor to General Electric Company. System of distribution. 1,667,674; Apr. 24.
Portable Rotary Rig Company. (See Kluppel, John L., assignor.)
Poske, Harry C., El Paso, Tex., assignor to American Smelting and Refining Company, New York, N. Y. Metal-casting machine. 1,666,910; Apr. 24.
Potato Waffles, Inc. (See Kintzele, Julius H., assignor.)
Potter, Howard V., and J. W. Crump, Birmingham, assignors to The Damard Lacquer Company Limited, London, England. Accelerator for hardening phenol urea products. 1,667,675; Apr. 24.
Poulton, Roy L., Columbus, Ohio. Display stand. Des. 74,987; Apr. 24.
Powell, Ralph E., Toledo, Ohio. Connecter. 1,667,702; Apr. 24.
Prescott, Charles W., assignor to General Railway Signal Company, Rochester, N. Y. Switch-operator selector. 1,666,911; Apr. 24.
Price, Charles S., Bethlehem, and F. Weindel, jr., assignors to L. F. Grammes & Sons, Inc., Allentown, Pa. Key case or purse. 1,667,676; Apr. 24.
Pritchard, William S., assignor to Motor Products Corp., Detroit, Mich. Windshield-operating mechanism. 1,666,912; Apr. 24.
Prizma, Incorporated. (See Kelley, William V. D., assignor.)
Prosperity Company, The. (See Clisson, Albert B., assignor.)
Prough, Omri A. (See Bradley, J. P., and Prough.)
Public of the United States of America, The. (See Lueck, Roger H., assignor.)

Purnis, Theodore S., assignor to The K. O. Lee & Sons Company, Aberdeen, S. Dak. Tool for planing valve seats. 1,667,218; Apr. 24.

Pyrene Manufacturing Company. (See MacGregor, Peter G., assignor.)

Radcliffe, Carlton R., deceased, New York, N. Y.; C. C. Radcliffe, executrix. Hydraulic power transmitting apparatus for motor vehicles. 1,667,565; Apr. 24.

Radcliffe, Cressida C., executrix. (See Radcliffe, Carlton R.)

Radio Corporation of America. (See Fitch, Clyde J., assignor.)

Radio Corporation of America. (See Friederich, Ernst, assignor.)

Radio Corporation of America. (See Shapiro, Lazarus, assignor.)

Radio Electric Clock Corporation. (See Casner, Thaddeus S., assignor.)

Radio Frequency Laboratories, Incorporated. (See Hull, Lewis M., assignor.)

Raeburn, William, Waterbury, Conn., assignor to M. E. Bernhardt Company, Inc., New York, N. Y. Pocket lighter. Des. 74,988; Apr. 24.

Railway Devices Company. (See Habenicht, Frederick K., assignor.)

Railway Devices Company. (See Hoerr, Louis A., assignor.)

Rainey, Austin E., Grove City, Pa. Scooter sled. 1,667,436; Apr. 24.

Ralston, Emmet G., Indianapolis, Ind. Graphic meter chart and drive. 1,667,492; Apr. 24.

Ramsey, Maxwell E., St. Louis, Mo. Mortuary bed. 1,667,080; Apr. 24.

Randolph, Walter. (See Arnold, F., and Randolph.)

Raney, Clemma R. (See Benjamin, B. R., and Raney.)

Raney, Clemma R., Riverside, and A. E. W. Johnson, assignors to International Harvester Company, Chicago, Ill. Conveying and feeding mechanism for harvester thrashers. 1,667,391; Apr. 24.

Ranney, Leo, New York, N. Y., assignor to Standard Oil Development Corporation. Oil-mining method and apparatus. 1,667,269; Apr. 24.

Ransom, Daniel P., Woodstock, Vt. Rug or carpet beater. 1,667,605; Apr. 24.

Raper, Joseph C., Covington, Ky. Metallic rolling shutter. 1,667,081; Apr. 24.

Rappaport, Samuel, Brooklyn, N. Y. Box. 1,666,913; Apr. 24.

Räth, Curt. (See Binz, A., and Räth.)

Rawlings, William E., near San Jose, Calif. Trap. 1,667,048; Apr. 24.

Ream, John, Sacramento, Calif. Dredging apparatus. 1,667,219; Apr. 24.

Reece Shoe Machinery Company. (See Oliver, John R., assignor.)

Reed, Jesse O., Paxinos, Pa., assignor to The Government and the People of the United States of America. Steam turpentine still. 1,667,168; Apr. 24.

Reese, Heath C., Chicago, Ill. Smoking pipe. 1,666,914; Apr. 24.

Reid, Frederick M., assignor to Fruehauf Trailer Company, Detroit, Mich. Trailer lock. Re16,942; Apr. 24.

Reid, James, Mount Vernon, N. Y., assignor to The Scutan Company. Proofed paper. 1,667,691; Apr. 24.

Reid, James S., Cleveland, Ohio. Internal-combustion engine. 1,667,049; Apr. 24.

Reilly, Alfred F., Attleboro, Mass. Combined cigarette lighter and cigarette container. Des. 74,989; Apr. 24.

Reinhardt, Arthur. (See Schiering, H., and Reinhardt.)

Reitstötter, Josef. (See Dieterle, W., Matthies, and Reitstötter.)

Remaley, David U., Detroit, Mich. Vacuum cleaner. 1,666,915; Apr. 24.

Remington Rand Inc. (See Day, William H., assignor.)

Remter, Arthur F., Artois, Calif. Signaling device for automobiles. 1,667,050; Apr. 24.

Reufel, Heinrich M. H., H. de Jong, Eindhoven, and W. G. F. Wentink, The Hague, Netherlands, assignors to General Electric Company. Wire-coiling machine. 1,667,677; Apr. 24.

Rex, Harold B., Lynn, Mass., assignor to General Electric Company. Adjustable magnet device. 1,667,638; Apr. 24.

Reyrolle, A., & Company Limited. (See Clothier, H. W., and Burgess, assignors.)

Rice, William H., East St. Louis, Ill. Automobile tire air pump. 1,667,051; Apr. 24.

Richards, Daniel W. (See Lavarack, W. H. B., and Richards.)

Riecke, Ernst, Charlottenburg, Germany, assignor to General Electric Company. Electric rolling-mill drive with Leonard control. 1,667,678; Apr. 24.

Rifkin, Jacob, Wilkes-Barre, Pa. Union garment. 1,667,220; Apr. 24.

Robeson, Jacob S., Pennington, N. J. Fuel briquette and making same. 1,667,358; Apr. 24.

Robinson, Charles W., Auburn, N. Y., assignor to International Harvester Company, Chicago, Ill. Tractor disk harrow. 1,667,392; Apr. 24.

Robinson, Patrick H., assignor to Hamilton Beach Mfg. Co., Racine, Wis. Brush guard. 1,667,082; Apr. 24.

Rockwood Sprinkler Company of Massachusetts. (See Carlson, Hjalmar G., assignor.)

Rogers, Arthur R., Jonesport, Me. Machine for cutting fish. 1,667,437; Apr. 24.

Rolfes, George H., assignor to A. H. Handlan, St. Louis, Mo. Focusing device for signal lamps. 1,667,393; Apr. 24.

Romano, John, Brooklyn, N. Y. Toy novelty. 1,667,606; Apr. 24.

Rose, Benjamin K., assignor to Frost Steel Products, Inc., Warren, Ohio. Fastening device for fencing, etc. 1,667,463; Apr. 24.

Rose, William H., Jersey City, N. J. Wind deflector. 1,667,013; Apr. 24.

Roura, Jean, Nerac, France. Device for supporting ties. 1,667,679; Apr. 24.

Rowntree, Harold, Scarsdale, assignor to National Pneumatic Company, New York, N. Y. Electrically-operated door. 1,666,916; Apr. 24.

Royle, Vernon, Paterson, N. J. Routing machine. 1,667,394; Apr. 24.

Ruck, Peter, Brooklyn, and M. Schutz, assignors to S. Lewis, New York, N. Y. Boiler-tube cleaner. 1,667,169; Apr. 24.

Runzel-Lenz Electric Manufacturing Company. (See Lenz, Jacob M., assignor.)

Rupert, George G., Decatur, Ill. Drowning ring for animal traps. 1,667,566; Apr. 24.

Rutter, Clark H., New Castle, Pa. Combination tool. 1,666,977; Apr. 24.

Ruzalski, Joseph A., Blackie, Alberta, Canada. Weeding machine. 1,667,708; Apr. 24.

Ryder, Harry M., and L. J. Bailey, Bradford, Pa., assignors to Petroleum Reclamation Corporation, New York, N. Y. Liquid meter. 1,667,270; Apr. 24.

Sachs, Joseph, Hartford, Conn. Terminal contact clip. 1,666,978; Apr. 24.

Sachs, Joseph, Hartford, Conn. Fusible switch. 1,666,979; Apr. 24.

Sakamoto, Kyugoro, Hamamatsu, Japan. Let-off for looms. 1,667,221; Apr. 24.

Salerno, Ferdinando G., Chicago, Ill. Biscuit-handling machine. 1,667,692; Apr. 24.

Salzburg, Samuel. (See Buckingham, William H., assignor.)

Sammartino, Achille, Providence, R. I. Ring. 1,667,680; Apr. 24.

Sandberg, Johannes. (See Ensdorf, W., and Sandberg.)

Sands, Orville, and C. Eustice, Cuba, Wis. Wagon-body shoveling board. 1,667,438; Apr. 24.

Sanford, Roy S., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake. 1,667,395; Apr. 24.

Sanymetal Products Company, The. (See Carpenter, R. F., and Anderson, assignors.)

Sargent, Frederick G., Westford, assignor to C. G. Sargent's Sons Corporation, Graniteville, Mass. Variable-speed drive for exhaust fans. 1,666,917; Apr. 24.

Sargent's, C. G., Sons Corporation. (See Sargent, Frederick G., assignor.)

Sauer, Johan N. A., Amsterdam, Netherlands. Apparatus for purifying and simultaneously sterilizing water or other liquids or gases. 1,667,439; Apr. 24.

Saunders, Albert F., Syracuse, assignor to T. N. Benedict Mfg. Co., East Syracuse, N. Y. Cake stand. Des. 74,990; Apr. 24.

Sawyer, Frank, Boston, Mass., assignor to Ohmer Fare Register Company, Dayton, Ohio. Annunciator for taximeters. 1,667,131; Apr. 24.

Scannell, Albert T., Chicago, Ill. Mast-erecting apparatus. 1,667,440; Apr. 24.

Schaum, Carl, assignor to Fletcher Works, Incorporated, Philadelphia, Pa. Centrifugal. 1,667,493; Apr. 24.

Schelling, Ernest J., Toledo, Ohio. Dressing. 1,667,222; Apr. 24.

Scherer, Paul A., Medford, Oreg. Handling fruit. 1,667,132; Apr. 24.

Scheuer's, Herman, Son & Co. (See Arnold, Max, assignor.)

Schiering, Hermann, and A. Reinhardt, Apolda, Germany. Railway signaling device. 1,667,709; Apr. 24.

Schneider, Hermann. (See Straub, F., and Schneider.)

Schnurr, Peter, Chicago, Ill. Latching means for window screens. 1,667,607; Apr. 24.

Schoeller, Walter, A. Feldt, M. Gehrke, and E. Borgwardt, assignors to firm: Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Pharmaceutical product. 1,667,052; Apr. 24.

Schotte, Herbert, Berlin-Wilmersdorf, assignor to the firm Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Diacyl isothiocarbamide ether and producing same. 1,667,053; Apr. 24.

Schrader, Harold D., Denver, Colo. Gas burner. 1,667,133; Apr. 24.

Schrader, Thomas O., Allentown, assignor to Dent Hardware Co., Fullerton, Pa. Latching device for refrigerator doors. 1,667,494; Apr. 24.

Schroeder, Simon E., Newton, Iowa. Safety wringer mechanism. 1,667,495; Apr. 24.

Schroeder, Simon E., Newton, Iowa. Wringer. 1,667,496; Apr. 24.

Schutz, Michael. (See Ruck, P., and Schutz.)

Schwab, A. G., & Sons. (See Atkinson, William B., assignor.)

Scofield, Arthur L. (See Craig, T. J., and Scofield.)

Scoville, Eugene M., Cincinnati, Ohio, assignor of one-half to F. L. Swanberg, Pittsburgh, Pa. Sight feed. 1,666,918; Apr. 24.

Scutan Company, The. (See Reid, James, assignor.)

Seaver, Samuel, Haileybury, Ontario, Canada, assignor to Chicago Pneumatic Tool Company, New York, N. Y. Handle attachment for drills. 1,667,271; Apr. 24.

Segal, Samuel, New York, N. Y. Tweezers. 1,667,170; Apr. 24.

Seifert, George W. T., Cairo, Ill. Combined purifier and aspirator for middlings. 1,667,054; Apr. 24.

Sekyer, Carl P., Montreal, Quebec, Canada. Sash fastener. 1,666,945; Apr. 24.

Selb, John J. (See Abramowitz, Joseph, assignor.)

Sessler, Eugene, Chicago, Ill. Arch support. 1,667,359; Apr. 24.

Shaler Company, The. (See Faber, Merle E., assignor.)

Shapiro, Lazarus, New York, N. Y., assignor to Radio Corporation of America. Phase shifter. 1,667,497; Apr. 24.

Sharp, John E., Wheeling, W. Va. Cable head. 1,666,980; Apr. 24.

Sharp & Smith. (See Brix, Harold, assignor.)

Shea, John H. (See Daley, Daniel M., assignor.)

Shelby Spring Hinge Company, The. (See Hubbs, H. E., and Malone, assignors.)

Shelton, William G., St. Louis, Mo. Steaming-tube plug. 1,667,396; Apr. 24.

Shepherd, Richard, and W. Dalhelmer, Eindhoven, Netherlands, assignors to General Electric Company. Wire-coiling machine. 1,667,681; Apr. 24.

Sherlock, Charles B., Philadelphia, Pa. Combination doll and radio set. 1,666,946; Apr. 24.

Sherrod, Robert L., assignor of one-sixth to G. G. Mulherron, one-sixth to T. Martin, one-sixth to F. W. Whitehurst, one-sixth to T. D. Gooch, and one-sixth to R. S. Moore, Brownsville, Tenn. Scrubbing board. 1,667,441; Apr. 24.

Sherwood, Lester L., Los Angeles, Calif. Dental floss holder. 1,667,134; Apr. 24.

Shirk, George. (See Wright, H. J., and Shirk.)

Shoe Products, Inc. (See Jones, George A., assignor.)

Sholin, Frank D., Portland, Oreg. Book rest. 1,667,171; Apr. 24.

Shur Loc Elevator Safety. Corporation. (See Darby, John, assignor.)

Shur Loc Elevator Safety Corporation. (See Darby, J., and Old, assignors.)

Shwayder, Maurice B., assignor to Shwayder Trunk Manufacturing Co., Denver, Colo. Handle for traveling bags, suitcases, etc. 1,667,567; Apr. 24.

Shwayder Trunk Manufacturing Co. (See Shwayder, Maurice B., assignor.)

Siemens & Halske Aktiengesellschaft. (See Gerlach, Erwin, assignor.)

Sikes, Thomas E., Greensboro, N. C. Dental X-ray film holder. 1,667,442; Apr. 24.

Silent, Harold C., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Reducing body-capacity effects on loop-antenna systems. 1,666,947; Apr. 24.

Simmons, Paul R., assignor to Paramount Paper Products Company, Indianapolis, Ind. Machine for manufacturing paper cups. 1,667,498; Apr. 24.

Simon, Ernst, Werden-on-the-Ruhr, Germany. Apparatus for charging fireplaces with highly-inflammable loose fuel. 1,667,703; Apr. 24.

Simonsen, Lorense G., Benson, Nebr. Gas-expelling device. 1,667,443; Apr. 24.

Simpson, Hiram R., San Francisco, Calif. Lock device. 1,667,223; Apr. 24.

Sinclair Refining Company. (See Sloan, Alfred J., assignor.)

Slauson, Stephen A., assignor to Vec Products Company, Cedar Rapids, Iowa. Take-up device. 1,666,948; Apr. 24.

Slauson, Stephen A., assignor to Vec Products Company, Cedar Rapids, Iowa. Take-up device. 1,666,949; Apr. 24.

Sloan, Alfred J., Kansas City, Kans., assignor to Sinclair Refining Company, Chicago, Ill. Pressure still. 1,667,055; Apr. 24.

Smallwood, Richard L., Toronto, Ontario, Canada. Cable-conveyer sprocket. 1,666,950; Apr. 24.

Smith, Charles J., Dearborn, Mich., assignor to Ford Motor Company, Detroit, Mich. Airplane stabilizer. 1,667,224; Apr. 24.

Smith, Eppenetes W., Brooklyn, N. Y. Dimension guide device. 1,667,444; Apr. 24.

Smith, Harold H., Johannesburg, South Africa, assignor to Minerals Separation North American Corporation, New York, N. Y. Production of gas. 1,667,272; Apr. 24.

Smith, Ira E., Stockton, Calif. Mercury contact switch. 1,667,056; Apr. 24.

Smith, Ira E., Stockton, Calif. Water-feed-control system for boilers. 1,667,057; Apr. 24.

Smith, James N., Bonair, Iowa. Snowplow. 1,667,445; Apr. 24.

Smith, John J., Allston, Mass. Pelt or hide stretcher. 1,667,295; Apr. 24.

Smith, Leo O. (See Macdonald, Rob R., assignor.)

Smith, Robert R., assignor of one-half to G. B. Steinhoff, Sargent, Nebr. Combined mailbox and signpost. 1,667,639; Apr. 24.

Smith, Roscoe B., Kenvil, N. J., and E. M. Symmes, assignors to Hercules Powder Company, Wilmington, Del. Gelatin-dynamite explosive. 1,667,083; Apr. 24.

Smith, Samuel H., Rocky River, Ohio. Condenser. 1,667,058; Apr. 24.

Smith, William E., Milltown, assignor to Gulbenkian Seamless Rug Company, New Brunswick, N. J. Brake for pile-wire-controlling mechanism for looms. 1,667,682; Apr. 24.

Snell, George C. S., assignor to J. B. Brooks and Company Limited, Birmingham, England. Hand bag or case. 1,667,014; Apr. 24.

Société Anonyme le Carbone. (See Oppenheim, René, assignor.)

Societe Anonyme pour l'Exploitation des Brevets Künzer. (See Künzer, Marcel, assignor.)

Society of Chemical Industry in Basle. (See Fritzsche, H., Krummenacher, Gubler, and Kaiser, assignors.)

Society of Chemical Industry in Basle. (See Isler, M., and von Mechel, assignors.)

Soderstrom, Oscar, North Attleboro, Mass., assignor to Whiting & Davis Company. Mesh machine. 1,666,951; Apr. 24.

Somervell, Bertha W., administratrix. (See Somervell, Charles S.)

Somervell, Charles S., deceased, Riverton, N. J.; B. W. Somervell, administratrix, assignor to Pennsylvania Gasoline Drill Company, Philadelphia, Pa. Impact or percussive tool of the explosive-motor type. 1,666,981; Apr. 24.

Somogyi, Ference, Paris, France. Interchangeable agricultural machine. 1,667,568; Apr. 24.

Sonora Phonograph Company. (See Gruber, Morris M., assignor.)

Sorensen, Einar N., assignor to Auto-Carburetor Corporation, Fernandina, Fla. Thermostatic controlling device for carburetors. 1,667,569; Apr. 24.

Sparks, William, Jackson, Mich., assignor to The Sparks-Withington Company, Cleveland, Ohio. Signaling device. 1,667,172; Apr. 24.

Sparks-Withington Company, The. (See Sparks, Williams, assignor.)

Splitdorf Radio Corporation. (See Dunbar, Noel S., assignor.)

Spray, Lester E., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,667,059; Apr. 24.

Stahler, Lester L., Union City, Ind. Fuse tongs. 1,667,332; Apr. 24.

Stahmann, William J., El Paso, Tex. Machine for sterilizing cottonseed. 1,667,608; Apr. 24.

Standard Oil Company of California. (See Collier, Henry D., assignor.)

Standard Oil Development Corporation. (See Ranney, Leo, assignor.)

Stark, Alpha P., Pampa, Tex. Firearm-holding and trigger-actuating device. 1,667,060; Apr. 24.

Starkey, William C., Indianapolis, Ind. Liquid gauge. 1,667,499; Apr. 24.

Stasak, Michael B., assignor to Kellogg Switchboard & Supply Co., Chicago, Ill. Telephone system. 1,667,015; Apr. 24.

Steffen, Carl, jr., Vienna, Austria. Obtaining tricalcium sacharate. 1,667,446; Apr. 24.

Steinhoff, George E. (See Smith, Robert B., assignor.)

Stern, David, Dorchester, Mass. Closure. 1,667,084; Apr. 24.

Steurer, John H., assignor of one-half to L. C. Henkel, Rockville Center, N. Y. Thermoelectric transformer. 1,666,919; Apr. 24.

Stewart, Henry C., assignor to The Westmoreland Chemical & Color Company, Philadelphia, Pa. Making copperas. 1,667,693; Apr. 24.

Stewart, Roy E., Brentford, S. Dak. Road scraper. 1,667,173; Apr. 24.

Stewart, William, E., assignor to Eisele & Company, Nashville, Tenn. Syringe shield. 1,667,278; Apr. 24.

Stickle Steam Specialties Company. (See Guenther, Charles J., assignor.)

Stimpson, Edwin B., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Rivet-feeding mechanism. 1,667,397; Apr. 24.

Stimpson, Edwin B., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Rivet-feeding mechanism. 1,667,398; Apr. 24.

Stimpson, Edwin B., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Rivet-feeding mechanism. 1,667,399; Apr. 24.

Stimpson, Edwin B., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Rivet-feeding mechanism. 1,667,400; Apr. 24.

Stimpson, Edwin B., Company. (See Lupien, Louis A., assignor.)

Stimpson, Edwin B., Company. (See Stimpson, Edwin B., assignor.)

Stine, Samuel B., Osceola Mills, Pa. Molding machine. 1,667,296; Apr. 24.

Stockmeyer, Frederick W., Cincinnati, Ohio. Testing method and apparatus. 1,667,401; Apr. 24.

Stokes, Charles L., assignor of one-half to G. L. Erie, Los Angeles, Calif. Braking vehicles. 1,667,016; Apr. 24.

Straub, Fritz, Basel, and H. Schneider, Riehen, near Basel, assignors to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Dyestuff and making same. 1,667,333; Apr. 24.

Straw Ballast Distributor Corporation. (See Straw, Bernard W., assignor.)
Straw, Bernard W., Mount Airy, Md., assignor to Straw Ballast Distributor Corporation, Wilmington, Del. Ballast car. 1,667,085; Apr. 24.
Strickland, Clarence E., Atlantic City, N. J. Blade holder. 1,667,061; Apr. 24.
Strickler, Robert, and J. H. McJannett, Woodstock, Ontario, Canada. Railway gate. 1,666,982; Apr. 24.
Strombeck, John F., Moline, Ill. Game toy. 1,667,086; Apr. 24.
Stroud, William, assignor to Barr and Stroud, Limited, Glasgow, Scotland. Apparatus for the conversion of motion according to one law into motion according to another law. 1,667,640; Apr. 24.
Submarine Signal Corporation. (See Dorsey, Herbert G., assignor.)
Sullivan, Ernest W., Manteca, Calif. Truck loader. 1,666,983; Apr. 24.
Sullivan, Eugene. (See Miles, F. J., and Thompson, assignors.)
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sullivan Machinery Company. (See Osgood, Charles F., assignor.)
Superior Engineering Company Limited. (See Wheeler, Robert C., assignor.)
Swan Heating Company. (See Pickering, C. H., and Campbell, assignors.)
Swan, Hylton, Upper Montclair, N. J., assignor to Bakelite Corporation, New York, N. Y. Making impressions. 1,667,447; Apr. 24.
Swanberg, Floyd L. (See Scoville, Eugene M., assignor.)
Swartz, Frank C. (See Jones, D. B., and Swartz.)
Sweeney, John T., Kingston, N. Y. Can opener. 1,667,360; Apr. 24.
Switzer, William G. (See Weir, A. W., Weingarten, and Switzer.)
Symington Company, The. (See Barrows, Donald S., assignor.)
Symmes, Ernest M. (See Smith, R. B., and Symmes.)
Szelts, Rudolph A., Hawthorne, Calif. Terminal for storage batteries. 1,667,704; Apr. 24.
Tamassy, Jay, New York, N. Y. Bag seal. 1,667,609; Apr. 24.
Taubel, Clarence H., Riverside, N. J. Stocking. Des. 74,991; Apr. 24.
Taylor, Eugene S. (See Young, Hugh E., assignor.)
Taylor Instrument Companies. (See Barr, Daniel R., assignor.)
Teetzel, Fred W., Los Angeles, Calif. Carton. Des. 74,992; Apr. 24.
Tessky, Karl, Esslingen-on-the-Neckar, Germany. Automatic control mechanism. 1,667,062; Apr. 24.
Tewsley, John W., Waverly, N. Y. Wear-compensating pin. 1,667,610; Apr. 24.
Texas Pacific Coal and Oil Company. (See Beattie, Robert, assignor.)
Thauss, Alfred, Cologne-Deutz, G. Mauthe, Cologne-Muhlheim, and A. Günther, Cologne-Riehl, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Manufacture of new sulphonic derivatives of unsaturated fatty acids. 1,667,225; Apr. 24.
Thauss, Alfred, Cologne-Deutz, G. Mauthe, Cologne-Muhlheim, aand A. Günther, Cologne-Riehl, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Preparation of sulphonic acids of aralkylated unsaturated fatty acids. 1,667,226; Apr. 24.
Thelander, Cess, New York, N. Y. Manicuring implement. 1,667,570; Apr. 24.
Thomas, Percy H., Upper Montclair, N. J. System of electrical transmission and transformation. 1,667,087; Apr. 24.
Thompson, Alfred H. and R. F., Los Angeles, Calif. Apparatus for cleansing and disinfecting. 1,667,683; Apr. 24.
Thompson, Donald C. (See Miles, F. J., and Thompson.)
Thompson, Elbert I., Osage City, Mo. Bushing remover. 1,667,227; Apr. 24.
Thompson, Ernest S., Porterville, Calif. Grain separator. 1,667,611; Apr. 24.
Thompson, Harry H. (See Heise, G. W., and Thompson.)
Thompson, Henry W., Altamont, Ill. Farm gate. 1,667,334; Apr. 24.
Thompson, Louis W., Schenectady, N. Y., assignor, by mesne assignments, to Bailey Meter Company. Flow meter and the like. 1,667,612; Apr. 24.
Thompson, Mary W., executrix. (See Thompson, Robert R.)
Thompson, Robert R., deceased, Los Angeles, Calif.; M. W. Thompson, executrix. Oscillating signal. 1,667,174; Apr. 24.
Thompson, Russell F. (See Thompson, Alfred H. and R. F.)
Thull, Frank J., Minneapolis, Minn., assignor to Union Special Machine Company, Chicago, Ill. Bag-sewing machine. Re16,944; Apr. 24.
Tilley, Frederick C., Hendon, London, England. Hydrocarbon-vapor burner. 1,667,613; Apr. 24.
Timbs, Edward, Los Angeles, assignor to Union Tool Company, Torrance, Calif. Clutch for three-speed draw works. 1,667,175; Apr. 24.
Timken-Detroit Axle Company, The. (See Garlent, Perce E., assignor.)
Timken Roller Bearing Company, The. (See Buckwalter, Tracy V., assignor.)
Tinsley, Edward O., assignor to Robert Gair Company, New York, N. Y. Double corner and lock for containers. 1,667,017; Apr. 24.
Tipton, Edward F., assignor of one-fourth to V. P. King, and one-fourth to W. W. Bostwick, San Francisco, Calif. Car-track-groove cleaner. 1,667,402; Apr. 24.
Tipton, William D., Baltimore, Md. Rotary valve. 1,667,228; Apr. 24.
Titgen, Harry W., Philadelphia, Pa. Tuyére wind box. 1,667,571; Apr. 24.
Tockhorn, Hugo, Berlin-Tempelhof, Germany. Addressing device for printing presses for printing of fixed text with changeable address. 1,666,952; Apr. 24.
Tollerud, Guy, Austin, Minn. Automobile oil-heating device. 1,667,614; Apr. 24.
Torrance, Adam F., Kansas City, Mo. Duplex envelope. 1,667,176; Apr. 24.
Toyoda, Kiichiro, Nagoya, Japan. Shuttle-changing apparatus for automatic looms. 1,667,572; Apr. 24.
Treworgy, Harold E., Brunswick, Me. Kindler holder for wicks. 1,667,229; Apr. 24.
Trico Products Corporation. (See McCaleb, Albert G., assignor.)
Trimble, William O., Phalanx Station, assignor of one-third to F. Cappellia and one-third to C. J. Cappellia, Niles, Ohio. Car body and truck gauge. 1,667,684; Apr. 24.
Trout, Harry W., assignor to Cotswold Comfortable Company, Syracuse, N. Y. Cotton-treating apparatus. 1,667,177; Apr. 24.
Trumble, Milon J., Alhambra, Calif. Producing power. 1,667,403; Apr. 24.
Tua, Marius. (See Pedrazzo, E., and Tua.)
Turner, Archibald J., assignor to Wilson-Western Sporting Goods Co., Chicago, Ill. Inflatable ball. 1,667,088; Apr. 24.
Turner, James R., Jersey City, N. J. Fish-smoking apparatus. 1,667,573; Apr. 24.
Turner, James R., Jersey City, N. J. Smoking fish fillets. 1,667,574; Apr. 24.
Tuttle, Julius O. and R. C., Sioux City, Iowa. War game. 1,666,953; Apr. 24.
Tuttle, Roy C. (See Tuttle, Julius O. and R. C.)
Umbriaco, Frank, New York, N. Y. Accordion keyboard. 1,667,089; Apr. 24.
Union Draft Gear Company. (See Cotton, Walter H., assignor.)
Union Special Machine Company. (See Thull, Frank J., assignor.)
Union Switch & Signal Company, The. (See Beall, Charles K., assignor.)
Union Switch & Signal Company, The. (See Spray, Lester E., assignor.)
Union Switch & Signal Company, The. (See Wallace, Herbert A., assignor.)
Union Tool Company. (See Timbs, Edward, assignor.)
United Shoe Machinery Corporation. (See Ballard, Milton H., assignor.)
United Shoe Machinery Corporation. (See Gouldbourn, J., and Goddard, assignors.)
United States Chain & Forging Company. (See Bremer, Frederick G., assignor.)
United States Envelope Company. (See Cather, Charles E., assignor.)
Valentine, Irving R., Erie, Pa., assignor to General Electric Company. Bearing alloy. 1,667,641; Apr. 24.
Valentine, Robert D., assignor, by mesne assignments, to National Pole & Treating Company, Minneapolis, Minn. Pole-puncturing machine. 1,667,063; Apr. 24.
Van Der Vliet, Menno, assignor to International Harvester Company, Chicago, Ill. Tension-adjusting device. 1,667,362; Apr. 24.
Vandevelde, Paul V., Corona, N. Y. Burglar-alarm mounting. 1,667,018; Apr. 24.
Van Dorn, Herbert E., Chicago, Ill. Train-line coupler. 1,667,297; Apr. 24.
Van Dorn, Herbert E., Chicago, Ill. Railway drawbar. 1,667,298; Apr. 24.
Van Ee, Willem, and W. J. Geist, Long Beach, Calif. Tubing roller. 1,667,500; Apr. 24.
Van Huffel, Isadore J., Warren, Ohio. Electrical welding apparatus. 1,667,178; Apr. 24.
Van Husen, Norman. (See Jandus, H. S., and Van Husen.)
Vansickle, Melvin E., assignor, by mesne assignments, to Brandes Laboratories Inc., Newark, N. J. Gearing for instrument dials. 1,667,575; Apr. 24.
Van Valkenburgh, George H., Nashville, Tenn. Filing device. 1,667,576; Apr. 24.
Vanetti, Carlo, Milan, Italy. Prevention of cracking of castings. 1,667,642; Apr. 24.
Varkas, Aris, N., and J. B., and J. Paxon, Boise, Idaho. 1,667,335; Apr. 24.
Varkas, James B. (See Varkas, Aris, N., and J. B., and Paxon.)
Varkas, Nick. (See Varkas, Aris, N., and J. B., and Paxon.)
Vec Products Company. (See Slauson, Stephen A., assignor.)
Venzie, Frederick M., Philadelphia, Pa. Plaster-block composition. 1,667,019; Apr. 24.

Verare Corporation. (See Warhus, Oliver F., assignor.)
Vergeer, Albert W. P., assignor to The T. F. Moore Company, Inc., New York, N. Y. Display device. 1,667,694; Apr. 24.
Versare Corporation. (See Warhus, Oliver F., assignor.)
Vestal, Albert H., et al. (See Malone, Adolph W., assignor.)
Voices Incorporated. (See Aronson, Louis V., assignor.)
Voices Incorporated. (See De Cesare, Matteo, assignor.)
Voices Incorporated. (See Evans, Fred, assignor.)
Voight, George F., Oakland, Calif., assignor to Economy Products Corporation. Furring unit. 1,667,448; Apr. 24.
Vollert, Edwin W. (See Lange, C. H., and Vollert.)
Voltz, Théodore, assignor to Durant & Huquenin S. A., Basel, Switzerland. Chlorinated amines from chlorinated hydroaromatic ketimino compounds and making same. 1,667,336; Apr. 24.
Von Mechel, Lucas. (See Isler, M., and von Mechel.)
Von Webern, Guido, Dayton, Ohio, assignor, by mesne assignments, to Oxford Varnish Corporation, Detroit, Mich. Transferring apparatus and making same. 1,666,920; Apr. 24.
Von Wyslecki, Kurt, Lausanne, Switzerland. Self-induction coil. 1,667,705; Apr. 24.
Vulcan Oil Burner Corporation, The. (See Logan, James W., assignor.)
Waddell, Benson F., New York, N. Y. Diaphragm for a radio loud speaker. Des. 74,993; Apr. 24.
Wagner, Georg, Monsey, N. Y. Cleaning device. 1,667,464; Apr. 24.
Wagner, Maria S., New York, N. Y. Trousers. 1,667,363; Apr. 24.
Wagner, Maria S., New York, N. Y. Undergarment. 1,667,364; Apr. 24.
Walt, Justin F., New York, N. Y. Filter and filtering method. 1,667,465; Apr. 24.
Walbridge, Earl G. (See Germer, E. G., Walbridge, and Wysocki.)
Waldmann, Herbert W., Concord, Wis. Cultivator attachment. 1,667,643; Apr. 24.
Wallace, Herbert A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,667,577; Apr. 24.
Wallace, Hugh, assignor to General Motors Research Corporation, Dayton, Ohio. Fuel-supply device. 1,667,090; Apr. 24.
Walpole, George S. (See Garrard, Charles G., assignor.)
Walsh, Timothy, H. S. Coover, and J. V. Abronski, Philadelphia, Pa. Fluid speed transmitting mechanism. 1,667,274; Apr. 24.
Ward, Arthur C., Oakmont, assignor to The Autocar Company, Ardmore, Pa. Adjustable oil burner. 1,667,365; Apr. 24.
Ward, Wilburt, Forest, Ohio. Stoker and the like. 1,667,230; Apr. 24.
Warhus, Oliver F., Albany, N. Y., assignor, by mesne assignments, to Versare Corporation. Double-truck vehicle. 1,666,921; Apr. 24.
Warhus, Oliver F., Albany, N. Y., assignor to Versare Corporation. Spring suspension for vehicles. 1,667,275; Apr. 24.
Warner, Chester E. (See Benjamin, R. B., and Warner.)
Warner, George B., New York, N. Y. Combined radiator cap and filling tube. Des. 74,994; Apr. 24.
Warner, Sterling W., Boundbrook, N. J., assignor to Pathe Exchange, Inc., New York, N. Y. Film reel. 1,667,501; Apr. 24.
Wayne Company. (See Baker, L. E., and Merriman, assignors.)
Wayne Company. (See De Luiz, E. R., and Mitchell, assignors.)
Weindel, Fred, jr. (See Price, C. S., and Weindel.)
Weingarten, Jacob. (See Weir, A. W., Weingarten, and Switzer.)
Weingarten, Joshua, Philadelphia, Pa. Shoe fastening. 1,667,276; Apr. 24.
Weir, Alexander W., Bronx, J. Weingarten, Brooklyn, and W. G. Switzer, Menands, N. Y. Automatic safety headlight. 1,667,366; Apr. 24.
Weisberg, Louis. (See Downs, C. R., and Weisberg.)
Weiss, George, Chicago, Ill. Paring machine. 1,667,502; Apr. 24.
Wemhoener, William F., St. Louis, Mo. Mail box. 1,667,503; Apr. 24.
Wendel, Otto G., Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill. Pressure-responsive device. 1,667,020; Apr. 24.
Wendelstein, Carl M., North Attleboro, assignor to Bliss Brothers Company, Attleboro, Mass. Vanity case. 1,667,695; Apr. 24.
Wentink, Willem G. F. (See Reufel, H. M. H., de Jong, and Wentink.)
Werner, William R. (See Martin, M., and Werner.)
Wernis, Joseph, Detroit, Mich. Car coupling. 1,666,954; Apr. 24.
Western Electric Company. (See Boynton, Stanley E., assignor.)
Western Electric Company. (See Hofstetter, Robert, assignor.)
Western Gas Construction Company. (See Hayes, Fred B., assignor.)
Western Railway Equipment Company. (See Campbell, Sterling H., assignor.)
Western Wire & Iron Works. (See Martinek, Michael, assignor.)
Westinghouse Electric & Manufacturing Company. (See Kasley, Alexander T., assignor.)
Westmoreland Chemical & Color Company, The. (See Stewart, Henry C., assignor.)
Weston, William S., Columbia, S. C. Gyratory crusher. 1,667,337; Apr. 24.
Wheeler, Robert C., assignor to Superior Engineering Company Limited, Toronto, Ontario, Canada. Fuel-oil-burning apparatus. 1,667,404; Apr. 24.
Whitcomb, Alonzo W., Worcester, Mass. Rotary compressor. 1,667,615; Apr. 24.
Whitehurst, F. W., et al. (See Sherrod, Robert L., assignor.)
Whiting & Davis Company. (See Lynds, Fred H., assignor.)
Whiting & Davis Company. (See Soderstrom, Oscar, assignor.)
Wicks, John, Oak Park, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,667,405; Apr. 24.
Wickwire Spencer Steel Company. (See Johnston, George M., assignor.)
Widmer, Harry A., assignor of one-half to A. Lewis (Finsbury) Limited, London, England. Fastener. 1,667,644; Apr. 24.
Wiggins, Edward J., assignor, by mesne assignments, to Electrical Research Laboratories, Inc., Chicago, Ill. Condenser. 1,666,922; Apr. 24.
Wightman & Hough Company. (See Hough, Herbert D., assignor.)
Wikle, George F., Milwaukee, Wis. Tire-building machine. 1,667,135; Apr. 24.
Wilde, Mifflin H., Martinsburg, W. Va. Pump. 1,667,179; Apr. 24.
Wildhaber, Ernest, Brooklyn, assignor to Gleason Works, Rochester, N. Y. Gear cutter. 1,667,299; Apr. 24.
Wilgus, John F., Casstown, Ohio. Cultivator. 1,667,367; Apr. 24.
Wilkinson, Eltoft W., Queens Village, assignor to Minerals Separation North American Corporation, New York, N. Y. Treatment of fine coal. 1,667,277; Apr. 24.
Wilkinson, John J. and M. A., Owego, N. Y. Chair. 1,667,406; Apr. 24.
Wilkinson, Michael A. (See Wilkinson, John J. and M. A.)
Willard, George H., assignor to Draper Corporation, Hopedale, Mass. Latching mechanism for intermittent thread-cutting temples. 1,667,466; Apr. 24.
Williams, John F. (See Osburn, Robert A., assignor.)
Williamson, Henry M., assignor to Johnson-Williamson Laboratories, Incorporated, Chicago, Ill. Translator of electrical energy. 1,667,021; Apr. 24.
Willis, Orvis C. (See Cox, O., and Willis.)
Willsea, Louis P., Rochester, N. Y. Delivery mechanism. 1,666,984; Apr. 24.
Wilson, William H., Los Angeles, Calif. Fireworks and blank for making the same. 1,667,180; Apr. 24.
Wilmanns, Christopher, Indianapolis, Ind. Smoker's stand. Des. 74,995; Apr. 24.
Wilson, Claud. (See Dennis, D. B., and Wilson.)
Wilson Welder & Metals Company. (See Churchward, Alexander, assignor.)
Wilson-Western Sporting Goods Co. (See Turner, Archibald J., assignor.)
Winters, Stryker & Crampton. (See Crampton, Basil R., assignor.)
Wolcott, Frank E., West Hartford, Conn., assignor to The Frank E. Wolcott Manufacturing Co. Electrical heater. Des. 74,996; Apr. 24.
Wolcott, Frank E., Manufacturing Co., The. (See Wolcott, Frank E., assignor.)
Wolf, Georg, G. m. b. H. (See Loeck, Günther, assignor.)
Wolfe, Arthur W., assignor of one-half to The Diamond Ray Light Company, Chicago, Ill. Projecting apparatus. 1,667,278; Apr. 24.
Wolstenholme, Frederick S., Richmond, Va. Bulletin board. 1,667,091; Apr. 24.
Wömpner, Fritz, Geroldsgrun, near Nuremberg, assignor to the firm A. W. Faber, Stein, near Nuremberg, Germany. Magnifying device for slide rules. 1,667,449; Apr. 24.
Wood, Hugh C., San Francisco, Calif. Drilling machine. 1,667,022; Apr. 24.
Wood, James P., Bastrop, Tex. Attachment for pivot polishers. 1,667,231; Apr. 24.
Wood, James P., Bastrop, Tex. Pivot polisher. 1,667,232; Apr. 24.
Woodings, Emanuel, Oakmont, assignor to Woodings Forge & Tool Company, Verona, Pa. Rail anchor. 1,667,407; Apr. 24.
Woodings Forge & Tool Company. (See Woodings, Emanuel, assignor.)
Woodruff, W. Warren, Swarthmore, Pa. Protective device. 1,666,923; Apr. 24.
Woodstock Typewriter Company. (See Hokanson, Otto A., assignor.)
Wright, Harry J., and G. Shirk, Waynesburg, Pa. Transmission stand. 1,667,616; Apr. 24.
Wyllie, Robert, South Franklin, Mass. Cow-tail holder. 1,667,578; Apr. 24.

Wysocki, John M. (See Germer, E. O., Walbridge, and Wysocki.)
Yagle, Theodore F., Philadelphia, Pa. Motion-picture projector. 1,667,645; Apr. 24.
Yates, Nathaniel, jr., assignor to F. A. Neider Company, Augusta, Ky. Apparatus for forming double-headed nails. 1,667,338; Apr. 24.
Yerkey, Henry, Viola, Ill. Grinding machine. 1,667,064; Apr. 24.
Young, Hugh E., Chicago, Ill., assignor of one-half to E. S. Taylor. Garage. 1,667,467; Apr. 24.
Young, John D., et al. (See Davis, Robert R., assignor.)
Youngstown Steel Door Company, The. (See Barrows, Allan S., assignor.)
Zeiss-Jkon Aktiengesellschaft. (See Goldberg, E., and Nowicki, assignors.)
Zelbergiet, Abraham N., Oakland, Calif. Adjustable mounting for bench tool and the like. 1,667,504; Apr. 24.
Zelt, Elmer J., Fort Wayne, Ind., assignor to General Electric Company. Terminal block for current transformers. 1,667,617; Apr. 24.
Zerbe, Lewis E., Moneta, Calif., and M. T. Archer, Pittsburgh, Pa. Differential-gear mechanism. 1,667,131; Apr. 24.
Zimmerman, Frances C., Cincinnati, Ohio. Glue dissolver and converter. 1,667,339; Apr. 24.
Zimmerman, Harry C., Washington, D. C. Mount for guns. 1,667,132; Apr. 24.
Zimmerman, Victor, Holyoke, Mass. Game. 1,667,450; Apr. 24.
Zingali, Antoinette, New York, N. Y. Square for designing garment patterns. 1,667,646; Apr. 24.
Zitscher, Arthur. (See Laska, A. L., and Zitscher.)
Zweig, Harry A., Chicago, Ill. Electric polisher. 1,667,579; Apr. 24.
Zwiebel, Carl. (See Jones, R. G., and Zwiebel.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 24TH DAY OF APRIL, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accelerator for hardening phenol urea products. H. V. Potter and J. W. Crump. 1,667,675; Apr. 24.
Accordion keyboard. F. Umbriaco. 1,667,089; Apr. 24.
Acetylene generator. E. M. Evieth. 1,667,346; Apr. 24.
Acid manufacture, Phosphoric-. I. Hechenbleikner. 1,667,549; Apr. 24.
Acids of aralkylated unsaturated fatty acids. Preparation of sulphonic. A. Thauss, G. Mauthe, and A. Günther. 1,667,226; Apr. 24.
Acids, Reduction of arsonic. A. Binz and C. Räth. 1,667,238; Apr. 24.
Acoustic device. E. Gerlach. 1,667,149; Apr. 24.
Addressing device for printing presses for printing of fixed text with changeable address. H. Tockhorn. 1,666,952; Apr. 24.
Advertising device. K. O. Leon. 1,667,210; Apr. 24.
Aeroplane amplifier. S. E. Adair and B. Knapp. 1,667,300; Apr. 24.
Agricultural machine, Interchangeable. F. Somogyi. 1,667,568; Apr. 24.
Agriculture. A. J. Mason. 1,667,428; Apr. 24.
Aircraft. C. S. Hall. 1,667,002; Apr. 24.
Airplane stabilizer. C. J. Smith. 1,667,224; Apr. 24.
Alcohol-carboxylic-acid resin and making same, Water-resistant polyhydric. C. R. Downs and L. Weisberg. 1,667,197; Apr. 24.
Alcohol resins, Water-resistant carboxylic acid-polyhydric. C. R. Downs and L. Weisberg. 1,667,198; Apr. 24.
Alkali fusion. V. R. Kokatnur. 1,667,480; Apr. 24.
Alkaline-earth-metal sulphides from alkaline-earth-metal sulphates, Obtaining. T. H. Lichtenberger and K. Flor. 1,667,423; Apr. 24.
Alkyl derivatives of diphenolisatine and making same. A. Blankart. 1,667,239; Apr. 24.
Alloy, Bearing. I. R. Valentine. 1,667,641; Apr. 24.
Ammonia-oxygen mixtures, Catalytic combustion of. I. W. Cederberg. 1,666,958; Apr. 24.
Ammonia synthesis process and catalyst. A. T. Larson. 1,667,322–3; Apr. 24.
Amplifier circuit, Electrical. L. M. Hull. 1,667,710; Apr. 24.
Amusement device. E. A. Christoph. 1,667,101; Apr. 24.
Anæsthetizing apparatus. J. A. Heidbrink. 1,667,113; Apr. 24.
Anchor, Rail. E. Woodings. 1,667,407; Apr. 24.
Annunciator for taximeters. F. Sawyer. 1,667,131; Apr. 24.
Antenna systems, Reducing body-capacity effects on loop-. H. C. Silent. 1,666,947; Apr. 24.
Antenna, Underground. N. Kadel. 1,667,008; Apr. 24.
Antifriction agitator. J. B. Hinshaw. 1,667,551; Apr. 24.
Anvil for bit-dressing hammers. C. H. Bergquist. 1,667,236; Apr. 24.
Arch support. J. Abramowitz. 1,666,924; Apr. 24.
Arch support. E. Sessler. 1,667,359; Apr. 24.
Arch supporter. F. P. McCord. 1,667,328; Apr. 24.
Armature-winding machine. R. G. Jones and C. Zwiebel. 1,667,070; Apr. 24.
Ash tray. B. J. Hoos. 1,667,663; Apr. 24.
Ash tray. S. Kirzner. Des. 74,979; Apr. 24.
Ash tray. J. L. Pinard. Des. 74,998; Apr. 24.
Ash tray, Combination holder and cigarette-extinguishing. H. Evens. 1,667,592; Apr. 24.
Attenuation of materials. M. E. Evans. 1,666,928; Apr. 24.
Automobile jack. E. J. McCarty. 1,666,971; Apr. 24.
Automobile signal. G. A. Friedrich. 1,667,470; Apr. 24.
Automobile signal. L. Martino. 1,667,165; Apr. 24.
Automobile theft lock. E. R. Knight. Re16,945; Apr. 24.
Automobile wheel. A. B. Couture. 1,667,344; Apr. 24.
Automobiles, Locking device for. M. J. Chaplin. 1,667,584; Apr. 24.
Automobiles, Signaling device. A. F. Remter. 1,667,050; Apr. 24.
Azodyestuff derived from 1:8-naphthalene dicarboxylic acid and making the same. M. Isler and L. Von Mechel. 1,667,818; Apr. 24.
Azodyestuffs and making same. H. Fritzsche, E. Krummenacher, H. Gubler, and O. Kaiser. 1,667,312; Apr. 24.
Azodyestuffs and making same. A. L. Laska and A. Zitscher. 1,667,667; Apr. 24.
Bag: *See*—
Clothespin bag.
Bag or case, Hand. G. C. Snell. 1,667,014; Apr. 24.
Bag seal. J. Tamassy. 1,667,609; Apr. 24.
Bags, Making and filling. A. M. Bates. 1,666,886; Apr. 24.
Balance, Automatic. C. Peccaud. 1,667,603; Apr. 24.
Ball: *See*—
Inflatable ball.
Banjo hand rest. J. Laterra and F. Joy. 1,667,324; Apr. 24.
Baskets, Making candy. A., N., and J. B. Varkas, and J. Paxon. 1,667,335; Apr. 24.
Batteries, Terminal for storage. R. A. Szeits. 1,667,704; Apr. 24.
Battery-terminal clip. E. M. Bailey. 1,667,581; Apr. 24.
Bearing for weighing apparatus, Knife-edge. F. Nauss. 1,667,635; Apr. 24.
Bearing, Roller. J. W. Foley. 1,667,348; Apr. 24.
Bearings, Closure for. T. V. Buckwalter. 1,667,507; Apr. 24.
Beater, Rug or carpet. D. P. Ransom. 1,667,605; Apr. 24.
Bed, Mortuary. M. E. Ramsey. 1,667,080; Apr. 24.
Belt attachment. J. H. Monahan. 1,666,975; Apr. 24.
Belt, Feeding or displacing. A. J. Keiser. 1,667,120; Apr. 24.
Belt strap. H. M. Ballou. 1,667,696; Apr. 24.
Belt-tightening-idler mount. W. S. Ireland. 1,667,117; Apr. 24.
Bending machine. T. F. Philippi. 1,666,909; Apr. 24.
Bin gate. R. S. Moore. 1,666,908; Apr. 24.
Binder, Loose-leaf. H. D. Cottrell. 1,667,511; Apr. 24.
Biscuit-handling machine. F. G. Salerno. 1,667,692; Apr. 24.
Bit: *See*—
Drill bit. Drilling bit.
Blade holder. C. E. Strickland. 1,667,061; Apr. 24.
Block: *See*—
Concrete hanger block.
Blowtorch. B. Martin. 1,667,420; Apr. 24.
Board: *See*—
Bulletin board. Shoveling board.
Scrubbing board.
Boat construction, Die-cast. L. Mediavilla. 1,667,561; Apr. 24.
Boiler: *See*—
Locomotive boiler.
Boiler cleaner. A. G. Mattsson. 1,666,905; Apr. 24.
Boiler compound. W. M. Neeley. 1,667,670; Apr. 24.
Boiler-tube cleaner. P. Ruck and M. Schutz. 1,667,169; Apr. 24.
Boilers, Water-feed-control system for. I. E. Smith. 1,667,057; Apr. 24.
Book rest. F. D. Sholin. 1,667,171; Apr. 24.
Bottle-draining device, Milk-. A. J. Lippold. 1,667,075; Apr. 24.
Bottle support, Milk-. C. and C. Franklin. 1,667,032; Apr. 24.
Bottle-washing apparatus. M. J. Kreutzer. 1,667,597; Apr. 24.
Box: *See*—
Film box. Tuyère wind box.
Mail box.
Box. S. Rappaport. 1,666,913; Apr. 24.
Bowl or similar article, Metal. E. T. Beck. Des. 74,960; Apr. 24.
Bowling-alley mat. F. Kselimann. 1,666,938; Apr. 24.
Bracket. R. B. Peters. 1,667,604; Apr. 24.
Brake. R. S. Sanford. 1,667,395; Apr. 24.
Brake-chain slack, Device for taking up. J. McMullen. 1,667,560; Apr. 24.
Brake shoes, Making. A. Y. Dodge. 1,667,375; Apr. 24.
Brush guard. P. H. Robinson. 1,667,082; Apr. 24.
Brush kit. C. A. Oddo. 1,667,044; Apr. 24.
Bucket hanger. F. F. Light. 1,667,211; Apr. 24.
Building units, Method and apparatus for making. C. L. Norton. 1,667,434; Apr. 24.
Bulletin board. F. S. Wolstenholme. 1,667,091; Apr. 24.
Bumper, Automobile. F. G. Bremer. 1,667,528–9; Apr. 24.
Bumper structure. F. G. Bremer. 1,667,530; Apr. 24.
Bumper, Vehicle. H. S. Jandus and N. van Husen. Des. 74,977–8; Apr. 24.
Burglar-alarm mounting. P. V. Vandevelde. 1,667,018; Apr. 24.
Burner: *See*—
Gas burner. Pilot burner.
Oil burner.
Burners, Flow regulator for oil. J. G. Gilmore and A. J. Frame. 1,667,314; Apr. 24.
Bushing remover. E. I. Thompson. 1,667,227; Apr. 24.
Button, Collar. O. J. Bergeron. 1,667,098; Apr. 24.

Cabinet, Dispensing. F. H. Bachelder. 1,667,523; Apr. 24.
Cabinet for dishwashing and similar purposes, Splash-proof. J. J. Kehoe, Jr., W. C. T. Morsch, and E. M. De Sherbinin. 1,667,119; Apr. 24.
Cabinet, Record. F. Nigra. 1,667,216; Apr. 24.
Cabinet, Toilet. O. S. Pearson. 1,667,564; Apr. 24.
Cable clamp. A. O. Austin. 1,666,885; Apr. 24.
Cable-conveyer sprocket. R. L. Smallwood. 1,666,950; Apr. 24.
Cable grip. A. H. Nero. 1,667,636; Apr. 24.
Cable head. J. E. Sharp. 1,666,980; Apr. 24.
Cable terminal, Parkway. W. H. B. Lavarack and D. W. Richards. 1,667,555; Apr. 24.
Cake stand. A. F. Saunders. Des. 74,990; Apr. 24.
Calcium arsenate, Making. W. C. Piver. 1,667,490; Apr. 24.
Calcium arsenate, Making commercial. W. C. Piver. 1,667,491; Apr. 24.
Can-filling machine. O. H. Hansen. 1,666,930–1; Apr. 24.
Can opener. J. T. Sweeney. 1,667,360; Apr. 24.
Candle-holding bracket. A. Paul. Des. 74,986; Apr. 24.
Candy jar. A. S. and W. B. Adams and P. S. Moyer. Des. 74,956; Apr. 24.
Candy wrapper, Stick-. C. R. Luce. Des. 74,982; Apr. 24.
Cap closure, Screw-. J. S. Hardiman. 1,667,003; Apr. 24.
Capsules for filling, Handling. G. L. Brown. 1,667,066; Apr. 24.
Car, Ballast. B. W. Straw. 1,667,085; Apr. 24.
Car body and truck gauge. W. O. Trimble. 1,667,684; Apr. 24.
Car coupler. W. Kelso. 1,667,071; Apr. 24.
Car coupling. J. Wernis. 1,666,954; Apr. 24.
Car underframe. C. F. Frede. 1,666,929; Apr. 24.
Carboxylic acid-polyhydric alcohol resin, Water-resistant. C. R. Downs and L. Weisberg. 1,667,199–200; Apr. 24.
Carburetor systems, Apparatus for regulating mixture formation in. W. E. Ernst. 1,666,892; Apr. 24.
Carburetors, Thermostatic controlling device for. E. N. Sorensen. 1,667,569; Apr. 24.
Carrier: *See*—
Luggage carrier.
Carton. F. W. Teetzel. Des. 74,992; Apr. 24.
Case: *See*—
Cigarette case. Refrigerating case.
Cigarette-holder case. Vanity case.
Casting machine, Metal-. H. C. Poske. 1,666,910; Apr. 24.
Castings, Prevention of cracking of. C. Vanzetti. 1,667,642; Apr. 24.
Cathode and electron tube containing same, Glow. E. Friederich. 1,667,471; Apr. 24.
Cementing wells, Device for. A. Boynton. 1,667,640; Apr. 24.
Centrifugal. C. Schaum. 1,667,493; Apr. 24.
Ceramic products, Manufacturing. L. Kern. 1,666,936; Apr. 24.
Chain, Sprocket. T. J. Hughes. 1,667,259; Apr. 24.
Chair. J. J. and M. A. Wilkinson. 1,667,406; Apr. 24.
Charge-forming device. A. B. Knight. 1,667,074; Apr. 24.
Chlorinated amines from chlorinated hydroaromatic ketimino compounds and making same. T. Voltz. 1,667,336; Apr. 24.
Churns and butterworkers, Gudgeon structure for. L. F. Heitz. 1,667,004; Apr. 24.
Cigarette case. E. B. Hough. 1,666,902; Apr. 24.
Cigarette-holder case. E. E. Brosius. 1,667,065; Apr. 24.
Cigarette-packing machine. M. Bäumi. 1,666,986; Apr. 24.
Circuit closer, Electric. E. M. Kyle and E. F. Hurley. 1,667,037; Apr. 24.
Circuit, Grid-coupled cell. C. F. Jenkins. 1,667,383; Apr. 24.
Circuit, Grid-leak cell. C. F. Jenkins. 1,667,384; Apr. 24.
Circuits, Controlling or tripping apparatus for alternating-current electric. H. W. Clothier and W. A. A. Burgess. 1,667,655; Apr. 24.
Clamp: *See*—
Cable clamp. Cross-arm clamp.
Connection-box clamp. Wire clamp.
Cleaner: *See*—
Boiler cleaner. Eraser cleaner.
Boiler-tube cleaner. Vacuum cleaner.
Cleaning and sizing apparatus. E. O'Toole. 1,667,331; Apr. 24.
Cleaning device. G. Wagner. 1,667,464; Apr. 24.
Cleansing and disinfecting, Apparatus for. A. H. and R. F. Thompson. 1,667,683; Apr. 24.
Clip: *See*—
Battery-terminal clip. Contact clip.
Clock attachment. W. B. Atkinson. 1,667,685; Apr. 24.
Clock, Silent secondary. T. S. Casner. 1,667,308; Apr. 24.
Closet: *See*—
Safety closet.
Closure. D. Stern. 1,667,084; Apr. 24.
Closure for sheet-metal containers. C. T. Draper. 1,667,697; Apr. 24.
Cloth cutter. H. N. James. 1,666,969; Apr. 24.
Clothes brush, Electric. R. Krug. 1,667,554; Apr. 24.
Clothespin bag, Sliding. W. H. Orth. 1,667,389; Apr. 24.
Clutch for three-speed draw works. E. Timbs. 1,667,175; Apr. 24.
Clutch, Friction. E. A. Beyl. 1,666,956; Apr. 24.
Coal, Treatment of fine. E. W. Wilkinson. 1,667,277; Apr. 24.
Cock and pipe holder, Angle-. L. A. Hoerr. 1,667,005; Apr. 24.
Cock holder, Angle-. F. K. Nabenicht. 1,666,896; Apr. 24.
Coil, Self-induction. K. von Wysiecki. 1,667,705; Apr. 24.
Color of liquids by reflected and transmitted light, Apparatus for comparing the. H. A. Ellis. 1,667,249; Apr. 24.
Colorimeter. R. E. Klett. 1,667,478; Apr. 24.
Comb: *See*—
Fountain comb.
Combustible materials, Obtaining valuable products from. A. H. Pehrson. 1,667,217; Apr. 24.
Compressor. B. S. Aikman. 1,667,233; Apr. 24.
Compressor, Rotary. A. W. Whitcomb. 1,667,615; Apr. 24.
Concrete hanger block. H. G. Carlson. 1,667,532–3; Apr. 24.
Condensation product from olefines and hydrocarbons of the naphthalene series and making the same. R. Michel. 1,667,214; Apr. 24.
Condenser. S. H. Smith. 1,667,058; Apr. 24.
Condenser. E. J. Wiggins. 1,666,922; Apr. 24.
Connecter. R. R. Macdonald. 1,667,485; Apr. 24.
Connecter. R. E. Powell. 1,667,702; Apr. 24.
Connection-box clamp. W. Goetzelman. 1,667,688; Apr. 24.
Contact clip, Terminal. J. Sachs. 1,666,978; Apr. 24.
Contact connecter, Liquid. E. H. Gehm. 1,667,660; Apr. 24.
Contact finger. F. E. Case. 1,667,652; Apr. 24.
Contact switch, Mercury-. I. E. Smith. 1,667,056; Apr. 24.
Container. A. E. Mullen. 1,667,215; Apr. 24.
Container and display device. E. A. Lee. 1,667,482; Apr. 24.
Container, Carboy-shipping. O. Z. Brewer. 1,667,029; Apr. 24.
Container, Display. E. W. Fehrenkamp. 1,667,376; Apr. 24.
Container, Metal. A. J. Chamberlain. 1,667,284; Apr. 24.
Container or box. L. A. Lupien. 1,667,354; Apr. 24.
Containers, Double corner and lock for. E. O. Tinsley. 1,667,017; Apr. 24.
Control mechanism, Automatic. K. Tessky. 1,667,062; Apr. 24.
Conveying mechanism. C. Guerltey. 1,667,349; Apr. 24.
Cook stove or range, Combined gas and electric. F. C. Alber. 1,667,521; Apr. 24.
Copperas, Making. H. C. Stewart. 1,667,693; Apr. 24.
Core-making machine. F. Pietrusiak. 1,667,079; Apr. 24.
Corn, Apparatus for facilitating the treatment of. O. H. Hansen. 1,666,932; Apr. 24.
Corn silker. O. H. Hansen. 1,666,933; Apr. 24.
Cotton-cleaning machine. S. H. Assiter. 1,667,505; Apr. 24.
Cotton-treating apparatus. H. W. Trout. 1,667,177; Apr. 24.
Coupler. H. Luft. 1,667,557; Apr. 24.
Coupler, Rod. J. D. Fitzgerald. 1,667,311; Apr. 24.
Coupling: *See*—
Car coupling. Pipe coupling.
Coupling member or link. T. S. Edeburn. 1,667,541; Apr. 24.
Cow-tail holder. R. Wyllie. 1,667,578; Apr. 24.
Crimper. W. S. Lewis. 1,667,556; Apr. 24.
Cross-arm clamp. A. W. Malone. 1,667,558; Apr. 24.
Cultivator. S. K. Dennis. 1,667,374; Apr. 24.
Cultivator. J. F. Wilgus. 1,667,367; Apr. 24.
Cultivator attachment. H. W. Waldmann. 1,667,648; Apr. 24.
Cultivator, Tractor. B. R. Benjamin and C. R. Raney. 1,667,371; Apr. 24.
Curler, Hair. M. Boxer. 1,667,188; Apr. 24.
Current motor. J. R. Meekins. 1,667,634; Apr. 24.
Curtain-pole bracket or similar article. J. O. Crawford. Des. 74,965; Apr. 24.
Curtain-pole end or similar article. J. O. Crawford. Des. 74,962–4; Apr. 24.
Curtain-pole end or similar article. J. O. Crawford. Des. 74,967; Apr. 24.
Curtain support. J. N. Henry. 1,667,520; Apr. 24.
Curtain tassel or similar article. J. O. Crawford. Des. 74,966; Apr. 24.
Cutter: *See*—
Cloth cutter. Gear cutter.
Cutting machine. M. H. Ballard. 1,667,184; Apr. 24.
Cystoscopes, gastroscopes, and the like, Optical tube for. G. Loeck. 1,667,630; Apr. 24.
Dehydrator. H. B. and F. E. Hartman. 1,667,316; Apr. 24.
Delivery mechanism. L. P. Willsea. 1,666,984; Apr. 24.
Demagnetizer. J. A. Llewellyn. 1,667,422; Apr. 24.
Dental floss holder. L. L. Sherwood. 1,667,134; Apr. 24.
Derrick. N. B. Biggs. 1,667,582; Apr. 24.
Desk set and picture frame, Combined. H. A. Kretschmer. Des. 74,980; Apr. 24.
Dinoyl isothiocarbamide ether and producing same. H. Schotte. 1,667,053; Apr. 24.

Discharge valve for ice-machine compressors. E. R. De Luiz and H. L. Mitchell. 1,667,143; Apr. 24.
Display device. A. W. P. Vergeer. 1,667,694; Apr. 24.
Display stand. J. W. Megee. 1,667,669; Apr. 24.
Display stand. R. L. Poulton. Des. 74,987; Apr. 24.
Distribution, System of. O. Pollok. 1,667,674; Apr. 24.
Doll and radio set, Combination. C. B. Sherlock. 1,666,946; Apr. 24.
Door, Electrically-operated. H. Rowntree. 1,666,916; Apr. 24.
Door lock, Sliding-. M. Martinek. 1,667,600; Apr. 24.
Door, Metallic car. A. S. Barrows. 1,667,341; Apr. 24.
Drag, Adjustable road. A. T. Bass. 1,667,301; Apr. 24.
Dredging apparatus. J. Ream. 1,667,219; Apr. 24.
Dressing. E. J. Schelling. 1,667,222; Apr. 24.
Drill. H. Mecom. 1,667,077; Apr. 24.
Drill bit. C. H. Hanson. 1,666,898; Apr. 24.
Drilling bit. Z. B. Higdon. 1,667,155; Apr. 24.
Drilling machine. H. C. Wood. 1,667,022; Apr. 24.
Drills, Detachable handle for. F. H. Blanding. 1,667,280; Apr. 24.
Drills, Handle attachment for. S. Seaver. 1,667,271; Apr. 24.
Dry cell. G. W. Heise and H. H. Thompson. 1,667,317; Apr. 24.
Drying hay, grain, and the like, Process and apparatus for. A. W. Koon. 1,667,666; Apr. 24.
Dyestuff and making same, Vat. J. G. Dinwiddie. Re-16,939; Apr. 24.
Dyestuffs and making same. F. Straub and H. Schneider. 1,667,338; Apr. 24.
Dyeing artificial silk. J. Baddiley, P. Chorley, and C. Butler. 1,667,524; Apr. 24.
Dyes derived from dehydro-thio-p-toluidine-sulphonic acid and resorcinol and making same, Trisazo. B. Mayer and J. Grimmer. 1,667,327; Apr. 24.
Dynamite explosive, Gelatin-. R. B. Smith and E. M. Symmes. 1,667,083; Apr. 24.
Ejecting holder. G. S. Keck. 1,667,118; Apr. 24.
Electric conductor. J. R. Coe. 1,667,510; Apr. 24.
Electric converting apparatus. J. E. Calverley and W. E. Highfield. 1,667,242; Apr. 24.
Electric heater. W. W. Hicks and A. J. Kercher. 1,667,257; Apr. 24.
Electric motor. E. F. W. Alexanderson. 1,667,647; Apr. 24.
Electric rolling-mill drive with Leonard control. E. Riecke. 1,667,678; Apr. 24.
Electric switch. J. J. Egan. 1,667,247; Apr. 24.
Electric switch. C. E. Ives. 1,667,158; Apr. 24.
Electric switch. J. R. Marshall. 1,667,293; Apr. 24.
Electrical-apparatus casings, Pressure-relief pipe for. L. H. Burnham. 1,667,621; Apr. 24.
Electrical connecter. S. Cohen. 1,666,991; Apr. 24.
Electrical energy, Translator of. H. M. Williamson. 1,667,021; Apr. 24.
Electrical heater. F. E. Wolcott. Des. 74,996; Apr. 24.
Electromagnet. C. L. Jauss. 1,666,970; Apr. 24.
Elevator: *See*—
Fluid elevator. Portable elevator.
Elevator. J. Darby. 1,667,069; Apr. 24.
Elevator. J. Darby and C. W. Old. 1,667,068; Apr. 24.
Enamel for coating cans. R. H. Lueck. 1,667,212; Apr. 24.
Engine: *See*—
Internal-combustion engine.
Engines, Cooling system for internal-combustion. J. A. Kinnard. 1,667,207; Apr. 24.
Engines, Temperature-regulating means for liquid cooled. W. H. Driscoll. 1,667,458; Apr. 24.
Engraving machine, Mold-. A. P. Jahant. 1,667,036; Apr. 24.
Envelope. W. H. Hollar, jr. 1,667,258; Apr. 24.
Envelope, Duplex. C. E. Cather. 1,666,957; Apr. 24.
Envelope, Duplex. A. F. Torrance. 1,667,176; Apr. 24.
Envelope opener. L. W. Ender. 1,667,659; Apr. 24.
Eraser cleaner. F. B. Meyers and H. W. Darney. 1,667,431; Apr. 24.
Excavating machine. O. Hetlesater. 1,667,381; Apr. 24.
Exchange of heat, Apparatus for. V. Mauck. 1,667,430; Apr. 24.
Exhaust-tube remover. L. A. Maurer. 1,667,601; Apr. 24.
Extension table. J. Bellocchio. 1,667,411; Apr. 24.
Fabrics, Method and apparatus for coating. R. S. Allen. 1,667,408; Apr. 24.
Fans, Variable-speed drive for exhaust. F. G. Sargent. 1,666,917; Apr. 24.
Farm gate. H. W. Thompson. 1,667,334; Apr. 24.
Fastener. H. A. Widmer. 1,667,644; Apr. 24.
Fastener, Paper-marker. M. Budny. 1,667,241; Apr. 24.
Fasteners and tabs therefor, Method and apparatus for manipulating. V. H. Bodle. 1,667,527; Apr. 24.
Fastening and riveting apparatus, Belt. S. D. Myers. 1,667,294; Apr. 24.
Fastening device for fencing, etc. B. K. Rose. 1,667,463; Apr. 24.
Fastening, Shoe. J. Weingarten. 1,667,276; Apr. 24.
Faucet. W. F. Albrecht. 1,667,580; Apr. 24.
Feathering paddle wheel. E. J. Clark. 1,667,140; Apr. 24.
Fence post. H. Lindensmith. 1,667,424; Apr. 24.
Filing device. G. H. Van Valkenburgh. 1,667,576; Apr. 24.
Film bobbins, Preventing premature uncoiling of. G. L. Chanler. 1,667,536; Apr. 24.
Film box. E. Goldberg and M. Nowicki. 1,667,110; Apr. 24.
Film-developing machine. F. E. Garbutt and L. M. Griffith. 1,666,999; Apr. 24.
Film hanger, Photographic-. H. Gollomb. 1,666,895; Apr. 24.
Film reel. S. W. Warner. 1,667,501; Apr. 24.
Filter and filtering method. J. F. Walt. 1,667,465; Apr. 24.
Firearm-holding and trigger-actuating device. A. P. Stark. 1,667,060; Apr. 24.
Firearms, Barrel-cooling device for. J. M. Browning. 1,666,887; Apr. 24.
Fireplaces with highly-inflammable loose fuel, Apparatus for charging. E. Simon. 1,667,703; Apr. 24.
Fireworks and blank for making the same. W. H. Willson. 1,667,180; Apr. 24.
Fish fillets, Smoking. J. R. Turner. 1,667,574; Apr. 24.
Fish flake. G. M. Johnston. 1,667,553; Apr. 24.
Fish-smoking apparatus. J. R. Turner. 1,667,573; Apr. 24.
Floor-laying device. P. Galassi. 1,667,313; Apr. 24.
Flooring, Apparatus for manufacturing matched. C. R. McLaughlin. 1,667,668; Apr. 24.
Flue cleaning, cutting, and handling machine. J. T. McGrath. 1,667,388; Apr. 24.
Fluid elevator. D. B. Dennis and C. Wilson. 1,666,962; Apr. 24.
Flume construction. R. E. Barnard. 1,667,234; Apr. 24.
Folding mechanism, Sheet-. E. M. Barber. 1,667,369–70; Apr. 24.
Fountain comb. F. C. Mach. 1,667,631; Apr. 24.
Frame: *See*—
Window frame.
Frequency changer. S. P. Nixdorff. 1,667,672; Apr. 24.
Fuel briquette and making same. J. S. Robeson. 1,667,358; Apr. 24.
Fuel briquettes, Manufacture of. E. W. Bowen. 1,667,804; Apr. 24.
Fuel-oil-burning apparatus. R. C. Wheeler. 1,667,404; Apr. 24.
Fuel-supply device. H. Wallace. 1,667,090; Apr. 24.
Furnace: *See*—
Gas floor furnace.
Furnace. O. H. Gray and C. E. Murdock. 1,667,001; Apr. 24.
Furring unit. G. F. Voight. 1,667,448; Apr. 24.
Fusible switch. J. Sachs. 1,666,979; Apr. 24.
Game. S. T. Farrell. 1,667,147; Apr. 24.
Game. C. H. Lange and E. W. Vollert. 1,667,481; Apr. 24.
Game, V. Zimmerman. 1,667,450; Apr. 24.

Looms, Cutting mechanism for automatic. D. Lemieux. 1,667,261; Apr. 24.
Looms, Let-off for. K. Sakamoto. 1,667,221; Apr. 24.
Looms, Selvage-relieving mechanism for. E. A. Cunniff. 1,666,960; Apr. 24.
Looms, Shuttle-changing apparatus for automatic. K. Toyoda. 1,667,572; Apr. 24.
Lubricant from motor-vehicle lubricant-containing cases, Apparatus for forcing. H. D. Collier. 1,66,992; Apr. 24.
Lubricating compound. R. P. Judd. Re16,943; Apr. 24.
Lubricator. O. E. Clark. 1,666,959; Apr. 24.
Luggage carrier, Pivoted. F. J. Laher. 1,667,208; Apr. 24.
Machine for cleaning hair and other filamentary material. C. H. Donner. 1,666,891; Apr. 24.
Machine for cutting fish. A. R. Rogers. 1,667,437; Apr. 24.
Machine for cutting openings for fasteners in metal sheets to be used as forms for making concrete fence posts. J. Darling. 1,667,196; Apr. 24.
Machine for filling molds. E. O. Beardsley and W. F. Piper. 1,667,097; Apr. 24.
Machine for loading and unloading ships. B. N. Davis. 1,666,995; Apr. 24.
Machine for making elastic paper. W. A. Lorenz. 1,667,292; Apr. 24.
Machine for manufacturing paper cups. P. R. Simmons. 1,667,498; Apr. 24.
Machine for producing irregular surfaces. B. Heymann. 1,667,153; Apr. 24.
Machine for sterilizing cottonseed. W. J. Stahmann. 1,667,608; Apr. 24.
Magnet device, Adjustable. H. B. Rex. 1,667,638; Apr. 24.
Mail bags, luggage, and similar objects from aerial crafts to the ground, Apparatus for safely sending. M. Künzer. 1,667,421; Apr. 24.
Mail box. W. F. Wemhoener. 1,667,503; Apr. 24.
Mail box and signpost, Combined. R. B. Smith. 1,667,639; Apr. 24.
Manicuring implement. C. Thelander. 1,667,570; Apr. 24.
Marker and shoulder cleaner, Ballast towline. W. C. Holcomb. 1,667,450; Apr. 24.
Marking system. G. H. Cross. 1,666,904; Apr. 24.
Mast-erecting apparatus. A. T. Scannell. 1,667,440; Apr. 24.
Mat: *See*—
Bowling-alley mat.
Material-working apparatus. S. E. Boynton. 1,667,028; Apr. 24.

Measuring and dispensing apparatus, Liquid. L. E. Baker and C. L. Merriman. 1,667,137; Apr. 24.
Measuring apparatus, Foot-. C. H. Brown. 1,667,100; Apr. 24.
Measuring distance, Method and apparatus for. H. G. Dorsey. 1,667,540; Apr. 24.
Measuring instrument, Electrical. A. J. Corson and S. C. Hoare. 1,667,624; Apr. 24.
Mechanism for producing cam-like or similar irregular motions. C. G. Garrard. 1,666,893; Apr. 24.
Merry-go-round. R. F. Lamar. 1,667,103; Apr. 24.
Mesh machine. F. H. Lynds. 1,666,940; Apr. 24.
Mesh machine. O. Soderstrom. 1,666,951; Apr. 24.
Metal articles, Increasing the elasticity of. G. L. Kelley. 1,667,476; Apr. 24.
Metal-drawing apparatus. D. C. Kinnear. 1,667,387; Apr. 24.
Metal wall and making same, Flexible. F. K. Bezzenberger. 1,667,303; Apr. 24.
Meter: *See*—
Liquid meter. Torsion meter.
Meter and the like, Flow. L. W. Thompson. 1,667,612; Apr. 24.
Meters, Antitheft attachment for. W. A. Dilzell. 1,667,656; Apr. 24.
Micrometer. F. Neubauer. 1,667,562; Apr. 24.
Milk distributor and bottle collector. R. D. Godsey and M. P. Litton. 1,667,000; Apr. 24.
Mills, Roll for sugar-cane and like. W. Mackie. 1,667,632; Apr. 24.
Mining machine. C. F. Osgood. 1,667,167; Apr. 24.
Mirror, Illuminating. W. B. Goddard. 1,667,545; Apr. 24.
Moistening device. F. Chesley. 1,667,067; Apr. 24.
Mold: *See*—
Ingot mold.
Mold-aligning means. T. Midgley. 1,667,129; Apr. 24.
Mold-engraving machine. A. J. Fleiter and T. A. Miller. 1,667,687; Apr. 24.
Molding machine. E. G. Germer, E. G. Walbridge, and J. M. Wysocki. 1,666,963; Apr. 24.
Molding machine. C. H. Peirson and W. A. Bohne. 1,667,673; Apr. 24.
Molding machine. S. B. Stine. 1,667,296; Apr. 24.
Motion according to one law into motion according to another law, Apparatus for the conversion of. W. Stroud. 1,667,640; Apr. 24.
Motor: *See*—
Current motor. Synchronous motor.
Electric motor. Wave motor.
Internal-combustion motor. Windshield-cleaner motor.
Motor. E. G. Gartin. 1,667,699; Apr. 24.
Motor for single or polyphase alternating current, Compensated induction. F. Kade. 1,667,664; Apr. 24.
Motor power take-off. G. E. and O. E. Miller. 1,666,972; Apr. 24.
Motors, Temperature-indicating apparatus for vehicle propelling. H. H. Boyce. 1,667,027; Apr. 24.
Mowing machines, Guard finger for. E. S. Fisher and E. R. Mendrop. 1,667,627; Apr. 24.
Nails, Apparatus for forming double-headed. N. Yates, jr. 1,667,338; Apr. 24.
Net fabrics in net-making machines, Apparatus for arranging edges of. S. Kakuda. 1,667,461; Apr. 24.
Nozzle support, Portable fire-. J. B. Blaw. 1,667,342; Apr. 24.
Nut lock. G. W. Bowman. 1,667,805; Apr. 24.
Ocean stage. O. Hermanson. 1,667,255; Apr. 24.
Oil burner, Adjustable. A. C. Ward. 1,667,365; Apr. 24.
Oil burner, Fuel-. C. A. Kilgus, C. A. Burton, and G. O. Bergmoser. 1,667,122; Apr. 24.
Oil-burning apparatus. J. W. Logan. 1,667,042; Apr. 24.
Oil-mining method and apparatus. L. Ranney. 1,667,269; Apr. 24.
Oiling means, Worm-. A. B. Clisson. 1,667,285; Apr. 24.
Oils, Fractionating. C. M. Alexander. 1,667,340; Apr. 24.
Order blank. W. L. Caldwell. 1,667,622; Apr. 24.
Organic arsenic compounds, Preparation of. A. Binz and C. Räth. 1,667,237; Apr. 24.
Oscillating signal. R. R. Thompson. 1,667,174; Apr. 24.
Outlet-box hanger. C. E. Bowers. 1,667,025; Apr. 24.
Oxidizing mineral hydrocarbons. J. H. James. 1,667,419; Apr. 24.
Packing device. F. P. Allen. 1,667,279; Apr. 24.
Padlock. H. Hedrich. 1,667,254; Apr. 24.
Paint brushes, Hammer attachment for. W. A. Brady. 1,667,651; Apr. 24.
Pan-lid holder. B. Papp. 1,667,266; Apr. 24.
Paper machines, Recording device for. C. J. Guenther. 1,667,516; Apr. 24.
Paper, Proofed. J. Reid. 1,667,691; Apr. 24.
Paring machine. G. Weiss. 1,667,502; Apr. 24.
Partition structure. R. F. Carpenter and T. F. Anderson. 1,667,534; Apr. 24.
Pedestal way liner, Adjustable. D. S. Barrows. 1,667,453; Apr. 24.
Peeler, Fruit. H. Kapota. 1,667,596; Apr. 24.
Pelt or hide stretcher. J. J. Smith. 1,667,295; Apr. 24.
Perambulator. D. F. Larkin. 1,667,041; Apr. 24.
Pharmaceutical product. W. Schoeller, A. Feldt, M. Gehrke, and E. Borgwardt. 1,667,052; Apr. 24.
Phase shifter. L. Shapiro. 1,667,497; Apr. 24.
Photographic silver halid emulsions, Manufacturing. W. Dieterle, O. Matthies, and J. Reitstötter. 1,667,589; Apr. 24.
Picture projector, Motion-. T. F. Yagle. 1,667,645; Apr. 24.
Pictures, Producing color. W. V. D. Kelley. 1,667,477; Apr. 24.
Pilot burner. S. A. Eskilson and C. A. B. Holm. 1,666,997; Apr. 24.
Pin: *See*—
Wear-compensating pin. Wrist pin.
Pipe: *See*—
Smoking pipe.
Pipe coupling, Automatic train-. A. C. Harrell. 1,667,033; Apr. 24.
Pipe support. G. Liniger. 1,667,124; Apr. 24.
Piston. C. C. Hanch. 1,667,548; Apr. 24.
Piston and piston-ring construction. R. G. Hill. 1,666,966; Apr. 24.
Piston and rod packing. J. L. Ahern and L. G. Ledger. 1,667,092; Apr. 24.
Pistons, Manufacturing. H. Ford. 1,667,202; Apr. 24.
Plaster bases, Support for. A. J. Luedke. 1,667,701; Apr. 24.
Plaster-block composition. F. M. Venzie. 1,667,019; Apr. 24.
Plate bond, Fish-. G. Barnes. 1,667,452; Apr. 24.
Plating apparatus. F. P. Green. 1,667,515; Apr. 24.
Plow, Sulky. H. J. Cleary. 1,667,192; Apr. 24.
Plows, Tripping device for power-lift. W. L. Paul. 1,667,130; Apr. 24.
Plug, Steaming-tube. W. G. Shelton. 1,667,896; Apr. 24.
Polished-rod rotator. A. Boynton. 1,667,240; Apr. 24.
Polisher, Electric. H. A. Zweig. 1,667,579; Apr. 24.
Polisher, Pivot. J. P. Wood. 1,667,232; Apr. 24.
Polishers, Attachment for pivot. J. P. Wood. 1,667,231; Apr. 24.
Polishing wheel. D. F. McGovern. 1,667,076; Apr. 24.
Portable elevator. H. Green. 1,667,547; Apr. 24.
Post: *See*—
Fence post.
Powder puff. E. Danielson. Des. 74,968; Apr. 24.
Power installation, Marine. A. T. Kasley. 1,667,475; Apr. 24.
Power-operated wringer. W. K. Howe. 1,667,472; Apr. 24.
Power, Producing. M. J. Trumble. 1,667,403; Apr. 24.
Power system. C. Macmillan. 1,667,633; Apr. 24.
Power-transmission mechanism, Variable. E. C. Gayer. 1,667,290; Apr. 24.
Press: *See*—
Trimming press.
Press. R. T. Anderson. 1,667,648; Apr. 24.
Press-stopping mechanism, Automatic die-. C. B. McDonald. 1,666,942; Apr. 24.
Pressing machines, Neckband clamp for shirt-. A. B. Clisson. 1,667,286; Apr. 24.
Pressure-responsive device. O. G. Wendel. 1,667,020; Apr. 24.
Printing machine. E. Pedrazzo and M. Tua. 1,667,390; Apr. 24.
Projecting apparatus. A. W. Wolfe. 1,667,278; Apr. 24.
Propeller. J. S. Bankrat. 1,667,506; Apr. 24.
Protective arrangement. H. S. Holbrook. 1,667,662; Apr. 24.
Protective device. W. W. Woodruff. 1,666,923; Apr. 24.
Protractor, Marine. S. A. Chapin. 1,667,191; Apr. 24.
Pump. M. H. Wilde. 1,667,179; Apr. 24.
Pump and compressor, Rotary. R. J. P. E. Cozette. 1,667,456; Apr. 24.
Pump, Automobile tire air. W. H. Rice. 1,667,051; Apr. 24.
Pump, Oil-well. W. D. Ogletree. 1,667,433; Apr. 24.
Pump, Rotary. F. Arnold and W. Randolph. 1,667,183; Apr. 24.
Puncturing machine, Pole-. R. D. Valentine. 1,667,063; Apr. 24.
Purifier and aspirator for middlings. G. W. T. Seifert. 1,667,054; Apr. 24.
Pyrometers, Device for holding. F. H. Norton. 1,667,355; Apr. 24.
Radiator cap and filling tube, Combined. G. B. Warner. Des. 74,994; Apr. 24.
Radiator caps and the like, Indicating instrument for automobile. H. H. Boyce. 1,667,026; Apr. 24.
Radiator overflow. L. B. Mettler. 1,667,128; Apr. 24.
Radiator, Sheet-metal. C. H. Pickering and J. Campbell. 1,667,357; Apr. 24.
Radiocabinet. N. S. Dunbar. Des. 74,969–71; Apr. 24.
Radio loud speaker, Diaphragm for a. B. F. Waddell. Des. 74,993; Apr. 24.
Radio receiving apparatus. C. J. Fitch. 1,667,513; Apr. 24.
Railway-crossing gate, Automatic. T. N. Coffelder. 1,667,537; Apr. 24.
Railway drawbar. H. E. Van Dorn. 1,667,298; Apr. 24.
Railway gate. R. Strickler and J. H. McJannett. 1,666,982; Apr. 24.
Railway signaling. L. E. Spray. 1,667,059; Apr. 24.
Railway signaling device. H. Schiering and A. Reinhardt. 1,667,709; Apr. 24.
Railway-switch-selector-operating means. W. K. Howe. 1,667,473–4; Apr. 24.

Railway-track-inspection apparatus. H. Dreyer. 1,667,246; Apr. 24.
Range finder. W. A. Mouton. 1,667,943; Apr. 24.
Receptacle, Dispensing. R. A. Bernhard. 1,667,302; Apr. 24.
Reel: *See*—
Film reel.
Refrigerating apparatus. L. Helmer. 1,667,350; Apr. 24.

Tent and swing frame, Combined. H. E. Delvin. 1,666,961; Apr. 24.

Testing machine. W. J. Kent. 1,667,429; Apr. 24.
Testing method and apparatus. F. W. Stockmeyer. 1,667,401; Apr. 24.
Theft signal switch. J. P. Bradley and O. A. Prough. 1,667,650; Apr. 24.
Thermocouple. W. A. Darrah. 1,667,142; Apr. 24.
Thermometer and sterilizing case, Clinical. L. Eisele. 1,667,248; Apr. 24.
Thermostat. R. F. Massa. Re16,940; Apr. 24.
Thrashers, Conveying and feeding mechanism for harvester. C. R. Raney and A. E. W. Johnson. 1,667,391; Apr. 24.
Tie press and rack, Combination. H. B. Minnick. 1,667,264; Apr. 24.
Tie rod. J. B. Hawley, jr. 1,667,252; Apr. 24.
Tie rod for concrete forms. J. B. Hawley, jr. 1,667,253; Apr. 24.
Ties, Device for supporting. J. Roura. 1,667,679; Apr. 24.
Time-controlled apparatus. C. M. Peacock. 1,667,356; Apr. 24.
Time switch. R. D. Mailey. 1,666,904; Apr. 24.
Tire-building apparatus. G. L. Mather. 1,667,263; Apr. 24.
Tire-building machine. G. F. Wilkie. 1,667,135; Apr. 24.
Tire casings, Vulcanization of. G. J. Mead. 1,667,127; Apr. 24.
Tire expander, Metal-wheel-. C. B. Chandler. 1,667,509; Apr. 24.
Tire for vehicles, Section. W. E. Celestin. 1,667,535; Apr. 24.
Tire remover. S. L. Levitt. 1,667,351; Apr. 24.
Toaster, Electric. G. Eaton. Des. 74,972; Apr. 24.
Tobacco and the like, Device for curing. G. O. Cruikshank. 1,667,512; Apr. 24.
Tongs, Fuse. L. L. Stahler. 1,667,332; Apr. 24.
Tool and making same. T. F. Githens. 1,667,417; Apr. 24.
Tool and the like, Adjustable mounting for bench. A. N. Zelbergiet. 1,667,504; Apr. 24.
Tool, Combination. G. A. Logan. 1,667,462; Apr. 24.
Tool, Combination. C. H. Rutter. 1,666,977; Apr. 24.
Tool, Dressing. J. S. Donaldson. 1,666,890; Apr. 24.
Tool, Drilling. M. P. Holmes. 1,667,156; Apr. 24.
Tool for planing valve seats. T. S. Purnis. 1,667,218; Apr. 24.
Tool, Jar-handling. C. E. Bonge. 1,667,620; Apr. 24.
Tool of the explosive-motor type, Impact for percussion. C. S. Somervell. 1,666,981; Apr. 24.
Tool, Punching and cutting. A. G. L. Pieper. 1,667,012; Apr. 24.
Tool, Reaming. R. R. Davis. 1,666,926; Apr. 24.
Tool, Valve-grinding. D. T. Igou. 1,667,552; Apr. 24.
Torsion meter, Direct-reading. H. Föttinger. 1,667,628; Apr. 24.
Toy. K. Koller. 1,667,123; Apr. 24.
Toy. B. E. Lloyd. 1,667,353; Apr. 24.
Toy animal figures, Sounding device for. C. Majewicz. 1,667,125; Apr. 24.
Toy construction set. W. Herrschaft. 1,667,256; Apr. 24.
Toy, Game. J. F. Strombeck. 1,667,086; Apr. 24.
Toy mechanism, Talking. L. V. Aronson. 1,667,093; Apr. 24.
Toy mechanism, Talking. F. Evans. 1,667,106–8; Apr. 24.
Toy novelty. J. Romano. 1,667,606; Apr. 24.
Toy piano and operating same. G. M. Patten. 1,667,078; Apr. 24.
Tractors, Control mechanism for. J. E. Anthony. 1,667,361; Apr. 24.
Traffic-controlling apparatus, Railway-. H. A. Wallace. 1,667,577; Apr. 24.
Trailer lock. F. M. Reid. Re16,942; Apr. 24.
Train-line coupler. H. E. Van Dorn. 1,667,297; Apr. 24.
Train-stopping apparatus, Automatic. D. M. Daley. 1,667,457; Apr. 24.
Transfer media. W. F. Grupe. 1,667,689; Apr. 24.
Transferring apparatus and making same. G. Von Webern. 1,666,920; Apr. 24.
Transformer. J. Desloge. 1,666,889; Apr. 24.
Transformer, Thermoelectric. J. H. Steurer. 1,666,919; Apr. 24.
Transformers, Terminal block for current. E. J. Zelt. 1,667,617; Apr. 24.
Transmission and transformation, System of electrical. P. H. Thomas. 1,667,087; Apr. 24.
Transmission clutch. E. W. Jackson. 1,667,260; Apr. 24.
Transmission stand. H. J. Wright and O. Shirk. 1,667,616; Apr. 24.
Transmission, Variable-speed. F. L. Orr. 1,667,166; Apr. 24.
Trap: *See*—
Refrigerator drain trap.
Trap. W. E. Rawlings. 1,667,048; Apr. 24.
Traps, Drowning ring for animal. G. C. Rupert. 1,667,566; Apr. 24.
Treatment of organisms with electrical currents, Apparatus for the. W. T. Arnberg. 1,667,451; Apr. 24.
Tricalcium saccharate, Obtaining. C. Steffen, jr. 1,667,446; Apr. 24.
Trimming machine, Lining-. J. Gouldbourn and J. W. Goddard. 1,666,964; Apr. 24.
Trimming press. E. C. Clarke. 1,667,654; Apr. 24.
Trousers. M. S. Wagner. 1,667,363; Apr. 24.
Truck. F. R. Nies. 1,667,671; Apr. 24.
Truck-body mounting. C. B. Hughes. 1,667,204; Apr. 24.
Truck loader. E. W. Sullivan. 1,666,983; Apr. 24.
Truck, Removable-body. W. M. Baxter. 1,667,023; Apr. 24.
Truck vehicle, Double-. O. F. Warhus. 1,666,921; Apr. 24.
Trunking system. W. G. Blauvelt. 1,666,988; Apr. 24.
Truss rod. J. D. Langdon. 1,667,209; Apr. 24.
Tube: *See*—
Insulating tube.
Tubing roller. W. van Ee and W. J. Geist. 1,667,500; Apr. 24.
Tuyère wind box. H. W. Titgen. 1,667,571; Apr. 24.
Tweezers. S. Segal. 1,667,170; Apr. 24.
Typewriters, Back-spacing mechanism for. O. A. Hokanson. 1,667,007; Apr. 24.
Typographical composing machines, Escapement-actuating mechanism of. C. Muhleisen. 1,666,944; Apr. 24.
Undergarment. M. S. Wagner. 1,667,364; Apr. 24.
Underreamer, Rotary. S. L. Campbell. 1,667,190; Apr. 24.
Union garment. J. Rifkin. 1,667,220; Apr. 24.
Universal joint. E. G. Burns. 1,667,455; Apr. 24.
Vacuum cleaner. D. U. Remaley. 1,666,915; Apr. 24.
Valve. J. P. Crowley. 1,667,141; Apr. 24.
Valve. L. W. Eggleston. 1,667,698; Apr. 24.
Valve. E. C. Harris. 1,667,203; Apr. 24.
Valve and thief hatch, Combination pressure-vacuum. H. H. Howell. 1,666,935; Apr. 24.
Valve for fire-extinguisher pumps, Relief. P. G. MacGregor. 1,667,262; Apr. 24.
Valve mechanism. F. S. Barks. 1,667,138; Apr. 24.
Valve, Relief. E. F. Donnelly. 1,667,590; Apr. 24.
Valve, Rotary. W. D. Tipton. 1,667,228; Apr. 24.
Valve, Safety. G. Bashcongi. 1,667,525; Apr. 24.
Valve, Safety. C. F. Heywood. 1,667,154; Apr. 24.
Valve-stem attachment. F. H. Gibbons. 1,667,594; Apr. 24.
Vanity case. H. D. Hough. 1,666,901; Apr. 24.
Vanity case. S. Morrison. 1,667,486; Apr. 24.
Vanity case. C. M. Wendelstein. 1,667,695; Apr. 24.
Vapor burner, Hydrocarbon-. F. C. Tilley. 1,667,613; Apr. 24.
Vehicle wheel. W. N. Booth. 1,667,024; Apr. 24.
Vehicles, Braking. C. L. Stokes. 1,667,016; Apr. 24.
Vehicles, Hydraulic power-transmitting apparatus for motor. C. R. Radcliffe. 1,667,565; Apr. 24.
Vehicles, Signaling device for. R. Cizek. 1,667,653; Apr. 24.
Vehicles, Spring suspension for. H. W. Hyde. 1,667,115–16; Apr. 24.
Vehicles, Spring suspension for. O. F. Warhus. 1,667,275; Apr. 24.
Vending machine. R. S. Arthur. 1,666,884; Apr. 24.
Ventilating apparatus for toilet bowls. E. E. Neal. 1,667,265; Apr. 24.
Vest. F. A. Bieberstein. 1,667,526; Apr. 24.
Veterinary implement. P. F. Lauwagie and J. P. Konings. 1,667,325; Apr. 24.
Voice mechanism. F. Evans. 1,667,105; Apr. 24.
Vulcanizing apparatus, Repair. M. E. Faber. 1,666,998; Apr. 24.
Wall, ceiling, and floor structure, Translucent. P. Liese. 1,667,484; Apr. 24.
Wall construction. E. H. Kleinfeldt. 1,667,160; Apr. 24.
Wall register rack, Side-. J. M. Breitenbach. 1,667,099; Apr. 24.
Washing-machine, Agitator for. H. J. Criner. 1,667,195; Apr. 24.
Water-closet support. R. T. Frye. 1,667,593; Apr. 24.
Waterproof cattle card. W. M. Frye. 1,667,544; Apr. 24.
Wave motor. M. Hegge. 1,667,152; Apr. 24.
Wear-compensating pin. J. W. Tewsley. 1,667,610; Apr. 24.
Weatherproof and decayproof material. D. Finley. 1,667,201; Apr. 24.
Weather strip. W. J. Dennis. 1,667,144; Apr. 24.
Weeding machine. J. A. Ruzalski. 1,667,708; Apr. 24.
Welding apparatus, Electric. A. Churchward. 1,667,244; Apr. 24.
Welding apparatus, Electrical. I. J. Van Huffel. 1,667,178; Apr. 24.
Welding, Apparatus for fusion. V. J. Chapman. 1,667,586; Apr. 24.
Welding, Automatic arc. V. J. Chapman. 1,667,585; Apr. 24.
Welding, Butt. T. E. Murray, jr. 1,667,487; Apr. 24.
Welding machine. V. J. Chapman. 1,667,587; Apr. 24.
Wheel: *See*—
Automobile wheel. Polishing wheel.
Feathering paddle wheel. Vehicle wheel.
Wheel-rim locking and contracting appliance. A. Cameron. 1,667,243; Apr. 24.
Wheels, Antiskid device for automobile. W. Benien and J. I. Flaherty. 1,667,686; Apr. 24.
Wheels, Elastic element for resilient. J. F. P. Coste. 1,667,373; Apr. 24.
Wicks, Kindler holder for. H. E. Treworgy. 1,667,229; Apr. 24.

Wind deflector. W. H. Rose. 1,667,013; Apr. 24.
Apr. 24.
Window-control mechanism, Roller for. W. W. Carroll and S. W. Nicholson. 1,667,031; Apr. 24.
Window frame, Meter-. J. R. Delaney. 1,666,927; Apr. 24.
Windshield-cleaner motor. A. G. McCaleb. 1,667,559; Apr. 24.
Windshield-operating mechanism. W. S. Pritchard. 1,666,912; Apr. 24.
Windshield pivot. E. A. Henricson. 1,666,899; Apr. 24.
Wire clamp. T. K. Cummins. 1,667,345; Apr. 24.
Wire-coiling machine. H. M. H. Reufel, H. de Jong, and W. G. F. Wentink. 1,667,677; Apr. 24.
Wire-coiling machine. R. Shepherd and W. Dalheimer. 1,667,681; Apr. 24.
Wood-turning machine. C. L. Mattison. 1,666,906; Apr. 24.
Wrench: *See*—
Socket wrench.
Wringer: *See*—
Power-operated wringer.
Wringer. S. E. Schroeder. 1,667,496; Apr. 24.
Wringer mechanism, Safety. S. E. Schroeder. 1,667,495; Apr. 24.
Wrist pin. O. Cox and O. C. Willis. 1,667,588; Apr. 24.
X-ray film holder, Dental. T. E. Sikes. 1,667,442; Apr. 24.

CLASSIFICATION OF PATENTS

ISSUED APRIL 24, 1928.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 17: 1,667,282
30: 1,667,364
77: 1,667,161
79: 1,667,220
102: 1,667,526
175: 1,667,416
227: 1,667,363
240: 1,667,707
4— 213: 1,667,265
252: 1,667,593
5— 11: 1,667,080
7— 6: 1,666,968
8— 5: 1,667,524
9— 17: 1,667,414
10— 43: 1,667,338
12— 1: 1,667,527
51: 1,666,964
